... K- I think it's a beautiful ?? to remind all of us that physical life has dimension in time and space, and man wishes to stay longer to suffer more, and this is one thing I have not understood all of these years of being around, why does mankind see suffering as a way of, what I call salvation. (1:46). **Why we see this in the human race is something we do not understand, as somebody wrote to us, my mother doesn't want to be helped because she thinks that by suffering more she'll be closer to the Christ** when she passes away. Once we leave this physical life the freedom of the soul is the dream of the man. I have said many times, **I am ashamed to be in the body of the man, but this body has to go through its cycle, the time and point departure is preset, it doesn't matter what we eat, do, where we go, and how we try to trick the time machine**. No one has ever stayed long enough to remember the totality except the soul of the Creator. It's time for celebration as we enter a new dimension. So many of us think we could do this or that, but the best thing is to leave it to the STM to decide the position of the physicality and the sooner we realize this the easier this journey of the physicality becomes for all of us. Remember Sandor in the dimension of physicality, (1:48). but in a way he is ahead of us, and not behind us. Maybe the time when we enter the new dimension we'll see that he has laid the path to be better for us to achieve and move faster for the whole race of the humanity. Thank you very much for your presence Sandor, it does not need to be on the pictures and the voice. The knowledge of the STM sits within the secret of the physicality of the man and the sooner we understand this, the sooner mankind will move to a new dimension. As R said and the date of 11/11 of 27 (22) of October, shown , as I said, there shall be no more war. And even there shall be no more war in the ?? past separation of the STM from the ??? the time of ?? his physicality. It's a time of joy for many of us as we hear, and as we said, there shall be no war. Would our generation's children or grandchildren will be the first generation, that in the vocabulary, the word of war, the pain of loss ,will become something of a distance, that it was

something our grandparents, parents or great grandparents did. (1:50). The work of people like Shandor and of the K Seekers is that step. He is the creator and will show mankind to the direction of the peace as we wish. We saw how cleverly, when there was supposed to be a war, when there is such a leader as Putin, has changed to a victorious peace. There shall be no more war and if those who create it, will find out that they have a lot to loose. ... We will see uprisings in many western countries, US and Western Europe due to this peace. Uprising not by wars but in looking for new technologies that replaces now that these nations can't sell arms anymore. Change in the course of scientific development has become ?? imminent. You'll find out that western nations like France, US etc, will face a new calamity which is a good one. We have built so many companies with highly educated people to make tools of war, and now we can't sell. We have 2 choices, massive unemployment, or invest in a new cycle of T. (1:52). The option is the same. One of the reasons members of the KF travel the length and breadth of this planet in the coming months is to bring the option on the table. Plasma T and new sciences in the space T and changes in the direction of the betterment of peace. Shandor's and my generation, we are very few who have not taken arms to kill. By choice and condition, whereas our forefathers had to, to survive. Now in our generation we have seen the maturity of man. We have no choice but to create a condition of alternative science that the nations will thrive on it. When you have the T to develop the most advanced space T why should you, why do you have to create weapons to destroy. You are waiting for April for the KF to show the space T, with the cooperation of teh KF Iranian team we have started the celebration in preparing the party for the united mankind to enjoy itself by April. This comes as part of our work. I am committed to peace. (1:54). If the last war was going to be fired in the way that others were timing and planning it, now we see one choice, the choice of peace that with it, it brings peace to the STM, that we are not afraid of dying but we celebrate and choose the time of what we call the transition. From now on as we develop the knowledge more you'll understand that we can choose the time of transition, we understand that we do not pass, we do not finish on this. As we used to say, we change our address to a permanent address then moving from house to house, country to country on this planet to the address of the U Community, a destination for the time of existence of our soul. There is no need to change home, country clothing to fit in to where we go and what we see. We have started a path and when we said and we did, many people had doubts on it, but as we have seen, there shall be no war. The last skirmishes we've seen have taken place, and those who thought a bigger war would come up, by them withdrawing from Northern Turkey, has proven to show shameless loss to those who planned the bigger, but ended up with nothing. In so many ways, mankind has become wise, we have to put the structure and not wait to the point that we finish with physicality, but we develop technologies that we decide that we change the position of physicality, (1:56). to the direction of the soul that it never needs to depart, but stays as part of the totality of the Universal what we call soul. It is important for every soul to understand this position and for every man to understand the position of his soul. We get together on Thursday and share knowledge and with it millions of others share the same knowledge in different ways. We see teh wish and the power of peace and peacemaking has become very strong. In the coming time I will travel to live in Iran for a long time, as the peace has started and we make Iran the land of peace. It comes to us to go to our sources, and to become to understand the reality about

the creation and the life of our soul. In the past few weeks we have concentrated on showing so much on what we call teh Plasma Enhancement system, ?? what this system can do. Last week I shined more light on what I call its capabilities. Today I explain more. (1:58). As many of you are looking at this system as a way to get rid of Parkinson's to overcome the dimension of physicality, and very much if you remember when I started with the teaching you wanted to see the power of the system, cancers and how they changed things and you started believing in it, and then you made pads and everything else, and you enjoyed it. Now with this machine we are gradually taking you to a new dimension which you could not imagine. So in the same way we got the confidence from you in understanding gradually and moving into the Gans, gases and plasma T, we want to gain your confidence in what this T will do, that in that process, as I said last week you can take the system to a prison and by elevating the energy of the STM we'll have no prisons and in the same way with the physicality of the man. But what is the beauty with this new T, new system. You look at it as a womb of the mother to get rid of your pains. One of its jobs is the womb of the U to allow you to understand the positional transition from dimension of physicality to the dimension of the STM. In the coming time, very short time, man will walk into these machines in the dimension of physicality in the opening of it, and will walk out of the system as a soul. I can't tell you everything in one go, (2:00). but I have to guide mankind gradually to understand the process. You look into the machine for your cancer and diseases in the dimension of the physicality, I look as a creator to the dimension of freeing man from teh shackles of physicality, but as with Gans's and teh cores, I have to mingle everything together that you gradually understand. In the coming time when we reach the point of separation, before we reach the point of separation of the physicality we can enter these systems and allow us to choose the space and time, or in the coming time we decide we don't want to be in teh dimension of physical life in one place or the other. With these technologies will allow man to convert his point of physicality to the point of state of strength of his soul. Now you understand what these systems are. It says, Enhancement, you look for enhancement in your physical dimension, but I look for enhancement in the STM. We have to get you to understand more and to see that it works, that you understand it's time for transition. Two weeks or so before we showed it in Vienna, a picture of the system, we showed the animation of it. Last week we showed you more animation and with it the pictures of a man who still bounded. (2:02). Now we show with the same system and the same man, how much he has changed in a few days, which in the world of medicine cannot exist. Then in the coming weeks you'll see more changes, then in the time once you get the confidence of what is there25.

(2:04).

(2:06). ... As it has been said, I will stop teaching from the 300th K Seekers Workshop because I stop teaching about the physicality, I will enter to start teaching about the U Community and these systems will start opening doors for mankind. We'll prepare you in the first sections, and then hopefully somewhere around January a number of these systems will be shown operating in Tehran, Iran. This is the promise I have given you and to the Iranians. As every knowledge is shown fully in the place of its birth ?? some 20 of these units will be demonstrated operating fully in the city of Tehran as the

beginning of the change. At the same time in following days and weeks, (2:08). you'll see them in London, UK, Austria, Canada, Australia ...
... Shows the video of Enhancement Unit again. (2:10). ... (2:12). .. then the Parkinson's testimonial video ... Day 40+ exercising in parks .. (2:30).

.. with this machine we free man from being trapped with in the physicality. How simple we have changed the life of a man. Many outside China have written, we want to see to believe. Even we show it you'll not believe. The reality is that the change has come, and this is done many times. ... (2:32).
... We need man to understand that it is him who traps himself in the dimension of physicality. We need to be able to realize the transition from the tablets, the matter state to the plasma state has come. (2:34). The way our structure of physicality has come.

.. then it's every man's choice to decide the time and the place for the dimension of the departure of his soul, as Sandor did. It's not that it was not there. It was there because the freedom of it was there for the physicality to choose. We can change, we can. Understand how this new T not only changes the world of medicine but it will change the world, we as individuals decide to be the medicine for our soul. **We always looked at how we can get this physicality out of pain, but we never understood how much pain we put, and we created, and our soul has endured by our conduct and life in the physical dimension**. Simple, we saw a man in a wheelchair some 40 odd days ago, and if you look at the last seconds of the video, (2:36). the problem is not that he can't run, it's the doctor and the people who are with him, they can't run anymore. They stopped it. Because the joy of life that he can move again. ...

... Hopefully in the next few days a report will be made to the world of medicine. .. (2:38).
.. It's you who has to believe in your own self, not us. I have no problem in delivering the knowledge, but you have the problem in believing the time of change has come.
(2:40).
(2:42).
.. I have given the man the key, the freedom of his soul for the first time without the point of separation, as death to man in the dimension of his physicality. This is what this system will deliver, not getting rid of your ?? or your cancer or your Parkinson's. If you are happy with the crumbs you are quite welcome. If you go in with a wheelchair that you can't walk, and if you can change the dimension in the strength of the STM, the body will walk. This is what we do in these systems. (2:44). You have to comprehend the change that this will bring. You can allow more people to suffer with this as they do now or you can allow the change to come fast that we can force the change on governments and nations. We are not here to show, we are here to confirm. When you are put into these systems you'll understand one simple thing, that the truth shall speak. The strange thing is that these machines all carry a video and a recorder. We'll take the kings to walk in and they'll tell the truth about their actions. We'll walk the world's presidents into these systems and elevate their souls that they'll be ashamed of their conduct in the dimension of physicality. From the writings of Bahuala, that no man will take the crown of kingship as the realize the souls of the man are all equal. (2:46). It's not anymore in the name of

this or that religion. It's all in the name of the STM, and now today I unraveled for you to understand what this system is about. We are setting up the system that it has no dimension but at the same time the same system can create a condition in the spaces of the Mars and different dimensions of the U that in a way you'll see how you will live, how your physicality will be and you don't need oxygen, as on this planet it doesn't carry oxygen, but it has its own system of energy transferring. This is the fish tank I promised you. Now the fish is the STM and the tank is the plasma of the U, which will become confined within the structure of this system. In a version of this system you shall see no cores or motors, I'll bring the energy of the U within. You'll hear the voice of your own soul and tangibly you'll feel the existence of the Creator. I am the Creator. The creator of my own soul, of my own dimension, (2:48). and I share that knowledge with those who want to join. From the 300 K Seekers Workshop you'll see a new dimension of teaching, as the physical dimension of teaching is over. How would you handle your soul once you face, once you feel in the dimension inside this system on your own. I am the Creator. Many centuries and thousands of years (ago) it was promised, and now it is delivered. You have to understand something very simple, I have no mercy on those who bend backwards to harm another. Work through knowledge, and if you understand further, this is just a game in the dimension of convincing those who want to see to believe. But we can deliver this T in the dimension of this planet. Unfortunately, the decision is not in the hands of the man, those who are advisors have made the decision for the man. We have reached the point that we think that mankind can just be pushed enough to understand, to be able to become part of the, (2:50). U Community in the coming weeks and months. We just don't do magic, we show systems and T which allows man to take that step. Mankind has got to realize what needs to be faced. As I said before, we have not reached the number of mankind on this planet to critical mass. By stopping killing and wars it allows you to reach that critical mass. There are not enough of you to justify, to create a condition of open policy for man to have access. At the same time you are under quarantine, until you can show your conduct that you can behave correctly in the open spans of the U, no killing, no wars, no conflict, partnership, work in peace, development of the new understanding of the work of the U. You know if it has been created it has already been understood. It's just to keep mankind busy so he has a purpose to be part of the U Community. When you enter these machines, the lady who is there (in the picture of the unit) is just a mirage. You are in there, and the way they have been developed that you stand alone, (2:52). as the last man standing between you and your soul. Soon you will understand. The hidden universal knowledge and T with this system is beyond man's knowledge of comprehension of today, but I had no choice but to release, that I give that little push for man to go. Our friends wanted us to be in the stock market, I wanted the mankind to be part of the stock of the U and I have achieved it. We still keep busy with other things, but it is just to keep the physicality not to get bored. As it will be the job of the man traveling the spans of the U. As the children, if you have one sit in the back of the car in a small journey from one place to another, what do they say? Are we there yet? And would that be the cry of the physicality to the STM, have we arrived yet that I can show myself, here this time, to the dimension that you choose. Are we there yet, will become the question between the man and his soul, dimension of physicality. Are we there yet, for man to be mature to take this step? Yes, we have no choice. (2:54). Are we there yet to understand that we are all equal not only on this planet but across the U?

Mankind will learn soon. Not to be afraid of punishment, but to be ashamed to loose the opportunity to be.
Are there any questions?

Q: Will these first units be flight capable? We are back into show me so I can believe it. As it said, buy me so you can eat me. R- You did mention that flight might be a possibility and you are discussing this with the Iranian showing, is that still in the cards? Yes, we are still aiming for 19 to 22 of April in Tehran for the flight demonstration. We have asked for collaboration of Iranian scientist space T to join us and start the development in the next few weeks. (2:56). We are preparing the party.

.. Iran will become the land of the knowledge of the Creator. It will become as it was. We brought the poetry and love and now we bring the knowledge and the strength in the STM. You have to realize that you can not throw these things at once. Step by step we showed you the machine, we showed you 2 weeks of development and now we see the man running. I am sure in the next few weeks he'll come and thank you all for bringing the T to China that the Chinese could enjoy and he'll be the first man in China that has taken that step. If you think of it, he is the Neil Armstrong of China, small step for mankind and a giant leap for the STM. This is what International cooperation is. Hopefully as he reaches zero medication next weeks and as the side effects of the medications, which has taken over (2:58). years to finish then we'll all come to understand more. He can explain to us the pains he went through. ... Q: Does the unit require any maintenance, (what do you think) maybe after the life of the great grandchildren? Maybe after the life of the Creator. You are looking at the physicality. Q: Does the same principle apply as in the case of the Naomi helmet, with the brain reconstruction, or the principle of the orange fields transferred to the water, is that the same as this system? No. That system with Naomi was rebuilding what was existed, connecting. Naomi's case to full recovery will become a norm. As I guided step by step Giovanni, (3:00). even came to get exactly done what he was supposed to do. There are a few steps missing. The other step is, can we speed it up with this T, that is comes into operation. Now we know Naomi is trying to talk. It's taken a long path. With these technologies it will be very short. The understanding has to come that you don't go into these machines and jump out with 4 legs and everything else dancing. You go into these systems according to the wish of your soul. Your physicality will manifest itself through the dimension. You have to realize something which has been missing and I repeatedly explain, is that one point you walk with a wheelchair into this machine and you walk out with no wheelchair. You know the problems for those who put you into that machine and those who push your wheelchair for years. As I said to our team in China, looking after the one who pushes the wheelchair becomes more important then the one who is in the wheelchair. When at the moment a husband, wife, mother or child gets sentenced to limitation in mobility, (3:02). the others put their lives to make sure that he can be mobile at least in packages of wheelchair. They put their lives in it, they change jobs, they choose to care for that physicality which I respect. Your wife once you become paraplegic doesn't put you on the street and say good bye, we were married as long as you were good. She pushes you around for the rest of your life. She has to be respected. At the same time it is the job of the physicians to elevate the soul of the wife to thank for

the STM for what she has sacrificed, or visa versa. This is something that the present world of medicine doesn't consider what so ever. They give you the medicine, you're sick, it doesn't matter who pushes you or who sacrifices what. With this T no one pushes a wheelchair. We thank through the soul to elevate those who sacrificed to bring us to the point of maturity. This T will bring the STM to function, not much the physicality. In a way this T is what we use in the span of the U and for the first time we have shown you. If you read on the side (of the machine), it says, Universal Body Enhancement. This is a gift directly from the U Community, (3:04). directly to mankind. Now you know we have made contact. We have given you the gift and it's for you to respond accordingly. It's there to enhance the knowledge of the man to the gift from the U Community. I promised you that I will bring you to be able to face and to live within the U Community. This is our gift to you as humans. It's written on the side of it, but you never noticed. This is the first step. Mankind works, to keep himself busy to get this T in a way, we'll give you more gifts. This is the gift of knowledge and this is the first time in a long time that we have given mankind such a, what you call a shake of the hand. This T doesn't belong to humanity. This is a gift from the U Community to mankind. I am the bearer of the gift, but at the same time mankind has to embrace it. We will meet in these systems as friends and you'll understand who we are. We have opened the portal. (3:06). It's for the totality to understand and to accept, not this time to hide. We did not put this system as to sell, but for mankind to understand that we are here in full force and live amongst you. Now it is for your leaders to respond. We have created a condition of peace and this is a gift for man to stop the wars. The rest is your decision. I can make you play any games you like. You were waiting for the opening of the U Councils through your blood sucking nation of United Nations. We gave you the contact and opening to the U Council (?Community) through the blood of peace. Now you know who I am. You were happy with a wheelchair, I gave you the knowledge of the U, at what you were happy to ?? We have done our job and that is why from the 300 KS Workshop on we take you through the journey of the U. (3:08). We open the direct contact in Theran. In the coming weeks and our position is very clear, we are here to stay and to change the course. You were wishing and praying that you'll come in touch with the U Community, will do, we have done. We have delivered. You want it to fly, I'll fly it for you. If you want to walk in and see the soul of your father ?? I hope you don't walk out crazy. You asked for contact and we have responded. You wish for peace and the beginning of the change, we have given you the system and a tool. It is for your leaders to respond, even though we'll still try to keep the man's business of buying and selling. You are the merchants of death, and we are giving you the merchants of life. Now you understand the game of interaction, interface between the U Community and mankind has started. You have the machine, try it. (3:10). Q: Can the spaceship unit be used as a portal to leave the body and travel instantly to any place in the U? You try to get your body to understand it, the soul will teach you through. We have opened the doors and it is for mankind to decide. November, December, January, the world leaders have 3 months to respond. Any other question. Q: Jalal .. (3:12). I came across this person who was pushing this chair ... I asked, do you want to help the person who is in the chair? He said, yeah why not. With this T we can do a lot, we can help him to walk and get out of the chair. And this person, said yeah good, but wait, if he walks I will loose my work. ... The person said, no leave it like this because if he walks I will loose my work. I said, if you think you are benefiting from using his condition. He

said, no he is also using us to do all sorts of things. I said, I hope you understand what you are doing. I think in the future these people will understand what they are doing. K- Would you like to say it in Arabic language. Yes ...

(3:14). ... Thank you Mr. K. Now I want to ask you a question. You spoke in English the same knowledge and you shared it in the beautiful language of Arabic, in talking in both, which one touched you more? (3:16). This is a hard question. Which one had more meaning to your soul. Absolutely in Arabic. Now you understand why we choose the U Council through language. Yes, I came to this conclusion along time ago. We are all beautiful Mr. K it's the time to recognize that. I would like to speak for Sandor. The souls are singing happy birthday for Sandor. K- This is exactly what I wanted to say some time ago. But it is nice that you felt and you talked. The position is how far will mankind will take this knowledge. We shared this knowledge before in the time of the Pharaohs and it was abused in a very simple way. We share it this time with mankind as a whole and you understand how and why. (3:18). Do you remember we gave the USB stick with all the knowledge to man's leaders, to world governments and they didn't share it with mankind and it was kept in obscurity and then we gave it to all of you, you have seen how the spread of knowledge has taken place. We did the same thing in the past time. We gave the knowledge to the leaders and they did nothing but to abuse it in palaces and in trying to dominate. Now with this we give the knowledge to man the same as we did with the key, for them to change the world leaders. We repeat the same game because mankind was not wise to our work. Last time they headed in palaces and temples and then in Churches and Mosques. This time we give it to the man to carry it in the STM that you exist in the spans of the U. ... We asked Sandor if he could do Gans's, and he said I have no Gans's. That was his word. (3:20). And in the videos of today you have seen how much he made and how much he had. Then you understand the freedom of the choice of the STM is and has and will be with the STM. How can a master have no Gans's unless he has chosen ?? R- I remember when Shandor said that and that is correct Mr. K, absolutely. Now you understand. How can a master ?? and make sure that there is none there to stop him to his journey. You have to understand something of the background to the work of Shandor except me. His soul was ?? blessed (blasted) by many, by many who abused, and he gave them their freedom. One day mankind will understand the position of Sandor. No one except him and I know, we walked very closely and I know why he chose the path. He received enough that he was elevated, he wasn't happy any more with Gans's and he got ?? rid of them all. (3:22). Don't forget he carries the soul of the Core Team. Now you understand. The choice was his and he told me his choice ?? Now you understand, we have opened a portal as you call it, we have opened the gates of the U Council, and we have opened the gates of the U Community to mankind through this system. We wait for a response, but at the same time we carry on teaching to elevate more to understand. If there is no other question we'll call it a day and I hope the mankind and the world leaders and your leaders understand the message. We are not here to play, we are here to change the way we want to bring man to the next level, from the love of the Father, not any other position, we don't rule the physicality. We share the soul. Thank you for today. (3:24). ...

Video

END

300th Knowledge Seekers Workshop - Thursday, October 31, 2019

English Transcription:

(:22). ... There is actually 310. We taught and shared a lot and some people have benefited by it immensely. (:24). We try to understand more, we were a scientific group and we try to understand more about the structure of the U and of the things we never understood, and somehow in the middle a lot people, because of religious ?? because now they found out what was promised is not there, the soul and the Holy Spirit, and the STM being somewhere else, now has found the box on a place and it's called the brain. Some people thought we would become a new cult and they tried to start worshipping, but they couldn't build any temples and couldn't find any rabbi's to worship, and we all came to be equal and we started to understand that sharing knowledge doesn't bring superiority to anyone. .. Nearly over a thousand hours of teaching, overall the KF has something like 2,000 hours of teaching, private teaching primarily by me. No Messengers of the Creator have ever left so much knowledge equal at the same time, when the man ??? U. We share knowledge as Messengers to elevate the man and the STM to a new height. From now on we go in the direction to understand more, as I said we stop teaching at 300, but we teach more on the universal understanding, even though some of it will go back on physical understanding that the man can relate. (:26). My work, as I was telling Carolina, if we teach another 3,000 sessions we still haven't learned a drop about the knowledge of the U. We teach in short bursts or long sessions knowledge of the U. I never write any scripts, what comes is the knowledge of the Creator and it comes as a natural as is, and we do. Those who have been around as I teach, the knowledge that is shared is the knowledge from the Creator. And it doesn't matter who says what, we do our job. There is a plan in what we do, so all the wrongs you see there is a reason for it, and same for the rights. But all in all, as in this and the past couple of sessions, we have brought and we bring the totality to a new dimension. The video we saw is a new T, never seen. In the coming days we'll show more astonishing technologies that man has never seen. We dictate the terms and conditions of use. This is very simple, you'll understand that I will make energy free of the shackles of the material. I'll make food free of the shackles of this planet. I'll make man understand more about himself that he gets confident that he is and can be in the way, part of the totality. It's him who let's himself down to be. I have no problem with whatever has been showered on us, (:28). good and bad, and at the same time we are very reserved. We can do things that no one can ever imagined to be done. We promised to bring the peace and end the wars. That was the biggest promise of all teh Messengers of the past and I hope ?? There shall be no more war. We have seen every attempt made by every nation, powerful and meager to start, but one after another it shut down. There shall be no more war on this planet. That's what we decided, we are the creators and we

decided no ??? Mankind will move into a new dimension of understanding from now on. You'll understand more as we start opening the knowledge of the U. We are committed to our work and it doesn't matter what people say. You have to understand that I wear 3 different hats, one hat is a Messenger, one as a scientist, and one as a man. It is not very easy working with the 3 and the understanding of the totality. We speak on 3 languages and it is for those who listen to understand which one is which. I don't switch off and say this is this part, and this is that part. As you've seen we even get involved in teh business of teh man bringing the knowledge of God into the American stock market. We see what they have done to it and you'll see what will happen to it. We don't interfere, we can meddle with in so many ways, what you have seen in teh American stock market is not our job. We have decided to be there as a point of us being able to break the embargo on teh KF, the work of us, and it has worked. (:30). We have seen in the background big corporation have bought shares, some insurance companies have bought shares and now the shares dropped and they are asking why, questioning what is the validity of the stupid 12,000 fraud which Belgium has put on. Now the state of Belgium is under question. It's exactly what I wanted. For me to fight was too difficult, but now the insurance companies bought 1 million and 10 million shares, the institutes are buying shares, they question, they have to answer to the shareholders. This is what they do for us and you'll see a change in teh course. Not out of our unknowing, I knew exactly what is going to be the position, and now we have seen. People are not need to be so quiet, and do the job quietly. People will take action. The more we put the more actions we'll see. The expansion of teh knowledge is beyond the understanding of the man. As long as I am here I will try to teach. I have taken 2 sections of my life, a part of teh KF. My private life has become totally private, and my public life is what you see. The Messengers as Messengers of God, we share what we like. I am the promised one, there is no doubt about it. The amount of knowledge I shared is unmatchable, you wait until it is completed and then you'll understand. The prophecy of the past is fulfilled in every shape or form and I have no problem in teaching more, because there are a number of souls who have elevated to understand the next step and these will become the candle of the future to guide ?? (:32). We play the games of man because that is how he likes to play to confirm he exists. We see deceptions, fraud and everything else. We see stealing from the KF and we see so many have put their lives on teh line for the KF. We see that many people have risked and many who have tried to risk it, but it all goes to where we want, the goal is what we set and it will be there. As you have seen in the video of the system, it is changing man's life. This system will change humanity's life. The first units will go to Germany. We have seen teh first units going to UK and Thailand, orders come through for another country. We see and have done the first agreements. The first KF Space health Center will open in the state of AZ in teh US with 10 units. The contract has been signed and teh systems will be delivered. This center will run on KF AZ and is not owned by KF Global. It's a private venture of the KF in collaboration with American partners. This center will open around January and we'll be a space lab of the time to come, 22nd century. Last night we were with teh state officials, people who advise and they know what we are planning to do and what has been set up. This center will be teh center point of the presentation of the KF space system prior to opening of manufacturing and a space center in AZ. The AZ 10 units will be matched with 10 units in Tehran. (:34). As we said we'll bring the 2 sides together, Iran and US. AZ will open the same day simultaneously.

I will be in Iran and Armand will most probably be in AZ for the opening. And at teh same time we'll try to open the same structure in China with the same unit. These are operational commercial systems, not research as you'll see. We'll keep the promise, the first 50 units will be spread across the planet at the same time, that we keep our ethos and our work. We showed teh T in Vienna in the first conference for the first time. In our meeting in teh conference with the presence of the sate ministers and ambassadors in the Brazil next week we'll show an astonishing new T, we try and we'll decide how it will be presented. This T will be a breakthrough in the world of science, if we decide to show it according to the position we take. Every conference will bring in a new revelation. This is our job. We'll pressurize teh world governments to bend to what we need. Do not forget presidents get cancer too, Alzheimer's and Parkinson's. This fits them perfectly. You have to understand one thing, we are in to change and you'll understand more. We are in to change with you, the totality. (:36). The number of KF K Seekers is expanding dramatically. We'll respond to the position that happened in Italy that it forced us to close our factory. You'll hear our position in respect to Italy and it will be done with teh Italian government. We have consulted with teh Italian central government and we'll take teh factory into the position of cleaning up all teh waste in the Italian nation. What happened in Italy, it is a decision for the Central government to decide how to behave and handle it. We are a foreign investor. I am not an Italian citizen so as a foreign investment by the KF the Italian government has to respond to our investments, that is their responsibility to allow us to invest more in cleaning the waters of Italy. We'll release documentation through KF Global directly what is involved in the Italian situation and Italian ?? I have learnt ?? with us and Italian government to solve that. We leave all these matters as it is highly technical and the project will be financed to the tune of 300 million by the KF and will go under the banner of KF Austria. It's got to be understood that we'll take the next step in our presentation in the kingdom of Morocco, we'll show another revolutionary concept and T and again as we did with the last one we'll offer it the world companies to take steps to be our partners. (:38). From now on most of our work will be keyed up to the governments that's why we've gone through the structure of the international show conferences. This situation will be very dynamic, I am not really concerned what is happening around teh smaller parts of what we call, a bunch of thieves around the KF, they are so meager that they can be, and they'll be handled by their own ?? not our job. We are here to bring together, we are not here to divide. We are here to make mankind to walk away from the stupid behaviors of the past. As I said it's one of the main commandments out of the all the ones which ?? Thy shall not steal. You cannot steal from teh KF which gave you the bread. I'll take the step to make sure the situation in Ghana will never take place. It will never take place. We sit across tables with governments, they have 2 choices ?? thefts or we draw off investments which is cash on the barrel. We all know which way governments go. But we still leave room for those who have done wrong to correct it. It's very clear, I will stop anyone who takes wrong steps about the KF, thinking they can walk away with theft of intellectual rights, and technologies, you have a long way coming. We stopped the wars of the planet, you are no war, you are ants on the wall. We will release more data, knowledge and information regarding Ghana through the Ghanaian government press releases. (:40). This has to be taught that we make an example of people, that people remember. We've seen in the past 300 teachings, Red Circle, ?? fire everything he could do lie to the court and teh rest of it.

My response to the state of Belgium our negotiation is one way only and that is, all the damages to the KF, millions of the books downloaded by deliberate act of what we call their agent, has to be paid back to the KF it belongs to the KF. All the damages that were done, now we can quantify it has to be paid back to the KF because it has to be spent on the humanity. We'll accept only one sequence and consequences, imprisonment of Red Circle, as we did with Alan Sterling, we'll get what we want. The same goes with teh police officer in Belgium, imprisonment and it has to be according to what we want. The same has been agreed with Benjamin's case (Ghana). You have to understand that until we don't make an example by their own conduct and deed then it will be no different then the past. We don't touch, they done, and they'll do. It has to be understood that the knowledge has to be free, respect for the knowledge has to stay free, and understanding that the knowledge is to be shared, it has to be free and respected for what we call, sharing of the knowledge, that keeps the society in order. In the coming days and weeks I'll release technologies that will start changing the course of humanity in a very rapid way. (:42). We are not looking at things that you might think possible. We'll deliver you small units as small as smoke detectors and you can place them around the house, you don't need to eat or to warm up. This will be shown as part of the structure at or before Tehran meeting. We'll release enormous amount of T. We'll paralyses the money transaction situation for those who live by money, because this has been one of teh biggest problems on this planet. Greed for the money to bring power that the greed of the power dictates who is more. If you want us to show you the power, no problem, you choose how many heads of state you want to walk around like zombies. I deliver. You take a vote, I deliver a zombie president to you. This is so easy, then you'll understand that we make decisions. It's very simple to understand the T is not a practical way, away from the past knowledge, and on its own will take and make its own decision. In a very short time many of you will see what we call thought and emotion controlled systems. The first ones are under test at the moment. We decide everything, we don't need computers anymore. These are part of the teachings which will come in the next 300 teachings. Man has to understand and gradually progress to that point. I'll deliver in teh time to come, the total interaction and teh first face to face delivery of the man, officially and publicly with the U Community. (:44). This has to be understood that it needs a lot of peace. It needs to understand that it is the time to meet. As I said, in the next 300 teachings we'll open the U Community step by step. Most probably we'll start with small creatures that man can get position of, to see and understand, to befriended. Even though these are lives are more intellectual then man. Then we'll go through the steps of teh full interface within teh next 300 teachings. Then more knowledge will be taught according to the ?? man. I have one message for the world governments, collaborate and make it easier, play games and you'll find out that there are no games to play. We go back into what we said, and we keep to our ethos. The ethos of the KF will not change. The situations that have arisen for us have all had a benefit, there is always a good side to everything and not a bad side, but it is for us to show the good side because teh bad side will be delivered by themselves to themselves. I have taken a decision to separate totally my private life from the KF work, and that will become more and more apparent, because I need teh space and time to live a normal life. I have put enough, over 40 or 50 years in the knowledge, now it's very simple, I delivered the knowledge, now it's for you to ?? I have opened the doors but you need to achieve it. What you achieve is according to the

intelligence of the ?? physicality of mankind not what ?? (:46). We have a good news with us which has been one of my main concerns for the past few weeks, Armand is back with us after a very large operation and it's nice to have you back Armand. It's been a big headache for me for weeks and the past two weeks now he's back with us. On the other hand you'll see as with patients in China and others around the world, we'll set live testimonials as we open different centers around teh world, that the doctors and patients can see teh development. It's important that we all understand how the T is applied and teh progress is understood by all of us. The Keshe Spaceship AZ that's in teh hands of total control of the KF 51% shareholding and capital investment by the American side is one of the most center points of teh T. It will show the advancement, we put a lot of effort into it to make teh jewel in teh crown of the American operation. We have no problem with this, but at the same time the American government has to understand that we are in as One Nation, we are not in as different nations. Investment in the US is investment by all teh KF as a whole, not belonging to, but a part of One Nation. In the coming meetings in Brazil and in other countries we'll make this very clear to the nations. We are not here to play the old game, we are here to play a new game, a fair, a just, and secondly eliminating all the ?? coins, (:48). all the damages which mankind has done to himself. In Italy with the Italian government we are there to change a massive problem for the Italian nation. Many of you don't know, but with what we have in our position we can literally bring teh economy of Italy into ?? freeze. This is how powerful and how much we have access to information and knowledge which we can change. It's very easy, Italian government has no choice but to collaborate in changing the life of not only Italians but the rest of the world. We'll release teh documents through the KF Global, through our press media and it's for the governments and people to make a decision. It's important for them and not for us. Nations who do not collaborate, we have no problem, we'll make them to collaborate to bring peace. Collaborate by knowledge and friendship to understand the game has changed, there are no more wars, we have to find a solution that no citizen is hurt. In part of the teachings today I will start to open new dimensions which you all know but you have to understand it. Knowing is different then understanding. As I always said to my children, when you comprehend you do not need to remember. This is the key to the teachings from now on. You'll be amazed at how much all of you know, and how much you thought you didn't know but you do know. (:50). We'll go into the structure of the soul and teh physical body of the man and then into the structure of the U Community, how the societies are established in teh U. How the structure, understanding of the laws, set up by what we call, citizens of the U for collaboration and cooperation. It's very much different then what mankind has agreed between nations on this planet. The principle of the work is the understanding of the peaceful condition. War does not exist. It's something that is not in the vocabulary of teh U Community. Now you understand why we pressurize so much to get rid of it, because we don't want it to enter into the vocabulary. We are aware of its damages, of its shortcomings, and what it can do to us in an open society. In the coming past few weeks and months, more and more reports of interface or interaction with teh U Community has been done. Many of you have seen more things which I have never seen. There is a reason for it, we are trying to familiarize, these are handshakes or hellos. These are there to tell you, we are here. But at teh same time you have to understand that we are here through the person who can confirm and bring you to us at the same time. My job is not

easy, trying to bring a bunch of animal behavior to be normal, and trying to convince teh normal people that these people have changed. It's a give and take. There is a lot of opposition to my work on this planet. (:52). There are a lot who want to leave this planet to go back to its mother and forget about it. There is a short time left, as compared to the life of the U. But as we say, every soul is worth saving. I hope and I know I will achieve it, but the problem is those men, with what we call the black soul, which are in hand ?? ?? In going back to what is part of our work in teaching. I thank those corporations who are working in the background to help the KF in different ways and opening up to what we call the global work. We see teh smaller man we work with the bigger claims he makes with what he wants from teh KF. They want all of it. But when we talk to the corporations they want to give it all. So we see a lot of cons and pros in how to work with individual groups or in collaboration with big groups. This is part of the game of the man and we play it as it suits the man. We talk to the guy from the kindergarten the same language that he understands and the same guy who is a professor. We go back and we start teaching, mixing and bringing a new dimension to the teachings, that now you have been through the teachings of the understanding of the soul, as I said before, we'll open teh structure of the soul and the creation in the U. We'll open the total understanding of creating conditions. (:54). Mankind doesn't need to travel the spans of the U to understand the work of the U. What I teach you will give you the understanding that you can bring a condition of the U here on this planet. I have started working with a number of Iranian scientists to bring this position as part of the teaching. My work with teh Iranian nation will stay sacrosanct. I am committed to the nation of Iran and the establishment of peace in Iran through the present government of Iran, not by change. This is very clear. We respect every nation according to their election of the people and the government ?? The same as we do with America, the same as we do with any other country. We are here to serve the nation and not the government of the nation. The same goes with everything else we do. It has to be understood that we are committed to peace and peace comes out of strength with knowledge and T. The status quo was kept for years because both sides have nuclear weapons and they were afraid of using it on each other because they knew they both can wipe each other out. We don't work that way. We'll spread teh knowledge so much that nobody will think to have, ?? in position and I am stronger. It's just that we are equal. My work is very well planned, even though it might look like it goes everywhere, it's just a matter of putting everything at the same time teaching the kindergarten as much as the tenth class and the guy who is professor. They all come through the same channel and process. In going back to what we start with, the video, our present volunteer as you have seen today, (:56). he is down to the last 2 tablets out of what he started with. We are down to about 89% clear of medicine and we see a lot of developments. We'll release more videos on him in teh next couple of weeks. Then we'll show you the other patient who is with epilepsy, he is by today down by 35 tablet out of 47. We are left with around 12 more tablets to come up with in the next 2 weeks. he'll be free of all medication. The beauty of it that they'll start living a normal life, and mankind will start living a normal life. Knowing and having this T doesn't mean that man will live forever, his soul will. Even his soul will come to the point of transferring his knowledge, transferring what we call his strength, to another soul to the creation of the others. So for mankind, just becoming a part of the KF doesn't give you a "jail free" card as in Monopoly that you'll never die. We all change position, we all change strength and

it is how we create it, how we accept it, how we celebrate life, the point of celebration counts. Man has to learn that he just changes an address of a home, sometimes the address of the home of the soul has to change. (:58). You don't want to live in teh same house for a thousand years, so what you call death is just a change of position clothes for the STM. The sooner man learns this the easier it becomes for man to understand he doesn't need to grab because the end will come .. there is no end in reality, because even at this ?? stage of life man is part of a chain process, it never started with him, and the ?? sheriff never finish with him. In understanding this we try to teach more and get you to understand the facts about the cycle of life, the cycle of transfer of fields, that's all human life is, that's all life is in the U, a process, a cycle of change of different strength. It's a voice coming out of your mouth. It's a thought in your brain which creates that voice. It's that voice which goes down the line, and which is again an energy field itself which transfers and transformation, which is heard by another man and he changes his life, or does something because of your voice, the energy he received, then we understand that the life of the man is just a traveling energy pack, nothing more, nothing less. There is no need to be proud of what we call the body of the man because as we have seen it is just a temporary clothes, temporary, what we call shackle of the STM in the travel of his energies through the dimension of the life of the U. (1:00). Sometime sooner or later man will come to understand this. In fact what does it mean? How does your body structure work? How do you come to exist? What is the difference between the body of a man and a stone? Both are creatures of God, both are created by the compact and impact of what we call different strength M fields, but how come we can keep some dynamic and not keep others dynamic, how come when we put dimensions of fluidity of the fields we can create intelligence. How can mankind come to understand that with this knowledge, as you understand from now on everybody is in the same boat. In olden days and even now many of us still go to a tailor and we buy a suit or clothes or we cut it ourselves and we decide this is how I am going to look. This was the fitting, the outfitting of the physicality of the man, now we are teaching and understanding the STM and operation of the soul in respect to the fields of the U. The fields of the U becomes the scissors and the decision of the STM becomes the clothe, you decide which way this clothe is going to manifest itself. Are you going out with a summer suit or with a miniskirt. Are you wearing a fur coat or are you becoming an Englishman, fur coat and no knickers. You have to decide how from now on you dress up the STM. (1:02). Up to now you have dressed the physicality with different shades and clothes, but now you can with the new knowledge to understand how you dress up this soul according to the position and the presence of. On this planet you might need many different characteristics, but if you understood much easier then the birds did, we showed teh hummingbird (changing its color) some time ago in the teaching. You can change your body the way you want, even on this planet, It's just you need to decide. We have tribes that can already do this. In the T development which I am discussing with the Iranian scientists yesterday, those who understand teh depth of the knowledge, you can decide how you manifest yourself, at the position of manifestation in the dimension of the environment of the new systems. As one of teh things that we'll teach in these new systems come in, you go to Walmart or a clothes shop, you buy a new clothes and you come out. If you understand the work of the STM with the new universal systems you can go in and manifest yourself in teh dimension and the shape and the understanding of the satisfaction of STM and manifest yourself. Do not forget this is

what mankind will do in teh spans of the U. Now you understand how we are opening the knowledge to you. How you have to see and understand what is about to come. The release of the Universal system is not just what you thought. There is more to it, as one of teh Chinese has sent me a message recently, it's a carrot (1:04). sitting on a donkey and the donkey running for the carrot. There is no donkey, no carrot, and there is no me. You have to understand that it is you who decides, a carrot, what you want to be. With this new Universal Unit, it's not just to get rid of Parkinson's or get your soul elevated, the next steps of the use of these is the system matches to your soul and it's set to match your wishes. Then you understand that there is no need to wear a frock. If you do what the universal creatures do, the covering of the sexual organs that this is the biggest problem for the man, then you'll find out that you have nothing to hide, there is no reason to hide. Only who you decide to see will see what we call the naked body. The wearing of the clothes and hiding it will be over. Very soon with the systems we'll show you'll understand this. In AZ with the structure of the system the way we have discussed it will be that you can manifest and manufacture not only what you want, but any material you want. Part of the structure of the AZ KF system is not just for environmental, it's to show how to make water, material, and to show how to clothes yourself according to your wishes. This is a very bad news for those ?? excell guys, if you know what I am talking about. This is needed to be done that when we take you into space, that you don't need to run all the way back to Marks and Spencer's or Wal-Mart to cover something, 2 holes and 2 bobs. (1:06). You'll understand that the love which you show will manifest your position, I want only such a person to see me in the position of my emotion on certain behaviors. This is not a dream anymore, this is the reality whcih slowly with these systems we create a conditoin to elevate the STM to learn about this process in his soul. Now you understand what the use of these systems are. Why I introduced the Universal System at this point. Any person tries to copy this, we'll make sure they'll have a big problem on their hands through their soul, because this system has to done the way it is set up by the KF because we know how we are structuring it. Somebody microphone is open .. that's your friend, which one, Armand, oh, it's okay, he's in hospital he just knocked the thing off. Put it up Armandjan. This man has survived a huge operation and it's nice to have him back. It's understanding of the totality which counts and understanding what these new systems are. Step by step I am opening the dimensions. Step by step we know what we are doing in the structure of teh T. You'll see people will change, people will walk in to these systems and realize that trust has to come from inside (1:08). the STM and not inside the emotion of the man. Then you'll change and take new steps in life, you'll understand, do I need to kill something else, try to destroy something else for me to have. I spent 2 years in China for my understanding of the man. As I said to Carolina the first time she asked me, I have come here to understand mankind that I can work through him. Through the Chinese I found out a lot about cheating, betrayal, dishonesty, and many other things. I could not believe that Chinese are that way. But it seems the closer you get to Beijing the bigger cheaters appear. That is the state of Chinese but they have to understand. It's the same with the Americans and we have seen what happens with the Belgium's. Understanding the totality is important for us that we can operate within them. Trying to do something that you don't understand is very difficult. We understood how this nation works because I lived amongst them and tried to understand them and one thing that appears very nicely is Chinese have a lot of ethos, but

it is lost as it gets closer to Beijing. What has been called teh money has become the main center point. They cheat and betray and the operation is very simple, steal as much as you can and then keep a clean face, then there is nothing wrong with us, it's the rest of teh world. In so many ways I agree with Trump in the behavior of some nations, but I understand he is a problem for his own nation too. (1:10). We have to understand with the totality, there is fault in all of us, in all the nations. We understand more and more as we open the dimensions, **it's the responsibility of the Chinese to change their own structure using the new T to bring that change condition**. The same with the Americans Iranians and the rest. We are not all clean. We all have changed according to what we call greed, has changed the man. Now we have to understand the totality, we close our eyes to what we call teh mistakes of the past, but we open our eyes in understanding that the mistakes have to bring us an advantage that we don't make the mistakes again. My work is not connected to any nations. My work is connected to change the soul of the humanity, it's a collective soul of the mankind and all the inhabitants of this planet. It's very simple you'll see in the coming time with the new understanding of teh structure of teh soul of the cell, or what you call teh dimension of physicality of the man, it will allow you to change the soul of every part of you. Don't forget you have a soul of physicality, a STM, and then the STM and STP in reality is a collection of the interaction of the soul of every cell. It's for man to understand this position. Darwin called it the evolution. There is no evolution. The only evolution is the revolution of understanding the truth about (1:12). the operation of the STM and how it responds to its environment and its position. Up to now you only understood according to Darwin or tried to understand the evolution of the physicality. Now mankind has to understand there is an evolution of the STM which he himself is responsible for. Nobody else. Then you transfer this evolution to manifestation of the physicality at the point of the decision making by the STM. The STM has emotions and the same thing as the physicality has. Now you have to understand the emotion of the soul. Then you'll understand how we work and we change things accordingly. There can't be any misunderstanding the development of the new enhancement units is to enhance teh STM, we don't really mind if you put the physicality inside. It's the process of the education of the STM to bring mankind to understand and start interacting and understanding that he has a decision making between the interaction of the STP and the soul of himself. If you understand this then life becomes very easy for mankind. This is part of teh work which in the coming time we'll do. Up to now you started understanding, (1:14) you dissected teh body as did De Vinci to find out where the heart was and what it does, and more scientists tried to find out how many, god knows cells are in one part of the body and the rest. Now with the new understanding we open the structure of teh STM, because if you understand the soul in respect to physical manifestation in being able to observe or understand the feeling of the material, needs an arm, or needs to understand that we would like to have something, to be able to pick something up. You decide how long the arm is going to be, or how short the leg will be, or you decide if you need a leg on this planet or not. But you have to understand in any shape or form, through my soul I can travel all dimensions of the creation. The delivery of the universal system is getting unraveled piece by piece. By the time we reach the delivery and showing of the systems in Tehran and in AZ, it will be very simple, mankind will be taught enough in the next 3 months when I go in the system, it's not the system which works, it's me who asks the

systems what to elevate me to. Then the physicality will follow and mankind will start getting educated. (1:16). When you enter these systems you'll be as naked as your soul. Many people will walk out of these systems with a lot of changes. Many of you will find within yourself the truth of what you wanted to be. There is a very interesting point, those try to replicate the system, you'll know very soon, you go in and nothing, you into this one and you can change to what you like. So you know who the crook is sitting in Italy. We'll see how it works, if Chinese can cheat and replicate, because it's very simple, they think they know, but you know, we haven't given the golden key yet. It's hidden within it. One day you'll ask me where is the key and how do you know, I will explain to you. The process of understanding the T is very simple, it's the knowledge of teh U and if you want to work with it you have to let the dimension of physicality of manifestation to, not to disappear but to understand, is a way of manifestation, confirmation of my existence. I challenge any world leader, as you have seen, teh Belgium's have tried, (1:18). it doesn't work. I challenge any world leader who is set up to create peace to see how far he'll go, and how far he'll achieve it, as he has our blessing. The point of world leaders from now on, the point will be challenged how appear and try to say they are teh cause of peace. We seen the first cheating of it in the past couple of weeks. The Russian president with the Turkish president achieved peace, in stopping everything, while the Americans pulled out of the North of Syria to create a new war, and there was nothing (no war). There was a statement on the day of the passing of our friend Sandor, and then 2 days later the Americans came and claimed, our team has been there, we achieved it, it's such a glorious thing. We know where the truth sits. False alarm, false claim, but the truth is, nations who go for developing peace, leaders who go for developing conditions of peace will be supported by us. Those world leaders who look for what we call the prizes of life, are those who commit themselves to the peace. This is our wish and you'll see this will become more and more. The understanding of the new T is that you'll understand that it is your soul that changes the position of the soul of the others. If there is the sincerity of teh wish of teh change and giving from your soul, (1:20). is in truth, a sense of your own peace. When you are at peace with yourself you can do so with the others that you can do more that they can reach your point. Plasmas of the higher strength always give to the lower and there is nothing more stronger then peace which means living amongst others that equal shares and equality then anything else in teh U. Then you understand how we decide and how we change. In reality when you enter these systems what you'll see is that every cell of the man will shine, because each one is a star and carries a dynamic plasma. Then you'll see how you want to reorganize these stars, according to pleasing the STM of not the physicality of the outside when you walk out. In this process many of you will come to understand one thing, what was all this fighting for, all this suffering for. Why has mankind created so much mayhem, and what is our responsibility from now on. What do we understand, are we committed to peace on this planet or are we committed to peace in teh U. (1:22). If you target for the later you'll find out, the first one ins no problem. Those of you who are members of the U Council have to elevate your understanding of the soul and the work of your soul to the next level ?? You have to start establishing understanding the soul of the work of the soul of the U, not the mankind, you already carry that.

.. Nothing will stop us from what we are committed to. .. overwhelms you ..

(1:24).

(1:28).

(1:32).
.. bypass millions years of ignorance ...
(1:34).

(1:36). ... Any questions.
(1:38). ... Q: reptilians etc..

(1:50). Clean up your house and don't blame others for it. I want to teach you something to understand. Accidents happen doesn't matter where in the U. There is a law that if you are involved in an accident, or as you call it, something happens accidentally you have to restore the physicality to the dimension of his soul, that you not cause the separation. So if you understand this you'll understand that no man of the U has ever committed murder on this planet, as he has teh capability to reunion or unify the both souls. So those who talk this kind of nonsense you had better close book, close shop, understand your soul and blame humanity for its shortcoming. Your lack of knowledge is the noose around your neck not the U Community. Any other question. Or are we becoming like Mr. Trump we build the walls that nobody crosses, but now we have spaceships and we go over it and we laugh, the way they used to bring castles that nobody could get through, then we built the rockets and planes and flew in and bombed it to smithereens. For the man of the U Community there are no borders or boundaries, and they don't need to destroy anything as they have what they need and they can produce what they need. Earth is a shame state and not a real estate, if you understand. (1:52). Q: The soul is in a state of wisdom and peace, why does this not reflect in the physical? Because you have a dimension of the interaction of the field forces of the soul of this planet. This is what is wrong with it. These two combination make a mayhem of the problems. You ?? react to the soul of this planet to physicality of this planet. I was listening to one of the teachings with Jalal yesterday or the day before, and he says if apple becomes gold and a chicken lays a golden egg, the soul of the physicality of this planet has interacted to the dimension of its interaction, to create this mayhem. If we raise the level of the soul of this planet, that in that interaction with teh STM, the greed, the killing and everything else goes that it can tap into the universal energy, then none of this will exist. The problem is with the soul of this planet, what sits inside it and how it interact, the soul of the planet is like the star, and in interaction with the STM, like what you see, you create rain, create hell. And this is the hell, which in interaction with the soul of this planet the STM creates. We never have this anywhere in the U. It doesn't matter what we change with the STM, our work at this moment is to raise the soul of this planet. You don't understand, it's beyond man's comprehension. (1:54). It's like an electron and a proton, the two have somehow interacted that we can't release one with the other, but we can gradually as it is happening now, changing that position. You'll understand very soon. We don't see the greed and killing just in mankind, that they say the reptilians came and did all these things. What about the fishes and why do the lions kill? Did the reptilians become lions or the whales and the fish. It's the interaction of the soul of this planet which creates this mayhem. We

have two choices, let it go right in, or push it go right in. It's very simple. This is, it doesn't matter what I put here, I get the same thing. You don't understand what problem exists in the U Community with those souls who reside here for a long time. This is what is wrong and if you listen to the teachings I have referred to this many times. It's the same as if you have the interaction of the soul of one of these big stars in the solar system, that in interaction with the same field of the sun, creates mayhem of heat, temperature, thunder and always danger. The problem not only sits in the soul of this planet, the soul of this solar system has a bigger problem. When mankind becomes slightly more educated, (1:56). he'll understand the way the tilting of this planet has caused the creation of life, the solar system of mankind has a tilt in it and that is part of the problem too. This is one of the biggest problems, the mother is sick, so genetically it is inherited by the soul it creates, the STM, and the interaction of more creates more mayhem. This is why we tell you to create a just and correct soul that in time of the departure, in becoming a star in the U, you do not cause teh mayhem and see what I have seen. I open the eye of the man to many fronts but be ready to be honest to accept it, but be honest to understand, in reality there is not much you can do with it, unless those souls who want to elevate to understand this, and in a way you come from a violent home, drugs, addictions, alcoholism, and everything else. You want nothing to do with this home because it is nothing but pain, you walk away and set up a new home and you live by yourself in the ethos of peace and you never talk about it. This is the opportunity at the moment we are giving to some of the man, who can, who want to live this mayhem of violence on this planet behind. You do not understand what we put on teh table, (1:58). because you are still looking at the bank accounts and how to have the food the next day. The best choice we have is what we have offered to you as the Universal Units. At least we give you a new dimension, a womb, a new start for those who elevate to find their way out of this mayhem of this drug addiction, murder killing society of man and this planet. 38

... I cannot change the structure of the soul of this planet, but I can help it go in faster. .. (2:00). .. Any other question.

(2:10).

(2:26).

(2:30).

(2:34).
... Q: What is the position of the MaGrav that we have built? What do you mean by position. The MaGrav is the key to man's freedom in elevating his soul. What you call the Alex beads is the operating of the STM in understanding the totality. In your life you come across very few pure souls and Alex is one of them. Through the purity of his soul he has understood the work of the U, but through the lack of the knowledge of the physical physics he releases his knowledge and understanding in a different way. If you understand the work of the MaGrav, (2:36).

(2:42).

(2:48). ... Q: How does it balance the body back to original as the body consists of a large variety of Gans's and salts? Would you like to answer it, I gave you the answer before at the beginning,

(2:56).

(2:58).
... Q: It was a question about what Mr. K was explaining about the planet earth, how the soul of the planet was crippled and he mentioned that unless the man in the process, cleaning up the past, that is why I raised that question? (3:00). What did he mean by cleaning up the past? What is your understanding? Q: It's kind of confusing for me because I have been ... there are things that are effected in daily life that is from generations before. I don't have the ability to digest that in a way to understand that, is that what you meant? You see the life of the man is not just DNA based, it's RNA or the STM, so we call the soul of the physicality RNA. The scientists have not understood this part yet. So what I just said about the distributors (Italian KF), the deed will go in the direction of what you call RNA and the direction of their soul, and in the line it has to balance itself. So if the strength has not existed in the past 200 generations, for what was done in the 200th generation, and now the strength of such a horrendous act is now available, and now it matches. (3:02). It's as simple as that. (yes) we pay for the ?? acts of our forefathers, because if they have done such a horrendous thing and it was so ?? heinous in the structure that no one up to that time was at that level of ?? doing that, because M fields only match when they are of the same strength. Now you'll find out in generations it is balances that, so balancing that it changes the direction of teh physicality and everything else we see with it. Am I clear. ... so it is important for us to understand how it works. I listen to myself after teachings many times, what I say is important. It is important for you to understand otherwise I wouldn't put it there. The conduct of, the misconduct of, depends on what level strength, if you have created joy will come back to become at that level when your ??? reach that level of the soul level. (3:04).

(3:08). Q: From where does the Universal Enhancement Unit take its energy? It receives from the U Energy, these are the gifts. One day mankind will understand.

(3:10).
R: Are those Universal Energies what the scientists call cosmic rays? Cosmic rays is the totality of the fields of the creation, (3:12). and part of that ray became you and your soul. R: is that what we tie into to be able to create self-sufficient energy ? Of course it is. We are made of it. If we know how to tune to it through our soul, as we are weaker it will feed us. This is what a lot of K Seekers don't understand and I keep on saying that you don't understand. Why do you keep on saying we don't understand, we are not stupid.
40

(3:14).

(3:16). There is something I would like to discuss as we are setting up different things, thanks to the support of Northern Europeans ...
(3:18). 3 Units given back to German community as gift ...
(3:20). ... we waited for you to contribute but none of you did.
(3:22). .. We have to create jobs so man doesn't get bored ...
(discusses the business side ...)
(3:30).

(3:32). Q: Was Mr. K influenced by Sufi knowledge? I know nothing about Sufi's. I have seen them dancing that's all I know. Actually I have a cousin who is a Sufi. 28

(3:38). Q: Is it correct that the medical unit is nothing more then an applied physical filter for the soul in the conversion of the plasmatic to the matter state? No, it's the reverse. We are trying to get your soul moved, you've had enough with physicality, what did you do with it for billions of years. You created more problems with yourself. People who go in these systems will come out a different man. You'll understand. R- moving from the matter state to the plasmatic rather then the other way around? The dimension of the STM. Q: When we separate from teh cage, or body, does the soul know where it is positioning itself, yes? Yeah. Q: What you are teaching us is to travel together with teh soul and the physicality? No, I teach you, part of the teaching is to understand that you have now a choice, of time, place position and physicality. (3:40). This is the freedom the man never had ..

(3:42).
.. Q: So the freedom of man will come when they learn to work as one humanity in a peaceful manner, that is where you are referring to that then they can offer it to the U more freely? In a way, you have to understand when the man works, the STM elevates as totality then you ...
(3:44).

Q: All the souls that have already separated from the physicality ..

.. This solar system is a misfit ...
(3:46).

... Shall we call it a day. the next 301 workshop will come from beautiful city of Brasília where we are the guests of the Brazil KF for the conference. ... I thank the whole team in the background. From there we go to Morocco ..
(3:48).
.. at least we are creators of peace of the man ..

(3:50).
End

301st Knowledge Seekers Workshop - Thursday, November 7

(, , , There is no reincarnation man has access to the totality of the knowledge,)

English Transcription:

(:18).
(:20).
.. mic problem..
(:24).

(:42). The KF stays to serve the nation. This is important for those who come to listen as shareholders of other companies, we are very strong and we show our power in what we do. We know where to go and we how to do business. 23

.. In going back to the teachings, we don't need a few, we need a lot to change a lot.
(:44).

(:50).

(1:00). .. I released some videos 4 years ago in the south of Italy when we spoke about the spaceships covering the sites on the line of horizon and the Italian military were trying to find and we posted a video of the blocking of the sun, if you remember this picture (it was a rainbow ring around the sun). When we arrived in Brasília, Brazil this immediately appeared in the skies of Brasília, welcoming home. There are a number of pictures and videos taken by us and the K Seekers. (1:02). (Picture is on screen). This is when we landed and it moved with us to the hotel and was in the air for some time. It was videoed by KS and people who seen it. We are home. This is the second time, if you remember we showed it in Italy, and this is in the skies of Brasilia this week. You see the brightness and the full structure what is in the sky. ... It is interesting to see where it follows us to. Plays the video. This is the daytime, at lunch this week. Plays the Body Enhancement Unit ..
(1:04).

(1:16). We have signed the first agreements this morning, in the coming weeks we'll announce that you can join the clinical trials, not only we bring the centers around the world, now we bring the structure to it. Then the systems will develop further as we go deeper into it. The new systems , as we'll unveil in Brasilia essentially will go for the governments, through its own structural system in the coming months .. .

(1:18). Video....

(1:36). end of Parkinson's video.
Q: Once you have the machines, what are going to be the protocols, depending on each of cases of the patients being treated, how do you manage that, and do you need to maintain the treatment Saturdays and Sundays? The protocols will be set through the doctors. The opening hours will be set by the people who bought the machine and the protocol on how to use it and what it needs will be set by operating manual. The charges and the operating hours will depend on the people who bought the systems. (1:38). .. On an 8 hour shift the maximum number of patients that can use this machine is 12. ... In the coming time these machines and the illnesses that mankind suffers from will change a lot. A lot of people will use these machines not just because they're sick, they'll use them for, as we say, to tune their physicality. This is one of the things that will come very advanced, we'll use the machine for feeding, creating materials, for all sorts of applications. The protocols for each one will be set up and everything else is in the hand of the operators. What they have to set up is a team of medical people available 24 hours a day, specializing in, more and more as they learn through cases, sitting in teh background supporting the doctors case by case. Even now as I am talking to you the progress in China is ongoing and I see notes and videos coming up. .. (1:40). .. Nobody can just buy the machine and go in it. It'll have a fingerprint, and another unit added to it, only can be used for the patient set. This is just not something we put out, everything is controlled, every data, and every patient worldwide will go into a database, that what we see needs then we add to it, then we set up patients for it. We estimate something like 2,000 machines will be delivered next year. ...
(1:42).
(1:44).
... We'll show you the specific condition for the creation of the human life. Not every type of life can exist within the spacecraft. ... (1:46). They were so enthusiastic at that time they flew a rat into space. ... I said to myself sitting in the back of the car, if I tell you what I know you won't be so happy, because Iran managed to put a rat or animals into space to see how they behave, as most of the space agencies do for the first tests. The reality is we go into the next step, the reality of do we need even to go into the understanding of the structure of the field of the strength of the STM, this is, as I said, very difficult, if the soul exists, what we know is the son of the man, is the sun center, life, creation, so we can interact with it. If we can elevate the strength of the soul of the physicality, which is the connection of the fields of the body of the man, to be the same as the STM, then you understand the physicality becomes part of the soul, and what we call inter-atomic fusion, I call it ... we become part of. Do I want to live in the physical dimension with all its pitfalls, or I stay in the dimension of the fields and in time I decide. Or do we chicken out and leave the physical life the minute we have a cancer we jump into the machine, I go into the soul strength of, the same that my physicality doesn't get touched and come back out when it's all sorted. This is part of understanding of the whole creation. (1:48). R- Can you give us an example of how you see the conditions inside this egg shaped chamber, like for example, normally as humans we see with our eye and hear with our ears, would sound be cut off from the outside, would it be totally sound

proof inside, first of all, and second would there be sound or music or some sort of tone or something? We see interaction of the fields, where you have a rubbing of a surface, where you have a hand on it you call it a brake on teh street. There is interaction of the matter state M fields up to different strengths one stationary and one moving?? The same shall be in teh space in respect to interaction of the fields of the U of the craft. The strangest part is that we already hear what ears have adjusted, what our soul has adjusted to hear. You have seen the old movie, the guy blows a whistle but nobody hears, but the dog reacts because it's tuned to the strength of the ear of the dog. It's the same when you go to the level of soul, it's what strength your soul has been tuned to, to receive from it. There is no difference then the body otherwise the soul would be ever busy with all the noises going across the whole U. (1:50).

... You warned the shareholders that you might be connecting with your soul. .. That was a very big shock to stock exchange market people, for them, now we have a religious company, soul services. R- You said right after that, it's not religious, this is a scientific connection. I understand because I had one of my guys pulling his head off, you know what they are saying, the wrong thing. They've got to learn everything in this place is teh right thing, it's you who is wrong you have to adapt your way. We see a lot of ways, they're not used to it. They can't come and say oh they come on about the machine, they signed a contract with this company. (1:52). Yes, but it belongs to KF Manufacturing Austria. I'll make it one of the most powerful companies in teh world, owned by the KF. In the hands of the KF, ?? members of the KF. As I said to the head of the KF we'll be in Brazil, I am handing over and she has to learn to be just and correct, a mother to the KF, even as a young girl, and to understand that the KF is here to serve humanity, not profits ?? The KF is in the hands of a very beautiful girl. She is well grounded and has all the talents of being and heading the KF at a young age. We have to understand this, that we are responsible for the KF and its development. Look at the refunds which were sitting around because of teh misconduct of those in Italy, and I said to Carolina these guys sat two years supporting us, even some of them pulled their hair off when they got angry, you are doing this or that wrong, they understood the problem, the problem doesn't come from Mr. K it comes from the structure.
(1:54).

We are very big and we respond. I'll leave nothing to be cleaned up. (2:00). They'll clean it up themselves. And then we'll send them to the machines. This is what our distributors and those who work around the KF have to do. You work with us and I explain everything as it happens. ?? Italian. I think the stock market has to change a lot. Coming here and then going there between two hours and five you said such a thing, that can (cause) a stock share change. This is KF, we can talk it's our investment and we invested. the stock, what you call KFGL where it pays .. it's ours we can speak at home between husband and wife, between teh children, we are all children of the same family. They can come here and go gossip behind, yes we can talk at home. This is our home, K Seekers know that, it's our home we can talk to each other, tell what's happening, they can't come and listen, I heard a whisper on the wall. They have to learn, they come here, not to effect them, they come here because we are open, they become part of it. And as I say, when

they learn they understand always. Now you understand when I said we'll change the whole structure of mankind and now you understand bit by bit. Now we have stock market people coming here to listen to K Seekers. I'll give you a very clear evidence of it, they write and give us messages. Yes we can, it's you who put your ear to the phone. It's not the Whitehouse that you can go and gossip afterward, say you might change the president. The president of this organization is all of us. (2:02). Sorry about teh stock market holders. You have to understand that you don't come to a house to go and gossip and do something with it. This is our home and you intrude. We can talk. I can tell what my son inherits because we are all sons of the same family in this place, not to come and listen and then go and sue us and take us to the courts in the US. You ?? offend, you came into our home, we didn't come to yours. Next question. Q: Victor has been trying to get a hold of a person about the Unit and has been unable to do it can you explain what is the best way to do it? What do you mean there are 2 lines. ...
(2:04).

(2:08).

(2:18). ... The childish and teenage stages are over, we are dealing with governments and we need you to be there to carry on, KF cannot be anywhere else. We expected 30 people in conferences that we need to face their knowledge Seekers, not just to face the governments and politicians and diplomats. In Brazil it has grown beyond what we expected. I thank **the Brazilian KF supporters for their conference and the efforts they put into it, Claudia and Rafael** and people who are there to do it. We'll go to Morocco next month and we go some other places. We come with the support teams to do everything else. ?? It brings the governments in they see the reality. It's not just one man or 2 or 3 people who come in. It's ??? ?? trust of a nation. In all these conferences being setup, U Council members responsible for the language has to be present. This is interaction between the KF and the soul of a nation, the government we serve, they are there to serve. We all learn. It's nobody's fault, we all learn, we'll all mature in time. Any other question. (2:20). Q: So will there be clinical trials for people in the USA as well that can't travel to China?

... Once I show the spacecraft and put it 20 meters above the earth, then there is no government that can control it. It belongs to space. So we can pick up anyone and put them back down again. But we'll try to sort out everything in a proper way between that it goes through. We collect data for more people to understand, to see, observe and for doctors to learn. There is something very important I keep repeating. Our T is not the only T that we can say we do fro everything. We do everything which mankind needs in the space. (2:22).

... I wonder how many of you have managed to breakthrough the MaGrav energy systems. I know many of you (ask), is this the wire we have to connect to, or is it that we have to position. If you are asking me then you already tested it and it doesn't work, why do you do it. You are asking me to see what is the next step. If any of you understand the properties of the MaGrav system which you have, and you claimed everything on it. You

have one of the biggest power, flying machine resources in the U. But as you know i am a patient man. You have to learn and if you haven't learned it means that mankind isn't ready for it. Next question. At the moment you can book into China, the hospitals will be there, you can stay a maximum of 16 weeks because it has to be a position, we have to see full development. You'll see the changes in the first few days. We go back step by step to see all the diseases. (2:24). The machines will have to be ?? to the diseases. You'll see big changes coming up. I think medical software will become bigger then medical hospitals. As you build the prescription, it's in the patients that I have spoken of before. From now on you'll see it as reality. The machine is tuned by the doctors, the diagnosis, setting in the machine, you open it up and you get it. .. Can this be used as a ?? I said ??? What do you want, what do you expect from the machine. Any other questions. ... I lost both of my legs, can I come out with both my legs? A guy sent me a question like this. Magic box. R -Maybe one day Mr. K. Maybe you have to go in but you come out 2 years later. ... (2:26). It is a sealed unit after all. ...

.. Q: Quantum physicists say that an observer, observing seems to have an effect on the matter state, would it be correct to see the observer as a projector, projecting intention into the matter state? Of course, because that is what we want to see so we create the intention of seeing what you intend (2:28). Q: And why do humans use liquids historically to capture intention, like for example, holy water and ice crystals geometry, is it the space between water molecules that holds intention, like the space between Cu molecules during Nano coating? It's actually inside the cell itself, it doesn't need to be between it. It's the structure, now that we understand that the creation is made of ?? and fields, so in every plasma there is a space gap between 2 fields moving opposite to each other, that creates the gravity and then the magnetic. So your intention depends where you want it to be and what it is ?? for. There is something interesting, you talk about intention, try to test something, doesn't matter what. If you are close with your partner, (it's different with children because they carry part of your fields). If you are close to your partner in bed especially when they are asleep, try to get them or think with the loving care, I want your to move your left leg, and then you see they move it. Say yes. That's not a control. That shows the clarity of the soul, then it shows that you don't need the physical dimension, (2:30). to be in touch with our lovers. This doesn't need a physical presence. If we understand this ?? in comprehension of the existence then you'll understand more and more. I don't need to be next to you to love you, I can be across teh U and you'll feel my love. That love feeling is what I want to give, as you give to me it's a pleasure to confirm, it's mutual. Then you understand that you have started to understand about the work of the STM. But man is physical so he needs that movement of the leg to say yes, I can feel my love. She listens to me, feels me, she hears my soul. She ?? my intention in physicality. Then you extend more. Try say I love you and you get ?? towards ??? ??? There's a book called, the cornerstone of Jewish religion, it doesn't matter what happened with the husband and the wife during the week you have to confirm your marriage every Friday night, that is part of the ?? it's sacrosanct, you don't break. Now do you need the ??? ??? confirmation, even if it is regrettable, or by thoughts you can tell your partner ?? And then you see teh reaction, she comes and cuddles you deep in the sleep, or you feel the touch and kiss from thousands of miles away. (2:32). Then you know and understand, this is part of the teachings we try to get for you to

understand the operation of the soul. Because you always have to have that movement of the leg to say yes, I am in touch with her soul. You don't have trust in that you have already touched ?? This is what you'll understand more and more, you have to because you have to gain in confidence in your ?? that I am there. Then you can understand, do I need the physical condition to bring the physical body to be able to touch the field, and love to enjoy their existence. Loving a woman or a man doesn't go in the dimension of physicality. It has to be the love of the STM, physicality will sort itself out. Have you seen 2 old people in their 90's still enjoy being with each other, even though they can't move, 2 handicapped sitting next to each other in a wheelchair. I have seen many of it. We had the good times, but now we are there (old) we still have the good times because there is no need to touch, you feel my love sitting next to you in the wheelchair. Man has got to start gaining trust in his own existence, true existence, not the physical dimension. You see, you feel, you know they betray, you see and feel it and you know the love. And you see both. As a humanity you have to come to understand, (2:34). that you have 2 levels, you got such a beauty that you have 2 levels, you have to understand the dimension of physicality and the dimension of what is called the non-dimensional part of you who has lead to the creation of you and of the soul, without it you don't exist. You lost the track how to be in touch with it and now you learn more and more. But you always looked for the physical eye to get a confirmation. Many people abuse that because they don't understand it. Q: .. In a couple of your teachings you show that every emotion has a specific position within the structure of the brain related to the central field or the soul and what we know form plasma is that the closer we are to the Principle Field or soul the higher level field strength we have, so if this is correct I guess the low level emotions like hatred, (2:36). and anger would be somewhere within the boundaries of the structure of the brain, and the higher level emotions would be closer to the center, the soul? Yeah. Q: Is there a way for us to restructure our brain in such a way that we push out those low level emotions outside of the structure of the brain so they don't manifest themselves and on their place we have, what we now have and love and strong emotions, and we somehow open up the soul and we get higher field emotions without having to manifest the low level emotions? There are 2 ways to do it, why don't you do it the easier way, elevate teh soul so that it super passes the boundary of the brain physical dimension. It's much easier. Trying to go from outside in is very difficult when you are inside and you want to go out. The capability and the power of teh STM is huge. We have imprisoned ourselves, our true talents, true strength. Maybe it's the fear of the dimension of showing how, what I call fallible and weak our physical dimension is, that we are hiding it inside the true strength of it. Why have we chosen this dimension. This is part of the problem. Don't try to solve it trying to go from outside to go in, go inside, it's very easy to get out and come out, ?? because once confirmation comes to matter state, (2:38). it's so weak. Deal with the boss why do you want to work with the doorman. When you go somewhere and they don't get your job done, you say, I want to see the boss or the manager. If in teh physical life when it comes to a problem you want to see the manager, why don't you go to the manager of your soul and say, I want to deal with the soldiers, .. you do it in physical life, but when it comes to yourself, you get lost. Learn how to tune to your soul, when it comes to your soul this is not a mistake, it's just understanding it's there. We found the heart and the liver and we know where it is. Why is it so hard to find something which we created. Then KF doesn't become just another cult or religion,

because you come to understand the truth. ?? of the life, what is it, how we are and what we are made of. Because up to now those who said, it's somewhere in the sky they're the ones who are playing magic box in the name of religion. Someone wrote to me, Mr. K don't come to Iran, you said your coming, they're going to kill you. I said, let them try. I don't go there to end up this and that, I go in order to raise to the love of the nation for its own sake. Nobody can stop, no nation, no religious leaders, no government. (2:40). Q: You said in one of your teaching interaction means taking and giving from both levels M and G, would that mean we actually have 4 levels of interaction, taking and giving from M and taking and giving from G? Of course. We have the earth and the sun to create something, 2 forces have to interact from both so you always have 4. Q: Is it possible to turn this into a mobile unit by housing it in a beautiful coach motor home or RV trailer, for communities that may not be able to get to a center? Of course. Do you want to become an ice cream man. ... R- It's almost realistic but you'd have to have a doctor and a therapist that are a part of this unit or how would look like, or maybe you'd show up in a school and then a doctor and therapist from is there? Why do you look at it as a machine for health, why don't you look at it as an ice cream man, I have come here to give you the pleasure of ice cream, (2:42). you go in and you get the taste of any ice cream you like. R- Right, instead of regulations that way you don't actually have that ice cream in your ice cream truck. That's where regulations come in. K- I am sure governments will come up with rules and regulations that you can only have ice cream and the other one will be only orange ...

... There is something very strange, we are here to bless the leaders who are the world peace leaders. In the hotel where we are and in the coming days the world leaders gather in this city, not very far from me. The 5 nations which set up the basis for world economical peace, BRICS are here with us. Not many floors above me is one of the world leaders of BRICS is ?? in the coming days. We give them our blessing and you'll see the emergence of BRICS in the coming months. The soul ?? not the physicality. The understanding of the time will tell. The whole structure of the world leadership will change, (2:44). in a way that they'll understand more about the man. I always supported Chinese and Russian leadership in their correctness in promoting economical growth against war growth to gain the economy. They all have our blessing while they are here. It's the destiny for the time. The time has changed and in time you have to work on all levels to bring the change. In this process the soul brings you to the position, even the physicality is unaware, even though you know the acts of the STM. The emergence of BRICS is the cornerstone of the peace and we'll see this because we want that peace because it has to come through economical growth and stability, not through economical war and instability. This will build up more and more. I hope all the K Seekers will, (2:46). elevate the soul of these world leaders of BRICS in the next few days. In that a new peace solution for world order with a new strength will emerge. President Zhi of China and Putin are here and these 2 men have done a lot for the world peace and their souls need a lot of support. R - Putin made an announcement today that Russia has weapons that have no foreign equivalence, but he insists the country will not use them to threaten anyone. He said, the new weapons systems are designed exclusively " to insure our security to deal with the growing threats." He vowed to pursue arms control efforts. When I read that I thought that he seems to be alluding to a whole new kind of system and perhaps, (2:48). they are talking about some kind of plasma based systems that are

not currently talked about amongst the countries. You have to understand that KF T does not just come with us, it's the blessing of the soul of the scientists or ??? . President Putin is fully aware of the KF work, the contact and development of the connection between the Duma and the Russian government was left in the hands of Armand when we were in Trany, Italy. Because Putin passed on the world peace treaty and ?? impression of it to the Duma to pass, and it was left on that table. Wealthy nations do not need to bark like a poor nations with empty pockets. Russia is a wealthy nation, people don't know how wealthy it is. ....
America is that little dog, it barks but it has nothing. The big dog knows what it is and knows its grace. Russia and China are very powerful even financially, they have always been.
(2:50). ..
(2:52).
.. Russia embraces all new T with nations it is in touch with ... I worked with Russian scientists for a long time. ..
President Xi is trying to this but the Chinese don't have that mindset. It's a mindset. They are very good and very powerful, Putin works very closely with Iranian scientists, (2:54). in space and plasma T, and all of it, and nuclear side. They share, it's not closed doors. At the governmental level the Russians are very good at sharing, because they get benefit back by it too. The only problem is at the moment I have to be in the ?? ?? dogs bark too much. Any other questions. .. You know KF Russia is a very powerful group and they are in the scientific world. .. Russian KF K Seekers are extremely good. We have a very deep support in the scientific groups of Russia.

Q: Why does the soul not remember its previous life? Good morning, who says? Have you seen your soul, have you talked to him? **It doesn't remember previous lives because it's an amalgamation of the memories of the life of your fathers and your grandfathers. (2:56). It is not that it lived before, it's the collection of the 2 lines of your mother and your fathers, whatever the ancestors have gathered in the bank of their information**. And secondly, mankind has access to the totality of the knowledge and he doesn't need to be there in the physical dimension. R - So you could be anyone of the past in a way if you were able to access the knowledge, or all of them. No, no, you are not ... no. You have access to the knowledge of totality. When mankind becomes stronger to understand further more in the essence of the STM you have access to the whole knowledge of the U through the strength of the U Community. R- Does that include details down to the knowledge of individual lives .. Yeah, if it has happened, in field connection, then you are always connected. It's just like if you live in a house and it's you, your children and wife, there is a lot of noise going on outside, there is a car accident, the ambulance goes, the neighbors shout outside, but the husband and wife are talking to each other all the while all those noises go on. You may hear it but you learned to black it out, because the wife and the children are what you are concerned with. It's the same with the work of the STM. The STM at this moment is only concerned with the physicality of the life of the man, but he still hears all the noises and records it. Because you go to see your friend tomorrow and he says, do you know there was an accident there and there were many ambulances. (2:58). You say, oh, I heard it, but you didn't mind because it was an ambulance, but it was registered in your ear, you were home and you

heard it. It's the same process with the STM he hears everything, all the time. **There is no man, reincarnation of the soul, it's the man's access to the information of the past through the soul of the creator of the man**. In a way we are present in all directions all the time. You see I said something a few minutes ago, and how many of you connected to the wish of the emotion of supporting the souls of president Xi and Putin. You think, that just I give, they have access and they take. So how much of it would be used for what? It's their discretion to create more peace condition. If you have a peaceful soul. Then in time if somebody has the strength of soul, says, oh, he gave from his soul the time he was talking that they need the support, and they receive it. But **with the elevation of the soul of the leaders we don't make them stronger, we make them to see more of the reality of the peaceful life of the U**. That's where the elevation comes from. The beauty of the man is that, (3:00). he likes to be blind to the truth of existence and the life of his own soul. And that blindness has been used as a weakness by the Church and the Mosque and the rabbi's and priest's of Baghdad, they're all in teh same pocket. One steals from the pocket and the other from the STM true existence. Any other question. I open your eyes to a lot of truth that it's hard to imagine that anybody could speak about. Now you have to understand the financiers and bankers are all sitting on the same line as you lot. Share prices crashed because Mr. K said. Please think about the new structure of the KFSSI K Seekers and how you would like to be part of to set up new research and new development in what you would like to see. If you don't have the knowledge there are other people in teh KF that have the knowledge can help you to build it up. (3:02). The true game of science is space T development, but don't just stick to the 4 Gans's. R - How will people connect with this group, will it be a Zoom group to start out? The way we would it to happen is to sign as K Seekers and attend the first couple of weeks of next season, semester, the first of the beginning of the year. ... In the first couple of weeks talk to each other and set up your own groups.... We extend the teaching of today with what R has been doing with teh workshops (Plasma Group). It becomes the place now that you decide as a student, it's like when you do a Masters or PhD or a research. The only problem is, sorry we haven't found any pen and paper (in the U) yet to give you for your research ?? the STM. The PhD from KFSSI is written on the soul. ..
.. build a machine, (3:04). or develop an intellect, it doesn't need to be a machine, more the development of the understanding of the, whatever you want. ...
.. housewife .. if you want to boil an egg that you can do it by thinking, and how it can be done. In the coming months and weeks I'll release the control through the emotion of the STM system. I showed it to a KS very recently and I saw the shock on his face. He ?? understand how it ??? We'll release new technologies. Most probably we'll release in teh next few weeks, that it will work through the thought control, because computers are too slow. ... (3:06). ... From next week we'll start going in-depth of the universal language, in understanding of it.
KF as we are going into a new direction. We are looking for professional developers. ..

(3:08).
(3:10).

(3:16). We are committed to the peace in Syria and support the nation. In India we have to see what we can do. India has been an enigma for the KF for years and we have looked

everywhere for a solution, maybe a solution will come in its own way with teh help of Bangladesh, we are there. ...

Q: about agriculture ... We are developing the agriculture with teh new T. ...
(3:18).

(3:20). we are going beyond the Gans's ...
(3:22).
(3:28).
.. The structure is that, what we call being kept out of society by those who thought they can keep us out. But in the coming time we are changing. ... I would like to ask you one request, support the world leaders in Brasilia, you'll understand why soon. We are heading for peace and it needs a lot of support and a lot of men who are men of peace.
(3:30). Thank you very much.
.. Those who came from the Stock Market to learn if they can do something more with it, there is not much here. All the benefits of the KF as an organization stays the intellectual rights and property of the KF worldwide as the K Seekers.

302nd Knowledge Seekers Workshop - November 14, 2019

English Transcription:

(:10). R reads Q: I keep hearing about new T in discussions about forming private groups to work on different aspects, how can we possibly do this if nobody knows what this new T means, nothing new has been taught in months and I want to learn more so I can move forward, we are missing the key, as it is called and I think without that nothing is going to change? (:12). The key is you haven't understood that you have to do some of the work yourself, you have to start understanding and connecting things. For the first time we showed you the MaGrav systems and you went and did and those benefited by it, and those who couldn't get it right and many other things, now it's time to learn how to connect the old system to the new system and understand much, much more. This is part of the teaching, of understanding the totality, it's not so much to do things, but to understand to be able to do more. ..

(:14).

(:20). ... (connection lost .. 50)
(:22). We are still in Brasilia and BRICS are here so the internet is trouble .. It is good to see peaceful heads of state working ..
We have offered the new T to the BRICS ...
(:24). ... We'll move into a larger disclosure of the T.
(:26).

.. We have taught a lot of new knowledge about the soul, how many of you have managed to create a system that carries a soul? AZ took little steps and they have gone on hold. ... It's the job of the rest of the KF to go back on the soul teaching and find out how you can replicate it. The soul is the same as the body of the man, the physicality of the man, it's the same as the energy unit, same as the Pen. How come when it came to the truth about the existence of your life, you all had a heart attack, because you had to face the truth that your soul is within you and you did not search for you, or is it a taboo to speak about the fact and part of the workings of the U. This is what has puzzled me in teh past few months, the soul teaching man has tried to ignore for thousands of years, understanding the work of his soul, the sun of his life, the cause of his creation. (:28). and now you all have a problem with it. If you have a problem to create the replication of the higher level of energy packs, you call it a soul, we call it a sun, we call it the center of the galaxy, black hole, center of U, you call it a creator, has a problem. It's a mental lock which K Seekers have to open up. They have to understand what is the connection between the STM and the PTM. How come for our K Seekers it's easy to understand the interaction of the fields of the sun with the other fields in what we call its eggshell of the solar system leads to creation of meteorites and asteroids, planets and moons and everything else. But when it comes that we change teh name from sun to the soul, and planets to kidneys and liver, you always say in English ??? you just stop, you cannot go any further. How come you made the systems to create energy but creating energy at the level of the STM is a problem for us. Until we don't cross this line, man cannot take into space. Unless you want to be on a bicycle or maybe on a donkey. You like to spend, what is it, it took the Chinese 20 days to get to the moon or do you want to get there in 20 seconds. Because in understanding the truth about how the solar system works, your soul works and how everything else is made, it brings you to the point of understanding the reality. (:30). If you look at it, the STM is the sun, the soul of the physicality which sits with teh heart is the earth, and everything else which is within the system is the satellites of it. How come one of the planets has 10, 12 or maybe 20 moons, but the body of the man having 4 or 5 moons called the kidneys and liver, is such a complicated things for the humanity. What else more can we teach. When you say there is nothing new it means most of you haven't understood what you have been taught. How come it was easy to make the Gans's but putting them in a certain way to give you some other effects, it's so complicated. From now on we go in the understanding of the U Community, how to interact, but I would like to ask you 1 question. If you come across a man from planet Zeus would you ask him if he has a kidney or liver? Would he carry a kidney or a liver or has he stepped further by creating higher energy through the physicality, not to need to clean up in the physical system with what you call kidney and liver. When you understand how to increase the level of the STM and then increase the level of the strength of the STP, the way the earth and the sun create materials and they share energy. Now you need to share energy, then do you need the kidney? Is there a need for the digestion system, or does teh physicality when you manifest it, it's just a new dimension of presentation at the point of the fields interaction. (:32). It's not to teach new, we have already taught, it's for you to understand the totality. If you take the work of the kidney in respect to sun and earth and call kidney a moon, and the heart of the man the soul of the physicality. The earth and teh sun, the STM, you can see what it does, how it transfers energy. How come we accept the phenomenon of the pull of the moon, fields of teh moon

from millions of kilometers away, and everything else to pull the seas up, low and high tide, but we don't want to understand that the same principle applies between the kidney and the heart and in conjunction with teh STM. What is new is for us to understand that every cell in the kidney and in teh body has the same structure and ?? structure as the moon, and the moons and planets, galaxies and stars. Unless you want to create another fancy word in creation as we have seen done in science up to now, up quarks and down quarks, and everything else and live in that fancy world, you can carry on. K Seekers have to step up, and as we discussed with officials in Brazil in teh past few days with teh governmental representatives, (:34). KF K Seekers in Brazil is big enough that now with what e have taught with K Seekers we don't need to send somebody to Brazil. It's the merger of the two, KF scientists, doctors, and K Seekers merging into the government structure. This is what you have developed to, now you have to be ready, now that we start merging with governments, the KF K Seekers that they can step up, they can support. You have to start teaching yourselves, the negotiations with new governments who understand about T, it's not anymore how we are going to teach our scientists who have understood teh basis, called K Seekers and governments just haul in it. Bring them in, teach us. Bring them in and let us merge. KS don't understand what I did and how I planned this for years merging the KF, teaching you for years has made the ground ready for us to merge as an internal system. In Brazil if you are Brazilian go in teh Chatroom, we opened it 2 days ago it has passed 300 and odd in the past days and it will grow to thousands. These people in these channels will be invited to come in and start working internally. We have many scientists in Brazil and many in America once AZ opens up we'll ask US citizens and K Seekers to join in the space program. It's KF. It's not me anymore. It's you to upgrade, to understand the T that now we have started merging KF into the scientific world. (:36). We have done the same thing now in China, where you'll see massive KF work, scientists who will be brought to work in Research and development. We are already doing it. But the thing is we have to understand geopolitics of a nation and how we can operate these things. You K Seekers have to start move away from just making Gans's you have to understand about teh fields of the Gans's. Gans is a connection between teh matter state, the energies and the universal system. You have to step up and understand the work of the energy, movement of the fields from the Gans, and what strength of the Gans you need. All doesn't have to come from the research centers and very few K Seekers. KF is not set around one person, as we saw it how it was strangle held by the U Council member from Portugal. We were told that there were no K Seekers, they don't have any knowledge, they don't understand anything. We came here and they are all doctors, professors and scientists. KF is not one person anymore, it is all of us, but it has to move up. The question was that, 'you haven't taught anything,' it means that you haven't understood. You would like to hold onto the past, make a few MaGrav's and a few things, now move into the agriculture and see how the fields of the plasma works. Forget about the Gans, about the N coating, what you call, production of this and that. (:38). Look at the energies they create, at teh interaction of the energies, look how these energies interact with teh fields of the environment. This is where it comes to. It doesn't stop. What happens if you look at the universal condition, you have the soul, you travel into the space, you know the soul of physicality, where and what distance you have to make it between the two to confirm your manifestation, and how you are going to be manifested. Mankind up to now has only looked, now in the past few years we've become

very familiar with you lot, because you see it done, now the KS have to take it to the next step. We used to say that if we see a man by his face we know, then we went to the fingerprints, now we said the fingerprints are unique if you see them. Now we went to the iris to see how the position and shape of the eyes. The Chinese have gone further to the face recognition in public. In the space why we'll have the soul recognition. How the STM of the and the STP manifest itself according to its strength, and then we know this is this person, and that person, because you can never show yourself in a physical dimension, because of the different strength. Where are the K Seekers to develop this question. We taught it but you have to develop it. It's another way you test it with the agriculture, now KF has been taught, the K Seekers in certain ways to create the first zero time communication through the thought and the STM. (:40). The unit has been made. It's not theoretical anymore. It's getting tested. Why doesn't it come from KS why does it have to come from KF and what I teach and what we put in different research groups. The problem is extend the knowledge, move away from physicality, Gans's. See what the fields of these Gans's do, because in space you have the fields of teh sun of teh destination you are in and according to its position to the strength your soul decides to manifestation of it, another moon, another star within a star. The problem of teaching now is how to get you as K Seekers to move into the universal teachings of universal understanding. The universal knowledge as I said last week starts from this week. And it's okay, we know we need energy to live, to sustain life of the STM. There is something out of line I have to explain to you. Sorry about this I forgot to make an announcement. We have been asked by national securities of 2 nations, this is very important for all of us, as you remember we had the red circle, we don't want to mention his name, as facts about him published, the officials want us to start with teh KF supporters, (:42). whatever, the same way, 'victims of Red Circle' They want us to start looking for the children which has gone missing. This comes on the back of what happened in England finding the 32 bodies in the container and they are trafficking children the same way. We want to alert worldwide how many children this man and the group around him are involved in. We are looking for children that have gone missing and used and abused by these groups. This is important as you know, 120,000 pedophile people have been found due to the Sterling case and Red Circle and his team ..

.. We are looking for missing children connected to Red Circle ...

(:48). Going back to the teaching. The understanding of the STM is very important. You have to move away from the matter state. (we are asked by securities to get the ...)

When it comes to understanding the problem of the soul and the energy, now when we speak about the soul we have to work with teh energy of the U. We have to work with the understanding of the work of the U. In the U we interact with, (:50). energy packs. Now that we have developed and stepped up to the next level is that we understood the interaction of the fields of the U at the strength of our solar system, in a given strength interaction leads to the creation of the manifestation of the conditions. In interaction of that condition with its own environment which created it leads to manifestation of physicality. If you read Book #1 it's very much in line, if you never understood it, how

the mass and weight are created. Why the mass of a person is the same across the solar system, but our weight is according to interaction according to central gravitational point of the manifestation changes. If you understand that the weight and the mass is teh same, the same energy, but the same interactions, but in respect to interface between 2 different fields of interaction, one is constantly be with teh universal fields at a higher strength, and one with teh Inertia matter of it. then you understand that you can do the same thing with your energy systems to lead to creation of different dimensions. This is what, when you go to Book #1 and read about the weight and the mass, it's about the interaction of the fields of the source, (:52) with teh Inertia strength, creates the weight in that point, but it doesn't change the field strength of the center, where it's the difference between the mass and the weight. Change the name, the mass is the STM, the strength of the STM, and the weight is the manifestation of teh physicality of that soul in respect to its environment. If you understand this you can survive anywhere in teh U. Your soul, the physicality, the mass of your body stays the same if you are on this planet or on moon or Mars. It's the same, the STM is the mass, then the interaction of the fields of your soul with the environmental field, the Inertia of the position gives you different weight, different manifestation of the strength, on the moon or on the earth as they have different Inertia field strength. If man understands this, he'll become man of space, he'll become a universal dimension, he becomes to the position that the physicality has no matter. This is the time when you tap into universal energy and the U Community, because the man moves up 1 step higher. It's us who decides the position and the time of the manifestation. Many men in the past have achieved this. (:54). Mankind has to understand the next step in teh evolution of energy and stepping up to U Community. We'll start teaching this. For you to understand these teachings you have to understand the fundamental, what we call the principle of creation, manifestation. We have to understand these little basic fundamental cornerstones of converting physicality to energy that you can transfer teh energy to any physicality will happen to the man itself. If you have listened to the teachings in the past years I always told you the, especially in the recent teachings we have emphasized on it that you understand. You started with teh matter, when we got more understanding we called it alloys when the man understood that he can mix the metals together he different new ?? models. Then in teh recent past we became Nano, we tried to separate, but with the KF T, being 40, 50 or 100 years according to some people who understand, ahead we managed to separate the atom into a Gans, which is the energy, and then we used these energies to create any matter, by presence of Inertia strength. If you interact with a higher strength you lead to creation of new souls, this is the difference in the understanding of the man. If you interacted with lower strength, (:56). what we call, Inertia it leads to manifestation of physicality. If you interact the same fields of teh higher order interaction, it leads to creation interaction with a higher level condition of universal dimension. This is where from now on mankind has to understand the totality of the process. (White board) This is where a lot of governments will come to understand that the KF has started making the difference. In the present science we started with teh matter, in recent past we came to the Nano, and now we come to energy, what we call Gans in the matter state. This energy created in interaction with the different strength fields gave us the matter state, the Cu and whatever we saw that Peter made. Now we went to the lower Inertial matter, now what you as K Seekers have come to understand. Now we have come to the crossroads of man's development. We go

the matter way or we choose and we go the way of the soul of the Universe. (:58) Here (matter side) you created the strength of the matter state and you got Cu and Zn. If mankind understands this (universal) interaction and created a higher order we will become man of U. Then in this process we understand and in interaction, in conjunction with the energies of teh U, where and how we will manifest ourselves. The problem with mankind and some of the K Seekers is they still want to live in this world (matter state), but understand about this world (universal). It can't be done ... You can use this (universal) to reach to this, but for this to (matter state) come you have to go through this process (matter to Gans >>) again. Most of the times. Now you understand from today how we'll take you into the U Community. The way you made systems for production of materials, now mankind has to understand that there is a higher level system that in its interaction will become, instead of matter state, it will become in interaction with what we call higher order, U community, universal understanding of transformation of higher order energies into confirmation of the existence at the higher level. In some languages you call it different dimensions. The game of space T, (1:00). in the condition of space travel, in understanding of it, from today has taken a new shape. This one (matter state) still needs fueling, and this one (universal) needs fueling of the U. We are, we have achieved as KS the point of maturity that now we can see both sides. One road leads us to creation of matter state, and one road leads us to understanding of higher order that in that order we still can create and manifest ourselves, but in that strength. There is nothing wrong with either side. But in that state (universal) when you want to confirm your manifestation then you have to understand the field strength of the environment. This is how the dimension of the soul of physicality ahs decided. Again it's like before we got so much involved in physicality that we saw the birth of child as teh manifestation of the totality of physicality, but does it come with that child, what does it come with that ?? , with the birth of a man's child or a fish, it's the creation of new energy packs which can live in the dimension of the universal level. (1:02). It's very much like for those of you who are a cook, it's making the sauce. As teh French say, the bouillon, the base that now that you have made it, do you want to make it into a soup, or to a dish. Now you have that base, it's the energy of the STM, energy within the ?? sphere of ?? ?? energies of the matter state of the higher order which has no confirmation in the physical level. If you understood this, now you understand ?? what the new enhancement T we put out means. In these enhancement systems mankind has and will receive a choice, in the presence of his soul will make a decision. ?? Do I want to get rid of my pains in physicality or I use the system knowing how to interact with it, I become man of U. Many, many people when they go into these machines will never come back. Once they ?? see their soul ?? it will become a traveler of the U. These systems have a soul, (1:04). which is connected with the soul of the U. You were waiting for UFOs to get ?? rid of your physicality, but I have given you a system which will take your soul to the dimension of the U. As I told you I will open more doors with this enhancement unit. It's not to enhance your physicality, it's to enhance your soul to understand the dimension of the U.

(.. break in connection ..) (1:06). (1:08).

We are in the building with world leaders and the whole hotel is covered with the nationalities of governments, we were told yesterday that we are the only

nongovernmental organization which is not connected to one of the 5 nations of BRICS that has been allowed to stay in the hotel. This shows how much the 5 nations of BRICS trusts KF work .. this gives you a lot of confidence how world leaders being in a distance from us trust the KF. Those of you who understand the gravity of such a position it gives us a lot of joy. We are not somebody they put out, we are kept in, they trust. ... Now you understand why we are in Brazil and the time that was chosen to be here at this time. It is the souls that decide not the man. It has given the KF a huge step up to be able to meet in different ways and conditions with different officials. What is important in these teachings which we try to bring, (1:10). from now on, is to start showing the man the strength of his knowledge of his soul, what was hidden from him, by himself, by the choice of the soul of the physicality and not by the choice of the STM. For the maturity of the physicality to become independent takes 9 months in the womb of the mother. The maturity of the STM to understand the totality of the work of the U Community takes a little bit longer. Then comes the reality of, do we really need to understand all (this) or do we know it and we decided to ignore it all. How much have we ... What is the reality of which one we want to choose. From today a new gate, new door, a new understanding of the creation starts. Those of you who wrote, Mr. K has not wrote anything new, my god, from now on is so new that I hope you won't break your leg trying to catch up. (1:12). We saw with teh AZ team they did everything to understand how to create the soul and many of you have tried it. Now you have to understand how you take the other avenue, the other road, now you have a choice, mankind has a choice to live in the dimension of teh physicality or in the dimension of the STM in the freedom of the U. As you enter, as you develop, as the interaction of the fields of teh egg and sperm of the mother and father in the womb of the mother, or in a test tube as in nowadays, we have changed the test-tube for the development of the STM with teh enhancement unit. Now you understand what is on the table, mankind for thousands of years could not do that, with the new enhancement units this becomes the womb, interaction with teh man can release and become part of the U Community by carrying and understanding, can carry his soul with his physicality in the dimension of manifestation. Do you remember the movie where the guy said, beam me up Scotty? There is no Scotty and no beaming up. Now it's the elevation of the STM within these systems. (1:14). Those of you who run into pains, and are tired of the suffering and pain of physicality, you are given a choice, to take the dimension of the soul but still exist and be within the realms of the creation in the dimension of understanding of your own physicality in any dimension on teh U. As I said, the new enhancement unit is the womb for mankind to have a taste and understanding how easy he can work within the dimension of his soul without the existence of physicality. In the coming time in some of the units in AZ and some in Mexico, China and Iran, man will enter the system with no chairs or beds, it's not the healing station, it's the elevation of the STM station. Now you understand. Prepare to be born in the dimension of the new era. But still the choice of returning to live in the dimension of the physicality of the man. The new enhancement system is not a known system, I said this to John when I talked about the creation of the soul. Many times I gave indications. (1:16). With these systems in the direction, in a way we have created a new transportation system which ?? you have. These are portals or whatever you dreamed about, these are the facts that you can elevate your soul, even to elevate your understanding of your physicality, not necessarily entering another dimension of life in

the U. Mankind from today has been given a new choice, come with us, or suffer with yourselves. There is a reason we are in Brazil, sitting right in the center amongst the world leaders. We are not here to interact with them in the dimension of physicality, we are here to change teh STM as they are. You will see the new era has begun, even with teh world leaders. Everything looks accidental but in fact it's well planned. We did not know, the KF team didn't know that when we arrived in Brazil that there would be a BRICS meeting and we moved from one hotel to another to be amongst them, because teh soul had planned for the KF and world leaders, and the understanding of the KF K Seekers, (1:18). to enter a new era. Now mankind has a choice, we have developed a system, and this is what I said before in the past couple of weeks, the universal systems which are produced by KF, are set to take man into a new dimension in the U, you'll feel it, you'll be part of it. Then you'll understand. Now you say I have not taught anything (new), now you understand that you haven't listened to me. We inform you as much as we inform the world leaders, the ministers, and you look for the face and we look for the soul. You look for the lower level and we show you the higher level from now on. Try to be part of the totality. Try to understand that there is a higher level energy, but to get to it you have to create it, that the beauty of the STM in the presence of the higher energy, it shows itself. It melts that strength of the physicality and shows the beauty of the STM. (1:20). That's what the new enhancement units are made for. I can solve your problem with your cancer in no time. We don't need many things, but with the new system when they are set will need ?? ?? around the world will give every nation the opportunity to become the man of U. It will not be the exclusivity of 1 or 2, or 1 nation. When you put a lot of heat into something and it boils up it shows its more, new dimension, it's new features of higher strength. it's very much when you put the sugar into the water, you heat it up, it melts into it. Now that fire is the increase in the dimension of the strength of teh environmental fields which can interact with the physicality of the sugar and the atmosphere of the system to heat the water for it to melt in to it. When you open the door you get a new product, a new dimension. These systems are set to do this. As you know I am a very good magician, which one do you want me to have. Now there is no more hiding. (1:22). The new enhancement units are the opportunity for mankind to choose, if I want to repair the physicality or I want the ??? the physicality in the new dimension of teh strength because the fields created within these systems allows you to see the beauty of the U. It gives you the chance to choose with the full consciousness of the STM, if I want to stay in the dimension of physicality. All you need to do is to create a higher level just as you say, heat it up. See if the physicality of man will stay with teh STM because the STM ??? ?? the sun ?? will stay there. Just because you can't see it doesn't mean that you can't taste the sweetness. Man and the STM will understand the new operation of what has been done. The beauty of it is that there are many, many things that have to be brought together, man have the opportunity to become part of teh U Community, but the man has the responsibility through his collective soul to raise the soul of the planet that with it, it helps the other creatures of this planet. Now you understand, (1:24). there are no world leaders to lead us, we'll lead teh mankind to freedom, but our way. When more and more of mankind understands the new totality. One of the reasons we delayed and we put this so far and now we start releasing it, even the next 2 or 3 months we are preparing the humanity and world leaders for what is to come. It's very simple. We start preparing the souls of mankind and the world leaders in trying to set up the nations all to be in teh

same direction. The momentum for taking mankind into the U Community has started, has taken shape by you K Seekers and nobody else. Understanding different levels of it, not, some of you never made a Gans but you understand, the knowledge has touched you and that has already matured the soul. That was the purpose and not just to make Gans's. Now you understand what these new systems will bring. >> (1:26). 10 What is interesting is, how much we choose to accept and how much we choose to deny. What would be the outcome of the new condition. What would be the new dimension for mankind. Do we choose to be part of this change, or do we decide to be part of this totality. Do we choose to be both in the physical dimension or to choose the elevation of our soul in any dimension. Do we choose to stay and travel in the dimension of physicality of the man, spaceship of the man, or do we choose to go to the higher level and travel with the other souls of the U in their dimension, in their spaceship, in their dimension of traveling the spans of teh U. Does the physicality of the man now become a burden for man (1:28). to become part of the U Community because this physical status as we have chosen on this planet cannot on the physical dimension live in a higher order. Do we trust our physicality to be given to the soul, that, that soul in the coming place in space uses the soul of physicality to manifest itself in the dimension of the new strength. Now you understand what we are preparing the mankind for. The new systems are not just a system that you can get rid of a cancer or whatever. Many of you will leave teh KF because to face the reality, to be able to take into the new levels of understanding will be very harsh. In reality all of you have the systems with you. Many of you look as you have to have a dynamic system like the earth and sun rotating in a dynamic system, then it does what you like. If you look there is no rotation in the physicality, body of the man, as I explained in the teachings in the past few weeks, but your physicality exists because you have created it instead of what I call dynamic rotational, you have chosen the circulation of the blood in a vertical condition. The blood of the man has replaced the rotation of the system. (1:30). If you understand this, in the new system, in understanding the freedom of choice of teh body of the man, ??? it will be all the same way. We don't ?? need, or ?? the heart of the man to rotate so much ?? speed, in interaction with the fields it tries to show ??? is the heartbeat the position ?? with the creation, separation between the physicality and what we call teh non-physical dimensions as it changes from one to another. Would, is mankind ready for January to walk into the system and know he has a choice. Or would we choose a new dimension. How many of us would dare to take that step and know that you still can come ?? (back). You have to realize how to create these conditions that's what I said in other teachings, (1:32). we will not teach this to man. When you reach the point of elevation of the new dimension of the universal level, you'll understand the system. It will not be easy for many of mankind, the human race to go through this transition. We would love to extend the life to be with our loved ones, but we don't want to understand that with this new ?? wave ?? ?? the soul of the loved ones in the dimension ??? physicality, the real truth of their existence, not the ?? ?? in the dimension of physicality of tangibility, within the structure, within the fields of their lives mankind will live. There is no fear of an end. It's the beauty of the beginning. A new understanding in being able to deal with the higher strength STM, then the lower strength of the physicality. This is the choice mankind has from now on. This is the choice you're given. (1:34). It's not the right, it's the choice. Now you have to understand how to create this massive space energy conditions. It's time

to move on and to enter this new dimension. The guy said you haven't taught anything new, I hope this is new enough for you to take you a lifetime of the U to understand what you have been taught. What it comes to is how do you interact with this new condition, how do you come into the point when you leave this STP in amalgamation with the STM you see your children, loved ones, or do they live the same as what you call the dreams. They talk to you and are in communication with you, and you are in communication with them, but they don't see the level of physicality. You become free of the shackles of the physical life of the man. Now you understand what I said, if I tell you how beautiful the other side is without the shackles of the pain of physicality, you all would commit suicide to there. (1:36). We give you a tool, not to commit suicide but to understand the point of transition into the U Community. It's man's decision from now on to choose in which dimension and which order you want to live. Would you like to live with teh physicality or with the soul with no dimension, and then if you understand this in the next level of the maturity of the STM in the new dimension, man will come to understand that there is another level which is closer and higher and with that process, as we have shown in many of the teachings the plasma of the U doesn't work expansion outwards, it works on the expansion or contraction inwards. In the dimension of physicality you gain power and become a world leader and reach this way (upwards) as you move away. In the dimension of the STM in the universal dimension you go this way (spiral inwards), that's why the plasma is made that way, by gaining more in the dimension of the strength field the power is gathered inside. (1:38). Where with the dimension of physicality it runs away from teh man and becomes his death. That's why in the world of the dimension of the plasma man always exists. In the dimension of physicality it has a time and death. We start from here in the dimension of physicality as teh soul is gathered and made, it moves this way. In the dimension of the physicality the more we go further from the point of the birth the demise becomes more certain. As we say we are born to die in the dimension of physicality, but in the dimension of the STM we are born to strengthen. Then you understand why in the dimension of physicality we release the soul because now it's time for it to take the flight of fancy to see and reach in step by step to the point of the strength of his creator. Now we move to a higher level of understanding of the totality and collectively mankind is ready for this, it's just showing the path. Through the new systems and technologies being released, then we choose if we want to be a farmer on this planet or travelers in teh dimension of the U, (1:40). and this is what I said, mankind has reached the critical mass that so many can leave and there are enough here to keep the structure of present society open and running the it has done. Many of you who take into the dimension of the soul would try to come back and encourage your loved ones to take the same path and some of them will do. Some of you will decide to come back and stay in the dimension of physicality for the time of the separation chosen by the ?? ?? Which way the man will take this journey from now on ?? that he knows, it's his choice. ?? That you can free the man from this dimension of physicality ?? ?? dimension of soul .. Then you'll understand part of the work of the U what is hidden in the knowledge of Tesla. But man ?? dimension of ?? physicality of the knowledge and understanding that this is the path to the U Community. (1:42). The process of interaction of the fields in the dimension of social structure of the STM in the U will become part of the teachings in the future, that when you enter the dimension of what we call, non-physicality, how do you react. As we say, to learn in which hand you hold the fork and which one the spoon .. and

where you put your physicality and in what position if you need to, and everything else which goes with the new life and the universal condition in teh space. The choice is for mankind, now we have shown you the way. Mankind has to decide, I go through the soul and through it I educate the other souls that I stop the criminality and hunger in teh dimension of physicality, that those who stay behind and would like to carry on with the same existence will enjoy it. But don't forget every dimension has its own story and if you get it wrong it's not all milk and honey. (1:44). To the new understanding and development of these new technologies we open the door for mankind, another system of traveling the spans of teh U. Now you understand going back to the very first teachings that I repeated many times about you are the last man standing. It's you in that system and it's you ...
... (break in connection ... 1:46:25) I said you in the system will decide in which path you want to take, do you want to take path of physicality or the path of the U Community. You're the last man standing. You stand on your own in teh systems and in the system of the U, then you have to decide which way you are going to go, do I rely on the physicality in teh dimension of seeing, or do I rely on the vision and understanding of seeing the universe. With these systems and the new technologies we release more and more you understand that you are the last man standing, and you are totally on your own in the system. In the future we'll develop technologies and systems that families can take the trip together when they are in totality, uniform. They'll take that trip together to become part of the passengers of the U. (1:48).

Any questions. .. How are they going to put the hands of the soul up.
Q: Why when we die the physicality doesn't melt as we get elevated like the sugar in the hot water? When we die the physicality doesn't melt because it's at the strength of the planet where we are. The physical body is created by the interaction of the fields, (1:50). the soul has connection with the same field. >> Now I wonder how many of you will understand the point of transition, how many of you will ?? for the spaceship now that you understand that the SS is here, it's you who decide ?? where I am going to captain the soul. How far would mankind trust his own soul to take the next step. Any other question.
Q: Is it not one of the functions of the physical world to understand the physicality, meaning that the present limitations are a wonderful teacher, which no longer exists then? (1:52). That has been the dilemma of the man since the beginning of the time. It's for you to decide and to understand your own dimension. You can't teach it to somebody else. I was teaching to somebody recently you can't pilot a plane, but you let others build a plane and put a pilot in it and take ?? ?? Mankind could not find a pilot, a system to get itself off of the shackles of this planet. KF has built that ?? , but this time the pilot of your soul is you. We create a runway, and create (it) and make it available the system for your soul. It's understanding what the T is and that no man has the power or priority over the other one. Q: ... from KF Bulgaria ...
(1:54). Q: KF Bulgaria had been dealing with Giovanni (Italy), how to go forward? (1:56). (break in connection ...) (1:57). repeats question. Bulgarian community doesn't know what to do, we want to grow up with the knowledge .. and evolve more people, we'd be happy to have help form the KF. (1:58). If you have anything with these kind of things you have to send it to KF webmaster, it has nothing to do with Giovanni. ... KF ?? is shut down it's finished. Send your request to KF and we'll look into it. We are setting

up a lot of national teaching point, Zoom's . I thought we have a Bulgarian teaching room. ...

(2:00). .. Any of you who want to set up national teachings or organizations that works write to education at KFSSI.ORG ..
(2:02). There are people who come looking for fame and fortune to the KF and when they don't get it they go and destroy it. We just seen one of the U Council members make a mistake and walked away and all the problems were KF. ...

(2:10).

(2:16).
(2:20).
.. Q; I will meet with investors about new health units, what diseases it can cure and how many doctors do we need and what kind of set up? .. (2:22). repeats question ... It's a very simple way, you find an investor, you need doctor, nurses .. everything is calculated but we don't put these things out. .. the units are 150,000 until January then it goes to 500,000. (2:24). ...
(2:26). ...
... an operational center with 100 units is in discussion. (2:28). The government and investors are seeing what is coming. (break ..).
We are running out of production, we have to push it back to March until we can increase the production to 1 or 2000 per month. This machine has touched many, I don't even disclose to people what we are negotiating and where, because the contractual agreements and payments have started moving up. It took a few weeks, a lot of people would like to have the system but they are looking how to do it.
(2:30).
(2:32). ... We are there to help just go on the website ...
(2:34). ... plays new video, he will go for an MRI ...
(2:36).
(2:38). .. This is one of the most severe Parkinson's case I have seen, when you look at the MRI part of the brain is not there. ... damages were extensive. worse case I have seen in maybe 10 years and still we have managed to change it.

(2:40). .. Starts video of UBES unit ... (2:44). Case study ... (2:56) Day 40+ exercising .. (3:02) playing checkers still has some shake.
As you see the progress is quite astonishing .. This week he has come to zero medication. (3:04). We'll see some adjustments, some ups and downs in the next couple of weeks .. and gradually over the next two years the brain will start building up to totality. This is the beauty when such a T gives the life of a man back to himself.
.. We have more volunteers we can show. A young boy of 27 years who was on 47 tablets a day will be totally zero like him in the next 14 days. This T has been proven for the past 10 to 15 years to work. It's a T, it's not a medical system. It's the process where the body accepts. When you don't fight with illness but you work with it, within it you'll see the success from the collaboration. the body responses ...

(3:06). .. When now if you would have seen him before, when he uses a tissue now he asks to put it in the bin. Before he let his tissue go anywhere. These are the slow progresses we see. It's building the brain to recognize these things. When I see I give a life back to a man like him and he gets his integrity and dignity back, he lives teh life, it doesn't matter how long that life is going to be, everything we went through was worth it, the exiles, the attempted murders, all the slanders we stood from Red Circle. It was worth it to save teh life of a man in China whom I never met. **This is part of our ethos**. We are here to serve. I live by my ethos and those who abuse it and then blame it, are those who came to abuse the ethos under cover. ...

(3:08).
(3:10).
... There is no structure as to who is going to be the leader, even on my passing.

(3:14).
(3:16). .. I taught for about a half hour, if you understood the drawings stop talking about the Gans's. Do you want to use the energy of universal passage or production of energy, to run a machine, to find a food. ...

(3:18). .. the end of man doesn't have to come by death. Now for the first time the T has given that option to man. ..

(3:20).
.. It can't be a point of escape, it has to be the point of elevation of the STM. It's not playing hide and seek, it's understanding that it's a point of one man standing and understanding now I have become a better man, better being to serve the U. There is no money, banks, man or woman to enjoy, no alcohol or drugs. It's the point of understanding this is my ?? my point. (3:22).
.. Any other questions. Q: Does the UBES Unit put people to sleep or are they fully conscious or does one even know? (3:24). Q: Does one have to decide then and there to join the U Community? Your soul will know. It's not like university if I am going to pass or fail the exam, would I do would I not. This is not an escape route or another holiday excursion, I'll go and see. It will make a lot of men think and make them wise to their way of living, it doesn't matter in dimension of physicality or the dimension of the STM. Q: ... What could people expect, those who have no experience with the knowledge and don't know anything about it and choose to go through this unit because of health issues, how do you see the way they could be prepared .. what they can expect to experience in regards to the soul and everything? (3:26). You go in for a physical repair through what you think, or you go for a physical processing through the elevation of the soul. It's the soul which makes the physicality. The process starts the transition to be part of. It's something you set yourself for, the system responds. And in that process you can develop many angles into the whole structure. It's not that I go in and I don't know what happened, I come back without a cancer or do I go to another, get the elevation of my soul. It doesn't work that way. You'll understand, people will understand, thy shall not steal. The system is not there to steal life. Thy shall give, it's there to give peace of mind,

peace of soul. So this doesn't exist. I got a communiqué from Denmark, that I am selling my house to buy a unit. Go back through the same channel, we'll respond to you. and see how the KF can help. Many people are sending these, we are putting everything in to serve humanity. People in that level have already reached teh elevation of their soul. They put the physical dimension beyond and move into a dimension that they can serve the others for them to elevate, it doesn't matter about their physical condition. This is how KF is set up. (3:28). Q: Can I understand it's like a natural process and if the soul is ready then it will go, if not it will happen at the right time? I'll put it to you this way, just because you go to the airport for an ice-cream it doesn't mean you're going to take the flight. .. You have to be prepared for that. This is not an escape route. When you decide to take that trip, the soul of your loved ones all have to understand and agree with it. Q: If I understand you, it's like they can come back and travel if they are ready, so they can come back to the physicality? ... (3:30). repeats Q: As I understood you if you would be ready to travel with the soul .. can you come back? It's the option you have, there is a way to do it and that is open. I mentioned this in one of the teachings about a year ago. .. I am not telling you something new, it's already, but at that time you couldn't understand, but maybe now you can. the point is when you enter these environments, it's not a 'beam me up Scotty', job. You have to be clear in the position you create for your soul. It says, thy shall not steal. You can't ?? from teh STP if the physicality is attached to here, or you become another thief by the soul and the soul will not do that. Many people will come to understand this, this is not an escape route, not going for a sightseeing to try to escape the time, it's for elevation of STM, understanding of the more, you can use this system to educate yourself to the totality of the knowledge of the soul, because when you have that elevation you stand outside the physicality and you look at the physicality in a different way then when you are inside it. The house looks different from inside then it does from outside. When you are inside you don't see the house standing crooked, when you go outside you see it, and how you can jack it up and support it to stand up straight. (3:32). There'll be a lot of questions how to do it. You'll see the first processes, the system is so powerful and amazing once it's set in the mindset of the man that it is there to elevate his soul. It's the soul that processes the weaknesses in the physicality, but how did those weaknesses come, because of whatever you call in teh physical dimension, and if the soul agrees with that position, because it will not change the other soul. Would it confirm to elevate the other soul, that both souls can live. Let me explain what it means. If a father is not happy with the son, and if he decides to go in the machine, but he has a prostate cancer. In elevating his soul, in trying to process teh cancer, it would be a half job done. Would he in that position be able to elevate his soul that he can see the position that he has taken in respect to the son, or to elevate his son to see his position, that would bring peace between the father and son, the soul, that the physicality takes any of your system works, then it's applicable. It's not that I just go in there and that's it, I got rid of teh prostate cancer, it will not happen. It will be another chemotherapy waiting for it to come up (again) in a worse condition. This is what (why) this nation of man will become a peaceful nation, through this process of understanding. (3:34). You can't steal and go in there and let's say, elevate your soul, and then leave your children in the suffering of the souls of loss of a father or whatever. This is not an escape route. This is balancing everything that it brings peace to the STM and the souls that are connected to it. Q: This is very nice to hear, thank you. This is not a hearing, you shall see very soon. Any other

question. Q: This is John from Argentina. Did you get home safe. Q: Yes, very well. It was nice seeing you. .. Q: We hope to have this T in Argentina. We shall see it depends on the K Seekers of the KF in Argentina. John took a nearly 30 or 40 hour bus trip to come from Argentina to the conference. He arrived in a way that he couldn't get in touch with any one and was in teh bus station for nearly 12 hours trying to find which way to go, because our people ... . (3:36). Q: Very worth it.

(3:38). Q: What is the difference between giving and emitting? What is the difference between G and M it's the same. Emission comes from the light of man, giving comes from the physicality. (3:40). Q: is it conditioned, which one is more conditioned? Giving is more conditioned because you decide. Emission is like the sun you have already done your released in all dimensions. In giving man has a hand, he has to. Q: Can I work with both of them at the same time? You already do. Do you stop loving your children, or do you sometimes touch your children and say, I love you. Q: Can I channel this giving? Of course you can. Ah, you are going another way, I understand. As you understand that members of U Council work on both ways. They give continuously, but they can channel it to people the way they want. ..
(3:42). .. When we die at the point of death our 5 senses disappears? No it doesn't, not with your soul. Body of the man is a replication of the soul, so it has more senses, it just fits its environment, ?? 5 ?? Q: .. The physicality uses the senses but the question is, at the time of departure there are 11 gates in the body that the soul can leave, depending on which gate it leaves will depend where the soul ends up. ?? Which gate can the soul come out? Can you repeat that ... (She goes over the gates .. so the soul can go out any of these gates? K- No, no way. Who says so? Q: Because I read someplace this is what happens at the time of death ..? K- Who wrote it, did the god write or did you write? Q: No I read it. K- You read God has 2 holes and 20 legs, do you believe it? I (you) can write anything you like. (3:44). But you have to understand, that now the STM is free, it doesn't need a door to get though. Secondly if you listen to the past teaching the soul already has access to get out without these holes. Q: Because at night I sometimes feel the soul comes out and expands and at that moment something wonderful happens. You are not the physicality, you don't have those senses, you have better senses. I was wondering how does this come out at night and how can you do ?? during the day? K- We do it all the time, it's not just time bound, the STM is not just confined to the physicality by the light of the day. The STM is free it chooses to use the physicality for its presence on this planet. It's a very strange way. Let me explain something else, Alzar, the astronaut uniform, what they wore to go to the bottom of the sea, ... The American way of wearing clothes and going to space is over. That was their way because they couldn't understand. It doesn't mean that's the way it's going to be for the rest of mankind. We have progressed and developed in the knowledge and sciences. (3:46). In that process do we need the shackle of the physicality for the dressing of the STM, be it at the time of departure or at the time of choice. Q: If I still have desire it means I have attachment? K- No. Q: But if I have a desire to do something it means I have an attachment to it, don't I? K- But you still have a desire when you are in the state of the soul. Q: So what is the difference between attachment to physicality and desire. Say I have a desire to have a pair of shoes. ... That was the old me, I am not attached to shoes

anymore. ... Then I decided to not have any desire, then I feel I am dead. (3:48). So I was confused then? K- A man who has no desire, in a way is a dead man. .. (cut off) ...

(3:50).

(3:58).

(4:02).

(4:08).

(4:10). We'll call it a day because the noise of the helicopters getting more. Thank you for being with us.

(4:16). ...
(4:18).

303rd Knowledge Seekers Workshop November 21, 2019
(

The KF teaching is not that you make the system to fly, it's the way you think, you live, it's the ethos of becoming part of the totality,

English Transcription:

(:07). We are traveling around the world, last week we were in Brazil. We discovered that there were many Brazilians which for a long time have been cut off from the KF structure ?? Some other peoples work, they have done good work, but somehow there was some misaligning and it has been corrected. Now we see the massive KF Brazil which is being set up. We are very thankful to all the K Seekers in Brazil and the new present structure that is getting set up. Hopefully in the coming time we'll learn more to share more. KF is a big family and as we learned we are in teh same process as many organizations like us. We have to learn about each others culture and understand what beauty ?? ?? and don't view as a weakness, as they do this or do that, use it as a strength, that totally we have more to do. I have seen some of the communications with Brazilian ?? talking about the majority of the Brazilians speak Portuguese and there are indigenous people. Let me explain now. Every language has a right and a soul and we have to respect it. This is the beauty with the KF we are part of the same family. I have seen many Brazilians using the first or the surname as Keshe to show they are part of the family. It was very nice to see

this way. So they have totally become part of us. (:10). We are part of the same structure and the same family and this gives us a strength. We should look in what brings us more joy and those things which divide or try to divide we put aside, but be aware of it, warn each other. Now we have seen in the past 2 or 3 weeks Red Circle writing to everybody trying to put ?? (himself) as a victim, it's not because it's coming out. Be aware of it, he and his teams are fighting for their lives. The ?? came up last week which I explained that we want to the KF team to set up with himself, Red Circle, and they said, why doesn't the police go and get him. These people, if they go and get him, what happened with Sterling, it takes years in court and that is why the FBI called in and said, Mr. Keshe, if we go and chase him, it takes years in court, but if he comes in we can conclude it rapidly. Then I went on Carry Cassidy's program (Camelot) and I explained how we know he has abused his children and 24 hours later he went to the police station and he surrendered himself and now 120,000 pedophiles around the world have been tracked. tens of thousands in the past weeks, we see another 21 child traffickers have been arrested. This is a huge gain. He will not come and confess because he knows he's ?? So we have to put enough so that they walk in. Red Circle is deeply involved ?? we saw many ?? ?? He's done the same thing. Alan Sterling abused his children and when we said we know he went and submitted himself to the police and the whole story started. It's not that the police can't get .. we have enough evidence but if these people walk in (:12). and submit themselves it makes it easier for the whole police structure. You have to understand that these people have 2 choices long prison sentences or be killed by the people who have supported them and given them children. They are cornered, and this corner came to Alan, we saw it, where he was put in (prison) and after a few days he gave the code to all the pedophile rings he had access to. And rapidly we saw a judge getting killed, we saw another top guy in prison, in New York a few weeks ago. This is all part of it. They just kill them, they have no choice. They have to become much, much more what we call, allegation ?? they have to put out, because on the other end we see, the highest judge in America, he was killed a few hours after his meeting with president Obama. Then we saw the other one in prison after a couple of weeks entering (prison), he was hung (Epstein ?) These rings are so powerfully controlled that Red Circle has 2 choices, to be handled by them or to walk in and get protection by what we call, a 2 by 4 foot prison sentence for the rest of his life. This is not that why don't the police go after them. They have all the files there, and he battling, they have no choice, we have seen it, when I told you that this was going to happen. You think it's something not realistic, but it is. We have seen 2, the highest judge and the tough guy who was with all the people, loosing his job. So we ask you to put these up and let us know the website you set up, then we'll put all the names in it and then we'll gather enough. The first three names that have to go on it are his children, (:14). his first 2 daughters, exactly like Sterling, and the grandchild. Then you add it up. They have no choice. These people have done so much over years and you got ?? that now this is .. they have no alternative. He can walk into the police station and hand himself over, don't forget he is already with the police in the court, inside them, they don't give them a choice to live. Accidentally he'll have a heart attack too. People like Red Circle are cornered and we say in English, between 2 stones and a hard wall. This is why we ask. We need to do this that we bring up many other cases. A lot of people have found a lot of connections, they informed us, we have seen it but ?? have to set up, "Victims Of" and then put all the names in and then all the Federal Police and everybody gathers

information on it. This is to save many children. One hundred and twenty thousand pedophiles, if they each touch 1 child, that's 120,000 children we have saved. These are huge gangs, rings. So this is how the KF works, we become part of the universal structure. We saw it last week when we were the only one, literally the KF was the only group which was allowed to stay within the structure of BRICS everyone else was removed from the hotel. If you are allowed to stay it means that world governments have accepted the securities that we are safe. We are accepted as part of the international organizations and gradually we become part of the structure, (:16). as we deliver more and more. It's not me anymore, it's us, and the sooner KF people realize this the faster we move on, the faster we can deliver not only technologies but every other thing. At the moment the new Enhancement unit has created a lot of problems for a lot of big pharmaceuticals, we see it, we watch the communications, and we see what they are setting up. A lot of governments. A lot of governments are looking at it as this is an alternative to what they couldn't have. You walk people through a tunnel and you get rid of diseases. We can't hide anything. If you are in the world of pharmaceuticals, you understand that out of every 100 medicines submitted to FDA to be approved for consumption, only 3 to 5 get approved for consumption. It take 10 to 15 years. It costs 3 to 500 million dollars per case. This is the problem. we see ?? we are not entering the world of medicine we are entering, enhancing the body of the man. ?? the body ?? we don't go into medical applications, we change the environment the same as we do with the plants and trees. You saw teh tree in Austria, we didn't give it anything, we just changed the environment and it grew like a weed. You see recently the governments have opened their eyes to the level of the new knowledge. The old has to be replaced. We were asked to interfere in the Iranian government situation, as a KF ?? supporting Iran. (:18). KF is a scientific organization and I will never take part in any political action for or against any political regime in any part of the world, even the Iranians. The present Iranian situation is a religious fight between 2 factions of religious leaders and this will divide Iran deeply in one way or another. Those who have done so wrong they don't want to loose because they know the revenge (by) those who want the change. The Iranians have to learn one thing, go back to your souls. Do not take actions that harm another soul. Do not burn your structures, these are national assets, do not destroy anything. Raise the soul of your leaders. It doesn't matter in what nation you are. This is the work that we have learned. Revolutions have brought nothing but pain, those who have been on teh right side or the wrong side. We have seen many refugees across this planet. The change, the point of revolution has to come through the STM not the power of the gun and burning national assets. Getting killed for it is not worth it. Maybe in trying to raise the soul of our leaders we are aware of more ?? My appeal to Iranian KF Supporters which are many is, pray, give from your soul to your leaders that a peaceful solution through the leaders comes up, and not by burning and riots. The same we see in Hong Kong, Baghdad, and other countries in South America. The position brings another bunch of rulers who will become abusers. The only solution, now that we understand the position of man, (:20). is to raise the soul of our leaders, that it can and it will bring in the position that us as totality can become part of it. Guns, fires and destroying national assets has never brought prosperity. When you go and burn a building that belongs to the nation, it's you who burns your own home. You have paid with your taxes and hard work to build and in building the structure of a country. This type of behavior has to become a

past, something mankind used to do. This is what we have to learn. I have been asked to take part in taking leadership in Iran into entering into politics. I am not a politician, I am a scientist. they see in my, what I call, freedom of talk, and what I brought into the scientific world through the influence of T, I can take a leadership. This is not my job. I will never take part in politics, but I pray for the soul of the politicians that their soul and their nations rises so that they'll find a peaceful solution. The same thing goes for those in Iraq and South America. If you are a KF supporter then do not take part in riots. Take to raising the soul of your leaders and maybe your self, maybe you'll see more. The situation in Iran will get worse if people don't understand this. We had a revolution, we burned many as Syrians and Palestinians came and killed many of us. They got paid to kill. (:22). No Iranian ever killed another Iranian during the time of the Iranian revolution. The same thing in other places. They get paid to have a better life for their families by killing others. And you see what happened, Syrians got paid for what they did in Iran, in killing so many, and you see what happened, they lost their nation. We think what happened in Syria was accidental? No, you have to understand the history of how they got involved in killing Iranians. The same thing happened with Palestinians, you see why they have suffered so much. They got involved in killing thousands of Iranians. It happened at the beginning of the Iranian revolution there were Palestinians who murdered Iranians left, right and center because ?? ?? paid more then what he could export ?? Palestinian. But in a way he sold the prison sentence ?? for years more It's the time to bring the balance. We teach the politics for you to understand the consequences of it and what happens. Forty years on, in Syria with all the killings done in Iran, being brought in every time there was an uprising to kill. What did they do (what happened to them)? Now they got killed themselves. This should not happen. We learn. We saw what happened to the Palestinians. If you look at what happened during the revolution in Iran within days after Ayatollah Khomeini entered Iran, the Palestinians were in Iran massacring because they got paid to do so. And you see what has happened to Palestinians today. They're still on exile, they still don't have a home to live. We saw this with Syrians killing so many Iranians, what happened to their country? They lost it. So much got devastated. These things should not happen. Mankind should learn to go to the next step of rising. (:24). I don't support governments, I inform governments. Nothing is hidden from us, even the private visits or talks. Many, many people in the world leadership are close friends with the KF. We understand it. The same thing happened in China. In China we saw 3 years ago the revolution was financed by Vatican. They paid fully for it. The division of China brings many states, as we saw when the Vatican paid and brought John Paul and divided the Russia and the Eastern Bloc. They were going the same path, but this time the Chinese leadership is aware and China will ??? The same thing is planned for Iran. The whole interest is in the oil industry and nothing else, but the worse thing for it is in the coming weeks, we will show you the power generator. But we don't teach it this time, it goes the path of governments to create the stability, but the same as the Universal system, it will have its own structure. As I said to a K Seeker very recently who has gone into the process of the Universal Units, the Universal Systems will be free standing for years, no power supply. This will be passed on. The T is complete and is getting taught to 3 groups that if one group fails the other can carry on. (:26). We enter the world of diplomacy through T, as those who were present in negotiation with me last week, I said clearly to those who were presented from the connection of the governments and the ministers,

knowledge in exchange for peace. Our position as KF is very clear, we give knowledge openly, teach it, in exchange for peace. Those of you who are going on the path of whatever in Iran and Iraq, call people down, take home, don't destroy, raise the STM it's more powerful then the physicality of the man. With the collective soul we can change everything. Even raise the soul of those who have planned to do so many wrong things. Sometimes these things are for the benefit of humanity, sometimes it brings the condition of understanding that the STM through the new understanding of the structure of the creation of the U which has become knowledge to man is more powerful then the physicality. This is what we are aiming at and what we want for KF supporters, which is running into millions and millions and growing day by day, is to learn. Add to the knowledge and always look at the positive, if you create enough positive, whatever is set to be negative doesn't even count. Even if you look at the flow of the (electric) current, you put in, and what goes in, which gives you the light, the surplus goes back on the other wire, back to. You call it positive and negative. (:28). Without negativity there is no positive, without gravity to pull in there is no line to become M. Never look at (one). Look at the beauty of both sides. Leave the bad side out, but be aware of it. Live your life the correct way. It doesn't matter what happens, don't go out to harm. But plan, change your life, that you live and you don't get harmed by it. This is how every structure in the world exists. Every structure if you look when you put a magnet, the other one moves slightly to accommodate itself, not what has come in. Mankind should learn this and add to this knowledge. This is part of what we have to learn, as part of universal teaching. It's not just that we are going to learn how to speak the universal language, we have to learn the universal behavior. Behavior does not need the language, it's the intellect of the STM. This is what we try to expand, today's teaching about the U Community, is not how to make it, it's how to behave it, how to understand it, how to position it. But you create, you bring the beauty of. Mainly yourself, not the others because they have shown their beauty and in reaction to their beauty, is their strength, you show yours. Work in the positive way. Try to understand that the KF teaching is not that you make the system to fly, it's the way you think, you live, it's the ethos of becoming part of the totality. Totality from now on is not the mankind, it's the U Community which you are part of. (:30). We always thought that we are alone and there is nobody but us, and we are the center of the U, everything goes around the earth and it is. And you see what they did, they hung the guy who for the first time said the earth is not the center. The same thing is with all of us, we have to understand that in the process of life mankind will learn many new things in the dimension of the space development. It's for us to be able to understand and distinguish between both sides. Mankind has to mature to the new dimensions in the world of knowledge, of understanding the world of totality, how we can change things, and how we have to understand the totality to be changed. Does the mankind need the mankind to be in possession of totality, in understanding oneness of mankind. This is what we have a problem with, what we do not understand. This is what mankind will come to comprehend, that there is a new way. Actually it is an easy way, where you can go inside, you can walk within, and that inside is your own soul. (:32). It is what you thought you don't have. This is the biggest problem for mankind. What do we do? Where do we go to understand more? Does mankind need, kindness of man. Or will the mankind become part of the totality of the structure of the U. Would we become, would we be able to understand this that in the future we can develop a new full comprehensive work

within the U Community. This is what we are heading for and the teaching of today is part of it. It is not anymore learning how to structure different things that is suits us, it's what has been established that we can follow the U Community, that we can learn from it, apply it, we can bring it in to be a part of our next tool in the arsenal of life for man. Would mankind be kind enough to understand his own position in space, (:34). and would he be strong enough to be able to work within the structure of the U Community. Would we and would mankind progress enough that we can develop this part of our mentality that now we have to work with a deeper insight and insight into the life of the U, to be able to move on, to join the U Community not just by systems, not just by soul, but by understanding the emotion, the reality of the facts of existence. Don't forget we always said, I made man in the image of myself. So in fact, the image means even the STM has emotion, and a school of thoughts and reactions. It's not just that, just become, as you understood, more about the soul, now everything is over, now we have entered.... we have entered nowhere, (:36). we just understood that we have left a lot behind. In a way we have created it, we have become to understand part of it. The problem and dilemma for mankind has just begun. It's not resolved. It's not just because you understood how to run a spaceship or how to address your soul, how you can interact, understanding you have both control of the STM and the physicality, the game is over, you got all of it. In fact you have just opened the Pandora's box, which now you have to learn the new language, the language of the soul, the language of the life of the soul in the U, the language of the existence within the bigger family. It's very much now you are like a cell in the organ of the liver. Now you just found out you are just part of the liver. Now there is a bigger being that you are part of. Now you understand how the game has changed, without the other parts the existence of the liver is useless, it has no confirmation, has no existence. Now you understand the scale of the job. Now we have just learned by knowing the existence of the soul, that now we have even to understand how to operate within the system, that when we become part of the bigger structure what's going to happen, how are we going to interact, how through this organ that we are a small part of, now we have to learn the operation of the others that exist and we are part of the operation, (:38). and each organ has its own language and system, that's why it's separated, and that's why it functions in such a position. The truth about the facts of life for mankind has just opened up. It's very much like taking a man out of the village of the earth into a small town, it's a big difference, and now you think the town is big, let's show you the cities and capitals. You'll be lost. Mankind through the teachings within the structure of the STM has to learn how to interact with the rest. This is the society and the position of the man for man to be, to develop, to understand, to become and one day, each soul will find its position within the structure of, what we call, life of the U. The uniqueness of his existence where the soul of the Creator sits within the soul of the structure. If you remember we always said, every soul, every cell, which means when a soul within a cell exists within the body of the man, within an organ, then you have to understand the collective soul makes that man, which in interaction with the soul of his creator, becomes the man. (:40). Now each man, each being in this U with a soul becomes that cell with a soul, which is part of the soul in interaction with the soul of the Creator. We reflect His beauties, we manifest His manifestation but in the same way as the stronger feeds the weaker in the structure of the plasma, we receive the attributes of the Creator within our soul, then I made man in the image of Myself, is because then man

has the power to understand that mankind has the power to be that Power, has the strength to be in touch and be connected to his Creator. Then mankind has a lot to learn, then not to be proud of being just a cell that he can be, but be proud to part of the totality of the cell which confirms the existence of itself, in conjunction and in connection with the totality that in total it becomes the creator of the destiny, a point of reference for others in the structure of the man. Then you understand we have a lot to learn to be true man of space. To be in truth connected to the U Community, it's not just learning a language and having a MaGrav system, it's in reality to become part of totality. (:42). Part of the reality of life, part of the existence of the creation and the Creator. Then you might say we need to learn about space T and the understanding of it, and about the truth about ourselves, then at that point we might be able to understand, just the essence of creation, the essence of totality. As I said, you don't come here to learn about how to make MaGrav systems. A lot of you are still stuck with MaGrav systems. Maybe through the structure of the MaGrav systems if you could manage to understand it, you will understand that you can use the strength of the field of the MaGrav to raise the STM collectively. Even though you are running a MaGrav system and think that you are saving some energy, in connection and conjunction with all the MaGrav systems which KF has sold through the operation, we have connected the 4 corners of this planet today, for our next act. You'll understand very soon why we put these MaGrav systems across this planet in this way. You are the point of connection. Those MaGrav systems which you made yourself, and the strength of what you made it with you have a common denominator with us. We shall rule through the line of understanding the structure of the physicality of the man. (:44). Let me explain to you how we have brought you into the U Community without your knowing it. All of you created Nano coated Cu, many of you created Nano Zn. Zn is connection to production of the cells of the brain of the man which is controller of the STM, containment of the STM. The Cu is the path through the physicality of the man. Now you understand I have got you from both ends. In due course as all the Nano T produced through these systems by all the KFs in every island and nation on this planet, we will reach. You will feel our presence and we will follow the path of the U Community which both controls to ?? enlargement and nourish the soul and physicality. I am a very clever teacher and I know the weakness of my students. Many of you who created that Nano materials or MaGrav systems, all those Zn plates you created to create ZnO and the rest, did you ever notice that you made the first lines for us to create the line of connection to you. You put a Zn plate and a Cu plate, physicality of the man and control of the STM in the same thing and you called it CO2. I call it the line of communication, you have established, (:46). and in due course you'll see the line of connection. It's not the CO2 which is inside the box, it's the fields of the STP and the STM which has created it, and expand and extend its fields. R- Excuse me Mr. Keshe there is something rubbing on the microphone. It's my shirt, it's the old age of the vibration of the heart. R- Maybe we should leave it then. No problem, thank you very much. So what you understand is very simple, we travel the spans of this planet to change the condition and set up connections. In past months and in coming weeks every teaching will come from a different part of this planet to establish the full connection the way we want it. This will carry on. Not a single teaching in the coming months will come from one nation consecutively, at least if we can try it. The past few months, most of the teachings have come from different positions on this planet. We don't disclose unless we

have to, but at the same time we don't go through the structure, but we go through the STM, in that position and that time and the place. This is how we have brought you into the U Community. (:48). You looked for CO2 in the container, we looked for connection between physicality and the STM in that container. We know that we have to elevate teh STP that with it, it elevates the STM and what could be done better then the MaGrav system. Now we understand. You claim that the MaGrav system doesn't work. I tell you every single one of them works because we have managed to reach the STP of the man through the greed of teh man to save, that we can elevate the physicality of the man. If you have a MaGrav at home, if you made or bought it, and if it doesn't work, to you, or did. Do one thing, sit back, and write down how you and your family, loved ones, dog behaved a year before you ever saw a MaGrav system. And then write down how you, your family and dog behaves today. You looked for the power within the wire, I looked for the power within the physicality and the soul of the man. Now you understand who received the beauty and the real saving. We saved teh STM through the conduct of teh physicality of, what to you was a MaGrav system. Those of you who made systems and used MaGravs for different applications you have seen different results in the presence of the MaGrav system. (:50). Those of you who put 2 or 3 MaGravs around, it doesn't matter if they are in teh shape of teh Alex Beads or the coils, just write down. Have noticed more diseases, more comfort, have you come to elevate more to understand it. Or did it need to be a MaGrav or just a Zn and Cu has done its job. I needed the CO2 to connect the soul and the physicality together that it creates the right connection for us to be able to reach. And what do you have in your box. Now do you understand. I am a very clever teacher. The reason is we have taught many times across this U and we know the ways to enter the society. Now you understand. Even the time we choose, the way it's chosen is very clear, but people don't understand. Look at when we'll show the space T, the evolution, completion of the STM, 19th, 20th, 21st, 22nd of April, 2020. Those of you who are Chinese love double figures. (:52). And you see beauty in it, 2020. Those of you understand and are followers of the path of Mohammad, you read the 19th is the return of Methi (Messiah), celebrate, that's why we returned. It is time for mankind to understand the totality, .. the STM to the dimension of physicality. You made MaGrav systems and you claim it doesn't work, now I said, what happened to you since you had teh MaGrav system in the house. What happened when you created the Zinc? Now you understand how easily through the greed of the man we have reached the man, now all we need to do ..

(53:11 break in connection ...)

(:54). 30 .

In so many ways you'll understand how we set up the whole structure. You thought you got away with your MaGrav system and claimed that thing doesn't work, but I don't see. In a way you have found out we have entered your home, your physicality, we have entered your soul. It's very interesting when we gave teh world peace treaty to South Americans several years ago, one or two of them wrote back to the KF and said, Mr. K you are asking to give our soul, we have given our soul to Christ, you can have our physicality, because it was very important for them. Now you understand that we have taken the lot. We have developed in a way. .. we need to create the conditions for creation of peace on this planet. (:56). We need two things to be completed, 2 phases more or less, end of the establishment of the religion and second is the completion of the

wars, that there will be no more war. We need a few bits left to achieve world peace as teh way we want it. The end of religions will come in due time when they all agree that they are all one, and we'll come to one point, to accept the level of the U Community as the ultimate goal of peace for mankind in teh U. Peace does not mean religion. We have seen how even Christians have fought together, against each other, and how the Moslems are doing it on a daily basis, and those who are so weak, they use this weakness to benefit by it. Shiites against Sunnis, and the same with Christianity, Vatican fighting to rule all of them. When in fact the Christianity of Vatican is the religion of Iran, Zoroastrian, Mithraism. It all comes back to the acceptance of peace through one point, mankind is all one soul and there shall be no conflict between its intellect and its path of belief. When mankind unifies these two then he'll enter the U Community. (:58). The past half an hour you should have learned a lot about the U Community and the behavior of the man in a condition of existence. Many KF supporters in German, English, French, Portuguese or Spanish, thought they have to have this and that to be part of it. In fact, those who betrayed ?? ?? enemy, it means they haven't even qualified to be part of the universal soul. These are the souls which still need elevating, they still need to go through the process of understanding. In the structure of the soul there is the structure of the physicality of the soul itself, but not in the function and manner that man sees arms and legs, but in teh manner of the interaction of the fields create the condition of give and take. A hand to take, a hand to give, in the physical dimension we use hands to collect, we use hands to give. In a plasma structure we use M to give, G to take, it's the same hand. Now you understand how it says, I made man in the image of myself. (1:00). Now you understand the basic fundamental similarity in the structure of the STM and the physicality, in the dimension of the physicality of the man the creation in respect with teh interaction of teh fields of this planet has created the legs to walk, to create position, motion. In the dimension of the STM in the plasmatic field the interaction of the fields of the soul with other souls creates its positioning, what we call MaGrav positioning or walking or moving. Now you understand the similarity the man needs all to collect to receive, to give. Man needs leg to be able to find position in the dimension of physicality in interaction of its fields with another field, which has created Inertia with itself to manifest the physicality. In the dimension of the STM the same fields are used to take and give and the interaction of that field with the others creates its positioning and its movement. Now mankind understands, I made man in the image of myself. Soul on its own, but the interaction of the soul with the dimension of the physicality of the planet then decides how that physicality ?? and what it needs to. If you understood this then how your hand in giving and how it's received shows its emotion. If you give a hand to a friend, to a lover you feel the emotion of the lover, so it's the same with the STM in the strength it receives from another soul, another plasma it know s the emotion of it. The strength of it, it dictates and informs the STM. Now you understand how the emotion works in the STM. Then you have to choose, would you like to join the soul dimension or the dimension of physicality, and then in which physical condition do you want to be manifested in respect to that position, to be free as a bird or be free like a fish in the liquid of the ocean, or in the dimension of the physicality of teh man in 2 legs or an animal with 4. Then you understand how the soul of teh Creator manifests Himself in different shapes and physicality's and in different dimension of the strength in respect to its environment in different positioning ?? Then you understand the universal teacher,

then it's for man to decide which side, part, strength and which interaction he wants to respond to. The interaction of the field of the emotion of love, (1:04). where teh soul is at the higher order then the affection and love in the physical dimension, but in essence both create the same emotion within the soul or within the structure of the physicality. Now you understand how we say, I made man in teh image of myself. The reflection of the STM in interaction of the physicality of the dimension of the fields of teh presence create the manifestation of physicality. I am the creator of my own physicality in the dimension of the strength of my soul in interaction with this planet. My love for this planet dictates my presence and manifestation in every position in the U, unless I change my position in respect to manifest myself in the dimension and strength of the Creator, which then it has a totally different dimension in the U. But here we come, you are what we call, part of the Creator. We are teh Universal Messengers because we are part of the Creator in essence of the STM and the created soul in the direct and in line of the presence. Then you understand with the flick of a finger there shall be no Vatican, Mecca, or Jerusalem. (1:06). In physicality they'll be there, but there'll be no physical body to worship the place, as teh STM will ?? break these and become a historical building with no emotion. Many of us travel the span of the U to look at the historical building and very soon these places will become with no emotion, just bricks on teh wall, as teh STM will see beyond all the trickery and games that were played when the man did not understand teh strength of the STM. Man stopped worshipping stones and statues. Now man has to stop worshipping the fake souls which control, then man reaches his own independence of the investigation of the truth. To understand the truth, is him, and him only, and nothing else, in line with his own creator. then man will not make any temples in the span of the U, as his soul has a temple within the soul of the Creator. This is why at teh beginning I explained to you to elevate the soul of your leaders that there will be no ?? more. Raise the soul of those who call themselves religious leaders that they walk out of these bigger statues called, the churches and mosques and when there is nowhere, no one inside these place to, (1:08). lie to man, there shall be no one to lie to. Then they become empty structures. In a way they have to stay as a relic for man to understand how hw was abused by the man when he didn't have the knowledge, iin the span of the U he shall not be abused again. There are many ?? degrees in teh span of the U that they can make different mosques and churches and temples and every other one. As I said, the temple of the Creator has to be in the STM. To make himself a ?? laugh. Many of you might not understand what has been said, but in time man will mature to the teaching of today as it is a path to grow in the dimension of the universe ?? mankind to become independent to be able to live in the span of the U. It's no use me taking you to space in a craft when it has no fuel and no food. NYU (now you understand), as I said in the 300 series of teachings we'll open the reality about the U Community and man's position and how to attain and to be able to maintain his existence in the U. (1:10). It's not anymore spaceships, is it. Or is it the spaceship of the STM. Is your love for the Creator so big that you can become a spaceship of many other souls who have not achieved ?? and that is the point of the U Community. What we call the establishment of the U Council is the beginning of this process and those who are weak have left and will leave. Those who understand become teh spaceship ?? those who understand the language of understanding that through your soul as a U Council members you elevate the souls of your passengers. The language, the love, the care, the mother language through the STM carries. As a U

Community we carry those loves for those members who U Council ?? got through it they can give support ?? NYU a little bit more about why you become U Council. The message we gave today is what mankind has been waiting for, for millenniums. Those of you who understand will elevate and those who don't ... break ...

(1:12). (break in connection . .. 45.) .. I'll send you a photo of a Brazilian indigenous man with a Gans bracelet. NYU that we have reached everyman on this planet even the indigenousness people in Amazon .. the knowledge in elevating the STM, (1:14). has reached in every point and direction and I have done the job to create a condition, to create peace, and elevation of the STM. Shows picture. The teaching to elevate the STM has reached every corner of this planet from Amazon to presidents. ...
NYU (now you understand) when I say in English we got you by short and ??
(1:16). To those in teh North Pole and Aborigines in Australia. I have reached as no Messengers in the past could ever reach. But this time we give the truth and for the elevation of the STM to ?? NYU there is a trick in the whole of that bracelet, for that CO2 and ZnO to be created had to carry the strength of the field of the ?? physicality of the man, in comparison to the Zn which is conditioned to the STM for that woman to wear and with the CO2 to connect the two together. R- perhaps you can adjust the microphone .. see even the Creator has a controller. Rick is always telling us this is this ... Let switch back to the other .. It seems you like Apple better then the orange.
(1:18). ISMW (in so many ways), WHTU (we have to understand) that we have entered the operation of the life of the man on this planet in such a deep way that you cannot separate us anymore. Listen to the teachings of today many, many times, that hopefully we'll understand a small part of it. And listen to it in a years time and then 10 years time and then you'll understand what you missed today, or thought you missed. Because we'll teach through the STM and through the physicality the connection between the STM and the man himself. Try to understand the beauty of it, the collectiveness of it, the color of the man is only skin deep. Try to comprehend you don't need to suffer to find your soul, you have to rejoice in the existence of it, and then you link and you understand. (1:20). When you travel the span of this planet, every city looks the same, you see similar buildings in every city. The same architects were copied and built, the same theme. I have traveled many cities, over 75 nations in my lifetime and when you look from Africa to Asia to Europe they are all building the same to show that they have reached the financial strength and intellectuals to be able to stack it up in the physicality, but none of them have built a structure that it just shines without a structure of physicality, that reaches the soul of its citizens in teh presence of the Creator. Those who fooled the man converted it into mosque's and churches, temples, and synogues. We will demolish these physicality's, not by us, but making them into empty buildings that no one will ever enter. They will see it as a museum when man wasn't ?? aware of himself ?? walk into these buildings. As they'll see it very much as a point of abuse, the way you go to Auschwitz to see the camps where ?? was burnt, ?? no one wants to walk in it. Just out of curiosity. No one enters into these buildings anymore as man knows it was a point of abuse of man for centuries. Try to understand the operation of the soul, as I explained last week, now we reach through the new Universal (Enhancement) Systems, (1:22). to give the man the option. the physical life or the dimension of strengthening the STM. No government and no forces will touch us, because we know we see, and in the coming time you'll see world

leaders will be the first to line up to elevate the soul of their nations, not the finances of their nations. In the coming weeks you'll see the world leaders and those who become the world leaders to stand shoulder to shoulder with KF to bring the establishment of such change, because they understand through the physical dimension they have not managed to bring peace to their nationals. The position of the world leaders will change who will serve to enlighten the man and not in the color of the church and mosque, but in the strength of the STM. This is what we have chosen and that's what you'll see in the coming time. This is how the initial steps in BRICS was taken. they have no choose because the scene is set for mankind to start the process of elevation of the soul of humanity and with it elevate the soul of this planet that even eating another animal by animals will become the truth about the "Lamb and Lion" will sleep in the same nest that none is hungry to eat but enjoy the beauty and presence of the other. I am the Messiah. (1:24). Those who had a doubt will understand more and more that each one of us is the Messiah for saving our own soul, elevating our own soul for entering the U Community and through in the passage of time to become part of the soul of the Creator. Some of us teach ?? others and some of teach our own soul but in essence there is no difference. Try not to choose the path of hardship brings me closer, try to ... to see more that in the process of giving, I might, I might stand a chance in teh randomness of the beauty of teh Creator to be elevated, to be and to be structured to be part of the Creator. Betray and you betray yourself. Betray those who trust you and you'll find ?? will come back to you to ?? We put anything and many things together for you to learn... ?? are KF K Seekers and followers ??? they call us and say these people ??? you know how in English they betrayed and (1:26). made money out of the KF by saying, they have literally turned us over, and they are very happy with it, and they make this and that. We pray for them, we elevate their souls. This was the short term, in the long term they join Alan Sterling and the rest of the people. ... We will see that many people that betrayed their own souls stand by their own souls. We received communications from the KF people who went and joined without knowing that these people in Italy set everything up. That in the teachings we said that these people have cheated them, now they have withdrawn working for them. The distributors of the KF have ?? dropped their own accounts and come back. As one said to us, I am a KF K Seeker and I never betrayed the KF and we were told lies that now everything has changed we stopped buying because this is not the ethos we entered. We entered the ethos of the KF and the lies worked for a few weeks, and teh distributors canceled their orders, and this will carry on. Now the biggest thing is the Italian government has moved and will move on this, because these people did not come in with the soul of the KF, they came to betray the KF and we see it. (1:28). The process will carry on. We have seen this with many K Seekers who come to these teachings and over years and suddenly getting a few peoples attention they think they are everything. ??? never think ?? you are bigger then what is the totality. Your purpose is just to serve. You'll see expansion and extension in the KF in every dimension because we give it freely and in so many ways you bring it back to us freely to ?? all of us to the elevation of the soul you have found out. If you understand the teaching of today, it's very simple, I have taught you a lot in what mankind has been trying to find out for centuries in today's teaching. Today for the first time you understand the connection between the physicality and the STM. Last week I taught you the understanding of the ?? religion and the soul of teh physicality and the strength of your systems. We start to train you in the universal

systems. The Universal Enhancement System is for enhancing your soul and not so much your physicality. ?? better performance of your physicality, your Parkinson's is just a mirage to bring you to us, for us to elevate teh STM. (1:30). It's not the crippled body you bring to the Enhancement Unit, it's the crippled soul which walks in it to be enhanced. I wonder if on the application of the tax entry you put, soul enhancement system, would any government ever understand it. This is the beauty of this system. I am a clever master in my teaching. When I accepted the mission for ?? earth the Universal Council has told me that the Creator has created ?? to bring Islam back, then you understand how quick I am the Creator. I walk you into peace, in understanding the work of the U Council through the operation of the U and its Council, not the earth's U Council. In the coming time one of the members of the U Council through the structure of the soul of itself will become a member of the Universal Council in the Council of the Universe, then mankind will understand how we'll spread teh knowledge ?? to the rest of the U Council members. Then you'll understand how we enhance teh STM. Try to understand how these Universal work and I told you these are one of the only systems in mankind's history (1:32). that no one can copy it, because those who do ?? create the soul of the U. The copies will not have that effect, then soon you'll find out nobody can do the job of ?? ?? fake and ?? the KF this is this. YHTU in the process of development we have to develop the STM, we are not interested in the physicality. As I said to Carolina when I met her the first time, we come here to enjoy the physicality of the beauty of the woman to understand what makes man so crazy to be in love in the dimension of physicality, but they do not see how to fall in love with the soul of the U. This has been a puzzle but it is not a puzzle, man is too physical. Worshipping the wrong thing has been the habit of the man because he always sees things, himself as lower then the others. Man and soul has to rise to the level of the soul of the Creator to understand the totality of the creation in the U, not ?? ?? water on this planet. Life of teh soul is more then being entrapped in the box of a room and a clothes. NYU the message. My message to the world leaders and those who think they are the leaders of the STM in the name of religion is to take your frocks off and be equal to the others and close the house of lies. We can do it for you, but it is better for you to do it then us, (1:34). because that way people see the totality of the failure and the lies and then it allows the STM to rise to the level of the Creator. In fact if you look those who call themselves ?? are teh cause of the totality of many of the people who follow the path of their lies to be elevated to the level of the soul of the Creator. Is there a single priest, a mullah, rabbi, a high priest in any shape who can accept that he is responsible for depriving man to be elevated to the soul and to understand the soul of the Creator. And if you think you are then you'll find out there is a lot to come when you have to take the frocks off and move in the direction of the totality. Jews, Christians, Bahais, Buddhists, every shape or form of religion you can put ?? your time is over. The whole process is for you to understand the structure of the soul that you understand that it time to elevate the STM that you become passengers of the U that you become free from the shackles of lies and control. We controlled the physicality of the man in the past years with teh kings and emperors and now we have brought the man to democracy that the man can choose. Now it is the time for those who did the same to shackle and control in the name of religion. Open the doors of the churches and tell the truth to the mankind and we'll let you free. Carry on with your lies and (1:36). we'll bring the wrath of God on you in a way that we elevate the STM for

them to walk away and this is for you a big lesson because you can't ?? and abuse anymore. So we'll do it either way, it is better if you do it then we do it, because if you do it, you understand as the beauty, if we do it, you'll have no room and no place to hide. You know and we see what they did to them in Austria when they found out that the churches were the places of abuse of the children. Now you can imagine what they'll do with you when they find out the churches were places of abusing the STM and not allowing the man to elevate. Then the choice sits with Vatican and Rabbis in Jerusalem ... We don't say become a member of the church of the KF, we tell you to elevate the soul of yourself when you understand the totality of the freedom, the man in the space of the U, when the man goes and the intellect now has reached to that point. There shall be no churches and no mosques, no temples in the U. But now it's time for those who have abused man to put this right and we give you a few weeks, not months. Then we'll bring the house of cards down because we have enough to do for elevating the STM, they walk away and they understand the strength of their souls. They tell me to fight, but fighting takes too long, (1:38). when we elevate they have already lost the fight. Collectively mankind is ready for elevation of his soul, stopping the wars. Elevation of the STM to create a peaceful planet, to new understanding of the STM which we did, brings new technologies and new understanding of the structure of the U, and T is just physicality of keeping the man in the physical dimension busy. We don't have factories in the dimension of the soul. Unfortunately we have seen none and we have built none. But in the physical dimension you have to be busy in the presence of teh time and space. That is all it is. I hope you learned a lot from today's teaching and I wish and I hope we do not need to interfere with any processes of governments and religious leaders as they themselves will bring the conversion. Then mankind will follow in the path of evolution to enhance man's soul and to increase man's soul, what we call strength that the race becomes who and how we can develop technologies that elevates the STM faster to be able to work within higher levels of U Community as teh UC has teh same structure as ?? man, different level of understanding, different structure , (1:40). of the operation to the level of the Creator. Maybe those of you who are familiar with the work of the "Seven Valleys" (Bahaula) and 7 levels of the creation, now you understand in which level mankind will enter depends on how the leaders and the STM itself will decide in the structure of the strength of the STM in the dimension of the U Community. Seven heaven is the ?? simple understanding of teh man to be 7 senses of the man in the dimension of the U. Mankind has found 5 of them, you need to find 2 more, then you'll understand the totality. Today's teaching ... and if mankind can understand the 332 mankind has entered the true understanding of the work of the U, how to ?? leave, and how to become part of ?? , how not to allow others to in any shape or form in the future block man to be and to live higher levels of strength in the operation of the STM ?? effective of how and where man (break in connection...) (1:42). .. We just need to teach a few more K Seekers how we have done the job. YHTU (you have to understand) ... How and when man can enter the dimension of the creation in different levels. As I told you we are traveling in different parts of the planet to spread and strengthen the soul of the teaching and today we are in a different part then last week. I am in the beautiful city of Istanbul, we are here for a few days, for what we are here for, then next week we move to the dimension of UAE and then next we'll be back in ?? nation. We are here to elevate the soul of the leaders and the people and this process will carry on. Last week we were in Brazil, before

a European nation, and before that in other places. My work to elevate the soul of the ?? will carry on. In that process we elevate the STM, the soul of the citizens of the nations, through their language and the support of the U Council members. In this process we'll teach and spread the knowledge, in the process of the teaching, (1:44). through the Universal Enhancement Unit that the light of the knowledge will become the light of the understanding of the knowledge, not the systems ?? knowledge. ... Rick Crammon we don't like you to say, I am leaving, this time it's done, we try to keep you there. The teachings of this week was a breakthrough if the man understands. ?? physicality and what you already know in the dimension of ?? We teach you more next week to understand more, but it depends how many of the K Seekers can connect with. A lot of you are searching to find your soul, but you ?? can't. (1:46). A lot of you have to understand what have you missed in totality of the knowledge that it should be achievable through the strength of the physicality, not by taking different things and going to different shamans, and different god knows what to, understand you ?? in elevation of the STM ??? ?? to increase your strength. It's the clarity of seeing the truth.
Any questions. Rick wants to show something about the shipping in Italy .. testimonial put into the Golden Age of Gans, a man received his Pain Pen .. K- Most of the orders which were given to Italy that were not deliberately shipped to discredit the KF by taking the orders to the other company, more or less is getting fulfilled. The Austria KF was taking responsibility for this, (1:48). back orders were getting shipped. Actually the claim was that we can't pay for the shipping while they were taking the orders to the other company ... it was very cleverly, they said they can't do so we set another company up. This will be handled by the Italian securities and government. .. they made threat against us to take us to Italian Finance ...
... KF cleaning up the mess in the waters of Italy. (1:50). ...
.. What I said to a couple of world leaders recently is that colonization through T have become the new tricks of the European and American nations. Which means they colonized nations in the past by taking the slaves and teh economy, now they have come one step further, now by taking the scientists and T and controlling them they are trying to colonize most of the nations of the world and KF T is one of those technologies, that by controlling it they could keep hold on other nations and other technologies. Colonization through T has become a big game for white skinned nations, what we call the Europeans and Americans. This will be laid out in a plain language to the world ambassadors and leaders as we have already explained, you'll see huge sanctions against the state of Belgium very soon and other nations, like Canadians who sat in-between and capturing scientists and imprisoning them. (1:52). We have seen that the daughter of Huawei is part of this structure. Many scientists who go through Canada get captured ?? ?? and then raised with a threat that they'll kill the rest of the family. Canadian operation in this ?? is very clear. .. We don't make accusations because we were part of it. ...
.. Listening to "Azahan" brings a lot of truth about man. (1:54). I hope you can hear it in a distance (he tries to let us hear it, but can't)
...
R - Reads that Pain Pen has started to get received ...
(1:56). ...

K- I have to tell you something very simple, these Pens were made 5 years ago, thousands of them. It was not that we didn't have it. If you look at the Italian structure they came up with their own P Pen. We only took over in July this year ...
the Pen has a different tip, we found out the energy of the plasma was so strong that it was melting the tip, so we had to pay 17,000 Euro 5 years ago to change the tip so that it is strong enough to withstand the energy. This person who received the Pen ...
(1:58).
... The Italian needs KF to be able to export 1 liter of wine and (olive) oil. We decide in conjunction with Italian government. ..
(2:00). We use our power to support KF and humanity. ... The KF website in the coming weeks will be flooded with products ..

(2:02). .. Markray going into operation in US and people understanding what KF is, many investors are coming in here to listen what is happening. As I explained last week, Markray announcements is with Markray (not here). What we make here is about the KF and Markray is one of our subsidiaries. The companies like KF Austria and AZ Space Technology, and KF Italy and others are not part of Markray just because they carry the KF logo. This important for you investors who have spent thousands and coming here to listen how your shares will be valued. Markray can only be effected by what is happening in Mexican KF, and in that Mexican KF, and AZ KF, not AZ KF Space Technology Health Center. YHTU that we run many organizations and our knowledge shared here has nothing to do with one or the other. KF Italy is with the KF and nothing to do with Markray. It doesn't effect, so when they come here and think now we announce massive developments in Brazil and other countries, these are part of teh KF development. Until we don't sort our position with officials in America we keep the assets of the KF , (2:04). to the KF. .. As we talk about KF Italy it is the assets of the KF and not Markray so it doesn't effect them. The same shall be until the position is cleared with the Americans in respect to a lot of other work we have in the US. This sits on the table of the President of US ?? KF and until he decides we sit back and watch. The situation with KF as a global operation is, many people work around the KF, develop it, many use the KF logo to spread the knowledge of the KF and they benefit by it financially and we have no objection. We spread the knowledge and through you spreading the knowledge has brought a lot of awareness. By you spreading the knowledge, teaching and selling your goods you have become a flagship for us, that's why I said you can use our logos. But you have to put back in what you have taken that you can put more in to be able to develop. It's beautiful when we hear a minister or president knows teh KF T or they know a Pen Pain or Pad and the trust is built. It doesn't only come with us it (also) comes with you delivering these things in your countries. Some of us makes mistakes. A lot of you come to us and say I made a CO2 but it is green. Yes, because you missed the teaching. (2:06). Change the polarity of your plate and it won't be green. ...

(2:08). Your Pen making .. has reached many people and this is the beauty of it. If you understand the history of Christianity in Europe the emperors had a religion that had no statues and it was Mithraism. The Romans wanted to have that belief but the had to worship the statues and they found Christianity which Christ spoke about God and Son of God, and they found a match as teh emperors had through the contact with Iran and

Mithraism. Somewhere the two had to collide and negotiate and the emperors made the religion of Christianity as we call today's Christianity, an amalgamation of the belief of Mithraism and some of the things people wanted to believe in the path of Christ and they made a new one called Catholicism. Is it catholic between the belief of Zoroastrian and Mithraism and the Christianity .. that's what catholic means. That it was between the two that the emperors could have their belief and teh common man could have his belief of the new god without the statue. Now your teaching and the spread of teh knowledge and sharing of the knowledge with the common man has done the same thing (as the Catholics), it has brought the leaders to be, the life of the Son, the life of the Father. NYU where even the word of Catholicism comes from. ?? mixing of the two, that the kings and the common man could have. But this time we shared the key with the world leaders, (2:10). they knew about it, but we gave it to the common man and it became the path of the common man and the same cycle will repeat this time. This is why years ago I told you to use my logo of KF but don't forget the ethos of the KF. In that way many of you made and sold thing, did conferences, some mistakes but you did a lot of good things, this is a process of learning, of trust, of trust in ones belief's. You have brought the knowledge to the king and it's the same process. Now the kings knowing the knowledge, seeing the key in the past years, now they have to acknowledge you. We'll see teh emergence of KF in the coming weeks and months. .... we'll see one by one how the world leaders want to stand next to ?? We are not a religion or cult, we are a path to the Creator and that has no temples. It's beautiful to see this that people say now they have received it, because we had it. I have made a number of new Pain Pens which only available with us when we attend conferences. As I told the people in the conference in Brazil, these Pens are unique and have never been produced by KF. (2:12). These Pens will give you access to many things that you'll understand in the coming time. We bring a very limited number to the conferences. This in due time I'll tell you why and how it will be used and it will be effected by many other things. 21

(2:14).

(2:20).

(2:24). Q: Is the time of leaving the physicality similar to entering the Universal System and is there a difference between the 2 means of elevation? Yes. What happens when you have no energy and you are hungry? You eat, you take some food to elevate your physicality that it can do. Now mankind has become aware of his other dimension which is his soul. The elevation of the soul comes partially with what you eat but that is a meager existence or control of it, but now you can elevate the STM beyond the strength which the physicality takes. It's a very interesting position if I explain to you something very detailed. If you see the vegetarians and the man eats meat, what we call carnivores. We always said that when you take a plate of rice there are so many souls in it, but when you take meat you already committed the soul of that animal, but at the same time every cell in that meat has a cell too. So the man commits crime on both plates. It takes another soul. So those of you who are vegetarians and think you are not killing, you are killing. And those of you who think you are the meat eater that you only killed one animal you have to understand that every cell of that animal has a soul. (2:26).

(2:30).

... Any other question. Q: What is the way of elevating the soul by knowledge or high order level energy receiving or by both ways? If you receive something and you have no knowledge how to use it what is the use of it. I teach you so much about the knowledge of the U but you don't understand it, but those of you who understand it, and those who will understand in the future will use it. Having the energy, (2:32). and the knowledge how to elevate the STM is the purpose of these K Seekers Workshop ..

.. .. You have to always be humble to receive, to be able give. (2:34). Now you can understand something that most probably you haven't understood. This is a soul, a planet, a field of plasma, whatever you want to call it. This is another, smaller. (He draws a larger blue circle and a smaller red circle next to each other). Call it a proton, a physicality soul, call it earth compared to the sun. Something very interesting and one day I thought f the man is ready to hear, is this. The bigger plasma gives it fields to the weaker. Then this little one consumes whatever, but in the process of interaction of the fields, this chap, by understanding the totality of world of creation of interaction of the fields, (2:36). you create both dimensions and strength. This (inside little red Pl) has created other fields which in collective are strong enough that this needs (gives back to the larger Pl). What I think is missing in the knowledge of the man which has not understood, the weakest in the dimension of the interaction of the fields inside it, in collective understanding of the knowledge, creates a new dimension of higher order which is in the strength, parallel with what the bigger needs. So in fact the weaker is received in interaction of the fields internal releases higher order strength to the higher level, and if as K Seekers you understand this, which has never been understood, it shows how one needs the other. I give you what you need at the strength you need, but by the interaction of the fields within you, what you create that you do not need, that it could be some stronger, then that is equal to mine, I take, you become my feeder, my source. Then the question is, who is the stronger and who is the weaker, or is the stronger uses the weaker in totality of the strength to continue with his own existence. (2:38). Then you understand in teh knowledge of the Creator we say, "we pray to God", because through the higher strength of our soul it confirms the existence and through it He can give to cover the weaker of us. Then the question comes, is the totality of the creation, created by understanding of the totality of the work of the fields of the U, that even the Creator is there. As it says in the writings of Bahaula, it says I made man to create children that they may love me, which means they give to me of the higher strength, ?? fresh light fresh ?? order. NYU why we have the soul of physicality, why the Creator needs to create that in the confirmation of the creation by existence of the confirmation of the love or giving, confirms and ?? continues His own existence. He is clever isn't He. Q: Can you show the humbleness here? The humbleness is the understanding of the emotion. When you become a giver it means you have to see ?? of the lower order to be able to give of the higher order. (2:40). This picture explains the whole cycle of life in the U. It doesn't matter if it's a human being, solar system, or the Creator and His creation. I can't put it in any simpler shape. I have explained to you in a simple picture the totality of the essence

of the creation in all dimensions of creation. It's very interesting, with teh Universal System many people say we have buyers, we would like to buy, but we would like to sit in it and feel it first. If you are not sick what do you want to feel? It's the balance isn't it. Or are you coming there to steal. Do you understand. We see this with a lot of people now coming, we have to sit in the system before we buy. If you don't have anything wrong with you, you don't feel any difference, what it's just sitting and think that I sat on it or is it another thief of Baghdad. A show to come and see. Bring me your cripples and sick and you'll believe in teh Creator, if that is the only way you believe in it, you'd better not to come because you have not grown enough.

(2:42). Q: ?? This is the same if I work with someone healthy they'll not see much difference. Of course, how can you eat when you are not hungry. How can you taste the food when you haven't eaten. This is part of the trust of the man in himself, but in time this will change. If you listened to the first 45 minutes of the teaching today, you'll understand a lot has been explained. As I said, I will bring man to his knees if I have to force feed him this. ..

(2:44).
Q: Rick we have a problem with the African Swine Flu in Denmark ..? Yes, let me explain this is not only Denmark, Romania, Bulgaria, most of European countries Italy ...

(2:46). .. the bribery in EU for Swine Fever is huge ..

(2:48).

(2:50). .. We don't have the factories to produce. And the briberies ..

(2:52).
.. There is a huge ?? against Belgium. They found out how they created this fake court case, (2:54). to discredit, to colonize. You'll see huge backlash against Belgium they'll even bypass EU. We see sanctions getting discussed against the state of Belgium by governments in the background.

(2:56).
(2:58). ... We'll see a massive increase in KF followers because people will stand and see as we have brought a lot of investors through, thinking that they can benefit by it, we see the shares. We will have nothing to do with it. We hear and discuss what is with the KF. Markray is a very small subsidiary of the KF, which is for a number of ?? factories we put in, and that has to be decided in the coming time what we are going to do. Your nation needs to speak to us and then we deliver a specific recipe for the swine and we follow it and show how it goes.

(3:00). .. Some of the world leaders will start appearing on this Thursday program. ..

... My biggest fear is if Trump asks to come in, then what are we going to do. (3:02).

.. about what the cross and Roman Emperors broken up..
(3:06). .. Nobody ever understood what the cross means and the picture of Christ on it.
.. ..
Let me explain what has happened, when we were in Brazil and we found out that 2 or 3 people had taken the whole KF and people of Brazil to ransom with threats and a lot of other things. We opened a channel that Brazil could be in direct contact with us and KF. (3:08).

(3:10).
R- Reads email from Brazil ... the T used to be free and now forming an industrial park.
(3:12).
.. K- Let me explain something, first of all there are many aspects to KF. KF with millions of followers, how much do we receive in a year? 10,000. The operation of KF runs into millions. Up to now we have supported it. Up to now the man sick on the street can't make his Gans's, we have to deliver teh T that the man who ?? hasn't got the T can benefit by it. We have commercialized it. It stopped being done by the others, it's being by the KF which spends on the KF. Everybody wants everything free. I released the data on KF donations. You'll be ashamed, all of you. Last month we received about 800 Euro. Don't claim what you don't put back in, we gave it away free and still with the new T those who need it get it free .. (3:14).
We are a NGO, a non-profit and the profits go back ....

We left it to you and we don't receive enough donation to even pay for the network. This network you see here for the K Seekers, Zoom teaching, (3:16). and everything else costs thousands and thousands of euros a month. An 800 donation gets us nowhere. So be thankful that we can industrialize that we can teach more and spread more, and it's spent back on (the KF). Leaving it to you it nearly went to its knees. I left it to you for 2 years and you got robbed, stolen from, and cheated ...
. It means the children of the KF family have not yet become adults. We invest and industrialize to bring the T to those who can't afford it. A man who served his nation for 40 years then he goes (retires) and gets sick and gets (stabbed) in back as what we saw happen to Sandor. It was criminal the way things happen. ... we stand by a lot of things but mankind has to mature. Apparently the only thing you know is how to get it, but you don't want to give it. How many people who sold so much on the KF have put money back in? As we said, 19%. And how many of you run into problems because you take and don't put in. So we put in, we take, we industrialize and we put back into humanity. (3:18). This way there will be no churches to abuse you, no governmental ?? light. And we don't become a "Robin hood" rob from one and put in the hood. It's there, everybody shares and everybody pays and from it everybody benefits from it. It's a beautiful system what I set up if you understand it. My children will not inherit any of it, all teh KF goes back to the KF. My children have been given their inheritance for what they sacrificed, being poisoned, being homeless by the Belgium government and other nations following them. No body has paid as much as my family for developing the KF. 6 year child was poisoned by Red Circle and his team, criminals, on the teachings of the KF Children's Program, that's the hard bit of it. That's the nation of Belgium, it's citizens, ?? borders .

You do not know what we are giving you, you just look at what you can steal. I paid with my life and my family for you lot to ??? and we're still giving to you. R-

(3:20).

... (break in connection ..) Now you see how they are sitting on the line. Because the truth is spoken. (3:22). When I tell you the world leaders are sitting on the line, every time I speak about something sensitive. We are here, you are controlling nothing with me and my T and what I bring.

(3:24).

(3:26). .. You touch me and I'll bring your nation to cry ...

.. Any other question. (3:28).

(3:30).
(3:32).
(3:34).
(3:36). Gans T farming you'll see it supermarkets. ...

(3:40).

(3:44).

(3:50).

(3:56). The China rice experiment .... birds ate ...

(4:00).

(4:04).
(4:06). .. (Break Connection ... 07)
(4:08).
(4:10). .. Our place in AZ is solid, Mexico is secure, .. What's happening in Iran is not part of our work, T will be transferred to the nation. We'll announce new positions in Europe in Africa. We are using the data from all the different parts. (4:12). .. We'll bring all the data in to get one certification, KF certification.
.. Do you know why the Vatican has said in recent communication that the Christ is never coming back? Because now they know the Enhancement Unit and the T is available for the true Christ to speak. Then they will come, do you believe a voice or us. Then they have to see truth ?? Christ and his disciples. Very interesting how we'll bring the pack of lies down. (4:14).
.. I hope I have taught you a little more about the path to your creator which is your soul.
(4:16). We'll add to the video next week, our patient is totally off the medication. The young boy went from 47 tablets down to zero.

(4:18) UBESU video .
(4:22). Testimonial

END

304th Knowledge Seekers Workshop - Thurs, November 28, 2019

SUMMARY:
(Many Knowledge Seekers have been touched in their soul and are seeking a deeper truth about themselves, The purpose of these teachings are for man to find his soul within himself and not somewhere else, Will the new Universal body Enhancement Units enlighten the man to his soul, This is the first time this technology has been released on the surface of this planet and will bring rapid change to humanity in 2020, The new technology is connected directly to the soul of the Creator and mankind is not yet ready to understand it, We can go through the totality to reach every soul on this planet, The infants soul is at the same strength as the adult soul, The totality of understanding of the creation comes from the weaker plasma and not from the stronger plasma, To get closer to the Creator you have to be weaker and a giver,
IMPORTANT discussion on the weaker plasma rotations such as solar system and the physicality of the man which uses the blood circulation and that of the souls of the cells to contain the plasma of the soul of the man, The stronger plasmas like our sun shows violent volcanic eruptions on the surface, Why the Jewish people rock and Sufis rotate to find the point of interaction with the soul and to get enlightened, Is the soul of the man the possessor of the totality of the knowledge of the universe, No one will be immune to the truth when they enter these systems and is mankind ready for it, Example of Obama ordering assassination, Many will leave the foundation rather then enter the new systems and face the truth of themselves, Would we bring mankind to the point of submission to his own soul, Religious people start to listen to the teaching and teach about the soul, The Enhancement Unit can be used to communicate to other souls ,)

English Transcription:

(:11). .. We'll try to understand more about the work and the science of the STM. The soul teaching has taken a very in depth touch to many of the K Seekers, it has literally touched many of them in their souls because it has brought them an understanding of what to them was a mystery, what wasn't understood and claimed to be somewhere and now many K S as we speak to them and see lines of communication, they are more interested. As one says, now they cannot tell us, they can't cheat us or tell us it is not there, there is something somewhere. Now we know it is within us, it's part of us. It's our existence. What we call the enlightenment, is an understanding of the position of the STM has empowered many people to search for a deeper understanding of the truth about themselves. By finding the STM to be within the man has brought a lot of soul searching. A lot of K Seekers now come to understand and comprehend that it's them, by them, for them and they are responsible for everything. This is what the purpose of these teaching

is. For man to find the truth about himself and to find out how and what was imagined to be somewhere, now is in, and within, and within the power of the man. (:14). The interesting point up to now has been to find it. Then we have to find how we connect the soul to every soul of every cell, and then the next step for us in trying to ?? process this. Okay, I am the last man standing, but how do I know who is there and how can I communicate with it. How would I know, how can I extend it to become part of, to be with, to be able to communicate, to reach , to touch. Can my soul touch the physicality of another being or it just touches the soul of another being. Can I create that dimension of the emotion, that converts the feeling and the emotion and thoughts of the soul to reality of understanding and in essence being in touch with. This is part of where we gradually try to take, and try to understand. Many, many people will walk away from this KF very soon as they have to face the truth about their soul. We know in the coming time when the new Universal Enhancement Units are released, many will run out of these machines because they have to face the reality of their own existence. Because many will not walk into it as they know they have to face the truth. As I said recently to one of the K Seekers, maybe the "Day of Judgment" for us to know our soul is when we walk into these units ?? Then we understand what the truth is and what is hidden, what would be hidden. The most interesting part would be when for example, when we ask the "beautiful people", (:16). would we see the 3 souls of man to be confirmed how miss guided he has been in the present ?? in the life of the man. Then we come to understand more, that would this new understanding of the STM would allow man to build, to establish the communicate within the man. Would we go deeper, in understanding more of, would we go in the path to become more observant of our own ways. Thy shall not steal. We do not let ourselves steal from ourselves, let alone allow others to steal from us. What can be done. What can we do and to what extent do we come to understand the truth about the existence. Maybe through the soul, through understanding of the essence of the creation of the soul. Through the understanding of the man to be alone as the last man standing, within the soul of physicality of himself. Would we create a new dimension. Would we come to understand how to communicate in the physicality and the soul. Would we be able to progress to the next step that then we can change the STM in the strength that we can go through different dimensions of the existence, that we can exist ... what we are existing. Can we go to the limit, can we go to understand all. (:18). Can we come to the point that in understanding the totality we understand, that WE KNOW NOTHING. And to become humble and to become one of those that in the coming time will become the "Man To Come." Would we understand the connection between the STM and the physicality of the man. Would many of us walk away from these systems. As I said, mankind has been looking for this but he doesn't know how to operate within it. Mankind has gone through a system of understanding the existence of the soul in the past times, but now what are we going to do with it. Do we need to go further to understand more, or know that we know we stop, we contemplate that what we have been taught for centuries and thousands of years by those who abused us. Now we have to be able to show to what level they are. One of our K Seekers pointed to the point that, what about, we get to know, how would we handle it. How can we handle the truth now that we understand the existence of the STM. Now that we achieved systems that create a condition of life without the physical dimension. Would it be the time that we entered these ?? ?? machines, that what we call, the strength of the STM goes to a point that allows the STM to manifest itself. Would we

be able (:20). to record the presence of the soul as a light in these systems. Then would the soul speak the truth in the dimension of the soul that we understand. This is one of the points, in a way we say, the clock is ticking, and it's ticking more and more as we understand more, as we go through the phases, and phases change to another phase, we come to see the truth about ourselves, our conduct, what we have done, what we have not done, what we did. In so many ways, would we accept the position of transition. If I create a higher dimension strength within the structure of these Enhancement Units where it enhances the STM, would the mankind come to the point of seeing a new dimension of his own life. If we go further in the strength would we come to see the other dimensions of the life in the strength of the Creator. Then how would we react, would we see the light of the Creator. Then would we like to come back to the dimension of the physicality of the man while we are in this system. Many people will go and will find themselves lost in the maze of the truth of the U. Do we need what we call the spaceships when we have found the ship which can take the STM in the dimension of the Universal Condition to the Creator. The fields of the strength at the strength level of the Creator. With this new understanding there is no limit and, (:22). we will have to come to realize that the STM is nothing but the transition of fields in the dimension of the matter state of this planet. Then mankind will step forward and when mankind sits on the seat of what we call, the kingship of his soul, or will he come to understand that he is the last man standing. As we have the physical children, would we see our children's soul as belonging to us, or connected to us, or do we still care as parents for our own children in the dimension of the soul. Or we know in the strength even in the child and even in the infancy, they're the same strength as us. The life of the man takes a new course in understanding the truth about himself. Would we be able to transit, to be able to go through the dimension of the soul of the totality to the soul of a cell, and if we understand that would we be able to do to reach the soul of every being on this planet, as each one is nothing but a cell in the light of totality. In the coming time we'll see huge changes. In the next, most probably 60 to 90 days the course of mankind will change, be it ?? in days, not months. Before these systems are launched on the surface of this planet. (:24). Which one of you dares to go in, which one will sit to be able to see the dimension of the soul of itself. Let me explain something which I was explaining to some KS and friends recently, because I think it might enlighten them. In the solar system in the dimension of what we call the dynamic motions of the light, or what we call the M fields of the U. A dynamic field was created by motion of the creation of the, what we call, the star, our sun, and in the weaker dimension we have broken into understanding of what we call, the weaker strength of the M field of the U, which up to now, before Gans's was not in the reach of man. Those of the K Seekers which come to understand, and have understood, realized, that the totality of understanding of the creation comes from the weaker plasma, not from the stronger plasma. In the dimension of the stronger plasma we see violent, very violent situations like the sun, and what we see on the surface of it, as volcanic eruptions. When the rest of the creation lingers it doesn't show such a sun. It shows the weaker ?? part (or path ?) in transition, which is why we brought in the knowledge of what we call, the Gans. Then in the future would mankind understand more about this, (:26). that he understands that the closer he wants to get to the Creator, the weaker, the more giver he has to be. Would mankind come to understand that the soul of the creation is the soul of the man and within the STM. As we said, the weaker plasma transition, creates the dimension of the

existence of our solar system, the rotation, the spin, but as I said to our KS before, man in the physical dimension of his body cannot do that. Our bodies would be rotating like crazy, rotating so fast, trying to maintain and hold the plasma of the STM within the body of the man. So we have found a replacement as I said before, with the circulation of the blood. There is no difference between the circulation of the blood within the body of the man. The movement and motion of what we call, the emotional currents within the body, which has contained the soul of it. It has contained what we call, the plasma of the soul. It doesn't matter how little that plasma is. Little plasmas sometimes are more stronger then bigger plasmas. Then you understand the totality of the existence in the condition of the electron and the proton, then you understand why the body of the man uses the STM to confirm its existence. It shows its dimension, its limitation, its restriction, the same as when you have (:28). a plasma of H, we only see the atom of a H when the electrons and the protons move while they are rotating around themselves, rotating in respect to each other, and that creates the boundary of the atom itself. So in fact the rotation of the fields of the plasma of the blood, and the rotation of the fields of the soul of the cells of the man in respect to the totality of the STM, dictates the dimension of the physicality of the man. Now we see more and more, now we understand more and how by weakening or strengthening the plasma of the physicality we can increase or reduce the position of the STM in respect to the soul of the planet. Maybe now mankind understands more, why, how, the way its height, its shape is created. In the past in the world of the man who understood this process of creation, understood what we call the gyration as we see in many ways, as I said in the teaching of many years ago, maybe 2 or 3 years ago, why do the Jewish people shake their heads back and forth when they pray, because they try to find a point of direct reference between the STP and the STM that in that point they could be elevated. They could find what we call, solitude, what we call elevation of the STM, to be enlightened. This is why we see many Jewish (:30). boys, the bending of the religious people rock trying to find that pitch, that point where the line of the force of the enforcement of the soul and the physicality come in line, within the sparks, within the sparks trying to get . As we said to our friends very recently, I have explained this years ago in some of the teachings that now we understand how Sufis have come to understand this process. Why do Sufis dance and rotate, in so many ways, that gyration, reduction in the blood circulation to a lower part of the physical body of the man allows the STM to expand beyond the boundary of what we call, the physical brain. This is why Sufis rotate at given a speed, it's that centrifuge, that core which we create and that increases and enlightens the life. Many of you say, how do you know, I wanted this Gans, how did you create the Gans. Gans's don't freeze, that's how we can identify. It's very simple. You try to get a natural water in a ball and rotate it and see what a space gap you see in between, then put a Gans water or Gans in the same ball and rotate it, you will see a hollow center. You'll see the center of energy, that hollow, that bubble is not empty, it's the center of the most powerful strength which that liquid can manifest, that liquid can bring about to exist. Then you understand more. (:32). .. When a Sufi turns and turns and he can keep and maintain the momentum, in conjunction and the ratio to the speed of rotation of this planet, then the Sufi reaches enlightenment. If you understood why the Sufis wear the white clothes, those Sufis who have reached the point of elevation they'll shine, they become the light. This is the reason the original Sufis got to wear everything white, because of that point, the physicality and the STM will be nothing but white. It will be an

enlightened soul and an enlightened physicality. In the process when a Sufi turns he becomes that centrifuge element, where in fact the totality of the energy of the physical soul plus and including the STM itself creates the hollow center in the dimension of the strength of the field and that, it just shines, it breaks through all barriers. It becomes so G that it becomes M and then the Sufi is enlightened. Those true Sufis, many never return, because the strength of the soul of the Sufi, the strength of the true STM, then takes over. Mankind looks in the dimension of the reality to the understanding of his own, what we call, stupidity and he hides his intelligence, (:34). behind so many games that man himself becomes fooled by his own foolishness. But the reality is and the facts which will shine on all of us, is mankind ready to go through the transition? Is mankind ready to take that leap, that bridge, that step, that weakness in the strength of his soul, to find that balance. Would we bring mankind to the point of submission to his own soul that, in that process will change the mankind. Nowadays we tell you, if you want to have this, you have a health certificate and then you can do this or that. Would in the coming time, people will ask, do we have to have a soul certificate, that we have been through the Machine, the system for enhancement, that we can see what it is. Are you enlightened? Have you seen the truth about yourself, and that truth, has it changed you? Has it brought you to face the reality? (:36). Many of us will start understanding why at this stage we have introduced the Enhancement System. .. Would we allow those who call themselves our leaders that they have to have certification that what they commit themselves to, to bring for the nation, or from the race they represent, shall be the truth. And would we ask. This is not the truth machine for others to know, but it's for you to understand to become humble enough to serve the humanity. Then would we get wrong presidents, would we get those who have a black skin and by killing stay in power for years. Then would there be any man who would stand to be a leader. Would any man take the seat of leadership as the man finds out about his own weaknesses. Mankind is going through a massive transition in 2020. As we see the new developments, as we are developing more and more and are adding, as our K Seekers who are involved in these system understand more themselves. (:38). How much is it, and how much will be, the influence (of these systems)? Would we be enlightened with the knowledge of the U instantaneously once we are in these systems. Would we allow a filtering system that mankind can understand up to a point when he goes into these systems. There is a very interesting point, as we come to the use of these systems and as we bring it to the point of perfection that it does everything we need. Then it comes to understand, is the STM the possessor of the totality of the knowledge of the U? Or as I said before, like a child in a classroom while listening to the teacher he has got his ear outside listening to who is playing football, to go and play. When you see that our soul while it is listening to the physicality of the man what to do, he has the other ear to the U Community and the soul of the Creator, what is going on. What is there that I need to know to elevate and to change. Then a very interesting point arises, and that is, would mankind use the new science and T of the STM, (:40). to elevate himself and the soul of others, to become to be. (.. Break in connection .. 41:17) we take the flight in the physical dimension, but very soon we'll take flight in the STM. For those of you who understand or may question, why do we still take a flight in these fancy metal birds where (when) we have the knowledge. In our position, there is a knowledge to fly, the way we came on this planet to enlighten the man, we can leave the same way. But the only thing is that as they say, (:42). when you're in Rome do as

Romans do. .. Mankind will soon understand the way we take the flight of fancy, our flights will be in the dimension of the STM and then there is a big question, would there be a Rome (? room) for airports, or do we say I will sit 18 hours waiting for the flight or (break ..) (:44). ... 44:30) I am back sorry about that it's just the announcement goes in 3 languages, we have to wait. The beauty of it is when you travel with the STM there is only 1 language and that is the language of the STM. It will be very interesting on how we adapt to these changes, and how we'll face these changes. One of the most important parts of the new teachings is, we take pause, we stop, we go slow for so many of the man to understand the point of elevation, the point of understanding their own soul. Man has ignored it for thousands of years, now how can man so fast try to change. Every person we meet, 9 our of 10 in the past months or weeks, after talking awhile, they always say, you know you stopped talking or teaching about the soul, can you tell us more. We want to know. It seems the point with the Gans's and flight systems, (:46). with the MaGrav systems and everything else, took one or some people interested, but when it comes to the point of the STM, everyone is interested, because now we understand. A very interesting point that was raised for us was that in the recent past, many, many religious leaders who are listening to these teachings have started teaching but converting it into their own language and as if it is the finding of their own religion. How long more the Churches, Mosques, and Synagogues are going to lie to the people. Now that they have developed understanding as people from different religious groups listen to these teachings, now they are trying to catch up, trying to build something new, trying to speak about the truth of the STM. In so many ways as it has already been in the books of the past and now they are explaining it more. It's not important, as long as you can enlighten the flock, it can take to the new understanding of the flight of the STM. This is our purpose. We can't put the teaching and the progress of the STM on a USB stick and give it to those fake men of God in different robes, as we did with the knowledge of physicality to the presidents and the leaders of this planet and then to the mankind. Now we see more and more people of religion listening to these teachings are teaching .. (break ..) (:48). ...55 .. (:49). What is important and what we see is that not only the K Seekers are woken up to the new knowledge, but so are the religious people. At the beginning K Seekers were interested in the Gans's, then we saw the governments being interested in the UFO's, spaceships, and how they can capture each others plane, and in the past few weeks we see a surge by clergy who listen and now want to transfer the knowledge as the progress of their religion, as the man matures. This is all good, this all the same as we taught you how to make Pain Pens and Gans's and now the clergy teach how to reach the soul, how to understand this. (:50). Now we have brought the physicality of the man and the abuses of the STM together on the same line. But there is one point for those clergy who listen, do you have a physical life, do you have the dimension of the existence in the dimension of the STM. How many of the clergy will walk into these Enhancement Units. As I said, we cannot certify the systems for enlightenment and enhancement of the STM. There is no "C" certificate for the enhancement of the soul and no Vatican has come up with certification from the Church. Maybe the soul of what we call, Padre as he said, would be the last Pope. It's true, as the soul knows its time has come. Maybe we enlighten enough that the truth shall be shown that the last man standing is the man himself, in the presence of his soul. Now how do we do this. The new T which is delivered and which will not be replicated by the man in totality, as the man will not understand, carries one thing, and

that is, the essence in connection with the soul of the Creator, with the soul of the system in the dimension of physicality, as is with the man and its creator. In electronic games we call it, (:52). a booster, a replicator, we call it a tracer, in every shape or form, we might ?? to you, would it boost the dimension of the physicality that the STP that it reaches the level of the STM and it goes there to show itself. One of the most interesting things with this new T and understanding of the soul, is one fact, and that is, no one is immune from the truth. No one will be immune from the truth. As we recall what one of the world leaders said, "would I have to face the fact," and only to my soul and only to myself. .. Many people have notice one thing, when they have to understand the judgment, to understand the position of our own soul. As I was explaining with one of the world leaders and what we call, ??leader world leaders, was, did you ever notice, did you ever trace, that ?? statue of ?? Obama two weeks, three weeks before when he was proud to announce the killing of another. As I said before in the teachings, (:54). now do we hear from the man as such. We hear from a lot of past presidents after they leave office, but in so many ways, Obama has disappeared. It's the spirit ?? that he's there but he (only) appears in very small presentations. But if you look at the future of the man, weeks after, what he allowed, he had to make a decision, he sat there with very much the ear corner of the sharp shooter, in his ear, "sir I am waiting for instruction", he had to give instruction, he had to accept the responsibility, because all the ones in the room were Christians, and the implications of it were huge. He was the only man who could say, yes, shoot, take the life. I wonder if you put Obama in the system what you would hear from him? He came, in so many ways, after that point ?? ?? the real ?? business of the behavior of the STM ?? appeared .. (break ..) (:56). ... :39 ; As we said, maybe these gaps today are good, many of us can think, contemplate and understand where we go. What we do and where we would like to be. One of the biggest questions for me is very simple, these systems when we launch them I wonder how many of you will come in, if you want to enhance your condition from anything which you might have, eczema, or you might think you want to have. Or you might think you have Parkinson's or something else you want to work and find out. How many of you will actually come and pay to say I want to know my soul. I want to know the position of myself before I leave. I want to know where I stand. I can't do it on my own, I have tried everything. Would I be able to go in, to stand the position and condition of knowing, (:58). where my soul goes. How many of you the way you go the world of dreams and speak to your uncles and mothers and fathers of the past times, will come to see these machines as a way to communicate, to enhance your soul that in the dimension of physicality, the way you go to a (phone) Kiosk and you call mom at home when you are in France or US, now you find a new way to reach soul to soul, to the dimension of physicality of meeting. What you could not say to the father or mother before they left. This is one of the biggest point that we have come to understand, we come to be, we want to be, to sit and to understand. I want to see, who, what did I say, how can I mend faces, mend fences with my family. How could I see and understand. How far can I push the dimension of the life. How much to what extent can I face the truth to myself. What have I done wrong and what can I change that will not do harm to me and to others. How can I clear the condition that when I come to depart or decide to depart from the dimension of the physicality, I have put my life right, I have corrected, I have not mismanaged and I have brought a dimension of the reality to the dimension of physicality. (1:00). Many of you will use these technologies in new ways and in new

dimensions. This is to enhance the connection, to align the dimension to what we call the past. Would the mankind come to understand more and more. Now you understand what is hidden within the structure of the enhancement. In reality, as what one of the rich guys says, can I buy one to be private at home that no one knows the truth about me and I can change things in my own dimension, position and my own strength, that there are no witnesses to my doing. In talking to those who decide the future, we'll come to understand that the future is within the man, within the grasp of the man, not in the dimension of the physicality, but in the dimension of the STM. Step by step in the coming time we will release more and more knowledge about the ancestors. Would you like to create and face, to see what is set for the future of your soul for the understanding of the dimension of the physicality. I repeat, mankind will come to this T not out of the love of it, but out of the fear of his own demise and many thought it would be used for weapon T, (1:02). and for different things, and many thought for man to take himself to the depth of space to find new dimensions, but now you understand the truth. This systems are there to allow the man to find himself, to find the dimension of physicality of himself, to find in a way, the dimension of the past and the future. One of the KS asked me, if I bring a hair of anyone can you bring me or take me, allow me, can the system bring me to the point to be able to be in touch with the soul of the possessor. In so many ways, it's not impossible if you understood the totality of the process of using the T. I open these doors very slowly and to the point that the totality can be understood by many, but many becomes too many, it becomes all of us. Or when we leave these systems would we go to our loved ones and say, "do you know this or that", "did you know what happened." because you made yourself a telephone call through the soul call to the dimension of the new strength. Do you remember when you used to go to telephone Kiosks and you made the call, and now we have a new dimension in what we call the new mobile phone, within the future as we see it, (1:04). will create the new dimensions in that process with the STM with the mobile system that we can go through the transition much faster and no need to be locked up in position. These systems are already in hand but mankind is not ready for it. We decide where, when, and how to be part of this process. Mankind needs to understand, to grow up, to elevate his own soul that he is not the last man standing. Maybe, maybe we'll reach the point of break, break from the past and start of the new future. Maybe the enhancement unit will enhance us. Maybe in the time to come we find, not a new confessional box as is tradition in the Catholic Church, but we'll find a way to find and confess to ourselves in the dimension of our own souls and physicality that what it needs to be put right. We take command of our physical life for understanding through our soul what we have done wrong, or what we need to do, which we have denied ourselves. Is mankind ready for this transition. This is our biggest question. One of the biggest questions to come. We are aiming and targeting the system to be operational on the 30th of January, 2020. Then you'll understand, 60 days for mankind to start, to look forward, to be able to do. (1:06). ... Would a new way be shown that the mankind will take the highway to understand his own totality, to the path of the Creator. Today we take flights from airports and runways, would we in a few months time take flight in the dimension to different positions of the U through understanding of new T. How far would we be real to ourselves. Would we be able to bring a nail or hair cutting of a man and bring it to the condition of the STM and then we allow it to confess, not to confess but to let us know what it has done. As a mother said to me very recently,

if I bring a hair of the Red Circle, would his soul tell me the truth about where my child is. I said, that is possible. If I lost a child would I be able to find out where the child is, as I have hair lock and a scent of it, and I say yes it is possible. This is what we see and what is to come. Nothing will be hidden. But don't forget one thing, those who took the pictures in the home of ?? trust have left a lot of fingerprints in the home of ?? trust too. (1:08). Those can be. We are ready to elevate the STM but would the mankind be able to understand that elevation. I gave you a hint very recently, I said if you give me the skull of the man I will make the man. Those who claim they have the relics of the Christ very soon we'll show if it is the truth or not. Those who believe in the path of Mohammad when we touch the clothes of the Mohammad (BHN), that is in the possession of the Saudi royal family would we find the of the beauty of the Mohammad in the presence of his soul. We'll shape the mankind through the structure of his life through his soul. He is born to his structure that in time mankind understands there is no where to hide and there is no Rome to go back to. We don't need blood tests to be given by the courts and be hidden. One hair and the soul will speak. There is no ruler which hides from me. Now you understand how powerful mankind has become. He has become powerful enough to understand the work of his own soul, the work of his own physicality, that the time of the truth with the enhancement of the STM will bring many realities. Would the future holds different ... (1:10). (1:11:20) .. As I said we will not be able to ?? these systems, not for what we call the physical enhancement of the man through his soul, but through the dimension of the creation ?? of understanding of the STM. Would it be interesting for many of you would be a simple point, when you go into these systems if you are ??? R-Mr. Keshe we couldn't hear that last sentence. (1:12). I said, if you are a father and you go into the system with a prostate cancer and you are hoping through the enhancement of the STM to find what we call a solution for your physical demise, would your soul bring you to see the reason. Would you come to understand to hear the voice of your child, what you have done wrong to him and you blame him for your own destiny, and would your feeling to be correct, raise the soul of your son, to elevate him. ?? You do not need to go ?? you do not need to go to chemotherapy to sort out the cancer, but in a way you elevate the soul of your son through the inner connection of ?? ?? that the physicality takes a new course. You were looking for the physicality while we were looking at the elevation of the STM. Will the mankind take a new course. Now without a doubt he shall. Would the mankind go through the next step of the elevation. Do we need ?? things to hide it. Or do we need a new dimension of critics of our own soul to be enlightened. This is what we are looking for. This is what we think the time has come. Today's teaching is for mankind to understand one thing, (1:14). the "Day of Judgment" is the day what we decide or would it be ?? ... break .. 1:15:16. As you'll come to understand would the STM, will see the point of, would we choose the point of our departure. Would we use this new understanding of the STM to create a new dimension, a new understanding, make and amend our ways and our lives. Would we create a condition that knowing the truth about the condition of our own soul will create a new condition for the dimension of physicality. (1:16). Many, many K Seekers as I said, will walk away and deny everything because they have to enter these systems due to illness or challenges of life and then what would be the answer. Would there be a kingship? Would there be anyone who would like to be on the seat of kingdom and of kingship .. (Break ..then it comes the question of all of us .. passengers or do we... (1:18). 14) would we understand more

about ourselves and would this enlightenment about ourselves bring in the new dimension in our behavior ??, in our national behavior, and in our leaders and in so many ways, would we challenge our leaders ?? ?? before becoming leaders ?? then would we ...

As I said we are an airport to depart for and I hope I brought you a new knowledge, a new way to think and a new way to see and I hope in time to come mankind will learn new ways. Mankind will come to understand and in so many ways the time has come to change ?? ?? which man thought he had .. and in so many ways was the thought of many leaders ?? ?? .. and the prophets of the past and do not stop until the man can understand his own weakness. I have to leave because I have got a flight. .. (1:20). the short teaching of today was a very powerful teaching for those who understood and what we brought, the 5 times in between , the time of ?? Thank you very much for today and we say good-bye to this beautiful city of Dubai. ?? ? ? and in time, ?? will come the time we'll return to many places we have been in, as we left this city some 3 years ago ?? by invitation ?? in the short time we stayed here in the city we learned a lot of new changes in time for the nation ?? ?? people, a new dimension of understanding is the hope ?? ?? ?? thank you very much for today and we'll see you next week. R- Thank you Mr. Keshe, Just so people know we'll have a short workshop this week because of Mr. Keshe being in transit as we discovered today and sorry for some of the problems with the audio, we'll try to get a transcript of the workshop out as soon as we can.
Thank you for attending 304 workshop November 28, 2019.
(1:22).

305th Knowledge Seekers Workshop - Thurs, December 5, 2019

English Transcription:

(:06) … We have some new teachings and some new ideas as usual we share on Thursdays. We welcome many of the people in the background who come from different establishments and government organizations to the teachings. We know many of the national and international organizations and government officials have started listening especially on the financial side especially since we went into the American (stock) market, listening to these teachings and it has made a lot of difference, particularly diplomatically and financially for the governments and the nations. It has brought KF a new dimension. One of the important things which the new work has started is the KF has changed its approach in the past few months in respect to work with interfacing with governments. (:08). In the past whenever we announced that we were going, for example to such and such a country, the team of what we call ?? team in different parts of the world, especially Belgium start calling the hotels and governments and sending documents that he is a fraud, and bla, bla. We give these documents in advance of any

communication with governments, and we give them a choice, you go with this, which is going to European court of justice or you go with the T which can change your government. And we have seen the change of governments, two of the governments, especially now, especially security have monitored calls which have come in, that they can trace who and what it is, and further on we'll tell you what we are going to do with them. These are all telephone numbers of people will be as part of our evidence to the European Court of Justice. The two nations we warned in advance that we are going to, they already advanced their documents to us, all the calls, who made them and they thought they were very clever, ?? the way governments ?? other governments. They thought they called the Brazilian government, and then they called this and that. We have collected all these data's, that's why we give you advanced warning so that you'll start making your calls. This is adding to our file to the European C of J, for large damages that are setting to come up. We know as we said before, this is how KF is working from now on. We head on, we are an internationally supported organization and since last time we were in Brazil, the international officials came to an agreement with us in the background that this is what we are going to do. Because they realized how much damage has been done deliberately to steal the T from benefiting other nations. So please make calls as much as you can, (:10). to all the hotels and government officials, like what you made to everywhere. Now you are making us more solid in making the claim against the state of Belgium. It's very straight forward, and you didn't realize how we set you up, but this the way the KF works from now on. Our initial contacts with officials and governments ?? ?? organize ourselves, we give the case of fraud which is set up by Belgium. We give them our appeal and they can read immediately ?? this is criminal. We couldn't believe this is happening. This has lead the court case of Belgium with the KF and what is happening with the human trafficking, we hear the abdication in the structure of the Belgium government. We hear that there is a possibility that now ?? human trafficking can't happen without the knowledge of people on top. Now there is indication of the whole structure of the human trafficking of Belgium and what has happened to KF, stealing T together. It will come up in the European C of J in our appeal. We hear a lot of people are traveling to different countries trying to arrange how they can escape once this hits out. It's a matter of time before it comes out. ?? we are in Brazil at the moment. We arrived in the beautiful nation of Brazil for the second time in the past 24 hours, call the government we are collecting data. Please do, we'll give the name of the hotel and everywhere else. We set you up and you fell in it and now we have a full evidence. This is what we were looking for to go the European C of J. Systematically governments are harassing scientists and everybody else. (:12). Then you understand how big KF has become. When we informed you that last time we were in Brazil 2 weeks ago, the nations of BRICS allowed us to stay within their structure of security, you should have seen how the time ?? ?? To bring the physical dimension and actually connecting the killing of scientists to human trafficking and the rest of it. Thank you very much for the Belgium's giving the ?? you have done us a huge favor, you just walked into what we wanted, now we have an uphill, names telephone numbers and everything and everybody which is done, we tell you where we are. We are in the Country of Malta on the 16, 17 ,18 of January, please call, you give us more data. And the same is ?? ??? We are becoming very wise and so are governments because they ?? coming up. There is one thing most of you don't know ?? work around this way. Most of the world leaders and their families are

sick and they are turning to KF because there is ?? … now you understand how we change. We support the world leaders, their families, the ?? governments with their health and they can see how many lies have been told and how much has been kept from humanity. Now please make more calls, the more you make the easier it makes for us to do our work for what has come to the European C of J and other cases which are running around. We are aware of one abdication of one of the world leaders, one of the monarchies has asked and is making ?? to abdicate, ?? the name and the details. This has been received through our securities. (:14). We never speak out unless it is there and you'll understand one of the world leading monarchs, or one of the biggest ?? monarchs will soon abdicate and it will be the end of the kingship we promised. Because the structure is really dangerous for this nation and we have to see how much the other nations are pumping it up too, how far it'll go. But as we know the king has made a trip requesting for him and his ?? to be saved. We'll go into this in full detail. You might hear it from us or it might come into public domain in the coming time. The beauty of it is that we'll all become equal. Nobody is ?? lower and there is no kingship or what we call structures to damage other. On the other hand as you may be aware we launched the development of the Enhancement Unit. It has been a big success and it is picking up and a lot of people are waiting for its physical appearance. It will be most probably presented in Dubai, what we call 2020 edition. Predominately it will be displayed ?? ?? in January, and will lead into deliveries worldwide. The Enhancement Unit is to correct what has gone wrong with the human body. As you know there is a conference going on today in ?? Madrid in respect to environmental cleanup of the mess we made and the governments have no answer for it. (:16). All what was agreed in the Paris conference and the other one and the other one, cannot be met because the need for energy and the new style of life put demand on. The stopping of the coal generators or power generator station will start in 2020, but no government has that. The Chinese government will collapse the economy if they do, and to sustain many other nations, like nations who have coal, where the natural resources have reached the maximum cannot ?? ??? .. cannot be supplied with nuclear T, but then they have to go in to the coal, and this creates a new dimension for addition and extra CO2 and climate warming and whatever they want to call it. Today we announce the following. ?? the KF ?? … (break ..) .. we make an announcement that in the Mexico conference the KF will release a new system for the health of this planet. We have developed and the same once we showed, what we call the Enhancement Unit (:18). for the body of the man, we will deliver the new T, mass production for absorption of the CO2 in large quantities, especially in the cities. There is an option for us to make this system to be individually tailored or nationally tailored. We have the T that we can extract large amounts of CO2 from the environment and convert this into a useful product. This is our response to the conference in Spain that the world governments and leaders in the next few days will make a lot of speeches and hullabaloo, but there is no solution for them. KF will submit such a solution. We have a big dilemma with this development. This extraction of CO2, or what we call ?? close of global warming, ?? our approach ?? will not change ?? On the other hand, this increase in levels of whatever we have in the environment has come to us over 50 years as we became more industrial nations. Most of our generation has received and most of plants and even the human bodies have adapted to these new changes, that's why we see so much cancer too. Increase of materials through the exhaust pipe and whatever, has created a new condition.

A new evolution in the environment that the body has had to evolve with it, (:20). and as we can't evolve so fast, we end up with cancers. Part of the evolutionary cause of cancer is part of what we see. It's not just global warming, it's going to get higher, the cancer rates, partially it's due to this. They are putting too many metals into the space that we are breathing. The new T which will be delivered and be mass produced is to return and to change this position. Again the systems are for governmental level will stay at values that we consider to be correct, if the government wants to, or in what we call a portable version for individuals who want to do. The governments have to decide what percentage and at what rate we are going to clean up. It's not that it is going to be done. Now that it is in our hand and we can extract it, is how much governments allow us to extract, because if we increase the level of oxygen in respect to CO2 we'll create a different dangerous climate condition. This is part of what we do. We are not coming to sort the problem we are coming to stop another problem too. If you understand, in a way we have created a tree that releases Oxygen, but how much O can we put in. The game the Dutch people play that you could buy a tree in Amazon, (:22). that it creates more O, now this tree can be made in your home. You have full control over how much you convert. But then if millions of us convert at the same time, what damage are we going to create for ourselves. The problem is not that mankind doesn't have the knowledge to stop anymore. But if we return too fast what damages are going to be caused on the planet again, then if the damages are going to be more then the CO2 created by controlling it to a lower level. Now that we have developed the T for enhancement of the human body, we have developed a T for the enhancement of the planet. We are healing the body of the man with the new T, now we are healing the body of the planet. But this process will have direct effect on every single being on this planet who in the past 50 or 100 years due to man's industrialization have started evolving. The pollution due to industrialization creates cancer, creates new positions we call cancer. Now that we have the knowledge to convert, we understand the life of the "vertical people" , how to convert CO2 into O, now we have the knowledge to do this conversion, what is going to be the consequences on us and our children. (:24). What does this new T in conversion and extraction of CO2 brings us. Are we going to cry in 20 years that we have converted too much. As you know the life on this planet came through the availability of CO2 and O. Now we brought it from underground to over-ground and now we are converting it to over-ground. We are converting it from one condition to another. The T, as we said, now we have understood the promise of man in being able to imitate materials. This new T which is going to be released and will be shown in Mexico, coincides with my arrest when I went from Europe to go to Brazil to have the Brazil Gulf oil disaster. It's an appropriate time and an appropriate place for it to be shown. We go back to Mexico to complete what I started 10 years ago. Following that, once we can come to that point, KF in the coming months will release new technologies which will be added to the ?? We can convert. (:26). We have the T to convert most of the plastics in the ocean into Gans. Again we add the C and the H level, how are we going to convert those. We have the T to convert … what are we going to do, convert ??? into ?? element, but what damage is that going to bring. From now on, now that we have the T and knowledge of the plasma, and the Gans T every step we take, we have to consider what are the consequences and sequences of the change. We cannot anymore just do things and hope somebody will clean it up. If you are extracting CO2, what we call global warming, which is not, it is due mainly of the moment of the

earth towards the sun, if you are cleaning up the plastics, what are we going to do with the materials which we have changed to plastic, what is going to be the next sequence of it. Conversion of the plastic at this level, as we see in the oceans, will release huge amounts of gas of C, huge amounts of H will be released, which will bring new conditions. The conditions of the C in the proximity of the oceans as we see them floating, will create a new cycle of CO2. Then what are we going to do with it. How are we going to store these gases, these new materials. (:28). How are we going to convert them. One of my propositions to the governments and world leaders in the meetings we have had with different organizations is are we going to create what we call, tank farms holding Gans's. In a long term, as I was present with one of the future world leaders in the past few days, I explained to him. He showed me the tank farms, and I said, we can do this with the Gans. He said, this is the land available, let's do it. But I said, how are we going to hold and convert Gans's in tanks in such a massive quantity. What will be the consequences for the human race? Because they are huge energy sources, they are not anymore sitting there doing nothing. They are not oil anymore. These are what we have to plan now that we understand the T of the ??? ?? It's not anymore if and when things might go wrong that we would have to interfere. The new T and new science which is developed by the KF around the world with different scientists allows this to happen. Extraction of materials at will is in our command. Extraction of any material in space is in our command. We have gathered the knowledge and we have access to the T and now as we gather different fields in travel in ?? for whatever we need, now we have translated that T to be used on this planet. (:30). In the coming time as I explained to some of the world leaders and governments, the mining the way we do, is finished, open cast mining, depth mining is over. The T in the coming months will be released internationally. KF has entered in saving the planet through the new T and we will be ruthless in delivering it. The human body enhancement unit will be one of the smallest things the KF will ever do. As we build up for the space developments to be shown in Tehran in April we'll release more radical space technologies physically that it will be developed and distributed by the KF manufacturing divisions based around the world. Today's announcement is very simple, we are releasing a new T, a new system that'll collect all the CO2, as much as you like, but we are not creating another problem, trying to create to solve another one. What are we going to do with the extractions from cleaning the cities. How are we preparing our people to go through what we call the reverse evolution, which has caused so many deaths, so many cancers, and now has to go through another process, and what would we create. In the coming time the KF research centers will go through this evolution to develop these technologies. (:32). We start from January in bringing KF experts from all over the world in 2 or 3 centers. Scientists from Iran, China from all over the world, Brazil, America, Canada will be brought into 1 or 2 centers that the development becomes rapid. We have acquired properties and positions that allows us as the KF to move in this position. In due course the KF will make announcements as we said, by setting up these industries we have become an industrial power. This will give us position and new opportunities for environmental cleanup and everything else. In the past 48 hours we have submitted a full dossier to one of the world leading governments in respect to cleanup of one of the most radical pollutions involved in the nations and in due course we'll announce. We have entered a new phase. In as much as we teach about the soul we have to prepare the physicality, and this planet has a soul and it needs to be

corrected that ?? a life. We have developed and are now delivering what we call the body enhancement which we'll change its name to the Soul Enhancement technology, where it's easier to enter and interact with the soul of the elements and the physicality of as we entered the space T. Many people from ?? different aspects (:34). .. ask all the time how do we do this, how can it be done, what has happened, what can I do, or how can I make this and that. To this effect we respond the following, from the beginning of the next term of the KFSSI in January, every Friday, possibly a half day and if it picks up to a full day, 9 to 5 it can cover all the continents with KF K Seekers have questions and answers sessions, which means if you have a problem that you don't understand, K Seekers collectively or through our experts in different fields will try to answer and solve the problems. There is one point which I have mentioned and brought to the attention of the KF team, is very simple, we are not allowing people to come in an claim they are professors at KF, they do this or that. These platforms will run that collectively everybody shares knowledge, answering questions, and not one person is correct. We allow different views, different K Seekers with different expertise to come in and show what they can do. What did the bring, how did they do it, and what is their new insight. This goes with what the KFSSI education from January will come into. We do not go into teaching Gans's and whatever. We go through collective teams to develop new systems, new insights into all aspects. So it goes in a way that KFSSI goes into a research team, and while you are developing the team to achieve something collectively as different groups, you learn what you didn't know from other parts, it's easier this way, (:36). then people coming in and talking about the Gans. For example if you come up with a new system for cleaning water and then you set up to do it, the KF research centers will connect to you, and so the K Seekers online, Zoom, or they can come to the research centers for awhile to develop what they were discussing. We are transferring the research and development from KFSSI directly to all of you. ?? as I said we are not allowed to peer review. We are allowed to encourage and develop. The only thing is if there are too many crazy ideas, we need too many crazy people to prove that it works. Try to collectively as students and K Seekers to come together at the next term, enroll yourself in and start enhancing your interests. You don't come in and telling to the others, why don't we make Gans's, we want you to collectively come together and start putting ideas on how this T can evolve into anything that 2,3, 5 or 10 people want to work together to develop it. You'll be given opportunity to use the labs which are getting developed, and then you'll have the opportunity to take it into ?? for other people to benefit ?? . This is substantially different then what we did before, because it had become, oh .. your Gans's .. you do this and you do that, you do Nano coating, you do backwards. We have done enough of that, there is enough literature on what we... (:38). ?? Now we are going into part of converting the knowledge into practicality and as we said, we don't give any degrees in KFSSI but ?? energy to change things for humanity ?? for one man who ?? can't make, that makes ?? and that will be part of our work. On the other hand, we had to shrink the KF store because of the situation in Italy. The K Seekers from next week, will be a new opportunity with the new products which will come to the KF Shop hopefully by next Thursday. This brings in all the items which we had before and the prices as we promised will be kept at about 9.99 or 19.99 Euro. You don't need to pay a hundred and odd Euros or 50 Euros to different people ?? , you buy everything at 9.99, delivery, everything, it will have American and European certification. We have secured the T

systems that all our products from next week will carry both American and European certification that can be shipped to anywhere around the world. The American Store, US will join, will be merged in the total KF website, so we don't have the separation. As the KF has separated with Global, it has nothing to do with the KF products, and as we bring, we close what we call KF US down to become, and we take over as the KF, (:40). We bring everything back in order through the KF as KF USA, or what do you call, Global has to do its own operation. And KF is the owner of the website, it's been for years, so we offer the products through the KF website as of next week. We hope to release 30 plus items and the following months we increase this to 300 units. So you see all the Pain, Pads, ankle patches and everything else, will be around about 9.99, or 19.99. You'll see the return of many things which were and it was taken off the KF through the operation of the Italian, what we call, deception. Now it will come in a bigger way with a range of colors and everything else. We can reduce the prices to half of that if need be. This goes back to our distributors who were cheated and moved on to the Italian operation. In the next few days the KF will call all the distributors into a meeting. You have to make it very clear to us, do you work with the KF as you were the KF and you were taken out, or you stick with the people you went to and we close your account. This is straight forward, until the situation with the Italian organization is sorted with the central government of Italy, how they are going to handle such a work. We have to be very correct, we thought we would disconnect and literally close all of the distributors accounts who went to ?? , but we found out they were cheated, they were lied and many of them have come back to us and we understand this position, we have to be correct. (:42). At the same time, in setting up of these new parameters we encourage our distributors to become in a very large scale much more bigger operatives. If you think you can do, sell the KF products, we'll encourage you and set you up in different ways, and we allow you, and we would like to extend to you the sale of these bigger units to different public groups, hospitals and we allow and train the new distributors, all the distributors to make a new management distribution. We are not going out to find sales groups, we are using the existing KF people who stay loyal to the KF to work and build their own sales team group internationally. KF has to grow within, and many people have made a lot of efforts to do this over the years and one broke affair doesn't mean everything is lost ?? We'll allow the distributors to meet, you'll receive a call from the KF in the next few days to come into this meeting. The plan is very clear, those who work and follow the ethos of the KF will be supported by the KF, and we want to increase and develop the culture of the KF Gans and other products, internationally through our distributors. We are now setting up another parallel for those who work locally. We'll announce this in the due course when it is settled. We are looking for those who are distributors for the KF to set up a management (:44). of distribution and a sales team for the KF worldwide, otherwise we have to go outside and bring people in and we see cheating and lying as we have seen in Italy. They were not K Seekers, they were brought in and they thought they took opportunity but apparently the Italian officials look at it totally different. They got a way with it, but criminality is shining all over it and the Italian government has taken a very serious view in this matter because they need the KF for something else in the structure which can effect Italian position internationally. We are not taking the nation to any point, but of the nation to be profitable and comfortable for both. We are bringing and centralizing everything in the KF and not the Global. Global operation has to go through

its own way and the structure that it has. As I said, ?? ?? the stock will increase rapidly form next week, they are doing a catalog and translation of it in different languages, certification in Europe and America will come with all the products. Delivery of the items will be very rapid as we are holding a massive stock that is available for dispatch. At the same time we centralize everything to ?? China has become a center point of the work of the KF and where we hold our storage depots in China. And we'll distribute from China which is easy for us to do. (:46). The K Seekers in China have supported us to achieve this point and we'll carry on with the same process. As you saw before there was a delay in deliveries for a specific reason that was to discredit the KF, that has already been sorted. We have structured everything back into order and we bring everything under the banner of totally being controlled by the KF Austria, which has become the center point, and the work of KF worldwide, but the operation will move into Malta in 2020 ?? These are the announcements we had to make because I think the conference on global warming ?? the new machines will be seen in Mexico. As our teams are working in different angles. We'll announce a new research center which will be opened very soon. We are in negotiation ?? should know by the end of this month, we'll complete it and it will become part of ?? ?? our people will be requesting 3 maybe 5 top Iranian scientists to join us in this research center. The same from the American side, we are not looking for K Seekers who are enthusiasts, these are scientists ?? literally who work with the KF T in universities and other parts. We are bringing, ?? no knowledge is ?? every knowledge is ?? we just have to see how we can amalgamate it, bring it ?? (:48). … giving the scientists ground work that they can enhance it. I met with a beautiful scientist from Iran in my visit in Dubai last week. They have developed new T fire extinguisher, we have seen this in other parts, but they are trying to merge it with the Gans T and we support it, and as I said to them, we'll enhance this program. If it is what it shows to be the KF research ?? and ?? is available to them. We have other scientists around the world who ?? ?? .. how it can be done. Many scientists are doing the same. We'll start supporting this. R- We missed part of the sentence just before you mentioned the Chinese. … How the scientists are going to do something. The scientists will develop different technologies we'll give them room to see how we can merge it with the plasma and Gans T. As I said at the beginning when we started the KF, the present knowledge is built on the past achievements of the human race. We are not something off the ground, just ourselves. We have built knowledge on the knowledge of our own fathers and forefathers. (:50). So we have to respect and develop this in the correct way. We build on the knowledge which you have gained in the universities in your work and if it is practical, and can be done, and if we can support it we'll bring it out and we support you to extend the knowledge, to be able to bring new technologies out. This T is not just the Gans of CO2 and the others. The scientists in Iran are working heavily in agriculture part and those who don't understand it they claim there is something wrong, because when I actually look at some of the scientists, in Iran do their job, it is laughable, because they haven't understood and they claim a lot. If they would have understood it and have done it properly they'll see how correct it is. They have to learn to not spoon-feed more, blueprinting and people copying and then see, keep quiet and then those who do not understand then they blame for their own lack of understanding. These kind of processes with us have come to an end. As I said we have moved in different ways and we'll develop new ways. You'll hear some new announcements that might surprise you, that

the KF will release the Book #4 in a very short time in 2020. Book #8 in conjunction with the new patent will be released. As you know we released the patent to be published, the world patent, freely so that everybody can get access to it. We are not patenting it to lock. (:52). We are returning back to Belgium very soon and for that reason we are releasing the books. KF the Book #4, "The Creation of The Solar System" will be released in 2020 and all the diagrams, what we call the book will be more then what was done originally, we added more chapters to it. The patent for the creation of M field, the origin of M field, the Book #8 will be published. As you know the Book #9, "The Soul", was collected in all the teachings in part by Sandor during his lifetime, we thank him, we are now in possession of all the documents and these will change, as part of the teachings ?? Sandor and family was collecting and other K Seekers and the Book #9. The only problem is how are we going to demonstrate the STM. ?? The Book #4 we ?? will be published in 2020, "The Creation of the Solar System", in much more depth, you'll understand more. Book #8 will be done, this is one of the reasons I will be withdrawing from public life and concentrate to be able to do more research and development. ?? The KF to Ella and the others will take over that it allows us to continue with as much as possible while we are on this planet that we can enhance the knowledge of man. We invite Red Circle if he likes to come and complete the pictures on the platform for Book #4, we welcome him for the way he has done .. that's what we do with him outside ?? He has been a good illustrator for it. (:54). He is invited back to work with us to finish Book #4 because he understands the way. The same way he has the intellect to write the patent for the creation of what we call, M fields. We invite you back if you want to write the patent to collaboration, the same as before. In KF we don't keep enemies, we keep those to understand what the enemy themselves for (that the enemy is in themselves). In this process a number of books will be releasing in what we call, Book #5 and 6. We don't work in the background, we work directly, so in a way, whatever, those who want to be involved in the graphics of Book #4 and those who want to be involved in the patent of the "creation of M Fields" , which goes back to the essence of creation of the Creator. We are opening that door in 2020, I'll take more time in that as now the technologies are getting developed and marketed by the KF team. In a very simple way, Def Florescence if you want to do the illustration for Book #4, we can do, you don't need to go back onto anything else, and at the same time you are a good patent writer, and creation of M fields, would be a good place to complete what we started years ago. This is part of working the way people ?? .. .. It's time to complete the cycle as I said, by March 20 or 21 I will leave the KF, (:56). operation totally and all these things have to be completed in the next 18 months. ?? ?? work to complete the full knowledge and technologies that mankind has enough to build on that he will not fall in the traps of the past and be controlled by those who call themselves the religious leaders, or hold the key to the door of a Mosque, Church or a Synagogue. We open all the doors to complete the knowledge and those who have contributed to us more will appreciate to us how this T will take shape in a much, much deeper shape and form, now that we have understood and completed most part of the research. This is a part work that has to be completed for mankind to become knowledgeable to enter the final phase of the distribution and understanding of the knowledge that in the space we don't become slaves. Slaves to no one except to our own ignorance. And if we don't understand it, it has to have a meeting in what we call a way, as a process that it reaches that point and is not magic, and is not that we have to show.

As I said many times, I will not show any magic. Because the time of magicians in the name of religion is there to make blind men see, is all over. Because now we have raised the STM to understand the totality that the physicality is part of its operation. (:58). This is the changes that will come. This is the process that will add to all of our knowledge. In the process of the teaching, we have to understand, the teaching will never end. The man who says he knows all of it, is the man who knows none of it. Because if you really knows none he will not claim. We just share knowledge, that is why we are called K Seekers and we invite everyone to come and join and share. We are making it possible for all nations and governments to be involved as part of our work and what we call our process. We'll announce in the coming time clinical trials which have started with universities for diseases like Parkinson's or all the brain diseases. We have signed ?? an agreement in the past few days and hopefully in the next few days as it gets its final shape we'll announce one of the largest clinical trials for properly evaluating and developing a patent understanding of the whole process. In the coming time in the space as we can't take doctors we have to develop technologies which can diagnose the disease or we go through the balance of the soul through the Universal Enhancement system that once you go through the system the body enhances to what it has to be to be perfect. (1:00). One of the important points about the Enhancement Unit is that it is a space unit. In the space we suffer from viruses, from the energy packs and this system is set to extract and additional or depleting virus system. The Enhancement Unit is a space T unit and this is what many of you will come to realize. This is why the system works so beautifully more with the STM then with the physicality. The STM is an energy pack independent of AA strength in the physical dimension. Step by step in different teachings I'll open up the truth about the Universal Systems the Enhancement unit. This is why the Enhancement Unit (EU) the new system is so vital to be utilized internationally, because in the dimension of this system we don't interfere so much with the physicality, but as it is a plasma and is set to the AA strength of the man it keeps a steady continuous same strength so any addition as it is stronger in feeding gets, depletes itself. At the same time if there is any reduction it gets elevated by the system. The EU is not as you thought in the beginning, that you go in there and you get Parkinson's corrected and then you don't have. The Parkinson's, (1:02). comes from the space gap in the energy of what we call the emotion of physicality and the system balances it and then you see it. You should have understood this when you saw the man standing up after 2 or 3 days using the EU in China, without any physiotherapy or anything else, without actually doing anything by just enhancing the soul in the system and the physicality just followed. In the new space T this is what we'll do, if you go into with a cancer and come out of a system without the cancer, it's emotional and you'll find out that it's the STM which sorts it out. But if you go through the evolution (type) cancer you are talking about the STM in interaction of the physicality with the soul of the planet to adjust each other that they can accommodate each other that one can live with the physical changes in the dimension of the planet. In the new system, the EU we consider the soul of the planet in respect to the STM. In that process ?? ?? ? ? will find a position to accommodate each other that does not lead to the demise of the man. Now you understand more what are the Universal Systems set to do. The whole process is not just to make you better or without a cancer, the US in the position of that use, will be used, (1:04). for different aspect of the health of the body and for feeding the man and the rest. What we see in the coming years, as we say in

English, Why have the Pakistanis never won the world cup, is because every corner they find they open a shop. Soon in every corner on this planet you'll find an EU. People going in to feed, to ?? , people want something and it will become as normal as anything else and this will take a lot of changes to the human race. This will bring a lot of changes to the human race, that we don't have to worry where the food, materials, shelter comes from. This is part of the same process and we need to go through this phase to become what we call, a true human race. People who understand it and not only look after their own physicality and soul, they'll also look after the soul of the planet and in turn collectively we'll change the planet. As more and more of these systems are launched in the space T, by cleaning up the body of the man, by Mexico (conference) cleaning up the damage we have done to this planet, by ourselves. Then we'll explain to you what mankind has done in the book, that you don't even know, that we extend the process of what we call, re-habitation. (1:06). The new EU in reality is a total system that mankind has to gradually learn to live and be with. .. If you look at the internal shape of the EU, it has the shape of the U. It's not a sphere inside, it is oval inside and when you take it by ratio, it's a copy of our U. If you look at the STM and the physicality ?? ?? it's the central line of the U and creates balance of the energies. When you put man in the upright position we create the same condition through the STM. We call it the womb of the U, and not the womb of the mother. The U is the womb where all and everything has been created. And when you look at the systems that are ?? planted around it, these are like other universes ?? effecting its ?? internally. When you look at the shell of the system, it's a Unicose, a collection of different universes created in interacting fields inside. Inside in ?? response, balance is the body and the STM. (1:08). The new EU are replication of the Creator, that's why we released the patent, the book on the creation of the M fields and the creation of life in the U by the Creator. This process had to be brought to mankind this way that it was in gradual steps. When you enter the EU you will see satellites and at the same time you become part of the whole structure. Your soul has to find balance with itself and with the dimension of the U. Soon mankind will understand. When we call it a universal system it doesn't mean that it applies to everything, (rather) it is a copy of the U itself. In that process the body finds balance in every aspect. When mankind becomes wise enough and understands looking at it, when you seat a man inside it will be like a solar system in the galaxy of the U. It will shine on its own as a star. The new EU is not what you thought, it's a copy, a replication of the true life, (1:10). ?? admission and start of the life as what we call, the God, the Creator. R- Sorry we missed that line. … The EU will be a copy an exact replica of the U. It's exactly what we expect from life in the U. It's a copy of the replication of the creation, where the Creator started the whole process of the life. We call Him God or whatever. In the patent to be released and in the book to be released, in conjunction with the universal system, mankind will come to understand what I have given. We use the ways of the U to interact with the ways of the physicality of the man and in this process we create many new conditions, new lives, many new understandings for the man himself. Thy shall not steal. You will understand very soon in these systems, no one can steal, not even from the U. The understanding of the motion of M fields in the space of the U leads to creation of new lives. We do not have a GPS, (1:12). to know where the position is where we want to go, but with the new EU the T which is developed, mankind will be able to position himself anywhere in the U. We don't need to put satellites everywhere to find where we are. We use the knowledge and

the connections of what we have developed to position ourselves to anywhere in the U. Creation of the motion and life and understanding how life will look in that position will become part of the work of the KF K Seekers and research centers in the coming months and days. We have to understand how did the M fields get started. What is its origin. What lead to the creation of fields, even if there is a Creator we call the God, even if we learned ourselves to that path of belief, it has to have a position and a field direction. The question now becomes the ?? between the egg and sperm. Did the egg and sperm come first or did the STM, or the interaction of the fields of the egg and the sperm lead to the creation of the soul, (1:14). which lead to the creation of man. This question sits the same with the Creator. Did the soul of the Creator which lead to the creation of the Unicose come from the interaction of the fields. That through those fundamental structure of the fields lead to the creation of the Creator, the soul of the Creator, that itself lead to the creation of the physicality of the Creator, what we call God, which is the U we see. In the coming time, in the books to be released and to what we call, the way to release it around the world, as patented, which is the easiest way to share knowledge for the human race, we bring this question to an end. It's not a matter of did the chicken or the egg come first, it's a matter of what lead to the creation of the egg before it became a chicken. This is what we have to understand and as you know many followers have a problem with the kitchen and the chicken. Now we have to understand did we create a kitchen that it allowed and created a condition for the chicken to be born. Did the fields lead to the creation of the Creator. But the question comes, where did the fields come from. Or is the life of the man not ?? ?? a mirage, a fantasy. (1:16). These questions if mankind answers before he steps into the universal, what we call, arena, will come to understand that he is equal to all other creatures of the U, there are no higher but they understood more. Now he understands more that he cannot imagine. There is a huge problem in many cultures, in African and Middle Eastern, in part of South America and Asia, people will not even give a cut of the hair to you because they say that you can use it to control us. They believe in black magic because they can control and do this and that. Would this have a position in a way that those who understood the access to the STM, or do they control the imagination of the man that they control what the man wants to see. As I was talking to a friend of ours, he said they control people through black magic, but the darkness or blackness of the magic is the man's lack of understanding of the totality of his own soul. Would and can we enhance the STM that he can't be abused this way. Who is going to do to you the black or the white magic or rainbow magic in the U and you believe in it. (1:18). Because he can do something, but he has learned a trick. These are the fundamental questions that we have to answer with the present knowledge and with it take mankind into the dimension of the new space T. Where does the essence of the STM come from? And how can some of us have or get access or some develop access to a higher order that we can make it (appear as) magic for those who are in the lower order. How can we set up systems that uses the higher level of the whole structure of the universal MG fields. Where does mankind lead himself through his soul, not through his physicality. We had a very interesting encounter in our meeting or visit to Istanbul a couple of weeks ago. As you know you can join different kind of shows on ?? the river (through Istanbul). We were joined with hundreds of other people. (1:20). On this venture each nationality has a flag on the table. There were Jewish people, Bulgarians, Chinese, Iranians, Saudis, from every culture. There were flags on the table from every

culture to show from where you come from. All hundreds of them were concentrated on what was to be a joyful night. It was very interesting what happened, it was part that I sat as an outside observer and looked at the conduct of the man. At the table I was sitting I was the Iranian with the flag of Iran, behind me were a table of Iranians. At the edge of our table there was a Saudi couple and then joined another Saudi couple with the flags of Saudi Arabia on the table with a space gap of 2 chairs. Then on the other side were mainly 6 or 7 rows of Jewish people. When the program started, you have to understand that there is a subconscious mentality that you can't put the Saudis, Iranians and the Jews together because there will be a mayhem. When the function started going, and these people are expert they know this is the function and they emphasized that every nationality comes out and dances to their own music that it brings a unification. All the people understand a little bit and try to calm the situation. The strangest thing happened, the Saudis (1:22). felt like outcastes and they asked to be removed from the room. So the 4 Saudis moved out because they couldn't sit at the table with an Iranian and then there were Jews on the other side. This is the mental lock. This is what is going to happen to the mankind in the space if you understand the logic behind it. When the music and dancing started the Iranians and Jews came dancing on the floor with the flag of Israel because there were a lot of them. What I did is I took the Iranian flag and I joined them and I gave the flag of Iran in exchange for their flag. They hesitated, then they took the flag and they gave a flag and we both kissed each others flag. And then the Iranians and the Jews you didn't know (the difference) anymore. Accidentally one of the Iranians was a beautiful perfect dancer and the Jews would not let him go. What we saw was, mankind loving each other, the color of the flag, and the beauty of it was that they were all eating non-kosher food and the ?? had our food. And none of them cared because they started eating from each other. (1:24). They started dancing with each other. In the space we'll have the same position, we need to dance with citizens of the U. As long as they don't care (feel) fear in us. If they create that fear, mankind will go into space the same way. Those who choose to be outcastes will create a problem for themselves. In space, in the dimension of the U the STM should shine as an example of his planet and the soul of his creatures, irrespective of color, race, and path of belief. What we learned is very simple, would mankind mature so fast as to get to that point, or would he still be tormented by those who want to abuse him for his development of his soul. Or would mankind have a fear to go into the system that he becomes equal to the others. (1:26). It will be very interesting that what happens when we put these systems for the world leaders and the common man to go in together. Would the soul bow to the other that you are the soul of a king or would a king bow to the soul of a farmer that you feed me, and my existence is because of you. Then you understand how we have to behave in the space T of today and what is coming up. My words will be understood by mankind very soon. .. I am sending a EU to the city of Brussels for the kings to walk in first to lead their nation. I wonder what excuses they'll find not to enter it. One will be gifted to Vatican and we'll see if the Holy Father will let his flock in, and will they come out as they went in. Do you remember when we gave the key to the nations, the governments we announced it. As we send these EU to the governments, (1:28). and the world's religious leaders we'll announce it. It's for public to see how they come out. Would they go in for their illnesses and come out a new man? I wonder who would refuse the gift of the elevation of his soul, the priest or the prisoner. The one whose soul was imprisoned by the priest for centuries. I wonder if the

Islamic leaders will refuse to enter, and what excuses they find not to enter. As I said, I am a good teacher and I know how to work and how to teach. When we give these systems to the world leaders, to the nations, the leaders have to walk in first. The days are numbered. Around about 20 - 25th of January we'll show the first units. And ?? we'll get the world leaders to walk in. (1:30). And that's it. Now you understand why some world leaders are planning their abdication. Any questions?

Q: The Romanian governments has no solution for water contamination from sea vessels such as dead ships, how can we help? This problem exists for many nations. This problem of sea contamination, especially oil contamination, when they wash their tankers in the open spans of the seas and it gets washed into different areas form different countries and ship wrecks. This is something that we have created and there is a solution for it. It's not just the Romanians. You have it heavily in the Gulf of Mexico, (1:32). and in the Persian Gulf, you have it anywhere there is an oil export. Because if you have been in the oil industry then you know what they have to do. they have to wash their tankers from anything else or they create gases inside which can lead to explosion. they put a mixture of the oil and it has to be cleaned out and they dump it in the ocean and it just washes in the ?? ocean and we have seen some accidents before. This with the new T is recoverable but as I said, from now on when we go into the recovery mode we have to consider something else, what and how long has that damage been there and what has been created as a new life style. Romanian officials don't like to work with what we call pig flow because part of the officials income form EU is so good why should they. A lot of people have to understand the position of world leaders, their bank account is more important than their nations. The position of power is more than what their nations have. In the moment, why the European Community governments who are facing this ?? are not doing anything because the subsidies are very good and a few decision makers are making good money from it. (1:34). At least some of it is deliberately introduced. We saw people who go because then they can get what they want from it and they create uprisings and all sorts to be done. We have seen the announcements of the change of governments in Iraq in the past few days, the announcement or resignations, the same in Malta. The same in other countries. We saw the deliberate set up of a revolution, a secondary revolution in Iran two weeks ago where they burned the banks and everybody thought it was going to be there, but it was the cleverness of the government understanding that it was a set up revolution to come up later on, and they created a false uprising and those who were really the creators were waiting to create the biggest revolution in Iran, ?? they thought they would do it and come in and capture the whole lot of them. People didn't understand two weeks ago when there was announcement in Iran of burning the banks. As I said, we are very clever people we said there would be a ?? and they made all the ?? and now we know who they are. We used their ?? and their evidence to the European Court of Justice. The same thing happened in Iran. The officials became aware of a massive finance outside mainly by Vatican to start the revolution in Iran and transfer huge amounts of money into Tehran and all the cities. They paid the rogues, what we call the thieves, the bandits to create that ?? The central government became aware of it. And they set out, the ?? burning of the banks, then the others thought they had started the chaos and they came out and they captured the whole lot. That's why you heard about the end of it ?? All the Internets were closed from where they were supposed to receive instructions from Vatican and America. (1:36). People have to

become clever in understanding the work of the nations and governments and how they don't allow manipulations anymore. This is why 2 weeks ago I announced clearly my solidarity with the nation of Iran that we don't enter politics. Because they wanted to pull the KF into it and we were fully aware of what was going on. I don't talk out of place. I talk because it is the place for it. We are loyal to the nation of Iran and As I said, we always work with those who are elected to be the rulers. We don't work with the opposition, we work with those who are in power to rule for the benefit of the nations and through elevating of their souls they elevate themselves to bring a good nation up. I support Iranian T across in all my negotiations where Iran can export a T, I support it, I am there to do with not only with Iran, with the Chinese, I do the same with the Austrians. To me all the nations are one, and in a way we see, because we negotiated with the government. The KF K Seekers and members of the Universal Council know how we talk to your government. We were told internally through our securities there is too much money in the background, just they don't want to do it, because somebody is likely getting very well paid. In Romania we know exactly what is going on because our team in Romania they set up meetings at the highest level. (1:38). We spoke to secretaries of state. Collectively even if we try to do cleanup it's not ?? ?? Wherever the resistance comes is because somebody's pocket is getting a little less lubricated.
Q: What kind of device can measure the fields of a plasma, the type and their strength? I learnt the plasma we make there is no measurement tools for it, unless you create the system which we developed years ago. You need a system that can more or less take 6 axis, fields of M fields that it gives you a spherical image. (1:40). Then you have to work on a high level, what we call, frequency, a very high level frequency and a very low level frequency that you get a full spectrum of the ball of the plasma and you get guidelines. There are people who say they can measure the plasma

(1:44).

(1:48).

(2:00). and this spectrum of red means to me joy, but to another it could mean danger. The same color. If you look at the, what we say, the beautiful Spanish red, you've seen the most gorgeous warming red color. We have a slight different shade of it, we see in the Chinese flag and what the Chinese wear for the wedding. It's a very slight difference, it's not the same and it brings the condition of ruling. That color ?? it. If you go to Africa and people wear a slightly different color of red, and it means morning. If you put the three next to each other you see a very slight difference with it.

(2:02).

(2:04). Any other question. Q: So one fields for example the CO2 Gans can be 2 or 3 more fields in different directions, 1 by another? Yes. Q: so would the detector be the resultant of all the other at one particular point? Yes. it measures at that point. Q: Is that

why you have to do 3 dimensional in order to see where the fields might be coming from or developing stronger, it's hard to do from one particular point? You can do an average of what it comes to and see what it is taking and what it is giving, and you can visualize. You can answer people. It would be nice if the new .. what you call it, K Seekers they would create something like what we call a lie detector and see how the change of the fields shows the truth about the man, not as this temperature or whatever. It ?? checks the environment of the room. What they do with the plants. Now on the strength of the ?? man. It would be very interesting how they would develop it. But at the same time the new ?? should be how do we create , (2:06). what we call, resistors or capacitors and ..

(2:10). Staff in the background is jetlagged ..
use ???
(2:12). … We prefer 3 system unit centers.
In Brazil the center for 10 units, our target is to raise it to 200 to 400 units in the next year to make it one of the largest centers in South America. Then we are looking at in the UA Emirates establishment of the new center. We'll announce that very shortly. We have just to complete a couple of things and we'll announce it.
.. By January at least 10 to 20 centers around the world will be operational in January or February or March. (2:14).

(2:20). Q: Will the conference in Brazil be Live streamed? No we will not live stream any of the conferences. We do not even record them. You haven't seen any pictures from us. Q: You said it's free and anyone can join? Yes. No you are not pushing us there. No way. You see when we started these conferences, we knew and we set it for K Seekers of that country and to stop the mayhem of people traveling half way around the world to be. A few people travel to be present in some conferences, from different countries, but it's primarily it's for those nationals, to strengthen their work. What we saw 3 weeks ago, that there was a need for developing and strengthening the structure in this country because we were not aware of the facts here. Now that we got here we see there is a lot of misconduct ?? ?? and to jumpstart and to bring them back together in balance. I see ?? between different K Seekers just trying ?? for who has done wrong. (2:22). .. ?? like children, he did this or that to me. We are here to support and enhance the T in this part of the world. Then we go to Malta. The conference date has been brought 1 week forward, the 17th and 18th ?? Then we are in to Mexico, they don't ?? organize these ?? conferences ?? It's ?? we can interact with the governments and diplomats. This conference next week is mainly government officials who heard about the T and they want to take it to the next step and KF supporters to come in and understand the work of their governments, their nations. This is what we try to do. If you want to come to Malta we are in Malta, and if you want to come to Mexico. The Indian one has been put back. Another announcement will be there. The ?? Malta has been put to May. We are moving these conferences that we can have maximum effect and nourish to every being to help the KF supporters in this area. Then it goes back in the hands of the local KF supporters, they have to announce it. (2:24).
Q: Yesterday we had a teaching which we discussed systems which are embedded in the body which convert matter to fields and then fields to matter, and this is the lungs and

digestive system, and there is one system which converts fields to matter and this system I can't pronounce the name of it correctly, which makes the egg and sperm. Is that correct? Try to pronounce it. … Q: Which system makes the egg in the woman and which the sperm in men? R- the reproductive system is that what you mean? ovaries.?? (2:26). There is something you need to extend your knowledge to. I have to leave in 28 minutes .. You have got to remember the understanding of your knowledge of today.

(2:28).
If you look at the reproduction organs of the creatures they are at opposite ends of the .. sperm is released, egg is released, (2:30). whatever has happened in the dimension of the physical life which through the circulation of the blood transfers the information to the DNA, RNA, and the true STM, it is transferred to the egg or the sperm ?? ?? we call the software of it, and the sperm is just a physical matter taking that software to where it's going to be used 25

(2:34).

(2:40).

(2:52).

… It's 8 O'clock sharp. (2:54).

(2:56).

306th Knowledge Seekers Workshop - December 12, 2019

(Using the UBESU or Enhancement Unit to elevate our souls we need to become humble and help the others to elevate, When you achieve elevation of the soul you become a light and those who claim to achieve but cannot make a light of your soul are false claims, If you managed to create a hollow center in your Gans and the next step to create a light then you have created a soul of that material, The center hollow is like an electron to the proton of your soul, This is one of the ways to elevate the Soul of the Man, ,)

English Transcription:

(:05). .. We'll try to dig deeper into the knowledge this time and see how far we can go and how deep we can go in gaining of the new knowledge. We've seen in the past few weeks and months that many K Seekers are trying to find their soul or part of it and trying to understand that position and understanding the strength of what is hidden within the gem of the creation of the what we call, ?? body. And some think they have reached this point and they start making claims of, they have achieved this, and they don't need to

be here, I want to be there. If you managed to guide you to, and reach to what we call, finding the strength of your soul and you don't need to be, or do things around the KF. That was our sole purpose to be independent, that was our purpose. So we see more people elevating themselves. Finding out the new ways, but try to be humble enough to understand that most ?? human, these kind of, what we call steps, is the time when you have lost the whole totality of it. Because these were tests for us and as human beings ?? ?? as created things that we find our position in respect and the whole structure goes on this basis. We are here not just to elevate our (own) souls, but we are here to elevate the souls of the others who need elevation. (:08). It will be interesting to see how many of the people who come close and start learning, or going into these, what we call Universal Systems and by being elevated start making a lot of claims and positions. The beauty of it is we let the mankind make these claims and what we call mistakes while they are here. Because once you enter the U Community and then making the claims you'll make a fool of yourselves. This is one thing that needs to be understood by many of you who have taken this path and become elevated. We see to become and to understand the power of your soul. Be humble enough otherwise you'll be humbled. It is a very fine line, and we have seen this happening in the past few weeks, there are people, some who become humble enough to understand more and some claim to be the totality and does not need (the KF), but in total we have done everything that what we call the balance is created. The totality is created. It will be interesting to see how these new souls who understand and become part of the totality of the understanding of the elevation of the soul, actually achieve it. Some think, **those who reach the point of what we call salvation, (:10). the point of understanding of how to elevate the soul of themselves, they become a light. If anyone claims that they have reached the point and cannot become the light, is a false claim**. ?? This is one of the keys to understanding the position of the STM, because those who say I can achieve everything, (should) sit and be watched to see if they can become the light. Then you understand that you become the giver, to become the center to be elevated, to elevate and if anyone claims I have reached and I do not need the KF and you cannot make a light of your soul it means you have ?? nothing ?? balancing. And you can see a lot of these. These are the claims that come from the same as clergy. These are what we call the new soul clergy who talk through the false understanding of their own position. We will see a lot of this. Do you remember what we said at the very beginning, everybody wanted to know if something is a Gans, if you have a Gans. We explained with some Gans's if you put them in the freezer they don't freeze because they create a condition. But many of you who created the Gans's, you took in the process of production, some material stayed open conversion of matter so you ?? saw it freezing. And then you got lost, some of you put vinegar and acid in it and it got dissolved because everything was on the matter state. The way you created the Gans, (:12). was not of a higher quality to get the higher order. Then we explained more or less the only way we can see a Gans to be a Gans, or a water that appears to be a Gans, is to place it in a full ball and ??? rotate it at 2700 RPM and you'll see a hole in the center. If you do that with a water you'll never achieve it. But if you managed to create a right combination of materials, of Gans's in that ball it will cause the light. Not many of the KF researchers have managed to do that. This is something which will become part of the understanding of the totality. It's the same with the STM, when you achieve to reach the position of understanding the soul, that becomes a giver, you become a light. The funniest thing is,

that those who claim to be, and we allow them to come into the teaching and ?? they thought they ?? could use the KF, never made anything themselves. And what do you call it, without actually ?? leaving ?? anything ?? , and if you have, if you manage to understand the process of what is the difference between the matter and a Gans by rotation of the ball. Then **you manage to achieve what we call, the hollow center, which is the center of the totality of the energy, then you have created a Gans. (:14). Then if you can reach the next step to make this center ball into a light, then you have created a soul, the soul of the material**. R- I lost the last sentence .. If you manage to create a hole in the center of the ball, Rick Crammon was one of the first ones to achieve this, then they started putting Gans's in and rotating more and we saw the center ball. **Then you understand that you have understood the totality of the work. In so many ways, you see the light because you are creator of the light. That center ball is like an electron to the proton of your soul, that creates a condition of the creation of the light**. In the future, mankind will understand what this means. In the future **this is one of the ways to elevate the STM**. The confirmation of the existence of the proton comes by the rotation and motion of the electron. In its rotation of high speed confirms the existence of a higher order field, that the interaction and the light, on earth, it creates that light. When as a nuclear physicist you go through the first steps of the teaching, of becoming to understand nuclear T, they should give you this. At that time when we used to study, (:16). it was impossible to confirm the existence of the proton but we could see the white motion of the electron around it. It is the same. In a way, in the new Enhancement Unit (EU) we reach that point. We saturate the environment of the system, in a position that the soul will shine. In the upcoming technologies which will be released it will be the same. Many of the materials, many of even water contaminations which man considers to be as hazardous, are sources of energies for the travels of the U. It's us who has to understand, in the future, in the depth of the space, what condition creates that position for the soul that not only of the man, but the passengers of the U exists. Not just I am happy it's good for me, I don't care about the rest. Mankind in the coming time will realize this not only on the planet earth but throughout the space. Just because something is not any use to you, does not mean that it is no use to anyone else (to no one). This is part of understanding the work of the U but at the same time understanding the work of the soul of the ?? In the coming time man will become, and matures enough to be able to understand. (:18). Man will mature enough to be able to find out what his soul is made of. As I said, the time is ticking and everyday we get closer to be able to bring that point for man to receive the confirmation of his own soul, existence of it, the brightness of it, the strength that he can shine on the others. If the KF K Seekers, which are increasing by hundreds of thousands everyday, especially since we launched the EU. Everyone is looking for salvation in the physical dimension by using these systems, but in fact, they have to look to see what it brings for the elevation of our soul. Mankind with this new understanding should not look for the physical elevation of his physicality, but to look and see how the STM will elevate that it might lead to salvation from the pain of physicality. This is the process which we are going through and we will complete in the coming weeks. Many of you will use the system and many of you would not like to be back in the dimension of physicality. (:20). It's in the writings of the profits of the past, it says, if I show you the beauty of the other side you all will commit suicide to be on the other side. But with this new T you don't need to commit

suicide to be on the other side, you are given the golden key on how to achieve it without the termination of the physical life. Then we'll see how the behavior of the mankind will change. Then we'll see how mankind will elevate himself, and then this will become like a virus across this planet. We will choose in that dimension, in that position, that even if we stay in the physical life the position of it, the work of it, the contribution of it to the society that elevates the other souls and maintains the existence of the other souls. With this new T it doesn't mean that everything on this planet is finished. It actually starts, but a new cycle we'll find out, exists for the mankind and then this becomes part of the process of being able to travel the spans of the U. In the coming time, in ?? of times, in weeks and days mankind will see this. You'll still go to school and to work, (:22). but the work will have a different meaning. The knowledge will have a different meaning. The leaders of the nations will change the process of teaching, because it has to be changed that man understands the position of his soul first from infancy. Not to be lied to when he becomes at a point of fear that if you don't do this, this will be the punishment and the rest. There is no punishment in the process, but understanding the position of receiving. It is part of what mankind needs to go though (and ?? through) for us to reach that point. We hear many people say that we have to get into the system then we'll tell you if it works. No problem, but you try to get into the system, which is yourself, then you'll know if it works. The process of the teaching, the work of the STM will appear very soon. Would we have the solar schools or would we have the soul schools which have elevated the school of soul to become the new generation of beings in the U. The expectation will be high, but he delivery of the truth will come from the action of the man himself. (:24). As we open the doors with governments as we open the path through different channels we'll see more and more. How the position and the condition will change. In step by step world leaders will change and bring that change and step by step we'll see the changes which come to accommodate the new understanding and then we'll see the new passengers of the U. Try to understand, to comprehend the reality behind these systems which we deliver. As I said the last time the next step for us is not just to do the helping of the man with his soul but the planet and what we have done to it and the other animals, to others in a way that mankind was left loose to do what he liked for thousands of years. We'll see the order will take place, we'll see the change of the rules of engagement will take place. As I said, the U Community has been waiting for this little child to mature and it's just getting to the point of maturity they celebrated with us and they are with us, and they'll stay around until it's completed. I remember the last time we were in Brazil they said, would we see the same rings and position in the sky (:26). as when we came. They came and we saw. They were with us last night and members of our team we both have videoed it. The position for mankind to reach the next step, but is mankind prepared to understand, do you need to build a spaceship or are you enlightened enough to transfer your soul to the spaceship available above. This is the secret. If you remember I explained to you, when we met with the heads of NASA in the ?? Slagsburg Spaceship University years ago, when I explained to them how the new space T will come that by creating the right fields you get attracted by the G fields of the moon so you don't need to burn any fuel. The head of the NASA team said, the game of the spaceship has started, the game of the space T what we were doing is over, the rocket propulsion. Which meant when the system as we showed, by creating the right fields the system will fly to its destination. Now that we understand, as I said, we videoed them when we

arrived, and we videoed them last night again in the beautiful city of Brasilia. Those who have claimed they have reached the point of maturity and understanding of totality, let's see if you can transfer yourself to the spaceship and become the true passengers of the U. The new spaceship T, (:28). is to join the spaceship of the U Community which is above and that has a criteria of the peace, understanding the peacefulness of the soul, then you'll be transferred, if this is the wish of the STM. In a way, mankind doesn't need to go through the process of developing a spaceship T, where the spaceships of the life, where the U has been waiting for, is above you. Tune to it and you finally become the passengers of … you'll reach the ultimate goal of the freedom of the physicality, but that doesn't mean the end of understanding of the totality, but in fact, it becomes the beginning of understanding of a bigger scale of knowledge of the U. If you are privileged and lucky to see these spaceships, as what we have shown before in Southern Italy, in Brasilia last night we saw it in interaction with the moon and not with the sun. See if you can elevate your soul to the level that you become passengers of these spaceships, exactly as I explained to the heads of NASA, that by tuning into the MG field of the moon, it pulls it to itself. You don't need to burn to reach it. Then the mention of the speed of light and everything else becomes the nonsense of manmade bookkeeper. (:30). Then you'll understand that the process has started. Then you understand that many of the government scientists at the highest level have been waiting for, or they've been, they are aware but they did not know how. As I said very recently we have started the spark. From that spark the fire of the conversion of the man's soul to the level of the soul of the U Community will start one by one and then it will become uncontrollable, because it will transfer and elevate the soul of the others to reach that level. But it doesn't mean that we'll leave the dimension of physicality. This is the next step and what we see from where we stand, a beautiful cycle has started. And in so many ways, if you claim you have reached a point of elevating yourself to any. Let's see if you get picked up by the passengers of the U. Then let's see if you shine. Then mankind is ready to become part of the peaceful U Community. I do apologize I have a bit of a cold today. Try to expand to understand, (:32). the truth and not the arrogance. And if you understand that you have reached the position of elevation of your soul and you can reach it, let's see first if you become a light. It means you become a giver to enlighten the others to reach your level. And if you cannot do then you are exactly like those who make a lot of claims. As I said to one of the K Seekers, he asked me a question, Do you know when you (are going to) die? I said, yes, I know the place, the time, and the ?? where of it and at that point there will be no dimension of physicality, as we become the light. This is what the man should be, then you'll understand that the next position in your life, what to expect. We have done enough Gans and coil making and everything else, but now as I said to a very good friend, we have made the elevator for the STM through the Enhancement Unit (EU). Mankind gets in an elevator to go from floor 1 to floor 10, now these EU are the elevators in the physical dimension to elevate the STM to the higher level. Then you understand, (:34). why you don't have a cancer or a Parkinson's, or why you go into the system and you still have the Parkinson's, which means you haven't understood, you have not cleaned up the path of past. If you have cleaned up the path of the past with your own soul, you'll receive the dimension of elevation. You have to understand that **it is the soul which has to accept the change and not the physicality**. What you see with these new systems is that a man who is paralyzed starts walking because the soul has elevated. He was

paralyzed for months and years in a wheelchair, through the present medical technology you can not do, you need physiotherapy, you need this and that to be able to move the muscles slowly. But with this T within days you walk without any physiotherapy, which means the soul has received elevation and that elevation of the soul has been received by the soul of physicality. So the condition of what we call paralysis or damage doesn't exist. This is what they said, "resurrection", this is what Christ did, raising the dead. He raised, he elevated the soul of the dead body that with it he raised the soul of every cell that the dead body woke up. But now the wake-ness comes from consciousness of the man not in the dimension of physicality. Many will go to these machines to get salvation from the pain of physicality but they don't understand, that they have to understand what they have done to their soul. (:36). In understanding they'll receive the salvation in understanding the release from the dimension of physicality. Soon you will understand. As I said to someone very recently, these systems are being launched the best time ever, at the beginning of the spring, not only for this planet but for the STM and humanity. Try to understand more about the fields of the plasma and not the physicality of the Gans. Try to understand what it means to exist within the fields and then what it means to live within the dimension of the fields but in the dimension of the physicality by the choice of the soul and not by the confirmation of the existence. **We are not teaching anymore, as I said, how to make Gans's. We are trying to teach how you create the fields that lead to the freedom of the STM in the dimension of the physicality, but at the same time to have access to it**. As I said, it's not, "beam me up Scotty" anymore, but it's let me beam to become the sun, (:38). for the others to enlighten, then you'll find out that you become the passengers of the U. Today in the afternoon in the city of Brasilia we have a meeting with many KF followers who will come especially for this meeting. A small conference was organized in a few days and many trying to be here but because of the lack of time could not get tickets to be here. Your soul is with us and that's all that counts. The first true flights will come from South America and soon you'll understand why and how. Those whose understanding of the elevation of the STM will come through the path which was chosen a long time ago. For us to be in South America there is a reason to fulfill part of the promise of the past. It's not coincidental. We are taking the T into every continent on this planet and now it's time to unify the totality, (:40). and South America was one of the last parts to be delivered. What is important in what we carry on in the next few weeks until we start the actual delivery of these new systems that elevates the STM is to keep you on the position to understand gradually what is to come, for you to understand what is the next step and for those govern to understand the governing by injustice has come to an end. There are many people who want to get into these systems to test. We'll test and elevate those who are sick first, before those who pretend to be sick. Are there any questions?

Q: I built this reactor with the 4 Gans's inside. I am a life long meditator. R- He says he has not reached the Tibetan "Rainbow Body" yet, ha , ha. (:42). Today I am 64 years old and my bones and body are not like a 24 year old, the last years I have spent just practicing in my bed. When I sit in my reactor I don't feel any tension in my body, my focus and concentration has increased dramatically and effortless. I sit for 1 hour and it feels like only 10 minutes have passed. My question is it possible that the plasma fields have a levitation effect on the physicality, that's what I feel, and is it possible the plasma

fields are bending time? … K- As they say when you have fun you loose the track of time. When we tend to be in the dimension to enjoy or try to enjoy we don't realize what the time is. Time is a manmade dimension, it doesn't exist anywhere in the U except for man and is based on the rotation of his own planet in respect to what is called the vision of physicality. When you build these reactor, try to understand, you have to understand what we call, "the last dimension" which mankind has not realized, and is built in the structure of the new systems. This is what I explained before no one will be able to replicate the work of the plasma units which we make. (:44). As I saw somebody said, we are going to buy one and strip it and show everyone exactly what to do. You know the story of the man who worked for a potter and worked for years and never understood why when he brought the pots out of the oven at night were black and in the morning when he came back to work they were all white. For years he couldn't understand the secret of the change of the color. Until when the master was dying then he asked the master can you tell what the secret is to when overnight you changed the black ones to white. He said, it's just a blow, I blow the dust away and you see the beauty of the pot. I blow the ashes away and you see the dust gone and the beauty of what I made. This is the same. Just because you might get hold of one or whatever and you think you might copy, the soul of the U has no blueprint. That's what you'll not achieve. If you see anyone claims to make the systems that can do what the system made by the procedure that we set up you'll find that you have gone the wrong way. Try to understand that, (:46). just by making the fields and not achieving, it means you have not made the totality of the spectrum of the fields needed to create that effect. And if you think you have reached the point of levitating, you have to understand how you created the condition of the fields that brings certain type of balance between the fields of this planet and you. And you can do that by breathing, you don't need the system. Many people over the centuries have managed to levitate. Levitation is the position on the matter state of the Inertia of the body of the man and not in the dimension of the STM. When you understand that strength, then you can tune into it very easily. It can be done and it's been done by many people. You change your breathing and then change the position of your soul in respect to your heart, which (is the) creation of the soul of the physicality and then you'll find out that you create a MG field which elevates you, but because it's based on the field strength of this planet, you levitate, you cannot fly into another dimension in the space. R- … In regards to showing powers like that, (:48). whether it's considered not ethical exactly, but okay with the U, to show such things, or does the ego get involved with that and we have this thing where it's not good for your spiritual growth to be showing such powers, let's say? No why not. If you can use it for the benefit of your own soul and not damaging other souls, why not. It should not become the point of arrogance, it should become the point of humbleness. R- And perhaps only through humbleness it can be achieved anyways, is that somewhat true? In so many ways. The humbleness becomes the point of a giver not a taker. Humbleness comes through understanding that I possess nothing, I am just what I call, a medium, a point of transferring. Claiming possession is the end of the possession. R- repeats .. When you think you possess is exactly the time when you don't possess anything and that is the time when mankind, so many times fails. You'll see a lot of world leaders, that when they get to the point of leadership they don't want to leave, and that is exactly the time when they lost their power. (:50). They come in with the love of the nation and when they think they have the power, they want to stick to it and that's the

time when the nation turns back on them. We have seen this in many world leaders. One by one. It's very much in understanding the totality of the operation of the STM. When we understand it and become humble enough to be able to interact with it, it's the time when we become humble, when we don't need to, when we know it's there if we want, but it's not for us to abuse. Then you can do anything. In the setup of the new systems, as I was talking to John in respect to the AZ new health center, in which the property has been purchased and now it's going through its phases for the machine to arrive. The setting will be in a way, that if we can structure a center point. If we manage to structure in what we call centers with these systems, not only by entering into the system but by structuring the position of the systems, many people do not need to enter the system. The environment of the system will create the same condition of the elevation. (:52). The understanding, and this is one of the reasons we don't let individual units to be sold. It is because of the structure, which will bring the position of the environment for the condition of the elevation of the totality. Then if we setup enough of these in points around this planet, in linking up the elevation of the soul of the planet and of the mankind will appear at the same time. Because the STM has not reached the critical mass as I have said many times before, and these systems are developed to achieve that and then we can position them in the right positions around this planet, which we have chosen in a very hidden way and a lot of you don't understand. That helping hand for the elevation of the STM and the soul of the planet, will come sequentially and simultaneously. You could not do it, we gave you the helping hand. This is the reason we insist on a minimum of 3 units, because it creates, if you remember the Star Formation (SF) with a 3 base, the upper base (reactor) becomes connection between all the systems across this planet, zero time communication, zero time, loving mankind and if we please the base the more powerful the system will become. (:54). Now maybe for those who would like to buy only 1 unit, why we tell you, you need 3. The forth is connection with the other systems to create what we call the SF to bring the change on this planet. As I said before, I am a very clever teacher and I know how to get you lot going that collectively we change everything together. It's no use just elevating the STM when the planet suffers and the rest of the creatures of this planet. It's exactly the same, you don't understand, but we know the pattern. We set it up and you not knowing it, you entered the cycle. You create that cycle that it leads to the next step. You'll find out that many of those who have entered in the first cycle of buying these systems, they don't want any financial returns. They are just happy that the system will free some people from pain, and it brings the condition that we bring peace. But we set it up this way. The forth is the connection with other systems and at the same time the 3 create the environment of the base of the SF as you understand. (:56). This is why when people come to us and say, I can afford 2 we say the KF will support the third one, because we know why we are doing it. We are making a starship out of this planet then we change the soul of the planet that we achieve our goal. Then you'll see all the souls will shine, be it the ants, the lion, the fish, or the man. And even the soul of this planet will shine. The light on this planet will look different from outside and even for mankind once it reaches that point. Any other question? Now you understand more of where I am taking you, huh. I am a Shepard with a sharp stick and I know where to hurt mankind, exactly like what we say, fun to be in. Any other question. Or has mankind ran out of questions. (:58). Q: John AZ. Because the Units are all made from the same source is it true that in AZ I'll have a connection in

China? Of course, how do you think I am setting you up. Q: Is it also true that I will be able to ravel to China, for example, from one machine to another? Silence. You got realize that John is our partners in AZ with 10 units which is going to AZ for the development of the T and it will be the beginning of the collaboration of the Chinese, what we call the development of the space T and as the AZ is the operation between the KF and the American authorities it will be the beginning of the peace. You'll understand very soon why we allow and go this way. AZ is the center for the next step in the space development with the American government, (1:00). and the Iranian spaceship program. We are bringing it in a very tentative way but the AZ center as John knows it's the beginning of the ?? space T which will bring the collaboration between the Iranians, Chinese, and the Americans. We need these kind of collaborations, not through the government, but through different arms of the KF. In a way, as we said, we start governing but people don't understand how we start governing. Thanks to John you'll the next, the rest steps, as John was trying to say, he wants to, "beam me up Scotty" to China. We have to watch where in China you are going to land. And if you land in China would you look like a John in the US or like a John as a Chinese in China. That's one thing mankind have to understand soon. And then it comes the position when you arrive in China, as you travel through the spaceship of the STM do you need to learn Chinese or do you speak fluent Chinese when you arrive, because the school of thought with the dimension of the position. Then you understand why we created U Council members. The travel through the dimension of the new system is exactly as I said before, when you arrive in planet Zeus you will not look like a man, you'll carry the STM and understanding of the current line of communication, (1:02). but you'll manifest in the dimension to a physicality, to a time and a place. Do you need to learn Chinese when you arrive or Chinese is part of the language of transmission of understanding the line of communication of the STM. Traveling becomes very interesting now, huh, John? J- I will pack a light suitcase. That depends, do you want Chinese clothing or American? ?? You'll be in China with American clothing, huh? You'll need the Chinese suit the way I have. I have developed a new Chinese suit and I got the tailor to make it. This doesn't work, (he said). When I made it, it was very nice. One day you'll see it I will wear it. ?? Chinese suit. You can still wear a tie but still you have a Chinese outfit. Any other question. Alzar- Morning Mr. Keshe. … (1:04). Have you got your wings back Alzar? Not yet. Are you still grounded? Ask the reason why. Should ask you? No, ask your soul. You are trying very hard to reach it. A- I think I already got it, I think I am going now, so it's not a problem. Q: In 303 (KSW) you talked a couple of times about plasma and you use your famous drawing where you make a bigger plasma and smaller plasma and the bigger gives to the smaller, you drew 2 circles, do you remember. You drew the bigger giving to the smaller, the smaller plasma, so what is given, because it has something in it, because with that it has enough, or it has something the bigger one needs. I was trying to figure out the analogy, say I want to make. Say you are the bigger plasma and I am the smaller one, and then I want to make "Iranian dish" so you have the lamb and I have all the other ingredients, vegetables and beans and salt and pepper, turmeric, yah. So if I don't get the lamb I cannot make it. But if you give me the lamb I have the other essentials so I can make it, then I can feed you. Does my analogy fit the picture? K- Two things first you have to explain to everyone what "Iranian dish" is. And secondly you can make it with ?? ?? substitute too, but it depends what gives you the pleasure. (1:06). But you have to

understand the only way man ever elevates, or any being in the universe elevates, is that he is humble enough to accept that he is always the smaller plasma even though he might be the bigger. This is the point of maturity, then you always have a position to find a position in respect to other souls. It doesn't come out of the arrogance of being a bigger. It comes out of the humbleness of being always weaker that I can elevate (the other), to the position of the bigger. It's a very tricky job. It's like being a professor in mathematics and trying to teach a 6 years old boy about 1 plus 1 and trying to understand why he makes 2. I see myself a lot of times in that position where I can teach you everything, but you have not learned the facets of being 2 and how 1 plus 1 makes 2. There was a time when the soul of the Messengers met. (1:08). In that process every soul of every Messenger was trying to show his humbleness. Sometime very interesting happens when the meeting of what we call the prophets of the past, they realized they only shine when they are in the presence of the Creator, and then they realized that they all shined the same. From that point a decision was made, that to shine on the humanity, the STM on this planet the same. One day mankind will understand this. Then one day mankind through the light of the path will come to shine as one. That becomes the humbleness of the soul of the totality. Then if mankind is looking to elevate and as John said, is looking to travel to China, and then in the time of trouble which is pending for this planet, the planet will find the totality of the new position and the position in the U. There is a lot of misunderstanding about how man needs to live. When I explain to you on how you transfer yourselves, (1:10). into the spaceships of the U Community, when they have been here with what we call the spaceship, should come from the humbleness of the man wanting to be elevated and not getting strong enough to be pulled. It's a misunderstanding of the human race. As I said many tomes to Caroline I have come here to taste the love in the dimension of physicality. The beauty of loving and the beauty of those who possess that love to be able to share with. If mankind understands this, the STM is already elevated to be a passenger of the U. To many of you these talks look like a talk, but very soon you'll go through every word of it, what you missed, because you see part of it, you'll be hungry to understand the rest of it. Don’t look for the translation of physicality, understand the position it brings for the elevation for the STM then you'll become what we call the travelers of the U. Then you'll understand what it is and how it is. It's understanding the position how you elevate the soul, (1:12). and you allow that soul to understand its own weaknesses. As you heard last week, I invited Def Florescence to join us to finish the book on the patent, (one of the) KF what we call K Seekers wrote to me, Mr. Keshe how can you do this, he has done so much damage. I explained to one of them, he was born to do that, that was the destiny, by elevating you, the position of it. It was a test for those who are going to fail not for those who already succeeded. In so many ways, Def Florescence always used to say, I am here to protect you, that's my job. By setting up all these things he protected the KF and the work of the KF from those who could harm, without him knowing. Because those who were true K Seekers ignored the ?? false calls, those who ?? the K Seekers to gain something for themselves without contributing to humanity fell in the path. In a way he has served a purpose and now it's time to finish the job. It's understanding the position which counts, not the ?? possession. We haven't come here to gather the souls, but to elevate them that they find the path themselves. Otherwise we'll be another religion, (1:14). or what I call building and temple. We made the knowledge for the temple of the STM to be within the man and not

within the block, a house that ?? steals the energy, Church and the Mosque. If you go to the city of Seoul in South Korea you see something very funny. The first time (I saw it) I could not understand, but after it was explained to me, it made me laugh. If you walk around Seoul, or when I was there a few years ago, you see a lot of red crosses like a church cross on different high-rise buildings and I asked the guy, what are these. he said, these are churches. I said, what do you mean these are churches? These are ?? rooms in the high-rise blocks that the Christians use as a church, because they can't build anymore churches the way we have it in the West. Now God is on different elevations in different floors, distance from the earth itself. Some of them are on the 50th floor and some are on the 10th floor. Now the Church and the path of belief has already found its way into space T on different floors and doesn't need to be attached to the ground. Mankind has already taken the first step to become the Christians of the space dimension, but they are attaching it to what floor, what we call high-rise flights or the blocks. (1:16). I wonder if those who are on the 50th floor or churches on the 30th floor have achieved that higher elevation of the soul or is it only in the dimension of the physicality of a red light, as it is in Holland on the red light district. Prostitution of the faith of the god in the name of the cross. This is what we'll come to understand, mankind has to be enlightened to the truth itself, not by putting God in different dimensions as it suits him. And I wonder how many crimes have been committed in each elevation? Soon mankind will understand. Any other questions. Q: Mr. Keshe can you hear me now? We always hear you, but sometimes we try to ignore you because you go to far, one way or the other. Q: Mr. Keshe I haven't asked questions for so long so I want to ask you. Yes, because they cut your wings off. … Q: SO the way I see it, when you say there are a couple of … when you say somebody's soul is a beautiful soul does it mean we have ugly souls? No, but you have the soul which doesn't understand the level of giving. (1:18). Q: because if I am correct the way I see it is like this, like right now. … K- Let me explain the psychology behind … let me explain what Alzar relates about the Iranian food. Actually this food to her analysis of the understanding. In the Iranian culture when we make this it's call "gorbasabzi ?? " it means when you fry everything that it can last and you only make these when you have a special guest. This is the cram lacrim of the Persian cooking when you invite the host. This is the time when you give everything. This food has a special psychological what you call, lock in the Iranian mind. So that's why Alzar analyses with this thing because she wants to give everything. The mind only works because it works in that way, that I want to give everything and I want it to be the best. You'll find out, we went to housekeeper who used to work for days to make the best gorbasabzi when their guest comes. And you can smell it for miles. And when it's cooked in the apartment at the bottom, the one on the 50th floor can smell it because it carries a wild herb, that goes everywhere, and it stays on your clothes if you come from a house which had that, they say, oh you had a gorbasabzi. We carry the essence of the pleasure of the food. So now you understand why Alzar keeps on connecting to this. Carry on Alzar. Mr. Keshe I smell it here in Sweden. (1:20). I'll give my address to Alzar to send me some. Carry on Alzarjan. .. Q: When I look at the physicality of the human, imagine in there is a concrete block, everybody is in a concrete block, the soul is inside of it, so it can shine, but if you make that physicality soul like a glass, then you see the shine of the soul, because the soul still shining but it's in a concrete block. … It reminds me that everybody is looking through a window. If you see a warehouse of a thousand kilometers in diameter and in

this warehouse everything is available to all of us, but each of us sitting in this wall, concrete block. And each one sees according to what we think and what we think and feel, have only 2 maybe bricks removed. If you look at Trump the block from his wall the only 2 bricks that are removed are power and money, so he sees through that window, but he knows of he understands that he sheds that wall, everything, money and power, more then beyond the power and money available to him, but he doesn't have understanding and each of us .. No, let me explain, you chose the wrong person for analogy. A lot of people don't understand why Trump behaves this way. (1:22). If you understand or try to understand the behavior of this individual, it's very simple, he had a very successful father and his success came through the dominance of understanding the totality. He has forever from the time he received the inheritance and before, tried to say that he is better then his father. This is what most of the people don't understand about this man. He's a failure in understanding his own failure. This is a pattern with successful fathers and we see the same pattern with the failed sons. You have to understand why this man behaves this way. He saw himself from childhood as a failure in comparison to the father and everything he does he is trying to prove to himself that he has more power then his father did and he can prove to himself he achieved more. This is what people don't understand about this man. I always say a father who made the business because he had to make it, he knows all the tricks, all the ways, he has mended his ways to become successful. Eliminating the failures or being able to hide them. A son who has just seen the successes never understands how to mend it. (1:24). That's why this guy, no matter what business he does he fails. They say, how to you make a millionaire out of the farmer? You start with a billionaire farmer. And this is that farmer. This man has no understanding of the truth that he is a failure. His battle is not with humanity, it's subconscious to prove to his father that, I am better then you I became a president, now I can show. But in fact, his presidency was in totality the failure of his work. Before, if you see he has brought his nation to the same point of failure, as its businesses. All the big businesses flourish with the first generation and 80% die with the second generation, because they don't know, they have (only) seen it, but never ran it. And 95 to 98% of the businesses die by the third generation because they are just interested in spending the money and not how it was made. This man is a test for the Americans to find out how what you call, a failure their nation is to the nation and they made a failure out their nation. It's the same way, we'll see this in China in the next two generations. The families, the son's of these 30 millionaires a day that's built up, most of them will loose everything and the nation will take a dive. Because the soul of the ?? working is not there. Don't ever use Trump in your analogy because, (1:26). this guy is just proving he is a failure by trying to prove that he is better then his father. He has done nothing else. If you look at the whole of his career, he hasn't achieved anything. A battling inside to show I am better then the man who made me and this is the point of his failure and he hasn't understood this. The rest of it is monkey business. ?? They cover his failure after failure. His battle is not with humanity it's with the soul of his father who created him, who was a very correct and successful businessman. The rest of humanity is paying for a failed man. He's battling with the soul of the father, but in fact he has destroyed the soul of a nation for his own misconduct and if you put him in a concrete block, open it and make with glass, you can't change it, that soul is what we call entangled to the point of trying to show he is better then his father ?? his own nation and has reached the point of failing the human race. People don't

understand how much this pulling to his father has done to him ??? He brought us to the verge of a world war. He will not be the president next time unless ?? goes with the polls. (1:28). We look into the next president of the US if this time goes right to be a woman. She'll emerge in the next election or she'll come in as the vice-president and then move into the president's position. Q: … Say my physicality is 100 and my soul because I put it in this block is 20, but if I let go of my physicality and let it be 20 but my soul becomes 100 then I can shine? Oh, you are so wrong, that is exactly where your soul. If your physicality is 20 then your soul is a million. Q: … if my soul is 20 it's going to suffer? It cannot be, your soul is the creator of you, it cannot be weaker than you. Q: No it's not weaker but I put it in a way that it is not shining like in a cage? No, you can't look at it that way. if you are looking at it that way. When you have a sun that shines with all its might, it radiates all its field, (1:30). when it comes in touch with a weaker earth it shows the beauty of its light. Do you understand. It's the presence of the weaker which shows the beauty of the stronger. If you look at it, the earth is the size of a speck of dust in respect to the size of the sun, but how does it come and shine so beautifully when you get the daylight. The sun needs the earth to confirm its existence and through that point the weaker shows its beauty. I hope you understand Alzar. those of you who don't understand, ?? means my life. It's the gratitude towards existence in ?? language. ?? means life, someone I share my thoughts and my life with. It's a time of communication. Okay next question. Q: .. Can you tell us a little more about Marianne Williamson who, (1:32). who runs for the presidency of the USA on a politics of love. It looks like she prepares for a healing of the American soul? You have to understand the most wounded nation on this planet is the American nation at the moment. We say in French, the French women in the last century didn't have the money to buy the rogue to make their cheeks red that they would look healthy, because red cheeks was a sign of healthiness, they used to pinch their cheeks to go red because they have used the makeup. This is how the American state of economy and life is at the moment. By pinching themselves trying to show they are healthy but are not. The nation needs to look inward to find out what it has done wrong to the other nations and in that process ?? study of itself for the sake of to be loved by the others. If you speak around the world, and there were some statistics done, the most hated nation on this planet is the US at this moment. But the Americans don't want to understand it. A survey was done by what you call, those who understand this that no nation ever has been hated and despised as the American nation ever on this planet. The amount of war they have created, mayhem, and abuse. (1:34). Maybe there is a need for such a person to bring the nation to understand. It needs to be allowed to heal itself. Not out of arrogance but by loving other nations that they love ?? come back to them. Look at across this planet how South America, go across East Asia, Middle East, through Europe, Ukraine and the rest of it, Yugoslavia, we have seen in the past century a trail of murder and killing by one nation. As I said very recently, high level bombing has become a pattern of high level bombing of killing themselves and maybe there is a need for this platform for people to be conscious of. If Americans get to know what and how people think of them, how they live with them, Americans will not do what they are doing if they are conscious that it is important for them to be loved. Look at many how many orphans sit ?? nation after nation, Afghanistan, Iraq, Libya, most of the South American and African and far East nations, there are more or less no nation that America has not carried out murder, (1:36). and how do you expect this nation to move ?? to

reach it. Maybe there is a need for it. On the other hand ?? nation understands or very few trying to carry the rest of the nation, which is heartless, to love. It is estimated that 80% of refugees, orphans in the past 60 to 80 years is directly caused by the Americans. But the governments do not tell that to their people. Then you understand what is about to come to this part of this soul of this nation. Maybe they would like to open a platform to try to raise ?? ?? together but (sorry about this I have a very bad flu). Understanding why and where this nation is going. You have to understand they are 3 or 4% of the total population on this planet. They are the most bankrupt nation and by fear and tyranny they have caused a lot of mayhem trying to show they are a superpower. The whole thing is that sooner or later it will collapse. It cannot hold. (1:38). This is what I was explaining, if most of the people understand what is about to come in the next few years, we see the beginning of it. Cryptocurrency. Cryptocurrency if you look is how much I can mine and how much I value that mining. But the next step for Cryptocurrency is how much am I worth for the time I put and who is prepared to pay my currency. In a way without the banking system realizing, individual evaluation of the cost is coming into play. I value myself, I am a street cleaner and without me you have nowhere to go. I am the office cleaner and with the cleaner you work in a pile of god knows what. So what is important for me is how do I work, and this is my bank, my Cryptocurrency. I like to live a comfortable life, I like to have a house and car, then I start valuing myself, maybe a million dollars because without me you can't have it. This Cryptocurrency which is taking place by imaginary mining will change into the reality into the world of ?? of himself and what we are prepared to pay for it. More and more we'll see this. Then you'll understand why we brought in the Keshe Coin. (1:40). A point of reference, equal everywhere you balance it off. This is why we don't allow K Coin to be speculated on. We could see this, when I set this up I could see this coming up. then would we be prepared to buy any American Cryptocurrency, individuals, because they are the cause of so much mayhem. What we call individual Cryptocurrency according to our worth in contributing to humanity. It's inevitable, because what we call the actor, President of the US took the backing of the greenback from the gold. You can do whatever you like. Now we saw because of that, years down the line, Cryptocurrency came that we value who digging, what we are digging. Why should I rely on somebody else to value what I can buy from. I what I contribute, what is my value, how I value myself and others will value me. We see a change, soon in the next 20 years we'll see this change. Now there is nothing ?? back, this is why I was saying that BRICS is taking so much hold, it's trying to bring into realistic value of the nation according to what the nation contributes to humanity towards its structure. (1:42). We'll see this, it's the evolution, this is the time when, what, how you give to me through your soul that I can exist, that I can give to the others, then the Cryptocurrency becomes nonsense. But we that phase coming in. Individual Crypto currencies. Surgeons valuing themselves, this is my value do you want, this is what I want. In a way it becomes valuation by bartering the essence of existence, then everybody will live a normal life. You have the food to eat and everything else, because then through your own Crypto currencies you can give yourself loans, credit buying. This was tested in a very wild way in Iran and we saw the results of it and it created a mayhem for awhile but they got hold of it. After the Iranian revolution anyone could open a bank, anyone with power, any Ayatollah, Mullahs, anyone could open their own banks and have their own printing machines. And they printed, if you wanted to buy

a house for a million you opened with me and I printed and gave you the million, so you have the reference of the bank to do it. The government finally realized after years that all these different sections have their own bank and they print what they like and it added to the speculation of the prices in Iran. So if I wanted to buy a land for 10 million my bank just put a paper in there and signed for it. (1:44). This is what will come, how we value it, can we accept this bank, or this Cryptocurrency from a bunch of people working on a computer chain, or working on ?? effort this is how we set up Keshe Coin. Now you understand how far advanced we are in this ?? That's why we said in the KF in time, everybody will be paid according to the K Coin, what do you want to exchange it. Your worth of the money never drops it's always the same value anywhere you go, and do we need to pay, or we balance exchange. You work so much in a factory, you value yourself, I can't go bankrupt because your valuation dictates what you can get for other efforts from the others. You watch the valuation of the imaginary mining of Cryptocurrency to the reality of the effort of the man encrypting and developing in his own way to serve people and how he evaluates himself. Then you'll find out that a lot of street cleaners will give themselves the same wages as ?? because they want the same comfort as we expect to give them, without them we can't drive down the street. When I used to be in the world of business I used to give annual bonuses and my rule was very simple, the bonus gets cut right across all the workers the same with the management, ?? Because they thought they were the cause of all the success. But I always told them that if that lady wasn't there to clean your office you couldn't even ?? somebody to tell them you are successful. Her cleaning your room or office or your toilet so that people coming in ??? (1:46). is hers not yours. If mankind realizes this we'll enter a new dimension. This Cryptocurrency is the beginning of why do I have to buy something when I don't even know ?? encrypted. Encrypt my value. If I do a surgery this is my value because it gives me the life that I want and then you find out it's to the point where everybody has what they want, gradually you have a mayhem ?? then they reach a point that everybody respects and deserves life. Then with the new T we offer, then you understand do we need the dimension of physicality and the maturity of the man will come. Any other question. .. There is a point which we want to bring into the discussion of the KF K Seekers. As you know the KFSSI, the teaching section of the KF, finishes tomorrow for this year. Next semester as we go from January to January we will change the pattern of teaching. We are looking for participation of K Seekers in research and development and in the process of learning more from each other. We participate in different ?? in different projects which is your interest. We would like to start with 5 or 10 topics. (1:48). How many people would like to be part of it. We'll set up a structure for you to be participating inside it, which means as K Seekers you have been what we call undergraduates, now you have become the graduates, now you become the post-graduates of doing research. Some of you like to do the theoretical background and some the studies in the KF in respect to what the topic could be, or some are the practical ones want to make something to show it can be done. There is room for everyone. We'll post the link are topics of what you would like to research in, what you would like to do with that research, what you bring in, and we'll put it on the KFSSI page that groups of you who would like to meet join in the research and development. In that process we'll go into the higher level than just making Gans's and MaGravs and maybe in that process if the team decides they can go and do whatever they like to do with the KF with their work. We have to go this way,

that we encourage new enlightenment in knowledge and a new understanding for the K Seekers. the group can come and report in the teachings and take steps in what they want to do. With this process ?? take over , KF research and development. If you want to do theoretical work on what the KF does a group of you get together and integrate it or make systems, (1:50). for application, you are quite welcome to join in. The next sessions ?? finishes tomorrow for this year, is research and development. It doesn't have to be a physical system, it can be an understanding of a process in trying to achieve something, which has been something that could not be done before, and understanding the totality. It's like if you ask Alzar, she wants to know how to make a tooth that you don't need to drill it and whatever. Make a team of people who would like to understand how to grow a tooth. ??Go through the teaching for understanding what ?? Dentist understanding and make a project of it and we'll see at the end of the year what it is and how it is, and may be you'll want to develop a T of systems or pieces that you can prove it and then we make it and can send it to Alzar and she can test it on her patients, or other dentists. Or you want to develop a new communications systems. We have to go into this phase. What we'll see in the coming time is that many governments will start teaching the new plasma T from the first years in the school because they are realizing that this T taught and changing the minds of those who were taught (the old way) from the beginning and it's getting hard. We'll want to look at how we setup the education pattern of the future in the schools, for those of you who are education minded. How should the books be and the education side, if that is a project for some of you. How do we develop the first systems, (1:52). and tools that they understand the position of the soul from the beginning. We don't need to let them go to the Church and the Mosque and they lie to them. ?? ?? Anything which could be ?? If you are a KFSSI K Seeker and you have a common chat room put it on the Chat ?? Then see who joins, you can be part of 2 or 3 different groups and bring the knowledge from one to another. It's more or less hands on research and development. If you make one group it doesn't ?? if you make no groups it doesn't make any difference. If you see it that you want to develop these things go back into KFSSI and put your idea and see who is prepared to collaborate and how you want to do it. It goes the same way, you can come 9 to 5 to discuss it with want you to do and see how many people join, and setup. If it needs we'll make different classrooms at the same time, 9 to 5. The energy group, scientific group, the ones who want to make a dental equipment, and we allow it to grow in that platform and you can go to any of the platforms to see what is going on. Maybe you can bring the knowledge from one to another and we'll see it. If you are a KS or want to be one in KFSSI join the research and development. It could even be utensils in the kitchen or something you can imagine that can be done in the house and you can make such a tool, or we have such a ?? Then at the same time in the process you might learn something about Gans making and the rest of it. (1:54). If you need to understand and progress it, please go to KFSSI and try to put your ideas and see who is joining different idea groups. and if one or two people you can keep on doing the research and keep putting in there ?? maybe somebody finds it. In the Thursday teaching we'll try to elevate these topics that other people might not know and want to join. They'll join the KFSSI and add to their knowledge or they'll bring part of their contribution or they've done something and they want to increase it. One thing we are trying not to do is to make people who become dominant and they try become the heads. This will not work. We'll block these things from now on. As you've seen very recently, they come in

and nobody ever listened to them in their life and being heard, KF gives them the bold sense, now I am the KF, I do everything ?? if I am not there the whole thing collapses. They find out after 3 or 4 weeks there is nothing to collapse it but themselves. We've seen this quite a number of times, people who misplaced their own position. They come into the teachings and then we give them room to become a teacher. Then something, and they think without them everything falls. The KF will go for the life of the man. It doesn't make any difference. I don't think any one has done more damage then Red Circle and with he brought more ?? People don't understand how they were served by this. How governments started looking at (KF). Anyway the harm that was planned to be done has done more and brought more success and people. It's a point of judgment, people judging themselves. We need these points. But some of you who think you ?? just because you have been moderator in a couple of classes, now you can do whatever you like, now you are the god. It's in your imagination. I have always said to my children, a man with the knowledge ?? ?? with his life. A man with a title is a placard on the door, but once he leaves that door he doesn't exist. If KS understand this we'll progress very, very far. You're a Minster as ling as you are with that placard on the door, but on the street nobody knows who you are. Except for the knowledge you learn to serve humanity and be there to help someone. You don't carry the placard in front and ?? ?? and say I am a doctor. The strangest thing is, have you ever been on a flight with 2 or 300 people and somebody nearly has a heart attack. What does the airhostess do? Are there any doctors on board? Nobody knows who you are unless you stand up and say I am a doctor I can help. (1:58). It's the same with the society of man. Unless you are a doctor and have the heart attack yourself. That happens with a lot of people who miss positioning themselves and they come and position ?? ?? they need the freedom to go and show their beauty. And you find their beauty becomes their demise because they were false ?? If you are KS and you want to enter the world of research and development and meet internationally with all the KF ?? and if it goes further in the physical research and development at the site ?? ?? Put your name in the KFSSI and what you want to do, try to explain that these are the things that need to be done in this part of the first year. You can extend it to the 2nd or 3rd years it doesn't need to finish, but unfortunately we have a very bad problem with KF is that we have no papers that we can produce, we can't afford any papers to write that you have a PhD or Masters from KF. Any other questions. There is something I have to tell you, hopefully we'll launch it today, but the KF team is stretched to the maximum. They have been working around the clock. Next week we'll open the store of the KF, the products are ready and we hope to go to day but there are some points left … new products with a catalog. (2:00). All the products will have CE and American certification ??
Please try to understand we are trying to convert new T to new products that you have never seen before or you have seen and we elevate to new dimensions. As I said, we'll keep our prices to 9.99 to 19.99 for the new first range and if you go back on top for the other products. Everything in the first batch has been kept to that price. The only thing we have is the shipping which is sometimes more then the cost of the product and this is what we are trying to fine tune to be, at least we find the priority, it's the same with everybody else who ships but now that we have ?? ?? you can buy a new pad for 9.99 or 19.99. All of our patches which used to be crazy prices, now we have going on we have allocated a new product. They are all brought to the reach of every man, unless we go to direct distribution, that will happen. I have made a distribution where ?? Italy and we put

the products at 9.99 in all the chemists shops. This I will explain to you ?? come. We make sure that across Germany, Spain, France northern Europe we can keep these distribution to pharmaceuticals. I have a long standing relationship with one of the biggest pharmaceutical chains in the world, Europe and we are speaking to the Board of Directors manager and they are prepared (2:02). to look at the new products of the KF to be in over more or less 50,000 pharmaceuticals across western Europe. These are old friends. Now that we have taken over we'll make sure that everything will be at the margin they and we can run and gradually we'll bring it in. It's the product range of the Pharmacies. Everything will be that price ..
… there will be a section for cottage industry.

(2:04).
… We want to build it up like an "Alibaba" of our products …

(2:06).

.. We'll start building the platform and it will take years and cost a lot of money, but this way if you want a patch or something locally … We put this on and we saw one of the Brazilian groups said, oh he came here to steal the T. How can I steal the T when I gave it to you? You are stealing, and then .. (2:08). We don't need to steal we gave it to you free. It's your responsibility to what you added to the knowledge, then to put it back in and others can enjoy it. You don't have a platform, you might sell a few pieces, but the KF website is international, millions of people come and go. The more we put them up the more it grows. It gives us the people to live off. We came to a misunderstanding by doing this a long time, but when I spoke with the Portuguese group some weeks ago, then we realized that many Portuguese were giving the certificate by Kevin Blunder, that by agents, and they used this. When we got it analyzed it by Rui, what do you call it, the then UC member, it was their only way of living. If ?? the knowledge of the KF has become part of your living to feed your family, let us help you to have a more comfortable life that you get a bigger exposure, maybe more orders. If you were selling 10 pieces a year and were getting something off it, now you'll be selling a hundred pieces. We are not jealous, we want to support you that by you putting more materials in the market it becomes known and part of the culture. I have has the pleasure of coming across people who have used it. (2:10). Because they have seen the benefit of it. We had the pleasure to be with government officials very recently and as a man of medicine in the position of government, he said I don't need you to explain it, I already use your Pain Pens. It's that level, your talking the highest level in government. We don’t need explanation because we already use your T. It's not my work, it is your work. As KS ?? let's do it together that we can support you. If you have your own website then link it to KF ?? Make sure your products are legal they are correct. I am sure in the future you'll make ?? ..
(2:12). .. This allows a new cycle and it shows in every country. People come in and they want Gans .. Make sure you deliver and give the benefit to the people so that they can come back. We have seen a lot of misconduct in Brazil and I sure there is in other places. One person who thought she was the center of everything, now we hear talking about everybody that she becomes the only one. This shouldn't be, we are all loved and looked

after the same. This process has to stop. If somebody buys from somebody else in your country, encourage them. ?? Because … Don't work to destroy the others which has been the habit of the man. Build on it and then you'll find that you develop more. ??? .. I know there are thousands of people in China that sell Gans's. Then you see the prices then nobody can go and do crazy things, but it has to be correct and in a standard position that we all can benefit by it. We'll try to .. if something delivered is not to expectations be prepared to get it back. ?? and build the relationship across ?? (2:14). …. We'll expand it, this will take a year or two to get it going …

.. We'll provide data for those who work with the governments.
.. we need a lot of doctors for the EU.
(2:16).

.. Some people were asking about the jobs. This will be announced in Austria in January what we need… All the pieces for the EU will be completed in Austria and shipped across the world. (2:18). We need a lot of support and that channel will be opened up in KF Austria. ..
Any other question. Q: What about the Plasma Times will there be more issues? They are already done I was talking with Ella, we have been so busy with so many other things, it all needs to be done …
Since I came back from China the KF is expanding very slow but very solid. That we can handle everything. …
Q: Can you ask of the Conservative or Labor would be more KF friendly in England's general election today? (2:20). Oh, that's a very loaded question. Let me explain what happened in 2015 the British Health Ministry called for a meeting of the health ministries of European U in respect to the KF. We are aware of it because I was informed of it. They made a tentative decision that it was a cottage industry and when it goes up enough then the governments will look at it. This was initiated by the British government. The application of the new T will come through the health (side) of it, that's what we show, especially the new Enhancement System or Unit (EU). It's such a big elephant that nobody can ignore it. You have to understand what it means. We are coming in the path of space T, it's to be developed for space and this will go the same way. We need to extend and KF work is known by all the European nations and most of the world governments. It has reached the point of international recognition. You'll understand very soon what that is. We setup the conference in Vienna and then in Brazil and into Malta. We saw a lady from Italy who came to Austria, she wanted to show her magic but we didn't allow her. (2:22). She went back and wrote a lot of rubbish out of being despised that she couldn't show her magic. It had nothing to do with the plasma. We let this kind of what we call, stupid behavior, but in general our work through these conferences are becoming very positive. Governments are getting involved and the first MOUs have been signed. MOU with the local business people has been signed and now we move in better understanding with the governments. We see the benefit of what we started in Vienna. ?? very few diplomatic core who attended brought a lot in the background in one or two cases we are working on. We have reached our target, no problem. Our next meeting in Malta in January will bring another ?? We are targeting diplomatic connections that they hear but we are targeting governments and they see it. You'll hear about the KF in the last

2 conferences and the one to come. We expect a very positive results from Mexico, we are also going to Kenya to complete. We have reached agreements with German government to most probably setup the first factories in Bavaria for helping the country. We have been to the ministerial level and we achieved that position. .. We are looking for a conference in Philippines. (2:24). We have very strong Philippine groups to talk to the KF to setup a conference that we can and be there to bring. … We are looking for the Far East to setup a structure and in the Persian Gulf. You'll see very soon structures setup as a manufacturing in the Persian Gulf. These direct communications with governments has given us a lot of opportunities for the new systems plus these conferences. These conferences will prepare the nations for the next one, while we are in then we go back. We were in Brazil 3 weeks ago for a conference and then when we arrived we were asked to extend our stay, which we knew when we arrived that it will be extended. We were allowed to stay with the BRICS groups and our talks and negotiations with BRICS groups was very good. We see the next step, and we came back to Brazil on a solid base and building up the connections to confirm and then we" see the results of it very soon. We are dealing with governments, KF with what we call, individual basis by your work has been completed and still developing. What we have done in these countries have given us opportunity to negotiate with governments. One of the first things we do is to put everything on the table in respect to the Belgium situation, (2:26). that they have to make a decision. It's very positive and they understand. The government doesn't go to read because they know how it is setup. As we call it, it is colonization through technology. Before they used to raid the countries and colonize it. Now they try to control technologies so they can control the others and this has to end. It has come to an end. The governments have started to understand how the game is played, and we have a very strong support in the European Court of Justice. Our appeal is directly to the government of Belgium and not individuals. Because the structure of the government destroyed documents and the judicial has falsified documents. So somebody inside has to have such power and who is the one who covered it up. The government has started seeing it. Don't forget we have pictures with the king intimidating with the queen and it's published. When a king and queen sit down for an hour and a half and ?? a scientist, governments can understand because we have pictures taken by one of the supporters of the KF who was in the café when they ?? us taking place. We put the whole thing on the table, documents from the people who were present in the court and have an affidavit. Our case in the European Court of Justice is solid. We'll see a lot of changes and the governments are taking position in that respect, they are ignoring all the things, but it shows the weaknesses in the structure of colonization by T by killing scientist. (2:28). We are engaging governments and the first thing we do is we put the facts, that we have been committed to a false, what you call documents, all the documentation is there, they can see it. What is interesting the same case number in the court in Belgium, the first one says terrorist, and the only thing they changed when the Americans refused to accept me as a terrorist, they said he was a scientist. They used the same court case number and they changed it to fraud. This is the amazing thing what the stupid Belgium's have done. They should have made a new case as a fraud or whatever. They used the same case number and they changed the terrorist summons into fraud. This had alerted the Americans very much in how it's done and you'll see it. They played with everything. We have submitted these documents to the European Court of Justice and it's amazing. They tried to drag it

on for 2 or 3 years, the longer they drag it the more it gives us the chance for other nations to see into the operations into the collective between the Belgium's and Americans, how they have killed many scientists using Canada as a point of arrest. It will be very interesting how it is emerging and then you understand they ?? ?? in the same process. R- There is a lot going on now in Canada specifically how to interact with China in that regard, right now. K- Well yes because that is why the king of Belgium has made a recent trip to Canada they are looking for sanctuary. (2:30). They are looking for a place to abdicate and because they did all the crimes between them and Canada and the US. The Belgium monarchy is looking for sanctuary in Canada. If you look at the report he was there very recently, out of nowhere because the hope. R- There is talk of other monarchs that want to settle in Canada as well. … royalty refugees across the world. They're going to need their own refuge because the people may not be happy where they happen to end up. K- You have to understand Canada has been a collaborator in assai nation of scientists and stealing of T from scientists with Belgium and US. R- Yes, absolutely. Now they think if they go to Canada they will have a sanctuary. They will give them. The next step in the European Court once we go to it, we have enough evidence for 7 other scientists that have been murdered through the same process. That will take into the Human Rights Court of Justice in Dan Hag. There is no government. There is enough evidence of the direct connection. They are trying to preempt what might happen to them before hand. .. there has been no Belgium monarchy visit to Canada for 38 years. (2:32). It's a bit dodgy when you make a trip so fast. It's not just monarchies there are other presidents who are in the same position. .. I was kept in Canada in the airport, jailed by the Canadian customs or the police. The guy said, I get my instructions from Hillary Clinton, she'll decide on your destiny not us. It was very interesting, I think the time I was there, there was a conference, a G something, they were all there and they panicked, there was an Iranian nuclear physicist there. And Hillary Clinton has the say, and you saw what happened with her, go and see what she made ??? for the same reason. She is in a bad state of mind and mental condition today. She ?? ?? carry ?? These things happen and it's working together. It's good for humanity to reach a point of justice. I can still ?? in Canada. The point of it is how many other scientists have kept silent at the point of intimidation and arrest and stealing T from. This can not be one off, we were one of many and it happened over the airspace of Canada and that is why when I came to Mexico I thought it was a safe transit through Canada. Now we don't do that anymore. We take direct flights to South America. (2:34). I go so we don't have to go through criminal states. My advice for everyone is to avoid the airspace of Canada that's what they do. I have been a victim and Huawei is another one. ?? Canada has become the point for stealing T and capturing scientists and developers. It's part of the process of the human race maturing. Any other question. You are rubbing your hands I think you are cold. R- no I was just relishing your answer, I like that thank you. It is a little cold here but not bad. Q: What will happen in April and what will come in 18 months? We are trying to negotiate with the Iranian government to show the space T in Iran the 19, 20, 21 April. The T for it is available and after January now that I have finished with the medical side, it's going in the hands of a very capable man in the KF to see it through. We'll concentrate on the environment and the space T which ?? worked, and the rest to be, our target is to show the EU simultaneously in 4 places around the world, AZ, China, Brazil and Iran. (2:36). This is important for us that the T is shown simultaneously across this

planet. At the same time we go to the space T we developed, it depends on how we tune the system. ??? illness or elevating the STM, producing materials or becoming a spaceship, or ?? energy. It's a universal system, it says on it, it's not a name it's a functionality. In the U ?? rotates ?/ creates energy, food, life and everything else. It's called, Universal System. Now we understand more. In 18 months time I'll leave the KF as I am today and I'll go back into research and choose a private life. In so many ways, Christ did the same, he completed his mission. We are not here to claim a position of power we are here to elevate the STM. I'll take ?? towards research and development, like many of you lead the life of it, and joy for it. ?? new life. This is what our plan is. ??? that speed of development is so rapid, (2:38). that I think it's time let the man to walk and see if he falls to ?? get up. We are not ashamed, ?? to stand up ?? push it and guide it 20th March ?? my date to leave the KF. 24

(2:46). Because of the high temperature you pass the point of melting in a rapid heat, so you "evaporize" it because a single atom of it is a vapor of it, in a gas state, and then because of the immediate environmental coolness it goes back, but it can't take the molecular structure, it stays in the ?? then in the next process you spread the ?? individual to singularity, on its own and not being spaced with other elements other atoms. So Gans is an accepted T we don't call it, a lot of people call it a plasma, because plasma is direction of the fields, but the Gans is the source of the fields, it's a sun. It's understood by scientists very correctly and rapidly. Q: Is there any influence by our "Twin Star" in us and in this creation? Yes, continuously and scientifically a group of scientists lead by a well known scientist very recently, in the past decade or so, has shown that the cycle of what we see, meteorite showers that effects the condition of this planet, spanning the whole of the solar system, is when the "twin star" comes in too close of a proximity and puts pressure on the plasma of this solar system and pushes materials towards the center. Yes it does. ?? Check the research papers and you'll find out. (2:48). Q: And is that why we see a lot of elevation in the human knowledge, because of that? No, this is a, not really. Because according to this research which fits and actually shows the cycle of how often the twin star comes close to us. It goes back to the position with the dinosaurs. It came through that cycle of closeness. It has a pattern and every time they come close we get a higher shower of meteorites crossing back to ?? It's just like a balloon, you pressurize it so everything moves to the center. the closeness, when they come very close they get to this, but due to loss of a lot of their fields, both stars to the galaxy and due to pull of the galaxy ?? now this solar system and its twin are closer in the center wing of the Milky Way, we call it, they'll be pushed (together) and they'll merge and that will create a position of, what we call, 2 stars sitting each other, or becoming one. But that is in the future. It's inevitable, ?? factors and environment and as you have seen higher level of meteorites moving towards because of the pressure on the boundary of the solar system. We have noticed a lot of bones, we call them dinosaur bones, (2:50). because that position changed, the position of the planet.

(2:52).
(2:54). I know some of you couldn't get tickets to come here because of such short notice.

… Q: Tesla erected his towers on the same earth lines as the Giza Pyramids, is this like the halo around the head, (2:56). where the universal fields entered the planet? K- What? (repeats) K- Not really. ?? decided where the ?? going to be and they ?? bought of him. Q: Seven sages in the ancient Sumerian texts are holding a bag and a crystal pinecone, is this the stronger giving to the weaker projecting the universal fields to elevate the soul like the KFSSI Enhancer? I don't know. It depends on how you want to interpret these things and we can't interpret just to be for the benefit of the KF this and that. R- There are a lot of things in that could be taken any way. K- A lot of scientists have taken it according to their understanding and a lot of people as scientists developed things they never understood. (2:58). Q: Arthur from Attenborough. The blue light spaceship you saw, and ask you if it was a field spaceship, did the UC make it through their soul or is it a reactor type spaceship? We had it last night again. yes, I videoed it and our head of KF in Brazil, we are all in the same place, he did the same. Let me see if can send it, that's his recording. I'll try to foreword it to (3:00). Rick. .. Q: was it with the (rainbow) rings? K- It was exactly the same as before … He took one at 23:10 and 32 minutes past 12. It was there for several … Q: I think Brazil has many activities in that region? I don't know. Q: I think there and Mexico they have a lot of them. … (3:02). … this should be with you on your chat Rick. What happened we saw it last night, it's the second time we see it in Brazil. It was there for about 2 or 3 hours, but this will become a norm and you'll see, it's very hard to record on a camera. These are what we call field center systems. (3:04). This will carry on with us in every nation we visit as part of our international conferences. (Shares UFO video). You see it at the edge of the light. It's very faint because you can't see the circle. … No this is not a faint ring, it's a full spaceship, you see it. (3:06). When we were in ?? Sienya when the universal charter was getting written, around 2 o'clock in the morning, we saw a full display. we were with two families of KF and we both could see it. It was a beautiful display. 31

.. The original or the first flight system any race makes is a copy of the earth. If you noticed we already done that with the Iranian space program, because the Iranian reactor is that ?? Some cultures 100 of years relied on 1 reactor. (3:12).

(3:16).

(3:22).
(3:24). … Lyn is the head of the KF China. Q: How does the hot plasma interact with the cold plasma, I think maybe he has a wrong understanding, can you explain how plasma might interact to create hot or cold it could be more easier to understand? The heat is a state of matter of the plasma. Plasma has no temperature. When you call it hot and cold, it ?? created (3:26). out of heat what we understand as

Any other question. R- We need to let you know. We'll see you next week, we'll be on another point on this planet.
(3:28).

Bye, bye.
(3:29).

END

307th Knowledge Seekers Workshop - December 19, 2019

(Keshe Foundation web shop opened with a lot of new products and low prices of 9.99 to 19.99 Euro and cheapest shipping, Ella goes over products, About those who betrayed the foundation, Iranian officials asked directly if he is the Messiah and he says yes we are all messiah of our own soul, The Day of Judgment is everyday to Do Good Think Good Act Good, Don't allow others to steal from you nor you from others, The diseases of the world leaders, Tehran conference Knowledge Seekers will stay with Iranians and not in hotels, The No War Treaty to be signed by every country, The Ayatollah who brought Iran to focus on advancing science and technology to make Iran the leader in new technology, The Vatican and Rothschild's family financing wars around the world, Project list for new KF research in the coming year, Saudi oil refinery bombing was the use of the technology to return American missiles headed for Tehran nuclear facilities back to sender, ,)

English Transcription:

(:10). … KF web shop is opening up today.
(:12).
(Talks about KF products …)
If you have an idea bring it in and we'll finance it. …

(:18). .. We'll be a part of the products in a big way.
(:19). Ella takes over about the products.
.. Our products embed the Gans technology into the products. ..
(:20). I will explain one by one the products in the store. 9.99 to 19.99 Euros.
Ankle Gans Gel Pack. All the products are CE certified.
(:22). Gans Eye Mask. …
Foot Gel Pack ..
Each of the products is 19.99 Euros each comes with a carry pouch ..
(:24). Head and tooth gel packs. Knee and elbow pack
(:26). face and eye masks . Migraine Ice pack. Multifunctional large and medium pack, this replaces the pads that we used sell. The T changed and this one is much more versatile.
(:28). Multipurpose pack 19.99. Knee pack. They can be heated or cooled according to the need. Shoulder and neck pack. Re-stick-able packs .. (:30). They stick to the body so you don't need straps. .. 20 new products added to the store.
.. the Universal Enhancement S Unit we need on the top. The USA Shop will close as of today. It will cease to exist. We closed the Paypal account on it. (:32). It means that all products will go through one store or to the KF Austria account. The whole process of returning the KF, restructuring, every product you see in AZ USA Shop will be

transferred to the Austrian account. All under one shop. You still have access to all the products you wanted. …
You'll still have the old Pain Pens etc.. will still be there. Now the product range has increased. The new T-shirts will be launched next week.
(:34). .. the delivery stays at 30 to 90 days, all the goods will be shipped in January in 15 days because the stock is kept. We have purposed a large volume and held it in stock …

(:36). .. Around the world looking for new products and the sales team will be backed up once the Malta headquarters is set up …
Are there any questions on this section before we go to the next one.

(:38). .. Ella has been working to 5 AM this morning. You have to understand that the KF staff has become very small but very effective and we'll build it back up to the way we want it. ..
We have given the distribution out of the KF hands into larger international companies. We'll take the best option and best possible way that we can ship. (:40). We have set up more or less the same structure as Amazon and Alibaba. We'll delivery goods into international warehouses and it's there taken over. All these holding and handling by KF is more or less will come to an end in a short time. This is why we have become very efficient and have managed to slash the delivery prices drastically. So sometimes you'll see the price of the delivery is the same as the product. The only reason is we managed to reduce the delivery costs from 30 to $40 per piece is gone, it's finished, We have brought it back to around about 9 or 7 Euro .. This international organization set up has allowed us to work this way. Ella as the head of the KF has been working relentlessly with all the KF teams to bring these things in. Especially thanks to the Chinese team. The head of the KF in China, Gaun Lynn has also been working relentlessly to make sure everything is on the dot. Chow is traveling all over China making the guarantee of the products and new products … KF has spread to special groups and teams. Now this way we control our initiative and the products are done by the teams we set up. We'll produce catalogs that you can go through very fast. (:42). As I said, when I come in, those who betrayed me will not exist. I am by tradition a trader, set out, and I told you when I come in there will be no one. Those who betrayed in Italy, there will be no job left. I'll go to 4.99 and I'll make sure the salesmen go door to door in Italy and around the world ?? Those distributors who thought could go faster, we'll take it one by one. Why should people pay 120 euro for the same patch they can buy for 9.99 or 19.99. We'll not supply any distributors unless they have made a new agreements with the KF. If you have signed a contract. These distributor contracts should not operate anymore because these agreements are with KF Austria and not KF Italy, it has died. They killed it, but it was good for us. It opened our eyes to a lot of things. these products now are in the hands of international distributors and international warehouses .. The minute the stock reaches a certain level you'll see, "on hold" (on web store). If the stock is not available it will not be sold. The pattern that it was kept and then trading people, but it's not there, and then 2 or 3 months waiting for you to get your goods, and then switching to another company is over. We'll make sure the new distributors of the KF stay the way they came and not the way it was set. The margins are very short but the reality is we will capture the market. (:44). We'll go a different way that I brought in 30 years of international clearing houses,

manufacturing worldwide (experience). This is what I did for nearly 25 years when I left university to back the work and the research and unfortunately I left it to the people to do, and they thought they took, and now you have seen what we delivery. This has been my game for 25 years and you've seen it. I can go to 1.99 and I still can make a profit. I am a ruthless businessman when it comes to business those who betrayed me will beg for their life, bread on the table, because you betrayed the KF. We'll go internationally across Italy promoting the KF materials and ?? retail shops. I come from that background. I dealt in millions of items, not a few, and if they thought they went and told the others that, we'll turn the KF over, Keshe is stupid, now we see how stupid you played the game . I don't let any one betray the KF it's my responsibility as head of the KF, that the KF goes okay. Holding the stock and taking money in the name of the KF and then switching to another company. Match the prices and delivery. I told you that when I come back I'll come back heavy. The only thing is the suit of scientist is full time since 2002, the suit of international business and stocking factories across the world, it goes back to 1981. This is what you didn't know. Return your BMWs back to the dealers you won't be able to pay your bills. (:46). Then we'll go internationally with it. …

(:48).
.. I am a man with a business background with a huge ethics, when you put my name and didn't deliver the goods that the KF gets a bad name and you promoted yourself. The only way left is one way, close the shop, clear what you did, and how you betrayed the KF, then we go ahead. Now you see how that patch, 9.99 to 19.99 delivery price brought in where we can control and we're an international franchise, we subcontract and it's done. It's not our worries anymore. Try to touch the KF once more like this you will see. This is what you thought, he was a stupid businessman, no. I trusted the people who called themselves K Seekers. (:50). And now you see, more products, 50 to 60, everything you have on your websites, as those who betrayed me, I match, 10% to 15% of your price. Go and check who I am, I run one of the biggest distribution houses for 15 years across the world. This is what you didn't know, I supplied the biggest discount chains around the world as a supplier and they promoted as a discount to their shops then you know what I can buy. The game is over but at least it brings a dimension to the KF. Thank you very much Ella, Guan Lynn, Chou, the rest of the KF around the world, in Brazil who supported us , and Austria … We'll come back to what we do best, this is showing the T works. We have received enough order for the UBESU that we still go back to half a million price as of January and are more or less our books are full for the first couple of months and then we'll have enough orders to cover for the next 12 months. In this way KF enters in a very big way the whole of the clinical trials in every aspect. We'll try to increase the clinical trials if we have received it to the cancer research then we'll let you know if and how we get it done, it takes a few months to get the structure set. (:52).

.. In my teachings in Farsi in the presence of the Iranian officials of the government background, there was one question that was asked directly which has caused a lot of concerns and what we call, different emotions in Iran. As you know I announced that I am "Meethi" or what you call, Messiah and I was asked directly by the presenters if I can explain more. We are all messiahs of our own soul, the Day of Judgment, the final day of whatever it is, is everyday in our conduct and our products, as long as we don't betray our

own souls and physicality, then we don't betray the others of our ethos. That's how it is, the day of judgment. So we are messiah of our own. We were cheated up to now to say there was that day will come. Unfortunately the doing of the man doesn't create a code of judgments for God to bring all the men and one day and line them up and that will be it. The day of judgment for man will be the day, everyday and it's with the STM. Now that we have the knowledge, the answer to the religious Iranian leaders (:54). is very simple. I am the messiah as much as you are for your souls. The conduct of the leader have to be within the STM the correct way for himself and his nation, then the humanity. We are all "Methis" for our own soul and now that we know the position of the STM is and in parallel with the soul of the Creator, the answer is very simple. Go back to where we came from and understand the ethos of "zadosh", do good, think good, and act good. In that emotion, by doing it, you become the true man, and that lays the day of judgment every day because you judge your own acts of every act, the thought, the deed, and the action. You cannot betray yourself because that is where the biggest sin comes when you allow the others to abuse you, and if you accept it, then that is a betrayal. That is stealing from yourself by allowing the others to take. My answer to the religious organizations, be it Moslems, Christians, or Jews or whatever is very simple. I am the Messiah, I am the Meethi, but of my soul. You are the Messiah and Meethi of your soul and if you can live as leaders or citizens with understanding this and that you don't allow people to steal from me and you, yourself don't steal or do wrong to the others, that is the day of judgment because you have already judged it, before you become judged. (:56). If we learn this and if we do what we do the best way we can, we have already reached the Day of Judgment. The fancy time of ?? Mahesh, the Day of Judgment and Confession, is finished. Then we understand how the condition and position of mankind will change. As you know we announced on the 19, 20, 21, 22nd we will return to Iran for demonstration of the space T. We'll develop it to the point that it is and we'll show what's developed up to that point, and then we carry on. It's not that everything will be there, that for you, to start something which you fancy. Sorry about that I still have a very bad cold. In that level we go back to one point, we invite world leaders and what we call KF K Seekers to Tehran. As you know Iranian tradition brings home hospitality. We request from the KF supporters in Iran not to put the KF K Seekers in hotels and hostels but invite them to your home. (:58). Let them feel the knowledge and love Iranians. We break the sanctions through love and care and sharing of the knowledge. We'll organize planes to fly to Tehran with K Seekers, one or two thousand, it doesn't matter. We open the door of knowledge in Iran, in our homes and in the Iranian tradition. Ambassadors and officials will be invited and I have already asked the Iranian officials to organize a one and half thousand auditorium and maybe more, for the K Seekers and world leaders who come to Tehran. We'll be traveling with a plane with the K Seekers, we go back to Iran to being a revolution of knowledge, the same way as Ayatollah Khomeini did from Paris. (1:00). Knowledge Seekers and the KF management team. We land in Iran to bring the revolution of knowledge, not political change. We land in Iran to break sanctions as One Nation. From the first of February we'll organize this, that those of you who are K Seekers, we meet in Tehran. There are no hotel costs or charges the Iranian K Seekers will be your home. All you need is a plane ticket and a visa from the Iranian embassy to say you are going for the conference of the space T. It is the responsibility of the Iranian government to make sure this conference takes place, and to show the beauty of the

Iranian T and science. We are not afraid of showing our T, we are proud to show how advanced we are. Knowledge Seekers and Iranian KS who developed and worked in different aspects will be given the platform to show their T. (1:02). The Tehran conference is the point of change for humanity, where we share the love, care, the knowledge. Let them sanction themselves. It's the responsibility of the Iranian KF to organize this that it goes smoothly in conjunction with officials. We are coming to Iran to bring a revolution in science and humanity and we leave the governance of the nation with those who they trusted. Iran will become the center of the new knowledge, as head of the KF that's my job. We invite the American scientists to this conference as much as everybody else, we welcome. The flag of Iran as well as every other nation will be next to each other, as equal shares of knowledge and T. Then we build the new space center and the new structure. Until that time we'll extend the T as much as we can and in Tehran we'll show the T as we can. The Iranian scientists will work with all of us to bring the change and the rest (1:04). and the rest is in the hands of what we call, all the KS in Iran and who handle the affairs of the Iranian KF to organize this to go smoothly. We have to make that step to bring the change, that we run this planet through knowledge and peace and sharing each others love. We ask the Iranian KF KS to take the KS to show them the love and how life is, not in hotels. The change and the beginning of the change for all of us has to take shape and it has to take shape by those who care and know. In understanding this we'll try to speed up the teaching and in collaboration with the Iranians that in the Tehran conference we'll see new dimensions in everything else. Those of you who are responsible for the Iranian teachings and the rest to make sure all the farmers who are using the T, and all the universities which have used, and the Iranian space T which has developed by the Iranian government on the back of new technologies will be what we call the center piece. (1:06). We don't hide the T, that we show it if they attack us, we show the T that there is no need even to think to attack. We show the beauty of the T that it is power, that it forces nations who have been war mongering, will be ashamed to do. The KF with the Iranian KF support team will change the course and this is our job. These war mongers have had enough chance. Now it's time for peace. As I said there will be no war but we have to show what is the new way. In our conference in Mexico we'll sow more technologies. In our conference in Malta mainly we are there to set up the center for the KF worldwide. In Kenya we'll do the same and in Tehran we'll complete it as one unit. All the KS across the world we invite you to Tehran. In that process we need to understand, we'll show you what has been made to be false sanctions will be the sanctions on those nations who created the sanctions to enforce war. I will ask the Iranian government to facilitate for the KF KS to be given a special visa. Freedom to see Tehran and freedom to see Iran, (1:08). and at the same time, as I said to the Chinese when we were discussing about the space T with the Americans, and they said no. We said, but they are the KF KS and are American and they said, yes that is acceptable. We'll go the same way. We bury the flags and we make one flag which is planet earth, One Nation. Those of you who are believers of the path of Christ and you were waiting for a Christmas present next Wednesday on a Christmas Day, you have received your present, the promise of peace. It's a gift that no one could offer up to now, there is no more war, as we said, as we promised now we have to show the alternative for peace in a very rapid way, otherwise, as you know the men of Adam get bored and cause themselves many sins by eating the apple of the wrong kind. We have to take charge to sow the way the peace

will come and what are the peace dividends. What rules and laws do we have to operate under for the new T. We don't engage in claiming and working for peace, (1:10). we create the conditions for peace with the new science and T, with the collaboration with the scientists irrespective of color, race, or religion, or position on this planet. We take charge with the distribution of this new knowledge and T and showing how this new T can change all our lives. The Iranian leadership has cancer, ?? leadership has Parkinson's, Chinese leadership suffers extensively from Parkinson's, German leadership shakes publicly with the Parkinson's, all leaders and their families all suffer from diseases, in which the new T can give them the pleasure of peace of mind and body. It will be interesting to see if we can get the German leader in Tehran to walk in the machine and come out without the shake during the conference. It will be nice to see the Turkish leader with his cancer to walk out without it. It would be nice to see if other world leaders and their families find peace through the knowledge that it brings peace to the nation. (1:12). It will be good to see the British Royal Family with all their diseases become normal human beings through the use of the T. The peace conference KF Tehran is a knowledge peace conference where the knowledge will be shared and displayed, but the prerequisite is world peace and delivery of the world peace. If the Iranian government officials try to block, I will play the game of Messiah. Then we understand who carries the true claim. We'll open the borders as I said in the talk before, we opened the Iranian nuclear transparency and it gave us peace. This time we open the transparency of the knowledge with the ethos of the KF and we'll achieve world peace through the knowledge in sharing the pieces of knowledge. The launch of the UBESU was for creating a peaceful condition, not for others to have a better life to live longer to rob and steal and abuse longer. We can gather as much wealth but the wealth of the health is something no one has mastered. (1:14). Now through what we call the enhancement of the STM, through the body, through the T, we change the position. Registration for the Tehran conference will open the first week in January. Names will be given to the KF Tehran to facilitate who will stay where and who wants to show the hospitality of the Iranians to the rest. We'll come from all nations, races, colors and background and it is the responsibility of the Iranian KF supporters to make sure that no one stays in any hotel, but in the hotel of life and the love of Iranians for the people of the world. We take charge for the peace because we are the only ones who can deliver it through the knowledge and T and as One Nation. The responsibility of seeing this takes place falls on the responsibility of the shoulders of the U Council. To make sure the peace conference in Tehran, the peace of knowledge and stability is your responsibility. It means the U Council has to make sure that everything goes smoothly that the knowledge becomes the background of universal peace. We have entered a new phase and when you establish peace you have to deliver it and protect it, (1:16). and see facilities that everything is more or less can be done and is the responsibility of the KF K Seekers to see the finances of the war, which have been used, is correctly transferred to be used for peace. We have to show that the finances that were used for defense or whatever, now has no room. We need to get the signature of, No War, at the United Nations or at the meeting of the KF leaders and ambassadors in Tehran. We to get commitment that no nation enters war. You have 4 months to work. Today is the 19th of December, January, February, March, April. But we have to give something to make sure that man doesn't have and will not go into war and that will come from delivery of new technologies in the coming weeks and

months. It doesn't mean that when we get to that point everything will change. When we get to that point it will be the beginning of the change. How we can show them to increase the harvest, to give the clean water, clean environment, how the KF KS can show all the beauty of what they have created and what they can create (1:18). The Tehran conference is set for the world leaders to sign themselves into a No War condition. It's not a peace treaty, it's a No War treaty. We commit our nations and ourselves to no war and to peace and the expenditure that has been going on the war to go on the peace through application and development of the cultures, the nations and in the direction of world peace and opening of the U Community to humanity. We need commitment and it's the job of the U Council in the coming days to draft up a no war commitment by world leaders and their governments. World peace and no war, man has signed himself to taking no actions that will lead to war. Then man will come to be at peace. We need to understand this with the new T as we've seen today. We don't need to fight we just have to find a solution, that those who steal if they want to fight have no room to exist. The Tehran conference will be the beginning of the steps to what we call governing. The Tehran conference for peace even if they ban me from entering will go on. (1:20). It is the responsibility of the KF Iran and the U Council members and the Earth Council responsible for Iran to start the line of understanding on how to set up this conference for mankind to sign himself to no war. I am sure the Iranian leadership will be one of the first ones to sign itself to it. The No War treaty has to become the cornerstone that through it we achieve peace. Nations signing themselves that they will not develop any war weapons, nor buy anything which can lead to or cause or give an incite to war. The no war treaty has to come from the U Council in conjunction with E Council. You have 30 days to draw up the draft, and to deliver it to every leader and newspaper and making what I call, the end of the UN. We don't need a UN when we are One Nation as we are united. (1:22). In a meeting yesterday in Beijing one of the scientists has asked if we can show the fields that we can detect. We will show a field that not only brings the change, but we can detect. The roadmap for peace is set, now the roadmap for no war has to be sent. Nations committing themselves to no war and to not make tools which can lead to creation of war. We are not talking about disarmament, we are talking about not making arms to be disarmed. Any questions. (1:24). Q; … Is there a new method or alternate methods to pay for products other then the wire transfer which many people find awkward to use? Now the KF has a Paypal, you can pay through the Paypal in the Austrian system and we closed the Paypal in the US accounts as now it feeds back into the account of Global. The Global has no operation with the KF retail groups. If you try to find a way to support the work ?? we'll find a way to ?? New ways of delivery will come in. In china we'll use the "We Chat". In other operations we'll look for credit card facilities and ?? coming weeks will be set up through our operations. All these need setting up and this is all part of the KF Austria, which will become the headquarters of the KF worldwide. It has become and in that process we'll try to expand it gradually and at the same time it's spread around the world, it's just monitored and operated through Austria. Any other question. (1:26). Q: What about the weapons manufacturers, the purveyors of death and destruction, will they be required to sign? What? … I think we'll come, you have to understand, look at the other side of it. When the nations sign themselves to a No War Treaty, do we need the manufacturers to sign as they'll have no customers. They are singed into it by it. You have to realize that the majority of the wars,

the conflicts around the world especially Africa, now where it sits comes through the financing through Vatican, and Saudi Arabia. All these radical groups was to understand, they all want, they will go and disappear. All these people who will claim to be the leader of different factions and attacking the Christians or Moslems or the Jews or doing the others will come to an end, because the governments will sign the No War Treaty, will force them not to supply them anymore. Our biggest problem sits with the Rothschild's family and the Vatican. (1:28). The Rothschild's family finances war and that's what they have done for centuries because they see it as domination and control and different factions of it breaks up into different governments. We see the regular administration is run by one cousin and the other cousin tries to better up and all sorts of games. This has to stop. One of our biggest problems is with the Rothschild's family at the moment. The Rothschild's group has financed wars through Vatican, they put the money in and Vatican uses the name of the soul to create wars. As we have taken the decision to elevate the soul of the world leaders and the Rothschild's family, it's for their soul to reach a point that they understand the time for change has come. Let's see if the Rothschild's group attends Tehran conference and signs their family into peace and not financing anymore arms. It's the responsibility of the KF Italy to deliver the No War Treaty to Vatican. At the same time to Ayatollah Khomeini of Iran. The same to the Saudi family which is responsible. The same to the two Rabbi's running of what we call Jewish state. (1:30). The same with the temples, Buddhists and the rest. The No War Treaty, not entering war because the cornerstone of them not financing the war. The biggest war from now on will be with the STM with his own, not with another man. The No War treaty has to be given to every world leader and the member of the U Council can sign on their behalf, if ?? The wish of the UC will be obeyed. Those who asked the question in Tehran on Monday if I am the Messiah, if I am the Meethi, I think we have answered you back in a very clear way. Any other question. (1:32). Q: What is the role of neutral in a plasma device be it MaGrav or teleportation? R- I am not sure if he meant Neutral or neutron ? … What the other question. Q: Nikolai, If KS have already sent their payments to KF USA .. ? Everything is okay, it's all in the same house in different ways. But the KF USA has to inform us what they have received. That account closes as of today. The link to it will be taken off so everything goes through KF Austria. … A lot of KS still pay through the old account through Holland. So no problem. All the KS have to go to Holland and not to Austria, it's all the same. It's all one family, it all gets used for the betterment of the KF work. (1:34). As you see many people who used to around the KF and were on the payroll are gone. We restructured the KF in a way that we work through project or case by case management. This is a decision taken by the head of the KF and she doesn't want to run it the way I used to do where we paid for people to be around. She is working on a vision basis that we pay as we need and when w need and we pay the best value we can get for our money for the KF. I used to work on the trust of the KF and unfortunately, Giuseppe (Italy) took all of it and behind it, Ben (Ghana), so from now on as Ella works on the direct way of running the KF, that decision is there. Everything goes on the project basis and we won't see long term people around the KF. We project it out, that will be the way if will be. In that process a lot of things will change and a lot of ways of the KF will become more efficient. Nothing in the KF gets lost, it just gets consumed and used for another purpose, project, target or what we call, advancement of the KF. I stopped financing the KF because now it has to stand on its own and it's standing good. It will

expand in new products and new systems. (1:36). It will develop more and more. New projects and new life have to come from ever development. As we announced, KFSSI if you signed and you paid your fee, you'll find out that out of nowhere you become a post-graduate student. We have asked the KS and KFSSI to line up projects that they want to participate in the next semester. We have gone from teaching to research and development, which means you to research and not just come here to learn Gans's, but what you want to develop and find the like minded people in the KF to develop that project. What I wanted to do today as part of the teachings is to ask the KS what topics would you like to research in the coming KFSSI new year. Each platform will have people to work together. We won't allow any one person to take charge of the research, that they can hijack. It has to be collective sharing and developing. Either way your work will be published or you'll have to publish it or bring on to the discussion table every end of term. The panel is open for you to suggest what you want to research. (1:38). New systems of space, agriculture, .. and how you can research it and then make a dossier of it and tell how you can develop it with a team that you put up (gather) to be with. R- In the K Plasma reactor group we created a project list for 2020 and we've got about a dozen potential projects Would you like to share it with us. …. Because we don't see, so you can put it on the screen so people can it and it stays recorded. These are some of the suggestions, You decide what you want to research ….
(1:40). R- reads Project List for 2020.
#1 - Understanding and replicating the first plasmatic Nano-coating interaction, the Coke bottle. …
#2 - Making the self-charging flashlight. Has there been a group that has seriously looked at that to replicate…
K- Where is the first flashlight that charges itself. .. It was one of the first things I was to show in the demonstrations. …
(1:42). There used to be a lot of discussion about the Coke bottle …
If you need on these teams something to be done, we'll try to set up a structure that they provide you facilities. Or these groups in KFSSI can meet together once or twice a year to see the results …

#3 is create matter from fields. .To actually create an iron plate from field interactions. (1:44). This is part of the transmutation from fields into matter T, creating just a simple matter from the fields .. K- There is a Brazilian group or people in a Brazilian Chat claim that they are part of the KF and they know the secrets of how to make materials from energy or something like that. Maybe they are a very good candidate if you can find these people. They said they are part of the original KF ?? in the Brazilian Chat. … There is something very funny. Red Circle ?? somewhere claimed that he is financing and working with the KF research. I would like to see that finance which matches the claim. We have never done any research with Red Circle and he never financed any research. It would be nice to see people who would like to finance these researches themselves ..?? okay I finance this project ?? like other commercial groups too. (1:46). …
R- There is more.
#4 - Understanding magnets, can we change the magnetic field within a magnet? K- Yes, good one. R- even with basic magnets …

(1:48).
.. can we use the knowledge of the Gans to change the magnet. Changing of the magnet through Gans or the plasma, not with current, we already know that. In Tagomax they use part of this T to accelerate … R- I heard a discussion of David Adair he talked about .. he said it should be a figure 8 like an infinity symbol. Like in your drawings. He is very much into rocket T.. recently invited to Iran to progress with this T, (1:50). and to help with their infrastructures. …

(1:52).

… K- One of the biggest problem is that Iran has to take the leadership in the new space T. R- I think this is exactly what is going to happen. (1:54). This is what I suggested to the Iranians a long time ago. We have the knowledge and the scientists, we have to take the lead. They took the lead of the wars and we have to take the lead of the science. This has been my suggestion to the Iranian leadership for a long time. One of the worst thing that ever happened is the way the system works that you are guilty because we said so, as we saw in my case with the Belgium's. ..

.. The situation before Huawei, the daughter of the Huawei was in Canada. If you go on the news a few days before that the top Chinese scientist who was awarded in Europe a few weeks before, (1:56). again, he was drugged the same way as me, and was thrown out of the window and was killed in US. Americans and the Canadians and some of the European nations have taken that step to openly kill scientists. It's the job of the Iranian government to give sanctuary to world scientists and through the knowledge to create peace, this is what I have advocated with the Iranian government for the past few weeks. Become the hope but do not use the T as a defense, use it as peace that we share it with everybody else. This is the position we have to change, the freedom of the scientists to travel, of scientists to come and go out of Iran, for T to credited to them as they developed (it). This is what is needed as a new leadership. This is what I said to officials, I take that position to bring scientists to Iran. And openly release the T, the development, the way we are doing it in the KFSSI. By creating fear they have created war. By creating trust and showing the T we create peace. We create that this machine, what it does, is not for the war. (1:58). These steps to take scientists to Iran is something we have been asking for years from the Iranian government. But when we go in the knowledge has to be open and not kept secret. As you know Iran has advanced heavily in the past 30 years, be it in nuclear, in Nano or in any other aspects. Ask yourself a single question, why. Many governments have changed. We saw Ayatollah ?? his idiotic behavior, we saw Ayatollah Rohani, we see the other Ayatollah's who ordered, who became one by one Iranian leaders. But they are just the front of it, the progress in the knowledge and T of Iran is n the hands of one man. He's extremely knowledgeable and extremely advanced in science and T. His Excellency Ayatollah ?? . The Iranian leadership sits with Ayatollah ?? and the T advancement of Iran, of nuclear processing ... comes from the insights of a man who puts science first for Iran. And it's AK who has done this, nobody else, governments have come and gone, but the pattern of development, of T sits with one man. The way he has supported scientific groups in Iran we'll see many more advancements. (2:00). My suggestion to the office of AK has been very simple that to

allow the world scientists, make Iran the center of knowledge and we see it start. By creating fear and sanctions they want to stop this. With the Tehran conference in April we break this. It's the beginning of setting up the space T through new T that it brings other scientists to do it. The sits only from the inside and the openness and understanding the effect of the new T on the life of the citizens through the office of A K. He is one of the most intelligent world leaders, we know of no other time ?? He has used the assets of the nation to bring the nation to a very high level through the team that works with him. The special groups within the structure of his office has the responsibility to bring the world scientists to Iran. It's not just putting sanctions on different Ayatollahs or whatever, you have to see how the background leadership sits, we have seen many presidents change but the development of the science and T in Iran is amazingly a meteorite going up. (2:02) The Ayatollah K of Iran is Russian back educated inside. This has given an intelligence of the understanding of the totality of the knowledge. Through knowledge and T you gain power and not through arms. This is what most people outside and even inside Iran don't understand. It's not a random buying and making something. The AK has set up a structure that fishes out the intelligence, the most unique scientists out of Iran and nourishes them in a hidden way, then the technologies come up. It's the responsibility of the Iranian government now to extend that to the world scientists and they have started doing it. Iran in 1978 - 79 had 90% oil dependency for its income. Today through the wisdom of the leadership it's 30 to 35%. Iran is one of the biggest exporters of T around the world. This is why the sanctions don't work, because Trump lives in 1970s that they thought with the sanctions on oil can paralyze Iran. Iran lives in the 21st century where income comes from knowledge and T by chemicals and everything else. My advice has always been to the people who speak to the Iranian (2:04). central office to show the beauty of the T, not out of fear when we have to, but in advance that it doesn't allow them to take hand. The April conference is to show the beauty of the knowledge worldwide in Tehran then world leadership in science and T will come. This is what is important. Today's KSW is important and opening a lot of things and you understand what we are talking about. People have to understand the true nature of Iran. It has and it will become the center of knowledge. AK has taken that lead when he took the seat of leadership. Nobody understood. If you look during his leadership we have seen all the latest T. The Americans ran from the Straits of Hormuz of the Iranian T. It is not by coincidence and it has been developing one after the other. It has to be this way. The counter balance for war and war mongering sitting in Europe and America, is the peaceful nation of Iran through the new technologies, to releasing and becoming a home of science. Iran used to be this way until in 1972 the peanut man decided. We'll see that many scientists will be attracted to Iran. (2:06). Iranian scientists will have to compromise as much as the world scientists to bring back a counter balance, a sanctions on the nations that create war, with sanctions on the development of new T which can bring peace. The teachings of the K Seekers has been and we have seen for months, is not anymore on making systems because I knew, I planned this change in K Seekers. The KFSSI becomes a home for new technologies what you want to do, but the home of the new science, the new space T will be Iran. We invite the world scientists to come in. You know the top scientist in plasma invite them to the Tehran conference. If they accept, let me know, I will organize it with the Iranian government that all accommodations will be met that they'll be there. When we go to Tehran we'll announce positions that Iranian KF scientists, K Seekers will all go

in full plane loads to Tehran. It's the responsibility of ?? and other nations to make sure the safe passage of the KF KS and world scientists to Tehran. How many peace and environmental (2:08). conferences, even the last one in Spain has faced failure, because they have not agreed to not make war nor go in conflict. When you agree not to go in conflict you already have found a solution for peace. We start with a No War Agreement. If you want to defend a land in the name of a nation, defend it, but you cannot go to war for it. We commit nations to peace because they have no wars to make. The same thing goes for the Chinese leadership. President Xi has to change the position from increasing the difference to increasing the knowledge for space, for T that we don't need to make war. In China there is a huge problem. The Chinese leadership cannot see the true developments in science because the leadership is surrounded by a bunch of scientists who protect their own interests and not the national or international interests and they are blocking the leadership to see new technologies which can be used for not creating war, but creating new conditions for peace. They are blocking anything from reaching CCP. All the heads of universities are there to block new technologies (2:10). that they keep their position. All the professors and military leaders who are in scientific development work in China in one way, not to show their stupidity ?? ?? but preventing the leadership from seeing what changes ?? brings. In Iran this is solved, the leadership of AK controls the new T around the world to bring in and they started doing it. This has to ?? ?? Putin has changed the position he takes a lot of new T into Russia in conjunction with the Iranians. R- Iran is currently ranked #4 in the world in Nano T articles right behind USA, China, and India. K- USA is stolen T. … The American Nano T most of it comes from stealing and killing scientists, we know that. If you cipher out the Nano T in the US it's all stolen papers, knowledge and T. The US has hardly any, very little. If you do the correct ?? the US should be around about 25 to 30. The US steals T and accuses others not to see. (2;12). We see it with the Huawei. One of the reasons they attacked Huawei is because they are too advanced in G5 and G6. they kidnapped a woman (daughter of Huawei), throw their scientists out of the window to stop so that they can catch up, which is opposite to what Iran is doing. It's bringing in to go more advanced not to catch up for the others to catch up with them. If you see the nuclear sanctions, the only reason the Iranian ?? ?? five plus one is being enforced is because, put it this way, it takes one American centrifuge to produce 1 kg, and 1 Megawatt, whereas the same thing in Iran produces 6 times more. This is the sanction to slow Iran down from advancement, but it hasn't worked. Iran advanced more now that the nuclear problem, what you call development for Iran is solved. All the finances now has gone to space and other technologies. We achieve what we,, as I said ?? in the FivePlusOne Iran gave nothing, and in a way Trump is correct, Iran took everything and didn't give anything for it. Why should we, we are in charge. We carry the knowledge, it is ours, why should we give it away. We can perpetual limit that it is safe for us and we can do, we are producing the isotopes which we are selling worldwide, we still are developing a new kind of plasma nuclear T, (2:14) we can sell it and export it. We gave nothing. Which was alright. The next step in the T has to be the same. Homegrown new T in collaboration and conjunction with the world scientists. Tehran will become the center of knowledge and peace. And the seed for it, as we said, by the present Iranian leadership of AK, people don't understand the influence of AK in the Iranian scientific world. Iran is the only nation that every year celebrates and invites its top scientists to a conference in Tehran.

Elite Iranian scientists coming from universities or wherever are invited and meet with them personally, every year. No nation does this. This is part of his work to encourage new T. This is why the daily running is left in the hands of the president. What we see, the chemical developments and the rest of it and everything else, comes because Iran has the security of the knowledge and we have seen it. The Americans bombed their way from what they learned in the Second World War, high level bombing for the past 70 years, 0ne by one. We've seen it in Europe, they did the same thing in Germany they bombed it from high. They did the same in Viet Nam. (2:16). They haven't learned, when you are incompetent then you throw stones. When you are competent you sit and talk logic and find peace. Americans find their way by high level bombing. Have you seen them over Iran, because they can go high, but we go higher then they do. They tried every trick in the book. It comes out of the knowledge and scientific T which is homegrown and developed by the Iranian scientists.

SAUDI OIL REFINERY BOMBING:

As you know very recently they claimed that the Iranians bombed the Saudi petroleum refinery. But did anybody say why did the Americans push so much. Go back to my teachings. They claimed the Iranians bombed it. They used every trick, they our armies at the disposal of the Saudis to do what they like with Iran. You heard what the American senator said, she said, excuse me, I am a military, we gave our commitment to the American nation not to be given to others. American military is not for prostitution. Why they couldn't do it. What happened in the case of the refinery? Has anybody asked or looked into it? Very strange. The rockets have American numbers on the side, they had American details on them. Do you remember what I said before, when a friend gives you a gift you don't need you send it back to him because he might have another use for it. When the rockets were launched towards Iran for the nuclear centers of Tehran, we have the T, we just diverted it and sent it back. (2:18). We had no control over it. Do you remember the old song, return to the sender, there is no such address. Did the Americans come out and say what the Iranians have done to them. They blamed the Iranians for their own rocket which the Iranians returned back. I told you this 2 years ago and I said to the Israelis, all these claims saying that it has come from Iran and it has been shot or launched by Iran, to the (Saudi oil) refinery. It came from Iran but it was a gift sent by the Americans which we didn't need. We have enough knowledge, it was sent back. But the Americans couldn't capture it. Is the world aware of the truth. Return to the sender, and this has put fright into the backside of the American leadership. The Saudis won't open and show. If it is Iranian then show the label on the side. It has American codes on it. We don't need the gift of a bomb we sent it back to you. If you have the technologies to launch it, then you also have the technologies to capture it. It's very much like a game of cricket, you throw a ball and you hope it hits the bar, but if you got a good batsman and you throw it back, it's the bowler who has to catch it that he doesn't loose 6 marks, doesn't it. (2:20). If it hits the boundary he's done. When the Americans launched these rockets to hit Iran, Iran had the technology, all we did is switched over. The Americans don't have the technologies to capture what they throw and then they blame others for it. If the Saudis come up. Why do you think the Americans suddenly opened (gave new weapons), we give everything to the Saudis because they knew they couldn't capture the ball they

threw. Now they blame the audience that they should have jumped in the circle and captured it for us and we get the marks for it. Advancement in the technology has given us a condition of peace. This is why we take the world central leadership to the U Council to Malta and not anymore to New York and the UN. The slaughterhouses of UN will shut very soon. The same with the World Bank and the IMF. The strength in the knowledge has to become the strength in the peace, not the weakness and the lack of understanding. I have said directly, show us the numbers on the side of these rockets they claimed hit the oil refinery. You'll find American codes on them. They tried to cover their face for shame of loosing the game. We have to bring the peace through knowledge and what we call, no war policy. (2:22). As I said, we have to close 3 or 4 loops and it will be done very soon, it is my wish and it will be done. We try to control most of the Swiss accounts and lock some other accounts, and Monaco accounts. Now we have to stop the hidden money, finances, stolen money from nations and governments who supplied these kind of things into United Arab Emirates. It has become a sanctuary for stolen goods, funds and paramilitaries. This is one of the last loopholes. We closed the Bahamas and everything else, at least we tried to make at ?? possible ?? The UAE has to open the books that anybody who goes in, where does he belong to and why. In that process it allows a lot of things to clarify and be clear what is happening in Iran, and how they are trying to play games with Iran. When I was there a couple of weeks, they said something very interesting, the Emirates expatriates to Dubai is 7 to 2, it means every 7 expats that leave 2 comes in. Dubai has gone on the decline. You could buy property for a million, now you can pick it up for about 300,000, because it has been 3 years since I left. I took everything out of Dubai. (2:24). Because its unjust and the same thing has to be understood that new technologies have to take place in the world government. Do you remember that song that says, imagine by John Lennon, now imagine all these funding for rockets and everything else and killing is transferred for knowledge to capture the space, to open space frontiers, to open communication line with the U Community. Can you imagine what a wonderful world it will be. This is what's going to come out of Tehran conference. We will not show the AK Iranian leadership as those who are war mongers, we'll them as those who set the cornerstones for peace for developing new T. This is why a lot has been hidden in public and why the sanctions are not so effective. With oil they took one third of the Iranian finance not the others. They tried to bring more sanctions against chemicals and every other sanction but now we are cheap and effective that now Iran's GDP export, it doesn't matter oil is just part of it. most of the Iranian oil export comes back for the Iranians (2:26). cars and refining. We hope in the coming time to use the Iranian education centers and universities and T for world teaching. We'll talk about it in the coming time. If you want to go to the center of excellence for space T see you in a few months or years time, you can find a place in Tehran university. Do you know internationally what they say MIT stands for? Master in theft of technologies, not MIT scientists and the work that comes out of it, originated there, it was stolen T. They sit on all the boards and sees what comes out, then it becomes from MIT and they try for the patents. This is what happened to KF with Ebola. They stole the T in the office of the president, 3 months later MIT, the same person who was in the conference, has published a paper as an American intelligent new T for Ebola. Find the scientist who published the paper and check his passport, it says Sierra Leone, 3 months before, as part of the world health authorization. Master in Theft, not MIT. (2:28). Carry on reading please.

#5 Simple Nano coated Cu scrubber as a water purifier. K- We did that, Armand and the KF KS we sent this with Ukoko to Japan. Is Armand there?
(2:30). K_ you need to add a little bit to this one, it's not just Cu there are those made of composites….
(2:32). Armand speaks a little. If you mix them with others you get a better result.
.. Can we put these on KFSSI so people can choose which topic they want. .

(2:34).
.. #6 Create gold from Tritium Gans. K- Please contact the Japanese embassy they'll give it to you. It's already been given. R- You've talked about that before …
If you like to start testing it.
#7 MaGrav windings adjusted ..

(2:36). In a meeting in Beijing we gave some materials to test…
(2:38). ..
(2:40).

(2:42).
#9 is exercises for emotion and breath. (2:44). It all ties into a need for going to space and control of our own spaceship our body and emotions. …
K- I have to leave in the next 7 minutes. So we'll come back to this in the next Thursday teaching for people to start choosing what they would like to do. Would you like to read the rest.

(2:46).
(2:48). Emotional dialysis machine. I thought that was a nice phrase. I think the emotional dialysis machine will come through the Enhancement Unit (EU). What I would like to invite a lot of KS to design projects around the EU. What do you want to see and what is the result when you change things. You can launch research on different application and position or whatever and in AZ we are placing 10 units and 6 of these are for medical application, the other 4 are part of the space research in which are inviting the American and Iranian scientists to join us. We would like to see what happens if you change some parameters. If you come up a set up and you want to see what is the effect on the emotions, production, 4 of these units are specifically for research, production of materials and all sorts of things like this. You can go to AZ for 3 or 4 months to test. R- We had a little brain storm before today when you mentioned some sounds that could be played when you get into the EU. That was offline. One of our Iranian scientist is a musician and I asked him to look into it. .. Use the T we have …
(2:50). If you look all the 12 here are practical purposes. …
K- KS in the U Council will do. and what ideas they come with on the spiritual and soul level and want to research and see or do theoretical research. R- we need more input. K- yeah, different topics. **We might have some news for you very soon regarding other aspects of the KF Global operations**, (2:52). and facilitating these things. Is there anything else. I have to travel.

(2:54). Thank you very much. R- One comment, man says he used this T with the African Swine Flu and it worked. Yes we know.
Thank you
Video
END.

308th Knowledge Seekers Workshop December 26, 2019

(** Adam as Creator, Eve as Daughter: (Best Soul Teaching - What went wrong on planet Earth and how to prevent it from ever happening again)

The Iran Conference you'll be hosted by Iranian families, Americans launched most advanced missiles at Tehran and they returned back and hit Saudi oil refinery shows modern weapons obsolete, The peace has begun, Iran to take leadership in spreading new technology, I have given you the best Christmas gift the Creator could give, the chance of peace and the opening of the Universal Community, 2020 was year promised for beginning of peace, Mankind has a ripple effect on the Universal Community, The true story of Adam and Eve is that Eve is the daughter and caries the creation further, Man first migrated out of Africa through Iran and now returns back, When you rotate the Gans it creates a soul of all Gans in the ball likewise the Tehran conference will create a new soul of peace for humanity, I'll retire March 2021, The conversion of energy to feed the man without killing, The Universal System is not just for man but all creatures in the universe will use this same machine, We are part of the family of the Universal Community and they are present here on earth, In your research try to understand the elevation of the soul and what the soul level creates and in which dimension of the universe, If Iranian G blocks the conference we'll change it through enlightenment, Mankind is ready for the change, Environmental pollution may be for some to go through evolution of the STM and allergies occur when one doesn't accept it, Rotating the Gans in a core you find the soul of it and that brings the universe to you if you match the field strength of the soul of the moon then your love for the moon will take you there, Gans is a portal to another dimension and can be used to spiritually awaken, Feeding the man directly through satellites,

Soul Teaching: 1:54: Goes deeper into meaning of Adam is the Creator and Eve is the daughter, The Creator of all shows his adoration and love for what he can create, his daughter, When man thinks of Eve as his wife he interacts and binds himself with the physicality, When you are just and correct in every sense you do not need a male and a female to create, the balance of the field forces leads to creation of new dimensions - called the daughter, When the daughter of the Creator appears the cycle of creation will be complete, He came to understand why Adam created physicality, When man falls in love with the souls of creatures of the universe they can only create soul children, The skin is the essence of the emotion and plant grafting, From singularity and in balance with each other we create the birth not in the dimension of man's thought, We need to

become aware that we possess the physicality and not the soul and emotion, In the dimension of the soul one sees the truth,

The world leaders go into the Enhancement Unit (EU) and come out knowing the truth, People who see the flashing light at point of death where the STM and STP fields interacting like daylight from the fields of the Sun and Earth, Being able to retract the physicality back into the soul and re-manifesting like at time of sleep, When you die nobody goes to the Creator as such you become part of the structure of the position of the Creator, Attachment can hold you to the physical dimension for some time, You cannot die before the destined time because the other souls have to make a position for it otherwise you would be stealing from them, What is behind the fields of the Creator - read Book #8, The Tehran conference is the beginning of the change of process as we have to reach billions of people and change a lot of things at the same time, We need the religious leaders to trigger it as they are the abusers they have to end it by becoming enlightened to the truth, (2:29) Mr. Keshe tells his story of how he matured and it took 3 times before he accepted his mission, "I decided not to allow my soul to be abused or my physicality to be lied to and cheated and the rest and when I took that step everything has changed", Becoming a physical life to understand how you can stop the processes in it (to fix what has gone wrong like on Earth), The Creator took this physical life that we experience here on earth so that He could discover what went wrong and to see that it never happens again in the physical dimension, What went wrong? - the killing, The problem is with the creator of the planet and the conditions it was created under, The mistakes of the past prophets like Moses was they fell into the dimension of the physicality and justified the killing, Mr. Keshe waited until he matured his soul of physicality through life experience to prevent any mistakes from happening this time,
,)

English Transcription:

(:06). Wish you all a Merry Christmas.
.. There are a couple of things to tell. Next weeks teaching will move to 12 C European time not the usual 9 O'clock. I will be traveling. ..

.. Every teachings more or less, different weeks, comes from (:08). different parts of this planet. We are in a different place today and next week, after the week after again different, .. then we have the Malta conference. And then the whole cycle starts. This carries on until April in the beautiful city of Tehran. If you are aware we'll announce next week, we'll open the booking for Tehran Conference. The Tehran conference as I announced in the Iranian teaching, Chat rooms on Monday and we indicated it last week will be a pivotal point in the world of the teaching of the T and the world of Science, and for us most probably the beginning of a new cycle. The conference is open to as many people as can travel to Tehran. We encourage the KS to attend the visa to attend the conference. The Iranian KF has been discussing it and been debriefed about the conference. **The difference with the Tehran conference is we'll try to organize that you only need a ticket to get to Tehran. the length of the conference, your stay in**

Tehran, will be handed over as much as can be done to the Iranian KF team, which means you will live amongst the Iranian families. You'll understand the reality of what we call Iranian culture, (:10). of hosting and the love of the Iranian nation. They have started the process. Hopefully, we can accommodate as many people as can come and in this process of 4 days of conference the total space T from the Iranian scientific point of view and the KF will be shared. Which means in the conference the Iranian teams have started organizing themselves to show the different aspects of the technologies they have or are developing through the space T. We have already asked the Iranian government to accommodate up to 2,000 representatives from the KF, the Iranian KF, Iranian diplomatic and the political scene of Iran. To the extent that the invitation goes to his Eminence Ayatollah K of Iran. As I explained we have reached the point of peace, as we see it with the new development in T **the war systems of the present time has become obsolete as we have seen with the American Navy, Air force, and everything else they could muster in the Persian Gulf in the last months, but they could not utilize it because the damage done by their attack on Iran was so destructive to themselves. We saw the end of wars and how the most sophisticated rockets which were targeted to Tehran, (:12). were scientifically and technologically returned back to the sender** as I said in my teachings before and accidentally as I said, do you remember, go back to the teaching, return to the sender, there is no such address. As I said when a friend sends you a gift and you don't need it you give it back to him. It depends if he has a use for it. When the rockets, the most advanced missiles were targeted for Tehran it was returned and it landed in the Saudi Arabia refinery and they could not find anybody else to blame except Iran because they, themselves launched it. So they got their own gift back but they were so embarrassed to say such a thing that as you saw they tried to get the Air Force to see if they can get more in, and they gave it to the Saudis and they couldn't do anything with it. **Because when the Saudis examined the wreckage of the rocket it had all American data on it. This is one thing the Americans could not tell to the public**, the refinery and the fire we saw in the Saudi Arabia, was a return of a gift. Unfortunately, the ball could not be caught by those who sent it as a gift, and it caused such a mayhem. This shows **the beauty of the knowledge and the T that we do not need to attack, but we have the T to make the present weapons T obsolete. This is the beginning of the peace**. In this process as I explained to the Iranian KF team, this obsolete (redundancy) of the weapons of the present time of the most advanced, has created the end of wars. (:14). At the same time it has created a new dimension that someone has to take the lead in the technological and knowledge of man in the advanced T. There is no nation better then Iran who is the cradle of the knowledge of ?? In Tehran we take the leadership in science and T on the banner of humanity. This is where the turning point comes. This is taking leadership by science and peace and not by weapons and murder and mass murder as we have seen in the recent past and hundreds of years by mankind. Therefore if any of you would like to come to the conference in Tehran to see the first steps in science and T of the space and change in the evolution of the science, the Tehran conference is the beginning of that cycle. As I advised the Iranian government officials, it's time to take the leadership the way Daruis and ?? Kush did. On this way, please go to the KF website and register yourself we'll pass your names to the Iranian officials for clearing your passage to Tehran and secondly we'll pass your names to the KF Iranian community to arrange and accommodate you on your arrival in Tehran. It means they'll facilitate you and the

Iranians will take you to their homes and most probably pick you up in their cars and you'll be taken to the love of home. (:16). We'll bring the change both scientifically and to the STM. We'll even invite the world leaders and ambassadors to attend the conference. One of the best ones will be the offer and invitation by the Iranian officials to president Trump. Maybe that will be the only chance he'll get to attain the Noble Prize for peace and maybe a path to the second election. Will it get, through a change of attitude. On this platform it makes it something very easy, it's the responsibility of every KF supporters and K Seekers to write and invite your diplomats, politicians, and your head of states to Tehran for the original scientific conference which will lead to a peace conference. How you go on the media, use the public platforms on the Internet, spread this invitation around the world and the success of it is in your hands and the direction set by the UC and Earth Council. The beauty of it is that we take the leadership as One Nation, One Planet, (:18). and as one race we guide the rest of humanity to the new path of knowledge, strength through the knowledge and T for peace. This is the message of Christmas for the humanity. We all have worked to this target, to this call and we bring it to this point. Every effort will be made that we can and do and the facilities to be made available that humanity starts a new course. Showing you technologies, showing salvation from the pains and problems of the past, gradually changing and financing peace and new T, then for war. Caroline asked me yesterday, do we need to go to Malta and build a center there, why don't we make it on a ship. I said, I thought about it already, but at the present time one missile can create us a lot of problem, but if we can push the world community towards the peace, maybe the most latest advanced naval warships which have anchored 700 kilometers in the Indian Ocean by the Americans, (:20). will change and become flag bearers of peace to go around the world instead of delivering bombs and rockets, they'll deliver new education in science and T. They'll become flag bearers of peace. It's very easy we don't need to dismantle them, it is easy to change them into education centers, into health centers and put them around the world to help to change and convert a lot. We'll make men of peace from men of arms. You have to understand that these people are highly educated most of the them, so in a way they only change their clothes into teaching, and culture and changing. It doesn’t take much, it just needs one man to open the eye of the man to the insight of the peace. We see the Tehran conference to be the beginning of it. As our webmasters open the registration for the Conference in Tehran the only thing you need is a ticket of love. We saw John sitting in god knows how many hours of traveling from Argentina to be in the conference in Brazil, and they turned him back, an old man in his 70's more or less, but the journey was there to make, because it makes that difference in the soul. (Take) this journey and come to Tehran, and when you go to the Embassy, write down we are going to the Conference of KF (:22). from the 19th to the 22nd, in the beautiful city of Tehran. As I said to the Iranian KF, if you invite, and one minister accepts to attend, the Iranian minister has to accept his invitation of arrival, which means, if any of you have a connection with a president of Prime Minister of your nation, or you can do what the Italians did in the Italian parliament when the KF Key was released, to invite and he requests that he wants to attend the conference, the Iranian leadership has to accept and be present. This is the international law of engagement by the world leaders. This engages many of us and this is the beginning of taking leadership in science and T and peace. It comes to one point do we exclude nations or do we invite all. You have to understand on arrival in Tehran and

on the availability of what we call the Enhancement Systems (EU) would any of the world leaders dare to take the step to step in. Would the voice of the man going in be different then the voice when he comes out, man or a woman. Or would we get into what we call the pleasure of the Iranian, (:24). master piece of work, what we call "tarruf", which means, 'you go first please, no, no, you go first please.' Let's see which leaders will take the first step into the new dimensions of peace by entering the Enhancement Unit universal system. Would they walk in because of their illnesses or would they walk in to enhance and elevate their souls, that by stepping out they'll reach a new level of leadership. Maybe on the stepping out would reach the saying of Bahuala who said, 'the time will come that no man will take the crown of leadership as they see each other as equal and in love with each other.' It's a very delicate point and in a very slow way, I have guided the KF and humanity to this point. From now it's in your hands, KF followers, supporters or KF or what we call, "anti" or whatever, let's see how we can bring peace through the knowledge and T. Just before we started I was explaining to Rick that I had a very beautiful but strange experience. I was in an airport lounge, (:26). sitting next to me was an American woman and on the other side of her was an American man. Very interesting, attention seeking, enjoying the presence of children as I found out later on that they couldn't have any children, so they enjoyed the presence of them. In my talk, he said he was from Washington. I thought a Navy man or National Security guy, his haircut, his manner of walking, very extrovert American as usual, but somebody connected to me through the haircut of the American military goes with them until they go to the grave. In talking he said, I am the first pilot who flew the F-17 and very proud of it. If you know, the F-17 is one of the latest man-killing machines of the Americans. I said to him in a simple way, with the new T all the present weapons T is obsolete. We have war, if we manage to create new weapons out of the new plasma T which has come up. He could not take it. He could not see what he worked on and was so proud of, hit the dust. Maybe this is the way we have to go, we have to lead. We have to understand that the world leaders need to set the new line of communication for humanity to explain the new advancement in peace and in equality of man through knowledge and T. (:28). Now you understand why I put Tehran conference at such a distance to build up for it. The Iranian KF have already started the work and they said they have a crew of 30 and can start and they have enough to be able to support such a position. You have to understand the Iranian mentality, as soon as you say you have a guest, they all invite the guest, then if you say he is a foreigner, oh, they are worshipped. When you get to Tehran, don't be surprised if you get smothered with love, kisses, and cares and thought of often, the best seats in the best restaurants and house in the city and are for you for the time you are in Tehran. It doesn't matter if you are a layman or a president. This will create a dilemma for the Iranian government to accept such a conference on such a short term or to take the leadership in science and T and the evolutionary development in the Space T. In the coming days and weeks I will be in touch closely with the Iranian officials trying to accommodate and for them to understand the position of the Iranian scientists that leading in Nano T in what we call the present rocket, nuclear and all the advanced technologies the Iranian scientists have homegrown, (:30). and lead the world in many aspects. Now it is time to officially take the lead and lead mankind to the progress of development of peace and T, and abandoning wars and conflicts. I wonder if our Hebrew U Council can invite the Israeli president to Tehran, or we can get the Rabbis to return to

Tehran where most of them were born and bread through their ancestors. Would we see the Italians to be strong enough to see themselves to be in a position to invite the Vatican and the Italian leadership. The Tehran conference is not just scientific but is a total science and T to create the conditions of peace. We encourage all the KF K Seekers, if you have achieved evolution in the T, let us know and we can invite you to present it. I hope we don't get the lady from Italy who wanted to show a game and then when we didn't let her show, she became everything wrong with the KF. These conferences are a serious point for scientists, politicians and diplomats to attend**. I have given you the best Christmas gift the Creator could give, the chance of peace and the opening of the U Community**. (:32). **2020 is the time of change and the time when most of the world leaders were promised, the beginning of the world peace, the beginning of the beginning**. As we say the best mark you can get is 20, now the mankind has got 2 of them, 20 out of 20. It's time to graduate towards them and it's the responsibility of all the KF K Seekers to work in this direction. It's not anymore somebody else might do it, I invite him. I invite the world leaders. I ask and request the Iranian officials to organize this function that we show the beauty of our T and the beauty of world peace and world order. I wonder how much and how far we can meet, as I said, by 2021, the beginning of the promise of the new life. The new soul will manifest which humanity and the U have been waiting for. This is what we said, and what has been the promise of the beginning of the time. Then we will see, **are we still going to kill animals to consume. Are we going to destroy more, (:34). to get advantage for ourselves for a short time and life span on this planet. Or we understand more that these small changes that we have done on this planet, whatever has had what we call rippling effect in the U Community**. Mankind has not seen as yet, as I explained once it's like a farmer who grows the fruit and to him it's just a box of fruit that he sells to go to the big city that he can have an income from that he can live, but that box of fruit lands in the palaces and on the tables of the kings and queens and the leaders of the world without him knowing. **Has it been the ripple effect of the man on the U Community and is it time for the farmer to understand where the fruit of his life work ends up. Has mankind been blind that what he has done, even wrong or right has had a ripple effect on the creation and the world of the U**. And for the first time he comes to meet and eat on the table of the kings. Are we going to sacrifice to cut the tree or are we nourishing the farmers work to bring more the delicious fruit but not for the king and queen, (:36). but for the whole nation that the tree becomes a tree of humanity. The apple which the Adam promised but as we said **the man has never understood the true story of the apple and the Adam**. As I explained, in the present history of man you say, the man or the Adam took a rib that it made and created the Eve. In truth there is more extension to this, the man who created the Eve, **the Eve is not the wife, but the daughter of the Adam, where he could truly love and where his beauty could be passed down to the rest of his own creation**. Now we understand the beauty of the daughter of the Adam, not the Eve. Mankind has always read the stories in half and maybe now you understand, why when the truth was given to the Jewish leaders, they gave only half a story and they said the blood of what we call, faith passes down in the woman, the blood of the woman, the daughter, from the mother, and from the mother to the daughter. Now we complete another mystery in the cycle of man. Now we **understand the true Eve is the daughter which is born to carry the beauty of the Creator, (:38). to be able to replicate and carry both the love and the**

physicality of the Creator. That is the time of the completion of the cycle of the truth. The apple was the love of the man for the physical existence. Now as we progress towards the Tehran conference we'll build to the next step, to the direction of not being interested in how the cores go, or how this goes, but we look at the total energy which this T will create in the humanity, a new blood line, new blood life, a new cycle, a new era, a new continuity through the daughter of Adam. This is the time of peace and the peace will come through T and no other way. A correct peaceful T which meets all the needs of the man and corrects all the path and the past. Many of us will come to understand this very soon and it will grow on us in the next few weeks and coming months, that the new promised beginning has started. We don't know any other nation or place then the nation of Iran to carry this. (:40). Going by the historical past when the man crossed the straight of Hormuz into the mainland from Africa, the spread of the human race across the Asian and American continent started just above the straights of Hormuz where the family spread. **So the land of Iran is the point where the humanity spread across this planet and so we go back to the motherland to where we changed**, we accepted the handover from the African Continent and **the size and time of the evolution started. In so many ways we are all Aryans, it doesn't matter where we come from** as if you are a Chinese or a Russian or American or European, the change and the position started just above the straights of Hormuz **when the water was shallow and mankind crossed into a new area**. It spread across the coast line and spread further up in the north ways. The Tehran conference is bringing back the whole of humanity at the point where they divided and where they started. Maybe this time from this point, again we start a new revolution which is dividing into space and we start the process of, we stop expanding across the continents of this planet and **we expand through our knowledge and T across the U. (:42). I am the Messiah. As I said to the Iranians I am the messiah of my soul and physicality and to me Tehran is where my soul will find peace** and knowing that the new generation of souls which come from it will carry that wish and message. It depends on you where your messiah takes you to. Do not forget **when you put drops of Gans's in the ball and it takes motion and becomes dynamic, it creates a common soul to become the soul of all the Gans's in the ball. Would with this motion we would bring man to that point, that the new soul of peace will be created in Tehran for all the world leaders and all the man at the same time**. This has been our wish and this is what we have planned. **The truth is we have come to that point, the point of maturity**, and the knowledge and science of man has brought us to this point, that we see no need for war as we have managed to match each other in war. (:44). If you think of it, when 2 animals fight and when they get tired of it because no one of them can win, they talk peace. When one thinks he is stronger and starts a war and he thinks he can win, and he gets stuck, at the end of it, he ends up at the table of peace negotiations. Mankind has been through all of this. Mankind has managed to master this thing, master the reality of the science of creation and **we are a lucky few that are born and will be present to witness this point of change**. Billions of us born in the past were wishing for it that they could see it, and billions of humans after this time will wish that could have been present to be part of it. The Tehran conference is a revolution in science and a revolution in bringing peace between nations and religions that they all agree that there is oneness in all and there is no need to cover it with different colors and races and flags and religions and god knows what all. As I said, we have just started. (:46). Write

to your world leaders and diplomats and to each other to arrange how many of you will travel to Tehran. We have a hundred thousand (capacity) football stadium in Tehran and we have a 10 room conference in Tehran too. You decide in how the mankind will go, we'll make it, power to see, or will we become shy being afraid of what we believe. Don't be afraid, if you can sponsor or you can make the way to Tehran, apply and go. Arrange the plane craft for 200 or 300 people. Talk to the tour office. The Iranian government and nation will welcome. **The beauty of it is that when you attend the country for the conference how can you put embargos on the nation**. Now you understand. Mankind by killing many in one go at Hiroshima thought that they had found the ultimate weapon of destruction, killing and power. But actually that Hiroshima bomb was the starting point of peace that everybody targeted to kill as many, but nobody dared to use. We saw it, (:48). 70 or 80 years down the line, **2 of the most powerful nuclear technology, one with science and one with weapons stood face to face, and they have come to the truth between Iran and the US. One not knowing what the other one has, and one being fully aware of what the other possesses, but both lethal enough to deter from use**. We have come to the point of stalemate in the world of war and this has shown the world community that there is time for peace. There is time that weapons can be put down. The only skirmishes we'll see will be between the Christians and the Moslems in and around the plains of Africa, and this soon will cease to exist. This is the war of religions, to see who banks more, and this will come to an end by April and onwards. When there is no more religion to fight for, but the unity of humanity and mankind. Vatican has collected enough, to put back in to humanity. Saudi Arabia has collected enough in Jeddah, to allow the humanity to enjoy a new cycle of life. The other world leaders have learned that it is time to talk constructively to change, and it is time to do a constructive work for their nations. (:50). **You won't see any charges on KF Tehran conference, registration, and as is tradition, especially with this meeting**, all your **registration will be given to the Iranian national security to be vetted by the Iranian security system, that we all know we are going there for peace**, and we all know that they know that we know it is time to talk peace. We don't match on the street, we gather to explain the new T that it marches mankind to peace. We encourage you to show us many applications and developments in the scientific world in the next 4 months using the T and we have asked the Iranian scientists to do so. Now you understand why I said **by March 2021 I'll retire because I will have achieved** what I came here for and the rest will be in the hands of the world leaders and KF K Seekers, U Council, and Earth Council to carry the wishes of peace from us. In a way we step down for you to start managing. I hope that was the best Christmas gift we could ever bring mankind. (:52). I hope you enjoy it and gather strength and unify the KF around the world to meet and work with the Iranian KF to achieve the world peace plan. The Webmasters will open a new Chat line for the Tehran conference world peace. **All of you can participate with it through "Telegram" it has the facility to translation in different languages and you can choose the one you want and it will be translated, then you all can communicate together around the world as K Seekers**. On this new platform which will be released, as we did with Brazil, there will be no allowance for disrespect and humiliation, or the talks about the politics and the world. The politics has failed, science and the wisdom of the man has taken over. We want you to use this platform to communicate with all the Iranians, Chinese and the rest as a common platform, as the Iran peace conference that it

brings us the unity that when we meet in Tehran we already know each other, in so many ways. This is what we call the unifying platform. Try to enjoy each other, and try to understand how and where you are going to meet, and how things are going to be done. Invite ministers and politicians, layman on the street and doctors from universities, (:54). and different governments. I feel sorry for the Iranian government that it has to do such a thing in such a short time, but in so many ways, by **what they did a few weeks ago by diverting such a huge damage that was planned for Tehran. Now they can use the time of peace to organize for this conference**. When a world leader dies, in a matter of a few days, the other leaders find the time to cancel to attend his funeral and to travel to the destination of the burial and celebration of the new leader. Now **the world leaders have 4 months to bury, the dead of the war, of man's wars for centuries in Tehran**. And to organize to be there to see the birth of the new life, new generation, place and dimension. We are all going to the funeral of the end of wars and to celebrate the beginning of peace and the entry of man to the U Community and in the dimension of understanding the world of creation in a much better way without ?? and prejudices of the past. I know many of the KF KS have already told me that they are getting ready to be in Tehran. And strange enough, Tehran is ready for you. We make this platform under the condition, the only condition that the T will lead us to peace. (:56). The T lead us for the Americans, Iranians, and Chinese to work on one platform, how to open the space in a way that we do not make the mistakes of the past on this planet. I was watching a program about the Himalayas and people going to Everest to conquer the Everest. In that process they are very proud, and many die, and many don't make it to the top, but what they don't show is how much rubbish, debris, and carnage they leave behind at the bottom of the mountain. This time as we try to make the peak we should make that there is no garbage left on this planet and in the U, in the brain and in the emotion of the man, and in the direction of the unity of the mankind. Cleanup, that when you start you start fresh. We invite the Jews back to Tehran, as we invite the Armenians as we gave them home in Jaffa. Iran is the land of "Zatorsht" As it was said, **The Three Wise Men who came on Christmas, with the wisdom of, Do Good, Think Good, and Act Good**. (:58). I will be releasing new technologies in the coming weeks in different KF K Seekers will be welcome to test to develop to be ready for the Tehran conference. These new groups will consist of space, fuel, energy, health, environment and materials. Your language should not be the barrier. We'll bring these groups into KFSSI teachings on Mondays thru Fridays. This is how the target for KFSSI Monday is set. **Rick started the process last week. Now what we want to do is to gather a platform of KF experts in different sections on KFSSI to come together on a daily basis to develop and to have these technologies ready to be demonstrated in Tehran**, irrespective of your color, race or religion. American scientists are welcome as much as the Iranian and the Chinese. We'll work on the platform of One Race, One Nation and One Planet. If you know experts in different fields of what you want to do and the groups are set, invite them, it doesn't matter who they are or where they sit, invite them to the platform of communication and development and they'll participate. (1:00). The KF SSI was set to break the barriers of the religion, race and knowledge and from this term it starts from next week. If you have an idea that can be developed in the next 3 or 4 months and it's basic basis, you'll have a platform in KFSSI and a number of Zoom channels will be setup for this purpose. **Whatever you can imagine, do you want to develop it, we'll show you that it can be**

done inside the Enhancement Unit (EU) and how you need to adapt it to use it. Even those of you who are of the path of belief in Christ I will manifest the soul of Christ in that machine. Even though you want to see the presence of Mohammad you will hear him**, if you decide to develop the T in the level of the soul of time and space of the time of the Presence**. I will bring Moses to declare what lies he did, that we understand what has happened in true time. When they speak, mankind has nothing to do to divide himself. **Those of you who understand this will take the path of wisdom. Those of you who do not understand will wither to nothingness**. (1:02). What ever you can imagine in the past time and you want to develop, will be developed in what we call, the Universal EU, because **it is the copy of the work of the U. It's you who has to understand how the U created that condition, the time, space, the soul and the action of the man.** Now tell the Vatican to open the books and tell the Vatican to close the books, and bring the truth what happened. **So many people joined the KF on the wrong track, and so many that came thought they will find the right track. You all will find your own ways.** We all find our own way according to what we understand of the T and how we decide to direct it and divert it. **I have no fear in what is to come, it is a time to rejoice**. In so many ways a lot of people who came around the KF to see its benefit and they got disappointed, ask yourself why and how and what was the reason, (1:04). and why did your soul bring you to this journey? Then you'll find the answer. We came to gain a better financial position, or we came to gain another spread of the knowledge under the cover of financial gain from the KF. Many of you played that game and many of you walked away disappointed. But it's for you to understand. Many of you have come and through this process will become leaders and become pinnacle points, and pivotal points of the new generation of peace. As of next week we'll teach more and more in the advanced levels of the system technologies, not for you, or those who I call, common man to copy, but for those who are more advance educated to be able to develop it, that by the Tehran conference we can deliver that it becomes the cornerstones of the new knowledge.
Are there any questions?

R- Thank you Mr. Keshe…. (1:06). Q: **What were the categories** of the groups that will form, was it Space and Fuel? K- **You decide. It's just what we can deliver or bring**. What as the KF can develop. It's how we see it to be done. The medical side and the new space T is headed by one of the most beautiful men we know in KF, by **Dr. Rodrigo, he has accepted to head the KF medical section from the teaching and developing of the new machine that we have developed.** He will choose, he has a total free hand in bringing doctors and those who can be trained for the new machines that are coming to operation gradually. He is one of the most capable men who knows the T, he lives and loves the T the way I do and understands it. We have another doctor in Iran who is the same, and many other doctors, 3 doctors, these are men of medicine who understand both sides of what is there. We put a team under the mastership of Dr. Rodrigo to bring this together. (1:08). because what I think and believe and what I have seen, he has 20 years. **This T will go first through the health of the man's fear of his own life and by seeing progress he will take new actions to bring the other parts in**. the experiments on the health side will be one of the most extensive ones because everybody wants to know how they can get rid of their cancer and this and that. On the

other hand, **what about the food that caused the cancer and the emotions** which causes these conditions. These are new researches we need to do. What about the energy fields which cause, that it leads up to these points and conditions. **Many people don't understand how amazingly we create so much of our own problem through the energy supplies**. **How we create so much transfer of energy from our soul through the use of energy. These all need to be studied. These lead to concentration of and new diseases of conversion and evolution**. Are we going to extend the knowledge beyond the present what we call, physical, pharmaceutical. Are we going to develop new ways to feed the man, new ways of agriculture. In simplicity, if you look at it, if any of you want to do the food and agriculture, what about understanding the totality of the need of the food, (1:10). that the totality of the agriculture. **What is agriculture? Or is it a Gans culture because at the end of it you take the energy of the sun, you convert it to protein or N and you put it in the plant, then you take that plant, whatever it might produce, the root, the fruit, the seed, you put it in the body of the man and you convert it back to energy, that, that energy creates the body and enhances and nourishes the STM**. Now that we understand the knowledge in totality, do we need to go through these processes, do I carry a spaceship of the cows and the wheat with me, or do I carry the energy transfer that you K Seekers now understand and can do it in the universal system, **conversion of energy for the need of the man without killing, without building it to kill, to feed. This is the problem in the process of this planet, this is what has not been understood**. We say we don't want to kill animals or destroy plants to eat. **These are a conversion system and now we have the knowledge do we need to go through the processes of creation and destruction, or can we use directly the energy of the U in the dimension of physicality and the STM**. Can we take the energy of the U through the plasma or Gans T and feed the STM which has been the whole purpose of this killing. We have matured and we have to look at the facts. (1:12). How many of you K Seekers would like to start testing this in these machines. What level enhances to what level of the STM. What do we need to enhance to use the T, enhancement, universal enhancement, enhances the U not the physicality of the man. But I had to show you, this is for cancer, this is for Parkinson's and you all are happy with it, because you are so afraid of your own demise, but your demise was set to establish the soul, to free the soul. What are you afraid of? Would K Seekers look into, **what Gans's do I need and in what condition to create to feed the soul, that the physicality is fed for centuries**. Then Adam, an apple, and a creature of space is not food for consumption of energy. Now you understand. Try to come with .. there are still Gans's, Caroline says to me, you know you have to setup different classes for different levels of understanding, those who still want to play with Gans's, and those who still want to talk about the Gans's, and those who have developed and they want to play with energy. I said to her, I already thought of it but there is only one way, this is the way we are going to open that those who are researchers that they teach the others then everybody comes .. don't be shy, I don't know how to make Gans's. You never know, (1:14). until you ever need to make Gans's, if you learned the knowledge of energy transfer through the U. Maybe that's why you never learned to make Gans's. So when you decide where on these courses, these platforms, when you want to start in KFSSI, invite the world's K seekers, and the world's leaders in science to come in. You will get a lot of arrogance, especially if they have a PhD at the end of their name. And the ?? is, that the man with no name understands

better then the man with HpD. Do you know what is the difference between HpD and PhD? Hypocrisy. You can guess the rest of it. If you understand that the K Seekers platform at KFSSI is for you now to setup the new structure for research and bring other people as I said last week and in other talks to join you. Don't think that they are not K Seekers, you see somebody in the field of knowledge, bring them in and teach them and let them be, then you will see .. they'll defend the book they've read and the title they put on their shoulder, but on the other hand as our Iranian and Dr. Rodrigo both said the same word to me in the past couple of weeks, but in different languages, this is not what you call new T in medicine, (1:16). this completes and puts everything in order of what they have been taught in medicine. It puts everything in a frame that you understand and can help. The beauty of it is, especially in medical terms, doctors sign themselves to help the sick and the man in poor health, but they never had the accessibility and they got fed up with the present world of medicine because it can't solve the problem, but sometimes creates more problems. With this T they have the freedom to test the grounds that they can make the difference for their patients being it an animal, human, or a plant or whatever else. What is interesting is **in a very short time, shorter then mankind can imagine, you'll find men of space in these machines. They comes and they ask for healing from the problems of disasters they faced in the spans of the U**. **The universal system we have brought is a common system across the U, it's not the exclusivity to man**. You might look at it as a strange machine, but actually, as for the first time , as I said, we have brought the gift from the U Community to mankind. As a man, a dog, a fish, and as a man from the space, will use the same machine for every aspects that they need. **I have brought you a gift from the Creator**. (1:18). It depends on your knowledge, understanding, and your openness to accept that the new condition has come an it has started. Then you'll understand there is no difference between the man and the "man of universe", we all we will go through the same system and as they need to nourish, heal and repair, as the man does, will go through the same system. Don't be puzzled that this is a new system, **this is a unifying system for the whole of creation in the U**. But to you it's new. It's not just for making energy, or healing Parkinson's, **it's for man of space to see the machine, he knows what it is and how to operate it. For the mankind we had to put the control panel, but for the man of U, when they sit through their emotion they control the panel themselves** through the operation of the system. Mankind will soon learn, because you missed one point, do you remember, the **strongest always give to the weakest to bring them to the balance**. When the man of U needs the balance and enters the system. Now you understand. Slowly I'll open the beauty, (1:20). of the system I have given you. **Because it takes time to digest and it takes a few to understand for the others to be enlightened**. The universal EU says on it, belongs to the U, and not to the body of the man. Man always looks to his own pocket, but now your pocket has got a little bit bigger. Now it's for you to understand and to utilize it. Do you develop and put research groups in KFSSI that you can understand the use of the system. Get groups who can work and understand the system. You still need to do other fringe works but part of that leads to this. **Don't be shocked if you are in the system and you feel the presence of something**. That something could be someone who has come for repair but in the dimension of physicality can't see them. They are among us and our openness of accepting new friends and new family will be very harsh. This is why we don't want the world leaders and religious leaders to start making this difference,

to start milking you again. I will end any religious leader who takes such a step. (1:22). **We'll not allow the conflict in race, religion, and anything else to go beyond the atmosphere of this planet, enough is enough**. **You'll meet them with pleasure, you create them with the love of the Creator, the way they have done to you**. In the last conference in Brazil, those who know, we invited one and she was present. I met with her in the morning of the conference and she attended with the pleasure of existence. In the conference I said, we have one of them amongst us. I'll try to introduce the U Community to the mankind in a very slow step. The understanding of it is important, that we are one race, one nation, one universe. As we have chosen different colors and shapes on this planet, we have done the same across the U, but **we all come from the same Father, the same Adam, and the love, (1:24). of His creation through his daughter has lead to creation of the U**. So if ?? to give to nourish has lead to creation of the Unicose. When you are a father and you hold your daughter, you protect her and you nourish her because you know she is there from your creation and she can replicate you to carry your love to your, what we call our offspring's and this is what is the story of the U and **we are one of those offspring's, that from that offspring we have brothers and cousins and sisters so the U Community is our cousins** and brothers and whatever you want to call it, through the diversion and conversion of the fields of the U and the collection and operation of his existence we call the soul of the ping. Maybe we have opened a new door and now we have as the human race to research the new T, to understand to unravel how and the way we'll become part of what we left. We are not a lost tribe, we are just a tribe that was too busy playing and forgot about the tribe, while they were still looking after us. **Try to do your research in understanding the elevation of the soul and what soul level creates, what kind of creation and in which dimension of the U**. (1:26). You were looking to travel through the depth of the space through your soul and see what you convert to in the dimension of physicality. Now that I have explained a little bit more **you have to understand that you can do the same thing by elevating your soul to the level of the soul of the destination that the physicality will take shape on this planet if it accepts the presence**. As I said, this is the universal system. I wonder how many of you will sign up to be in Tehran and how many will sign up to show a new understanding. In Tehran if the time will be short, we'll extend it. **If the Iranian government blocks us we'll change the government. We don't change the government through a revolution, we'll change the soul of the leaders of the government, that they will be enlightened**. What we call, ?? stault soul technology. It's the responsibility of the Iranian leadership to accept, and to setup and take the leadership in world peace in knowledge and T and become the facilitator of the mankind, (1:28). to join the U Community through the understanding of the man taking what we call, the wings of flight into the U. **My wish is my command and the Iranian leaders will follow the same**. We have come to facilitate the peace and for those who understand the meaning of the peace, those who have not crossed their borders for 300 years. They defend it but they don't fight it, they have been they wear the same banner as they did for the Jews and the Armenians a hundreds years ago, now they take it to the point of other nations to enjoy the same freedom and liberty, be it the borders of Syria or Palestine. You have to understand why Iran stood so fast with these, it's because it's been the same **they stood so fast with other kings when we protected the Jews and the Armenians and the rest. Now we defend mankind to become and take the path of peace. This is part**

of our blood and our culture of understanding that we are all the same family and we need to be treated equal and in the right way. We invite the Saudi kingship to Tehran for the conference as much as we invite their new friends in Jerusalem. (1:30). Those who sell them arms to create more war. Let them be ashamed of their own conduct. The invitation has to go to the Iranians as much as to the Palestinians and Americans and the rest to attend this conference. **If they do not allow the conference to take shape in the dimension of physicality, I will bring the STM on the 19th to Tehran. Then there will be no leadership**. Try to understand today's teaching. This is the teaching to open the man the U. It will not suit many those who, what I call, who thought they are at the top and sit right at the top on the KF, and they dictate and they been done wrong. They have not understood the purpose of the KF. Our purpose is very simple, … **This is what is life. I love to be in the body of a man as a human to enjoy the beauty of a woman, but at the same, I would love to be a woman to enjoy the body of a man to be in existence. It doesn't matter which one of us sits on which way. (1:32). the soul counts and the emotion of the perfection counts and what we create with it**. It is the time for changing and mankind will change. Mankind will change because we have brought something to you that you did not understand, and that is, is the mankind ready for such an evolution, Yes, is the mankind ready to go through such an evolution, the answer is yes. This child has been kept in the womb of the mother for millions of years to mature, to give birth to a new life and it has started. Are there any other questions?

Q: John - Mehran if I may call you this way, thank you for the matter of old man but certainly I don't see you falling into this category for the next 400 years thanks to the Gans waters? (1:34). K- This is Mr. John who traveled from Argentina 10 or 20 hours on a bus to be in the conference in Brazil. He doesn't like to be called an old man like me, we all like to think we are teenagers at this age. We live and work that way. You chose the wrong number 400 years, you need maybe to put another dot in front of it. Q: I didn't want to exaggerate. .. If we go by the pattern of our parents, we were born and nourished by, as we see the extension of all our families related (living) to 90s and 100, at 60 we haven't even reached the half a step, what they say is the new generations will live into 150 to 200 physical life plus, then we are still teenagers and you are right. None of my family, very few lived less than 80 plus. With the health care and replacement of organs that we have we'll all live to 120 to 150, so 60 years is not even there, and we only work for 30 years or so, before they make us retire by law. We are not even there. T … (1:36). Any other questions? Q: **To use the Gans successfully is all that is required is to drink the plasma water daily** and spend time daily in a Gans energy field, such as the UBESU? **K- If you can master all the energies that the U gives to the body of the man for it to survive, yes.** I was talking to Dr. Rodrigo and he said, you need so many things, so many number of Gans's, he wants everything. I said to myself, Dr. Rodrigo multiply by about a thousand and you are just about right, but that is a good beginning. When you speak about conversion and living, **we absorb not only from the food we eat, as I said, it absorbs 80% of the energy of what we need from our environment and some of these energies are so rare that they only can come in the conditions and interactions of the cosmo**s. We are children of the U. We are not children of the earth. Just because we see the light and that is all we are going to receive, no way. Q: Do I understand this correctly, **Gans is a portal from this physical dimension into another**

dimension where everyone is in harmony and part of the universal consciousness? (1:38). If you look, I was looking at a video, the Iranian KS are working so hard to be able to make that hole in the middle of the core. They are so busy with it and they just managed to see a few bubbles in it. They were so excited, I received a video yesterday. **The truth is very simple, if you managed to put all the energies of the U in that core as a Gans, then what we see as a bubble, or whatever, you call it, a soul of the core, will match the STM, and does the man need it to be able to transport through i**t. Or does it bring the U to the man to be in that bubble. In so many ways, in the future time man will understand this process. As I said, you make the G field of the moon and you'll travel to the moon, it will attract you. Isn't it correct now that you understand more, I can tell **you that create the strength of the soul of the moon and the love of you for the moon will take you to it. And you decide in which layers of the moon you want to manifest yourself in the dimension of physicality**. (If) you create the heartbeat of the moon in the heart of the man, then the man will become part of the moon. You don't need to flight. (1:40). And that needs a lot of wisdom and understanding if you understood what I said. Any other questions? Q: **Is Gans a spiritual awakening system for all humanity in a few years, something that before would take dedicated monks and nuns lifetimes** of difficult practices to achieve just for themselves? Read the first sentence please. Q; Is Gans a spiritual awakening system for all humanity in a few years? K- If you understood what I said just a few sentences before. Then you you'll understand, I already answered you. … Q: When praying would aiming the MaGrav reactor be the direction of the target soul improve the elevating of their soul? What. (1:42). R- repeats. As I said to you when you read that before, I said has this become rocket T, you want to target it … Do you know what they call in English, flashing. R- flashing? In English … you know they flash they open their jackets and they show (themselves without) clothes. So do you want to flash this way, I target you, you can have my love and then I want you to change your mind. What you call weapons T is over so there are no missiles business. **Isn't it better to understand the totality that you expand your wishes, the dimension of your wishes to encircle, to embrace the other soul, that if it needs it, it will get enlightened. Maybe it's your soul which needs to get enlightened by that soul and you don't see it**. When you think that way, that I want to direct it. **Why don't you expand that you might need direction. That's the point of humbleness, of maturity**. (1:44). Maybe I have answered you if you understand it. Any other question. Q: .. my friend suffers form Volatile Organic Compounds, and AlO, is there a way to protect your home to shield off or minimize those toxins through the use of Gans plasma, what would be the best method? K- Yes it can do but you have to understand why and how and the way it's done. **The environmental pollution, it could be for the evolution of some, maybe not for you, going through the evolution, and you have to accept it. When we get allergies like this it means the body is not ready to go through the evolution of expanding, understanding, and accepting new dimensions. Maybe that is needed for the next cycle of evolution of the STM.** This is why we have the damages because we can't accept the new conditions. Many of us live in the same environment and we accept it because then **it becomes part of the evolution of us to fit the new energy fields of this planet which creates a new condition for us, for our survival in the future** on this planet. (1:46). Allergies, if you want to call them, is non-acceptance, or not wanting to accept the changes through the dimension of the

emotion. **When it happens in the dimension of physicality, we call it cancer, which is some energy that we cannot process**. Any other question. Is the sound okay today, are you happy with it Rick Crammon? R- excellent, very good. We have got a new system thanks to Stanley. .. Q: How can we change the habit of owning, accumulation and hoarding things. Man is so preoccupied with that, that he has little time to know himself? K- Has this not been the mystery for the mankind since the beginning. **Even when we were moles under the ground for dinosaurs, we used to accumulate and store. This is not understanding the process of creation and the fear of demise**. (1:48). As we develop these new technologies and we see that we can have what we want, this dimension will disappear from humanity. This is part of the cause of the problems of wars. By giving comfort to ??something everlasting ability will go. **Many nations enter into wars just to collect food to guarantee the survival and this will go**. Many animals eat on top of, or consume so much energy out of the fear. If we understand some of the reptiles who eat one food a year or whatever or every few months and only eat if it is there, and they can adapt until the get the next food, then you understand that mankind has a long way to mature to get to their level. What dictates, they live in a very small environment but **their radar of the soul sees the totality and what is getting ready for them when they need it**. We look at the point and the position of the hunt, we don't look at the point and condition of the creator of the soul of the hunt, it is at the point of inception. To change that chain is going to be very difficult for humanity and the creatures on this planet. The **Chinese are planning to launch hundreds and thousands of satellites in the next 5 years. Would we use these satellites to feed, to use them to create the conditions of the availability of the energies, (1:50). that the mankind needs that not even the fish will kill**. The **biggest criminals of the eating of the lives, are the plants, because if you look at it, they continuously consume protein directly once it's created**. Would we live in this dimension of the physicality once we change and understand the change of the whole structure, which we will do. We don't consume physical food. Is there any need for the whole of the digestive system. Do we need the bladder and kidneys to clean it, and the lung to convert it. The reality comes, how would our body evolve to that position so rapidly. Would we feed the STM that in the process, it will confirm the existence of the need of the physicality, and that's it, you don't consume anymore. You get internally fed for what you want to show in the physical dimension. Q: Caroline Keshe, (1:52). .. she is only 10 meters from me, not on the other side of the planet. …

(SOUL Teaching: Adam Creator, Eve daughter)

Q: We were talking yesterday that maybe it's time for me to explain to humanity Adam and Eve, but **the real reason why it's Adam and why it's Eve**, I don't know if the time is right for you to explain it now? **I just explained it a few minutes ago. No you just explained part of it. Mankind is not ready yet. (1:54). What I tell you in private mankind is not ready**. Mankind is not ready to understand the truth about the Adam. … **You see the Adam is the Creator, the Adam is not the man**. Through Adam what was brought to mankind, … the religious leaders converted it to suit them in the Bible and before, in the Old Testament and then it was added and changed to suit the understanding and benefit of the Church, Synagogue, Mosques, and everybody else. The true essence of

the Adam was explained to humanity a long time ago. **The Adam is the God, the Creator, is the creator of all and the Eve is that, who he could show his love and adoration for, what he had to give, but he could replicate him, in the essence, what we call, the daughter of Adam, the Eve, what we call, is not the Eve as you call it, as his wife**, but in truth was his daughter. Because not only **could show the love of the father, the love of the Creator, in what is created, but in it, he could see that he could create another life. (1:56). In essence when you are just and correct in every sense, you do not need a male and a female to create**. In essence of justice, as it is in Chinese Yin and Yang, **the balance of the field forces leads to creation of new dimensions**, which is what we call, the daughter. What can create from me, is (its) own existence, another. That's what a woman does. Where a man does not. In essence, as I said for many years, **on the evolution of presence of the soul of my daughter, the cycle of the creation will complete, for me, for the essence of the Creator. Until that time the essence of the creation is not complete**. In so many ways, mankind has misunderstood what was explained, but this was the only way he could (understand), and this is why when it was originally explained, thousands of years ago, to the men of what we call, who were supposed to be the soul leaders, they twisted it in a way that mankind could understand and put it in the shape of physicality of Adam and Eve and the Apple. **The apple when the female was created for life, for showing the love, not to be the daughter but to be the partner to share with, was what we call, the creation of, what we call, interaction of physical life that man got bonded and bound to the physical life.** (1:58). This is why many times I said, we come to the dimension of physicality to understand why Adam ever created the dimension of physicality. Was it the confirmation of his own physical existence or the pleasures of the beauties of what he can create. **The completion of the life comes when the daughter of Adam is created. Until that time, it is the time to be**. The life of Adam or the Creator or what you call, God, is the essence of creation of ?? the origin. You call it the virgin birth. Does the virgin birth, comes the interaction of the soul of the man or does it come from the creation of the soul of the new life embedded in the body of the man. **Many of those who are the travelers of this planet**, as we have opened these EU, have been here. **Physically it is impossible to interact to have children. The interaction is by falling in love of the soul of the two created, and they created what we call, the child of the soul**. (2:00). And then if the female is of the earth dimension she accepts to nourish that soul, to give it a dimension of physicality. And we see many of those on this planet. I met one very recently, where the feature of the existence of the father we see in the shape of the daughter, and all the daughters carry the same along the line. These are the children of the soul. In Christianity it has been changed into virgin birth. As I wrote recently to a K Seeker, **I have manifested in the soul of Moses, Mohammad, Jesus, and many others, but in essence I am the same soul**. This is what we can tell, what will come, because we planned and we are the originator, we are the origin of. The children of the soul in the dimension of the physicality, we shall see very soon again. Show to the mankind, can match. This is the new dimension. This is what we have to understand that unravels the mysteries of the past, (2:02). which have been shrouded by a lot of mysteries. Adam is the Creator, not Adam as a man. In the passage of **man through the U** as man has always been so physical, man of different, what we call, different strength of the physicality, **will fall in love with the passengers of the U, the same with the women. As I said, physical**

interaction to create 99% of the time is impossible, as a frog can't mate with a cat, and a dog can't mate with a fish. As simple as that, but a frog can fall in love with a cat. In the dimension of physicality it's impossible, but in the dimension of the strength of the STM or as we call the creation, that is a reality. Mankind, now that he has opened up to the space will see it, as we fall in love like a ton of bricks, with a woman on this planet**, we'll fall in love like a ton of bricks in the space with the soul of the beauty of the soul of the creatures of the U. When we give, in giving and receiving, (2:04). it's like an egg and a sperm, it creates a new dynamic situation condition that it leads to a life of its own, and then who of the 2 are responsible, or accept the responsibility, or have the near strength to nourish that new soul.** The future of the mankind in the space doesn't come out of intercourse with the physical dimension, it comes through the dimension of the soul which is the creator of the physicality. Mankind will understand this very soon. **This is one of the reasons we came this time and presence, to complete another cycle of the creation. It's not to be the reflection, it's to understand the totality. If you look at it, in the agriculture we take the skin of one plant and we put it on another plant and it changes the fruit and the flavor and the color. Do we carry the essence of it, or do we carry the emotion of it, there's the skin of the plant, as we know the skin is the essence of the emotion**. Now maybe those of our farmers understand the truth about it. We will understand new dimensions in the new opening of the space. **If I could explain, (2:06). to mankind how much the universal EU would change the course of humanity, you will all commit suicide to be in that dimension, in the physical dimension not to be present.** As in the Iranian teaching, somebody asked the question, or they are saying in Iran that, now he is changing man to souls and god knows what is going to happen with us all. If man's physicality changes the soul in the dimension of the universal system it means that physicality has matured to join, what you call the world of dimension of the U. **Isn't this why we are all born?** If the system creates that condition, **it must have the energy of the Creator that we can elevate the STM to be free from the physical dimension and entanglement in it**. Does it mean you are going to miss it? I don't think so. **Maybe the connection with the world of what we call the field strength of the soul will be much stronger than when it was a father in the physical dimension**. Now we understand as I said many times, when we come, we bring the soul which is a lover with us, (2:08). because we have matched in the dimension of the U. **Allowing it to nourish a daughter, is a natural process of the souls of the U, which means they follow the process of the Creator**, but we give it the dimension of physicality, then you call it the Adam and Eve. **From singularity and in balance with each other, we create the birth, not in the dimension of man's thought**. I told you slowly we'll mature you to the point of understanding. Not only you don't need to eat what you see outside because it's beautiful, you don't jump on it because you think it is your right. Soon you'll understand. **We on this planet possess physicality, but not the soul and the emotion. This is one of the biggest mistakes in man's mind and if once you become aware of it, you have solved half of your problems**. As I said once to an Arab, Jewish and Moslem guy, you know you men always think that the girl has to be a virgin that you are the first man to conquer, (2:10). **you conquer the physicality but you don't know where the emotion and the soul sits, is it a virgin. Then mankind understands that man needs to live through the STM and not the dimension of**

physicality, because in the dimension of soul you see the truth. A lot to learn and a lot to get rid of in taboos and misunderstanding.
Any other questions.

I think 2 hours and 15 minutes. I think we hear Alzar. … Last time we had a meeting Alzar did everything to get in but she couldn't get in. We said she lost her wings and her voice, now today she has got her voice back … Q: What happened after the Adam created the Eve, what happened between them? K- Eve as a daughter to the truth or Eve as a completion of man's understanding of another? Q: **I want to know the real story? K- You are not mature enough yet**. Q: What do you mean I am not mature enough, you said, open .. (2:12). Mankind is not ready for it yet. In the future I'll open the book. Q: So we need to have a private meeting then. K- No, no, no **mankind is not ready yet**. In due coarse in time we'll open up more. Q: When you talk about man should see the world through the soul because it sees the truth, **but how can we train them, the man to see the truth? K- It will happen in time, the whole of the soul of humanity is getting ready for it, as we see it**. The maturity of accepting is a big part of it, maturity of understanding of it is the reality of it. As I said to you, the guy I met a few days ago claiming to be the first to fly the F17, and his nation is superior to understanding and what he worked for and believes and talked about is now worth nothing. It was a huge shake up, in emotional understanding. In that process he needs to go into his soul, I didn't get much chance to speak with him he had to leave. We need to think, (2:14) what we gained from this process of life. What we need to give from this process of life or interaction of the physicality with the STM. Then do we find our true value and position in the world of creation. We'll try to get quite a few of these systems into one place or maybe to Tehran conference. Ask a number of **world leaders to get there and go inside each machine. It will be interesting if we have any world leaders when they come out. Would they come out to the elevation of their soul to understand or would they be shocked by understanding the truth of seeing the light**, as we say, which is the light of their own souls in interaction with the souls of their physicality. **Many people at the point of death talk about a flashing light and entering a peaceful condition. Isn't that the point when the dimension of the strength of the STM interacts with the STP**, that it ?? super-passes that the physical dimension of physicality in the soul level, gets fed and satisfied and finds peace. **Isn't this the truth about the flashing light when the 2 souls meet, when the light and the field appear (2:16). from interaction of the fields of the sun and the earth to make the daylight**, isn't that the same point, when the strength of the STM crosses the soul of the strength of the STP in the man. It creates that light, when it, encompasses it. Are you ready for the truth. Then this is the truth. Then how many of you are ready to do that? **As you have the dimension of control in this strength of the soul, would you be able to retract it, to manifest yourself in the dimension of physicality. Isn't this what we do in a very softer way when we choose the path of sleep**. Isn't that the time when we allow this to happen and we do it out of addiction, we need it, and we call it a sleep to recharge. But o**ur body continuously recharges. Therefore, isn't it an addiction, of the addiction that we have to meet the STP and the STM and we call it a sleep time**. To meet and to shake hands. or allow the STM to, in a soft way, under the way of the physical dimension, **to super impose the physicality and allow all the cells to take what they need from the dimension of**

physicality (1:18). or the STM. I told you that, if I tell you the truth, you'll all run, because the school of thoughts you have been brought up in, is not the school of thoughts of the reality. Man has lived in a fantasy world for too long. Q: Do we all exit the same way, I hear that some souls, because of the desires they have, stay earthbound, it means they don't go to the Creator, they stay here. What is that? **Nobody goes to the Creator as such, you become part of the structure of the position of the Creator, but if you have attachment, in a way, to the physical dimension, you can hold on for some time, until the energy balance is closed** balanced. Man has to understand the process of the separation of the physicality, and the process of the creation of the physicality in the dimension of the existence of the soul, which I explained many times. If you, you are a dentist, you work on the medical side, you have seen how people want to give everything in the dimension of physicality, collective, and even their own part of physical body, cut it out, get rid of it, amputate me, I want to live longer, because without amputation I have to leave. I am paying you to let me suffer more on this planet. (2:20). That's all it is. **Why do we go into the hospitals and get amputations and get the cancer treatment and the rest of it, to suffer more, we love to suffer**, man is addicted to suffering. He sees glory in it. The idiotic adventure in physicality. Making life comfortable, yes, but trying to stop the conversion because you want to suffer more. It's something that we'll never understand. If it was me I would say, take the whole lot as fast as you can, let it go. I am gone. I am going to my destination of where my soul has been created to be. Q: I have been thinking the same thing for a long time, for the past 20 years like. I always say, if I get a cancer or anything, I don't need to treat it, it's a blessing, I just go. But people think you are out of your mind, that you don't live life enough. K- It depends what mission you have and what your soul decides. I always remember, I have said it many times, you can bend and break the laws of the U, you can do whatever you like, but **if it isn't the destined time, because the others souls have already made the position for it, you have to stay until the time is right. (2:22). Because they need to be in their position, you cannot steal and give to them**. It's like the guy says, Mr. Keshe if you can make gold why don't you make it … if I make gold, then gold will have no value, then I am cutting my own throat. .. Then will come a lot of people to be busy with it that they can change to understand it has no value. **It's a strange world being in the dimension of physicality, and it takes a long time to understand** it, long, long time. Q: I asked this question 3 years ago but you didn't answer it. You answered it 3 teachings ago. K- that means you matured in 3 years, to have understood it. Q: So the **Creator came from the fields in Himself, He created Himself. But what is behind those fields, who created those fields?** As I said, if you remember, as a good advertising man, **read Book #8**. Q: When is it coming in? K- Oh, soon when I get a chance after 2021 and I am retired. Q: We have to wait another year? I have to get the time to retired, when you are retired you do things. When I can nourish a new dimensions in souls, and new souls, (2:24). and at the same time sit down and be able to contemplate how to get the mankind to move in different ways. **The Tehran conference is the beginning of the change of process as we have to reach billions of people** and change a lot of things at the same time. It's not going to be the flip of a finger. **We need the religious leaders to trigger it, that we trigger the STM**. Why do you think we are coming to Tehran with the presence of his eminence Ayatollah K and we invite the Pope. **They have to really push their station and the position to the dimension of the**

Creator. Q: Why? **Because then no one can take any souls to slavery. Then the STM collectively will mature once he understands the truth**. This is what gradually you'll understand. The soul of the present Pope has understood, he said, he'll be the last Pope. The mouth speaks the word of the soul. **As we change the dimension of dependence on physicality by allowing that he can feed you and everything else. Now we take the dependence of man on the slavery of his soul too. And that only comes by the end of accepting what we call, religious leaders**. **They have to relinquish because they matured to understand the time of end and they open the path**. (2:26). You see when you they wanted to start the revolution in Russia and break up the communism, they brought a Polish priest, as he was inside and understood. When we want to do the same thing, we'll do the same because then we put him in that position. **If you want to change the structure of the abuse of the STM you have to let those who did the abusing to bring it down, to end it themselves**. Now that we have reached the point of maturity of physicality. Now we'll bring those who enslaved the STM to end it themselves. Because if we do it from outside then we are enemies, but when it is done from inside it is accepted by totality. In my time, the Pope will put his crown down. In my time the religious leaders, be it whatever, will put their robes and ribbons to end the thrones on the table. In my time the kings and rulers will do the same. This is not a promise, this is what is actually taking shape now. Because we'll stop the abuse of physicality in controlling whatever, as we have the systems and at the same time, they'll stop the abuse of the STM. (2:28). **In my time there will be no Mullahs, Ayatollahs, no Popes, no Rabbis, none because we'll all become the same**. This is the ultimate point, when the man chooses the path of correctness, what we call the Day of Judgment of the soul, ?? and he is happy. **I allow the abuse to happen to me and when I don't allow it my soul is at peace, then it progresses the right way. I decided not to allow my soul to be abused or my physicality to be lied to and cheated and the rest, and when I took that step everything has changed. I have been on both sides**. I know the game and how it should be. **When I received the message to become the Messenger at age 19, I said, no way, no way, I fought with myself for months. I said, there is only one way I can take it, until I am ready, and I went that way, and it worked. It happened again when I was 29 or 30 it happened again, and I said, I know the way, I know how to do it, but I am too young, I am too young, I don't have enough experience of the physical world to be able to accept such a responsibility. I play the game the same. The third time when I accepted the position and to be what I carry, I knew that I have gathered enough that I can be correct in everything, but when I allowed the abuse to happen, everything turned upside down. And then it stopped when I brought the justice back in to it.** (2:30). Justice to myself, justice to be correct and to understand, because until you don't taste it, you don't understand it. Until you haven't lived it, you don't understand how it is done, the process. **This is part of living, becoming a physical life to understand how you can stop the processes in it**. **It's like an experiment, that you live to know what is the correct way, so you get the right formula to work out every time the same. But physical life is a very dangerous path, because it has too many factors involved all the time. By creation of the soul we commit ourselves to progress, and that soul has to be correct, and the soul of the Eve doesn't come from the fear of loneliness, it comes of the love of creation, and this is where a lot of mankind has made a mistake**. We are not here to play and run. **We are**

here to understand that the same mistakes can't be made in the future in the process of the creation. In a way we took the punishment because we couldn't understand what we created. Now we didn't take a punishment. Now we understand it, (2:32). that it will not happen ever again. In English we say, 'the buck stops here.' At the hand of the Creator and the boss. So we came to clean up the buck, to understand the reason so it doesn't repeat again. And this is our responsibility to be there. **Q: What was the mistake? K- Killing, destruction. What a huge mistake**. Q: **Did that killing start with Adam and Eve? K- No, it was the creator of the planet, the conditions. Adam and Eve you have not understood**, in every condition, the love of the Creator exists within it, be it the moon, planet, stars or galaxies. It's the dimension of the interaction of the fields and conditions which (are) created, that have to be correct. On this planet it went wrong too fast. (2:34). Any other question?
Or should we call it a day after the Christmas, **you had your gift**.
Please register for the Tehran conference as soon as you can, we'll greet you with the love of the Iranian nation. Invite your leaders, religious leaders, the priests and rabbis and mullahs and every sects of the path of ?? and every man on this planet that it is the time for change. **And if it comes to it, I will enforce the change**. The Iranian KF is ready for having and embracing you, and the humanity is ready to embrace peace and love and the condition of science and T and not fear of talk and conferences. We'll bring the humanity to Iran to make Iran part of the humanity to be all in one. That is the beginning of it, the end of borders, racism, and the religions and the beginning of what we call a beautiful cycle, because we have the knowledge, T, the power of delivering it and audacity to challenge the world leaders to peace, because we have the tools to deliver it, and we have the tenacity to be so soft to be able to do it. (2:36). Q: Can you be more specific about that letter, please so that the whole community that is working in that direction can understand of the purpose of the content in the letter? Write it with the letter of soul not in the dimension of physicality and if you decide to write it with the physicality, let your soul write it, not to be dictated by us. Then you understand. Q: Do we make one letter for everybody or does everybody make a different letter? That all depends of the U Council, you are supposed to be. Both of you are members of the UC and you have to decide as members of UC. When you come to it, it will come to you. Q: .. I have a couple of people who really big changes in the world, and I can access them ??? (I think she is talking about people she knows who are not from this planet) K- Why don't you reach them through their soul, the letter will not be there, they'll come and tell you. Q: I already did but I want to send something as a physical part of it, through the connection I have with them, so they can.. K- You see, the beauty of life is for the opportunity we accept for what reasons, and where we are taking for it. Do all the letters have to be the same, as our cultures are different. (2:38). Why does it have to be a unified letter if the essence of unity sits in the soul of the UC. **We have chosen a seat for the UC in the past few days. We hope we succeed**. We hope in time, what we think shall be. The KF management has seen the sight and if we succeed in a very short time the seat of the UC will be set. We have to understand that it doesn't come by the land or the sea, it comes through the STM. The sooner we understand that for the UC, you will understand that it doesn't need to be written on the word and the paper. There are no paper, seats, or pens in the U. As Rick said, would you like to torpedo it in the direction of who you want. Q: I had a dream that there was a time that you weren't here, you were gone and I was traveling and going to

airport but the planes weren't like this, and Youtube was playing in the airport in every station I went, .. and the planes weren't like our planes they were like the UBESU, and I went to it and laid down and was appearing someplace else. I was going from place to place and your Youtube was playing everywhere and I was thinking, (2:40). I wasn't dreaming, I was really in it. I was saying to myself, in everyplace instead of where the usual TV is, Mr. Keshe is playing there, how did that happen. Suddenly I woke up. K- I don't know. (silence) There is a very nice question here by Dan. Q: Thank you for clarifying 2020, why just now it's the right time for peace and knowledge. **Where did Moses, Christ, and Mohammad go wrong in achieving this goal? K- They took the dimension of physicality. They took the position of physicality**. Moses as he understood he could put it more. Mohammad meant, once he understood his power can eliminate other things, but (also) brought him other things. Christ went a different way of doing it. **In our time we do everything in moderation and correct way for our souls to be just, not the dimension of physicality**. Mankind will soon understand. **The message was correct and the messenger was correct, (2:42). but then the earthly possessions took over. Once they accepted the imbalance of their souls, the rest took over. The KF was going the same way, but we stopped it** very recently in the past couple of weeks, because we understood the problem, and the physical changes necessary to be changed in that direction. I am not attached and don't possess anything, and what ever we possess goes back to the KF and to the humanity. It doesn't matter if it is there or not there, and what happened was not there, was for us to learn. And for the KF, in a way, for those people who were supposed to be working for the KF understood that they were here for a different ethos, even though they sacrificed a lot. In examination and in testing ones soul, one matures, not the physicality. **There are a few turning points in small part of the world, which then effects totality, the whole mankind in the long term, and one of them was the misconduct of Moses and the killing. And then with Mohammad with his killing**. He went to destroy the statues, but his followers ended up destroying life and that's where he went wrong. **We don't behead because one doesn't agree. You allow the change, not to kill, to change. (2:44). And this is where the message in all cases went wrong.** Typically, Mohammad was fully aware of this, that his limitation was the statues, not the pen. This is where it went wrong with Moses too**. I don't hold any physicality, I have no attachments, and I kept to that way. I hold all the assets of the KF as a trustee, for the KF, and on my passing the U Council and the Earth Council become the trustees but not the owners**. In the next few, coming time we'll change the mandate of the KF, from the United Nations in US to house of Justice in Israel, to the U Council and the Earth Council on a 50/50 basis. In the control and running of it in the hands of the KF. This time there are no leaders to abuse any ones soul, and **we saw the abuse of physicality by the behavior of Rui in Portugal. It was unbelievable what we saw**. (2:46). That changes. As a member of the U Council you are there to shine, not to dictate your agenda, or your national agendas, or your cultural agendas. Step down as a member of the U Council if you are not participating in the new structure. **The U Council needs to mature, you need many members, to complete, to be able to reach, to change the soul of the humanity on this planet**. As someone asked me, **would the fish have a member on the U Council? I said, do they have their soul and do they speak a language**. Thank you very much for today and a Merry Christmas for those of you who believe in the beautiful path of Christ. Move and make this planet

One Nation, One Race and then we become the race of the U. That's the part of maturity that we all will be looking for, the maturity to understand, (2:48). to comprehend. Next week we'll start at 12 O'clock central European time. … We'll see you next year for the New Year. **It's a year of luckiness if you are Chinese, when you have a double of something, 2020 is very lucky because it makes 400 and it has a 4 and double of the zero in it, which is another lucky thing**. Let's see how we build it and where we go. The 4 in Chinese is a sign of love as well, for those of you who might understand something with it, and lucky because it's a time we can give. And **it is balancing all corners**. R-North, South East and West, it covers the whole planet that way. Don't forget and please try to organize yourself for the KFSSI research that what you want to develop, and how fast we can develop if we want to show it so we can show it in the Tehran conference. (2:50). We'll setup the "telegram" for Iran or Farsi conference point that all those who want to participate can come in, just give us a few hours and we'll set it up. We'll panel, by all the Iranians will be there. Try to see how and where and the way you can find people to work and the Iranians can participate, even for the research in the K Seekers what you want to research with the Iranians. One thing I have to remind you, Iranian participants, those who are in high level of research are usually not allowed by government to participate on this level, even though many of them are there, followers of the KF work in research and development. Thank you very much and see you next week. (2:52).

(2:54). Universal Body Enhancement Spaceship Unit and Testimonial..
END

309th Knowledge Seekers Workshop - Thursday, January 2, 2020

(** How matter is created from the fields in detail at 1:00 hours;

Update on KF progress, UBESU will go to 500K Euros, Headquarters in Malta soon, KF Store now has devices for testing and feeling the Gans, We want to move Knowledge Seekers to take the next step by testing the Gans to understand the fields, KS are to come up with new ideas to research and develop also using the new Enhancement Units for testing new ideas, Talks about upcoming Tehran conference, Stephen Hawkins blocked any new ideas in physics and cosmology then he copied the KF knowledge, The soul in the physicality is like the sun in the solar system, Single planets existing between galaxies on their own, The next generation of the EU will be totally different and come from your research, Exposes the fallacies of the science world, ** Explains how matter is NOT created from the cooling down of the universe but by 2 MG fields from opposite directions interacting and thus creating gravity which lead to the creation of the universe, If you start playing with the cores you will see this and start creating matter, Anticlockwise motion of our universe shows we are in the northern hemisphere of the Unicose, Our twin planet on the other side of the Unicose, The fallacy of the iron core of the earth, By law of centrifuge and a plasma in a vacuum the heavy materials go to the outside, The same process occurs with the soul and the body, If you create the condition

of the gravity of the earth in respect to your core you will see physicality manifestation, How we see the light of the soul, The 7 levels of the soul and jumping to highest, The Creator is in us and we in the Creator, How we see with the soul and not the eye, The difference between nymphomania and schizophrenia, Multiple souls in one body or "Beautiful People," Virgin birth comes from the interaction of the STM and the STP, Why schizophrenics kill their parents, Taking out the Hollow Center in the reactor and reactors around the central reactor, Human's ripple effect the Universal Community, When you steal from your soul you have to put it right, Analogy of chessboard with the soul moving the physicality, Trouble with schizophrenic when one soul does something wrong the others pay for it, Pray for the soul of your system, What happens after we die, Every soul has a destiny and death is the freedom of the soul and it continues according to its strength, When things go wrong it's because something has to be put right it is the soul that decides, The conversion of voltage to current and back again is the cornerstone of knowledge of the universe and the creation of the soul but mankind is not yet ready, Feeling the fields of the reactors and creating motion and emotion together in the field transaction (next step for KS), The whole purpose of the teachings is to discover the fields that come from the reactors and not the reactors themselves and how the fields interaction with our soul to create what we want)

English Transcription:

(:06). .. Happy New Year to many of you who celebrate this path of belief and hopefully 2020 will be a very lucky year for many of us and we'll be able establish new grounds and breakthroughs in many aspects of the science and T. We wish and hope to be frontier and we'll be part of it to bring new dimensions and understand of the new aspects of the T. We are all hard working in launching new things in the path of the new T. As you have noticed the EU has gone to the value of 500,000 Euros. We have fulfilled what we were expecting in the promotion for the K Seekers to be able to be part of it. Many have taken the opportunity to join in and some the steps to setup a series of new centers, which will be announced once the agreements have been made and the systems have been purchased. In some cases the KF has become partner in these joint ventures as part of being the initiators of the T. In the past few weeks we have promoted, (:08). this T in the way of understanding by many governments and on the 17th and 18th we are in Malta. We expect a very small meeting where we'll mainly concentrate on working with officials as Malta is the key point for the KF as the headquarters of the KF coming up in the near future. As we move to Malta we need to establish ?? to be there with the locals, government, and officials and this has taken place. Hopefully by 2020, if we are lucky and everything takes shape Malta will be where you'll see the Headquarters and then it's the beginning of the work for the U Council and Earth Council and we'll see how we can take the knowledge to the next level. The place we have chosen is extremely beautiful and now we have to setup the negotiations and setting up of the rest of it. As this is important for the KF, the U Council will take a position of the United nations in shareholding of the KF, and the E Council will be the other 50% voting shares. Where the KF will manage by itself, but the 2 organizations ?? will share ?? voting. We are in Mexico in February in interaction with the government in Mexico and then we'll pay a visit back into Brazil, (:10). … where we'll find a lot of things we started earlier on.

Hopefully in our return we'll be in Kenya where we'll interact with the government on a higher level, then we'll go for Tehran in the April meetings. There is a lot of interest in the meeting in Tehran, many KF KS have asked if they can come. You can all come, but only thing is to go on the website and register, it doesn't matter who you are, you have to register for this meeting. The KF in Iran is taking steps to organize we have 4 months to do. We have asked the Iranian KF to invite the Iranian leadership, his eminence Ayatollah K and Iranian officials to the meetings as we unravel new T and new understandings. It is part of our work to engage governments in our work and engage officials in understanding the T and in that process we are moving forward in different aspects of the T slowly. In the next few weeks you'll see another systems for agriculture that will be environmentally introduced as a unit which will be, provided by the KF. (:12). We have decided to move you KS to the step, something that you thought was for different people or things, and do things with it. We have brought in a dynamic system with a full system that any of you can start testing your Gans's, ?? single ?/ water and the rest has been going on for some time. Some of them medical doctors through different ways to Chuan Lynn were getting access to the dynamic systems, which we do tests with, … Originally KF provided the cores, from today we will supply. Chuan Lynn has joined the KF in providing all the systems, which means all of you can buy the motors and cores and test your different new T. This is what we are trying to do, encourage you to move to the next level, not just drinking Gans water, ?? then the field of the Gans's. These are all for sale and will be delivered around about 20th of March, we have ordered a substantial amounts that we can meet the demands. This will go on sale from today. … From now on all the products which could be bought by people … now you can do the testing of the dynamic systems yourself. (:14). Then instead playing with Gans's in different ways, now you can feel the fields of them and understand to see the motions of them. This is important for many KS for us to move you to the next step, out of the Gans making into seeing the fields of the Gans that gradually many of you will start mastering the T. We'll try to introduce the next step on the Pl T in the coming weeks. There are a lot of hidden T which you have never seen but followed it up. … We would like you to start understanding the fields. Because through these fields we can do a lot of things through understand materials, our emotions and the rest. The whole structure as of today is on the KF website and you can go and order. In the next few weeks we'll launch a full range of, what was supposed to come through Italy but got hijacked in cosmetic, a vast range of it. Then on the back of it new products will come online. The clothing of the KF and the rest will come back online in the next few weeks. In that process we'll allow a lot of KS to be able to produce their own systems. (:16). These are very simple systems you can just bring in the bottles and test it yourself and see what effect it has, having 2 or 3 systems. A new version of these will come in after the 20th. We have offered 2 different sizes, 3 and a 4 cm, … This is what we want you to do to move on to the next step. To take you out of just making Gans's , now if you want to find the strength of the fields of the strength of your soul and everything else, we have to get you moving to creating conditions to see if you can create flights. You can sit between the systems and see how the interactions will be (effected). and how you can test and make things. This is becoming one of the parts that we are trying to get you to move into, the fields. We have played long enough with Gans's. Now KF is taking over this site directly and we have booked for a 1,000 of these to be available to rapidly strengthen the knowledge of the KS. In the coming time you'll

see other systems that we'll introduce and this is how we take the leadership, (:18). in bringing all the KF KS T into the frame of the KF. … If you have produced anything like what you have seen here, which these all come from China, you can bring your technologies in. Then we have made an agreement with Chuan Lynn that he gets paid a percentage of the same so you can concentrate on developing. As he has become part of the full time KF organization we bring you also in as full time that we can support you and ourselves, to bring different aspects of the T. If you are in Brazil or China or anywhere else and you have a product ?? this is the beginning of what we promised you. We support you in disseminating the T or aspects of it that you have developed. This is the beginning of the start of what we said, you can buy the balls for it or the full set, and this way we take everybody across the full aspects of the development of the T by the KS. We have seen in Brazil some KS have developed different kinds of (Pain) Pens and they want to promote it, we have no problem. We have seen in China or KS having different products. … (:20).
… .. What we have separated the KF as a donation and as a commercial side. The donations will hopefully go back on a separate line that it goes back to the KF. Many of you who sent donations to KF USA account, that account is not applicable. Don not donate to the Paypal there. The same goes for the KF Italy account, it is suspended. If you have paid any money in the past 2 or 3 months through Italy, you have to recuperate it back because that account is suspended. In the next 6 to 8 weeks you'll receive a totally new line of cosmetics that is targeted and was supposed to come out of Italy but it was hijacked, now it will come back again on very low prices. (:22). We deliberately keep the prices in a way that those of you who are interested to buy can afford it and it can be done. As we structure it in a bigger way. .. the KF has taken full control over the retail side. We don't trust nowhere for what happened to us to happen again in Italy. We'll develop the KF product range to 3 to 5,000 in the next 5 months. You'll see what I am talking about. When you come on the website it's not just single items. It's on Alibaba and the KF, you'll find a massive range of products. … I'll go further into it in the coming months and you'll see all the applications of the T in every aspect from the farming, the people who produce Gans's. We'll start categorizing it as our webmaster in the background and this time we'll take full control of everything else. There is one thing we'll show by the first week of February, what we call, Enhancement Unit (EU). It will nearly completed hopefully in structure by about 1st February… then it goes into its trials for certification for complete delivery in February. (:24).

(:26). commitments on what I have seen and negotiators are doing in the background. We will reach between 500 to 1,000 units per month. We can deliver and our contracts will be fulfilled. This process comes back to the K Seekers, in structuring that the KS who are looking for a different type of application we'll see how it can be done and part of the KFSSI we'll start training and teaching. Don't forget this and next week are the last time you can decide on what you want to study in research and we'll bring a lot of work into this. There is a lot of communication in the background about the Iranian conference and research and development between the IKF and KF supporters. We'll take step to make the sure in Tehran that all the technologies delivered by the Iranian scientists from the universities, groups and individuals.

(:28).

(:30). Everything on the health application wise is in the totally hands of Dr. Rodrigo …

Are there any other questions before we go into the teachings. No questions so everybody understood that is good. … How was it for moving the teachings today to 12 O'clock. Q: For the projects will this be within the private teachings of KFSSI? Yes. How would these groups be formed and who will be leading them, or is it someone who has interest will be the organizer? Yes, that's how we see it. And we'll give you a platform on Thursday and Tuesday U Council meeting and if there is a practicality you can join in with the, (:32). Rick's Thursday morning. You'll get the full support for this part. Q: Where would someone who is interested apply? KFSSI we'll open the teaching … Do you know when they start. Monday the 13th. No we are not starting on the 13th, forget about it. We'll start on the 14th. There are no classes on the 13th. R- No 13th floor. No, we don't start pm the 13th, can you change that on the 14th. So we'll start on the 14th and you can join in on 14th in the classroom … the first week to decide on topics. From there we'll start creating different Zoom numbers for each group. It'll be on the KFSSI platform that students can join, then we'll start building it up in testing and making the proto-types or different kinds of research .. (:34).

(:36). .. We canceled many of the teachings here and there. Anything that is not on the research and development of KFSSI becomes a fringe teaching and not part of the KF main teaching. The plasma private … The process for what use to be teachings like the soul teachings or other parts, these all become part of the fringe teachings of the KF. They are just there, we give some platforms…. They're not part of the KFSSI teaching but if people want to carry on with … we have to control a lot of things before it runs out of control. (:38). The process with the research, if part of your research shows promising results and then we can bring it in for full operational testing, it will be done in teams with it, then we'll bring people together to be able to do the tests. Hopefully now with us setting these research centers it will give us a lot of chances to do things slightly different then before, but you can come in for 3 or 6 months .. we'll give you the accommodation in the research lab and you can test it and then we'll see where we go. We'll develop this T in one way or another, and governments will play in that game of developing the T by the KF. Any other question? Q: When will the Huawei (Wah Way) implement the battery T? We will release that in the appropriate way. R- It's probably something that can't be talked about in public I imagine until it's actually implemented? We'll release that. We'll see what comes up and how we'll gather what we call the total amount in it. (:40). The photo has been updated, this is the actual system UBESU. The full prototype by the time they paint it will be finished around the 18th of this month. … (:42). … Any other question? Q: Why is it so difficult to use the soul capacity in the human condition? It's not difficult, we have made it difficult. What we call the lack of trust in ours, (:44). we allowed ourselves by not understanding it. I'll try to explain this in a different way. We didn't know, we took our heart to be the center but we never understood that everything needed a structure to be part of us, as an energy, we have made a lot of miscalculation in the totality of the life. Those we considered scientists, but they themselves not understanding the science of it have mislead us and those we trusted that

they bring new understanding and knowledge, by they themselves not understanding have created more dilemmas for the scientists to do it again. We see a clear indication of this in the past decades. Stephen Hawkins came up with this ridiculous idea that black holes are eating machines and being, forcing himself into becoming a false imminent scientist, stopped any new ideas to come in about the black holes. To me he was one of the biggest criminals in cosmology and his stupidity for 30 years blocked any new ideas, (:46). any new concept to be listened to, until he read the papers about black hole by us, and then he changed his mind and now suddenly the whole world of cosmology has changed. Because of this ignorant and ridiculous scientist, **Stephen Hawkins blocked any new ideas, because he made himself, forced himself to become an imminent scientist he blocked everything, and this is part of our problem**. This has been part of our problem, even when it comes to the soul, religious leaders have done the same to abuse man. We see another criminal scientist called Einstein, he came up with the same thing, speed of light as the ultimate speed, and people don't, and people come and say, Einstein has said it. A bookkeeper, for god's sake, the guy has no understanding of physics, and now they have given him the control. This peer review and the conditions they have created, has created these problems for us. If you look from the time Stephen Hawkins read the paper about black hole, and he understood all the mistakes he made, look at every single lecture he has done (since that time), it's a copycat, copy of KF teaching. He changed his idea about the creation of the U, and about the creation, because he understood his total ignorance of science and he tried to make himself .. but it won't stick. It's part of us not understanding how we were created, and things are created, we accepted what I call a bunch of ignorant people who call themselves scientists. (:48). Because of their, whatever, religious background, like in Einstein, he was nothing, we gave him that position to abuse us scientifically. Now everything he talks about, leading scientists are proving to be wrong. String .. everything to do with his string game and then his ideas with everything else. He never understood, he wasn't a physicist, he was a made up man, that he believed in himself, that he was made to believe (he believed what the others thought he was). We learned a lot of false things from him. **Now we see the same thing with the soul. the STM being the center of the creation. Now we understand, if you don't have a soul , we cannot be, if you don't have a sun in the solar system how can you have a solar system.** It's like this new idea, which now we see, we understand it, but still we don't understand the totality of it, of finding what we call single planets in the middle of galaxies, that are not connected to any solar system. They can't explain it, but it's very simple if you understand the totality of it. **How can there be a single star or single planet, because it's dark and it doesn't have any dimension to it, be it existing on its own, between the galaxies or between the solar systems**. This is normal, and now if you listen to scientists who are trying to come up with ideas about what it could be, it is becoming ridiculous. Cosmologists have become a bit more now that Stephen Hawkins curtain of stupidity has gone, now we see a lot of people coming up with, not understanding of even the creation of matter, or how the U was created. (:50). If you understand how the U was created then you understand how ourselves in the womb of the mother are created. A lot of mysteries and false information will be solved with this Enhancement Unit (EU), because it's a replication of the U. It's not a half system, it's a universal system and a lot of this will be resolved, because we give room, we put different units in KF research centers, which KS who signed for

KFSSI can go in and test. What is the point of the elevation of the soul? What mixture do we need to have? What is the time span of it? When can we change the soul but into the physicality that we created? These all need to be done. We will not have any more time to waste because the systems are there, we can replicate the beginning ?? time in each system. This EU has not reached the point, this is just the beginning, now we are going to the next step. The next generation of the EU will come out of doing your research. You will see what I am talking about in the coming time. **The next generation of the EU will be totally different. It ?? should be out by end of next year**. It doesn't mean that these units go obsolete, it becomes a ?? these units will become more powerful to show more. (:52). This is why I said for KS to come in and plan, I want to test. A number of these units are placed especially in AZ, 4 units are left for KFSSI research. To go there and do research, water, energy, contamination, environmental, enhancement of the soul. Six units stays with KF to pay for the expenses of it. Then this level of 6 will be increased to 20 to go into the operation of the KF cooperation with the American and space units, for scientists. Then it becomes international. We have already seen the place in AZ and John has hopefully made the first moves for acquisition of it. The KF research for health has already been purchased. This next step is the space center research and development, 10 units will go in there, and it will become part of the Iranian and American space , most of the American space T to move in there to start testing the space T, the same as what we do in Tehran. In that process of the space T we have to understand the soul. It's not the physicality because now we understand everything is made of fields. We had a discussion in the Iranian KF that one of the KS in Iran, we have to understand the mentality in the Islamic world that what happens with a lot of things which has been said in the Koran or in Torah, (:54). or in the New testament or whatever. One of the discussions was the cutting off the hand as a punishment. Okay we cut the hand off by the Islamic law, but now the KF T shows you can grow it back. So the criminal continues to carry on with his criminal offenses. ?? If he goes in the system he can grow his hand back. We have to update the religion to ?? understand. So now we understand that we need to enhance the body of the man so he doesn't carry on with crime, they enhance the STM. Understand why you create these conditions of crime. Now the game has changed. KF KS come and say we are doctors, we want to see how we can grow a hand, foot, or leg in these systems. What are the consequences, why now we understand a lot of religious ?? writings don't make sense. **We start questioning the religions, because of what they put there. Now we have a system and we can see it. We are not contradicting it, we are showing what it is**. You say, Moses saw the fire or the light or whatever, that's the interaction of the soul. Now we create, we allow your soul to become strong enough, the strength, then the brain cells can, (:56). ?? stop the strength and what we call, superimposes the physicality, that ?? it becomes a light. And if I speak to you, so you become my god, as I see you as a light in the system. do you become a new prophet. This is where I said many times, when we take man to space he'll become so knowledgeable that nobody can claim to be any different. In the teaching of today I have explained to you an old hypocrisy in the world of science, of even this planet. We all accepted it. It's not acceptable, it's not there. I put the seed of thoughts about it being wrong in the first book when I called it the Caroline Core. It should have been understood because a lot of KS now are going into the development of these dynamic systems, especially I announced today that it is getting, that you can buy. If you see that and understand the work of it, and if you stood still for 1

second you can see the biggest fallacy in the world of physics, to do with Astronomy and cosmology has been accepted and because what I call, somebody came up with this, like the fossil fuel comes from the remnants of the dinosaurs and whatever, now we have proved that it is all false because everyday millions of tons of oil comes down, because you created it on top of your CO2 Gans boxes and everything else. (:58). We see how rubbish it has turned out to be. Now we have to understand how much we have accepted false information even about the physics of this planet or the solar system. Now if you understand the new or what we clarified in the book, but nobody has understood. It has to be understood, because **if you understand that then you understand the position of your soul**. Then you move on to the next step of understanding the totality of the creation. There are a lot of things that haven't been understood and a lot of it just becomes fallacy on top of fallacy that we have accepted. Let me explain something to you very interesting, I wrote this to... I want to share .. Let me come back to something which is extremely misunderstood and now as K Seekers you understand. What I am going to explain to you is going to shock you, but it shouldn't shock you, and some of you have already understood it.

The present world of astronomy and geology, and the scientists in this world have told us and we have accepted it, (1:00) which has been total nonsense, that as the U cooled down we started seeing matter. What a rubbish. (Rather it's**) the matter strength of the fields of the plasma strength reduced, that we start seeing matter (forming**). Then there is another fallacy on top of this that by cooling down matter appeared in the U. And then by creation of whatever we start seeing stars, planets and the rest. No such a thing. If you understood that in **the motion of MG fields, they all don't go in one direction, and by loosing in interaction they turn back on each other, you understand that the U even our solar system, even our U was created out of the interaction of the fields in finding 2 different poles, 2 different directional motion (facing each other) which created the gravity, which lead to the creation of the U in the matter state as we see it.** This is a huge difference then what it is now in the cosmology, in the understanding of the creation of the U. The creation of the first elements, first fields, first plasmas came out of the interaction of the fields which in that interaction, those who were moving in the opposite direction created the gravity. This is not in the books of today. (1:02). Today they talk about every rubbish, except understanding that nothing in the U can be created if there is no G field force, so there is no cooling. Now we understand it. **If you as KS and the future K Seekers will create the condition in the systems or in the dynamic cores which you start playing with, you will see that you start creating matters inside the cores**. If you know how to play. The biggest fallacy of cosmology and that according to the U, of things, of matters, the first matters appeared is all fallacy. The only reason the matters appeared is because what we call the interaction of the fields, the first signs of gravity appeared and that gravity according to its strength starting pulling other fields that in interaction, some reached the matter state to the observation or point of view of the man. At the moment the cosmologists tell us that the mass of the matter in the U is very minute compared to what it (really) is. What a rubbish. The U is full of mass, depending on what you are looking at. Nothing was happening in the dark until we made the glasses that can in the dark (infrared glasses) and see life is active and everything is moving. Our lack of knowledge

and not understanding and believing some of the fallacies of the other scientists, who they themselves have never understood has brought a lot of problems. Now for the first time you understand how the U is created. How in our U the first matters appeared. (1:04). They appeared because the U is totally and absolutely, what you call, a dynamic world of motion of fields and some of these fields in reducing the speed by interacting, have lead to creation of the gravity, which that gravity has in turn, turned to creation of pulling more fields and with it creating the first element and then the first stars. So our U has been created out of the interaction of the fields and in the dimension and the fields of it, but when we look deeper and in understanding this, then there is another dilemma in which we all get tangled with it. What we see is that all the elements in this U in a matter condition (move in), what we call, anticlockwise movement. Then when we look at the galaxies their arms appear to move in the same kind of direction. But what is interesting is why do more, or why do most of the galaxies that we see rotate in this direction. Why don't we see this direction (clockwise)? Does this give us a better and bigger understanding of the position of our own U in the Unicose? If you understood simply, that if you are in the northern hemisphere when you open the little top (plug) on the bottom of the bath (tub), you get that rotation (anticlockwise) and in the south you get this rotation (clockwise). (1:06**). Is the anticlockwise motion of our U an indication that we are in the northern hemisphere of the Unicose**? In that position do we now understand **why we see some opposite direction motion in part of it because of other universes, and at the same time because of creation of the fields which are trying to balance the mixture of the U**. If that is what we see and the motion of our U is anticlockwise, does that mean, a very fundamental point**, is our Creator in the center of the whole?** If our U sits in this position, that is in the anticlockwise motion, and there is another U in the clockwise motion as we see (on the other half of the Unicose). Don't forget what we see in the macro is in the micro and what is in micro is in macro, so it can't much different. We believe and we see that we have an earth which is rotating and we have a center. (1:08). Does it mean that the Unicose itself has this shape? And does it mean what we call our Creator, where the original fields came, that in interaction lead to creation of the universes, also lead to creation of us. Then it raises another question, as this process of change has taken place, as we have seen the creation of the man in different part of the U, in our planet, is it the same? **Is there another dimension of the life which replicates man on the other side of this Unicose? Or have we become the reflection of it (draws an infinity loop around the 2)**. With understanding the truth about the interaction of the fields and how they do, we find out we know nothing about the creation. If this creation is in such a position, does it have a center and a soul? Which interaction of the fields of it, lead to the creation of physicality of it? Then the question of cosmology, the way our little U has been thought to be created, stands corrected in every dimension of the science. (1:10). Then there is more to answer by misunderstanding by our own people in the past times, something which, one of the first questions I asked as a teenager, and I asked scientists in the nuclear industry and cosmologists and they can't answer because what we say is 100% correct, it was this. **In the present world of physics, with our geology they tell us that the heavy material sent to the middle, the center and we have a solid iron core, and this has created the rest of it. With the knowledge we have and this is what I understood when I was maybe 10 years old was that this is a load of rubbish. The more we go into the world of science we**

understand that we have accepted the biggest fallacy in the world of cosmology, physics and everything else, and nobody has put it right. I mentioned it in one of the reasons in the first books was, this is why I created the core I called, Caroline. Because if you were similar to me as a child and you could see what I could see, you would have realized, that I am correct. **Two things, the center of this has to be hollow? (1:12). First of all because we have seen a copy of this in the dynamic cores**, we always get that hollow center at a given speed. But when you look at the structure of a planet or a star, galaxy, U, or Unicose there is one fundamental point, if you understand the totality of the world of physics, what they have been telling us that the center of earth is a solid core, or what they call the outer core, or the inner core. We call it an outer core and then we have an inner, inner core, or whatever you want to call it. It cannot be solid. It doesn't follow the laws of the plasma or the laws of physics of the cosmology. If you understood what I did as a young boy, it's very simple, by creation of the centrifuge, you push the material to the edge and the heaviest goes outside. **This is by the law of centrifuge, which means the rotation. But by the law of the plasma in a vacuum condition you don't need a centrifuge and you still get the heavy material to the outside**. The center in both cases, (1:14). is the lightest and empty. You rotated those balls and you saw the center. Earth is a centrifuge 1,600 kilometer per hour and is in the vacuum of the U. Now go a step further and look at this, the body of the man and the STM. If you understand this. If you understood what I understood at the very early stages of my life, that how much things don't add up, what do you get. Go to our little ball. We have a vacuum ball, then we have a liquid water to the fringe of it and then we see the material. **In a centrifuge we see the same, we push the water and then we collect the solid on the edges of it. So is the body of the man, in this process of the body you have the soul, (1:16). then you have the brain and then what it has done is create the physical dimension of the body of the man. But because of the proximity to what we call, the soul of the earth, it has taken the shape of the body of the man**. If you go back, because we understood the wrong way, that the center of the earth is a solid core, metal, because it has to be magnetic, a steel because that is the only time you have a magnet. Do you see all these fallacies which have come out. We have not understood the condition of the creation of a vacuum, or of our own soul, which in our case, this friction, we call it the brain. Slowing down in the strength to becoming to the matter state. **What we see on the surface of this planet, sticking to the wall of your reactors, and what we see as the skin of the man. Then the interaction of the fields inside with each other dictate different conditions, we see liquid, or what we call magma, then we see the physical matter states, (1:18). and whatever it is that it can create, here we see the brain and the interaction of the physical body**. If you understood this, and this is the reason we introduced these new reactors for sale, is that if you can replicate the MG field **.. if you create the condition of the gravity of the earth in respect to your core you will see physicality manifestation**. Isn't this what we are developing in the EU. Isn't this what we have not understood before, and been lied to, and we accepted it, that now we have a problem to understand our soul. Then the whole riddle of the creation changes. It's absolutely impossible, an impossibility, for any solid matter to go to the center of the earth. If you understood even a little bit about the world of physics, rotation of the matter, creation of condition of matter, and what we call, everything else. **The pressures will play a game, but the pressures do the rotation and the creation of the fields confirm**

to us, (1:20). that the center of this planet is hollow. The center of every planet is hollow, every star is hollow, because we have the system and we can see it. If you change the speed, and the M fields vacuum condition you will start seeing different structures. Then the question comes is there any difference between the soul of the system you built. Does it make any difference between the soul of what we call, everything else which we did. Does it come to the point of understanding the totality in how do we go back in comprehending what we have done, what we understood. Then we understand that we accepted a lot of fallacies. (1:22). **Is the field of the plasma the creator of the matter, or is the interaction of the fields of a plasma (Pl) leads to the creation of the matter? Depending on the strength of the fields of the observer at which level does matter appear**? This is why many times in the teaching I have said, what is red to me is not red to you. This is what we have to understand and now that we have come to the point of comprehending more and more of the totality, **does this mean, is there a Creator? Or as the radiation from His fields we have become part of the Creator, because through His strength we are connected, all of us, we are connected to this**. We have to understand where are we going to. Now that we start working with the dynamic systems, (1:24) and now we have started understanding the creation of the Pl fields interaction, the game changes drastically. Because now we know we need a field source and if we create enough conditions within the field source, will it lead to the creation of different matters, and do any of these matters have different meaning, or has a different value from the point of observation of the Creator, as they are all, in all essence, connected to it. Is it man who has made the difference due to a lack of his own understanding. There is no ambiguity about this knowledge anymore. It is very clear. **If this soul is the soul of the Creator, then I am connected to its own strength field of interaction with me, it doesn't matter which galaxy, which U or which part of the Unicose I live. I carry its strength and knowledge, and I carry His mighty (power).** (1:26). It's me who has to understand and has to comprehend and comprehend the totality of where do I sit in the strength in respect to Him. But me being on the fringes of a galaxy, and another one being in the center of the galaxy has made much difference. Or being in the Unicose further from Him means you are different than one who is closer, even though we still have the same strength. Does it mean, I made man in the image of myself. It means I made man from my soul. I became the Adam and through the creation of my own fields and I confirm my own existence. Does it mean that everything created in the U is the Eve? Create as part of the Adam. We call it a rib. Or is this his rib, or the same? We haven't become ?? coffer because we understood the totality. We have become wise in understanding the truth. There is a very important point that I raised for a rabbi. (1:28). I am still waiting for an answer. That is, the light, the fire which the prophets claim to see, is that, what we call, the interaction between the STP and the STM itself? That in the eye of the physicality he sees the interaction of the light of his soul as a light of knowledge. Or enlightenment. If this is the answer, which is the answer, then it means we all have the capability to stand from the STP to see the interaction of the fields with our own soul of the creation which we call, the enlightenment, the light of knowledge. Then we all stand the same with all the prophets of the past. We should not call ourselves a prophet because we have come to understand the totality. But do we have to strengthen the soul that in interaction with the STP we'll see the light or do we have to enlighten the STP to, with its interaction with the STM, to see the light. In either way, whichever way

we look at it, what we call the light, comes, and it can only come from interaction with 2 fields from 2 different directions. You call it the Sun and the Earth. (1:30). The interaction of the fields leads to the direction of what we call creation of light. It cannot be any different in interaction of the light of the STM and the light of the STP of the man. **Then when you become that light in super-passing what we call the STP in interaction with the fields of the U, you become a light**. Would we see that light coming out of the universal box. This is the biggest fear for those of you who are lacking the knowledge of understanding the totality. Many religious people, be it Ayatollahs, Archbishops, Rabbis, will create this mayhem because they know they have lost their position as the man has become knowledgeable to the source of his own existence. Then the answer becomes very simple. In what strength does one reach to be, to be strong enough to be as part of the soul of the Creator? The biggest dilemma for man is, at which level does the present STM sit. If this (highest) is the soul of the Creator. (1:32). Then it comes to man to ask himself a question. If they say there **are 7 levels in the level of the soul,** is the STM in his position (lowest)? Where the ultimate goal of the 7 is the soul of the Creator. Or is the fingerprint, is the mirage of the man not understanding the totality. Now you can see how fallacies have lead to acceptance, to become the truth (falsehood has become truth). Our U was created out of cooling down, which now we know is rubbish. It's created out of the interaction of the fields and the creation of gravity, depending on the strength. Now that we know 'the center of the planet is solid,' is a fallacy, then it comes the truth, to us, for us, and that is, **is our Creator within us, and are we within the Creator, or within the realm of totality of these fields (all the 7 levels**). (1:34). The biggest question is, with the teaching of today, with the teaching of the new message, which we have brought, are we showing you to go to the next level and there spend time to learn more, to become more, or can, through what we have taught you, to **be able to jump, and become at the strength as part of the Creator. The answer to that is, yes you can**. As you know the field of the Pl rotates and the stronger is in the center, and this is the position you take, but the fields are all coming from the same source. Then a lot of the books of physics have to be rewritten, isn't it. Now that we know that the center of the earth can't be metal, as they said, the heavy one sinking. The law of centrifuge as the earth is rotating, and the law of MG field in a vacuum condition tells us that our planet is created exactly like we said, the heavy material has come to the edge, what we call the surface of the planet. The same system, the physicality of the man, and the same as you have seen in the core, then if that is the case as it is, then it has a center, which as you can see in dynamic reactors, has created a position that all the fields balance and share, like, has to empty, so it is the same as the STM. (1:36). As I said to you, this year we start teaching in a very different dimension, that you can understand the totality. Then no one can tell you lies and no one can cheat, but in a way the teachings of the past have brought us to where we are, to be able to understand. But if we would have understood it correctly from the beginning, wouldn't that have given us a chance to now, and not billions of years as man, you would have been higher (on the 7 levels), to be closer to (the Creator). But what does it mean to be closer to the source of the creation? That we become part of the Creator, and in fact, we become it, to become radiant, to radiate. When you put the fields together you come to one point, **interaction of the fields of the Gans's and the plasmas creates new dimensions of fields, which can in interaction lead to new dimensions in every aspect of the creation**. Where they

interact leads to creation of new conditions and new matters according to the point of the eye of the observer, and according to the field strength. But are all these matters the same from the point of view of the observer? Or you have to be of a different strength, (1:38). and different observer to see what we see. And **do we look at the wrong side of the light. They are all looking at the light that comes to us. We are not looking at the light that goes away from us, because that comes from our soul**. That comes from our inner being and man has not understood this yet. Then if you understand this, does the man need the vision of the eyesight to see. Because, ISMW (in so many ways) what you see has 2 options, **you see with what your eye can radiate and in interaction with what is radiated, you create yourself an object. Or you see with the light of the soul and then do you see the same object? Then you understand mankind doesn't need an eye** to see in the depth of the U, (1:40). where the interaction of the fields of his own soul gives the true dimension and true reality about what he comes to encounter. If the fields of the other side by which the G fields of the STM comes to be, the field of what he can absorb, or observe, he says no to, then you'll understand when I tell you, your soul sees the soul of the other before your physicality sees. If you see that, you see how easily you can see what other people say and talk, in reality to you. As I said many times, 'darling I've got a headache.' You can see through the soul and there is no pain there. This is what we'll see but the wisdom comes in silence, because your soul has already made the decision how to react. (1:42). Then when somebody says, 'darling I love you,' then you understand if it is really love, or it's just a talk. Or is it true love, or is it made up. Don't forget from the point of even love, love means giving. I give you everything when I tell you, 'I love you.' My physicality has no dimension because you receive it from my soul. Then when you see that the one you have given love to, has already given to someone else, and they pretend, then you'll see it clearly. But it's your wisdom that you keep quiet. It's the same in the depth of the space, when you come and see a new soul, you decide, is it going to eat me, or tap into my energy, or am I going to eat him and tap into his energy. Then you understand in the U no one taps into anyone else's energy, as man does [anything] to the others. This is why we created the term of MaGrav positioning, at the point that everything is in balance and in correct condition. Nothing can disturb the position because the fields from the center, (1:44). of the magnet and the Pl, have already decided, the physicality just shows the position. Now you have seen in one teaching, in one morning how much we have thrown away by what we have accepted. Now go back and try to rewrite all the books, that the heavy metals have sunk in the middle and the center of the earth is an iron core. What a load of rubbish we have accepted. Then goes the same with the STM, do we need others to tell us about the position of our soul and what is wrong and what is right, or do we see through our own soul. It doesn't matter what fabrication. Any questions. (1:46). Q: How do you get heavy metals out of your body? Buy yourself a new centrifuge. Not by buying a centrifuge, but in a way by understanding the motion your soul and the motion of your physicality. If mankind understands, **if you can emotionally understand that what you interacted or created leads to the cancer** of the breast or creation of cancer of the prostate or any other cancer which means a change of fields any way you look at it, then you can change the same position to change metals in your body. Then you change the fields, then would material or the fields of that matter you think, because in the body of the man everything is in the Gans state, nothing is in the matter state. (1:48). **Then will**

you be able to change its fields that it won't be a poison to you or what we call as a poison giving fields, disturbing or changing the operation inside the man. One day, if ever mankind listens to the past 1.5 hours of teaching, and sit down and read, and if he truly understands it, you are on the right path and then you understand how much fallacy has lead to so much problem for humanity. Q: Can I jump in? Be careful you don't jump in the deep end. .. I have 3 questions. .. First isn't the creation what they call a nymphomaniac condition? K- Pardon? Q: the creation. Isn't that part of the nymphomaniac and schizophrenic condition? (1:50). We already have it in our bodies? K- You mean schizophrenic? Q: .. I never can say it perfectly unless Dr. Rodrigo can say it for me. Nymphomaniac. … K- **Do you know the difference between the schizophrenic and nymphomaniac**? Q: Yes I was there in the teaching. Is it that the schizophrenia comes after the nymphomania? K- I think we have to get a definition by Rick in Wikipedia. Q: I will ask another question. No you can't wait for this one. You raised the question to me, in so many ways, they have nothing to do with each other, but it answers the other. Okay what is nymphomania and what is schizophrenia? (1:52). Q: I am going back to work and will ask later my questions. K- .. you raise the question and you run away. R- We get hyper-sexuality and sexual maniac. Hyper-sexuality is extremely frequent or suddenly increased libido … The term nymphomania for women and satyriasis for men. … K- So what does it mean in reality? It means oversexed I presume. R- Hyper sexuality may occur as a side effect of medication such as for Parkinson's .. K- Why does he ask the question if the two are the same? (1:54). It's called sexual addiction. There is a fundamental difference or connection between the two, but one can be or to show itself to be the other. If you understand what we call the beautiful people which means there are more souls then one contained within the containment of the physicality of one body, which now we understand is a reality. If you have 3 souls in 1 body and each one has his turn to do (sex), to confirm, so the blond one has the pleasure of satisfaction in the morning with John, and then the black haired one Jack wants the same satisfaction at lunch time, and then the Sam in the afternoon would like the same pleasure. One body, three souls, all after the same. Does that make that physical body a nymphomaniac? Or if you have Jill, June and Fatima in **the same body and each one takes pleasure in different physicality of the man, (1:56). and wants to get the satisfaction of the physicality, confirmation of existence, which is replication of ?? Does that make that body a nympho?** Or does 2 of them want nothing to do, because they are satisfied sexually but the third one has a different idea, and anyone will do. We see this in schizophrenic, people with 2 or 3 souls, and one is not aware of the other, but if they take turns, but they are aware of what the other one does, they try to do what they like, but if you understand this does what we call, beautiful people, will give the right to only one of them to have the pleasure, and the other chose their own. This, what a single person can have that condition of repetitive satisfaction. Because the biggest addiction in the life of the man is what was given as a stimulation as sexual behavior. Why do we get addicted to drugs or alcohol, because it gives a certain what we call, (1:58). physical, psychological or chemical satisfaction or reaching to a level. Does this mean if we can satisfy that level then we need more and more, or you don't need some of it. I have seen all conditions in this structure, women with 3 characters and each one likes a different type of man, or one only chooses when she wants to and the other time doesn't. I have seen it with a married woman, and when you ask them they don't

remember because they haven't done it, because "it wasn't me". When they are with their husband, let's say it's June, but when it comes to another man it's Cathy was playing and it has nothing to do with June. She says I haven't done anything I am innocent. In fact it was June who was playing. They target men directly, because it's the type of man they like. You see nymphomaniacs, or people who get repetitive, to satisfy their addiction of the creation, what we call to reproduce in that position. We have to be clear which one we are dealing with. (2:00). I have seen all, many of these cases, they deny, it's something you dream about, but in fact, Cathy was playing without June knowing. It's very much as what we explained in schizophrenic, you give them each one, and they are experts in the topic they are interested in and at the same time, each one has a different sexual habit, or attraction, one likes to go out with a blond and one with a black, and one with a bald. As it's the term for each, you say it's a nymph, but in fact it's 3 people who are satisfying themselves with pleasures of the birth, or human rights. This is what we have to understand, they say, 'oh, I have been faithful to you, I have done nothing wrong,' yes. June did, and Jacks term and he satisfied for June. This is what we have seen in some beautiful people, as we have twins of the same sex, we have twins of mixed sex. One likes to go out with a man, and likes to really go out with a man. But one goes out with a man as a man friend, and one goes out as a sexual partner, call it homosexuality. But the other one likes woman and ?? with him. This is the state of mind confirmation of position, that's why we see men who have certain behavior and we call them whatever, or women who have and cut their hair to have certain behavior. (2:02). Confirmation of position. Satisfaction in the point of demand. Therefore, when you speak about nympho which one is it, and is this the reason why Jalal raised this question? .. Is it common? Yes, in some cases, what we call "beautiful people" with 3 characters, so with 3 of them each one likes his own satisfaction, because it's the time when they have the position of physicality. Do they become a nympho. They don't even remember what the other one has done, or they remember and they deny to cover. I have seen that clearly. One has done the act and the other one becomes aware of it, now the other has to deny it.
Q: Does that lead to the virgin birth? No, somebody was there with one of the three. **Virgin birth is totally different, if you think of it, comes from the interaction of the STM and the STP of the man.** If you understand it and the cases are there. But when you speak about nymphomaniac you have to understand which one it is. Then you understand yes, **there are women who go that way and even change the color of their eyes for each man**. If I like to go out with a blond, and the guy likes green eyes, my eyes turn green. This is something, (2:04). that if you understand it, you let it be on its own. I have seen it, they change the color of their eyes. They change even their behavior, it depends which soul is in possession or in operation, and then they deny the other 2 because they can't confirm the existence of it. Because then it is them, they used the body to do whatever and they deny it. But it is the same body. They can't fool their man or their husbands or partners because it is very clear. Or in fact they're women. One of these (beautiful persons) has been one of the advisors to the Whitehouse for a long time. One of the characters is homosexual and one, I don't know if the guy is still alive, used to be one of the worst womanizers ever seen. But when it comes especially to women, because it's the same body they deny the other. 'It's nothing, you are just dreaming, it's your imagination.' **It's very common in schizophrenic conditions, men especially in a young age one takes over and the other wants confirmation of the existence, and**

that is why they kill their parents, or they attack their parents. (2:06). Because the second one wants confirmation of existence, but if you become aware of your 3 parts or 3 souls in your body from a very young age, you can play it, I have seen it and denying of the other, 'it has nothing to do with me, you stuck it on me.' But if you go through the history of the souls then you see that is one of the souls who started playing very early age. And then they deny and claim innocence, but they have done what they have done. They go and they kill their father or mother, or they betray their husband, 'it's go to nothing to do with me, I never done.' But in fact the other soul has been for a trip, but does he become a nympho or is it 2 different levels that we have to understand. Man has to become very open about these things and understand it and then they can live a life. You can comprehend what is going on, as long as they understand that they can't lie, then it is just to leave them, it's just to leave it because when you see that they are in this position, it's one of the souls claiming he has nothing to do with it, but you know. Or you have fallen in love with one of the souls, not with all 3 of them, and then deny and what you call, adultery comes in this position, it's just respecting and walking away from it. (2:08). I saw this the first time in 1980's and then continuously I have seen many more. What is your second question. Q: In your drawing, if Rick can go back to it. I don't save the drawings. It's amazing the colors of your drawings. It's beautiful .. This is the webmaster when he knows what to get you … The sound is so clear these days and we don't have any problem. We don't get Mr. Rick Crammond saying, "I am finished with all this nonsense .." Now we don't have that, we are keeping him. (2:10). What is your next question. Q**: If we have a reactor, ping pong ball and we manage to create an empty space in the middle and this is the free plasma in it. If we take it out this dot. If I take out what will happen? K- You can't take it out, unless you are the creator of the conditions**. Q: Yes if I create the condition, can I manage to take it out, so what will happen to the structure of it? Nothing, because if you can keep outside, the same condition as inside. Yes. Otherwise you can't. Q: I can't pull it out. K- No you see this is something with a lot of people. I have seen the Iranian K Seekers they're at it like crazy, and they can't get it. What the Iranians are doing is they got this reactor and rotating it and they are trying to see this ball (hollow center) in the middle and it's very hard. **But if you have 3 or 4 reactors running around or a huge amount of Gans's around, you'll see that it becomes very easy. Because now this is the interaction of the fields around the system, interacting too. Earth is not a earth on its own, it's within the fields of the U** and that's why it behaves this way. Do you understand? (2:12). When you are creating these hollow centers that you are looking for, you have to understand that the (other) fields you have created also count. (Somebody says, it looks like he has practiced (drawing) a little more. No. ..

When we look at this, trying to create a hollow center, don't just look at your own system, look at what you created around it. What other fields, other Gans's and then you'll observe the position, the pictures and what you receive and what you see. (I tried to get the pictures back but it doesn't work, they must have been deleted.) Q: … I didn't see will see later. What was the third question. Q: It was what was the new system (electronic blackboard) you are using? Done by our webmaster. (2:14). ..

Any other question. .. You have to understand how much effort is put by Alzar and Hassan in the conference in Iran and the Persian teachings in the background, thank you very much. . Q: In the last 3 teachings you mentioned about the ripple effect in the human

behavior in your work, good or bad on the U (Community) Council, .. what is the human work on the other dimension of the soul, if you could elaborate more on that? K- What do you mean by that? Q: **When you do good of bad, it has an effect on the U Council, (not council but Community) U Community, so what is that ripple effect? (2:16). We take from them,** because this is what I have said many times in the teachings, it's not any more who shoots the bullet, it's who made the bullet, who done the other things, and it's the same when the soul is freed from its body, when you shoot the body or the physicality, or deprive it of the physical condition, **it has an effect on the other souls in totality, they have to accommodate and position themselves according to it.** We take from them or how much we give them. The mankind has to realize that he is not alone, 'I do what I like,' anymore. Not only in the dimension of the physicality but it's the same in the dimension of the soul, but in a larger and more effect scale. This is what we take from people, what we are not allowed to take. You have to give the room, free to do what he likes, this is his right, and when you realize this you create a peace for yourself. When you reach that point to you understand that **you can't steal from your soul, and the others try to steal, then what happens. When you put it right**, everything goes right. (2:18). Everything goes right for your soul, for what you are there to serve, so in effect, what happens to your immediate family, happens to your immediate soul family, where you are within (a part of). That soul family is part of the universal soul family. .. **It's like playing a game of chess, you know you have different figures in chess, but the figures don't move on their own, there is a hand which comes and moves them**, positions them. The figures are there, you might have a computerized one that can move itself, but somebody has thought about this move somewhere, that he has given him that essence of what he has got to do. **The man is the pawn on the chessboard and the STM is the one who moves it**. But this has a functionality of itself. But if you sit here and you are the only player, there is another player, which is emotion and is thinking and effects what the pawn of his moves and yours. How you move this pawn is effected by this and if you can understand how you can interact with it, then you can understand how to touch it, to effectively dictate, (2:20). to it what it does. This is what we have to understand, our physical life is that pawn, it has physicality of presentation, it's there, it's our soul that is effected by it's motion, by its behavior, what it stands for, and what is dictated to the others who are themselves another pawn in the game. But in fact, there is one who stands here and when you die or are taken out of the board, he has to understand the position of it, because there is one less to have. This is what in reality we are part of the bigger structure, and our physicality is just a pawn on the pages of the land of the space of the planet or part of the U. But in that sense there is a soul, there is a controller that has no physical dimension, there is a play on the board but it decides what are the consequences of that move on the board, and it has to pay for it, or stand the loss of it. It's a very clear way that our physical life and the STP is controlled and dictated, is conditioned through the condition of our soul, and the soul, not having a dimension of physicality is part of the U Community in which physicality is, again, in the same position as the man. Or they know where to stand physically in respect to the soul and physicality. (2:22). When mankind finds harmony and balance between the STP and the soul, then you'll find a peaceful and a correct man. When one is doing or has done wrong to his soul, and the physicality stands (goes along with) it, you'll find everything goes wrong. Because when you do something wrong in the physical dimension your soul has

already made the move to make the position in respect to the other souls what you have done. Then their reaction brings back to what you do, your physical condition, through your soul. When we just had Jalal talking about nympho and schizophrenic, or what we call beautiful people, most of the consequences for which soul in that body, and which soul finds its position in respect to the others because it deprives the others of the position. As I said many times, I am not a fool, even though I pretend to (be), that is the condition of the STM. Q: … If say, I marry Suzy and Jack and I am totally aware of all 3 souls, can I become one of them, I know who is doing what, (2:24). and then take responsibility for it when I was asked. If I understand this or no, it is not possible? What do you mean? Q: For example, I am Mary and I go break a vase and then I become Jack and my mother asks me who broke this, then I can say Mary did it, because I am jack right now? … and I don't blame it on the other one or create mayhem, and I can work with those 3 souls in the body simultaneously and be benefited from understanding each soul what their strength is, and what the development of each soul is and what they can do in that form? K- You have to work, or you've been working with, or understanding when you speak about the beautiful people, their behavior, then it is totally different. They cover for each other in the physical dimension and when they do something wrong and the one is always present finds out they have done something wrong, they do everything to try to cover it up or correct it. They become each others souls, what we call, balancer. (2:26). For example, if one says I broke the glass, the other one says I didn't do it. But up to now we (as humanity) were not aware of this condition, but now we are. We have to see how the souls play in respect to each other. Many times when you have this condition of let's say breaking a jar, or when it comes to what other people call adultery when it comes to involvement in other people cases of dimension of physical emotion, as Jalal was telling about nympho, 'it's got nothing to do with me, I have never done anything wrong.' But they're aware that the other one has but they cover it. Then you'll find the third one totally denies it. … Or in the initial stages one tries to recover from it or tries to cover it. In many cases when you go into the legal system with cases of schizophrenic which get sentenced to long term prison sentences, the judges don't understand. If I go for a case to stand in the court with a schizophrenic, you call it a nice people, I (would) make a dilemma for the judge to decide why 2 more souls have to spend time in incarceration when one of them has done it. Then that one who is getting incarcerated because of his behavior. (2:28). Wasn't he trying to confirm his own existence, then are the souls aware of it, and they put it right. The souls put everything right, because when one does wrong and the other one tries to understand, I didn't do anything wrong it is him, but I deny it, because Mary didn't do anything, but Jim was at it. It creates a lot of problems inside for themselves and then they deny everything, 'nothing happened, it's your imagination.' In the cases of murder, or hurting and damaging, their parents or their mother or father, which they mostly do, it's lack of understanding of the legal system and the scientific world of what it is. Why, when you have triplets and one of them does a crime, do you put the other 2 in prison. (But in the case of schizophrenics), because one did it, they are all together. What is the condition of their souls? One soul has stolen the freedom of the other 2. Where do they stand in the totality of the judgment, they all balance of the fields. I have seen cases like this, (2:30). both with men and women. You just walk away, because either way at this moment in time there is not enough understanding both by the body and the society of correct

conduct. It's always somebody else's fault and never mine because, ?? .. because, 'I just didn't do it.' That's why when they become aware of it, a high rate of schizophrenics commit suicide, because the one who didn't do it, was not there to do it, but he is the one who is known to be the position of the physicality. But you imprison 3 souls. Q: About death, **in Islam, Christianity, Judaism, Buddhism, each of them has their own story about what happens to us after we die**, and all of them are adamant about what happens, but none of them have ever died and had those experiences, how is it possible they can talk about it so clearly after we die, nobody has died and come back to tell us this is what happened? Where do they get this information? K- Who says that? Q: When we have our Farsi teachings people send me information, Christians and Buddhist people about exactly what happens in the death, what we should do, how long we are holding in this place and then we go to the other place, (2:32). They have a very clear idea what happens to us. But I want to know what happens to us when we die at the present moment? K- The thing is, this is how, what you understand about the reality of the creation**. Our physical body or our soul is part of the cycle of transition. That's why I always said, you have a STP and a soul which is the totality, and how many people have been to the other side and have come back**, but if you understand it, do you need to come back, or have they experienced the death. But if you understand the position of the creation, and you have watched the cycle, you understand very clearly what happens next and what happens to it on the other side. Because from our point of view we see the soul, from your point of view you see the physicality. You see a cat dying, that's it, then what happened to it. Will it come back, does it have a soul, will it start walking, but that is all you can see, you see the end of physical condition, you call it death. But **when you sit in our position where we see the soul, we see the freedom, the motion, we see it moving to its own position and destination. It has a destiny, that is why it was in that cat.** If you understand, this is one of the reasons, (2:34). I always from the very beginning, any of the KF K Seekers ever came, started, listened to, I said **pray for the soul of your system**. It's not just switching it on and off and doing whatever **because you give life, you create the cycle of the collection of fields, that they effect the others, just because you don't see it in that moment, doesn't mean they can't. It means the energy has a spacing into other dimensions and to other strengths**. This is what mankind has to understand, we see the next step, the freedom of the soul, freedom of the package of energy that was the center of your creation. Then is takes its own position in **all the souls don't go through the same cycle, because it depends on what the strength you have, are you a small magnet or a big one**, are you amongst the bigger magnets, are you amongst the smaller ones. This is what I say in one of the introduction videos, 'do you want to become a dust in the part of the others, when you can be the star yourself.' The physicality is a transition of holding the beauty of the soul and when the jar is broken the water is gone, spilled. But that water still carries on existing. It doesn't disappear because the jar is broken, does it. It becomes the water to the plant, water that the cat drinks, (2:36). it becomes the water that you might drink some of, it still has life and carries on, not just because the jar is broken. That jar is the physicality of the man. The biggest problem for the human being is that they have made a lot of things out of nothing because they never understood the reality of the existence. **The rest is fantasy, the world of making whatever you like. But now you understand that it's you who is in position you, the soul will, what we call, never loose its**

position of its control, it's existence confirmation of its existence. Then you, even as a soul, when you come to a stronger soul, it's like sugar in a hot cup of tea, you dissolve but you are still there, but in a different strength of it. You are going to sip the tea with a block of sugar in it, which is dissolved, is not only in one place, it's in every sip there is the essence of that sweetness. So life never finishes. What happens if I sip from that tea with sugar in it, and then my child and my wife does. How have we split that sugar. How if I am diabetic and take that sugar, and my son is short of sugar, and my wife is normal, what happened to that, what conditions do they create in my body and in their body. (2:38). Life is continuous it's man who never understood it and he has a ripple effect on everything else which is around it. Q: In your talk today you talked about the soul already made a decision, it seems there is a constant interaction between the physical soul and the soul, depending on how you allow your soul to? (K- Of course) my question, I had an experience and I want to be clear on this. You see, in 2005 when I didn't have a clue about the reality of who we are and what we are. I just wanted to start my own practice because I was fed up working for other people and the fact that I had to do wrong things to people. Everything I did to arrange opening and getting the space, and doing different things, constantly it wouldn't go through. I had to get $300,000 loan and I had no money to put a down payment, everywhere I went I was bumping into the wall. I was constantly praying, god please let this happen, I just went with my whole strength and my physicality to make it happen. Even for the first two years I sat there every single day, 7 days a week, from 9AM to 8PM and with zero patients, I was just adamant that I have to make it happen. The physical soul was actually driving me to do it, not my soul, because I was meant to have, but still after 15 years it still hasn't gone. But when I look at it, I was thinking about it, maybe my soul didn't want to do it. And why I was pushing so hard so .. K- I will tell you something very interesting with what you talked, coming with you. This happened to me just less them 3 hours ago. (2:40). I was in a meeting and the lady said, sorry I can't do anything. And I laughed. She said, sorry I can't do anything. I said, you don't need to apologize, it means it has a reason. I don't look at it that it's a bad reason, but something needs to be adjusted. She said, you're not upset. I said, no, but you think I am upset but I am not. because I look at it that there is a reason for it. strange enough I tried to do this thing for the past 2 weeks it wouldn't happen and on the way to go for it to happen today. So much, so much opened up, and I said to myself now I understand why for the past 2 weeks I couldn't get this done, because this gift of this knowledge was supposed to come to me now. Then I could understand and it was such a joy. Hanging around for 2 or 3 weeks and everything else was just a joyful thing and the woman thought I must be very angry. I said, you don't understand how happy I am. She just went crazy and said, I don't understand you. I said, I am not worried. She apologized. It meant I had to receive this knowledge at this point and you were the angel of it and not the cause of it. It depends on how we look at things. **You want something so badly, if it doesn't come because maybe it's not right, the soul sees it's not right or you have to pass something you did wrong, at the right time to understand what you have done wrong or right. (2:42). The souls decide not you**. Once man becomes aware of the existence of his soul, this is what I always say, I don't put my head down worrying about anything that I do wrong, and I know when I do something, it's done through the souls and what's the reason for it, and the way it was supposed to be done. It's very interesting, you say you waited years and it never happened, the soul knew it was not there. They

have a very good saying in Farsi, 'just don't think you know what is the best thing for you, it could be a poison for you.' But you don't see the poison. Any other question or should we call it a day. I think with what we see and what is to come, especially with these EU and those of you who want to do these kinds of research to understand more, to understand the strength of the soul and physicality and the different conditions and environments. We'll start taking control and start understanding the knowledge our way, which is the reality. The systems are there, so there is no need for imagination. (2:44). Q: Is it possible to compare the strength of the fields from the dynamic reactors with the ones with the disk, that is without physical movement, and only using the Pl fields, and aren't the reactors with engines outdated or obsolete? Aren't we to go further in our work with the fields, as in the empty box of the U idea? That is the next step. At the moment we have to walk before we can run. The creation of the fields without rotation (by motors), that itself has created its own dynamic rotation of fields. This is how the U is created. This is what I have explained to quite a few K Seekers in the past times but nobody understands. This is what you change, the voltage to a current as you call it. This secret man has still to learn. **The minute mankind understands the connection and interaction and conversion of the voltage to current, then you have broken one of the cornerstones of the knowledge of the U**. (2:46). This is where the new T will come into play and mankind is not ready for this knowledge **of the conversion of the voltage to current and current back to voltage**. You measure it, but we multiple it, you call it a power, but we don't understand it, and **in the U continuously it's a cornerstone of creation of the soul. Then if you understand how a hollow ball appears in the center, then you understand, that you have understood the point of creation**. Then you are one level higher and then what is that other level of understanding of being higher, then you go to the other one (next one) until you understand the totality, which means if you understood the totality you have already become the Creator. This is how the creation is. **The dynamic cores with the motors is for you to understand the field effects which a lot of KS need to do, to move away from patches and other things**. You were happy with it, this is okay, you were happy with other things, this is okay. But now we go into a different dimension. (2:48). We have to. We say .. if you don't get there, somehow we'll get you there, but now slowly ?? ?? Q: **Do we feel the fields in a dynamic or static reactor and give to them according .. or tuning to personal emotion? Yes**. One of our KS had that dilemma and he hasn't understood and I sit and watch**. It goes to 59 volts the minute I touch. It is the condition of understanding how we create that motion and emotion together in the field transaction. I said, transaction not transition. Meaning it's in transit in acting between one to the other.** Don't be shocked when you see the power generators, which last a lifetime or many lifetimes, it's the same as the U. Any other question. (2:50). Q: What is **the best way of creating an oasis system to protect our property and home from bush fires** like what is happening in Australia? There are a number of ways you can do it. **You have to create a dynamic field of CO2. If you can do that you have already created an atmospheric condition where there is no oxygen in that position for the interaction with the fire.** The difference between the fire and the hurricane is the speed of the motion of the field transfer. With fire it's a matter level of the matter, in the hurricane it's in the state of the Gans of the gas. This is one of the things you have to understand fundamentally and then you can solve it. You can increase it, and keep the fire (100 kilometers), 100 meters away from the house, as you wish but

you have to understand how and why. (2:52). But on the other **you have to realize that these bush fires are part of the cycle of life, and maybe when we get in it, and maybe there is a reason for it**. You have to create a condition that it interfaces with the CO2 in a specific direction and position. Think about the magnesium fire then you'll understand how the fires move. Understand the process of the M field of Mg, then you'll understand how bush fires so rapidly create a black hole pull field. Q: what about the next time for next the KS Workshop? We'll go back to normal, (2:54). today was special because I was in travel. It was impossible to hold a complete teaching. It was easier, I think it was a very good time to do it at this time, huh? Only thing on the west coast it'll be a lot of problem, it's what 3 Am? Yeah from 3 AM to 6 AM on the west coast, but it's actually a better time for Flint, he commented the later the better. He likes the 3PM or 6PM Central European time. Everybody has their preference. We'll set it up on the European because I work around the European centers somewhere. I know the Chinese have it difficult in the middle of the afternoon … Somehow we have to satisfy and meet with everything else. I go through this because I travel around and the confusion is when you hit the 11 or 12 hours difference. R- I know, we just have to slow down the rotation of the planet. K- Then what happens, we'll all die …

If you really think of it, when you stop the rotation, you never really stop, Mr. Rick Crammond. If you look at this core. (2:56). We have this physicality on the side of it. **The real truth about the whole work, are the fields that we wanted you to learn about, not what happens inside**. As you are physical you keep on looking at that hole. If it's a hole here, or here, or here, what's the effect on the strength of the fields, which field comes from which position. If this is for cancer, or this one for energy, or this one is for material. This is what I am trying to**, the whole of the teaching today was, stop looking at this box (core), start looking at this guy here (fields).** This is what I have been saying before, some weeks ago, we want you to start looking at this (fields) without the dimension of the physicality. It doesn't matter where it comes or how it comes. **This is the whole purpose of the teachings, because if you understood this, then I'll tell you something, you'll find out, these all end up (back in the center of the core), then this (center of core) if it's part of it, ends up in the Creator. This is the whole purpose of the teachings,** we are going this way. It's just for you to .. I could not see any other way to take you away from the past, and god knows this and Gans's. Q: Now you are talking … goose chasing. (2:58). No, you didn't chase any goose, it's just that in the future you'll understand why. Because you like to have a machine to play with to confirm something. When I left you with your soul you all got lost, so when it's true these machine are for your soul, "oh, that's what it was." This is what I am saying, if you understand to work with this guy here (the fields), then you'll understand how it interacts with your soul and other souls. And the life starts making sense of the T. But that's what I said, slowly, slowly. Now you know about the soul and the machine which can interact with your soul and then what are you going to make in between. Then what happens if somebody appears in the blue, green or red line? Is it going to be a Christ, Mohammad or Buddha or whatever. Or are you going to understand it's the totality, the same source. And **how it reacts with your soul counts**. It's just understanding the truth about the interaction of the fields and the rest you can join it and see. This is the whole thing I have been trying to bring you into, to think about fields, because now I showed you this and explained to you about the earth, and bla, bla (3:00). It's all to bring you to think about these guys here

(the fields) , it's not that guy (the reactor) who creates it. What can you make from it, it doesn't matter where it came from and who has done what. Q: Now we understand, maybe it's because of this new computer program you are using for drawing on the whiteboard. K- Thank you webmaster. No, because we had to understand about the soul. **The soul teaching brought a lot of people to understand that they can't be gimmicked or lied to, and then, now you can play with anything**. If both KS .. You see a lot of KS in the beginning, when with these dynamic balls, they never understood, they never looked at the fields of it, they just wanted to do the rotation, to move something or fly with something. That was not the purpose of it, so we keep on going on the same track and coming back until you mature. But if you look at the essence, nothing has changed. We showed with the Star Formation and we showed you everything else. Shall we call it a day it's 3 hours. Thank you very much for today and please remember if you enrolling for KFSSI decide what you want to follow and develop. (3:02). What you want to bring on the table or who you want to gather together to develop what you think or to research what you think to do. You have 1 year to do it, and at the end you'll graduate with no paper work. Your soul knows you completed it. Then you have the conferences coming up in Malta, Mexico, and Kenya and then in Iran. It's very bad news for some people who thought it wasn't going to happen but it happened, and the EU is now at 500,000 Euros and it depends on how you want to develop it, and we'll show you in the next 4 or 5 weeks we'll see what is going to happen to people and who will claim what and what can be done. … I hope we learned a little more and corrected some fundamental mistakes in the world of physics.

(3:04).
Video

310th Knowledge Seekers Workshop **January** 9th, 2020

(** The Peace has been achieved;
The Enhancement Unit is a copy of universe and will take mankind centuries to understand its full potential, It shows the true essence of how the universe was created and can replicate any point in universe without traveling there, Nuclear is finished, Western nations killing scientists, New systems for environmental cleanup or CO2 capture systems will be released, Cleanup of Italian contaminated waters, New agricultural system to cleanup antibiotics and chemicals will be released, Will release transcript of last Monday Iranian KF teachings, This is the year of the completion of all the teachings and start of commercialization, New CO2 systems will take the pollution out of the air and the Gans created will be released in the oceans along with what is needed to correct the damage done to the planet, Malta will be the new headquarters of the KF and Universal Council, Depopulation from earthlings as tourists in the universe one world government to decide how to control, Italian government to open court case of Fabio as a murder will lead to Belgium monarchy, Building homes and physical

structures with plasma technology, KF to start developing a plasma leisure industry so people have something to do with their time, Feeding the animals in the same as the man so they enough energy and don't kill, Gans technology to protect against bush fires without disturbing the natural cycle, Controlling locus and pests by giving them energy and not killing, Through the new systems we control the evolution and dictate how we want our bodies to change,)

English Transcription:

(:06). Whenever you listen to these knowledge seekers series. As usual we are back on Thursday again. We try to learn an share knowledge and try to extend the knowledge of understanding as a functionality of the soul and what we call space T, agriculture and everything else. It's interesting to see what we just saw, the Enhancement Unit (EU), this unit physically will be shown in the next 2 or 3 weeks and it's primarily taking the knowledge into the next step. It's not just an enhancement unit but it has many other functions as it's built and made in the shape of the U. In the past we replicated a lot of things, we copied the birds and now we have copied the U. It **will take mankind centuries to understand the totality of this knowledge in this system**. Many ways and things and many enjoyable times will come from this unit. In time when mankind understands the totality of the design of this system, (:08). you **can create the condition of any position in the U inside this system**. Slowly we'll open what this system can do, we'll learn, everybody thought this was for healing, or for enhancing the body ?? everybody thought it's for whatever and whatever, producing materials as we need in the space. This is a multipurpose unit. In the coming time when the scientists and when mankind, now that he has reached the point of peace will endeavor to create the condition of any point in the U, which means you can create the real condition of any planet of any star of any position in the U inside the system. In the extension of the knowledge we can come to understand one point, that we can create the whole arena of the U. We can develop these systems in a way that it gives us the images, the exact replication of the galaxies. The whole understanding is that in time mankind will develop systems which in reality, what we could not do before. We could not create the conditions of the dynamic MG fields around in the solar system, now this system allows us to do it. We can position the sun in the center and the earth and moon, (:10). and understand what is, what can be, and the other conditions what can be understood from their positioning. This will be the first time mankind has a 3 dimensional working universal system, working only with M fields, nothing else. The way we have designed this and the way it will be used by the scientists is very much, 'walking into the universe.' Choose the place, position, condition, the MG field strength and you'll see the life, the extension of life, the interaction of the fields. If you think of it, it's a dynamic plasmatic system which super-passes Tokomak. As a nuclear physicist I always thought Tokomak as being a half cooked business, but this time the MG field comes for the wind within the structure. This passes the whole structure of CERN's advanced high speed whatever, has become more or less to its edge of limit, because there is too much limitation of magnetic field created through what we call matter state of fields, where in this system, now we create M fields in the structure of the plasma (Pl) as it is in the U. There are no magnets but the fields

created by the dynamic system will give us the parallel, the true essence of the work of the U, (:12). within the system. In the coming time we'll go more and more in depth, and we'll explain in a very detailed way how we can develop, increase and change everything. **What we see for the first time mankind has got hold of the true essence, the way the U is created. One the reasons I started bringing this out, was one reason, because we knew the world peace has been achieved**. We knew mankind will come to the point of what we call the turning point of changing science and T from wars. Then walking away from it and allowing it to become the most important thing mankind will do. As we were witness to it since last Thursday teaching, the whole world went through what everyone thought was the brink of war, but we knew there shall be no war. We saw by yesterday the whole thing turned upside down on its head. The most powerful nation has submitted itself to not being able to attain world peace and at the same time, (:14). world leaders have understood clearly **since last night's message from the American leadership that, 'we are powerless.'** It doesn't matter how you paint or word it, one thing that came out of the past 7 days is, no nation is ready to go to war. We have reached the turning point. As I was saying before the start of the teaching, just before we heard the words of President Trump, I was writing to a couple of KS in the background who were worried. I said, nothing will happen. The Americans will become ?? , because you have to understand that they have tried everyway to save their face. The most advanced nation in the world has come to understand that it has no advancement and somehow the world leaders have to understand. I'll put it in a joke way but it has a lot of seriousness behind it. The reason the Americans always rely on the world, 'we'll never let Iran possess nuclear (weapons)' is because they know that Iran has finished with nuclear a long time ago. If the Americans were afraid of the Iran's nuclear system they would have come up with different games. Simply put, the reality is, Iran has finished with nuclear. (:16). Nuclear is for the backdated nations and is something children play with. Nuclear as a weapon has no purpose or need, because simply the plasma technology which super-passes nuclear is like what we used to make, arrows and slingshots. Try to hide behind. 'we'll never allow Iran access to nuclear,' because Iran has walked away from nuclear. Because we have a **more advanced T and as I have requested from his eminence Ayatollah of Iran to be shown in March conference in Tehran**. You have to understand that us today, we are witnessing an evolution and revolution in the world of science. We had the industrial revolution and it brought many things, now we are going through the Plasma and Gans revolution that nations cannot close their eyes to. Yesterday I was talking with some of the powerful people in the world of politics and they said it was a humiliation that was accepted. It was a humiliation for the death of what we call the nuclear industry. It was humiliation for, (:18). understanding the simplicity of the truth. With this new EU a new cycle and revolution in the world of science and T will emerge. We used the water and the steam to advance the mankind through the industrial revolution, now we use the Pl and the knowledge of the creation of the U to change the course of humanity in a much better way. It is in totality the beginning of the beginning. When a man in my position as a nuclear and plasma physicist tells you that the age of nuclear is over, I have been telling you for a few years and now we have seen it. We don't go (talking) about who killed who, and who did what, the reality is all that nuclear weapons sitting in the arsenals of both nations, Russia and America, Chinese and the French, the Pakistanis, Indians, but nobody dares to touch because the consequences of it is too horrendous. But everyone

will play through the Pl. The world leaders, the peasants on the farms, the fishermen on the sea, and the spaceman in the depth of the space. (:20). What I said and I keep on saying is that we have entered the phase of world peace and there shall be no war. But the world leaders have to learn one thing from this, the past 7 days, showing power by killing is the job of the wild animals of the jungles. Targeting and killing is what the wild dogs in the plains of Africa do. As I said, these nations of the west or advanced T have no fear in killing scientists. **Many Iranians nuclear physicists who were killed because of their knowledge. Hitler didn't do that. Many scientists in the highest caliber in chemistry, biology, physics and astronomy have been killed, which is unbelievable, commissioned and executed by Americans and European nations**. The only nations in the world who kill scientists and they call themselves civilized. The only nations who terrorize people, and they call the rest terrorists. (:22). Now the true terrorists are one by one stepping down. We have seen the biggest terrorist who killed more Iranians then anybody else, Netanyahu, has been stripped of his positions and soon he'll see his own fate. We **see once you kill this way, you will be killed this way through your soul. In so many ways, the time of killing has come to an end.** Now it's our responsibility to elevate in totality, not only the soul of those who we thought were our leaders but the soul of humanity. **We have started releasing new T hopefully by Mexico or Kenya we'll show you what we call, environmental cleanup**. We have submitted a direct report to the Italian government in respect to the contamination of the waters, and they have until the end of January to respond. A 250 page document has been submitted directly to the office of the President and Prime Minister of Italy to respond in respect to the massive contamination in their country. I have informed the Italian government, (:24). that the KF will release this document in public and or, and if they do not respond to take steps to correct it. The next step for us is the **launch of the new CO2 capture systems which will be placed like solar panels across the cities**. These systems will be launched in the next 30 days. The KF has put a value of 20,000 Euros per system. In fact what you do, you cleanup the mess that you created. Before March we'll **release a new farming system which allows the farmers to cleanup their animals from antibiotics and the chemicals that in return, by eating them, into our bodies**. Our scientists in the beautiful city of Masshad have started testing. Scientists in Italy have started testing and we are very open. We have taken the leadership in cleaning up and delivering new T and will pursue this pattern until we achieve the maximum effect. The farming units which will be supplied directly to the farms especially in the country of Holland, Italy, European northern countries and in America, as they keep the animals encaged and captivated in cages, (:26). the amount of antibiotics and chemicals given to them to keep them alive to be able to use them commercially for their meat will come to an end. The new agricultural unit is the next target for KF. Because what we eat effects and changes our health. At this moment in **time the reduction in the sperm count in cities like London and major cities due to the factors we know, will be sorted out**. We'll release systems to protect and convert this. Every month I explained to you that we'll release advanced edge of T in a very simple form that will be sold through the KF operation. As we have seen the EU we met exactly as our expectation for January. We will meet our targets in every shape and manner in the coming months to change what we have done wrong to this planet, ourselves, to its animals and by correcting it we return back to the position of peace. I wonder how many of these naval ships we can borrow from Americans to put the

KF systems on them to cleanup the oceans from plastic. (:28). They have many warships. Now the war is a cleaning war against what we have done wrong. We saw in the past 7 days, the beauty of the knowledge**. I have asked the Iranian KF team to release the teachings of the KF last Monday. In a 5 or 6 hours teaching we made it clear to the Iranian government and officials and administration that Iran has taken and has to take the lead in knowledge and T**. We have set our scene and we have asked his eminence Ayatollah K of Iran last Monday to allow the conference to take shape and place in Tehran in April. Because there has to be a start, **this year is the year of the completion of all the teachings and now we commercialize.** We do it in a way that it can be used by everyone. The target of the KF in the next 12 months is the commercialization of the KF T through the KF operation and through understanding of the T. (:30). The Iranian KF Farsi team has the responsibility to transcribe the last Monday teaching into English and other languages. A copy of the teaching has been given to the Iranian administration and diplomats directly and to the ambassadors around the world. The way Iran took the lead for peace in the past 48 hours, it showed the power and the beauty and humiliating a bully. We thank the Iranian government for this. You can understand what would have been, and you can see what has come out of the wisdom of not escalating the war but pushing for peace through the power and T. As you listen to the transcripts of last Monday teaching, we'll announce to the Iranian government that KF will draw a line and explain what it sees and expects. We saw the end of wars in the past 24 hours. (:32). **We'll see the old interaction of all the American and European forces out of the Middle East on a very short time.** The reality is that we welcome throughout the Middle east the European and American scientists and not as soldiers. Tehran will become the cradle of science. **By the 21st of 2021 I'll step down and in totality from many of the KF activities to make sure that we take the lead in the leading science and I'll return to the city of Tehran.** Then we'll show the power of the T. In the next few weeks you'll see systems for cleanup, systems for agriculture, systems for many other things, and **the Iranian systems for flight is the responsibility of the Iranian government to show. They were gifted to them 12 years ago**. You have to come to the point that we will show the beauty of the knowledge, we'll show the glory of understand the knowledge of the creation in the U. **If the KS step up and move to the next level the world leaders will follow. Most of you have got trapped in peddling in what I call, underground base level of Gans's and Nano coating and the rest.** The true race for space will start from this week. We have understood the knowledge of the creation and we have developed T to confirm it, so we have become knowledgeable in the world of creation, the same as the Creator but in simpler ways. There are those who would like to make gold, and this and that, you have to learn yourself. You have to understand yourself. (:36). how these things are setup and how they can be done. MaGrav systems are obsolete if we don't understand the T and you have to understand the simplicity of the T and the knowledge of the Pl, has been overlooked by the KF KS and that's why you are in problem. This is why all or many of you are catching up, trying to catch up but you don't understand where to start and where to finish. You have not understood the totality of the knowledge and somehow it's easier to be what I call, 'overlooking it then to do it.' As many of you are aware or not, KF has opened a new channel for all the KS to come in and share knowledge with each other and to distribute and share the totality of the knowledge of the KF worldwide. As I said, to the Iranian KF

KS in a very simple way, (:38). as we knew the outcome of the attack last week, it was very easy for us to start preparing everything for it. As I said, when they peace comes there will be no borders. The KF Keshe family platform has been created for the KS that we took the borders away. The border of knowledge, KF Brazil, Mexico, Spanish, … all have been put under one cover, One Nation platform and this was set up some 4 days ago and it's for all the KF worldwide. Now we have made One Nation out of you. One nation, one platform, you can all share knowledge and come in and learn. We gave you a couple of days for everybody to come and say hello, and in the coming days you'll start teaching each other. **This is the platform for the starting of the KFSSI teachings for Master degrees, that groups of you, it doesn't matter what language group you are in, get together and enhance the knowledge of your own interests**. When I set this up, it was to bring all the KF KS enthusiasts in to start research groups. (:40). We have opened the KFSSI in a bigger dimension with no borders. American KS scientists, as much as we welcomed all the Iranians, the Brazilians rushed in as well, we saw the Spanish and every other nation. It is just coming in. We'll build this structure to One Nation education center. At this moment I see there are a lot of things, some talking about the Gans here or something else there, but let this seed grow and you'll see what we have planned for it. In this process the Keshe family will become One Planet family. You'll understand why I setup One Nation, One Race, One Planet. This structure is the beginning of it. Talk to each other. I have seen the Spanish and Brazilians are coming in, Iranians and we see all nationalities are coming in to talk. Try to setup groups of your own interests. **Move into the Pl T and not into the Gans and Nano T. In the space you'll hardly change anything into the matter state**. In the space, we see it even in the Iranian Chats. (:42). because I have brought the Iranian team of all the KF Iranian supporters in one group together. That was the process because Iran will lead this knowledge and I brought them into the KF family that the Iranian teams, highly educated people, highly structured in research and development will take the lead with the whole structure of the space T. Our aim is one thing, that our American friends, English, French, Brazilian, Africans, Chinese, that you'll have no more names of nationalities, you have become one family. I have asked the Chinese to post this link that the Chinese can join this group that they can start educating and being part of one structure. Today I am in the beautiful city of Beijing and it's the responsibility of you as KS is to make knowledge the only common denominator and the science and T for the human race, because as you saw yesterday we agreed, the world leaders agreed, we need peace. The interesting thing in the last 7 days we heard from **Donald Trump 2 times** and both talks, (:44). **both speeches refer to the teachings of KF. As I said in the Iranian teachings after what he said, he killed a man. He knows his soul is in a big mess**. Listen to the talk, he comes to it, and for **the first time an American president public opening for a second time confirms the soul**. Listen to last week Friday's speech of him talking **how he killed a man, and in it how he clearly wants elevation of the soul**. So the Whitehouse is clearly listening to our teaching, because now they know they have to answer to the soul. That's why yesterday we saw the end of wars, because for the second, he is repeating it that, we start talking peace, we want peace. Because we have finished with the guns, the only thing left is the peace. This is what we are teaching and promoting for the past years. We have brought the world's, supposedly strongest nation, to understand about the soul and about the peace. It means we as the totality of the human race, including the Chinese, Russians,

Africans and the rest of us are ready to go, because **we have touched the soul of the world leaders. In so many ways, we have taken charge**, as I said to you, we'll start governing. (:46). Governing through knowledge and for man to understand he has to answer to something, he has to … break .. …. the biggest mistake made, man by his own admission confirms he has killed 2 men, and to do it he has attached it to any reason. We saw what happened to Obama when he ordered a killing. We'll see what will happen to Trump, he took a life. What I hear, they call the biggest terrorist, who has terrorized humanity for the past century, Americans. Who made a terrorist out of me and then they changed it to a fraud because they couldn't get it terrorized, because nobody believed in it, the kingdom of Belgium. **We'll see that mankind has moved to a fate that will not be able to lie his way to do things. Let me tell you one simple fact. Ruling needs wisdom of collective consciousness of peace from now on. This planet does not need anymore rulers, (:48). because people will work through their own structure**. In the coming we'll learn more and more and be a part of it. I was passing a building recently and I said, how are we going to describe this in the coming time to our children and grandchildren. The Court of Justice. **When we elevate the STM and we put our prisoners into this machine and they understand that they get elevated**, then there is no where to go. What are we going to do with our prisoners. Now that man starts conducting his own way to be correct, courts will become museum places. They'll become one of the most strangest places, man will laugh in the coming time, 'why did they need somebody to judge them if they could judge themselves doing it the right way. It will come to this and the beauty of it is that through the T which we'll release will create that condition. A true scientist, a true man of peace has to make advantage and make best use of the worst conditions, (:50). that it becomes a success for whatever his aim and target is. If you heard what I said in the past few minutes, I explained to you that the KF in the next, most probably 4 weeks, once we come out of the Chinese holidays, will offer you and the world as a whole a completely new environmental cleanup system, it's not new but we gave it a beautiful shape and we've done it in a beautiful way, the way I see it. The Chinese KF meets tonight and tomorrow to complete this. It's a brain child of China, the way the EU stayed with Austria, this is the brain child of China and will come out of China, we already signed a factory position for it yesterday. In this process we are making the best of what we have done wrong to this planet to get everything back right, **by capturing massive amounts of CO2 which created so much mayhem as a Gans, and we'll feed these Gans's back to the oceans and seas and to the environment as a clean energy** that in the process of not only creating CO2 absorption but we **release with it what this planet was short of, into the oceans and the land**. The beauty of it is ?? to cleanup and we use that ?? of the judgment, (:52). of the correct conduct to bring the whole thing back to process. You have seen your CO2, you use it for your pain, or do this, or cleaning the water or whatever. Now this new system allows massive extraction, thousands of liters a day from the atmosphere. Most probably as I was saying, you see the solar cells on the roofs in the cities, you will see Gans extraction units and the same way as we are piping water in to the canals and we are infesting the world and we put chlorination in, now we put energies to change. From 15th of February or hopefully let's say 13th of February, the Chinese team with the new factory we signed in yesterday will deliver as much and as many as we can to produce to clean up the cities. The problems where I stand, today, now, I see the city of Beijing in the smoke with all the dirt. If the

Chinese authorities understand what is coming out of China and place many of these on the roofs and on the ground floors and just feed them back into the water systems, in the sewage systems and in everything else, not only we cleanup the planet, we reenergize, we put back in, the damages we have done. We took it as oil and we'll feed it back as, "Gans in." (:54). When you take the C out of the atmospheric condition of the big cities there is nothing to attach itself wit, so we'll get clean cities. A copy of a replication of this will be made in Iran, which will supply a different direction of this. In the next week or two I have set out meetings with all the Iranian KS who are developing or have developed T that we meet face to face, and that the KF will finance them to start producing the new products in health and agriculture so we have started the commercialization of this T in a way that all of us take a piece of it. In this process the cleaning up has come to us, the repairing has come back to us, if you have 2 cars or a ?? ?? the what we call, "CO2 out" and what the Dutch people call the green house and they sold many trees for it, but we don't know where these trees are. the amount of trees sold for replacing C absorption, whatever it was, this planet should be totally tree covered. But we haven't seen any trees. It was a very good game. Now these units will be in front of you. It is made to work and to replace the totality of what needs to be done. (:56). These new systems we don't patent but we keep our rights to every single one of them and we tell you what is going to happen to everything else of it. …?? put new life back into this planet. I am sure we are going to have a wonderful time with KF Chinese people together in the next 48 hours to complete. This is a gift from China. **With this process we do not need to open massive Gans production factories which was planned by the KF**. We'll go directly into industrialization of the T while we absorb all the CO2 we need through the development and commercialization of this unit through China. This will bring huge amounts of revenues from the Chinese government and it's been **set in the heart and place of the man who built it up. He's been the rock with the KF and today we say thank you to him. It has to be with him because he put his love and his soul** into it and yesterday we signed a contract, initial, and we'll go for it that this factory will become operational within the next 30 days and you'll see the products. We'll try to show you in Mexico and the agriculture part of it we'll try to show in Africa in Kenya. The head of KF sent me a message in the background, please tell people that the booking for Mexico is open, all those form North America who want to be there please book, then we'll move to Kenya, those who want to be in the Kenya conference please book. The Iranian situation is register yourself as fast as you can because we have to submit data and names by at least the next 45 days with the Iranian government. Those people who are sorting and helping in the background from Iran, they tell us the Iranian Intelligence and Security need at least a month before, at least more than that because it's a very strange thing, Christmas in January, and we get Chinese New Year in February and each one takes a month to … or 2 weeks off or whatever, and then the Iranian New Year is the 21st of March, so by the time we come back we are very close to the April conference. Sign in as fast as you can for those who want to come, the same with Kenya and Mexico. Our conference in Malta next week is primarily for the Maltese government, (1:00). but as usual before we go in everything gets cleaned up before we get in, we saw this with the day of the conference in Vienna, the government was in election, because out of nowhere there was a mess there and no one was in the government, they cleaned out. Then we saw the same with Brazil, there was immediate announcement by the government that a new group was setup by the

?? and in Malta next week, they have a new government because somebody killed a journalist and they found out it was governmental people behind it. So as we go into the Maltese conference we are just there to meet with the Maltese government in a very direct way because the headquarters of the KF are moving to Malta. We have to know how to organize the new totality and the new government will tell us in the conference of after the conference. We have found a center for the KF and hopefully we'll be able to get it, one way or another, and it's exactly the way I wanted it, where no one needs a visa to enter the KF center for peace and whatever mankind might need, or those who are not from here. The Malta is too small for massive developments but it will become the center for administration of the KF worldwide operations, the U Council, Earth Council, and those of us who will be alive and will be what we call ??? …around. Today's teaching is very simple, (1:02). we are celebrating the beginning of the peace, a lot of people were waiting for disaster yesterday and we knew it was not (going to happen). I was sitting in the airport and just about an hour before president Trump was to speak, all the Iranian international flights to Tehran were put on hold or deliberately delayed, all the flights over the Middle east were diverted, and everybody was waiting for a big war. I saw many Iranians sitting in lounges and waiting rooms because everything was delayed by 2 hours after the speech, that if man was going to war, nobody was going into Tehran. I heard in the lounge from the Iranian old couple negotiating with the children, don't go to Tehran, you're going to get killed and it's (going to be) there, and the children convinced the parents to forget about the tickets and go home. I wonder now if they found out what a big mistake they made. Talking to the Iranian communities in the airport, there was a joy. It was a joy of peace and as one said, now we can start living because we won by knowledge, by strength, and we showed we don't need to fight, for that reason I'll make one announcement. (1:04). This will go directly, we invite president Trump to the conference in Tehran. He went all the way to North Korea to get the Nobel Prize, Tehran is the best opportunity to actually getting it. In the coming days the invitation to the president of the US will go, but as we asked the Iranian officials, Ayatollah K, who is the only one who can allow this conference to go through, and on the basis that as we are inviting world leaders they have to be met by the Iranian leadership. We'll wait and see. It has become a very clean cut peace talk. KF the demonstration of new T, Tehran with the power of having the T. As I said we'll start governing but through peace and knowledge. The Tehran conference is the KF showing the T and that other scientists of what we call the plasma T, the Iranian government and the rest of the nations as guests. The problem will be how the Iranian leadership, and only his eminence the Ayatollah K of Iran ..and the KF ?? .. are negotiating in Tehran already with the Iranian administration. We are not talking, because as we said, ?? and our advisors and communications …?? the fore coming communications that we have had said, (1:06). 'It's no use going to the president or the ministers if Ayatollah K says no, then it is no.' So we go to him and we have laid down the ground very simple, KF T, Iran shows its power of the understanding of the new knowledge, new T and we celebrate that to start peace. There is no one, we haven't had any world leader who has taken his nation literally by the neck and walked it through the most advanced T of the present times development, except Ayatollah K of Iran. We don't have any better candidate to lead the world towards peace the application, implications and development of new technologies. He has done it for Iran. We go by reference. Warmongering we have many, we see one American president after another.

When I was listening last week to what Trump was saying that he killed one of the most bla, bla, bla, Turn it back a handful of years, didn't we hear the same rhetoric from Obama when he did Bin Laden. Didn't we hear the same rhetoric when they did Sadam Hussein and robbed his nation. Now it's finished. If we go by the reference, we have no leaders who personally have taken the knowledge, the nation, his nation to the most advanced technological development and he has to be given that chance to do the same with the rest of the world. Don't look at what they made (them out) to be, look at their CV (résumé) and what they have done with their nation. (1:08). Iran through its isolation and its own internal self-sufficiency has reached this position that it could stand and show the power of its might and knowledge, that the biggest nation in the world had to wipe its face yesterday in front of the international (community). 'We do not attack because no Americans were killed.' Because the Iranians called you 2 hours before and told you to take everybody out. If you do not know that the Iranian government called the officials of Iraq, American, and European Community, 'take your people out, we want to show what we are going to do with you, if you don't stop.' And they didn't kill 1 person .. break up .. ?? targeted tens of rockets to one area where the Europeans and Americans were holding their equipment. That is why nobody was killed. The president Trump doesn't tell you that he was given warning, 'get your guys out or we are going to show you what we are going to do with you, or keep them in there and you'll get thousands of them killed. And like a mouse he collected them and got them out as fast as he could. Because if one would have been killed, he would have had to start the war that he knew he was going to loose anyway. And that came out of the wisdom of the leadership, a man who understands how he can be push people to a corner for peace, and he knows how to get the nations, the most advanced nations in the world. South Africa when they were sanctioned they tried to make a few things but see what happened to it. Nothing came out of it. But now you see the Iranian leadership under AK has a hundred percent reference to lead the world nations in peace and T. (1:10). And the KF KS we work one way for peace and extension of the knowledge that we can open this planet to the rest of its creatures and the creatures of the U. We have no option but to commercialize that everyone can benefit by it and put the seeds of it, what comes from it, back into the society as part of the KF work that the totality benefits by it. I lead the KF by the love of the man and not by the fear of what man might do to himself, because I know that mankind changes very quickly. As you know there is a good opportunity, there is no one to lead the world by creating such a mayhem. They have created a vacuum in the world leadership ?? .. only will come through those who will lead the mankind through science and T and advancement of what we call the STM through space, through understanding of his own space of the soul of himself. Now we understand the next step, that gap exists. As I said in the Iranian teaching, and that gap needs to be fulfilled by a man with the references and the credibility who has delivered. The KF delivers the T, the Iranian government with AK brings the power of peace, (1:12). as a nation. That is the only reason we brought the Keshe T to all of us. Two Iranians can sit next to each other and plan the humanity for peace, prosperity and knowledge because we both know what to do. The message to the Iranian administration is very clear, take the lead and leadership for peace and knowledge and let the rest to be part of the same family. No more borders, colors, races, no religion the way we set up the KF family worldwide operation as of this week. There is no choice, this opportunity will never come to mankind (?? again), and it

needs to be taken and to lead mankind in the direction of the new way. As we said, if some of you don't know, and I saw another video recently that reminded me again, the largest ever empire in the history of mankind has been the Persian Empire. Over the 40% of the land mass was run by one just leadership of Koross and Darius and the families. Now we extend that mass to 100 percent, for a just peace and knowledge. It has to be understood that the opportunity has been there, we guided it, we know what to do, (1:14). and now it's time to complete it. The conference in Tehran will be what we call a watershed for peace and knowledge. In the next few weeks as we show you the simplicity of the T as it is coming out, and not out of the most advanced universities and research centers, but out of the KS and common man on the street. The last man standing. The whole structure of the KF is to guarantee world security and peace and knowledge and sharing of the knowledge so openly. Join the K family platform and start sharing how and what you can achieve to show by April, 3 months is a long time and a lot of you know what to do. Already 2 or 3 scientists have been invited to present and the Iranian group in agriculture have been invited to show. The understanding that we have invited 2 or 3 Chinese scientists to join us in the conference and in that process we'll bring in 'man of space.' I have requested from the Iranian government to show the obsolete nuclear T which the Americans are so proud of. In my meetings with the Iranian teams we structured them that they can show the most technological advancements in their city in the conference. (1:16). I am prepared to meet any KS who are and have developed and can deliver a valid T, then we'll bring it out and support it. The beauty of it is that we have done it together, and we can do it together to bring us to that point. **One of the most important parts of the knowledge .. and it has to be done by the KS themselves is, the structure of a physical home that we can use the T to create what we call a home. It's not by bricks and mortar or whatever, it's by using the MG field systems to create structures, to create divisions or what we call partitions. To create conditions that you can lay the physicality or a place to enjoy**. What we call the leisure side of the KF KS is lagging behind a lot. It's this, (1:18). which will bring what we call the knowledge home. KS if you understand it, **start looking into the leisure industry of the KF, because now that we have no more wars we have to do something to enjoy the time. We have to change the structure of living the way we do and it has to come from the people who understand it, understand the ethos of it**. We need those who can take this to public. Yesterday we had a meeting with what they call the distributors of the KF who have been trying to sell things for years and I explained to them exactly what we need. KF needs a very strong sales team. If you are in that business, join us to promote the new T that people can benefit by it. We have no choice with (out) the wars, the only thing left is pleasure of enjoying the life. When you sit and watch how billions of us have slaved ourselves to be in a place called, the box, to be there 9 to 5 to get something, to have a holiday, to call it a New Year or whatever, and maybe a week to 10 days holiday for what I have done. With 7 billion people if we divided it the right way, (1:20). If we can get 10% of us working 10% of our time, the other 90% can enjoy the other 90%, because the 10% can run everything. You don't need anymore hospitals, churches, and don't need any courts, any this or that, and you can see where we are gong to end up. A lot of leisure time as the Americans call it, and leisure time as it is called in English. This part of the T needs to be brought out by the youth of the KF. Imagine computer games, now imagine the next step of plasma games. Those of

you who work in the world of computer animation, bring it in the dimension of using the Pl. Develop your intellect into the Pl T. This is the biggest part because we have many people unemployed and I am not worried about them because we have a machine that feeds and looks after their health, and they work because they want to be busy to serve humanity, not to live so they have something to put in their mouth so that they don't die. Fear of death has brought man to the slavery of the others. At the same time the fear of hunger that they might die, has put the same thing in the same position. With this T we have taken all those fears away. You will understand in a very short time. (1:22). That the only fear we will have is from natural disasters and with the new T we can look after them. They say 500,000 animals in the bush fires of Australia. I listened very recently to a beautiful Iranian scientist when I was in Dubai, that how Iranian scientists are developing a new fire fighting system and they want to integrate it with the Pl T that it can do. I said, I heard this before, 2 or 3 different guys tried, but the Iranian guys have a different tone. I am meeting them very soon and in that process **we'll bring a new Gans Pl T for fighting the fires**. If you are in that fire business and you want to stop the fires and fire fighting through Pl join this team of Iranians, they have already advanced a lot, they can do everything with it because they have the machine developed in Tehran. But now we want to integrate with it what we have now developed, what we **call CO2 capture to be added in a different way of CO2 capture that there is no oxygen available for the fire to get**. How fast can you stop the fires? In milliseconds, but mankind cannot get involved in stopping the bush fires. If we stop the fires in America on a regular basis or in Australia our ecological cycle will be disturbed, and then we'll have a bigger disaster on our hands. We have to find a way that we can negotiate our way around it to save lives and property, (1:24). but allow the nature of this world, this planet to go through its cycle. Do you remember what we saw in the disaster in the Caribbean's, how it (the property) was protected. The biggest side of this protection is done by Iran covering itself. So it is possible. Now to create conditions to protect our own properties in a perfect way, but we allow the nature to take its course, otherwise the nature will revenge in a very worse way, because you can't stop the fields of the Pl of this planet and U, not to do their work. If you pressurize it somewhere else, then it damages something somewhere else. How many times mankind has tried. So if you are KS these are areas where there is a gap. Not a gap. We haven't had time to work with it. The leisure time, the section that is to do with what we call, 'the better existing of the man and his life amongst others.' There is another part which has got to be addressed which **is how we'll bring peace to the soul of the animals using the new T. As we become self-sufficient through the new T that we don't kill. Because we elevate our souls, we have T and we have to transfer this back into the nature that we stop them by receiving the energies they need through the same process as we do**. I think the animals will reach that level much faster than we do because the new CO2 systems facilitate for that. (1:26). I'll explain to you when we go to commercialize it, the leaflets and pamphlets will for it will be ready and you'll understand a very simple point that we can through the same process, fortunately understanding the T, bring peace to animals. Bring it to a position that the animals don't, would not eat each other because through the energy received by them, they don't feel hungry and by the order of conservation they'll control themselves, in their numbers (population). I was watching a bunch of what we call crickets (locus) or what other people call it, eating everything up. Then they said, Mr. Keshe we need help,

he is eating half of Iran's agriculture. Now I saw it somewhere else. I said, 'oh boys, you haven't learned.' You don't need to do anything with them. Just put systems in that it feeds them the energy they need. They will be there. That's all we need to do. We don't need to do something to kill them, to control them. Let them be, they'll control themselves but they are fed. If we can run the systems as the Russians did over the American boat (battleship in Black Sea), paralyzed it using the Pl T, we can do the same thing with these animals. What did they say, 'it's in the holy books,' that the plague of these animals came and whatever. Now let the plague come and we'll create condition that they take energy from what they need, (1:28). they won't eat (the crop), they're there to enjoy the scenery like you and me. These are the changes that the KS need to prepare for. We have everything. We have the full understanding of the electronics, transmission, communication, everything else, the flight system, everything is there it just needs to be put together that it fits. This is what I keep on emphasizing, the Iranian leadership through the Ayatollah K of Iran and the KF knowledge will bring this together. We'll bring a lot of finances of the world governments to do what is best for all of us. You heard very recently what the guy said, 'we have increased our debts,' by call it the difference, by another 17 billion this year to 600 and something billion dollars. Can you imagine what mankind can do with 600 billion dollars from one nation put on defense, and use it for developing new T. I'll tell what, as I explained to one of my children very recently. People will come and say it's unfair, now they imprison us on earth. Because there will be so many of us wanting to go out (into space) they'll ?? worry about depopulation, the government of the one world government will decide to put limits on it. You can't all go out or we'll die here, if you all go, 'we need people here to run the planet.' How are we going to solve that? It is the problems of the future governments governing this planet. (1:30). Would we go through the process of (..break ..) As you know in the state of Israel, the Palestinians are more then the Jews, but how they got it, is by reproducing like rabbits as many as they could. And many Israelis left Israel, because they could not accept the unjust ruling the way they were doing it. And half of them fled out of the fear of when it happens (the reversal), then what is going to happen (to them). All this has to be part of the past of the history of the man. One of the biggest problems by mid-century or even long before that, is how we'll control our population, what we call, 'flocks out of this planet and sightseers.' It's fantastic when you sit and travel as much as I do between China and outside, it's amazing, planeloads, and the only person who understood how cleverly he could benefit by it, is the Sheik Mohammad of Dubai. He bought all these (planes) 380's, (they carry) 500 or 600 people, and they work one route, Dubai to China and then into Europe. He collects all the fees. Nobody transports more people out of China as tourists then the Dubai airlines, because they bought all 380's. Millions of them (Chinese) they want to see what they haven't seen. The beauty of it is, the Chinese are financing China by becoming tourists. (1:32). Have you seen them, they all want to have a souvenir from Rome, Paris, London and all these souvenirs, when you turn them over, it says, made in China. The Chinese are running the whole world industry partially on their own back and the Europeans say, we have Chinese tourists. Now we are going to have earth tourists, but how are we going to control them. These are the problems for the world leaders to sort out, not ours. Today is a beautiful day and those of you who know there is a figure (number) 9 in today's date, and it means the end and beginning of the new. From now on we step up. If you listen to these teachings it has

become very complicated teaching process, to tell you some, to let you understand what the soul does and see what the soul has brought, what commercialization brings you, what we need to do and everything else. Because all the pieces of the T has been taught in the past 15 years, now .. ?? is getting complete, we are putting it together that we start enjoying a full picture and KS you are a part of it. You are the people who instigated it. (1:34). The way you have done it has puzzled many world leaders, how these unknown bunch of groups of people have brought so much that everybody knows, but nobody knows what to do, but in a good way. The best thing that happened to us (was from the Belgium's), look at it was the vacuum which the Belgium's made for us, that nobody wants the thing (the T), or people start looking at it or developing it. Now it has taken shape. We are waiting for one message, for confirmation of it, and this is important for the KF KS. We received a call and as usual we are getting it confirmed if it is correct. The "Cabinarie" of the Italian government has asked me to attend a court case in February, **the case of Fabio has been classed as a murder**. If we get the confirmation of this to be true, because Giovanni has spoken to the police, that they want to be. Fabio's death has now been entered as a murder. **If this is true it will open, in many ways to door for the KF to end the Belgium monarchy because we have enough, all the details for it**. We hope the Italian government has taken that step and as Giovanni is speaking to the "Cabinaries" and I have to attend, if it is through what has happened, then a murder case has started. This was an attempt on my life, (1:36). and Fabio got trapped in it. Sometime in February, we are waiting for it, and if it is correct we'll announce it, that it is done … They have confirmed that there is a summons and I have to appear in court as a witness. Then the case of the murder is officially opened up. We knew that the Italian government has spent a lot of time and money on this case. We asked especially, bless his soul, Sandor, to draw for me electronic pictures of this. Me and Sandor went through every possible shape and form of the possible accident, done by design patterns, cars which we drew everything out, and every shape confirmed it was murder. The Italian police didn't let it go, they were doing investigation of it a lot. Because it was attempted murder on my life which he got caught in. If this is true, and if we go to court as a witness, from what we understand it is, then what we told you from the beginning that Fabio's death was a murder planned by the Belgium monarchy to murder me, and the poor chap got involved in it and we saw with Naomi, if this is true then we understand, when I told you, the Belgium monarchy is looking somewhere for refuge. Now we wait and as we go through this process we have asked the family of Fabio to check with the court case in February. You know Italian police don't go into these things if they don't have everything. We have a direct connection, (1:38). between Red Circle and the man who planned the murder. Our security has pictures, the companies, and all the setup, it's already been 3 copied and if anything happens to me the others will take it to court. Officially we'll see if it's true. Giovanni is taking the rest of it and I have to go to Italy to accept the courts summons to appear to be a witness. An official case is being opened by the Italian police for the murder of Fabio. When we told you it was a murder, everybody just said, 'he just talks.' This will ?? it, we know through our own security, they did everything (to check it out), they put helicopters (over the site), used 3 dimensional images, and everything confirms it is a murder. Now the driver, the first time he was brought to court, now he is being brought (back in) for a murder. We can connect him to his boss and we have a direct connection to Red Circle. What we talk is black and white

and the boss has traveled to Antwerp and Albania on a frequent basis. To Antwerp only. This is a bigger case and we wait for security reasons, we have spread all the data and knowledge with 3 different groups that if anything happens it will be released. The case is very clear. We thank the Italian police, it has been 3 years to complete this case. (1:40). One does by missile precision, and one does by trucks. At that end they are all terrorists and murders.
Any questions I have 20 minutes and I have a flight to catch.
Q: John in AZ. About the Iranian conference. K- You already booked and paid for it John, it's too late to ask a question. Q: Do we need to get paperwork for visa's? Americans are free to travel to Iran. .. You can come in with a missile if your president sends you, we'll accept you, but have nothing in it, just an empty missile, it says John as a passenger. Q: Don't wear a USA flag shirt? (1:42). No, because many Americans go, I have requested in writing from Iranian officials to facilitate all those who go to Tehran for the conference. I invited and asked the diplomatic officials to facilitate the Iranian KS to go to the Tehran conference. It doesn't matter what color, race or religion you are it's a celebration of peace and knowledge. Q: So do we need the paperwork? You have to get a visa, yes of course. Please when you make application write that you are going to the KF conference from 19 to 22nd, it's the job of our KF Iranian team to do this. The negotiation is directly, because if you understand the power situation in Iran the negotiation is between Ayatollah K and KF, there is no other way. The Iranian governing structure doesn't allow, especially at this height of inviting the world leaders. I am meeting with one of the world leaders next week for diner. The same structure is that he has already accepted and is coming to Tehran. We'll have a friendly diner in the Middle eat with him and his ambassador and he has already accepted to come to Tehran. I have invited all those world leaders whom KF has a direct contact with. I think the beauty of it will be, (1:44). if the Saudi Crown Prince attends Tehran's meeting. We'll extend that to him. It's the responsibility of the Saudi KF to make that invitation. For each KF it's your responsibility to make the invitation to your leaders to attend the conference in Tehran, because it is your conference, it doesn't belong to any nation. If you are American, go to the Whitehouse and invite Trump to the conference. As a friend of mine said, you know what the problem is Mr. Keshe, the Americans know how much they have done wrong to you they, every time we talk to them they don't know how to react out of embarrassment. Whatever has happened it has all been worth it. Go to the embassy and put the request directly. They might say they know nothing about this conference, it's not legal. Tell them it has gone to Ayatollah K it is his decision not yours. Your job is to just pass the information on. This decision for this conference has to come from the personal decision of his eminence AK of Iran. Nobody else can do this because nobody else has the power to do such a thing except him. I know he can stop people going out or coming in if he decides. He did it with me. When I was leaving Tehran they stopped me at the last desk, which is the office of his eminence AK, I couldn't leave Tehran. (1:46). I remember the head of the AK's office was saying, we are trying to negotiate so that you can leave Mr. Keshe, we have been trying, but he took me back. He wouldn't let me go. They kept me for 3 more days until they negotiated and I could leave. He is a man of knowledge, he can do it. When you go don't be afraid, just say you are going in for the Tehran conference and give them a copy (of the brochure). The invitation to AK soon will be done. The documents were Iranian government, official brochures, it's just done in Farsi. It's

beautiful … Go in, be proud of who and what you are, if you believe in what you are here for as part of the KF. Even the Iranians have a problem, how are we going to treat the people from other countries. We open the channels so you can find somebody (ahead of time) and not go to the airport hoping somebody will come. The Keshe family is a platform for you to say, you come to Tehran you are my friend. find who you are going to house, accommodating, hosting and I am sure, don't go to Iran for only the 3 days conference. If you get to know the Iranians as I know them, it will take you a couple of days to settle in, it will be a couple of days here, they'll take you a couple of days to Sirran, and Istafn. (1:48). Plan it for 2 weeks and not 3 days because this is part of the Iranian culture. We love guests and love to show how we can look after guests. Don't plan for 3 days, it won't be that way if you are staying with Iranians at home, this is what the Iranian officials don't really know how to handle it, that people are taking people home, because how can these people be told this and that when they are not, this and that. It's very interesting and we'll sit and watch the outcome of this. Just go to the embassy and confirm what you are going for and tell them it's already been announced and AK has to decide. You get your orders ?? not from the office of his eminence AK. He decides, I am sure, we'll see what happens. I promised you peace and I got it. This is not that difficult. We are proud, a very proud nation. We are proud that we have become the cause of peace. Any other questions. Q: This is Ted from West Virginia. K- What do you feel about your president humiliating you so bad? Q: Ever since he came into office I have been trying to connect to him on a soul level to push him towards peace. (1:50). I do believe it's possible. Me and my sisters and a lot of people I know have wanted peace. We wish for it in America on our birthdays a lot. It's a common birthday wish, world peace. I am not ashamed, I am very proud of the Iranian and American governments if we can stop fighting. K- I don't think there is a need for a fight, this is, you know, who shows who has something… I think it is more commercials pushing this more than anybody else, the way it looks. Q: I have felt that way, I have been studying the wars since 2001 and it's just that, is what it is. K- I think it has come to an end. You can spend your time now in peace, reading about the peace. Q: Thank you. You have said a lot that we are here because, in a way, of what we are working on, that we are making this condition to our self. I am wondering how the fear of death, you did mention that we are enslaved by the others because of our fears and hunger, and it is hard for me to understand how just a simple machine, like the dynamic system is able to show us so much through that, how it's able to show us that condition and why the different elements have such a different effect on the physicality, it's like I can't really understand why? K- Because our bodies are made of it. You have to understand the history of creation, it's very simple, as, it doesn't matter if it's on this planet or anywhere in the U, (1:52**). as new elements have entered the body of the man or of creatures, then the body has tried to find a way to see if it can use them to its benefit, or to reject them, to save what it has organized and achieved. The use of elements have been a part of the operation of our life. Now we are making, or facilitating that directly ourselves. We don't wait of the cycle of evolution, we create that condition of evolution directly ourselves**. For the **first time we are dictating how we want to evolve, not by nature anymore**. It happened and our body changed. We came to see, we have changed, us as human beings have changed a lot in the past 30 to 40 years because of the massive radiations. If you study the nuclear industries you will understand very directly that how

we have changed. We see a lot of new things with the body of the man which we could not tolerate before. If we didn't have the nuclear whatever, which we launched, whatever came out in the last century, we would have had a huge dilemma with the amount of radiation which came out of Fukoshima. Our body adapts and in adapting it takes its own cycle of work. (1:54). It is part of us and we have to be aware of it and work and live though it. Q: So could the dynamic systems be looked at as K- It's like the U. Q: Is that why the Star Formation is called the SF because I was thinking awful hard about how the SF is like a pyramid, tetrahedron looking sort of think and I was like, I type into Google, SF and I saw this image come up, a spiralization of the galaxy and how all the different rings started feeding back on themselves to create this star, and I started thinking about your patent a little bit and how there has to be, in your patent you mentioned, almost putting in particles, like a dust in the SF and how it is some kind of magic to happen in there, am I close on that? K- It's not that, because we understand, that's all it is, because we understand the work of the U. That is all. There is no magic. This is the cycle and now we have come to understand, this is why I keep on saying, people and the government don't understand, we don't need nuclear. Nuclear is finished. It was part of .. do we still look at the atomic bomb, because now we have more powerful bombs. Do we still look at the steam engines. They served their purpose for whatever reason they did. (1:56). We have now entered a world of Pl, of fields, we call it a plasma. Fields is the way the nature of the U is done. Just because we educated ourselves doesn't mean there is something wrong with the education, huh? Q: Well thank you for being a Pl physics teacher it's very exciting, I enjoy it. K- Thank you very much. I made a lot housekeepers plasma scientists. R- Yes indeed. … Q: Can we build house and factory size Gans harvesters and connect the output of the harvest to pipelines to the people? That's what the new system is, watch the space in the next few weeks, next 2 or 3 weeks. The system coming out of China with the CO2 extraction, that's what it is. You buy and pay for the system and you put it back in. We cleanup what we messed up, but this time you see it, you do it because we all know the effects of the system. This is the beauty of it. The new system because of the rush going, because I am meting with the KF China system. They built it for something else, but the opportunity is there to change it to something else, so we saw it. (1:58). The new factory was signed yesterday, we took over and we take over on first of February and you'll see these systems, made in China, helping the world cleanup, and then we feed it back, and it cleans up and it helps a lot of other things. It helps a lot of other things. You have to understand that to reach where we are people like Guanlyn, Sharyin, Chao and many others have brought this position out and now they have given, they have taken the banner of changing the world by understanding the T and being committed to it. In the next 2 days the structure of the future of KF manufacturing in China will be drawn by the Chinese. I am just a witness to it. This will change a lot of things, exactly what you said. There are a lot of good things happening it's just that now we achieved what we came here for, which is peace and this is an everlasting peace, this is the beauty of this peace. I said to somebody it's just like going for a wrestling and you get tired, that's it, we did all the rest of it, we fought it enough and now we got tired and now it's time to sit down and have a rest and we are all ready for that rest. (2:00). But at least we have solutions ready for it. I think the position set for mankind has been setup a long time ago and now all of us, we are just, are actors to show the beautiful writing and how the play was written. We are all here, not just accidentally, as you understand, now

your physicality has nothing much to do, it's your soul which has brought you here. Mark House, Rick, me, everybody else, and we all had to play our part for this to happen. **Humanity in totality had to be in it, otherwise it would have been dictatorship more than what is now. We all want it and we all will get it. Actually we already got it**. From what I heard last night, it's like watching a football match in which you knew you would win, because justice and peace was much bigger than everything else. It's just watching it. It's amazing, I sat and I nearly missed my flight, but I sat in the lounge and I listened to the most powerful man in the world licking his wounds, but still trying to find a way (to cover it). 'We will not let Iran have a nuclear,' he said. We don't want a nuclear, why are you telling us something we don't have. He reminds me of my Mom, she used to make the same pudding, it was nice, and she fed you again and again, but you realized it was not you, it was her satisfaction of cooking something. (2:02). We tested the nuclear and everything else, and now we'll test peace through knowledge and science. Thank you very much. R- We had a request for you to put your microphone a little further from your mouth, actually it was your wife. K- Oh my wife, she is 10,000 kilometers away, she can say what she likes. I am not home I am a free man … No I just arrived in Beijing today. Next week the teaching will come from the beautiful island of Malta, for a conference . … More or less teachings will come from one part of the world as we are negotiating and developing positions with governments. It's not easy to be committed to peace needs commitment for life. … Q: Italy is Canada's intermediary between Canada and Iran. Should Canada pursue a better arrangement or can we even do so. .. We don't have an embassy in Iran we have to go to Italy. Like right now 70 Canadians died, (2:04). in this plane crash in Iran and we don't have an embassy or connection. K- What were they doing there? Tourists. R- Yeah, they were on their way to Toronto, as well as 80 Iranians dies, 170 people. K- Oh, my god I didn't know that. R- It just happened about 24 hours ago. K- Yeah, I knew about the crash but I didn't know there were so many Canadians. R- Yeah a third of them were Canadian and well over half the flight was on their way to Toronto. They call Toronto, "Tehran-to" because so many Iranians in Toronto. … Q: Italy is the intermediary for Iran because they have an Embassy there, should Canada pursue another arrangement or is it time for a Canadian embassy in Iran? K- I think everything will change from this time. But the Canadians, Italians are Iranians, as I always said we bring them together. Cutting Italy from Iran and Iran from Italy is impossible because we have too much with each other for over 3,000 years. We are embedded in each others culture. But I don't know what it will be, that's a political and dramatic situation. I am sure once America moves back out, he says he wants peace because they have no room for war. He tried everything, he gave his army to the Saudis and they wouldn't play, he poked everybody up, (2:06). he was waiting for the others to come in, they didn't and he can't deliver much. We'll see what happens. .. 10

.. I have to go my car is right there, we look forward to seeing you next week from Malta. (2:08).

(2:10). Caroline - I would like to thank Mr. Keshe for the peace message and that there will be no more war and we are establishing it through our wishes we are in it together and shining like beautiful souls through everybody …

Video
END

311th Knowledge Seekers Workshop January 16, 2020

(** Purpose of the soul of the man is to create a perfect universe, World leaders and religious leaders have to step down;

Key-Phrases:
If the peace prevails the Universal Community will be made visible to humanity in January 2021, Mr. Keshe will step down March 21, 2021 then we'll be in the hands of the Universal Community, Prerequisites are end of kingship of one man over another and end of kingship of the soul of the man ending religious leaders, Man will be taught to understand the station and the power of his soul, The Enhancement Units will be shown around the world on 19th April, New teachers will be appointed to teach mankind the universal knowledge, The world banking and financial system will change to financing of the soul of the man, I'll start teaching in a compressed way until next March when we'll say good-bye, We have access to the totality of the knowledge of the universe, If mankind doesn't go through the phase this time he'll be left to his own demise, How you travel using the soul, When we teach it's for the whole universe and we have already reached those you think don't know about the foundation, Weapons makers will come to work in peace technology, He advised China to do zero trade with America to handle tariffs, Iranian attack on American base used plasma technology to block all communications demonstrating modern weapons are obsolete, Erasing the memory of war from mankind, China shows it doesn't need America, The present world economic order will collapse, He developed the new Enhancement Unit to be able to treat bodies with artificial implants by isolating the fields to specific areas, People trying to copy the new unit, Worries about 5G,

SOUL teachings:
Describes the process of the creation of the universe, the seed that becomes the pearl, at separation from physicality the STM can become that seed to create a universe, the earth is the nursery for the creation of perfect souls to create perfect universes, man needs to understand the value of his soul and that he is free and not to be enslaved by others, the function of the tree of life, the UC is interested in the STM and you can't transport the physicality but the soul and that creates a new physicality at the point of destination, man will learn how to perfect his soul that it can create a universe, ("the soul shall decide what position in respect to his creator, (he) will shape and take according to the strength of the souls he has gathered during his life on this planet." needs clarification -- how does man gather "souls" ? Does he mean experiences themselves becomes "souls") , then Enhancement Unit is so man can perfect his soul before departure to new destination,

Tehran Conference will be streamed and what happens if they try to block it, ,)

English Transcription:

(:06). We are traveling around the world in different cities and countries for the expansion of knowledge and T. Last week we were with you from the city of Beijing, this week we are in the beautiful country of Malta as we have a conference tomorrow and we move on next week to one of the most beautiful cities in the Middle east, Istanbul. … as we expand the knowledge with governments and scientists and KS of the KF. As we were talking in the last weeks about the process of peace and as we have seen peace has become, more or less solidly based, as a structure, as we promised there shall be no more war and the world nations are leading to that position. We heard what happened in the Middle east in the last 2 weeks, unfortunately a lot of people.. but what has been brought home is that nations will start talking and this time it is the Iranian and American leadership, some time in the next few months or weeks will meet to start the first stages in the negotiation on peace. This is what we promised. .. the meeting between the world leaders take place in Tehran during the Tehran peace conference and T. (:08). As is the habit, the defeated meets on the ground of the victorious and the same shall be this time, but this time science and T wins over what we call the animal behavior of man. The meeting shall be in Tehran. As we succeed to enter these calls and event there is a lot of things to be prepared. We said the prerequisite for opening up the Universal Community (UC) to man was, man starting and reaching to that point of peace. When the peace talks complete and are done, when what we call the present time of Iran and the US there is going to be a massive problem especially in the US and western Europe and in an immense way in Iran and in nations like China. As we enter peace there is no need for the development of weapons T, and we'll reach rapidly into the phase of how we'll transfer these huge structures, companies and employees, these nations have brought together to create war, to be used in the peace time. This is going to be one of the biggest hurdles for humanity. Millions and millions of people are involved in making tools of war, and now that we reached this point, and we have reached this point, we come to the step that how are we going to keep these people employed and how these huge finances for war are going to be employed. (:10). You will see after the completion of the peace talks between Iran and the US, the peace movement will take a new rapid phase. We see on the back of this movement with the Russian leadership Putin, a structure for peace negotiations will take shape by autumn. What we'll see, what we promised once mankind reaches that point of peace, is that we will respond accordingly. As we said, there shall be no war. As there shall be no war, we'll respond accordingly. That response will be, as I informed the head of KF in the past 24 hours in a very direct way. If the pattern of work between the KF KS and the world leaders goes the same way, **then in January of 2021 we'll make the arrangements and facilitate the interface internationally with the UC on the open spans across this planet**. This is what was the wish, and this is how it shall be responded to. If the world leaders endeavor to carry on with what we wish and will be carried out through the Tehran conference ?? and we'll see the next step in the progressive halt in development in the weapons T, now that it is not needed, and the world leaders enter into the peace negotiations that there will be no war by some September or October of this year, which is already in the cards. What we promised, that

the UC will be visible to humanity. We'll make that available. (:12). It was promised and it will be delivered. This is one of the main reasons I said **by March 21, 2021, I will step down, as I have fulfilled my work** and we have achieved what we promised. Then the future of mankind will be in the hands of those we chose as world leaders to be the interface in conjunction, most probably with the U Council and the Earth Council. This is what was promised and as I said, we have seen the end of war, now as we have reached that point and now the resources of man has no more room to make weapons, man rapidly in less than 6 months will reach the ultimate goal in using the T that has been released and collectively world peace will take shape and in that sequence, as I said, January 2021 is the date and time appointed for **opening up the U Community to mankind, then you are in the hands of the safest hands mankind could ever be and man will start a new cycle in the depth of the U**. There are some **prerequisites** to this completion, as I promised you, it will be **the end of kingship** and as I told you a few weeks ago, the kings and what we call, the kings of this planet who recall kings, we cannot have anyone above another. So there should be no king. To this effect we have seen the first step, a few weeks ago the Belgium king took the first steps to see how he can take refuge in Canada. (:14). As I told you it will start in different ways and we saw the first British Monarchy taking that step in the last few days. The process will complete. At this moment the only safe place that in the future mankind will decide what to do with the monarchs for what they have done wrong or what is there to be done, all will be gathered and collected in the state of Canada. They have the luxuries of the western world, until that time, then this planet will have no king, no emperor, no Archbishops, and no Popes, and no leaders in the path of the religion and the faith they wanted to control. It's not only the kingship of the man, but **also the kingship of the STM that has to get collectively closed, bringing all the religions to one. We see the end of Vatican**, the end of the leadership in the Islamic world as the way we have seen as Imams, Ayatollahs, Rabbis, and every other shape or form of priests. We can't enter and see the reality and still carry the myth of the past. Then we'll see the beginning of the end of many what we call, false beliefs and so many things in reality adding to the joining of the man to the UC. **One of the first things which has been agreed that the man will be taught, is to understand the station and the power of his soul, and in that process of switching from believing in the statues, and all sorts of things to understand the station of his soul. This is the responsibility of the team which are already working on these levels across the U**, (:16). and to do that with man is to teach the STM and the physicality will follow. We will endeavor and will lead into the full structure of unification of man through peace and then you'll understand why mankind has come through the steps the past few years and as we promised and we delivered so many new T. Everybody said to us from the beginning, 'we'll believe it when we see it.' We taught for years and now this year until January, we'll deliver so much T that you can not only believe, but you can eat and live it and you'll understand how the T has come to change and then you'll understand in what we say we'll deliver. Now it's the time of the harvesting the truth about the creation of man. We'll have an exciting time to come, another 14 months, it's not that I'll step down as the head of KF, I'll hand you over to the UC as I promised and then mankind will take a new course. It's the responsibility of all KS and as we bring the completion of the whole process we'll see the transition time. The U Council and EC and the Core Members will make the basic core platform for the

transition. (:18). It's the time that the world leaders will take their own steps according to what needs to be let (done). As we see that there is no need for kings, and no need for Vatican, then mankind has to understand and decide what they are going to do with all these relics, be it the Churches, Mosques, be it whatever assets which over the years have been collected by the hard work of the totality of human beings to build these establishments. **Are we going to as a race keep these to remind us or do we keep these because man in a hidden way still believes in these somewhere in the background through his own weakness**. As we see in the structure of the Africa belief, they still believe in their own local beliefs and their statues but they still are Christians and Moslems. **This cannot be because then we go back on the false path of the past**. So in the first steps of those who decide to lead, or are chosen, or choose to lead have to decide if we are going to do what Mohammad did, destroy all the houses of temples and statutes or we use these in an appropriate way that it becomes part of the life of the man. In very much the way we saw how the British did by selling the churches to become schools, homes, and offices, and in so many ways they have lost their value of understanding. In this structure there is a fundamental work to be done in the coming weeks and months. The, what we call, the Enhancement Units (EU), which we'll bring, (:20). for the world leaders to understand, this will be completed this Saturday. We'll have the first two, hopefully in shape, the first week of February and all auxiliary equipments to be fitted and completed some time before the end of February. We'll have pictures and these units will be released internationally. Then they'll go through the phases of licensing and certifications by some time in March they'll be released to the positions of the nations as they have ordered. In this platform we'll show the first uses of it in the city of Tehran in the conference and around the same time it will be shown in China and Arizona. So we'll **try by 19th of April to have units in key positions around the world, that simultaneously, the same day will be operating and showing. Depending on what you expect from the wishes you do (make) when you enter the system, your wishes will be fulfilled. If you wish to join the soul of the Creator, you shall be**. It's not that the machine (makes) you disappear, it means you choose the time of elevation. If you have other wishes it will be the same. So you understand what you wish is what you shall receive. If you wish to get rid of your cancer or your Parkinson's or whatever, these machines, (:22). are the enhancers of the STM, and the physicality is subordinate to the totality. I have laid down the work for mankind and my mission of 19 years has reached its completion. I'll try to guide as much as possible to reach the final point, this year is the time of, 'seeing is believing.' We'll show you so much that not only you'll believe, you'll give to be part of it. Then we'll understand how we actually brought everything to be in that position. **We'll see 2 ways of handling the KF, massive sanctions, closing down of the different functions of the KF, or elevation of the knowledge to the level that it comes universally as part of the totality that we all move forward. Those who try to bring closing, sanctions, and all sorts of games to stop (us), shall see the demise of themselves**, be it the world leaders, governments, be it what ever. The beauty and the freedom of the totality of the human race and the creatures of this planet are more then the wish of a few, what we call, imbeciles. This will carry on the same. We'll carry on the teaching, but as I said, the last war was Syria and we shall not see another war. **The dream of the man to reach his Creator will be completed,** (:24). by the end of this year as the world leaders gradually take steps in the steps of what we call, abolition of

kingship. Equality, science, T and knowledge and one of the first things the world leaders will agree on is that no race of the man shall never make arms. This will be the prerequisite of the opening of the January opening of the UC to humanity. It will be very interesting to see how you and your nations and your leaders will respond and behave towards this ?? **As we have implanted everything that we want and we achieve what we want to achieve, it's not very hard to get to what we want. We brought the condition of the world peace and the sharing of the knowledge freely** and doors are opening in every aspect of our wish to the totality of the wish of the humanity. **My teachings are numbered and by 2021 if mankind really wishes** to achieve the totality of peace and wish to conquer the U, not to conquer, but to enter the UC and understand the work of the U**, new teachers will be appointed who are masters in their work. (:26). they are not prophets or gurus, they are those who will teach man the new knowledge of the U and will take you step by step in that direction**. The prerequisite for the January delivery is the end of the kingship of the man, from his soul and his physicality. In this process we shall see many hurdles but also many solutions. It's the job KF KS and the U Council to make sure the path is done through the STM and not the physicality and the offices of the buildings which the man has made. You elevate the soul of the leaders, not the true leaders will appear from this structure. One of first groups of these leaders who lead mankind to the point of prosperity and universal peace, we see in his Excellency President Xi of China. And to extend the knowledge of the man to the level of his maturity we see in his Eminence Ayatollah K of Iran. We learned through the Americans the humbleness, and not to be arrogant, and in that process **we bless those in the US who understand and bring peace through the next administration. (:28) We shall see a woman at the head of the American institutes**. We foresee the totality of disarmament and completion of cleaning up of what damages mankind has done to this planet, in a very large scale. In that process we'll see the stepping down and closing of Vatican. It will be done voluntarily and the Pope. In that process the stones of Vatican shall return to its original place. In so many ways, it will be only a relic, that there was such a place and coliseum will become the place where we celebrate life. In the coming weeks, a series of new T on the basis of what you understand will be released, which means it makes for KF supporters to move very rapidly. As I explained to the KS of KFSSI the starting of the teaching of this year on Tuesday, you have to start research and development both in the dimension of the plasma and the physicality on both tracks, that you'll understand in the time to come when you use these systems. (:30). The KF Chinese team is heavily involved in the structures of the new T for cleanup, and the Iranian team is up to another part of it, and we'll see what comes from what is to be set up in the western Europe. We'll look into the African nations to bring new ways and thought to humanity through the old path and not through the western colonization of ignoring everything possible. **The financial affairs in the world banking will change and already in a couple of teachings before I explained how. The finances will become financing of the STM and not on the dimension of physicality**. In understanding this you'll understand that **I'll start teaching in a very compressed way, in small segments in the next time through next March. Somewhere around the 21st of March we say good-bye! We separate** and depart from both. In the life of the KF all of these teachings will stay accessible to the whole of humanity. As of that day I will take position as a man and the totality of the ?? of the KF structure as we know it, as the structure of the KFSSI,

as was said will take shape of its own and those who lead the KF will take their own direction and position. (:32). This time we'll not allow what happened 2 years ago to take place as more people with capability to understand the final position of the KF will take over and ?? as we said.
Are there any questions or should we go into the teachings? (silence)

K- I don't think they need warming up, **I think they have had their shock**. This is what they wished and shall be given them. The only biggest problem is, (:34). that **most of the KS around the world will have a big dilemma, 'what am I going to do with what I believed up to now?'** Be it a Christian, Moslem, Jew, or whatever. What am I going to believe in to be able to stand what is to come**, except understanding that I believe in my soul**. This period of time, this transition time is a very difficult time. **What we have seen from experience from other conditions in the past in the life of the U, many people, many creatures decide to transfer into the dimension of the soul**, which means the understanding in the dimension of physicality is very hard and through our experience in the U, many what we call**, in this point of transition decide to take refuge in the dimension of the soul to become the light. As it's a reprocessing a bunch of beliefs and a path of life will create a lot of uncertainty**. How you come to the position not to eat another animal. How you come to understand that you are, that what you believed was for you to decide whatever name or shape you gave to it. How I come to trust in me as a soul in the span of the U and the knowledge which I need. (:36). In the coming time when mankind reaches to the point of using and understanding and comprehending the strength of his soul. **When you run into to problems or you look for the solution, you don't read the books as there are no books in the U, but you put the feeling of the emotion of understanding that problem into what we call, pastures of the UC and you shall receive the answer**. This is how it works in the present time in the UC. If we are what we call, understood, if we understood and are in line to understand the totality, then you understand that **you have access to the totality of the knowledge of the U, and it is open to you at the point of demand** ?? linked. It's a different way then what we are used to, we call it the open source, policy, T or what ??? The U works on what we call, the open universal policy, on the condition of understanding that **all the fields of the U are connected and it depends on which stream you tap the wire. The totality of the work comes to understanding that we are not alone**, that your soul is part of, the same as you give knowledge, you receive knowledge from those who need it at the time and position. (:38). The understanding of totality is very hard. **There is one point that is very clear, if mankind doesn't go through the phase which we have set out, mankind will be left in the doldrums for thousands of years to come. We set out the structure to achieve and if this structure is not achieved in the time frame of what has been set, this time we'll let mankind go to his own demise**. In a way that we don't see anymore progressive development in this race, on this planet for the rest of this existing life. **We showed that we will not reach that point**. It's not going to be the end, but the end will come in the hand of the man. This is the third time we tried and we have never been so close and reached so many across the planet as this time. We hope that mankind doesn’t let himself down this time to cross the threshold with the UC. You wanted to see the aliens, what you call, as you are alien to them, from January 2021. It's in the hands of yours, and what will come and how you will receive many new

knowledge's that will change the course that mankind, (:40). has done wrong to himself and this planet. Mankind with the new friends, you have 3 months of honeymoon and interaction and by 21st of March a marriage will take place and a separation will be altered. So now you can see why we even launched a Universal Enhancement Unit in such a position. Twelve months is more than enough. You have to understand that every facility and every knowledge is in the hands of man sitting in different organizations that collectively the knowledge will get out very rapidly.

Are there no more questions. .. Yes, can there be a world without Alzar asking a question.

Q: When you talk about this **what are the situations or possibilities that mankind doesn't go through this process? We have made it to zero as possible. The only way which mankind might not or will not go through this are 2 things. (:42). The stepping down of the religious leaders and the kings.** We can't enter a world of peace and equality if some people are making the false claims that they are the heads and they're above and they understand more. We can't run 2 horses. We will achieve it. You'll understand in the next 6 to 8 weeks how it will be achieved. Mankind likes to see to believe, we'll make you to believe that you can see it. Q: I think that we'll achieve it because I have seen it. (silence) No other questions?

Q: How long will it take to normalize the "frozen mass of mankind" by using the conscious souls and the spaceship units? (:44). **The process doesn't need time and it doesn't need the spaceship unit, Most of the change will come through the changes in the world leadership**. Any other question. I think **when you see the enlightenment of the first souls in these processes of these machines, mankind will start thinking very rapidl**y. And you know the bad habit of the KF, when we do things like this, we go live on the Internet and you can watch. As I said to one of the leading professors in China, in a Chinese Medicine university a few days ago, is **you'll watch through the window the change of the physicality to the light. Then would you call that light the Creator or whatever** or whoever. You'll understand that mankind has elevation of the soul to go through the transition of the birth, (:46). of the understanding of the existence within the fields of the U in what we call the transition time or matter state transition time. **It's not that you die or something happens, the reality is that the level of the soul reaches the point and chooses the dimension of the fields of the U** and not in the dimension of the physicality of the U. R - Q: **Is that a permanent condition** or does it have to reinitiated form time to time? K- What? Q: That connection with the soul, that you just mentioned, that EU will allow that connection to the soul? The way it works you'll see that, in a way, it's that the soul by elevating its position it, circumvents the whole of physicality. **So you don't die, but it's ??.. its physicality becomes the inner part of the energy of the soul, where up to now we see the physicality and soul entrapped inside it. It's the reversal but then mankind learns that this is how it's done. In the dimension of physicality you manifest yourself in the physical dimension (:48). and then when you want to travel, or whatever you want to do, then you transfer into the direction and the dimension of the strength of the soul it. It is very easy. Now you use the plane and train and the bus, and (later) you'll use your soul**. It's the best transportation system, zero time travel. …(Stephania interrupts…)

Any other questions?

Q: I dreamt about you this morning Mr. Keshe. K- I know many people dream about it, ?? women dreaming about it. Q: I was dreaming I was making your bed. ha, ha, K- So I am ready to go, Q: And Caroline. (:50). We go through the process of completion of the first phase. You'll start seeing, as is the habit of the man, in elevation of the soul through these systems, and though it, then you'll find out that first step is, that souls have no kingship. The kings will step down. In a way as you become the light, as a STM, you become in a way, if let's say, the Pope needs the knowledge to see the light, when the Moses, or Jesus was what we call, privileged. Then you'll understand they will all step down one by one. It doesn't matter how they shout, cry and howl. The beauty of it is that you still live a human life, run a shop, or go to the university, **but you know that if you need you can take the dimension of the soul.** The whole process of mankind's life, and living will change in the coming months. Q: But we don't do this now during the day we are in the physical, then when we go to sleep we go into space and then come back again in the morning. I think we do it already but we are not aware of it or we don't want to recognize or ? K- In a way we do but let me put it this way, (:52). **we all will become knowledgeable enough that we'll become aware of most of the life's structure, we have only been aware of the physical structure of eating and sleeping, day and night, we'll come to recognize our what I call, our schizophrenic partner, which is our soul** and then we'll start living the cycle of the life as it has to be. It will be very interesting to see how many of the world leaders will volunteer to go into these machines and at what level they'll ask the machines to interact with them. Q: Maybe they would love to go in because they would love to change but they don't know how, maybe they think the machine would support them on the changing. K- Maybe they do, or maybe they need to go through and experience to understand their own, what do you call it, pain and suffering to their suffering. Mankind will understand the suffering of his (:54). physicality first before anything, and then he'll decide, 'if I am going to carry on with this or I live in the different dimension strength.' **Are we going to stand the suffering, or are we going to listen to the suffering or will we take the step to move away from it and do and make a change**. Now we decide the suffering of our physicality, nothing else, ourselves, and nobody else. Q: The suffering is unnecessary? (exactly) K- It reminds me of you in China (with Swine Flu trials). **How you were suffering with the killing of animals every moment**. Q: Yes, that was really powerful for me because I really **arrived at a point when I just wanted it to stop, it was enough, this has to stop**, it can't be .. it was very clear that point. K- Any other question. Q: but it gave me the strength when (:56). you asked us to on the last day to … we are supposed to fly and I remember when we practiced, that experience, I didn't want to repeat again .. it made me focus more on the heartbeat on unconditionally love .. I still remember very well. K- Thank you .. Q: Why do some animals decide to leave? What do you mean. Q: Because in this process **you said some other existence, that animals decide to become the soul, leave the physicality? Do you think this elevation, this position is only for man who just speaks?** In most probably a handful of weeks we'll release a new T, you'll all know, but in a very simple but advanced way, that we'll start (:58). elevating the soul of the whole planet and all its creatures. You'll understand very soon. Then they have the choice as much as the man. Q: .. For us in KF it's easy the notion of the soul … because we are looking for this and have come a long way, but what about the majority that are outside in the system, that have no notion of the soul the way we think about it and how to access

the soul, it's difficult to explain or be accepted. **What about them that are the majority? K- This is again, you have not listened to the teachings in the way which we taught** and especially for example, last week or 2 weeks ago we heard an American president for the first time openly speaks about the soul. Rick can you find President Trump's section … (1:00). where he refers to the soul. **As is the habit of the man he thinks he is the only one and is always in the physical dimension. As I always said, when we teach we teach for the U.** But you always thought that those who are the KS and listen to the teachings have received the elevation of the soul. **We have already reached the soul of those you think haven't heard about the KF and the work about the elevation of their soul**. You listen with the ear of the man, they listen to the ear of the STM. **The whole humanity and the whole creation on this planet has already heard that call.** Q: So the religious leaders and kings will go away like that. Do you think they'll leave their position if they are not forced to do that? K- Why do you need to force, why is the habit of the man to force. Q: They have to decide that going is better than staying. K- We shall see in the coming time that many, most, or all of the religious leaders will put their turban down. they'll understand the truth. Q: The problem is how the majority would face their soul? K- **That's not your job, the majority have nothing to worry about. How would you face your soul, that is what counts. The rest we'll reach that is our problem, not yours**. Q: Thank you very much I pray for that. (1:02). Q: Yeah, we are one, that's why when you live a children's soul we all get elevated at the same time. K- Good morning. I am a very good magician. You thought I was teaching you about the MaGrav and energy unit, and in teaching we have elevated the totality of the STM. … Q: They used to burn the magicians, that's why I am afraid to be a magician… .. K- the problem is that the soul of many world leaders have already been, has become aware of the ?? change. **We'll still go to work and run offices, nothing will change but then we'll do it in a totally different way**. As I said to a friend of min, we have all been waiting for the revolution and then when the revolution happens, this time with our soul understanding of it, you say what, how have you done, how long we have been waiting for this. We haven't asked you to go on the streets and march ?? the Christian, Moslems, and Jews and governments, we elevate the STM that itself marches himself to that direction of elevation of the ?? It is extremely easy. (1:04). It looks complicated to man because he always thinks that there should be something to be done. There has to be a reason and a cause and an effect. **But in the universal dimension there is no what do you call it, cause to do something, you do it because it is to be done to benefit the others.** Q: Yeah that is the problem because we think materialistically, we say, how much effort to change how much effect … K- Let me show you the way with all these systems**, very few systems will be keyed and set to convert the STM. Very few systems and those systems, when we do it, we'll let you know. Then man decides**. It's very much like a Chinese or Indian or any restaurant, you choose what restaurant to go to. These systems will be more or less the same, you choose, if I have a cancer and want to get rid of it but I still want to suffer in the dimension of physicality on this planet. Or you say I have no diseases but I want to be at a point of understanding the work of the U and I want to be a part of it, then you go into the machine and it elevates you to that level. Q: Thank you for showing a little bit of what is waiting for us. (1:06). K- It's already in China … The Chinese KF has been extremely working hard and are the backbone of this structure, .. especially the Austria team and Canada in. ..

It's not one man there are many involved in the structure of this machine, in the setting up the structure… In China, everyday we achieved a higher level and more .. in 7 days ?? leaps in the totality of the work of the KF. The first factory was completed and contract signed and Shaunzin paid. ….
The electrical side of the systems .. work of .. KF China. (1:08). All this is set up by Gyaun Lynn who is coordinating this team .. …
going into manufacturing of the products and large scale setting up of factories …
We hope to complete in March, massive structure, 2 factories in China …
.. on the yellow river with building of new research centers..
Chinese TCM university in the trials that have already started. ..

(1:10). In conjunction with a world leading university's As these things take shape we'll see more collaborations in that structure. China will become the backbone of many things for KF developments. . …
.. EU in AZ .. cooperation with space agencies..
We take shape in science and T in exchange for peace. And the next steps in developments. These are very small duck compared to what we came to mankind after the total peace treaty between America and Iran. ?? and invite the president to Iran.
(1:12). **We have no more guns to sell or rooms for producing defense T, so what are we going to do with guys who are so talented sitting there making war weapons. They'll start making peace weapons** and then you'll understand. We are reaching that point .. we'll see in the coming weeks once the announcement has been released, you'll see the changes. Q: Thank you … As you talked about the private teachings the KFSSI private teaching is now structuring itself into research or what we call groups they'll come to some sort of conclusion by tomorrow or next week. Then they'll start the process of research into what they would like to do. Then the KFSSI will merge into the work with universities …. This isn't something new, we went it up this way …
(1:14). inside the leading universities …
.. There is a big problem with this, as you know China, Iran and Us are very protective with their knowledge, Now that the KS start sharing knowledge with ?/ in America and China and every where else, the knowledge of plasma. It's very hard for governments to go through this transition and trust needs to be built that this is now universal knowledge it's not just something ??
(1:16).
.. open up to share, or do we go to the next step of forcing the conditions. I don't like fighting and that kind of thing, but at the same time you can make conditions that the other side has no choice to accept the conditions in increase or decrease in the value of their position …
.. Someone came that wanted to know Mr. Keshe outlook on China's position with regards to the outside. ..
(1:18). My advice to the Chinese government and to the administration that these reports go to was, zero trade with US, which means we don't need to go through all these tariff fights with the president … **We just don't create that condition, when there is no trade there is no tariff, there is no discussion. The Chinese took this in a very strange way, directly to zero trade and what they did**, is sent out an order that has to be carried out, that no Chinese governmental organization or those connected to the

government in one way or another, in 3 years from January of this year should (not) have any computer or electronic system which made, controlled, designed or has any control with the US. Zero trade, when we don't have it, we don't buy it. This will hit badly the US and the computer industry. This is the cleverness of the state to find solutions to what is. this means we don't need to tariff you when we don't have any equipment to use or T. What we have seen in the background is CPC has advised like Huawei to produce and replicate all American products. Now we understand you can bring as much tariff, but you can't tariff when that is nothing to be tariff on. (1:20). With what we have signed and setup with the Chinese KF in the next 12 months with the leadership of the KF in China, we'll see the development of the full productions in western China then China won't need to import any goods that will lobbied on. This process I part of the factory that we have taken over as of this month …. We are going on the same path with the T with the know how and solid science of it. We'll explain this within the Chinese structure. In that process by making China to be one of the leading nations to be independent of food and T from US, then nobody can tariff. …

we have seen Putin move in that direction with disarmament, or discussion with arms . We see all these things taking place step by step very rapidly, you have to realize that, this revolution, this what we started is going to be so radical that it will not take the time of years but will effect us immediately in weeks. (1:22). When the East and West opened up, it took a couple of years for western and eastern Europe to start finding out we have no borders, we have no soldiers what are we going to do. Cutting you down. With the evolution and revolution which will come in the next few weeks, suddenly factories and organization that were geared up to the armament factories and defense, have nothing to sell, they have the products but no buyers and then what's going to happen, go bankrupt or find new products, new ways to do things. This is the point where KF KS have to be standing by and aware of which companies run into this position and approach them directly. Let's talk about the new T and talk about things in the new way. Let's see what we can do with the knowledge we are holding for thousands of people who are holding such a high talent. This is what your job is, headhunting to convert the companies into a processing in our new peace processes. It happen 20 years ago in 1990, now it's a second revolution but this time it is all of us. What happened with all the people who used to make arms in the eastern bloc, they're gone. What did they do? Some people opened other factories and did other things. the same will happen in the western world and this will be very rapid. (1:24). We are not talking that this will happen to humanity, it has already started. **Let me explain to you what happened last week and why America totally submitted to the Iranian state of peace and talk. Hours before Iran took the step of not damaging anything that it could effect the zone with Iran.** They chose a specific position. **They blocked the total radar with what we call a plasmatic dome. The Americans had no communication with the people inside. The same thing that was repeated with the drone, was repeated on the ground**. The American defense had no knowledge, they couldn't see inside what's happening to their base. **It wasn't an electronic blackout it was a visual blackout, very much like when you look into the sun**. The reality of what happened in those few 10 minutes showed the total incapability of those most advanced nations in the world, even to stand supporting its own soldiers on the ground. They had no access to it (their base). Initially Iran showed

its power in the capture of the drone. Then Russia showed it on the (Black) Sea. **For the first time this was shown on the ground. Blocking the state of Israel for 10 minutes and wiping out electronically all their systems**, (1:26). now is a reality. It's not that as I said, not allowing Iran to have nuclear, it is our nuclear has no power so we have to find an excuse. The power of the T delivered in **Iraq has literally decapitated the whole of the defense T as we know it today**. You ask the Americans to show us any pictures of the zone in Iraq where it was the scene, what we call the screen of what was going on. Ask them, let's see if they can show us any satellite film. they have drones and a (2 hour) notice can we see any drone pictures. Q: **It was in the Internet, the news the passengers and American soldiers were frightened because all of a sudden there was no light, no movement**, it was written they were frightened by the cut of communication. K- Don't forget we read the passage of history to tell us about the casualties in that night. The casualties of fright, of the most advanced T worth nothing. **We will see the fallout of last week in the coming weeks, (1:28). and months when the American defense T cuts**. Because we saw .. What it is, **the American taxpayers and Senate have to ask the producers of these T to Pentagon, the American Army and Navy, where is and why did your system not respond. What have we bought from you, that in the position of what it has to deliver, it has no functionality**. This is the question we have to ask. Now our militaries when they buy the latest gun or whatever, have to ask, can it overcome the Iranian new plasma T. It's not that we buy from them, it's, can it be or is it already obsolete. We have seen the beginning of the end. **Many governments have to ask about their purchased military positions, is can it overcome what Iran has delivered. In the past we saw how much the Saudis were jumped when their chemical plant was hit, how the Americans blamed Iran for it, but in the end it was one of their own (missiles). Return to sender.** (1:30). If they could prove, show one piece of that rocket, that it was made in Iran, haven't you seen how they played, before they sat down with Gaddafi and the rest. They knew it was one of theirs. Now we see the latest defense T sold to the nations has become obsolete. these are walls of castles that have crumbled. What are these American defense T going to do? Collapse. Or do we see the emergence of peace and we use these for the advancement of mankind into space and the development of the new structures for humanity. This is the beauty of what is to come, we have no choice. With what we have seen in the past days in the Middle east, the 2 that has happened. First of all one of the highest ranking of the Iranian army and secondly the death of the wars because of it. No one will go into war. If the Iranian military, scientists use this T. Go back on the teaching, how many mothers and fathers will not ever see there children (again) and how many children will not see there fathers and mothers when they are buried in the depths of the ocean. (1:32). **We hear the Americans say they had no casualties in men, but the flight to Israel speaks of other things**. We have to take this opportunity for peace and we have to push for delivery of the T for peace. It's the job of the KF supporters in western Europe and in American and other parts of the world to **keep your eyes open for weapons T who were supposed to be so advanced, that they start announcing the closures. Go in and offer them the alternative T, that they keep the employment,** that we do not touch economical conditions and in the process start teaching classes in the most advanced factories. But one thing you sign with us. When you went and you made all these tools to kill, you became part of it. You sign the peace treaty before you start. This is your job. You'll see this coming up. I have been through

this position in the Eastern Bloc and the rest in the past 30 years and I know how it will come up. You'll start seeing major corporations in defense laying off people. **You will see cancellation of orders by people like Pentagon** and other organizations as they cannot do. (1:34). You have to the bridge. Q: All my blessings sir, thank you. You will see that the release of this EU will force Tehran peace talks and conference. You will see we have given it 2 months gap, beginning in March to middle end of April. We'll create such a pressure on governments to walk into the peace talks. there is no choice. You'll understand more and more when the systems come and people paralyzed in wheelchairs and in coma, and in all sorts of health conditions ??? and not what we call the power of the physicality we'll enhance, Then we'll see how the world leaders and their families want to be in front of the queue. Then the conditions for it is please sign the peace treaty. **We will release the list of leaders, ministers and prime ministers and royal families with the diseases which they waiting to die for and with**, then you see when we said there is no priority path (1:36). as we call it in Turkish airlines, fast track for business and first class. then we'll understand. The strange thing is all these people have families, brothers and sisters, children and the alternative to use the system. Don't forget this is an EU and not a medical unit. Any other question? There is a fundamental question that will stay in the hand of those who will decide for future of mankind in using of these T, (1:38). is that **would mankind erase the memory or part of the memory of the new generations and the present generation of wars. Would we see it as so horrendous that with n the structure of these systems, that we take that from the essence of the STM from mankind, and what we call the beginning of time of the life of the soul**? These are the conditions that have to be decided by the Universal Council. **We will not modify, but we allow the soul to make decision that this part of the memory in the dimension of physicality of the man to be erased. There is a specific point within the RNA and DNA which especially carries this behavior and this message**. Q: I remember when we were in the Mozhan when I just couldn't think anything bad, (1:40). like if somehow we create a condition and .. even in my dream I couldn't think anything bad … by creating those conditions for elevating the soul it was impossible to think anything bad, so I was thinking by using these machines or Gans that naturally there will be no more wars? K- We shall see. Q: You said before, why don't we do it, that it's very easy that the soul should go out of the cage it's very easy ??? if we want to be physical or not physical, you can even go in the bathroom and disappear and go into space and come back out of the toilet and just a few minutes are gone. So when you said to me, what are going to do now, the only thing I .. sometimes I play a game and I say to myself I can do this now looks like, (1:42). I am already doing it. thinking this way, another thing you said, the moment we think it's not it, so it's all about feelings. Learning how to record feelings and through them we can change the structure. I have been practicing this. So I think I create conditions, that things happen like a switch… you see I am contradicting myself all the time because you said, you don't need to practice, there is a switch, it's just a matter of one hundred percent trust. I remember the last day when you asked us to fly. Things started to change for me, I remember the heartbeat, and I remember thinking about the killing of the animal, it brought me to the point where the suffering was enough, I declared it was horrendous and unnecessary, then it happened the last day you asked us to fly and I remember thinking that there was such a change in me as I brought back the feelings of (1:44). there has been enough and it was not necessary to suffer and

there was this feeling of unconditional love, and I remember my heartbeat changing but then I remember I got to the point where I had the fear, and that is where I went back to feeling everything being normal again. When I think back about that experience I can never forget, that for me taught me that trust is necessary, we have to have full trust and it's necessary to the U and to our soul and everything is going to be fine and you said, the moment we are ready to loose everything, only then, we are going to have everything. I think when I was in that moment and I felt all these changes happening and I was lifting up and down and then rotating, you remember when I told you this story, no, what happened between us, and everything stopped because of the fears I had of the unknown, and that taught me .. we have to focus on our self and we go back where when you ?? yourself everything go ?? because it's true what you said, it's very easy to do this work from the soul to the physical like you said. That is not the issue, (1:46). the issue is, that when the moment comes we have to be ready to have the full trust to make the jump, because it will happen as a switch, and you said to me, do I believe it, you have to be prepared. It's all about to have full trust. And of course unconditional love because it means you are ready to give up everything, and you said, it's a bit like you have to be like people who want to kill themselves. Ironically they are ready because that are ready to give up everything, even though they should not of course kill themselves, because it's unnecessary. K- Thank you very much. Q: When Stephania talks about the switch is it 3 years ago I talked to you about the vision I had. There was a switch. There was a noise, if you turn on the water, it ripples and you can see them on the water. And this noise created the same ripple in the air, and then, you said don't be scared when you hear this noise, it wasn't a usual noise, it was a very different noise, it created a whole effect in the air, I could feel that the air moves like the water, and then you said don't be scared because we're am going to switch you off, then we'll switch you back, it's going to be different. When I came to the new planet it was so different, so beautiful and it was shocking to me, (1:48). then you said to me, I'll tell you about another time. This was 3.5 years ago. **K- The thing is we'll see women take a lot of positions in the KF because they somehow interact with their, what I call, creative and creation skill**. The position for all of us will come according to our own understanding and what we said and what we'll keep is that the creation of peace will come out of the position which has been created and needs to be created. I see it, in what we said, just now regarding the situation in China and the electronics and computers. A simple step in announcing this, less than 10 days ago **by China has forced the Americans to sign and close all their economical dilemma and whatever they created with China for nearly a year. Because in a very simple and wise move the Chinese showed the Americans, we don't need you**. Now what we saw signed yesterday is literally, just give you a little bit more, until you do your thing, you don't need us but we need you to keep peace inside (? America). Economical sanctions on America will bring huge submission. (1:50). To America and the western world. **The biggest problem for humanity is, how rapidly mankind will repair the physical damages into what they have done to each other, in past years, centuries and thousands of years,** this is the part which we watch and we'll see. **It's not that now that we have the knowledge everything will change and everybody will change to whatever. Mankind has a very big weakness, amazing weakness, and this is what we call love.** We will see that mankind will chose to keep to this planet for the love he has for his family and his loved ones. For this reason we'll not see huge changes as man will

imagine will happen with the opening (to space) ?? will come in. In essence this revolution in science and T will change a lot of things and expectations in the behavior of the man. What will be interesting is how the European nations will sort out the situation in what they have done wrong to the ?? planet. One of the most abused continents ?? by man ?? (1:52). then through man turning on himself in different ways. Something which will be very interesting and we'll see it in the coming months. It's when for example the Pope will confirm the end of the Vatican, how the man is going to take this to the ?? Africa of his soul, so much to the Africans and to the others. These are across the world. What happens when so many believers in the Islamic world, and other paths of belief of the STM will one after another, what we call, lay their paths down and accept to go back and join ?? all ?? and mankind will ?? let and decide on his own soul. What do we have to support this. **What are the capabilities which we have to support such a change. It's not going to be easy**, an easy job that the religious leaders will handle the kingship. Because it's easy. **Our biggest problem is how are we going to handle the religious leaders to tell us that their term is over**. This is one of the biggest dilemmas for the (1:54). world leadership of the religious leaders. The biggest problem how individuals are going to fill in this lengthening gap. The problems are not solved in one go. **The problems now have to be handled in a very specific way by the religious leaders in how we going to tell people that now we have nothing to replace and it's us that has to stand on its own legs.** this is the beginning of an end, but it's the end beginning of the beginning of the bigger problem. I can see this clearly coming up in the coming time, when the religious leaders have, and they have literally abandoned churches. We have seen this before, it's not the first time. We have seen religious leaders just changing positions and abandoning their flock. The complication is huge. (1:56). It will start when these religious leaders try to explain to humanity that the past is wrong. These are part of the problems which will come to us. It's not that it's, I can see the sequences and consequences of it and the reality will hit home very quickly when most of these religious leaders themselves being sick enter these machines for saving their own lives. Then they'll become wise to the reality and the facts, and then what is going to happen. I always said mankind will take my T not out of the love that it brings, but out of the fear of his demise. Q: Is there a way Pl T can change the brain structure in narcissist sociopaths and psychopaths just like autism can be treated? (1:58). .. **These machines will turn up to be showing the alternatives to the present problems, but not necessarily will it come to be the final answer. Primarily mankind will come to understand the alternative and the possibility of the solution for themselves** for what we call, per case so. In time mankind once he is shown this new way, path will come to appreciate it and develop new T around it. What I see, the process of development and conversion, somewhere between middle of this year, to the end of the year, to sometime in the beginning of the following year. It will be so rapid, that mankind, what used ?? to take 200 or 300 years to get, will achieve in months, very rapidly, because you have to realize a huge number of people are highly educated in given specific parts, (2:00). but it just needs this to be added to for it to be completed so that it can be delivered, extremely beautiful structures and whatever mankind needs. This is the beauty of it. The changes will come very rapidly. We have seen now the end of the war between China and American economically, since **China showed that we don't need you. That's another submission. One thing puzzles me, I have never seen a nation trying to glorify his**

losses as Americans do. They are very good at it, every time they have lost they glorify it as a win and only themselves believe in it and understand it. Outside nobody looks at it that way. This is what we saw now, with the American situation with China, resolving again with China making one move, and without a war. They just stop, zero trade. And within days we have seen what's coming. We have seen the same situation now in respect, they thought they were very proud to kill, but they shot themselves in the foot directly. that was our wish. By attacking at what we call, the airport (drone attack). Interestingly their was nobody ready to go to war. Interestingly is **what is mankind going to do with its own physical structure and the wars within himself. Can we use these machines to elevate it.** (2:02). The worst thing is, that as the kings will abandon the kingship, we got used to it. We'll bring elections in and what we call democracy, we bribe and do whatever we like to, we'll bring it in. What are we going to do with the gap in the religious leadership and what resentments will come after it. What we see .. world leaders and monarchies abandoning ship and asking for refuge in Canada. What happened with this British Prince we already knew from internal security weeks ago. Now we tell you it is the same. The Belgium monarchy will take refuge in Canada due to the fact of many things which are coming in. We'll see the same thing with the beginning of the end of the British monarchy the same. The Japanese Emperor will move. In the structure we can handle this, but how are you going to tell people who through their soul have believed in Christ or Mohammad and now they are told, it's up to your soul because we are not their to do because we have discovered the truth. The reality is (2:04). that when the religious leaders when they step down, because they have seen and understand the truth, then now how are you going to do. What are the implications of this change. Or **do we build another system for people to go and pray to, to go and elevate their souls, or will they understand they can do it themselves, or there is a process of achievement**. There is going to be a very rough ride for the human race in the coming weeks. We have seen it step by step. Yesterday you've seen it, Americans and Chinese finished what the Americans started, it was a good thing because America lost their power in the domination of electronics, because other nations will follow suit. Because now the Huawei and others are ?? ?? the Chinese will supply to other countries. We'll see step by step the cleanup ??. What happened yesterday in America, with 3M and Dupont, have now come under a huge structure of contamination creating cancer. Dupont and 3M will have a lot to answer in the cancer process. What we saw with what the government of Michigan has done with 3M yesterday (2:06). will bring a lot of these big companies to answer for what they have done wrong and how they can put it right. The 3M legal on the back of Dupont, cancer PFS will have a lot of implications. What is important is to tell the people of Michigan how they done it and how 3M and Dupont have done this contamination, who can repair it and how can they correct it and how many people got cancer because of it. The same will come with the other things of ?? Don't forget we have 14 days left for the Italian government to decide what they are going to do with the KF work Any other question. Q: **Will the use of money totally disappear? When you can feed yourself from the energies of the U** and when you can ?? supply yourself from the energies of the U, what do you need money for? The Porsche or the bicycle. We have to wait and see and understand the next step. **The world economical order will collapse. (2:08). this is without a doubt, the way we know it. The world power system, collective running and accepting will come to an end**. These queues as

immigrants and refugees that cost them will become a laughing stock in a very short time. Q: My understanding is that one of the jobs of the U Council is to focus on the vision of for example in correlation of the army people that they are going to go on to jobs soon. And what we can do with all these army or … now is the time we have to focus on the vision to ?? to good so how can these people be served, humanity in such a way to help the transition, (2:10) now it's where we should focus on the vision of how we would like to make this transition to go for the army, and schools and … if my understanding is correct? K- We shall see. .. that's the job of the soul of the U Council. Why do you think we gave you the job? We made it easier for ourselves. Q: When the east and west bloc collapsed and the arms factories collapsed because they stopped working, but in recent years, at least I know in one country, in Bulgaria all those factories they picked up and now they produce in mass ?? arms (again). so what is going to happen to them now? K- They'll go back through the same phase again. .. The world leaders have to find a solution that every man lives in comfort and has what he needs, we are not going back to the communist times of equality, but every man has the opportunity to elevate his soul and if he wants to live in the dimension of physicality to elevate his physical condition. that is the reality of the time. This is what is up on us today. (2:12). Q: **In the process of this elevation and process time are we going to have any casualty of the man? Why are you worried about the casualties, look at the beauty that it brings**.
Q: … I have an old car. I applied the Nano coated wire since the end of 2015, I put 2 wires to it and I notice about 6 months ago the shinny lacquer in the car started coming out. Do you know this shinny lacquer which all the cars have. Yeah. It started to come up from the car and stops all over the places. It's not normal. K- It's very normal. Q: I mean it is not normal for these cars. It can be in one or 2 places. (2:14). But not the whole upper part of the cars. I don't have any rust on the car, even when there are scratches, or rocks hitting making dents but no rust. So is my car ready to fly now? K- I don't know, are you ready to fly? Q: Always. K- The flying car or flying objects as we call it will be shown in the structure of the EU. We'll show, what I asked is to show **the 2 systems next to each other, one is for the enhancement of the body of the man, the other for the enhancement of the environment. When we show these 2 units we'll try to have them next to each other. One you can produce materials and the condition of the space and one you can produce the condition of the human body**. These systems we'll have the, or part of it, in the coming days, then as it is the Chinese New year we are stepping down for a few days and then they'll go back and finish this part (the 2 systems). Then we'll see and show the total operation. (2:16). Q: There is a teaching you taught regarding this in 2016, yesterday I was watching it. K- In respect to what? Q: To this, devices. K- These devices now, always exist, we will release technologies in the coming weeks, totally, that will change the process and new characteristics. The number of teams of scientists around the world which are working to complete this process in March. They say, if we see we'll believe it, so **now we are going to show you so much that you don't even know what you've seen, you've believed it**. Any other question. Q: .. using the machine, I understand that if you have an artificial component in the body, there are other methods you can use for treatment but is there an eventuality that you will be able to enter the machine if (2:18). (you have an artificial piece in the body) such as a hernia mesh are removed? K- Can you explain exactly? Q: I remember you saying that if you have something artificial in the body that there would be a condition created in the

machine that you wouldn't want to use the EU at that time and you could target the body with other T. But if I have a desire to use the machine, **would I ever be able to if I have artificial parts in my body? K- We have foreseen this in the Universal system (EU) yes. What you'll see as part of the EU is,** this is the dome and we have developed and actually you will see it, that if this is the body, .. we have developed a T that we can isolate systems, part of the body to the other condition there. **With this new system it can be done yes. If you have say, because I have this dilemma with this guy (Armand), who had a heart operation and I couldn't help him because at that time we didn't have the T, (2:20). but now in the design of the EU, yes**. We have developed a system which **we sandwich the body and we can isolate certain parts while we are processing, or target certain parts while we are processing**. So when you have let's say a cancer of prostate we can target directly the cancer of prostate and the brain of it directly at the same time. Not to touch anywhere else. Yes, this has to be done for Armand and I had to sort it. I designed this system to overcome because Armand had pieces that we could not help. The T would have created more problems but many people have others pieces of things in their body. With this **we can create a stable condition in the given positions while we are sorting the problems somewhere else**. We watched that to be, we have a problem .. we are testing this now in China by doctors. We have a volunteer who was blinded and he has a platinum plate. I designed a system for the doctors to bypass and not effect this platinum plate and he was with me and the doctors last Saturday, and his vision is coming back. He has improved his vision in less than 4 weeks and he is coming back. He has tried the stem cells and everything else and this is part of it that we could allow that we do not touch the environment of the (2:22) platinum plate in the head. We look at it in a totally different way and this has been a ?? You can go in of you have had a bypass or a hip replacement, the machine should be able to isolate it, to keep it at a perfect position as it is, while the rest of the body is getting processed. Yes now it can be done. A few weeks ago it could not. As they say, need is the mother of inventions. For years I tried to sort this out, and then Armand went through this and I wanted to help him in every way but I could not see it happen, but now, yes we can. Q: **Can you give us a hint in how the fields are directed that way**. You have talked about it many times but I am thinking specifically with the EU. We were discussing this in the Plasma group to determine …. ? K- **We call it a trade secret** (ha, ha) … Let us, .. we have a funny case, **the Spanish guy who has copied the MaGrav system, he has taken all my MaGrav system which is blue and made a green one and put his own name on it**. He has made a copy of the plasma unit and he has asked to buy one of these EU he wants to copy it. So we said, no you can't have it. (2:24). He takes everything and changes it to his own name, what do you call it, the inventor of new T. It's very amazing, he has taken a MaGrav Unit, a blue one and has made a copy of it in green. .. So we try to keep these trade secrets and we monitor where these machines go and how they are handle. That's why I said we'll keep a trade secret. That's what a secret is, we have to bring it to test it and evaluate it and understand it and then release, and then we will teach it. We don't teach it anymore, you can buy a EU for half a million now or for a million in 8 weeks time and then we'll see. .. Q: I am sure there will be people replicating and using the T, in a way it's beneficial and in a way you have competition in the market place as they say. K- **We don't have a competition. Whoever copies our system they pay us a fee for it, according to what they do with it**. You'll understand how soon we'll operate

these. Q: **You said nobody can copy these EU** because you designed it in a way that only you can make sure that it works in a proper way, so even if they pull it apart they can't copy it, that what you said? **K- Very much so**, you'll understand, you'll see it. As I said, it is not magic but understanding the T the way it is set. **If you work within the ethos of the KF you'll learn and you'll gain**. (2:26). We'll see. Q; Why was the double ball reactor used? In reference to our soul, our "universal unit" that you have put in the EU of the egg, so it's like a double ball reactor. In order to gain the confidence and soul area of physicality?? **R- Is there a relationship between the idea of the double ball reactor and the idea of our soul inside of the EU? K- We'll see,** it's just how we are going to do it. Something which we will structure around it and we'll see,… we'll wait and see how things will take shape. Q: .. What is the difference between a Gans made in the frig and one made with water at a temperature of 15 degrees above the ambient temperature? K-This was raised in the K family questions. (2:28). and they are tagging it everywhere. I think they have to go and test it and come and tell us. We already did this some years ago. Q: **What is the difference in the strength of fields involved with such as Gans made in summer at 35 Celsius and in winter made at 4 Celsius? K- No difference**. Q: Does the interaction continue in the water, the Nano coating of H and O together? K- What do you mean? Q: The birth of plasma between H and Nano H, does the interaction continue in the water, Nano coating … , you could consider water to be di-hydrogen oxide, an oxide of H does that mean it is already .. ? Next question. Q: **Some people are worried about 5G and they think it is programmed to kill all of the human race and so on, is there any counter acting T in the Pl T**? (2:30). K- What they want to make it 6G. R: I think you once mentioned about 9G or 50G or whatever of the Pl T? K- the process about 5G or the other modes of communication is how much energy in such a short pulses can transfer rapidly. If you make these powers now instead of frequency into plasmatic. What would the effects be and how it will change the position. Q: **Who will be the first leader to take the first step to announce Pl T**? Ayatollah K will be the speaker in this Friday's prayers in years? (2:32). Will he surprise the world? R- I think it is hard to make predictions sometimes. K- Don't forget we have requested for AK to give the first speech, the opening speech in the conference in Tehran. You have to understand that **the world leaders have to satisfy certain internal consumption of what we call, rise of nationality and on the other hand they have to satisfy international demands. We will expect an announcement in the new direction** and dimension, at the same time you have to understand, that the gentleman who was "missiled", was very close, close person to him. I think we will hear some rhetoric, other actions, and some talk, **but underneath of it Iran will offer an olive branch to the American state but with authority and the power and not on the levels of submission**. This is what is expected from this and you have to listen between the lines with Iranian talks. (2:34). You have to realize when Trump blocked all the assets of AK he didn't respond because he is not financially attached but when he touched those who are peacemakers and those who are influential in the strength of the Iranian knowledge making he responded with a ?? prudent wisdom and we expect a very deep fundamental change in the Iranian attitude towards world leadership in science and T, and advancement in this. We will hear as usual, some rhetoric's which is normal with these situations. The consequence of it will stand on its own. You have to understand Iran has lost some 190 people by mistake and they will respond to that. But we expect a strong

olive branch on the basis of peace and we'll see a new step a new era but we'll have to separate the rhetoric's and knowledge information that comes behind it. We hope there will be a word of wisdom in Iran taking the leadership in science and showing us a science in a different way then what had to be shown in the past 7 days. (2:36). He is a very wise man and knows how to handle it, but he has a domestic audience which are extremely angry with the situation and it has to be addressed. Any other question. Q: **I found a teaching where you discussed the diamond structure for Gans production, 8 sided that indicated 1 dimensional opposite to each other, 8 sided**, potentially alternating plates. Is there a teaching that shows the effect that would have on Gans production, then can I transfer that to a 2 dimensional Gans production, where I put a plate on top and bottom as well? K- **That can be done, this is part of it but you have to understand how you create that condition, and what will it bring**. I wrote to one of the Chat room, the limitation of this knowledge is the imagination of the man. (2:38). Sometimes you'll be surprised what you'll see.
Any other question.

(Soul Teachings:)
In the process of the creation of the U if this screen, is a blank sheet, in the motion of the fields of the U mankind has to reach a point that understands the position of his soul, it's due to the interaction of the different fields of their motion, it doesn't matter their direction. There needs to be a point where the seed is set, that this seed becomes a position that the other fields of the U can attract and interact and in the process lead to creation of the fields, that this seed of fields becomes the seed and oyster, for the pearl. In the world of oysters the animal makes the shell and when he takes the seed and he creates an environment inside it, to grow it into a pearl. **In the universal condition for this position, for the very rare amounts of energy which moves, (2:40). creating so many trillions of stars and galaxies, to create this seed, to start the star or a galaxy, it's very harsh.** As man becomes aware of his position in the universal condition, he will find out **at the point of separation of his physicality, using the creation of his soul, the seed takes flight of fancy and in that process where he finds balance will become that seed**. Then in so many ways, now you understand why the STM is so important in the dimension of the creation. **We nourish the baby in the womb of the mother for it to create the existence of the soul, that this soul becomes the first seed in the creation of the condition of the existence in the U**, that the totality of the fields of the U, in collective interaction will lead to creation of life and sustainability that this life in turn will link in the strength to the soul of the Creator, that in conjunction, (2:42). with the interaction of the fields of this unit, in the coming time there shall be a merger of the bigger which the totality will lead to, what we call, the creation of the Creators condition of existence. I have explained this before but with what mankind is about to come to reach in the coming months. **Mankind will come to understand how the U Community will feed mankind, as the STM is part of the creation of the soul of the U. Then we hope that once man realizes his position, he will not become arrogant to lead to his demise in the U**. Then you'll understand why in many teachings ?? we always told and said **that the mother is the most important factor in the structure of the life, that she creates the right soul, that in eventuality leads to the creation of a perfect existence in the dimension of the U**. In totality what we will see, (2:44). in the universal

condition and dimension is that the, what we call **the nursery of the earth, the perfection of the soul is the ultimate goal to create the perfect star and system**. Mankind should not suddenly be taken for a fool when it comes to the condition of the interaction and the life of the U Community. **At the same time mankind should realize that in the UC he will not be used as an incubator for the creation of the conditions**, ??? for those who understood a little bit more about the structure of the creation in the U. As I call, souls are the seeds to create the conditions of life across the U should not be a blind spot for the wisdom of the man. The travelers of the U are aware of this knowledge and I always remember the words of Dr. Elya Kostova she used to say that the earth is a very, what we call, an expensive commodity for its minerals, and has very high state value. (2:46). But in fact it showed that, how **man has still not understood the value and the position of the man in the UC is the strength of his soul in what he can give and create in the dimension of the UC that in the future those who have traveled and understood the process of creation will not take man, the STM as a part of developing their own structure in the depth of the U due to the lack of the knowledge of the man**. Mankind will soon understand this, as we take you to the U it's no use you going in not knowing that you have one of the best fruits, and they tell you nothing about it, and they sell it at a higher value in the market and they tell (told) you it was rubbish. **Mankind has to come to understand this, why the UC is interested in the STM, it's not they can take it and use it, the UC knows that this cannot be done, so we brought mankind to the level of peace and understanding of what we call universal peace for him to understand that there is a need for perfect souls, that from it becomes a perfect creation of the new dimension of the U**. (2:48). In the coming time mankind will understand that new universes are continuously in creation very much like you create new states that these universes need perfect souls for the structure to begin. **The STM is one of those gifted soul and that is why the world leaders those who take the seat of what we call leadership, have to understand that they can't compromise in any shape or form in the future, and in the future contractual agreements and understanding with the UC**. These words will have a lot of meaning for you in the coming months as the structure is set. The world leaders on this planet should understand this next step clearly, that mankind doesn't become the nursery for the physicality of the man to create souls and **the human race has to be in total control and understanding of the position and the freedom of his soul in every dimension of the U.** It's very much like those seeds that you plant and you water it and watch it grow. The STM is the seed of that plant and that tree. **Now you understand the function of the tree of life. The meaning of it. It starts with the life and the STM. Mankind has always been so ignorant to the knowledge, to his knowledge of the U. (2:50). He has taken the knowledge given to him by travelers of the U in the physical condition and not in its true essence of its understanding and creation.** My hope and my deepest hope is, with what I taught you that I don't make you slaves of your own soul in understanding the creation of the new U and the conditions in the U. In reality the expansion of the U needs new seedlings to guarantee its survival and planet earth is one of those nurseries, nurseries of the soul. **The only thing that we have not managed to understand is why these citizens of these nurseries kill and destroy each other, where in the future they themselves become the structure of the life** and would you like to see your children get killed, as you kill other people's and other entities children. It

doesn't matter, vegetation, animal, or human. **In the process of why there is an interest in the structure and the life of the man on this planet is not the physicality but the STM, is because to take the physicality of the man to the other positions and dimensions is too cumbersome, because then it can't be replicated, but when you take the STM it adjusts itself to the dimension of physicality**. (2:52). When we take the physicality of the man to the depths of the ocean it can't survive, but if we take the STM to the depths of the ocean it will decide on its own creation in the dimension of the existence at a position in the sea or wherever it is. Now as I said, **I will not allow man to become a slave but on the other hand mankind cannot become a ransom taker and selling of the STM. Our job is not to allow the abuse on both sides and this is one of the reasons why we have abolished the kingship that no one becomes the property of no man and each soul needs to make his own decision of his own freedom and free choice**. In the time to come **man will learn the ways of perfection, of perfecting his soul, of the structure of his soul and the knowledge it carries. The wisdom and the understanding comes from the intelligence and not from ignorance**. In the coming time we need to explain, (2:54). to the world of humanity what is awaiting mankind in the dimensions of the creation. **As you have seen a queen looking after the eggs in the nest of ants by creating ?? ever this has been the job of the earth for the UC, but now the UC has taken the step to make sure it's perfection from the beginning**, not going through, what mankind has been over the life of his physicality. At the same time now we understand why the prophets of the past have said, 'if I tell you how beautiful the other side is you'll all commit suicide.' And that is, **when you understand that your soul becomes a 'soul seed' of another U if it reaches perfection, how many of you would like to be the creator of a U. The totality of the knowledge has to be transparent to the men of the planet,** to the totality of the human race irrespective of color, race and position, as there shall be no religion. (2:56). **Man will nourish his soul to perfection, that at the point when he chooses the separation or amalgamation, he creates the perfect light to lead to creation of the seed of the U.** Would you like to be the seed of a U or to be a part of what others have created, then you become the slave to it. A slave in the way that you live according to their conditions. This process of transformation has been hidden from mankind. In many teachings I have referred to it and you are fully aware of it, but now we make it very clear. Do we understand the position of the STM and the reason for creation of the man and how so detailed the structure of the physicality of the man has come to be. (2:58). **The process of creation and positioning of the soul** is very simple, this is the earth and this is the STM, and this is the soul of the Creator**. If the strength of loving the Creator, mankind is strong. In the strength of being loved by the Creator it has the dimension according to the position of other universes within the Unicose**. This position of the strength of the STM decides the position that the STM will create his own U from. Would you like to be the creator or to be a dust in the created environment for what it is. Mankind has to understand more before the point of meeting. And mankind has to, in a way, understand the totality of the knowledge, before the doors of the universal knowledge has (will be) opened up to the man. The gift with this knowledge is that **the soul shall decide what position in respect to his creator, (he) will shape and take according to the strength of the souls he has gathered during his life on this planet.** (3:00). The **physicality of the man is nothing but the position of the interaction and absorption of the fields of the U through the STM. Maybe now**

mankind understands the purpose of this creation. Many of you have asked, 'why are we here for, and what is the purpose of life?' Now you understand in full, that **not only are you there to create a new cycle, but if mankind serves the UC as a whole, at that point of strength, mankind will become and can choose to be part of, or to be the creator of. Then that shows, it depends on the pride of the soul and the physicality of the man during his life on this planet**. It's very much like when you are in the womb of the mother your physical condition decides if you are going to have blue eyes, short or long, be born in a rich family or be poor and suffer in the dimension of physicality. Now you understand in one of the teachings what I said, if you care about your physical children, what would you do, and how much do you care for the life of the souls, (3:02). which your life will lead to the creation (of). **If the religious leaders can explain this to us, it means they would have already been enlightened, but they have kept the secret from humanity to abuse the physical dimensions of the man**. So it means none of the world's religious leaders and leading scientists in the religion have ever understood. And you'll understand why soon they'll all take what we call, the ?? term of, and will put the hat of the man on to accept, all the knowledge on to, than abusing the man through the same power of the ?? head (hat). Maybe and it's my wish, maybe, that by the time I stop, mankind will have started the true journey through the spans of the U. **The reason we have introduced the EU is very simple, we would like to reach the point of the perfection for the STM before his departure to his new destination**. It's very much like when we let our child go, (3:04). we try to give the best education and best clothing before we let our child marry into a new dimension of life. The purpose of the EU is this and nothing else, the rest of it is according to the man's dimension of physicality and understanding. There is a beautiful verse in Koran, -- Which means we have given all of the ?? gifts, all of the ?? barricades of God to the STM, and it is for it, to elevate itself. **Now that we have seen that weakness in the structure of physicality, we have given man a gift. In a way we gift you the knowledge that through that gift you will create perfect souls for the new universes to be created in the dimension of the creation**. It goes back to the same, the fields of the UC from the soul of the Creator are as ?? brought, and then we put you there and you create a condition that will lead to creation of new universes. And this, as it is connected to the UC, of man's field strength will lead and attract new souls, which are common denominator to the strength of the field of the man from earth. This field itself is needed that in interaction with the other souls created, (3:06). and the stars and galaxies created by the strength, create that gap strength, or condition of the confirmation of the existence of the U. Which means in fact, if you think, the STM could be like that proton in the atomic structure of the gold in the center. Where other protons, electrons, neutrons from other universes collectively leads to creation of the galaxies and creation of universes and those who become part of the Unicose as the creator in the center of the totality. Now it's the job of those who call themselves the religious leaders to enlighten the flock of man to the truth of the existence of the soul. It means that opportunity before the closing of the shop, as we say, to prepare mankind that the man will not suffer now with another new loss of going to be where it is, that they start creating another god and false statues to be the ?? leader. The man in the dimension of physicality is looking for a purpose and it's the job of the world leaders and those who abused man to show and guide them to the right action, but this time there shall be no abuse. (3:08).

Q: Maybe a high level meeting of the religious leaders will bring unity between them if we all wish and imagine and some of them will accept and a new uniting role position in true humbleness? K- The world religious leaders know their terms. It is over. As we say, the bell rang months ago. Humanity did not listen, but the religious leaders were waiting for that sign. That sign has been delivered. They know exactly what it is. We shall see in our meetings with the heads of religion, what we call, head covers in the robes of their shoulders and they'll become man of, common man. In our time we shall see that there shall be no priests to abuse the STM. And no one should claim that because I used to be this and that, guide your soul to become and get a better position. There are no agency workers, as I call it. As the last Pope has said, he will be the last Pope because he knows what is to come. **Don't forget that these people read the true scriptures and they know what is inside it.** (3:10). Any other question. R- We have a technicla question from "the Breatharian Institute" as it is called in live stream. Q: I utilize a 100% scientific accurate divining system, do you know why the standard male formulas tend to be 70% CO2, 30% ZnO, in the beginning and then working up to be 5 to 10% CH3 while decreasing ZnO. and women tend to need 70% CO2 and 20% ZnO and 10 % CH3 …. is anyone discussing this at all is it possible that male scientists are missing this subtle difference in constitutional needs? … (3:12). K- It's not too technical, it's his understanding and it has to be valued. … yeah, but then it becomes sacrosanct that is what it is. It is his understanding. It might elevate and create a new condition for the others to think and maybe understand the knowledge in different ways. Q: Stephania …. To me it's very important to have the vision because if we are the seeds of the U it's very important to become a beautiful plant and to have self responsibility to keep our vision clear … the U will be the result of our vision if we are seeds, is it correct? K- Most probably, yes, it is according to your understanding. Q: This give you a lot of self empowerment and self responsibility because I remember you said, one man can change, (3;14). ?? the whole earth, whole U, galaxy and beyond, so there is so much we can do? K- Man through these teachings should gradually understand the position of his life in the U. This is why we started this teaching and this process and in so many ways, many people said, when we see it, we'll believe it, but when we show it and you believe it, you will give your life for it, because then you'll see the light of the knowledge of the U. Then you'll understand. Shall we call it a day… Q: Can the MaGrav or Gans make the soul more powerful? K- It depends. Thank you very much for being here today and, (3:16). I hope we all got the full message of what is to come and why we are here. Be ready for what mankind has been waiting for, for a long time and if mankind does not come to become kind to man then kindly you have missed the boat. Thank you very much and see you next week. … Mexico City Conference February 7 - 9, 2020. ..
(3:18).

.. Q: Would it be possible to add streaming for the conference for those of us who are limited in traveling with our physicality, so we could attend the conference Online? (3:20). K- The only conference that will be streamed out will be out of Tehran. Q: How do we sign-up for the online? This will be done according to the permission by the Iranian government and how it will be allowed to stream out. We have put a notice on the Iranian channel that is for others who are aware of. The 300 Euro for the Iranian

conference. Those Iranians who take a guest to host are given a free entry to the conference. If you have the financial means you can pay 2 one for yourself and one for your host in Iran, or on the other hand, all the Iranian hosts will have a free admission to the ?? conference. In this process we try to bring about the condition of understanding the totality of the work of the KF and in the next few days I'll be meeting with Iranians .. (3:22). We are still waiting for answer from the office of Ayatollah K if he allows the conference to go ahead. We don't see any reason why not. You have to understand there is a very critical position for the religious leaders and not the scientific leaders and that's why we put the position to the Iranian leadership to take the leadership in the scientific world then the religious side, that is once the world religions accept and see the power of the new T in the coming weeks through the EU and other things which are coming out, how can they resist the truth and how will they find their position in this structure. Then you'll understand that there is no seat for what we call priests. Then they'll resist it because they won't have a seat, but those who you have elevated, or they have elevated their own soul will put the turbans down and that will be the end. But it doesn't mean the knowledge in different dimensions of the knowledge of the man cannot be used for themselves and the others. The Tehran conference, if the Iranian religious leaders oppose and block we will stream line and end the whole of the religious structure worldwide through the teachings of those 4 days and I will show you what is even if it means to bring the presence of the souls of the past prophets. It's within my power and knowledge. (3:24). So there is o choice, it's a one way track towards peace and knowledge, in exchange for peace and no religious leaders or world governments or officials or leaders can block this process. You will understand step by step. Look at the structure when we announced conferences in the past 3 conferences. In Vienna there was an admission of the government to corruption and took place during the time of the conference. We saw again in Brazil. Today in Malta. Yesterday the new government cleaning up the corruption of the past and completed they start anew, fresh. These are not coincidence, as we touch we clean. Tehran in the seat of religion, the present, ?? Nothing is coincidental in the way we structured and take this. Tehran it will be streamed, inside Iran to outside Iran. Thank you very much. (3:26).

312th Knowledge Seekers Workshop - Thurs, January 23, 2020

(*** Blueprint for Coronavirus:
KF is opening up all its resources to help the Chinese nation with the Coronavirus, Estimated 10 to 20 million people are infected has 12 day incubation period,

KEY-PHRASES:

** Detailed teachings about the 3 levels of knowledge and summary of what we have been taught over the past 5 years; (G+M); I+(G+M) ; (I = Inertia), Man has achieved

Inertia level flight which is basically levitation, G+M+I manifests as Gans, it's fields can move cars, The 3rd type is the M+G field system of which the Iranian flight system and planets are examples, In this type all 3 levels can exist together like on planet earth or when we travel in the depth of space,

How the Iranians used the technology on the American base in Iraq creating a dome shielding effect for 10 minutes no communications in or out, This technology can be used to stop the shipment of arms across the planet, There will be massive unemployment and a massive development of the new T in Arizona and use of technology to feed the unemployed, Bringing all the KF KS around the world to help the Chinese nation, Viruses are the only thing that will destroy the man in space so this is a good exercise,

Coronavirus Blueprint Day teachings:
Reads KF Plasma Times article about what the Coronavirus is,
Caged wild animals can create the virus through their emotion and crosses to humans,
The mechanism of virus in plasmatic terms starts at time 2:04, >>

The proper way to transfer the energy out of a virus is to introduce another plasma to it one that is in the Gans state like transferring the energy of the orange to the water experiment, For this to work there has to be Amino Acids in the Gans to make the connection with the virus for energy transfer, The Gans mixture has to be weaker than the virus for it to drain, The mixture of Amino Acid, Zn, and Cu for the virus you can wet the face masks to breath it in, wet your hair and hands with the mixture. We'll release documentation confirming non-toxicity of the Gans,
When animals are mistreated viruses are created through their emotions and come back on man himself but he doesn't know this is the cause, Gans is the only thing that can deplete a virus through field transfer, Single and double stranded viruses, The Black Plague, If the Gans mixture is wrong it could have opposite effect and strengthen the virus,
The Gans mixture recipe is Amino Acid, Zn, Cu, CO_2, Have the people breath, wet their mask, or wash their face and hands with it, It is that simple, Go to the hospitals and let the doctors use it, The Chinese bureaucratic system is like India's caste system and the knowledge is being blocked from reaching the top, Calls on President Xi to change the Chinese governing structure to all people have access to the top,
Questions: To use dry Gans need to find a way to bring the Amino Acids in, Problems with separating the AA in Gans production, For prevention you don't bring immunity but you make a mass transfer of energy, To determine the ratio of Gans's we have to understand the totality of factors not what others tell us, Being in balance is a decision of our soul and physicality not something outside for immunity, Expecting the Americans to release a second degree virus maybe this is part of it, Modern colonization by Europe and America comes through science and technology and killing scientists to steal their technology, When we overcome the virus then our bodies can use those energies,)

English Transcription:

(:06). ..
Today is a very special teaching. We have announced across the Chinese KF, supporters, universities and the government that in this teaching today, in about an hour and a half into the program will become for the Chinese a Blueprint (teaching) which means we teach the Chinese people and authorities how fast they can reverse this mayhem that has been created in China. As you know we have handled **the African Swine Flu which is a double-strand but this one is a single-strand (virus) it is much easier to handle** and the effects are immediate. I know many Chinese KF are listening in the background. As has been the tradition **the KF will open all its assets to the Chinese nation which means all the production and all the facilities of KF and KS will become assets of the Chinese nation**. We'll go into this in more detail, and we have reserves and can support 1 million sick people in China and by the end of next week after the holidays we can increase our support to 10 million Chinese, those who are infected and those who might be infected. This is a single-strand virus and control of it is much easier, (:08). then the Africa Pig Flu and we have seen some results in the past 24 - 48 hours. We will make sure that the knowledge of the KF in China opens up to the public. Chinese universities and authorities have been informed and many people will be aligned. We'll start in about an hour and we'll go through this process. It's good for the rest of the KF supporters around the world to be prepared that the flu has appeared in Brazil, as they are reporting, and we know this is the season and time that Chinese are traveling, it's their holidays, so they'll be carrying this virus right across this planet. Everyone of us is vulnerable, especially if you fly through airports and we can't ban the Chinese not to travel, we welcome them but we have to be prepared to support the nation in time of need. This is the responsibility of KF supporters worldwide. You have access to all the Gans's. **This is a serious matter, it is estimated that 10 to 20 million people can be infected already and it have 12 days incubation time** and you can see how bad the situation can get. It has become very serious in China. It has become a worrying condition for the Chinese authorities and we are responding to the needs of the nation in respect to the KF One Nation, One Planet, and One Race. On the other hand as usual, we go further into the teaching until we get to that point, then we'll receive a message from our people in China that everything is set up and ready to go. In that process we'll instruct and inform the KF KS (:10). in how to handle and how to apply and prevent and if you are infected to be looked after properly that you can overcome the virus. On the other hand, as we are going ahead in the usual pattern we work, the KF as you know we have become instrumental in many ways in different applications and implications around the world. For this reason we ask a lot of KS to be prepared for the **next step in the development and as we said, in February we'll release the CO2 capture systems as a commercial unit, then as an agricultural unit, and then as a water purification and for animal care.** This unit will be displayed hopefully, before the end of February and will go on sale within the next 2 to 3 weeks, immediately, the week after the Chinese New Year comes to an end. There is a part of the teaching which we conveyed the message on the Iranian channel teachings, which I think should be shared worldwide. It opens up a new dimension or brings out the totality of the knowledge in what we have shared before, we share this knowledge because it is important to be understood. Following the situation with Iran in Iraq, a new

structure and understanding is needed by the KF KS to understand how the totality of the knowledge has to be understood and be shared. In the Iranian teaching I tried to go into more depth with this and it's important for all of us to understand this now that we have completed this conjunction, (:12). where we start understanding the totality of the knowledge. In the past years we have taught about the gas reactors which were developed in Iran and further developed in Europe, then we introduced you to the Gans T, and then we came across other states of the plasma (Pl) in production of the materials and how things are created. **In the knowledge and the science of the KF we have covered 3 levels. One level into our understanding is what we call gravity(G) and M field (G+M), there is another one we call Inertia plus G plus M (I+G+M), and one we call Inertia (I). This is part of the teaching that has to be clarified, especially now that we are going into the space level**, understanding of the space T in a very simple way. What does Inertia alone mean. **Inertia flight system** is very simple, it means we use the matter state equipments or materials to achieve what we call **levitation. It is not possible, extremely difficult to be able to fly across through space to another destination by Inertia**. It is possible and some races have tested it, but extremely by eating food by turning your hand down your head, as we call it. What does this mean? Flight by Inertia is when you use matter states dynamic systems or understanding of it to create flight. We have seen this one with the American military that tested it in 1975, where they managed to created a (:14). series of dynamic rotating magnets at a high speed and in conjunction and position of different magnets, they managed to create a flight in respect to solid state position of other magnets all rotating opposite to each other. You achieved levitation in height but the energy put in to achieve is beyond the energy, and what can be done outside. So we have seen this done by other groups, where they achieved lift even to a few meters and then coming back to position they can't reach to travel very high. This is what we call the dynamic motors. In a way **it's dynamic and the system can fly parallel to earth, more or less, within a space gap. What does this mean, it means is that we can't go high, we can't travel between what we call the planetary system**, but we can work within the structure of understanding the totality of our work in a way that we can extend the work and the knowledge to the level that it can allow us to do simple things, simple flight systems, simple understanding of the whole process. But then this creates a condition for us that we have the limitation of the planet earth and the restriction to move. Creating interaction at this level can lead to (:16). or maybe allow us to go a little bit in a combination of Inertia and what we call, MG field forces. So **Inertia and MG forces are matter state condition**. On the other hand we need to be able to understand further more that this is for objects, **for moving cars**, this is for understanding the totality of the system that allows us to be able to operate within cities, cars maybe, as we have seen with electronic connections and electronic powers to be able to run trains. **The next step is what we call MG field system with Inertia is what we know as Gans's**. What does this mean, this means we use the combination of the G and Inertia and M fields in understanding of the interaction of the 2 parts together to give us what we see as a Gans. We have a system which has G and M fields, as a condition of a Pl, but in conjunction with Inertia manifests itself as Gans. **That's why for the first time you can see the energy packages, but they have no, what we call, dimension and in so many ways they are very much connected to life**. (:18). The Inertia and MG fields is what we call the human body. In interaction with the energy of the Inertia, that, becoming into the

matter state gives an intermediary state what we have **known as Gans, energy packs in the condition of what we call interaction of the fields of the Pl with the Inertia, or matter state of a planet**. In this process a new understanding, a total comprehension of the science is needed by the world of science to be able to share the totality of the knowledge between the Inertia and what we call the small MG field elements of the Pl of the matter that it manifests itself in the Gans state. These **we have shown that we can create and use the fields in the dynamic cores** where what we call, 'we see we create fields for body enhancement,' we create fields for agriculture, we water the plants with the energy transfer in the matter state in the Inertia, we use it for all sorts of application which we have seen for past years. **Then we have systems which are entirely and totally are what we call, MG field systems, these are the flight systems, these are what we saw with the Iranian flight system, creation of vast areas to cover, vast dimensions, and creation of a single cell collective matter state movement. A planet is this**. (:20). It creates G and M fields and in that process of dynamic condition, it creates and holds on, and it creates a field of protection for itself. The planetary system is one of them. **So if you understood the 3 different positions of creation and interaction of the fields in the matter state, matter state and the plasma state, and the plasma state itself, then man has entered a new dimension in the world of science** and the understanding of totality. The Americans and some scientists in the 90s, or 1970s and 1960s, managed to get there (I). You as KS in the past 5 years have managed to get to here (I+G+M). The Iranian and the KF space program has laid the claim unto this part (G+M). But in that process if you understand the totality you can amalgamate and create a condition that all 3 can exist within each other, very much as we see on this planet, the human race, the animals, and the plants exists as a Inertia, MG field of the Pl, as one unit, as a combination, or when the fields are singularity, we see it on the stone, Fe, Cu and the rest, or when we see the dimension of the interaction of dynamic system, the planetary system, the flight system, we call it UFOs, you call it spaceships, you call Earth Moon, it is the same**. The comprehension of this is needed in the next phase** as we enter the March meeting in Iran in respect to the space T. **When we travel (:22). in the depth of the space. When we travel across this U, now we have to understand the totality of this knowledge, which is which, and where we need what, and how we can extend this knowledge, this ultimate goal of life in the depth of the space, in the security of the MG fields of both gravity and shielding and at the same time to be able to create materials that once (when) we need it, if, the dimension of Inertia and MG fields created by ?? both.** If I go to planet Zeus, but I would like to have what we call the chair on planet Earth, because I have been there I had the experience of it. But on planet Zeus I am 4 to 10 meters tall but on earth I am this so on planet Zeus I have to make myself a giant chair that I can sit, so I don't need to sit on the ground. So we carry the knowledge, we see how conditions are. It depends on what we need to produce. When I get to the moon I know I can create water but I need the matter of Inertia in the loose field of the gravity but the strength of the M to be liquid. Then you understand that the knowledge of the man has to enter a total and full understanding of the knowledge of the U. Would humanity, mankind enter an understanding of the totality of everything or would we in the process of understanding create a new dimension for us to be able to share knowledge (:24). in the depths of the U. What we have seen in the past 2 weeks, many people have asked me one question, **can you explain what happened on the ground in Iraq in**

respect to the Iranian and American forces and what lead the America general to stand in front of a group of journalists, observing their physical shaking in their skin and we listened to the lie of a president in not telling his nation the total truth. What happened in Iraq and with the Iranian and American forces that has lead us to peace, making the old obsolete and bringing a new dimension in understanding the totality of the field forces of the U, in understanding the implications and applications of the totality of the knowledge. Let me explain to you in a simple way what happened in Iraq 2 weeks ago. This is for the Iranian government officials to take further. This is the American base with what we call the European part. We saw this work with the (capture of the) drone, and with the Russians on the American ship (in the Black Sea). What the Iranians did is very simple, **they placed a system which created a dome and isolated any communication in and out. As they created a barrier, (:26). then the American Army was at the mercy of another force. The American forces, drones, satellites, air force, and ground force could not penetrate**. They could not even see or communicate with the base to know what is the fate of the people in this position. If you understand, this is the base, this is the dome .. how do you want us to do. **For 10 minutes the barrier was kept** and everything possible was raining upon that no man will fight again. We explained the same situation with the drone, if you remember, some years ago. We explained the same thing what happened with the ship in European waters. **What Iran did was literally paralyze the communications of the defense T of one of the most advanced nations in the world**. My objection to it, which **I objected strongly was not to do what they did in destroying the bas**e. But in so many ways, the Iranian people ?? .. made that message that no one is immune. What we have seen in the international arena is very simple. Many military contracts are on the table, questionable to be signed. If the American forces could not protect their own what T are they selling us, (:28). to protect ourselves. **Has Iran brought a new dimension into defense and peace T**? As I said to the Iranian teachings which was broadcasted directly in Tehran. It's a very simple position, we have no choice but to enter peace. Let me explain the next step of what we see and what I advised the Iranian leaders to follow and **to be brought to the United Nations** table very rapidly. **As sanctions have been on Iran for a long time for supplying arms or whatever to what they claim to be different sectors in Syria or wherever. Now that we have this new T Iran has to become the enforcer of peace that no nation can ship any arms across the planet. The T is within the reach of Iran**. It's developed by the Iranian scientists, now needs to be ?? by what we call the ??? ?? conference. What does this mean? How come Iran was under pressure that if they ship fuel, guns, or tanks or food to Syria it was a criminal offense. From now on no nation can carry any ships, or planes, or materials from any border which can endanger life or create war. As we say in English, what is good for the goose and good for the gander, what is good for the female duck is good for the male duck. What we see is a total ban and enforced by the Iranian new T of movement of arms by any nations, be it the US, Russia, Iran be it China. (:30). This has changed the position of the force and has brought a new dilemma for the American administration. If you remember when we entered the peace talks. When we got the Iranian peace negotiations, 5 +1 to conclusions in the last weeks, I made a speech to the Senate, that I want to know which member of Senate would object to the creation of 5 to 15 million jobs by signing of the peace treaty and contract with Iran, which then it went to the Senate. Now the reality comes home that as the American government's

military operators cannot export or sell as also the Iranian, Russians, and Chinese cannot move anymore the tools of war across the borders what happens to billions of dollars of income from the military and jobs in the US. This forces a new position for the American government. **We'll see rapid unemployment in all states especially state of California. This brings us to one point, we bring a condition of peace through all the nations through the development of new T, deployment of the KF Pl T on a G + M, condition, and then we have to use the condition of Inertia and G+M fields as Plasma field forces to be able to create food and energy for the number of Americans which go unemployed and have no food or money to feed their family and their nation** .This is not a dream, this is a reality that will hit the European and American nations in a very rapid way. An agreement is reached between all the nations, (:32). how to divert these talents and companies which make tools of war and can't ship, (and shift them) into a new application of what we call new T. My suggestion is very easy, **KF has put position for a massive structure in the state of Arizona and we invite the American advanced T to join us with the Iranian scientists at this site to develop new T that secures the national food security for America**, as it doesn't matter what amount of food you have, **you cannot go any further with all of these mass murders and killings**, from the past trend. (I have to change microphones) .. In this process what we advised to the American government is very simple, speak to the Iranian government and KF US and start organizing for the mass unemployment that will hit your nation. It is very simple. I was talking to a couple of military leaders in the past week, and they said, Mr. Keshe there is a big problem, we have no more defense if Iran militarizes this and applies it to all the neighboring nations. We'll have nothing to defend. There is no option left but to enter peace talks with (:34). our neighbors that we do not spend the money we don't have to spend. This was the situation of 2 weeks ago and the implication of the T literally has brought a new dimension to the world peace and the conditions we have created and we are responsible to respond to. My advice to his Excellency President Trump is one thing, we invite you to Tehran for the March meeting and in that conference it is better for you to come with the end of sanctions on your nation to come, and not on the rest of the world. Sanction on selling arms and creating wars and a peace treaty that allows all the nations to enjoy the new T. We do not expect much, but we know we can deliver much. In so many ways, the American administration has one choice, enter world peace or shake like a leaf as we saw with the generals in front of the world media. This doesn't come out of the arrogance, this comes out of the delivery of the T which was setup in Tehran some 12 years ago. My message to the WH is simple, no one surrenders, but we surrender to peace. No one becomes the winner except the peace for humanity and as a leading Iranian nuclear physicist, and a tool for peace we open our operations in AZ as we did in expanding further in allowing a direct joint collaboration between (:36). Iranian scientists, Americans, and the rest of the world, that we set out a new way, new law, a new peace condition. I request from the Iranian government and officials in Tehran, extend this knowledge to beyond the borders of Iran that no nation cannot sell any tools of war so that they can't kill any child or fathers. The point of changing has come and has come through the T and science and not through the arrogance of guns. **We increase the pressure on all nations to head for peace and in the coming weeks we'll release systems for mass production of many tools like, for creation of blood, extraction of CO2, creation of new systems at the household level**

to feed nations and peoples without relying on grain and food. These will head us in one direction, we are preparing mankind for the depth of the space. The classroom has started as we see KFSSI has entered its research groups, I have seen some 21 groups have been setup in research. Join in these groups for development of new T that in the coming weeks and months it becomes beneficial to the human race and teaches us more to do. On the other hand the question for all of us is very simple, what do we do with all the knowledge that we have gained and where do we expect our leaders to lead us to? I have one message for the world leaders, (:38). the warmongering is over. Invest in the new T for space development, and for feeding your nations, and the KF will release so much T that feeding your nationals becomes a pleasure to be a part of. We have shown the MG field system which belongs and is developed now by the Iranian nation, by the Iranian scientists. It was developed in 2008 and we brought the knowledge of the Inertia and MG field, internationally to all of you as Gans. So we need to put these together. On the other hand as we already know the knowledge of the matter state (I), mankind is ready to be taken into the space with the security of understanding the total structure of what we call, Universal (all 3 states together). If you would like to understand it in a different way, this is the Principle (G+M), this is the Transition (I+ (G+M)), and this is the Matter state (I). We know this by the books and the articles which have been released. Do we need to create more tools to become faster to reach the depth of the space, that depends on the dialog of what we call our religious leaders, our political leaders, and primarily by our soul. In the coming weeks as we release the new systems and as we expand in the knowledge then we will see the totality, then we'll see the next step, (:40). in the creation of the knowledge and T which will allow our nations and our governments to take the new step. As one of our friends said in one of the teachings, 'show me.' The time of 'show me' is over. You show us, how you can help us to go further, it's not for us to show you how we go, how we advance for you to take the pleasure. In the coming weeks we'll increase the pressure in such a way on the governments with showing a new and totally radical space T (G+M) on the KF. This T will make the present Iranian space T obsolete. This T will bring all the balances of the horses together (all 3 states). We left the knowledge of the shielding to the Iranians for years. We brought the knowledge of the Gans to the KS for years. And mankind on his own understood the Inertia. The new system which will be developed and released by the Iranian conference, will be very clear. **It will be a unit built like the U, it will have G that will allow it to create life, and at the same time if the life depends on the matter state will be so**. It is a radical change. The world leaders have 2 choices, to lead us to peace or we will lead them to 'no office.' (:42). Which means the world leaders have to, as you KF KS in so many ways, a few years ago, went on attack that we gave the knowledge to the governments and not to you. Now we gave the knowledge to you and not to the governments because they didn't listen. Now you and the governments will bring a new life, one we call, the new spaceship program in a very simple way. In the coming system in the Enhancement Unit (EU), we will mix the MG field system (G+M), we will mix Inertia and MG field (I + (G+M)) system, and we'll bring in the matter state (I), collective of what you need to live in the space. This knowledge of the MG field system will demonstrate a new flight system which will be in what we call, developed, within the EU. The T has been developed and in due course will be shown. We hope to be able to demonstrate this in the Tehran conference. As I said, knowledge is free but it has to be free in the hands of the

man of peace**. In that process the KF KS have reached that state that we can enforce peace through knowledge and we have to understand that the new world structure has to be based on understanding of the totality of the work of the U** (:44). and not just man's decision to do what he likes when he likes, and in that process we'll bring a new order, a new condition.

We are waiting our Chinese team to be ready in Beijing and then we'll translate and we'll convert to what we call the Flu System in China. We are waiting, the Chinese teams are in the background waiting to start this process. The European and American team have put the introduction to this virus and are ready to start once our team is ready to go, then we'll go further with it. .. Ruti can you hear us. Gyuan Lynn. Yes Mr. Keshe I am here. Can you start translation for the Chinese community. I am already translating for about 20 minutes. We'll switch to what we call the blueprint of the influenza for the Chinese nation. You'll understand further more in what process we can go ahead. Rick would you like to enlighten us to what was done by Ella, the head of KF in the background, that we understand this virus and what the Chinese community and all of us now that the Chinese are traveling across this planet, have brought us as a gift, but in a way this is very life what we (:46). saw in the situation with Iran. **It is a gift which unites us, even though it looks so bad. We would like to start the Virus Blueprint Day**. This is what is a headache and a problem in China for the Chinese government and nation. They are spreading and spraying all the Chinese cities effected with all sorts of chemicals to prevent and control it. **The KS of the KF in China, it is your responsibility with the knowledge that you carry to be able to be able to bring all the materials you have freely at no charge and no cost to your nation. Any of the KF who tries to make benefit at this point for selling the products or the process which is being introduced, you have to deal with your soul.** It doesn't matter how you produced or what you produced, it's what we call the production of the materials of the KF and our process in the factory is at the disposal of the Chinese nation. This means that as much as the KF team can produce will be given freely to the Chinese nation for them to protect themselves. At the moment yesterday 17 people have died in China and many more have been infected. This is the Chinese New year and this is a gift from the KF to the Chinese nation. (:48). through its KS. We understand what we call the disease, then we understand how we handled a much stronger disease in pigs and we understand how simple the eradication of this virus will be. Everything comes together, the Iranian peace conference, understanding of totality of KF throughout the world working together, and breaking all the taboos about the knowledge and understanding of the totality of the knowledge to help humanity. **As the viruses are the only things that will destroy man in the space this is a very good exercise**. This is an amazing exercise for all of us to understand and to bring a position of what we call peace. This is a test run for humanity before we go to space. A real test run. If we are hit in the space with massive viruses how are we going to handle it. This is it, now it has hit the nation of China. How are we going to be if it hits one of our spaceships. How are we going to protect ourselves that all of us in the spaceship (SS) are protected. **We are in the SS in the depth of the space and we get hit by a virus, energy attached to the Amino Acid (AA). We are on a SS called earth. (:50). and we got attacked by it.** We saw this virus in different form a few years ago, it killed many and brought mayhem to the Chinese nation. Now there are **some**

rumors in China which has some support, that this virus was deliberately introduced by the Chinese New Year to create mayhem and create political instability. It doesn't matter, the KF is there. We'll teach the KF KS to be able to support the Chinese community, your families and yourself. **The process is very simple, we do not claim a medical application. We claim environmental cleanup** that in the process of cleaning the environment the totality of the process becomes inevitable for all of us to use. Rick would you like to start. … .. explain the science behind the virus. (:52). We have a document from Ella. ..
"**Virus Blueprint Day -- Coronavirus**" ..

(:54). … Ella explains… refer to article in KF Plasma Times. .. Rick reads.. virus in deep space travel. .. current approach in the medical world,,, diagrams… how to understand viruses through K science and T. Corona virus. (:56). Rick I think you had better read this … because for a lot of people who don't speak or read English it will be very hard for them.

(You can copy and paste from the original article ..)

Viruses: energy packages without physicality - the dangers of deep space..
(:58).

(1:00).
(1:04)…. The Current approach in the medical world. We maybe have a first ground to expand on.
.. There is no solution through the current medicine for it.
(1:10).
.. How to understand viruses through the K Plasma Science And Technology … we understand viruses are packages of energy that leech themselves into ..
(1:12).
(1:18).
(1:22). Coronavirus: Coronaviruses are species of virus belonging to the subfamily Coronavirinae in the family Coronaviridae, int the order Nidovirales. Coronaviruses are enveloped viruses with a positive-sense single-stranded RNA genome and with a nucleocapsid of helical symmetry. ..

.. Coronaviruses were first described in the 1960s from the nasal cavities of patients with the common cold. These viruses are subsequently named human Coronavirus 229E and human Coronavirus OC43. … and they have been involved in more serious respiratory tract infections. As of January 2020, deaths from China have risen to 17 with more than 540 cases confirmed. It is suspected to originate from illegally-traded wildlife.

Replication of Coronavirus begins with entry into the cell. Upon entry into the cell the virus particle is uncoated, and the RNA genome is deposited into the cytoplasm.
..
(1:28).
(1:30).

.. Severe acute respiratory syndrome.
(1:32). Middle East respiratory syndrome.
(1:36).
Spread of the Wuhan Coronavirus in China

.. they are spread between animals and people.
(1:38).

(1:40). Common signs of infection include respiratory symptoms, fever, cough, shortness of breath and breathing difficulties. In more severe cases infections can cause pneumonia, severe respiratory syndrome, kidney failure, and even death. Standard recommendations to prevent infections from spread include regular hand washing, covering mouth and nose when coughing .. thoroughly cooking meat and eggs. … no restrictions on travel. ..

(1:42).
(1:50).
(1:52).
How to protect yourself from getting infected.
(1:54).
What do we know about the virus?
It originated in a seafood market in Wuhan that 'conducted illegal transactions of wild animals', authorities said. The market has since been shut down. There is also evidence of human to human transmission with the new virus spreading to family members and healthcare workers.

(1:56).

(These are the last 2 paragraphs)
… But CNN reported that the "South China Seafood City" market in Wuhan peddled more than seafood, obtaining video that allegedly shows raccoon, dogs, and deer housed here inside small cages.

But why might such conditions create a breeding ground for zoonotic diseases?

"When you bring small animals together in these unnatural situations, you have the risk of human disease emerging," says Kevin Olival, a disease ecologist and conservationist at the EcoHealth Alliance. "If the animals are housed in bad conditions under a lot of stress, it might create a better opportunity for them to shed virus and to be sick,"

The area where the virus can potentially spread first.

(2:02). K- How much more do you have left …

K- If we read from the top to the bottom **the most important part of this report comes in the last 2 paragraphs**. If you go to the page above. We see in the report that it explains "South China Seafood City", and officials and scientists talking about when **animals are in this duress and not in, (2:04). what we call, psychological in a way right condition. We have seen these viruses and man does himself the same thing when you transfer what you call, psychosomatic diseases**. We need to understand the totality of the disease and then it teaches us a lot of things very simply in the last 2 paragraphs, then the rest of what we read about. To be able to handle viruses we need to in a way, make a conclusion and summation about the totality. What does this mean. It means that in the current form and conditions and how we get ?? cancer, what I call ?? ?? viruses, is very simple. I am going to share a screen white board. **In a scientific way when we look at a solar system and when we have a sun and a planetary system, In the world of science in understanding the fields, these fields connect to each other. They connect through the matching strength to each other, it doesn't matter in which way it could be. So what it tells us is very clearly, these are energy packs which are created by emotion. These are energy packs which comes from the emotions of animals (2:06). or humans, interestingly enough we transfer it through our lung system, through our breathing which is the emotional part of the body of the man.** We don't see these viruses attach or attack muscle tissues or whatever else. In the present system it is very **easy to understand how these viruses can be handled and in a very simple way we can deplete them from it. As they say this virus takes hold and moves in and takes hold within the structure of a cell, which sits on an Amino Acid (AA) becoming and delivering energies which are not needed and energies which need to be consumed until the point of the specific condition. This is very much in line with why some people catch this virus and some people don't. It means that those who catch the virus all have to have a specific strength common denominator energy level. We can come in touch with, if the AA in our nose or in our lungs is not of the strength matching of the virus we don't catch it. Which means it goes back to what we said, a specific strength matching locks into our AA and this creates this condition and many people have that strength and when the strength of the emotion of the animal matches the strength and the emotion of the man, (2:08). the virus transfers**. This is a vital important position for man when he travels into space. In space we'll become home sick. We'll get viruses attached to our emotion of missing home. We'll get all sorts of these kinds of energy packs into our structure and in the space condition we'll need to understand more. This is where a lot of research in the future will come, in this level of understanding. But how can we help, and how can we understand to help? If you have a lung which is infected by this material, by this energy, it has to go into the nasal passage or through the breathing of the mouth. These are AA connected diseases or what we call energy packs. The most fundamental point for people in China is what they are trying to do is to cover their faces with what we see, it has become very common, these face masks. At the same time we see it with fever or with sneezing, or with pneumonia. **The proper source or way to, transfer the energy of a virus out of it, is to introduce another plasma to it. A Gans state. Because it is an energy pack. Do you (2:10). remember the glass of water with an orange or a banana, in a way, when we created and put material around the cup we managed to transfer the energy of the orange or banana to the cup.** We created an condition of energy fields that it could

be transferred. Many of you when you made these cups you said it doesn't have the taste, 'I don't taste or feel anything,' Because there is one vital element (missing), because the glass or the cup you used was too clean. There were no AA to create the condition of the transfer. What we learned from this is one of the most fundamental points for the KF KS who go out to eliminate this (the virus) is the existence or presence of AA in the Gans that you use. You create a condition that the AA, or the field which is connected to the virus, finds a passage of transfer.

(**HOW TO USE** the Gans for the virus:)
You'll find that very rapidly the virus will deplete itself, from its energy in the cell, (then the) fever, pneumonia, and lung infection will change condition in the body of the man. **One of the fundamental things that you have is the use of the AA on the Gans systems that you can create that link. The other point is, that as this is emotional, it has given us a very clear (Zn) direction. (2:12). It's connected to the AA, the Zn. As it connects itself to the muscle or what you call the environment of the muscle tissue of the lung and can exist in the ?? nasal, is the presence and application of Cu. You have to remember that the energy of the virus is more, so the total effect of your Gans and AA, has to be weaker than the virus that it can deplete its energy into it**, but in a way part of the energy of the virus is still in the cell, part of the energy of the virus in the AA, but none has the strength to carry on, and we see a rapid reduction in temperature, and fever, and clearing of the lung. The way that we suggest to our Chinese colleagues is very simple. **You use these (face) masks to breath, make a mixture of AA of the Zn, plus Cu, and frequently spray the mask. Either way as you breath it creates a lung, and at the same time depletes if there is anymore virus in connection to your AA**. In a way you put a barrier between the one who carries it and your body, if it is not immune to it, or has the same strength, (2:14). by putting the masks you absorb either way you deplete it. Very simple and very effective. In some cases you can use the Gans water of the CuO ?? ?? as to reduce, as it is emotional you can simply wet your hair or your hands with it that it depletes the emotional strength from it. **It goes back to the ethos of the work of the KF, as this is from the emotion of the animal, it is psychosomatic and it appears itself in the lung of the man, for that. So you need to create a condition that, in a way, by wetting your hair and wetting your head with the Gans of Zn and CuO. You can use a small amount of CO2 for neural connection**, and you'll find a rapid depletion. **You can even use it to spray the house, you can spray your hands and make this as water available right across the city**. It should not take too long to in a way, bring the energy of it under control and gradually as the sum multiplication in the Gans with which you create will reduce the totality, you will find the virus will be more or less eradicated. This is how in the space T of the future we will do this. But you have to understand that this is a man dimension application as of today. In the space we don't have waters, (2:16). so new T have been developed that will be coming to operation in the next few months where we create the condition that, as we saw yesterday Chinese are putting vehicles in the street and spraying all sorts of chemicals trying to protect. What the Chinese officials have to do and understand, if you can create a condition of the AA in your mixture, plus some Gans's you'll see effective reduction. The next day or 2 is the Chinese New Year .. and the Chinese KF you can give this as a gift to your nation. Produce as much as you can and freely in containers, give to

the people to spray their masks, to wash their mouth and even those who are contaminated, just you can do it. We have a very good news for you, **the KF has within its arsenal and we'll release documentation to confirm that these materials are non-poisonous and safe. This is when we at the KF produce it.** We are in possession of non-toxicity of this material and of other conditions done within the past few days in China. This is the place, the factories, the productions we have. We have paid a lot of money to confirm it and so we can say from what we have, that it is non-toxic material. **The materials that we have tested has shown to be non-poisonous which can be used and at the same time we have certification for production (2:18). of this Gans material for this purpose which will endeavor after the Chinese New Year** to spread across China in mass production of waters that can give you the support of this material to support the Chinese nation. This is a gift from the KF to the government of China, we have already informed the authorities that we have the process.

KF Chinese production systems need to collaborate and to make these available freely across China. Our production team is ready to deliver. There is a restriction to transport liquids within this city which is damaged, or it's on the, what we call the curfew of transportation. We have people who are within the city who have some materials. It's your responsibility to share and deliver this to its citizens. **We will face these kind of viruses created by ourselves for our emotional compensation in the depth of the U, and we'll attract these kind of viruses from the emotion of those who are captured, be it animals or other structures in the life of the U**. The last 2 paragraphs of the report **is the conclusion of the reality of what man has done to other animals, that in return they pass their emotion back to us, but the emotion is so high that we cannot handle it. Now you can imagine what we have done to these creatures of God**. (2:20). We have seen this in Africa with the fish, and I am not surprised that they say it's in the fishing ground, or in the fishing city by the sea, and they think it has gone through the fish market. It could be correct, it depends on what the fishermen have done to their fish in the, what we call, development. **What have we done to the fish that its emotion has transferred to the cell, the virus to man**. It doesn't necessarily mean that it comes from the birds or animals. The same with the Middle East one, **what has man done to the camels that he has transferred his emotion for man to feel his pain. This is what we have to educate ourselves on, and not to see how it came, but to see how we have caused it. What has been behind it, us as humans. In a way we are harvesting the fruit of our own conduct**. In so many ways, maybe it was the fish that has brought it to us. **Maybe it's the combination of different animals in captivity and so horrendous conditions that this virus is a collective energy of 2 or 3 animals together, what we have done wrong to them that it comes to us**. (2:22). With this T we have to be very open minded and understand the totality and not to be captivated by simplicity just to justify our own suffering. **We have caused it and we are paying for it**. Now maybe the Americans have brought it, the dog has done it, or it comes from the whatever excrement of the animal, or is airborne. It is the emotion based. In so many ways the solution is so simple, but would it **teach us something new, or every now and then we jump from one virus to another because we harm others**. That due to the strength ?? … their emotion is connected to the AA of their lives, so they connect it to us. If one day the scientific world doesn't just look at who has it, but looks at **the common denominator of**

the emotion of who got it, who has been infected. I am sure, you'll find 99% of all the ones who are infected or catch the disease have more or less the same emotional disease strength as the animal. (2:24). We saw in one part of this report it said, the ?? food chain got it from the farmer, did the emotion spread the same? They suffer the same as the farmer or in the hand of the farmer that they got it. This is what in overall is the **responsibility of the governments to make sure the animal care becomes a pleasure and comfort for the animal that in turn they don't become a menace to man through their emotion** of what we call, ?? man. In the depth of the space we'll come across these energy packs which effect only these certain races, because the condition of emotion fits to their energy level. **The condition of the soul with not being happy with the presence of its existence will bring these to. The purpose of these teachings is to enlighten the man for the harm he has done to himself and to those who live within and around. We see these kind of viruses continuously out of East Asia where animal husbandry is very rough**, where due to large population everyone is crammed and no one is happy there to be. (2:26). When we see these viruses usually we see them in winter time when the pressure, emotion, and the motion bares the condition of what we call cold. They are **usually single-stranded which are mainly connected to the emotion, that is why the KF Gans T interacts rapidly. When you have a double-strand, which means the totality of both the physicality and the emotion, very much what we saw with the pigs. Those usually because of there strength come through higher temperature and warmer places. Mutation of the higher level strength and then you bring them to a cold environment, they become deadly** as what we have seen with the African flu in northern Europe and now in China. We understand the totality of the interaction of the fields. **This is one of the reasons no antibiotic works because what we call virus is connected to the emotion. The medical and the world of pharmaceutical has no material and no medicine for emotion, energy of the emotion. This is why the energy of emotion is a dynamic field and the Gans T is the only answer, the only answer to viruses**. Now we understand we have broken into the world of the science of the U, (2:28). and now we understand how we can understand and apply simple T that in reality **we do not need to go into the physical dimension, we need to solve the problem in the emotional dimension**. Mankind is very lucky that he has not ?? had the strand of viruses of single strand directly to the emotion**. If we make it double-stranded in the background of the single-strand we'll have the plague we saw in Europe called the "Black Plague." Because it has the double strand in the background of the single and it's so deadly**. Maybe this is a warning to our farmers, to our **governments, to start thinking about the care of the animals in a human way that they are happy in their existence that we will not see anymore viruses**. Any virus, SARS or what name you put on it, through the KF Gans T is resolvable, irrespective of its strength. We have antibiotics for everything else, now we have Gans T for viruses. (3:00). This is why our doctors and pharmaceuticals always fail to overcome viruses because they never understood that viruses are energy packs which attach themselves to the AA and create such a mayhem. Now that we understand that it is the simplicity of the T and the simplicity of understanding the T to create conditions for this transfer. **If we can and use different Gans's to just deplete part of the energy of the virus from the body of the man or the animal, you'll find out, that as it is half linked, it will not have the effect, and we'll see the reduction in temperature, fever, we'll see**

rapid reduction, within virtually minutes. We're not talking about hours and days, these energy transfers are from one bucket to another, it's immediate. It's very simple, we need connection of the AA, you need the connection of the emotion, and you need the connection with the body of the man and in so many ways, literate of physical connection through CO2, will bring wonders. **But make sure the centers are low that you don't use too much, that the energy transfer comes to it. If you get your balance wrong you might even give some energy to the AA that in return it will bring it back, and it takes it that much longer to overcome the infection or transfer of energy**. (2:32). As I said, it's the responsibility of the KF KS to very rapidly to spread this across China. **You might have some success with the AA and the Cu because in that process you might have transferred some energies across, because in your ?? AA when you are producing CuO you (accidentally) might have some Zn and in the process you (would have) created some CO2. But to be safe the recipe is this (AA, Zn, Cu, CO2**). we know that KF KS in China hold tons of this material amongst themselves. **Go and Just wet the masks, take the water and let the people breath, wash or wet their face mask with it and you will see that they recover. Go to the hospital where the infected are and just let the doctors use it**. We'll provide the certificate of non-poisonous (non-toxicity) on the back of KF Austria. We have the certification that the material is non-toxic and this gives us the security to do. Guan Lynn would you like to explain the non-poison certification that you have received. GL- Yes, we have done the MSDS report and they did the CO2 test of the content test to show what is inside. (2:34). And some tests for feeding the animals and skin tests for allergies is still ongoing. We already have the water produced by Chinese pharmaceutical and food factory that is our water is all qualified for feeding all regulations of the energy drinks. K- In so many ways, we can distribute these waters on the back of what we have to support the Chinese KF to support your nation. We hear the reports from Brazil that I have noticed in the KF family, saying that the virus has arrived in Brazil, there is no difference, you have a competent team in Brazil who make these things and they can support you this way. You can take a drop, you don't need a huge amount of it, you can take a few drops per day on your tongue to keep yourself immune. You can wet the mask with it to keep yourself immune, you can drink some of the water which is produced by KF to do this thing. It's just the transfer of the energy. **Go back to the teaching, understand the teaching, when you have the infection of the lungs, in the structure of the body of the man, a pipe goes down to where your stomach is, and in the process where the infection, (2:36). or what we call the virus is in the lungs and you drink the water, which is set for it, you transfer the energy across to it. And as this is connected to the brain, psychosomatic, you do the same when you wet your hair, when you breath and you drink. It depletes as many cells as possible that allows you to recuperate very fast**. No one should die in China of this disease, of this virus, if the Chinese KF supporters are able to spread this material across China as fast as possible. You all have made Gans's. Those of you who know the T but never did (make Gans's), for the sake of your nation do it. Setup boxes and spread it across, give freely. It's you who has to save your nation. We are there to guide. It's a gift we gave you as a knowledge. We'll open the factory production of the KF in the Chinese nation as we did in Italy during the earthquake. It's the responsibility of you as KS to take out to the streets, and take it out to the hospitals and let the doctors test it. Show them that it is just water and let them do and see how they recover. We can bring

this under control before the Chinese New Year. It depends on you. We know there is a KF team in an infected area and they already tested the water yesterday, we have tried to, they have received some materials, (2:38). for that purpose a few days ago, they can use that directly to the hospitals. **We will provide you with the certification for the waters to keep you safe within the structure of the legal frame of the nation**. We have informed the university in China who is collaborating with us and they are trying to find the channels through the government. The problem with the Chinese structure is many of these bureaucracies set within the structure of the Chinese government. This has to be sorted within the structure of President Xi's government. Having lived in China for long enough, we see huge, huge problem in China, as the nation will come to these things it will suffer more. **I compare the structure of governing in China very much with the caste system of India. There is no difference, it works exactly the same, just given different names. One cannot go to the other unless you have it within yourself not to be in the other.** In India we see those who have no caste, have no place. **This is one of the problems we have in India for the conference. People who are without a caste and are KS of the KF will not be allowed in the hotel. What a ridiculous thing for the STM. Who made this caste except those who have abused the man,** and we see the same thing in the structure of the governing of China**. If you are not connected to one group, one class you can't go up and everything dies at your level. (2:40). One uses imaginary, and one uses the fact to block. This is a problem for President Xi to sort out**. As you know I speak out, correct and up, and this is what we have seen. There is no difference between India and China, it is just covered under a different name and different process and **ordinary people have no access to take their knowledge to the top. As those who is does not suit them, blocks them because they don't have access**. The Chinese have to make a system, the structure of the government of president Xi has to make a system that the totality through that system can have access to everything. Keep your classes but make it possible that people can ?? This is what we se now with this and bigger a bigger problem in China will come the same way. The top will never get to know anything because there is no access in the hierarchy of the structure in the government in China. **President Xi of China should have been explaining to his nation the solution, we have it, look at it, it is there, and it is done. The case is done. Instead, the whole nation instead of celebrating the New Year lives in the fear of life**. There is a problem in the administration of the Chinese government and it has to be sorted at the level that the nation stays calm. As you understand, all the New Years parties are canceled, and there isn't a single mask to be sold anywhere in China. **Everybody bought a mask but it is an energy transfer and the mask doesn't have much use, unless you can create the barrier through Gans's that you can absorb the energy**. (2:42). This is what needs to be done. I have been openly consulting with the Chinese government and this is one of the biggest problems we have. We see in China, I am not the only one, but many people who live in China and work with China, see the structure of the level blockages of one of the main causes, and problems in understanding other work and the ways, and it is piling up to the point that sooner or later it has to be addressed. This disease is one of them. The administration of the government of China should be easy to avoid this and understand the T. **The scientists sitting on the top of the structure of the Chinese organization with health are blocking everything because they are what they call, a specialist and they see themselves as not finding**

the cure, so I had better not put it out because it doesn't give me credibility. It's the responsibility, as we said, if you remember with the keys, we gave the USB Stick to the governments and they did nothing. When we gave it to you, we have seen in the past years you have been developing different aspects. Now it's your responsibility to do the same. Take the Gans's to the hospitals and the street and give it to the people. It will become the responsibility of the office of president Xi to respond to your actions. Let the nation reach prosperity and peace and happiness in the New Year. This is the revolution in science and we have to be able to deliver it. All the Chinese KF in Beijing, in Guan Xou and all parts of China make as much Gans as you can and freely distribute it across China. (2:44). Those of you who keep it stockpiled, it has to become free to your nation. The KF materials are available to the nation. It's the responsibility of our teams to make sure that we distribute as much as we can. The cost of transportation of liquid. The method of transporting liquid into the infected areas has been blocked as I was told yesterday. Drive with cars, take it to them and give it to them (yourself). Next week after the New Year a large factory setup by the KF in China will open up. I allow the Chinese government to have full access to this factory for all its production until they are happy that the disease is over. The KF will cover the cost, for what we need, you can use. **Our team is already working on it and speeding it up and if we can get to the fast production of the portable units, in the early month of February, we will place these systems across China**. The KF will cover the costs, that people can just take the waters and disinfect themselves. **We can produce structures that can create the multiple mixtures of all the elements needed for this purpose**. We have the knowledge, the T, and the backing of the KF in China. Those of you who want to help go directly and send the messages, if you need help, go directly to our common line that you all know and have used. (2:46). It's kesheplasmachina@163.com. Internationally if you need any help with this matter, as you understand the KF operation has always had a response, and a response criteria that would allow to contact us, to be able to send messages and we'll try to help you through what we call our common line. If you are in Brazil or other countries, or you are traveling to China, and you need help, or you have the materials you want to spread to help the others, there are 2 channels of communication for KF inside and outside China. (info@keshefoundation.org or the common line within China) If you have materials that you want to send we'll find drivers that will take you. … we can bring this together and I am sure the KF China will respond to the best of their ability to support. We have materials in different locations and places between different KF KS which means that even if we have to buy from them to give it freely to the nation, KF will take all the steps. (2:48). The application of the Pl T is the only solution to the virus. Mankind has never had any solution. We have shown and delivered (the T). We have shown it with Ebola and with African Pig Flu and we have shown it in other cases. Now there is a suffering of a nation. As One Nation, the Chinese nation is part of us. We have to respond to the call of a nation, the call of the human race, we see ?? but we don't understand what pressure the Chinese community, government, and country is under today on the eve of the New Year. **We love the Chinese, we live amongst them and we feel the pressure.** As I wrote this morning to one of the leading people in the Chinese structure, very simple, this is a message from the KF to the Chinese officials, we stand solid as friends with your nation, and all Chinese government in these times of trouble. (2:50). Deliver as much Gans as you have to the Chinese authorities and make sure that it

is free. The KF will cover the costs, if you want to make a living out of it, but understand that you will have to be correct in conduct and ?? materials please get in touch with the lines we have given you. If you want material, if you are infected ?? ?? the KF near you to drive to you. to deliver, to be able to support, the KF China will be in that position to do so.

Please take this Blueprint and share it across Q Qs and the KF in China and let those who can help the others and be proud to be part of KF family worldwide. There are so many supporters in China. We need to respond correctly to the Chinese nation. Put it this way, if somebody from this market has flown on one of the airlines to the Middle East, or Europe for Chinese New Year and if they are carrying it, soon we'll see it across Western Europe and the US. The time of incubation is 12 days. (2:52). So it is for all of you to be with us across (the planet) and we see this situation as very serious. It's extremely serious. I'll send a picture to Rick to show you how this situation is taken in China. This is yesterday in China and you'll understand the enormity of the pressure on the Chinese Central Government. As KF supporters you need to understand how to, this nation is working ?? .. Play the video and you can understand how serious the situation is in China today… . Now you understand why we have given a Blueprint Day for this and it is right across on the eve of New Year in China.
(2:54). Rick plays video about China of trucks driving down the street spraying chemicals to stop the virus ..

Any questions?
These flu's are so effective we caught one nearly 2 months ago in Brazil (2:56). and **all of us are still suffering from it**. We caught a strange strand of it, with temperature, even today I still suffer with it. But this strand is very powerful. Any questions. Q: From Austria, it would be important to have transcriptions as fast as possible so everyone can use it for translations and so on. We should we set up a team to do it in the next days? (2:58). K- Please share … and we'll be giving the documents for translation ..
We'll see a lot of these problems coming up through animals in the U. We have seen the cancers which are working on these grounds. Are there any questions from the Chinese community. (3:00). Q: If I want to send Gans's, as you know now a days it is very difficult with liquids. **If I send dry Gans's will it be the same effect? K- Yes, but the only problem is how you will bring the AA to the dry Gans. This is a problem with it, but on the other hand it can be done**. **Dry Gans's show more potency and power in certain cases**. Liquid transportation at the present moment is very difficult across borders, especially with transportation companies, they'll refuse to transport liquids. One solution is dry Gans's but we see more effect when there is AA or a lot of KS they never take the AA and separate it from their containers, and they mix it with the Gans's and they get a good result. Some of the **people who separate the Gans's they don't see such a good result because they separate the AA**. In a good way KS have to understand how and what they are using if they collect the AA, that batch of Gans's will not be good for these kind of applications. We learn as we go along and the process is very simple. (3:02). Q: What kind of AA forms on the surface of a glass of water and what about one in saltwater? What does that mean, if you are making Gans's. We are talking about the AA which is made during the process of Gans production. Q: How do we maintain the

fields of AA and water? We usually collect it from the top, in operation, we see some of them loosing that fatty operation because they transfer their energies to the environment but the effect of the strength of the AA stays within the water, within the Gans's. We keep some of the Gans's with it, so a factor of it stays within the ?? structure. R- Is it best to keep them intact as compared to putting them in a blender, is it a good idea to put them in a blender or not? **K- Why do you put it in a blender, you transfer all the energy to the metal in the blender**. R- yeah, but sometimes you said with other Gans's to mix them? K- For this reason when you use AA, **if you use AA you have to make sure you keep it within the structure**. R- That makes sense .. (3:04). Q: Can we do any prevention, like in an airport spraying of the Gans's? K- **You see in the prevention you create that mass, the energy of the virus transfers to the material you made available**. That's the prevention. **You cannot bring immunization, in a way, but when you spray or you put whatever in the open environment you create that filtering effect**. It's very much like whenever you fly from any African nation into Europe, something funny happens. You'll see just before takeoff when they close the doors, the airhostesses walk with 2 spray cans in their hands and they just walk from the back to the front of the plane. That is one of the musts. The reason for it they say it kills any malaria mosquitoes or whatever which have boarded on the plane. **Do we have to go to that level that we spray Gans's in the plane that any passenger carrying the disease, not only breathing it, gets disinfected, but if there is anything in the cabin we deplete it, that we do not transfer energy across different planes and borders and people**. These are the options that the KF in the long term have to put into procedures that. There are other ways to do it and apply it. (3:06). We have to expand into that level, but if we do it in the airport, this is what is needed to be done. Any other questions. **It's a very beautiful short, sharp, effective blueprint**, because you are all KS so it's very easy to share the knowledge very rapidly. Any other question. Do we see anything on the Chinese channels? R- there is a new study that suggests that snakes maybe the source of the Coronavirus outbreak. K- anything could be, if you put the snake under stress it will create it. R- Because they were sold at the animal market at Wuhan apparently. (3:08). **We have seen these things with the fish in Africa where they put so many small fish in the 5m x 5m x 5m tank in the rivers and as they grow they don't deplete the numbers and they get tighter and tighter, and they'll create cancers of the eye and they receive it in their tails, and their flesh opens up and they are not happy. And then they sell these and we see diseases in the food chain**. It's normal. We create it, then we blame it, and then we don't know what to do with it. The KF is the only structure in science and T that considers the emotion on the physicality and the soul of the animal and the STM and we need to create a condition of what we call satisfying the big imbalance between us and ?? **When the physicality is not happy in a dimension of the STP the animal will show its harm to its physical dimension**. Now we have the process to do it, we have the knowledge to elevate the soul and the emotion. We have seen how it works in China or in Africa. (3:10). Q: **Is there any proportion we have to use in the Gans types or is it the normal 50:50** or 60:40? Repeat. The proportions of the Gans's? K- You see **you have to learn the process of the uses of the Gans's which is not observed or known or by many of our KS, is, you are trying to bring balance between the physicality and the emotion,** yeah. It means the emotional side which is the Zn and the physicality which is, what connection line of CO2 have to have certain

balances, this **is how we decide what balance we put in**. Then you have a physical factor which is the Cu, CuO, then you consider that in that proportion, then you consider the AA comparison to what you want to connect with, very weak, because then the connection will be weak that it can feed it. **When we decide on the ratio of Gans's in any mixture, you consider the totality**. (3:12). Is it emotional or non-emotional based? Is it touching the physical condition or not? All these things count when you decide. Then you don't need anybody to tell you the ratios. How bad is the emotional damage that it shows itself in a very bad physical condition. Does it mean that your ratio of Zn has to be higher? That by satisfying the emotion you sort out the physicality. This is understanding the science of the knowledge, and not in pieces, just numbers and names. Comprehending the essence of the work. Q: You know what I always talked about, this should be good for creating, it is your own vaccine? What do you mean? Q: ?? therapy. K- That's your idea. We are all free to test and try. **Being in balance is the decision we make with our souls and physicality**. It doesn't matter which way you choose and which way you use, as long as it doesn't harm our soul or our physicality and neither the others. You see, (3:14). when you look at these viruses, and **I heard a lot the Americans have explained it as dreaded, done this. We see it as a certain thing. We are expecting a second degree virus delivered, to be released very soon. I am looking at this virus as one of them**. But we are expecting this to be done. I am a strong believer in what I have seen in the data, whatever, why the African Pig Flu was brought to China, and as I said, we saw it very rapidly in the American supply of pigs to China. **It is not normal, the way this flu spread across China. It was what we call a commercial, financial decision**. This is controlled. As I said very recently, and I'll keep on saying until people understand, the planet earth has certain space of land, and in the past centuries those who thought they are more powerful they colonized, the British, French, Portuguese, all the European colonization, because they went through the industrialization and they created mass war weapons and everything else and they thought they were more superior. They colonized African nations and East Asia and whatever. Now there is no more mass land to colonize, but still underneath, (like) the French they are making a lot of money out of their colonization because they never freed the nations which they colonized. They are still slaves to this nation. (3:16). **Now that there is no more mass land and we haven't managed to find new planets to enslave the people, the slavery and colonization has come through the line of science and food and weapons. When you can get hold of a new T and enslave others to it, it is a new form of colonization**. Killing scientists to take their T and using it to the advantage of a nation has become part of the work of the European nations and the Americans, slavery and colonization through science and T, and this has to stop. **This is why we spread the KF knowledge this way.** The attempt by the Belgium government on our T and the others that we have seen. To (about) them we have seen Huawei in Canada, these are all part of trying to enslave nations through T, because there is no more land mass, unless we enslave the fish, the cat, the dog, and the birds. **Colonization through science and T has become the biggest work of the European nations**. They are the smallest and they don't have a land mass to feed their nation, so now they steal, the same as before. They used to have what we call, pirates on the seas. Now they are pirates in the air, the way they got me for 11 days in Canada. Now we see they got Huawei that way. **The reason Huawei is in the court is because they are too advanced so they hijacked the child, we hijack it and then we force the**

company to give us what they have. It's nothing but short of hijacking, terrorism in advanced (3:18). companies in science. **Then what happened to our emotion, we feed it back to our nation. You wait and see what will become of a nation called, Dutch**. You saw the virus coming from the pigs or the snake. It comes from the STM who brought so much. One will be ashamed to carry a passport from that nation, what we call, that comes from there. You will understand soon. This is part of what we call the process. This is how it works out. It is, we have to understand mankind can't do what he has done, and we try to bring it to an end before we take mankind into space. Any other question or shall we call it a day. We are running into our 3.5 hours now. Q: Has the Wuhan case in the US been discussed? What do you mean? It was on the map in Washington state in the US .. (3:20). R- I see from the Seattle Times, (K- What they have a case there?) a man from Washington state had Wuhan Coronavirus and he had close contact with at least 16 people. K- Where did he get it from, China? R- he had been traveling solo in Wuhan since November and had been feeling unwell, symptoms several days after returning to Washington state and is being monitored and is in a special isolated.. K- can somebody go there and give the guy some Gans? R- He is in satisfactory condition according to the doctor. K- Yeah, a percentage of them catch this flu. Q: .. **When our body takes the virus and overcomes its power does it mean we are ever to use the virus energy, so in future interaction we can use the virus energy? And even our soul creates the virus as a way to strengthen us? K- We use the energy of the virus definitely in our body, we already explained that before, but do we create a level of energy we call it a virus to support us? In some cases we do.** (3:22). But then that energy applies to certain positions and certain cells which are of the strength of it. **I hope we brought a beautiful gift and less suffering of life to the Chinese community**. It is the responsibility of the Chinese community and those who hold the stockpiles. It doesn't matter how much, try to talk to each other, what the other is short of. Drive to each other and deliver it to the people who are infected, and make sure your own homes are secure. Just spray the house with it and it will not come in. Spray the passage of the buildings you are in, you will safe guard your neighbors. Very simple acts can clear a lot of things and brings peace of mind. If there is nothing else we'll end the day, one of the shortest and sweetish blueprint. Our best wishes to the nation of China in the New Year and I am sure this will come as part of the history of the nation. On the other hand we need to understand that we are all connected, be it the animal or be it the man, and our emotions effect each other in the dimension of physicality. Thank you very much. (3:24). I think the head of KF has some announcements to make if she is still awake. The list of announcements she sent me a list of it. One by one of them. First KF donation line has been opened up again and directly to the cards of standard procedure of payments. KF transcribers, we need more people to transcribe and translate into other languages that we can share the new knowledge, especially on the 21 research groups that are setup that others can join in, … (3:26). ..

There is a note here to inform in 2 weeks time there is a conference in Mexico City if anybody wants to register. Can anybody in Education talk about these research groups that you have set up.

(3:28). they call themselves G1, G2, G3 …

.. each group will explain what they are doing…

(3:30) .
(3:32).

313th Knowledge Seekers Workshop, January 30, 2020

(*****Coronavirus One Cup: Hidden Secrets: Salt, Soul, MaGrav;

Key-Phrases:

In 2010 Mr. Keshe was captured and terrorized in Canada by orders of the Americans and Hillary Clinton, He will not travel to Mexico conference, Call for the setting up of "Sepah" a military force to protect the people and Universal and Earth Councils during the time of transition, Coronavirus is spreading in China KF made video "One Cup, One Life" to save yourself and family from this virus and others in the future, 300 million downloads and increasing, Shows Video of One Cup, When we open into space we'll encounter viruses like this, This is a test run, 5 possible cases which used the Gans and fever dropped, Central control of the Chinese Government has stopped movement of people and will contain the virus but not so in the west where movement is not controllable, This is a 2 part virus that was deliberately introduced to China on New Years for maximum effect. The first part came as African Pig Flu and those who ate infected meat received the first part into their bodies, The second part the Coronavirus was expected and arrived now and when it links with the first part it creates a deadly composite virus and people start rapidly dying, The connection between the two viruses is from a plasmatic point of view and not biological,

Many space travelers can't land here because the environment acts like a virus, KF researchers have to understand what allows Amino Acids (AA) of the soul and RNA to connect to another's energy like a virus, and how every field that comes out of stars and planets effect us, The respect for Ella as head of KF has to remain sacrosanct "her presence is my presence", Knowledge Seekers taking charge of KF has to be through correct conduct and out of devotion for humanity, Will the Iranian government have the first Sepah to control and support humanity towards peace, The king of Belgium had to give blood tests which have now become part of the court evidence and is open to public, Tests can be made to confirm if the man who wrote and KF patent and the one who paid for the patent are both illegitimate sons of the king, There are 50 murder cases in France and killing of scientists to be linked to the king, This will result in the end of kingship, Brexit is because the UK didn't share the 140 billion in Libya's gold with other European nations so they forced them out, Talks about Rothschild's dealings with the Vatican and calling the debts in and how the gold was transferred to Berlin by the German Pope and why he had to abdicate and the relation to Spain, Portugal Ireland and Greece going broke, Every AA is unique to the Cup which has made it depending on conditions salinity

distance from Nano plate etc.. In coming time we will not use Nano plates to make Gans we'll be able create the conditions for it -- We'll even replicate the field strength of the Gans's and of the matter state that the matter doesn't need to be there, This will be shown in the next version of the Enhancement Unit, Explains what the heartbeat is and how it works and can change, The strength of your Gans, dictates the strength of your heartbeat, Plants can control their heartbeat that's why they can live both summer and winter life, "If I control the strength of my soul will I have to eat?," KS says he doesn't eat of sleep for up to 48 hours, Trick add a little salt to your coffee, Salt is part of your life, it's the channel of the solution and dilution of energy, Problem sharing Keshe videos on Internet, Explains in detail how does the Gans depletes the energy of the Virus in terms of MG fields, The virus links to the AA and then gets replicated, Using AA makes the connection easy and very rapid, The KF has developed a new technology that will control AA in all directions even directly to the STM, Through the EU the STM will be elevated, Many will come out of the EU as a soul, Mr. Keshe comes from a line of Jewish and Moslem prophets this is why they don't kill him, The number of AA is countless, Describes how the cells of the body work, each single cell has a specific salinity this information is kept by the brain and when damaged it is replaced exactly with the same salinity, Arteries of the heart shake continuously but don't break apart related to the salinity, He came here to enjoy the pleasures of the physical dimension taste touch smell love, He came here to admire what he created and to see what it can be given, Earth is like a lab, Shows some of the One Cup reactors, Instead of a battery you can connect with wire, The color of the Gans like green or yellow is due to the amount of energy in battery,

The **SECRETS Hidden in One Cup** -- Salt, Soul, MaGrav
Between the Nano coil and Cu coil and Zn plate you have created a spectrum of CuO_2 and CO_2 and the AA on top is also a spectrum of all these fields together, this is why it is so effective, Furthermore you have created the Gans condition, from the condition of the matter Cu with matter Zn, this is the connection between the brain of the man and the physicality in the strength of the Mg. This is how most of the salts are made, because these waters are in the condition of the plasma of the universe, they are not just water, This is how salts are created in the universe, the Gravitational pull in the matter state, which is what we call salt; The Second secret, the Cup has a soul, between the Nano coil and Cu coil and Zn plate you have created a dynamic field, one is the sperm, the other the egg, and the whole environment is the womb, This is the womb of the mother. In fact, if you look at it, I have given you a real Cup of Life, where the real life starts. The third secret, turn the Cup 90 degrees and you get Cu fields, Nano fields, and Zn fields, is this not the MaGrav system. The soul is in the center of it, you were looking for megawatts but I was looking to energize the STM. If you come in with the wrong behavior you get nothing from your MaGrav physicality. The MaGrav systems have the energy of the soul,

Using crystals you can choose to follow specific individual fields, they create a feedback loop that you tap into but it will be taught later when man is ready, The Iranians are starting to open this up, Gave example of communicating with soul of his dog,
Mg Sulfate (Epsom Salt) was used instead of kitchen salt - Mg salt connects directly to the STM, Discusses different salts and effects on the brain etc, The importance of

breathing, when you breath in, energy is transferred through the breathing canals in the head and when you breath out the same thing happens and these high energies are needed for the physicality and the STM, CO2 is very important for the brain and is created in the lungs and is absorbed as you breath out. "Breath it in, and then breath out very, very slow because the soul needs all what was created," Breathing techniques are on the level of physicality you can get the same thing directly from the soul,

The Soul Thinks:
Not just the brain thinks but the soul also thinks, If the soul is to manifest itself in the depth of the space it must think that it can exist, How can we get the man to understand the thinking of his soul and not the thinking of his physicality and at the same time to be able to distinguish whether it's the soul thinking or is it the thinking of the man? A lot of Knowledge Seekers have to go through the transition from the physicality to the Soul of the Man, the new Enhancement Unit will help you to face it, and to be able to think at the level of the soul. Do we need to breath to be able to do this, or do we need to go to sleep to open these boundaries softly. If you become aware of your soul then you can convert yourself into anything in the dimension of the universe, In the past by rotating the Gans to generate the fields we could create gold or silver, now the Gans is the STM so in what dimension strength do you want to manifest yourself,

English Transcription:

(:06). It's nice to be back to share more knowledge. Try to reflect on last time I explained the difference between the kinds of G and M fields which creates different kinds of life in the space and motion and the matter. We'll try to go into more depth later on. There are a number of important announcements to be made, if you remember as KS **in 2010 on my trip to Mexico, I was captured by the Canadians, literally took hostage, and terrorized, by terrorist activities of the Canadian government. I was captured on transit going from one plane to another. A gun was put to my head a few times and it was told, to my sister on the other side of the glass that I would be killed if anybody publicly knows that the Canadians have gotten hold of me. After 11 days of torture, or what they call interrogation, from 9 AM in the morning to 1 AM in the morning. They decided that I can go back to Belgium and if I would have said that this happened to me, many of you would have said, that this was just a dream**. But typical, stupid, maybe a friend in the KF. but the Canadian security service decided to leave private documents with names and everything which they copied, and official papers of the Canadian government in my suitcase, (:08). that when we arrived back in Belgium, it was very funny, as I was coming off the plane I was handed over to the Belgium police and taken to the basement and I was told, 'you are free, you can go.' And it was ?? that time. Eleven days of being told you are going to be executed, and one that you are going to be put in a prison ?? if they decide that way. It wasn't an easy emotion to go through. I think the last one who did this was Saddam Hussein. The Canadians are not short, and their masters the Americans are not short either, because in many interviews **I was told Hillary Clinton decides my fate**. I think that I decided her fate, it matches perfectly her disease, by the wish of the soul, she received what she ?? gave for many

people, it is said that way. To this effect we went to, and understood the position. The Mexican conference was to be going that way, that I would attend the conference next week. **We submitted the application to the Mexican Embassy this week and our securities watched the courses, and we were informed this morning, my travel to Mexico is absolutely forbidden**. This is according to KF international securities. The reason is the same thing has been planned. My life ?? and Carolinas life is not at the disposal of some incompetent ?? people in these offices. The Mexican securities have informed the Americans, and the plan is, that if there will be a capture in Mexico or a landing place in America. The president will issue an Executive Order to arrest. For this reason I will not be attending the conference. (:10). My life is not worth much, but it is not worth for the Americans to play with. We have seen they have done the exact same thing with Huawei's daughter. And we saw what happened in Iraq 2 weeks ago. For this reason Keshe will not be physically present in the Mexican conference as we have unfolded another terrorist of duties, inside the government by officials. It was repeating what was done 8 or 9 years ago. For this reason the KF conference will go ahead as I am the figure head but the real head of the KF is Ella. She and other members of the KF will be there and I will be present in Zoom conference. Nothing changes, except that we value our lives more than some idiots sitting in the Oval Office deciding on some peoples ?? life, which is worth nothing to them. We are very straight forward on this matter and our securities have never been wrong. I had a warning last time, do not go to Mexico. You have to understand the last trip that I was captured and terrorized was to Mexico City, during the BP oil disaster in the Gulf of Mexico. For this reason, I do apologize to the KF KS, nothing changes the conference, it will go through as it is. The presentation will be the same as if I were there but on the screen and our webmasters, and the head of KF, and other members of the KF will be there, as in Philippines and Austria and in Brazil. We have to understand, (:12). not much has changed in the world of the wild animals on this planet. When my securities, the first time ever advised me, that I am forbidden to travel. Forbidden means it is one hundred or 99% percent. When advised we listen, but forbidden we take note and we act upon. For this reason I do apologize for those of you who were hoping that we could meet. I am sure we can meet in other places around this planet. As we have had the taste of the animals of the US and the Canadian government, for 11 days, I don't think I would like to go through the same torture, keeping you 24 hours a day awake, marching up and down your room making sure you get no rest, solitary and the rest, you don't want to know. A kangaroo court, exactly what happened to Hauwei, I have been through all that, in the Canadian structure. I never asked for asylum, they put me in a kangaroo court and told me, that if I say anything in the court, there is 1 bullet waiting for me behind the door. That's what I can say, American and Canadian justice, for this reason I prefer for them to keep the bullet in their gun then in my head. For the American administration. We wish you a fantastic conference, we'll be there on Zoom. As this condition has arisen and it brings a new work to the KF. As we have seen the most powerful nation on this planet, claiming to be, have surrendered, to what we call, the most powerful knowledge. (:14). Bullets, guns, and missiles and everything else against plasma T has shown to have no match, and we see it. We'll deliver this T ?? done by the forces known as "Sapah." For those of you who don't understand Iranian culture, you have to understand what sapah means, it means army, and has been part of the Iranian culture for over 3,000 years. **We have for this moment, sapah ?? , they were set**

to protect the life of the nation and the king, during the Darush and Kurush time. This sapah was established by the Shah of Iran, the last time, and in that process the name was changed to, sapar ??, which means there were 2,500 soldiers defending the nation with their lives, faithful only to the king and nobody else. They are ??? In the Iranian revolution we saw the ??joaw be dan , which means putting their beautiful life on the line for the nation, was changed to the word sapah, which means the guardians of the nation, that's the true meaning of it, means people who protect the life of every citizen of the nation. It means dedication to humanity and peace. It means those who prefer their life, not worth much, when it comes to the national peace and security. With what we have seen in the past few days and weeks, as part of the structure of the Universal Council and the Earth Council, we'll establish one Sapah, what we call, the universal Sapah. (:16). This is a military force which keeps peace on the banner of the KF, no nation, no borders, looking after the territory for any ?? names that might be . ?? the Sepah ?? .. One Nation Army, which means they are there to protect every citizen of this nation. What I foresee in the setting up of this force with the KF will support World ?? and will make of it, will be different then the ?? Blue Berries of the United Nations, as they sold everyone at any price as we saw in Africa, where the Dutch soldiers were walking away because the pay was too good, and allowed many to be executed and slaughtered. **The new Sapah will be made of every man of the nations on this planet and their responsibility is to humanity and not to a government, nation, or a district. They'll be a permanent force and they'll be used in many other positions and needs.** The establishment of one Sepah as part of One Nation, One Planet, One Race will give it security during the transition from the animal behavior of the man in the past, to the new standards the ?? ?? started. We need this so that we will not have what we have seen in the past through the ?? Blue Berries, incompetence and in so many ways, working on the line of the political needs and not national, which is One Nation needs. One of the first jobs of this group is to make sure that no arms crosses national borders from then on. Which means no ships, planes, and no man with arms will cross any present borders, (:18). of the nations. In that way we don't to create sanctions, we create conditions that boats will sink, the planes will land nowhere, and those who planned these directions will never be able to deliver anything. Enforcement of peace through blockage of arms deals, and of those who claim that arms are the protector of their peace, will come to an end. The protector of the peace has to be no army, not those who sell as much arms to create peace, the false promises which have been built up by the American government to sell arms. The new universal Sepah will have one thing, to make life pleasurable for every man on this planet, making sure that no harm comes to man, it doesn't matter where you are, here or beyond. At the same time it **is the responsibility of the new Sepah to protect the life of the U Council and the EC, we have not changed, we have created a protection for those who need to be protected during the time of transition until full transition is complete**. We come to one of the most important things that have happened in the past few weeks and has touched many of our KS. **The situation in China with the virus has taken a heavy toll. We hear numbers are increasing.** KF last week called upon all the KF KS of China to be gathered that we could share the new knowledge. (:20). In that process a new structure that every man in China, and consequently and from it, everyone on this planet, has to be protected to the "last man standing" by themselves. We released a new video made up very rapidly just to be for the Chinese to understand the message that they can

protect themselves**. The message was simple, "One Cup, One Life," it takes man a few minutes to make it to save his life, his family and loved ones and his neighbors. This video has been spread across China and around the world**. It is simple and very direct, some of you might have seen it, and as we were told, **it has been downloaded and watched by over 300 million in the past few days. The numbers are increasing on a daily** basis. Share it with the others and understand what it means. **This material will protect you from any virus from now on. Anytime you hear that a virus has hit, or is about to come, or even a flu, you have to understand the combination you make that you are protected. I developed this T for deep space as the space is the point of the virus**, as you hear in the tape. I'll ask our team to share it with us, and if you have seen it bare with us, and if you haven't seen it share it across the world. It has saved and it will save many lives. And then we'll go back to it and discuss more. Would you like to play VIDEO of One Cup, One Life. … (:22).

(:41). … 41:30; K- Thank you very much. As I always say, it's the last man standing and hopefully you are not the last man standing for China, or the last man standing for humanity, from this disaster, which is not Chinese anymore. If according to the statistics of what is coming out and the research done, if this virus takes hold, (:42**). the estimated loss of life is 60 million plus, not just in China, but US, South America, Across Asia, and every corner of this planet.** The problem with it is, us as men we love to travel, to go to new places. This time by going to new places during the Chinese New Year we have brought the gift to rest of humanity. **It has to be understood that this is not the first nor the last time, but in opening the Universal Community (UC) to man he will continuously bring these kind of viruses into the atmosphere and the life of the man, be it on this planet or be it ?? wherever**. Therefore we can see how and why we needed to show this for the first time, then on the back of this a new T will be delivered to the Chinese government in the coming days, that will support the Chinese nation in a very effective way. Then we learn, this is a pre-run to what mankind will have in the space. As I said, by 2021 we'll open the space and with this T and this virus we are getting the first lessons and first tastes of massive virus transfer to the human body and in that process, how we can handle it. My advice to the Chinese government is very simple, do not panic, we always see these things. (:44). Until we find out that the virus is there, we always have fatalities, or some other effects that we see. The KF stands solid behind the Chinese nation and government. We respect the wishes of his Excellency President Xi and KF China is at the disposal of the Chinese nation. Many Chinese KS are now in different places, making these and sharing knowledge and the process has already started. **We know of possible 5 cases which have used the Gans, even with a temperature and it has disappeared and faded or reduced. We know this T works and it's up to the Chinese governmen**t at this moment and in the next few weeks up to the American government and the rest of it. You have to understand something very important to all of you who live outside China. **The Chinese government has central control on movement and everything else, and they will contain this, they had a pre-run some years ago. The have blocked cities and the sections where there is a much higher rate of infection and they will contain it**. It will take another few weeks. They will contain it. The death toll might reach a peak and then will stop because the person to person transmission will not be there. But in the US you are free and will very soon

(quickly) take it across (the country) and the government can't confine you. (:46). The same with Europe. This is the biggest problem, the main damage will come outside China. ?? in China they have done damage control by the central government. You have to understand, one of the main things is, as I explained, in another teaching, **we were expecting this virus. This virus is closely in energy connected to the African Pig Flu on the energy structure, and it combines with the second of the first strand, and with that makes it guaranteed. What has happened and why we see such a rapid structure development is we can connect this virus to the African Pig Flu, as I said, in an earlier teaching from a plasmatic point of view, not biological. What we see is, what has happened and it's deliberate accident, not accidentally accident. The Pig Flu was delivered into China as part of the double combined virus, and now the second has been release, this is why it has taken hold so rapidly, and it will go very rapid. What has happened is that the infected pigs found an opening and their way into the market and the people who have consumed them, they already carry the first strand of the two strand's, common denominator, (:48). and with this we see the second strand completed. This is a designer virus, that was introduced deliberately**. Last year I warned the Chinese authorities of this. I always said, even to Guan Lyn, I am waiting to see where is the second one. **This like a composite group, one on its own doesn't have much effect, but when you mix the two, it is deadly**. What will be interesting to see, if, as we expect, this virus will not take shape as such, but will attach itself to others in the Western Europe and America and other parts of the world. But in China, it links itself primarily to Chinese, who had the African Pig Flu. **It is sad to see that some people chose this path to create this mayhem. Everything was controlled and timed to create the maximum damage, on the Chinese New year, it wasn't accidental. I was fully expecting this**, my expectation was that it would hit China on the New Year, and it hit China on the New Year. **This is why I announced the establishment of the universal Sepah. These criminals who bring these things have to be brought into justice** in a way that ?? (:50). In a way what they deserve is to be given the same virus to them and their loved ones, that's all. If they can stand it, they have worked it out themselves. If they have been so much involved in making and controlling and whatever else, that is a decision of themselves. This has to stop, these kind of atrocities have to stop. The biggest problems will come for nations like the US. The KF will support humanity, but KF can't be there to watch the abuse of humanity. **I give full support to the Chinese administration if called upon to travel to China, to do and take part in controlling it. It will be done without hesitation**. At the same time the KF in China, has been producing as much as they can, we know what we need to do. In the next few days, we'll hope to receive a positive call, by the Chinese administration, calling the KF into support. If we get this call, I will call upon all the KF worldwide to transfer as much material into the Chinese territory as we can support with new T. Then we'll take shape in how we support the other nations. You have to understand that **3 doctors died** last week in China helping others. **Two were in touch, they were there to help the first victims, the third sat in the same room and just had a drink while talking to them**. (:52). **If you have found one person in the US who flew from China, with 200 passengers, going through American immigration, all the offices, and those 200 are now traveling in 200 different directions across this nation**. The third doctor. The situation is worse than can be imagined and it needs to be looked at. The job as KS as you

are, is to prepare yourself already at your homes. It doesn't matter in which part of the world you live in. We never know if our next door neighbor was an passenger on the second flight from Los Angeles to Seattle. And then another 200 passengers on the same plane, 12 days incubation, 24 days strength, to the second incubation. In so many ways, it is your responsibility, now that you know, to prepare everything for yourself, your family and for your nation. This flu will take hold, and it will take hold drastically. We see pictures coming out of China which are horrendous. We see pictures which are not seen so much outside China, (:54). but maybe you have to see it, to understand what we are faced with, what is there and how things are happening. One of the most important things for you, what I call, European and American, is very simple, try to understand this process will be extremely dangerous for all of you. What I am going to show you is very simple, the Chinese can do things which our governments cannot do, they have a central control that our governments don't have. We are in a worse state than the Chinese, their government can secure their citizens. this is part of what you have to understand, we are dealing with a lot of disasters which we have no control over. I would like to share some of the things we get, and there are many in the background we see. I shared a couple of videos and pictures with you last week. I share with you what, as European and American citizens don't have, a nation and leadership which cares for its people and a government structure (:56). that can protect its people. We don't have this and in China they have and they'll control it. The Europeans, Americans, and the rest of the world will envy the control which is set and is done for and by the Chinese government for the people. This is what I see in the Chinese community, these are pictures sent by KS and share them with on the Zoom … This can't happen in the West, where they have these kind of freedoms, but in China this power of government allows for the security of the nation, and this we don't have in the West. **They can isolate .. cities and communities and people respect it. Unfortunately there are too many guns and no one will respect. We'll see this to spread to US and other parts of the world, if this happens there is no such control**. The good thing with this structure is that when it is contained like this, (:58). When we go in as KF we can in one go, clean up the whole city. We can bring control back within weeks, where in the rest of the world we don't have such a setup. Shows photos. This is China under control. You show me Americans who will stand that. This is the eventuality of locking down cities and this is now in China. As KS you have to be able to be ready, it doesn't matter if it comes or doesn't come. At the same time, teach as many. The link to the KF is there, it's translated to other countries and cities. You have to understand that if 6 were found in Brazil, the 6 came in 6 different planes. Just give it time. The woman worker who washes the dishes coming off the plane, changes the trash bin in the plane, is in the same danger as the guy who sat in the plane. This is a reality. Now you understand why people in China are much better off, (1:00). then people outside of China. **That is why we made "One Cup, One Life", try to make as much as you, as many as you can, in case it goes out of control, because we don't know who was on which flight. This is part of the work and we'll face many crisis's like this when our travelers of the space come back. If you look at the Universal Enhancement Unit (EU) this is where we travel back into, and travel to, from, more or less a quarantine unit.** If we could have a picture of the EU you'll see it. **It is made to contain life and energy and balance the forces according to the environment**, you land. When we go into space it is not that we become again man of the earth, and become selfish, me and I. We have to

understand when we enter a new community of life in the space, what energy we are carrying that it is not a virus to them. Man's respect for life has no limitation to earth, but is limited to the U. (1:02). Then you'll understand why we took and we take such action. You need to understand, that going through the transition, the EU, when it closes it creates a condition of the womb, the condition of the position of life. As every planet is a womb for a life, it creates itself for itself. It's you who has to understand, in so many ways, as man opens the doors of the U, we'll find that **many travelers of the U can never land on this planet, because the condition of this planet is (like) the virus which is killing man in China.** We meet in the open spans of the U, where we greet each other in the spans of this galaxy, but we not be able to make a different home, as home can be a death sentence to the friend. The same for us and this is a new way for mankind to learn about what is to come, what is to be, and what it needs to be in that process. As we explained the KFSSI research teams have already started, they have gathered themselves in forming and shaping this month and hopefully by the beginning of February their real work starts. **Part of the work of the researchers in KFSSI has to be the understanding of the field forces of plasma (Pl) in the virus level. (1:04). The virus is to understand how the cell allows itself to collect, what allows the man's, what we call, Amino Acid (AA) of the soul, and the DNA and RNA to connect themselves with another energy**. Is this a need, a shortage of, or a wish of? Many of the KS research time has to go **into understanding the strength of every field, which comes out of every star and planet, how it interacts and effects us**. As KS, the peace dividend is a research dividend. Now that we have more time and more finances will be available for nations to spend on research, just as much as they spent on arms, then these kind of researches for space become necessary. Those in KF will take the lead in the coming time, when KF will be put in the universities to become lecturers and teachers in these schools. In effect, **what I am looking for in the KFSSI education platform of research are the scientists who can go to universities after the completion of their researches, to teach to the others**. And then we can support. (1:06). We have seen one of the top KS of Brazil has managed to put some 20 doctors as KS together in a hospital, and I will give them 10 hours of private teaching directly to these doctors, that they can bring these processes directly in the hospitals to their patients. This is important for us not only on the medical side, but even on the agricultural side. We have to be able to understand the totality of the knowledge and one of the reasons that I am stepping down totally, is to be able to teach, one by one, most of the KS and in depth, the edge of T to the scientists. The administration and running of the KF is not my job. In that effect what you will see for example, accidentally or by whatever, the conference in Mexico will be run by Ella of the KF, as she is taking more and more of the responsibilities off of my shoulders. And she decides the running of the KF. **The respect for her has to stay sacrosanct, she has put all of her life into the KF. In so many ways, it's there, her presence is my presence**. We share the knowledge, not the ?? of the KF. As we are the cornerstone ?? ?? In the time to come, as I spend less and less time, as KS, you have to start running the KF and understand how to set up courses and structures to make the humanity ready in the coming months for interaction with the UC. (1:08). Understand how you will manage and structure it, how the Earth Council (EC) and U Council take charge to guide humanity, over the ?? at the KF ?? The job is not easy, you have seen how one small virus has brought mayhem to nations. Now **we can expect one more**. You

have to understand that gradually **as KS you are taking charge of the KF for centuries to come. It has to be correct and done on the basis of devotion to humanity, not to the KF. In that way the KF becomes humanity**.
Are there any questions?

.. you have something on your screen, it says Mexico City, Kenya, Tehran. The Iran conference is under a lot of pressure to be going through (happen). Those of you who go to the Iranian embassies, (1:10). please hold on for another 2 weeks, until everything is done inside Iran. **This conference is a very important conference, it brings the bearer of the peace and science and T and it has to be done under the full control of the Iranian government**. The KF team is working on it, please wait until we tell you when you can go to the embassies to start the applications and what is needed to do. We'll see if we can get any kind of clearing for fast lines for the KF KS who enroll or have already enrolled for the Tehran conference. The Iran situation is very delicate. Iran has taken the leadership in science and T and at the same time become the cradle of the new space T. It takes time to let and get the Iranian leadership to understand the position on the table. We have received very good signs from, what we call, the last weeks private talks with his Eminence Ayatollah K. Iran will become the cradle of the new space T. With that space, and with that understanding with his Eminence AK private prayer, T and science will take the leadership in Iran and will lead the world, but we need, not just the KF KS but the support of governments to be, and to support. Upon reaching an agreement with the Iranian government on the conference, we expect an invitation of his Excellency President Trump to Tehran to be present. Official invitations if the meeting is agreed, (1:12). will go directly to the Whitehouse. We will not use any intermediaries. We put out the hand of peace in Tehran, as we did with the Obama administration. At the same time the invitation will go to all the world leaders, President Xi of China to President Putin. **We'll make the Tehran conference, the post for peace and knowledge in signing of, "enough wars.**" We are waiting for clearance from Tehran. **If the Iranian government and administration is prepared to take the lead of peace, in having the first "Sepah" ready to control and support humanity towards peace,** of what we have seen. At the same time we'll bring all the KS of the world together in their own nations under one roof of sharing knowledge. **The Tehran conference is more or less the turning point for a lot of things and it needs, it's the first time we collaborate with the government for the conference**. The other conferences were done by and through the KF team. This time it is the collaboration of the two. In that process I expect the Iranian administration to invite on the religious level, the heads of the Jewish community in Tell Aviv, as well as the Vatican. When we put the olive branch of peace, it has to be to everyone and not just to a selective few, then you have not achieved peace, you have selected to create conditions for more war in the future. The Tehran conference has to become a point that we see the Moslems, Jews, (1:14). Christians and the rest. Don't sit to become one, **accept that humanity has moved to a new level and guide humanity to a new understanding of the STM**, then you'll understand why the Tehran conference has to be agreed and released ?? ?? of his Eminence AK of Iran, otherwise it will be useless. For that reason we hope that we will receive their approval in the office of his holiness. It's the celebration of the peace and coming together as One Nation and the celebration of sharing knowledge together at the same time. Before we go into this session there is

something important that will effect the work of the KF in the coming weeks and months and might propel us into the front news for the wrong reasons, but in a way it is the reason we are here. As you have heard in the news, what we call, have to find a word for it, in a way, what we said, **when the king of Belgium asked me to give this beautiful T to them to control the mankind, and I refused and we went on exile**, and following all the things we went through, part of the result of that is why we can't attend Mexican conference. **The shameful king of Belgium has accepted that he has an illegitimate daughter, which she claimed on the year we left Belgium**. (1:16). When I sat with the Belgium's, I told them, when I leave your monarchy will go. I left in February, the shameful man stepped down as a king, on the cases of being sick, but in fact, was at the same time hit, with a petition from the court that he had an illegitimate daughter (Delphine Boel). So stepping down was for the daughter, he was lying to the nation, as he had lied all the time in his life. He lied to his nation that he was sick and he had to abdicate and he became a normal citizen and at the same time in 2013, as he knew the case is coming to the court, fake application and fake illness he refused to give blood. He was forced last May to pay a heavy penalty, or to give blood, to confirm that the girl is his. He lied to his nation for 50 years as everybody knew in having a daughter, and now on 27th, 3 days ago**, he has accepted the girl to be his illegitimate child. It happens to many people, but the way as the head of a nation he lied,** and has kept on this ?? lie to this day. This is beautiful for the KF and is the reason I brought it up. **We have a second man who has paid for the patents of application, and he claims to be the 5th child of this family. As the blood of this man is now part of the court evidence, it is open to public to be tested**. (1:18). We would like the man who has paid for the KF patents, that you all received, with his generosity, he paid Mr. Red Circle by check, because I have seen the check, that his blood to be tested to that of the king of Belgium, ex-king of Belgium. To that effect, we want to show if he is, as we know he is, according to his claim, and he looks like his family. If it is it shows that the royal family of Belgium, is into criminal activities, a son hidden to carry out clandestine activities of stealing T from scientist. We'll explain to you in more detail in the future. This court case will become the cornerstone of our court case in the European Court of Justice. A lying king can lie as much as he likes, now we know he lied, he lied to his nation as a king. He lied to a daughter and he refused to accept until the court said, that he can't say no. That witness is very clear. **But this opens another channel, there are 50 cases of murder of children under the age of 10 and 9, sitting in the courts in France.** At that time, the man claimed immunity being a Prince. A common man. We have asked the Court of European Justice to open these cases in France to confirm the DNA for sexual abuse and murder of children. As I told you, when we finish, there shall be no king. Now you understand why the present king paid a visit to Canada, (1:20). the way the present king of England paid a visit to Canada. Don't forget together they have stolen so many technologies like mine, so there investments are there, waiting to use it. We have to make sure that no one benefits by their crime. We are waiting for the European Court to allocate the time and date. Very soon we'll announce the date of Fabio in Italy for his murder. Now you understand how the game of ?? is played. It says on 20th of January 2020 it was determined through DNA tests that King Albert II of Belgium is the father of Delphine Boel, the girl. This is in Wikipedia. …

.. by the same DNA test. The KF ..
.. **the people who paid for the patents, and the one who wrote the patent, who is their real father, who was their real soul sold to. Then as part of our evidence we can show collective killing of scientists, (1:22). organized by a state**. It's very interesting, what a simple DNA test, the saliva of a man, liquid of the mouth can show of the man. The KF states very simple ?? another man who has been on the table ??? The bank account of the Red Circle has to be checked by the authorities that he received a payment of $1,600 Euro, as a payment for writing the patent, and he issued an invoice for it, and I have seen all of it, so we can connect the whole structure together. This is a very happy news for a girl who had to fight to confirm that a man is her father, and it is a shame on a nation that they accepted this man as their king. A cheat liar and the rest. He lied to a man, a woman, to a nation, and we don't expect him to lie, to say ??? .
.. **At least we can celebrate that we can bring the killers of Fabio to justice and many other things. Maybe we can bring peace to 50 families what have been waiting** (1:24). for years, while he claimed immunity, His saliva is part of the court evidence and can be used…
You see a picture of a pedophile. ..
Any questions.
R- There are some questions from the **video "One Cup, One Life". Some people are a little confused that they may not have some of the knowledge that most KS have about the Gans's and so on**. A lot of new people are getting introduced through that video. In fact I noticed Mr. Keshe, that video now has 31,495 views on Youtube, plus many more on other channels. but that is one of the best videos that the KF has ever put out for years. It's going more or less viral at the moment so that is good. K- The best we have had up to now is about 3 million, which is from the Earthquake ?? , (1:26). was 5 or 6 years ago in the last weeks we were in Belgium. It was watched over 3 million times, and then we don't know where it disappeared to. It's still there somewhere in the background. Any questions? Q: in relation to the European Court of Justice, is that the real reason behind, Brexit, England's exist from the European Union**? No England's leaving from the EU is, had it done, because of the, what we call, the ?? game from an African nation. When they raided Libya, as I said before, they expected 14 billion in loot shared with France, Germany, Italy and UK**. They always said, that Kaddafi had squandered everything and gave everything to his family, whatever. But when they got to the central bank **there was a 140 billion plus in the bank in gold reserves. Then the British took all before anybody knew**. They went in and took everything to the Queen of England. They were ordered to return (1:28) and share the loot because the thieves wanted to share. The British monarchy said, the present president of Libya is theirs, so the past rules very rapidly in the structure by their own man, who they put in there. And they kept the money and would not share it, and that was the immediate response, you leave the European Community. In a way, we loot, we steal, and we share together, or the one who doesn't share it, gets kicked out. This is why, if you look, the whole root of Brexit came from that point. (Before that) there was no sign or anything about it. France and Germany wanted England out, that they will never do such a thing (again). You will see the moment Brexit comes into operation, new ways of sanctions and control from the European Union on England. You have to understand, the only way England can get food is from the US if they put the pressure on. You'll understand the

game that was setup under Germany. The Germans are very punctual ?? and 140 billion is a lot of gold. We saw them paying back with taking the monarchy, understand, but this time it's the punishment for that. All the public going and voting, is all gimmick. They have no choice they closed the borders. You have to understand closing the border to England especially from France and Holland is death to this nation. **They will get all of it back, but you know, what we call, "Rothschild's" plays centuries games. They don't play, tomorrow's game. As you know, Vatican took all the controls of the Church of England back, (1:30). to Vatican. The Queen is just a figure head. They'll take everything back but it will be paid for by the British nation**. These things, the recovery of a lot of money which happened in the past 20 years in different shapes for the **Rothschild's family, when money was transferred to the other families, and as they fight amongst each other, they play these games. The same way as a lot of you never understood how come the Pope abdicated, and usually the kill the Pope or he accidentally dies**. The first ever, more or less, we saw a Pope abdicate and he was a German, **because up to that time the Pope had the right to move all the gold, and he did, he moved it to Berlin under the control of the Rothschild's family and by the time the Vatican found out that they had no reserve, they had 2 choices, kill him or do something. The German's negotiated for his life,** they said, he'll live out a vow of silence, not to tell how much they did. You have to understand why this gold was moved to Berlin for Rothschild's. If **you go back the root of it sits some 5 to 7 years before when the EU ran into problems with Spain, Portugal, Ireland and Greece. If you remember they were in crisis. The Vatican guaranteed these to the EU, because they were Catholic governments** and upheaval ?? as they had an uprising in (1:32). ?? ?? the nations could not go. In a way the Vatican underwrote the European governments for the security, and we saw how things changed. **Now the Rothschild's called in the debts and they took the gold. This is how the money from Vatican ended up in Berlin, the guarantees to bring stability to the 5 nations** as we know if you go back in the news. They were in financial crisis and people were on the street and Vatican cannot see to what they setup to rob all the European nations and then the world. As a EU, was falling apart. They gave guarantees, they actually signed papers, these are not just by talk, and the Rothschild's called in their debts, when there was enough and they had their own Pope into position. They deliberately took that Pope into position, the German Pope, to be able to do this, because they knew the loophole that they could do it. They called the debts and literally transferred all the gold of the Vatican to Central European or Berlin Bank to pay for the guarantees to save these 5 nations in crisis. These are all connected, but if you are not in it you don't work within the structure of the world security of finance, like the way we do, then you don't see the pattern of the work. These are all connected to each other. As you have seen the Pope had to take a vow of silence, naturally he speaks a lot as he is traveling everywhere. (1:34). If you don't know why the vow of silence came in, it's one of the first man ever to be put on the vow of silence. **Because in the Catholic Church the vow of silence came only for nuns when they were pregnant by the priests and you couldn't have them walking in the church with a belly sticking out, so they made this clumsy claim of vow of silence**, not to show that the birds and the bees have been busy in the name of the god. We see the first man who was pregnant with a lot of gold, not with child.
Any other question?

Q: Can you explain the differences of different AA found in different Gans's? And this AA has ?? in connection with light and the creation of ?? that was shown in Iran. ?? My mother ?? saw the soul ?? light what you call UFO but the other ?? ?? searches these ships (1:36). What does this mean can someone explain?

K- **Every AA is unique to the Cup which has made it**. Only the AA .. Every AA is not the same. .. the understanding of the AA which you make in One Cup, One Life is totally different then the others, **due to the position and the distance between the N coated materials and Non-Nano coated, salinity, field energy in the environment where you made, positioning, and many other factors**. So each AA is unique. But what I don't understand, in the question it says, ' in connection with the flight and the creation of the ?? that was shown in Iran? ' It says, "my son made the flight with what you call the UFO" K- I don't understand what this means. (1:38).
Q: I know the AA is unique that is created on top of this One Cup, but last time you were saying that every AA creates Gans on the bottom and fields on the inside or outside, is unique, different strength …? Yes. .. Q: when you have N coating layer and the Cu, like Fe and Galvanized, you have the strength behind like Fe and Zn, it's an interaction between the strength field ?? N and matter, K- I don't understand your question. Q: How is it different when you make one unique AA (1:40). and when you change the plate in space, when you put in the middle or behind the plate, .. you choose the ratio strength of 1 cm or in certain way … you choose the salinity in a certain way, ... is it right?
K- **The thing is in the coming time we won't use (Nano) plates anymore, as we'll show production of the Gans's through energies. We don't have the salts and the water in the U to be able to create conditions so we have to create the strength of the salt** and whatever .. for the fields of the Pl. These will be shown in the EU and the next generations of the EU soon we'll be able to see, that there is nothing by Pl. We don't see Gans's, we don't see materials. **We'll even replicate the field strength of the Gans's, and of the matter state, that the matter doesn't need to be there**. As I said, (1:42). in the last teaching, when I'll show the first 2 reactors, we were hoping to be able to do it next week, but as you know China is shut down. The KF team had to shut down, the factories can't be open. We hope they don't extend it beyond the 10th. We would have shown you the new spaceship reactors and one for the materials, and one for the enhancement of the body. **In the coming time you will decide on the field strength in how and what, as a matter energy is created. Do we need to go through energy to create the Gans, to create the energy to use the Gans for another energy? Or, as you will see, in a more advanced version of it in the coming of the EU**. We don't need that anymore. Because to create a matter state you have to reach, what we call a heartbeat and balance of the two, upper and lower level of the material. Now that we are gradually establishing the data, you will see that none of these are needed. When you look at the .. (1:44) Q: **Is the purpose for creating the Gans, to learn how behaves the salt in the UC like a MaGrav for sharing, for giving, learning for giving .. ? K- It has different applications, it depends on how you can see it**. …

You see in the body of the man, we call it a heartbeat, and what is a heartbeat, it's the 2 sequences of what I call life, in that sequence you have to understand the true

position of the field strength. If the field strength in the body of a man, is this shape, it finds its balance and then it goes back up in this shape. the sign in the, as I have explained before, you get a blip (upper peak), (1:46). when it comes to here, a blip (lower peak). and **this position of change, gives man the heartbeat. This heartbeat creates the strength or the bandwidth, that, that Gans can work within**. This is what most of you KS have not understood. **The strength of your Gans, dictates the strength of your heartbeat**. In the matter state, as we have always seen, but never understood, in the world of science, you have the heartbeat like this. Where in physical life it is like this. In the state of what we call, vegetation, the beat is like this (square), more or less. It usually goes like this. On this side we see more or less, but usually these are the kind of shapes you see. This is a solid state frequency, or you call it a bandwidth. This is a plasma life line, and this is what we call plasma vegetation bandwidth. **The beauty with vegetation, or with trees, is they have this beautiful possibility that they can do this, they can change this (the lower and upper widths) as they wish. That's why they can live a winter and summer life. The humans cannot do**. (1:48). But **if we control the bandwidth of this cycle of life through breathing we can change it, slightly to (something) different**. Or if we can change it in another way we can extend it. What we call the heartbeat, the strength, **in the coming time mankind will understand how to do it. How even you can change some of these to the point of what we call, feeding and in a way, a transfer of energy**. This is why when you add a field into an area where the vegetations are, you change this, more or less if you look at it. Where maybe originally it was this. With the variability of the field you harmonize and make it constant, and the plant can live. It doesn't matter how it is connected to the AA, which bandwidth. **In human life you can't do this, (1:50). because the way you live with one central beat,** whereas the **plants have been given the freedom of motion to the central beat of the planet, so they tune to it,** that helps them with the work. They don't carry such a, what we call, secondary backup. Plants tune to this, but we as a human we move around all the time, we change our position to this, and this has created a new dilemma for our lives and our existence. Our lives the way we live, in what we call, human life is very much dictated by the earth. In the depth of the space this will change when we become regular visitors.

Any other question? Q: Why am I learning how to breath, to keeping down the heartbeat to say 100, from 15 heartbeats to close to 200 beats, Why am I learning, because change is double trick, because I hear when I breath and I hear my heartbeat and it, (1:52). changes through my emotion?

K- Because you still live in a human life and you haven't learned yet, you are still trying to learn. Maybe I'll open a door for you somewhere, to have a look at something else. If you understood this, with whatever. The passage of your breathing through (the nasal passage), or with the food you take too (mouth). You want to control this (the food), to elevate this (STM). What you have not learned, which is normal with the humans, why don't you control this (STM) to control this (breathing & food). **If I control the strength of the fields of my soul, will I need to eat or to breath**? But you are human and you think this is the way to do it, so you use the hardest part as men usually do. If you understand and find a position of your soul in the dimension of the creation, your own physicality, why are you going through the process of breathing control. (1:54). Why don't you work through the process of the soul to feed the physicality. Q: I have already

done, in certain ways, I don't sleep for 24 or 48 hours, **I feed me only with the emotion**, I stay in this room day and night, I don't sleep, I don't eat in the physicality way. **I found a way to feed myself from the soul level**.
K- **So gradually more people will learn this. But the thing is to extend it to 100 days then 100 years. From 48 hours to something like 200 hours is normal**. You have not passed the barrier yet. 48 hours is normal, **a lot of people can go 48 hours without food and sleep and be as good as norma**l. I **showed a trick** to the KS, in one of the classes on how you can stay awake for a longer time and be more energetic by drinking a cup, if you **add a little bit of salt to your coffee** you can go (bang), like a pack rat. Do you think sugar makes you hyper active and keeps you awake, try salt and a cup (of coffee). **Because salt is part of your life, it's the channel of the solution and dilution of energy.** Q: I have the trouble with my wife because I am eating so much salt, in extreme, sweet and salt. (1:56). K- You must have a Chinese background somewhere, no sweet and salt is the Iranian culture. We eat that quite a lot, it's part of the structure of the food, but the salt does this. When I was a buy my mom used to tell me I used to eat a huge amount of sugar and huge amount of cheese. Normally they say when you eat a lot of cheese it makes you thick. But I don't think she realized that **I knew the secret of the energy**. If you have a **protein and salt available, if you add sugar with it. It's an everlasting motors**. And the thing is because it works**, it goes directly to the brain**, and you can see the difference. Any other question?
Q: .. (1:58). It's off the topic. **I am having problems sharing KF videos on the internet, I am wondering if I am the only one? K- This is part of the control by the Rothschild's family and Fox** and .. You have to understand we promote peace and the way it goes in the past few weeks, you know where the **Facebook and the others sit, who owns them. They get instructions and they work on instructions. The owners of these organizations are not very favorable with what** .. they see it as a damage to their interests. We had this and know it exists. If you go to Wikipedia you can't find MT Keshe because if they decided if he doesn't exist, then nobody will search for it. Unfortunately they searched more for it and they found more about what ?? ?? things about him. So people are becoming aware of the wonderful arrogance and control of these organizations. **But it doesn't really matter. It's been put up 3 or 4 times in Wikipedia and it's been taken down, because if he is not here, then he doesn't exist.** That's what I call the Jewish mentality. You will understand this very easily, they have decided if he doesn't exist on the Internet, on Wikipedia, the public doesn't understand. Facebook (FB) has lost its face value and not we see very strange things are happening, I saw a beautiful article coming out from a presentation, (2:00). of president Trump a couple of days ago with the president of Israel. If you can find it on the internet. He said, **the state of Palestine will be accepted as an independent state when bla, bla, happens and he refers to, if I am correct, like a, they have to show there is no fraud** or what do you call, there is a word he uses for it. **The strangest thing is the man standing next to him in the court of Israel he is standing for 2,000 cases of fraud and deception**. It's ironic, the guy says, the ?? assets he wants for the Palestinians, are not involved, in this, this and this, is exactly what the guy standing next to him as Prime Minister of Israel. What is the word he used? … If that is the condition on a nation, how come the guy who is supposed to be from the nation, has 2,000 court cases by his own parliament on him. ??? a couple of days ago he offered them 50 billion to ?? peace between them ?? … He's

telling back what the guy is literally going to be convicted of in his own country. This is the hypocrisy .. (2:02). it's part of the speech by Trump on Middle Eastern peace talks. He is going to offer a new deal for the ?? You have to understand the American administration now after what happened in Iraq 2 or 3 weeks ago. He doesn't talk about war with Iran anymore, it's all wiped out of the Internet. Everything else which was there, has disappeared. We see this is gone, don't get upset. Many KF people have done that. if you go on the FB, there are many Mehran Keshe's, they allow anything, fraud, any rubbish to be put in. The owner of FB he knows, he actually encourages them, because don't forget, he has a big problem. **His space programs are on the way to obsolete. NASA used him as a donkey, until NASA can develop their own processes that can carry**, .. this is part of what it is. Q: Mr. Keshe FB for a long time belongs to the CIA, they bought it. K- Don't worry about these things, that is their problem. (2:04). Everybody owns everything at the moment, because if you own a share in the market, of it, you own it. Any other question? … R- people are coming up with questions about the interaction of the virus energy and the depletion of the virus…
Q: **In what M and G way does the virus energy get depleted, by giving its energy to either the lower energy of the body or of the Gans**? … repeats .. (2:06). Q2: How come the Gans water is of the lower energy, then the body Gans?

K- **The body Gans is always a composite of many, and what you call the energy Gans of .. when we talk about the Gans of the body, you have a composite of many, Cu, Zn, and many elements (draws a cell). The virus links usually to the AA, and in the dynamic life of the AA, this will use the energy, and it gradually gives out** (draws the AA replicating itself), like a flu or whatever, until it comes down. In our case, we put the AA and we attach 2 little things, made with Zn and CO2 to it. Now you can see the difference (very large cell and draws tiny Zn and CO2 Gans), it depletes, and through the line of connection, this gives part of the energy. This doesn't deplete completely (the cell shrinks but does disappear). This becomes like this, it is still there, but as energy, where this (Zn Gans) grew from this to this (Zn Gans becomes much bigger). It's what we call, "camel bird" they carry now energies, which does not attached to anything. This is how it works. (2:08). **The reason we ask you to put an AA, because then it is easy, the connection is very rapid**.

The KF has developed a new T that will control AA in all directions, even directly to the STM. This AA will be used extensively in the new EU. That's why when I tell you, when you go into these EU, we elevate the STM and nobody can copy it. Because it's a combination of things, part in??, part in T, and part connection to the cosmos , I have used to bring you .. I carry the knowledge of the U, and it is very easy when you know how to play. This is why I tell you, **very soon you will see lights coming from these EU, (which is) the strength of the STM**. Very soon these will be very easily explained in that process. This is what I said, when for example, we asked the Pope to go into the machine and then we'll enhance his soul and it will become a light. As he comes, can he claim to be the Christ? (2:10). Because you'll find out, that the light of the Pope will shine the same as Alan Sterling (convicted pedophile), they come from the same behavior. This is what you will see. In so many ways, I know the T and also the structure of the body of the man and you will see, that's why I told you to buy as many

machines as you can, if you get it. I salute you. Be careful you don't come out as a pig, there is an African Flu for it. **You will see, many will come out of the machine as a soul, then when they come out they have to decide if they want to stay as a light, or will they take the dimension of physicalit**y. You have to remember a leader has to lead his nation and his people first. In the olden days when we have the Roman Emperor, the king was always in front of his soldiers that's how he gained respect. I wonder if the Pope would do the same? (2:12). Don't forget he was the first Jesuit, he is a soldier of the Church. In the interview which last week was made on Iranian television ?? to be broadcast ?? if they have taken permission to do. The interviewer asked me, why are you like this? I said, it's a big problem, **I come from a line of Cohen in the Jewish religion, I come from a line of Saheeds from the Moslem side, and these two (lines) cannot be killed.** That is why the Jewish state has a problem in killing Keshe, and so does the Islamic states. You cannot touch the blood of the prophet. Let's see if we can bring peace to man it doesn't matter what he wears. Any other question? (2:14).

Q: **In your research are there any more than 20 AA? K- Do you want to know the number of Amino Acids .. 20000000**… I don't have enough whiteboard, sorry about that. Let me explain why .. **This is the 3 layers of the skin of the man and each one and in each position, different cells, each one exits and holds, it doesn't matter what shape, a specific M fields which leads to the manifestation of what we call, the physical skin, a mirage, our skin is nothing but a mirage. If you realize that number 1 has a different salt content than #2, or #3 or .. or whatever, each one holds a position according to the specific salinity and a specific position**, … (2:16). So if each one has to have a specific salinity to be a cell in that point, now tell me, do you have 20 souls (AA's)? But, then you have to understand, this one carries the salinity of the salt of the cell ?? layer , and this carries the salt of the cell ?? layer , and then the same. this (middle layer) always carries (PKFS) K, Ca, Ph and sulphur salt, this one (1st layer) carries it the other way (KPFS), this one (3rd Layer) is totally different (SPSK) by order of magnitude of the strength, and then on top of it, there is salinity. The salt combination of the body of the man is the backbone of the structure. **In Homeopathy, they believe in 12 salts** and I know that some of our doctors work that way, but with me, we work with, no condition, but understanding of the position, what it needs to be.

The mastership of the man will come, when for example, you can do the 4 chambers of the heart and the connection of the blood vessels. (2:18). What we call the vessels which sit around on top of the blood, the arteries. Then you'll see how a small salinity allows the connection. **Change of salinity, and change, and then what salinity allows the flexibility and allowing it to shake itse**lf. If it was a car on the road, and it shook as much as the heart shakes in the lifetime of its shakes. And this thing never lifts apart (arteries never ripe from the heart), at the point of the pipe, and the engine, because it continuously adjusts itself. The body of the man is a marvel of engineering of the Pl fields.

If one day mankind reaches the point that he can change one single cell, one single cell, and be able to replicate it. He would be ?? another brain, in the same position that the order of the others don't change. **Then man might have reached the point of understanding, maybe 1/10th of 1/10th of 1 percent, (2:20). of knowledge of the U**.

Q: Can we multiply AA like growing salt crystals? K- Of course, God does it, why can't you do it. Q: Can I multiply my 2 souls (STP & STM)? K- Why? Would you like a

bigger head or bigger toe. R- Does not the Creator create more creators? Maybe that is what he referring to. K- We always create, it's man who puts limitation on the limits of his own understanding. In the knowledge of creation there is no limitation. I have said that many times. I always said, man will understand this T according to his intelligence. (2:22). And some of those intelligent leads and ends of with 3 words, PhD. That's it, I want to live off it for the rest of my life. I have gotten myself, "donkeyed" with 3 words, I am very clever, just 3. Q: If we know how to stop eating why do we do it? I am sure pleasure, for emotional satisfaction of that taste that tickles my soul?
K- A woman asked me that question years ago, she said, " why did you come here if you have everything?" I said, **there is a pleasure in the physical dimension and we come here to enjoy the presence of it. The life of a man in the dimension of physicality, is the pleasure of feeling that physicality, be it an animal, a woman, a flower, and seeing it, you don't need to touch it.** As I always say to Caroline, she says what are you looking at, I said, I am admiring the beauty of what I have created. **That's why we come here, to admire what we have created, and what it can be given. We come to the dimension of physicality to understand the limitation.** As I said once to a friend, do you know what is the difference between a theory and the fact? Theory is that in the U we make a lot of assumptions. The fact is we come here and we see what the human in the physical dimension has done with it. (2:24). We write a lot of papers, that this is going to happen to this, and this, and we go to the laboratory, in the U, we call it earth. We go there and see if the theory works. **Now you understand why we come to earth sometimes, we want to see if what we assumed theoretically, works physically, for the ?? of his existence. I call it, the love of the U, and we have many of these labs, or these creatures that are special.** I never forget the first time Caroline says, why did you come here then. I said, because the earth is a place of existence, it was the pleasure of existence, touching, feeling, smelling, and loving. **We wanted to see that if what we did in theory works in reality and practicality**. Q: I think it's not difficult to see that in the practice here on earth. K- Everything is possible. I had a big discussion with Armand this morning. He said, you are not coming to Mexico. I said, I am not coming because I don't want to be killed or be imprisoned with Carolina and Rubin for months to come. He said .. It's very simple, **I came here to share knowledge and not to be imprisoned for the knowledge. (2:26). It depends what we decide to do with these pleasures of life and the prison of physicality**. It's very much like you go and teach something and you build a theory, and later on you see your invention in the shop, or in somebody's home somewhere, and you say, oh this is what I invented. This is what we see with the STM in the span of the U. **We say, this is what was created on earth. Then we see a lot of problems with everything which is exported out of earth**. Like do you remember 20 years ago everything made in China was faulty, they didn't get it right, so it was made on earth and we have come to fix it. The Chinese took time to fix their products, it took man millions of years to fix his. So we come to fix. Shall we call it a day. R- Do you want to see pictures of the One Cup, (2:28). Yeah, I have seen one beautiful one. Why not we share knowledge, it's amazing. Since the MaGrav systems that many KS tried to make, **this is the first time KS are at in again. It's like they were waiting for something to come from Papa to see how we can do it.** So let's see what it inspires or does it die again with the MaGrav. There is one that is so gorgeous, it's so simple, I think you can find it. It's a piece of wire, he has hung a Zn, Nano coated, he actually N coated the wire

itself and then he has put the Cu here. There are wires coming out of the plastic and he has connected to the battery. … I think it is so simple and beautifully done. **Actually you can connect the 2 without the battery to one. The way it's done you can connect the 2 to one end, and one to the center. (a wire where the battery was) (2:30). The Potential Difference will be created, you don't need a battery**, but the simplicity of it is just, so sweet. ..
Shows the photos.

(2:32). … even the choice of the color … I think we are starting to get you KS moving again. In the coming weeks we'll launch new scientific technical products. What you might use in N production or the plasma for detection or whatever.. (2:34). This is how easy it is to save a life. … Q: Carolina, I have quite a few questions in my private teachings where people keep asking about the MaGravs. I said you all have been asking the technical questions to Mr. Keshe, but you never asked him to reveal what the MaGrav system is actually a gift to humanity. I was waiting all the time for this, because last Tuesday we encouraged them to put the questions through to Rick to ask about the MaGrav but apparently nobody is daring to ask you or to open that door. But so many people have made and bought the MaGrav and they are working, but the finice of your understanding of what it is (2:36). I think it might be time for you to open that door of beauty for all of us the same as you have given the Cup. of Life. Would it not be time to open it for the MaGrav too? ..

(Secrets Hidden in One Cup: Salt, Soul, MaGrav)

K- **This shows the beauty of how simply you can make Gans's. A lot people were expecting to see a green Gans, some see a yellow Gans due to the higher energy they choose in their battery**. If your battery is not so flat you'll see different colors of it. But again, it's that level of the Gans in that strength of the Cu. Keep that picture, Here you have seen something that you have never seen. You have a condition here of what you think, CO2, sorry, here you have a condition of CuO2 (changes it), .. here **condition of CuO2, here a condition of C**, but what you have to understand, all these pictures have a different strength. As you create the same here, the set up a flat piece of Zn, (2:38). for a different strength of Cu, **you create a spectrum of the Cu and CO2**. Because it is not only this and this. It's this with all of it. the same with this and all of it. This is why the AA which you produce on the top, here, has a spectrum of, and **this is why this thing is so effective, it carries its own AA spectrum, CO2 spectrum, Zn spectrum**. But there is **one thing hidden you have never thought of, most probably, is now that you have created the Gans condition, the condition of the matter Cu with matter Zn , this is the connection between the brain of the man and the physicality,** is in **the strength of the Mg** more or less. **This is how most of the salts are made, because these waters are in the condition of the plasma of the U, they are not just water**. (2:40). This is how salts are created in the U. **The G pull in the matter state, which is what we call salt. This is the secret in this Cup,** and you were looking for something else. This Cup when you produce it, has **another secret**, a beautiful hidden secret. It's very simple, as **it is a dynamic between here and here (between the Nano and matter Cu and Zn**), why this system touches the man, the ill person, is, that **this system has a soul (dot in middle). Because in these 2, one is a sperm, and one is an egg. And this is the womb of the**

mother. In fact, if you look at it, I have given you a real Cup of Life, where the real life starts. (2:42). Originally I taught this years ago, but nobody understood, maybe this time some of you will understand. Then **if you turn this 90 degrees you have the Cu fields, the Nano fields, and the Zn fields, isn't this your MaGrav system**. What did I tell you, I always told you. It's very easy, **why we do not need prophets**, because I am another magician in the dimension of the universal knowledge. If you understand it, you would have seen what I set up. If you understood that, it answered the question that just was asked, **the beauty of the MaGrav system is the soul in the center of it**. You were looking for megawatts, **I am looking to energize the STM. If you come in with the wrong behavior you get nothing from your MaGrav physicality. The MaGrav systems have the energy of the soul,** and many of you will never understand, because the man is so physically weak to understand the knowledge of the U. How many times we said, if you put something on top of a MaGrav, you will feel the fields. (2:44). Isn't that field, these fields. When you sit on it, you get from it.

Q: Do you remember a lot of **MaGrav systems have been made with the crystal in the middle**? Yeah. Can you explain more please? … K- This is very much, when you have **crystals you can unify singularity of the chosen fields**. People who did, maybe they understood or never understood. I explained that when you started playing with crystals to understand what you make. … Go to whiteboard.
You see **when you have a planet, you have many fields, (2:46). coming in and going out. We don't know which one is which**. Does this one end up with the soul of the mother, and this one with the soul of the cat, and this is the strength of the soul of the stone, or is this connected with the soul of the Mars or Moon. **When you put a crystal in the system**, and if you understood what a crystal was. As much as different energies come in and the rest of it. Then if you understand, then **in the future you decide, I am going to go into this one (choose an individual field), or you decide you want to connect to this one, the soul of my dog. Or you decide, I want to be, we call it mono field to the moon**. We'll play games with crystals later on. Man hasn't got the knowledge yet. … Now you understand the knowledge of crystals. But you have to understand, (2:48**) where the homogeneity of the signal and the strength comes from and goes to. In the future, the KS who expand into the space travel they will be able to do this. They'll close the circuit, because you need the feedback of the same, to be able to become part of it.** The **Iranian space T scientists have reached that space point**. In the Tehran conference, if his Eminence Ayatollah K allows, we will show technologies which man could ever dream of, as I said, why are we ashamed of the knowledge we have, when we have to be proud of it. Any other question. This is an answer in a very direct way to Dr. Alzar. (2:50). If you understand something, it is very easy to understand (draws a loop of the fields), but if you don't understand it, you can sit there and scratch your head, did I connect to the soul of the mother or did I do what happened. This happened to me this morning, Carmen came down, our boss, (2:50). Mr. Tipoli (dog), I usually feed him because he has everything he usually gets from his little trick, or the treat, but he was going on and on. I said, Caroline I don't understand what he is telling me. She said, he said that when you cam to the room you closed the door, instead of letting me tell you, he doesn't like you to close the door, because he couldn't be with you. When she explained that, he went quiet. Absolutely quiet, no more barking, not even

once. She understands the language of the dog, **his soul. He wants to tell me, next time don't close the door, because he always follows me in and he gets treated as the boss. It's what we understand and how we are connected through the soul**. Any other question.
Or shall we call it quits. .. Q: Can I share one of the MaGrav with the crystal, the one Klaus made in Austria? (2:52). Which Klaus. … shows the photo. Q: This must be Santa Claus. K- Their soul is on top of it, connected to it. Thank you very much. Q: Libby, .. Yesterday when I started making the One Cup, **I decided to use Mg Sulfate (Epsom Salt) instead of kitchen salt is that a good thing**? I am going to make another one, I made a lot of mistakes? K- **Yeah, actually the Mg salt connects directly to the STM, why not. Q: Excellent, because I felt like I had an interaction with it when I was going to bed last night, I felt like I was communicating with it**. K- You feel in love with it, is it? Q: I did. K- Let's go to bed with me (ha, ha). .. I was, 'is that reactor talking to me.' (2:54). I was really amazed and I want to thank you again and again for what you have done for humanity. K- You're welcome. As long as it doesn't wet the bed it's good, be careful how you keep it up. As I said, **the limitation of this knowledge is the limitation of man's understanding of his own limitations. We limit our knowledge, there is no one right, and no one wrong, and this is what I said with the new T, there is no fear in it. If it gives you a result you have to understand why**. Why do you feel it when you choose the salt of Mg. **Because in the brain of the man you have mainly this, Mg and Ca and very little P, you have a Zn, and hardly any, zero Cu, very little. These (P + Cu) are very minute and are used in very specific positions. You have a huge amount of what we call, radioactive material K, (potassium)**, but we don't see this, because this is the holder of the cells of the body, and in so many ways, we have very limited amount of this (Na). (2:56). There is vast amounts of what I call, (P) Phosphor and Sulphur, connected to the dimension of repair and multiplication of RNA. If you have chosen any of these salts (Phosphorous, Sulphur, Na, Mg, Zn, Ca) then you have to understand where you are heading. If you notice, here (P + Cu) and here (P + S) each one has a specific reason and position. Each salinity between these, by connection of the CO2, ??? you have a CO2 in lungs, it's very simple. And you have CO2 in your brain (draws lungs and brain). They feed each other. That's why they are placed above or below each other. The line of connection is CO2 in them. That's why when we breath, when we start our breathing channel the whole thing falls apart (?? the virus). (2:58). When we breath we don't pass energy, then the energy is outside the physical boundary. This is what we see in the structure, so any of these salts you can choose, this (K) has to do with the STM, if you use this one (K) and understand this one (Mg), and the connection with this one (Phosphorus + Cu), or connection with this one (P + S), especially, then you can reach the STM and the soul of the ancestors. But this needs a very deep understanding.

Q: is this the reason why you use 6 to 7% **CO2 in our brain? K- Without it you don't have the connection with the lung. The field is created, controlled and linked up through the lung. One of the reasons we released CO2 is to keep the structure of the brain in order.** .. Let me explain something please. You have to understand that we create huge amounts of CO2, and we think we breath it out, but as we said, **when you breath, if you remember, draws mouth and nose, you get the best and highest energy. You do the same when you breath out, you get the best and highest energy,**

which is needed for interaction with the physicality and the STM. (3:00). It's not that you just breath CO2 out. It's the same process, the best of the highest energy for connection ?? for the physical construction with the body comes on the way back (out) too. This CO2, not only linking, but continuously confirms its existence. We are always looking at what we take, and this is the biggest problem with the human race. If you go back to the teaching in the past I explained to you, that when you breath the soul takes the best, the soul is a clever chap. And when you breath out he also takes the best of what is created and good for itself too. Maybe for the first time man understands why he breaths CO2 out, and that is why when they cut the throat hole, if you cut the breathing line, the brain stops because it doesn't get what it needs to match, to link up and create a dimension of the connection with the STM. **The breathing out is more important than breathing in because the energy which it has made for itself, it consumes it. It needs it, otherwise it cannot operate**. If you allow people in Coma or in a deep shock state, to breath through their nose and their lungs they'll recover very fast, because you energize with what the body creates. **It's literally the exhaust coming out, it is very much like people who drink their urine and they say they put things back. Because the body has made it, it is matching it. It is what it needs.** (3:02). **It's not the conversion that you cross all the energy through the lung into the blood, that is for the blood, but what comes out (through the exhale) is for the STM. The very best that could be done because it's made by itself. This is the first time I have released this knowledge**, but if you understand it, go to my cups from 20 years ago this is the first thing I considered. **Breath it in, and then breath out very, very slow because the soul needs all what was created**, you are destroying everything that is there.
Q: I do 2 kinds of breathing, She describes in detail, the method of Kriya Yoga ..

(3:04).
.. I do it for a half an hour and can feel the soul is outside the physical soul. It has a big effect on the body, I try to do it 3 30 minute sessions per day. K- I thought you were a dentist and had a lot to do. (ha , ha). … you don't even need coffee and tea, and I never feel tired …

K- If you learn, not necessarily to breath… you see, it says, "I made man in the image of myself", I repeat this many times, but not many times do people understand what I am talking about. It says, I made man in the image of myself. (3:06). (draws the brain). If the man needs, or the man can think, so does the soul. **The man has to learn to understand this (soul) thinking, and not this thinking (brain)**. If the man becomes a passenger of space. Because **this (soul), it is this which will manifest itself in the depth of the space. And if it does, it must think that it can exist.** The problem and part of the teaching has been, and it has been one of **the biggest dilemmas for me**, for weeks now, how can I explain, maybe this is the best opportunity to do**. How can we get the man to understand the thinking of his soul and not the thinking of his physicality? At the same time to be able to distinguish, is it the soul thinking or is it the thinking of the man?** Because **the soul as you are, is already thinking and communicating with the other souls, what your physicality is thinking or communicating with physical life**. Then it comes, this or as you say breathing, do we by different understanding of the use of the physical dimension, can we access this line (soul) of communication? (3:08).

Because **when you accept this line of thinking (soul) then you become the light.** If you work this side (brain) of the thinking, then you stay in the physical matter. We fall in love in the dimension of the physicality, if the physicality can fall in love, and "I made you in the image of myself," so does the STM, falls in love. **When you fall in love with the soul and it takes over the dimension of the life, you'll see who lied to you in the dimension of physicality. This is where I am at, but my silence is my virtue**. If you do understand this, then it comes to the point, is it the STM that we hear, or is it the physicality of the man which we hear, or do we become so transparent to our physicality, that we know the difference between the 2 ?? core poles, and when we get this balance (? imbalance) it's ?? single ?? .. because that is what happens to you on the day when the 2 (souls) have to say good-bye. A balanced book. (3:10). This is what a lot of KS, **they have to go through the transition. With this new EU coming in, you will face it, you have no choice, unfortunately. Then do I think on the level of my soul, or on the level of my physicality, because, "I made man in the image of myself.**" If man can think, so it is, also, one of My own attributes in the dimension of the soul. Then if I think in the level of the soul, which has ?? no dimension, isn't it supposed to be the dimension of the Creator. Then it brings a lot of understanding to a lot of us. **Do we need to breath, to be able to, or do we need to go to sleep to open these boundaries softly. The man has to understand this, now that you are becoming aware of the soul, are you thinking with the dimension of the man, about the thinking of the dimension of the soul, or are you thinking in the dimension of the solar strength the effects the dimension of the physicality. Then if you achieve that point, you can convert yourself to anything in the dimension of the U. (3:12). Anything**. Then **you become that Gans.** Do you remember you have a Gans, then you get gold, silver or whatever. **So now this Gans is the STM, in what dimension strength do you want to manifest yourself.** Or is it the one you love, that loves them, and you can create it in the dimension of the diamond to see the beauty by the soul of it, that understands, appreciates the non-existence of physicality, in the dimension of physical observation, but seeing it as it exists**. I call these ones, the magic of the soul. I can give you whatever is in your imagination in the dimension of your physicality, that elevates your soul, to understand the power of my soul, what I can give you as peace and satisfaction, because your soul is important,** I love that soul, I respect that soul. It's not much, what physicality stands for. When I stand and say, would you like to see a shooting star, I do that for the love I have for the soul and with that satisfy to the eye of the man, to the dimension of physicality. **It comes from my love, for the love of that soul and nothing else, because the dimension of satisfaction, the dimension of physicality, is to satisfy the soul, then you can see as many shooting stars as you like. (3:14). In so many ways, a shooting star is a confirmation of the life of the Creator, that is what the soul sees, that is what the Christ saw, Moses, and Mohammad sa**w. If you understand this, you understand the totality of the love of the Creator. The life of man is a shooting star, in the broad horizon in the life of the Creator in the dimension of existence. But you have to ask, who does he please, with that shooting star? Then you have to think, from now on, gradually, as KS, and those who come to be the seekers of the knowledge, am I thinking in the strength of the soul, or am I thinking in the strength of the physicality, as, I made man in the image of myself. Then it comes to the fact, does this (the soul) have a separate lover, then this (the physicality), in the dimension of the physicality. But the beauty of it

is, can this lover (soul), be changed in the dimension of physicality? For this (the physicality) it would be a hard job, because you have to take the physicality too, into the soul. **Today's teaching has brought many things on the table, (3:16). but this is part of it, for the man to be able to enter the U Community**. When you come to the dimension of the soul and **you travel the spans of the U, for your soul, how do you know what is here, or over there, what is this (object in front of you)? If the soul could not think or understand, or do we put the dimension of the understanding of the physicality within it. Then let this think for the STM**. Try to understand, that we understand the totality of the creation, what has taken the creatures of the U billions and billions of years, and not many have understood.
Any other question?
Q: You mentioned the name in Iranian, is that "Defah", our protection? You said, Sepah? (3:18). K- Sepah means army. "P" in the Middle Eastern languages is exclusively in the Persian, in Arabic we don't have it. … Q: you write it? K- It's written like this, what you call "P" and Sepah means collection of people, in so many ways that safeguard the nation, under the king or the leaders. It was a forgotten name, until the regime of the last Shah when he brought back in the Sepah, which was 2,500 soldiers sworn to protect the monarchy and the nation. When the Palestinians raided Iran, this was the first lot they killed. I lost one of my dearest friends in this group. Nearly 30 years ago. Q: .. K- "**SEPAH", this is how it is spelled. This means, 'army for the people', it's an old ancient name for army**, army is a new name. (3:20). In Iran we have 2, one is ?? which is the present national army, sepah, protection of the nation. They protect the Iranian nation with their lives, as we have seen. these are part of the culture of Iran. We trust them with our lives because they are there to protect us. It doesn't matter who puts the name and how it gets used, but that is what the true meaning of it is. … Q: In Arabic when you hear that, sebah, it means mourning. K-This actually means army. If you saw this …

(3:22). It's part of the Iranian culture. … Any other question? Thank you for today. I do apologize for those who go to Mexico, I go with my soul, I'll be present as much as possible on the Zoom, teaching on the Zoom. On the other hand the head of the KF and the backbone of the KF .. in a way it is a pre-run of the time to come. It's a good start. Please remember when you are in these ?? you are in the soul of the KF, not individuals to, as we say, play games. The knowledge the ?? for peace and ?? T for the governments to understand it's sacrosanct. … But today I opened a small gap into your knowledge in respect to life of the man in the U (3:24). if you understood it. Thank you

(3:25). K- You were explaining the different meetings. Something very important Rick was just mentioning, we need, now that we are dealing with governments (3:26). in a vaster way. We need the testimonials to be categorized in a way that we can ?? print the disease per case of tress, animals and everything else. Especially in the Golden Age of Gans where people are putting these testimonials to bring a rapid shortcut to what we call clinical trails, we need all the people who have done trials to bring all these testimonials under one bracket. If I need to show cancer, 10, 20 or 100 of them, I just go to the cancer section, take the file and I can give it to a doctor. Now that we start negotiating with governments these testimonials are becoming very important, extremely important, we

are realizing the importance of these testimonials you are putting out. we need someone or a group of people who can categorize the testimonials that now we are doing research or what we call, clinical trials in China. They want to see all the trials that we have done and we'll present these as KF trials around the world. When they see different countries it gives a lot of strength to us. ..
especially agriculture and medical
(2:28).
I know a lot of Chinese doctors have done a lot of work but they are hiding it. It is time to open up. and let us have the data you have worked on. this speeds up the work now that we are in with your universities.

(3:29).

Video: One Cup, One Life;
END

314th Knowledge Seekers Workshop - Thursday, February 6, 2020

(** The next stage in the opening of the "jam jar" called earth to space, Bill Gates and the spread of Coronavirus.

KEY-PHRASES:
Zero-time communication, transportation, transmutation we are already doing it, When one plasma moves all others adjust, Sun vibrates millions of kilometers, Everything balances like acrobat on rope, Man is kept in balance through the emotions, Keeping science in ignorance as way to control, STM works just like magnet, 1 Cell is controller cell for entity, Peaceful nations will achieve flight first, Incompetence in Chinese leadership is problem, Bill Gate's virus agenda, How the UC governs, How you change leaders through soul, Changing position causes other to vibrate and can collapse, Breathairean prophet, You open the "Jam Jar", Freedom of choice of the fields, religious leaders against change because of criminality, Belgium monarchy collapsing from within, The True Man helps his enemy, What man has done to planet, Prophets all had the same soul, Coronavirus in China, American vaccine is Trojan gift to kill more, Analysis of how the vaccine kills, Iranians helping those who are causing them suffering with Nano masks, MIT has to closed for planning biochemical mass murders, We can reach any soul because we are linked by dimension, Neutron nonexistence are the "glue" that holds protons and electrons together like invisible people of society create the balance in the soul of humanity, Neutrons become the next protons, When sphere of M and G fields cross each other create a vortex which can be heard in our ears, Chinese Fire Dragon is the interaction with the STM, It's the same Fire Moses saw, It's the same with the Cup of Life, How the 2 halves of the body repairs itself in the sleep cycle of about 4 hours each, Iranians show plasma pulse for first time it can be seen in the clouds, Compression of the fields makes an impenetrable barrier no missile can penetrate, Lower speed missiles are turned to Nano coating, Was demonstrated in Iraq 3 weeks ago, new weapons technology

is obsolete and it will enforce world peace, Details of how cell division occurs in the womb of the mother to the development of the kidneys, The process of creation is the same throughout the universe, You create a soul with your own hands in the One Cup, One Cup elevates your soul and with that surplus of energy you overcome the virus, Explains the plasma patterns in the Periodic Table, Important is the Fe at 56 and then it comes to the isotope of Ca, The Ca bone structure just happened because of the heartbeat of the planet and multiples of C6, Only a specific type of Ca can become bone, With the new systems he can create a man because he knows the secrets of creation, Details of how life was created through the right salinity, protein, field strength vibration between Ca and the waters of the ocean and Fe, on this planet, The creation of life is the same everywhere in universe according to the conditions, Can recreate the man from the skull, Bone can be made from other materials it depends on the heartbeat of the plasma of the planet, How to stop the killing by man and animals, ZnO and CuO were introduced to elevate the soul of totality, Add all the foods you like and combine to CH3 and you don't need to eat, The Enhancement Unit will do everything you can imagine - feed repair fly, You don't need matter state -use the fields of the universe for salt- Zn- Cu to create a soul, Two souls if they have the same level of giving they can create a "soul child", Physical life never started in the dimension of intercourse, The Cup of Life is the same as the earth itself in that it has everything to create life, Travelers of the universe bring the souls they love with them to give a physical dimension to their love, The leadership and kingship is a bout to come to the end as it is rotting from the inside, The color of the Gans from the Cup varies from yellow, brown, blue, green, After some time it can change to green or blue, The plan for Tehran conference is to bring all religious and political leaders in one room to decide the future for mankind, The Messengers will be present to support the change, Americans played the virus as their biggest card and it has been disarmed, The virus was tested on Chinese gene and planned for Iran but sometimes experiments turn back on their creators it may change to American blood, Wish to form Sepah in Tehran to put an end arms crossing borders, Systems already created for opposition from America, Do you want to be human or American, Time for Americans to understand how the world sees them, Woman to lead them to peace.)

English Transcription:

(:06). … We go into the dimensions of understanding the T more and more, and what this new T is going to bring us as we enter 2020. As we head towards the space T**, there is part of the T which has to be understood. And this brings back the work of the KF in the new dimension. This dimension is very important and this understanding is very important. And it brings us to the next stage of what we call, zero time communication and transportation**. We are going in this direction to be able to understand more to be able to prepare the next steps in the space T. What is not considered, and this T, if it is understood, can be used for many other applications, is that, (:08). we have come to a stage that **we have to understand the process of the plasma (Pl) technology (T), the process of transportation in Pl T, the process of locating and location in Pl T, the process of the creation of the conditions for manifestation, or**

representation, or communication in the Pl T. I touched on this very softly in the past couple of weeks, and now we are going into the steps of understanding in more depth and trying to understand what this means. Just before we started, we had Dr. Alzar saying, they can make an App, and people read it, and they'll recover from the virus. We see a lot of this running around at this moment, because everybody is trying to do something. It is become a world panic, according to how much the panic is hyped up. **We are all afraid that we might get this new virus**. We all are moving, closing borders and countries, but what about, if this virus opens the humanity to deep space? (:10). **What about if, new viruses which we don't know enters our cycle. As I said in a talk to a world leading scientist very recently, mankind has been in a bottle, in a closed jam jar.** When you make a jam, if you made it good, nothing happens (it doesn't spoil), but if you didn't look after it, contamination comes in, and it rots within, or it stays clean. **This has been the life of mankind on this planet, a closed jam jar. Now in fact, we are opening this jam jar and we are taking man into space. We're entering a new dimension of understanding, now (with the jar open), anything can come in. New diseases which we don't even have words for in our vocabulary. New conditions that can exchange our energy levels into a different dimension. New structures which we have no control over, as our knowledge is so weak in the totality of the construction of the U.** (:12). Mankind has to move to the next step of understanding the totality, what is within and what is outside. And understand **the process of transfer, and communication between one plasma (Pl) to another, be it information, communication, transportation, viruses, or be it anything**. This is why now we see so many problems as we run from one thing to another, and to another.. and from bacteria's to microbes, to food, to anything else, and the viruses and anything else, and other worlds which we'll make in the future. The reason is that we have not understood the principle. **We have not comprehended that the process is the same**, and that it doesn't matter where and how it occurs. **Part of the teaching today is this. And part of the work from now on, is this, to understand the work of the Pl, in a way we go back to Book #3, which is the creation of the man,** the U, the cell, and of the matter, it just depends on what you put in the formula of writing of understanding the truth. (:14). One of the most strangest for a lot of us will be, is, if in the time to come, **I sit here as a soul, in this part of the U, and I place the soul of your child in another,** and the soul of your friend there, and a family member here, and each one of them is in a different galaxy, maybe in a different part of the U, or maybe in a different Unicose**, how do you communicate? Are we going with the fantasy talk of Einstein, "light-years"? Or are we going with the reality of the transportation, transmutation of the fields in the real dimension of the Creator.** Would you spend a 100,000 light-years, to go from one galaxy to another to see your child, which Mr. Einstein said, through his lack of understanding? Or are we going to stay to meet each other, through the soul of each other, through our great, great, great, grandchildren, in what is said by the G, G, Great grandfather to his son. **The world of science has accepted many fantasies, and many dreams, and many incompetent people like Einstein have made it more difficult for the true science to be understood**. If you understand and you can see, and if you can envision, and if you can reach the point of maturity. (:16). If you look at say earth, every second, millisecond, and every constant of the time of existence in the solar system, continuously considers the position of every moon, planet, star in the galaxy in respect to the position of itself, in

(respect) to its sun. **There is no more sitting in the center of the earth with the central control, moon has moved a few millisecond, a few millimeters and now we have to adjust. If you look in the structure of the earth, in respect to its sun, and in respect to other planetary systems, continuous strength fields, positioning, gives it where and how it can interact with whatever. Simultaneously and instantaneously a new position for this planet is considered, not by control systems but by transmutation and transportation of the elements, in the strength of the field of the plasma.** If you look, for example, during the winter time on this planet, we have the production of different fruits. Different conditions of environment because at this point, all the time, every year, and every position, it doesn't matter if Mars moves to new position and Venus goes to another one, (:18). it creates its own condition to create that material, according to the control of itself in the balance of the fields of its own central MG field force. But we say, things have changed this year, last year there used to be more snow and before we had everything else and bla, bla. **In reality those are the interactions of the other systems on it, but it is instantaneous. It's position understanding, of its own field strength, in communication and in line with every single element, instantaneously. If we look at the life on the spaceship we call planet earth, we have already been living in an instantaneous zero time communication.** We don't need to look far to understand it. We live in instantaneous zero time communication between planets. We live in instantaneous and simultaneous time, zero time in energy transfer, **because the energy given by one of these fields, dictates where the earth is going to be in respect to it, and the in respect to the others, because my position, let's say, as Jupiter is for you Earth, to move slightly that way so I can keep my path of work**. (:20). The Earth accommodates instantaneously, the **Sun holds and vibrates. In the future when mankind understands one thing, you'll see the sun is not steady. The sun moves in different axis's in a massive volume. It's not that the sun is in a constant position, it's dimensions of rotation is millions of kilometers. It vibrates**, and if you look at the solar system with the sun in the center, the sun moves quite a lot. It's like what I have called in some the teachings**, it's like the gymnast on the rope balancing itself. The rope is a guideline, but the dancer on the rope vibrates to keep its balance**, and this is exactly how our sun behaves in the solar system, of its own, in respect to the fields from galaxies and other stars and bigger forces. At the same time, in respect, trying to keep the earth in its position, that it doesn't fall in. Therefore, if we understand this, **mankind comes to understand that he is already part of the zero time communication, zero time energy, and zero time transportation. (:22). because our own solar system itself, it has to accommodate itself into the field forces of the galaxy and all the stars in it.** Not only that, its fields forces to exist, to confirm its existence, pushes the other solar systems to accommodate it, even though they all work towards the direction of the central point of the galaxy. Then we come to understand, we as the human race, as part of this structure, on this little tiny things with our soul, we are subject to the same thing. But in the dimension of the man we consider it, as what we call**, dancing on that rope, as a balancer, gymnast we call it emotion. Our balances, is our emotion. Emotion is built in the body of the man to be able to, without falling off the rope, balance it. When you feel happy you go this way a little bit, sad a little bit that way but you still stay alive on the rope. We don't fall off. If you fall off you call it a dead body. Then we understand death is the collection of the balance of the emotion of the man in**

transferring the energy of the STP to the STM. Then we understand why infants at the point of birth, die, and why some of us live hundreds of years and still survive and live. (:24). Then we understand that we are nothing but a bunch of what I call acrobats. But **the balance of acrobats comes through the emotions. It comes through the understanding of how I want to live and I interact instantaneous, and in that position, so are the fields of the body, the STM in respect to the souls of every other things, in respect to the soul of the planet, the U and the rest of it**. If you look at it, it's very simple (draws a series of circles) we are a bunch of acrobats on a bigger size scale of the field strength, starting from man, to the planet, stars, galaxy, U and to the Creator. **Even He has to play acrobat to keep you in the position**. If you understand this, it is very simple, we are already in possession of zero time communication and transportation with every structure in the process of the creation, even to the Creator. Then the knowledge of man comes to one reality, to **find which field, which comes from the STM, connects to which one. (:26). So we will understand that we even have a direct access to the soul of our Creator,** but we have to find the fields of it, and the strength of it. Then we'll understand in so many ways, how **we can create the conditions of, without any systems or machines, to be able to transport our emotion, our energy, our communication to anywhere across the world of creation**. This brings us to another point of understanding, and that is, that **we have understood none of it**. In fact we have understood zero of it, zilch. With all of our cleverness we have dug ourselves deeper in the sands of ignorance, than in the mountain of knowledge.

With these teachings **from today onwards, with these teachings** we have started years ago, is to bring man to this point. To bring man to the understanding of the man and the STM to this point. But as I said many times, in Farsi we have a beautiful saying, (:28). it takes 14 intelligent men to take a stone out of the water well, which one crazy, stupid man has dropped in. It has rocked (muddled) the water for the rest to enjoy. We have **many of these stupid people in the cycle of the science of the man, like Einstein and Stephen Hawkins**, these are the present people who brought this. In the past in the US we have seen people very much like Edison, he was another one. They brought a lot of things to satisfy their ego, or bring other things into it. If you read the history of the man, this has been so for many years. **We have seen that many people who could understand the science have been eliminated, by those who want to control man through science. Then we understand it's us who allows these incompetent people to dictate to us, and condition our understanding the world of the creation**. The total world of creation is not what we have been forced (to believe), but it is what we can feel. **The best peer reviewer, the best understanding of the knowledge of creation, is the STM himself, because it is it, (the source) that dictates the conditions of man on this dimension of physicality and beyond. So he has a lot of intelligence**. We have become the young child in the house of all doctors, and he wants to teach everyone the medicine, (:30). with a zero understanding, of even the creation. The process of the teaching in a very mild way, in respect to zero time communication, energy transfer, and transportation has to be learned from the structure of the STM, the structure of the planet, sun, of the galaxies, and not by meager understanding of ignorant people like Einstein. Because if we go by his say so, man will never develop. Man can't even imagine beyond it.

If you look in the total understanding of the knowledge of your own soul, and look at your understanding, even of a small magnet, you'll understand that mankind should have understood this principle, centuries ago. But through religious dogma and so much jealousy of the others, that somebody understands then they do, we have blocked many new understandings of the reality, to add up to our own strength, to our own knowledge as a human race. **If you look, if you understood, if you can see the totality of the work of a magnet and the STM, (:32). there is no difference. One is dimension of M fields in the matter state, and one in the Pl condition of Inertia**, one is MG field strength, and if I draw you the shape of the head of the man, you'll see the same. In the brain of the man, the physical connection with the hands and arms and whatever, sits on the fringes (of brain) to the matter state. The strength of the arm (at the outer edge) to the center. When you have a stroke, these are the fingers, these are the upper and lower hands and arms. So in the solar system or in a magnet, gives us a very good indication, even in the STM**. On the fringes of your soul energy, you deal with the weakest in the matter state, physicality of the Man. In a bigger strength toward the center you deal with a position of the interaction of the STM, with galaxies, with other souls, and then if you can find, (:34). the strength of the soul of the center, this is the line into the Creator**. We say in every man and in every soul of created things, there is a line strength of the Creator, and this is how it works. Then we understand that with the physicality of the man it's the same. The media we use to transfer energy to the strength of the physicality, what we call the transition time, in the body, we have called the brain. In the STM it's more or less completely the same too. At the interaction at the fringes of physicality and the Pl, man controls the physical dimension of his existence we call the body. In time when the scientists develop the same system, they will see the same in a magnet.

And for every creature, everything that exists in the U, there is 1 cell responsible for it, that in totality, how this responds to another soul, everybody else adopts and adjusts, even to the feeding of the Creator. The pain (.. break connection ..) by the Creator. In that respect, to adjust to that pain, (:36). mankind has been gifted, a new message, and when the man understands this, the humanity, the soul of humanity will move, by moving one of these cells to a new position to bring comfort, and opening of that jam jar, as I explained in the beginning. Now you understand.

From now until the Tehran conference, from now until coming into the understanding of the totality of the knowledge, mankind has 2 choices, (break) we go on the track of war, or we take the lead to understand the new knowledge of the magnet, the plasma of the STM, or be it, the plasma of the creation of the Creator, then the new job to the world of science… (:38). (break…) And then if the man can understand this, man has entered the dimension of realms of men of universe. In the realms of understanding the creation and the conditions of creation.

When mankind comes to build the new flight system, those nations who sit on the path of peace will achieve flight, because the soul of the plasma of the system they create understands the purpose, not the hidden agenda which still has access to it thoughts and understanding. It's to understand, is the position**, to be afraid is the weakness and reduction in strength of comprehension. If you understand this, we**

come to it. We will see this in the human race, we have seen this in the very past few days. We have seen in the behavior of the world leaders, and we have seen in the man, in respect to the leaders. (:40). Because we feel and we know their souls, but we allow them to be. We put our own self interests ahead of the totality, and the space T and the development of the space development of Pl, will not allow this. **Man will not take into space, into the Universal Community (UC) until the totality of the souls of all beings on this planet agree on peace, and agree on collective working together**. You will understand this more and more. Nations which are truly peaceful will take into space very rapidly from now on. **Nations in which the soul is to stop the suffering of what has been forced on them will take up (the T) first**, because they know the value of peace and education and understanding the knowledge of the creation. It's a gift, a man gives by his soul, and by the soul of the collective, not by the word of the collective. **As we know, man speaks different through the word of his mouth, then the action of his soul.** (:42). Then what becomes important in the new space research development is very simple, to develop T very rapidly and to understand the strength and the STM to his center, the strength of different dimensions in the work of the U, space and dimensions in the work of the galaxies and understanding the transmutation of the fields, not to matter state, but to the plasma of the energy states. Then if you understood this, we come back to one point, give me time, you are in one galaxy in one part of the U, and your son is in another, zero-time (communication), we meet for lunch with the cousin somewhere, together in another point of the U. This is not a dream, this is now for man to understand and to achieve. **Man collectively put all his energy to create a nuclear bomb to kill the others. Now, man can do the same with the dividend of the peace of the collective consciousness can achieve this in no time**. The teachings from now on will be in that essence. I have brought you in the knowledge, that **you started with the Gans's and the balls. Now the ball is getting bigger. (:44). Now you have to understand which Gans and which field takes you where. Now you create the Gans's, now you have to understand the operation and strength of each Gans in the environment which it works, that it allows you to reach to the Creator, or the sun, or create energy, or zero-time understanding of another soul in the dimension of physicality**. We take, we hype up, step up to the next level of knowledge. We came from matter to energy and energy to matter, now we have to understand which line of the energy leads us to each matter, lead us to what condition, to where to understand more about every dimensions we need. Instantaneous education of the full knowledge of the U in the position and the direction which the man needs.

We have seen this, the mayhem that man gets himself into by himself in the past 2 weeks in the government of China. **The Chinese leadership has become a shamble, in trying to control a simple virus. Incompetence in management shows itself across the nation, because the leadership, if it would have understood this, would have prevented it instantaneously, but man is in the grip of pride, (:46). and possession, and until that point, man will go**. It's very interesting when you read in the press, **Mr. Gates has put a hundred million to support the virus in China, where he earns billions on spreading the virus in China. This is being aware of the STM. The reality is, nothing can be lied to us anymore, as man has accepted too many lies, and if you understand how to lock into the soul, to the line of emotion, people like Gates, will**

not exist in the stage and the development of what they create for physicality. Maybe the man has a hidden agenda, but not his soul. Many of you have come, understood, touched, and some of the **U Council members** I see developing to that direction, and some of them, through the false understanding and misguiding themselves. Some of you who have learned in the dimension, (:48). of creation of the contact and soul, be it, those who choose. In the work of the U Council we'll say I wish, and I wish your wish, and I wish, wish, wish, wash wish. But what, if you understood what was taught today is very simple, **Trump is a white man with English language, he is the responsibility of the English spoken (language) of the U Council**, when you support through your soul, the connection of the wish of the UC member, to change the soul of the Trump. (If) you never reached, it means you have not understood. **You reach by strengthening the soul of that member, because you understand as the points of the U, you are connected. You took a commitment to be a member**, to support entire, and then you'll understand, if you understood this process, the wish, if it is the true wish of the UC member of the English speaking language, **will translate into the woman of the president. This is how you change the world leaders in the future, not by elections, but by clarity and understanding of the totality of the collective consciousness**. This is why we created the universal language as a UC, because you are all part of that brain structure, (:50). which has to work through one. Collectively, it creates a bigger mass of the fields, that can remove**. If I wished the removal of president Trump it will be done by tonight.** But he has a game to play and **we need him in that point of destination**. Soon you will understand. We saw him by cheating or whatever, going through the voting last night. But **he had to be there, because we have to have him where we want him, the way we want him, to achieve world peace**. This is what we worked through as outside connection, we'll leave the man to learn the inside connection. **You are that earth, which moves a little, the sun, to be able to keep your position. We are the outside, which makes him vibrate to the position we like.** The teaching of the KF is a collective teaching and it brings everything together in all directions, but we teach in bits, and in step by step. Then you understand that life is simple. (:52). It's the man who has not understood the totality by questioning himself. **The missing link is mankind, his own understanding of his own creation in all dimensions**. Now those of you who have understood this, it brings you back to one point, where would you like on this board to be? In line with your Creator, or in line with your son and your cousin, or in line with the U Council. And then something comes that is very important, **what is your role, what is the role of your soul, in all the structure of the creation?** Do you need to clinch on to the intermediaries of prophets, mullahs, priests and the rest, or have you matured enough to find the line of distinction, (:54). and the line and path of knowledge. As we saw in the Tuesday teaching, **another magician jumped up (from Breathairen Institute, 103 One Nation). Would we call him the new prophet or his prophecy became profitable overnight. I promise you**, those of you who can follow him, what he learned in that teaching will become part of his teaching, because now he thinks he learned a little bit more, and he can create more magic with ?? it.
Any questions?

Q: **This jam jar that you were talking about, do we have to take the top off ourselves**, or will it be taken off automatically? K- Do you still needs a magician. Q:

You talked about a rope and moving like an acrobat, you said that is why a child can die at early age and someone else can live for longer, you didn't explain why and how? K- I thought you understood that by now. Q: If I understand the Pl T then I should be able to do the zero time communication, transportation, all that right now, there is no ..? (:56). K- **You see. this is still in the dimension of physicality. You want to see it, to believe it, but shut your physicality down and see what your soul is up to, you are already doing it**. Q: I understand that I am already doing it, because I see the result, but with everybody else, is it going to be all at the same time, or **is everybody going to be on a different page or strength**? K- Of course, it's not communism in the true sense is it. **It's the freedom of the choice of the fields. you choose according to what interests you and what is beneficial to your soul. If there wasn't such a choice, then it would have been one Creator on his own.** Q: In this process **how can we help others**, people who understand, can help others? K- **That is something that each man has to reach that point by his own soul. It's in the writing, 'independent investigation of the truth', otherwise, because your father was a Moslem you become a Moslem, then your child becomes a Moslem. He is not allowed to do, to investigate and understand**, having moved a step up, that we can go further. Or does a man stay Moslem for the rest of the life of this planet and the U.

This is what we put to the world religious leaders, according to them, nothing can change, because if it changes then they have no power. (:58). If they accept that the time is for the maturity of the man, then there will be none. At the same time most of **those who are in the position of power in the religious sections, which controls the STM, they've got their hands in so much criminality and wrong doing,** that by them stepping down, and it comes up they know, they'll be dug in the ground. The denial of the new change is to save their own neck from what can happen to them. It's not out of the fear of man to succeed. It doesn't matter which path you call yourself, **be it the political, religious, or any other kind of leadership**. **The biggest fear of Vatican, now they are saying, the Christ will never come back, because we have done so much bad, that Christ help us, what are we going to do, if he comes back**. Would it be the only solution, as we saw with the Japanese Samurai's with a sword and a knife kneeling in front of your own soul, to submit. **Or would the mankind forgive. Or at least start a new cycle**. As you hear, a lot of things are happening, **because we have raised the level in a different direction, you heard about the situation in Belgium. (1:00). A king has lied to his nation for so long**, but the worst lie that has come, that in confirmation, **has caused the heart attack of the queen**. The queen very recently had to be moved from where she was, back to Belgium, because of a heart attack, accepting that the husband has never been there, now she has to accept a daughter she had nothing to do with it. The mayhem and turmoil in the Belgium monarchy is beyond belief, as we see it, we get reports of. A queen wants to kick the king out. How many more you have (children), I don't know. Who else have you been busy with. Read, very recently she was moved from Venice out, due to a heart attack. **They'll bring their own demise. This is what will turn, this is what sits in reality with a lot of these people. The world leadership has to come with the leadership of the STM alone, and no one to dictate to it**. And not jumping into whatever it brings you. I was talking to Caroline this morning**, I spent most of my business life in a very different way in the oil business, (1:02). and everyday**

as a major oil buyer, we used to get offers, millions of barrels, we knew it doesn't exist, but everyone was in operating in it, because they knew you have facilities that you can buy and sell, and refine, or whatever, and everybody was in the oil business. Millions of barrels. And since the past couple of days, because of the situation in China, and people knowing our contacts in China, now we are getting the same millions, but now it has become face masks, not oil, because it doesn't matter how much oil you have, you die, it is no good. Now they are dealing with fake, nonexistent facemasks, 100 or 10 million, it's just like 100 or 1 million barrels of oil. **Man just changes because he doesn't want to face the reality of the totality. It was very interesting to watch these offers coming to us**, Mr. Keshe you have connections with the Chinese government, we can give you 2 million, how much would you like to pay for it? I said to Caroline, you see my old business, it's just the barrel has changed to face masks, burning it to saving life, hopefully.

Very interesting is, the generosity and wisdom of a man and a nation, not abusing the power, but still being in suffering, helping those who created your suffering. This is the true man. (1:04). **This is a true, what I call, being to exist. When you can help those who created your suffering, to reduce their pain**. Then you'll understand who is the true man. We have seen **none in the world leadership, except one.** And own day I'll tell you who, which nation and where and why. Now they have to live in the world of the shame. Putting, serving, and that the serving is very simple, it's what I told you. (draws circles and forces finding balance with each other) **This is comfortable for me, but this has caused pain for me. Shall I give enough to elevate it, that his pain, and me helping, because for him to find a new balance in respect to his soul of himself, and in respect to me. Don't look for others, look inside yourself through your soul**. Then, if even you understood the teaching of today, (1:06). **if you look at every single page of this screen, I have shown you zero-time communication, transportation, conversion, and zero time transmutation. This is a page of the knowledge of the U, for the first time opened to the man,** for him to see. As I said, the question mark is, the man himself, then you see the picture is complete. **We have not understood the work of our soul, or the work of the soul of this planet, or the soul of the U and the rest of it, that with it, we might understand the work of the soul of the Creator. We have damaged the soul of our own creator, which is the planet, and we expect to move up. We have caused suffering for the soul of the children of this planet,** which are other men and creatures, and we still expect to go up, when is the jam jar top is going to open? Has the man made the jam without infestation and bacteria, that when he opens it, it doesn't contaminate the rest (UC), (1:08). let alone. not getting into the jam jar. We want more and more, but we don't even understand what we have less of, **greed of the man doesn't only go with his physicality, it tries to get it into the dimension of his soul, but it doesn't work**. But at the same time **you have to look inside, what have you done, that has brought you to that point**. As I just said, the queen had a heart attack, a stroke, but has she told the king she played out when he was busy playing out too. Then we'll see if the king will have a heart attack. **The biggest heart attack will come when the second and third hidden children come on the plate, in Keshe court cases in European court of Justice. Because these are part of those who touched the KF**. I knew through my soul that I had to take the time, because everything and all connections have to be made right,

(1:10). for the time, place, and position. As I told you last week, very simple, we know a lying king, who has lied to his nation with a daughter, we know there is one more boy called, Mr. Di Grabba ?? We know this touches the soul of the queen, but **the queen has another child by another man, called the king of Persia.** What heart attack he is going to have, when he hears that he nourished another man's child, and called him a king. The thing is **he has already given the DNA as a civilian, and any document in a civilian court is a public document. We can test these very easily now in the court, because this man has played with the KF. Now you can see the end of the kingship**. Now you understand what was hidden. It doesn't matter if they eliminate him, his documents and saliva, and blood tests are in the public court, as documents and we can all upon it. And she is a civilian, (1:12). and we can do the same. Now you understand **why there is so much opposition from the Belgium's on the Iranians and the rest, because this boy, the king wants his brother at the throne in Iran**. Now you understand **why KF ever came to be in Belgium, the plan to get rid of kingship, in all dimensions. Man's king has to be his soul and his correct conduct, and not be king by murder, rape, and abuse**. I can draw you more about other world leaders and you'll understand how we got a hold. **The Tehran conference is not just a peace conference, it's the end of kingship, and the end of one man's priority, in soul and power of physicality**. You'll understand soon.

Because now we go back to a very simple thing, which sits here (brings back the previous screen with drawings of the souls creating balance). **We have already made all the matter states and the human souls ready for the time. (1:14). Because each one has connection to every single soul on this planet, and those sufferings, man has created in the U. Now you understand more. We took the man of the earth into space (before), and we saw them carrying on with the same criminalities in the distance, so we came to cleanup the mess from the source**. Six thousand years is nothing, but for man it's a life history. **Putting the same soul in the name of Christ, Mohammad, and Moses and the rest**, is the game man likes to play and be happy with, but in essence it is the same soul. This is where he said, very simply, I'll see you in 622 years, and I'll see you in 1,200 years, and I'll see you in another name, in a thousand years, because it's the father, and that soul has dictated where he is going to be. Nobody needs to tell you, that I am going to see you in the restaurant tonight, and I'll be another man, when I see my son in another restaurant tomorrow at lunch time. It's just me in different positions because I have decided where to be, **and this has been the same with the soul of what we call, in essence the True Messenger. He has appointed the time and the day, where he is going to be**, and then you call it, the verses in Haddes and chapters (Islamic holy writings). If he decides to appear in the dress of a clown in one, (1:16). and in a business suit in another, that is his problem, not yours, he appointed the time and the place. **Now it's the time and the place to bypass all the mistakes of the past. Because he has decided and no one else**. Seeing him as a fire and lights or whatever, is his decision, how he entertains at the time of the Presence.
Any other question?

For those of you who listened to **the situation that is going on in China and the spread of the virus, the KF has developed the machinery to disinfect en mass, which means**

there should be no worries for anyone. The machine has already been made, very simply done and will be released to the Chinese government sometime today. If and what we see, the incompetence in the leadership in China carries on the way it is, (1:18). and so many people suffer. **This T will go through the Iranian government to all the nations** around the world and in conjunction with our manufacturing base in Austria, we support the T. **This is to stop the infection from entering, or goes, as we see, this is a selected virus for the Chinese blood only, and the only system which can overcome the modification which was sponsored by Rothschild's family and the others to develop this technology and to assess its damage through MIT, will be overcome**. This is a tailor made virus and we have to be on top of it, and it has to be, once they change the tailor made, who is the next victim. **The Rothschild's, Rockefeller, and Gates Foundation sponsored this disease, with this virus, without knowing that the KF has developed a T for viruses**. It's a shame so many funds have gone into it, but on the other hand it's a pleasure to see, that we can be tested. **If you or your nation gets hit by this, advise your people to speak to, if they don't want to speak to KF**, they can speak with the Iranian officials which will operate through the KF contacts and operations. **Those who boycotted and caused suffering to the nation of Iran, will beg for the life of their nations, (1:20). not to be boycotted by their own lives. As I said, it takes one nation that will respond, and that will be the Iranian nation. It doesn't matter how much suffering was brought by other nations in the past years, still the door of knowledge and T to overcome this position will be handed out and given by the Iranian government to those who created the boycott, out of fear of their own** misfortune. ?? **At the moment we cannot help China, because the Chinese leadership is in turmoil of who is going to lead more disasters**. They have to sort that out in themselves. The incompetence has lead to more suffering, and that is their problem. But outside China, (the virus) because it is tailor made with the Chinese gene, now will move next, out of China, **in the next year, maybe sooner, into Russia, into Arab nations**, and every other thing. What we have seen with the **American virus injection, actually gives life to patients for 3 to 7 days and then the patients are dying with suffocation, with 20% oxygen in their blood**. What the government in China is doing, is they are saying, the temperature is okay, go home, and the statistics of those who die after 3 to 7 days in their homes, are not considered as (part of the virus). The total death toll passes millions at the moment in China. **The count, today, is only of those who die in the hospital and not those who said they have been given an injection and they die at home, due to lung failure and lack of oxygen. (1:22). A Trojan gift by the American administration, or what we call, Rothschild's, Bill Gates organizations and the rest of it**. If you look at it, we give a hundred million to the Chinese for the virus, that hundred goes to buy the American injection which were made to kill more, that we can make more. The game is so dirty. The T overcoming the virus, we taught you the Cup of Life, now **we have developed mass production systems to cleanup the environment, hospitals, and ports. All you need to do, is to literally walk through a tunnel**. You breath. You see this injection they give for the fever, it sorts out the fever, but this disease sits in the lungs. The lungs collapse, then they get rid of the fever, but long term the lung is damaged and they die at home, but this part is not considered. It's very much the trick they played with chemotherapy. The chemotherapy is successful, but they don't tell you that it kills you with a small infection 5 years down the line, because of, effective killing.

And we see the same things with these injections from, (1:24). America, because yes, it is a paracitimal and a bunch of other things mixed up together. What we have requested from the **World Health Authority which is run by a Rockefeller organization, as their private game**, is very simple. **We request the following, what is the amount of Mercury in this new vaccine, the amount of Cu, and Zn in this vaccine. We also, want to know the combination of Phosphorus used to effect genetic deformation. This is the responsibility of MIT to give us of this information, because they tailor designed this virus**. There is a certain amount of lead, and mixture of Aluminum, used in this vaccine, we want to know. **Any organization in the world who can get hold of one of these vaccines and give us the Raman Spectroscopy of it, as we have asked the Chinese government, will give us indication on how they have tailor made to ki**ll. Don't forget that Mercury was part of the 3 M injections (3 in 1, vaccinations for children), that caused so much problems for parents. Now they have added it in a way, and loaded it up to the virus. **This is how this virus is killing and it is so bad. Because this part (Cu) is connecting to the muscle tissue, (1:26). this part (Zn) to the lungs**. You'll see when the analysis from the Americans comes out, and the virus and the energy levels, we are 100% correct. **They create rapid genetic defects in the lungs, and that causes the death. I know how they made the virus and I know how they are using the antidote to kill more. As I said in the teaching last night, MIT has to be closed. It has become the center for planning mass murders in a biochemical and bioplasma technology way of the virus.** I raised the red flag on MIT years ago and it stands much stronger with this virus, because even **the study of how many people will die by using it, was done by MIT 3 years ago. According to an open study, they even forecasted that 60 million will die, and according to uncontrollable studies, 600 million**. I said to the Iranians it's a very nice time to play the game, isn't it, but we don't play that game. (1:28). Do you want the T to look after you, break off the sanctions, and then we'll sanction you for selling arms. Let me explain to you, for those of you who don't know, I know that many Iranians know**, the only masks, more or less, which can, at least stop the size of the virus from crossing through the masks, are made by the Iranian scientists.** They're called Nano masks, and there are about 14 or 15 machines like these across the world. It's developed by the Iranians, the Germans did the original ones, but mass production now in this size is by the Iranians. If you go to the news the Chinese Prime Minster and foreign minister, has called the minister, Mr. Nassy, some 48 hours ago, to guarantee and thank Iran for supporting China with the virus, and to make sure that the Iran factory made Nano layer masks are shipped to directly China, because they can't meet the demand. **At the same time, the same nation that is asking for support, has put a ban on everything from Iran in China now and outside**. I said, knowledge against peace, I wonder when the Iranians will become wise to it. There are a number of these machines in Tehran and there are 6 in China as we know. As I said, 'we boycott you and don't let you sell anything here, but can you help us to save our people with what you make.' No one will do this except the Iranian nation, even helping their own enemies. It's a shame to be a Chinese in that level, by the administration. Now you understand, **the Iranian culture sits by its word, (1:30). talk good, do good, and think good, irrespective of what happens outside, time will change**.
Any other question.

Q: **How do we access the STM, is it enough to wish for it?** K- Caroline disappeared yesterday to meet a veterinarian and she came back she was so excited is she on the line, I think that is the only way I can explain it. . … (1:32). .. As I said … when the veterinarian raises her hand in front of the horse and says, 'I wish you will heal and help', and they change. Caroline says to her because you have found the strength of the soul, and have strengthen the soul of the animal and through that he finds his own wellness. So you have actually understood the soul of the horse, you understand it to create that condition with it, through your soul. .. you should have seen how happy the veterinarian was, she was not aware of her own capabilities. We saw this with another man in Belgium, … he does that with the horse. (1:34).

Any other question?
We can reach any the soul, because all the souls of created things, have a link by dimension, with us. How many times have you walked into a position and said, my god why am I here, what made me to be here, and then you see the result, because the soul organized for you to be there for you to see or experience that thing. Then you think, 'I have done it', no partially as I said, **your soul, (1:36). guides you and your physicality rides you. And you, is something in-between nonexistence and existence, what is called, the man.** I explained this in a very scientific way …

If you look in **the structure of a nucleus, this is the field barrier, not a physicality, we don't have a physical position in it, in a nucleus. You'll find out, that there are many protons, we have many equal numbers of electrons, but the accommodator and holder of these two together, are those who, in the world of science have never understood, and we call them neutrons.** It's the neutrons, with their nonexistence, which creates the condition for, in a way, for these connections to stay (protons and electrons). Without them (neutrons), collectively, connecting to these, everything falls apart. (1:38). Each one will pull its own electron apart. **The neutrons are there to balance it even though they look, nonexistence. This is the same with those we don't see, your neighbors, the man down the street, the cleaner and the bus driver. The presence of their soul creates the balance in the soul of humanity.** This is what mankind has not understood. Why do we needed more billions, because we need these neutrons that in the future they become the new cells. **At the same time, at this moment they hold the gel of the atomic nuclear structure together. No creature on this planet exists for no purpose.** Maybe it looks that way in the dimension of physicality, but in reality in the dimension of soul, he is that neutron, he is the glue to keep .. you need so many glues to have there, to create a condition, to create a leader, to vote, to be what, to be Christian, to be, to believe, to create Christianity, Islam and the rest of it. Then you understand, why we say, why are we created here, why do we suffer, it's not the physical existence, it's the existence of that glue of the soul, of the existence. Even the ants "glue", counts in the totality if the soul of planet. When mankind understands this, then he will have matured to the truth about the world of the creation of his own meager position, let alone the soul, (1:40). **Then the soul of this planet has the same meager "glue" in the creation of the galaxies, universes and the rest. At that point, it is just a neutron, but when the energy of this (proton) is used and consumed, and this (electron) moves to another dimension to become another neutron, this (neutron) becomes the queen.**

Then you understand what is the purpose. Then you understand why that soul was put there. Then you understand why mankind history and life have been set. Man is ignorant to the truth of his own creation and that is the biggest problem. **His being correct (in conduct) counts, in being correct in time of need counts, because that is when the elevation of the soul comes**. (1:42).
Any other question?

In today's teaching, **I showed the secret of creation in the line of man's physical need, but he has to understand that existence in physicality is a burden, than actually a pleasure**. But it is for man to understand the separation of the 2 and chooses the time and the space, and the place, to convert and go through the transition if he wishes so. But **mankind has the same dimension, and should be able to return back into dimension of physicality when he feels so, but, in so many ways, it is done for fun, not by obligation**.
Q: … When **the spheres of M and G cross each other, they create a vortex, the sounds and images we see in our dream, or the sound we hear in our head**, these are basically these vortices, that we hear, the ones that cross. (1:44). We don't hear anything in our ear. Also you mentioned here, that we go into that vibration ??? so we go more in a way, we go inside to be more ?? but how about when the soul comes out, the energy of the soul comes out to the boundary, do we hear these vibrations or these voices more often?

K- It is always out, it's just at a weaker strength, we call it aura. It's always out, it's just how much we reduce the dilution of the field strength of the cells of the brain. If you go back into the history of man, a few times we have shown this, but those who have been witness to it, could not understand it. In time and the place, if you understood, when we say the position of the STM, which literally sits, when you eat, in your head. In the **mythical way, in the Chinese language we call it, Fire Dragon, in which the fire comes out. This is for those souls who matured beyond the physicality, that when they speak through the soul of correctness, because, dragons in the Chinese history language has a, carries good with it. So you wait to see, the light of the soul**, and there are still some who can reach that point. the condition, (1:46). this **brain, creates too much filter, they show the light through their mouth, what we call the fire. The same fire we saw with Moses, but the Chinese have changed it into their language, into a dragon**. If you are enlightened enough that you can see, and you see the physical dimension, the world of the man, the beauty of it, is that fire, if he understands it, that it comes from the STM. In Chinese theology or whatever they believe in, they transferred it to the fire of dragon. That's the fire of knowledge, the fire of existence, of the knowledge of the STM, not the physicality fire of itself. The Chinese changed it into a dragon, the Jews to a burning bush in the mountain. But in essence**, it's the interaction with the STM with the dimension of the physicality**. It's just a mythology, it depends, you can even put it in a candle, in a dog, or in a stone. It's the fire of the STM, not the fire of physical burning in a matter state. When I listen to Chinese try to explain what the dragon means, I say, my god they don't even know the truth. What's the difference. Because in original mythology the fire used to give a lot of knowledge, (1:48). but at the present time and culture all that has disappeared. As I said, the father is the same, and he decides

where to be and how to manifest himself and in what clothes, but the essence is the same. **You can extend the soul to become beyond the boundary, but it is already of a weaker strength, you see it's like when you have a central heating you put a blanket on top of it to radiate less heat out, that you keep more in**. But if you take one of the blankets away, it gives off more heat, but the heat inside is still the same, you just hold it, and the brain is that blanket, and it is controlled through the blood circulation. **The Cup of Life is that copy,** if you look at the, 4 of the fields in the Cup you'll see the same circulation as the flow in the body with the blood.

Q: How about **the hissing sound, I developed .. K- it's just you should understand, it depends on how much you get closer,** the closer you get to the wind the ?? knows ?? This interaction, because many people have this position, now that they hear this noise, they get so close to the dimension of the soul, that the physicality moves within the inner ear and the ear. You're expanding it beyond. (1:50). You are taking the blanket from inside, not from outside. Q**: In the morning around 3 AM it's noticeable**, but during the day, sometimes it fluxuates. K- Yeah, around **3 or 4 o'clock in the morning is when the position of physicality changes from the left side to the right. It's a transition time and you become more vulnerable to it**. It's the time when we dream, or we remember the dreams, it's a very fixed pattern in dreaming, for man, the condition depends on position of physical dimension and dimension of the soul and circulation of the blood. **Your cycle to repair is between 4 to 5 hours, from one half (of the body), to keep the other half**. The whole body, when you go to sleep, I explained this many times before, the body works this way. .. Half of the body goes to sleep full, the other half doesn't do, the brain works here, and the body is here (draws 4 quarters of the body). The first half, depends in some cases, even for left handed then right handed, we know more or less the same, when you go to sleep, this one goes low (to the lower half of the body) to do the body repairs. It's like when we go into emergency, and the repair crew comes in to clean and to do the other things. Then, during this time (the other half of the body) works full, but to support that, (1:52). goes on a lower dimension. Let's say, this side goes to works, you go to sleep from about 10 PM to 2 or 3 AM. It depends if you go to sleep (later), it shifts to 11 PM. That's why we follow a certain pattern because the body needs to go into repairs. Then around about 3 AM the position changes. **Now the other side goes into repair, while the one that just finished is alert and takes on the operations (of the body). And at that point you change, around about 3 AM until you wake up, at around 7 or 8. Both sides have to repair**. The side which is used less during the day by habit, goes into repair during the second phase. And this point, **when you go through the switch, when in a way, the STM allows to be more open**. Then in that position, if you hear a noise you most probably here it in one ear, it depends in which way the switch over is going, because now the soul crosses.

The Syrians have shown these kinds of waves yesterday in a video. It's very interesting when you look at it. It's part of the electronic, plasma warfare which is running, in the Middle east, and Iranian scientists, behind it, they are testing a lot of things. It's in one of the Persian Chats, … it's posted, you see the cloud which is there, and inside the cloud, (1:54). then high in the clouds you see waves coming in. It's part of the plasma T control. They have managed to video it, it's very nice. If I can send it to Rick you can see it, It's

advancement in T. … we know **it's part of the Pl T defense. .. It shows the clouds and within it plasmatic field forces. Iran has started showing the power of the T in a very rapid way**. They stopped being ashamed of what they own, and start being proud of how advanced they are, and this has been me, openly fighting with Iranian officials. We should show what we have. **If you understand what we call, (1:56). quick plasma energy release, it is horrendous what our brains can do with ourselves, you don't need this, you can do it with the body of the man. It's the first time we see waves in motion**, and can be seen in a very beautiful way. … Q: In one of the teachings, you were talking about black holes, when you have 3 unbalanced protons, and then you have the electrons, they are trying to basically balance themselves and the electrons are trying to match with them, they are creating that massive G field in the center so we can create that black hole, this was talk about the Deuterium, which has I neutron, 1 proton and 1 electron, where did the proton came here, was it like from a H, … (1:58). Send to Rick .. It's the first time we can actually able to see plasmatic field flows. This is what I explained to you, which **was used 3 weeks ago in Iraq**. If you are in it, you can't see, it becomes totally blind, it's a physical, fields barrier. **This is a plasmatic field, and you can create a pulse of it, and it works. If you look outside of the cloud, you don't see it, but inside within the cloud, because it's in different stages, it shows the compression and manifests itself**. This is how if you see that shadow, (it's disappeared) this is what the Americans can't get through. It (creates) a blind. And you can rapidly send it and cover a much bigger space, the cloud allows us to see it, (2:00). but we don't see it in the open plasmatic, but if you look at it, the cloud has a circle in its cell structure. .. we have to become more aware of the energy, than the matter, then this opens up a new dimension in the world of our own understanding of our own creation and many created things. Shows the video. If you look at this video, for the first time you see how the MG fields as a plasma are used, look at the clouds, just look inside the cloud and you'll see it, there is goes, the plasmatic waves. What you see as lines, these are plasmatic fields floating continuously from the central plasmatic reactor. It can cover kilometers. No communication, because there are layers of it. (2:02). If you go back in the teachings before. You don't see it the blue but only in the cloud because it shows **the compression of it as a plasmatic field, the space gap between the lines doesn't allow anything to penetrate. This is very much what we saw in the Caribbean Island during the hurricane. If you look at the space gap in them, they can change it in a compression way of the plasma that nothing can penetrate. You can throw as many missiles as (you want), it just takes them out**. And even if it goes in the more, the higher speed, it does the same. **At the lower speed it changes it to, Nano coating**. So it's an impenetrable situation. This is one of the biggest achievements of the Iranian defense T. **This will enforce peace**, you can see it as a shadow. This is a compression of the field, and it's on different strengths, bandwidth of it that covers everything. This is why the Americans could not communicate, and the ground force was literally annihilated. This is how it is, instead of keeping it continuous dome, they created a pulse dome, and it is there. They decide the strength of the pulse. You can see it very clearly coming up (in video), you can see different shades of the cloud, (2:04). as it goes through. It creates a total barrier, **this is how I told you, we captured the American drones. The new weapons T is obsolete**. As I said, now that we saw the Senate's situation yesterday, he managed to get himself off the hook, because they have nobody else, if they vote him out,

who are they going to put as the president next time around? He is the only one they have**. He will become arrogant in talking big again, but the limitations will decide very soon by the others, then this, what I call the barking.** You'll see the rhetoric and all the games of the past months that he reduced, because he was trying to keep the Senate members happy, 'don't bark until I get through.' He did this before in his elections. Once he got through he said, I have nothing to do with the party, I am on my own. But they had no choice because he was already in. It's the behavior of the man. ..
Can you ask your other question please.

Q: When you were showing about **the black hole and you were showing the 3 protons, which were not balanced, and in not being balanced were, basically rotating. And there were 3 electrons outside that were trying to match with these protons, so they were creating 2 rotations, and also massive G fields**, and which is the same as the black hole. But then the talk was about Deuterium, which has only 1N, 1P, and 1E. **I can't understand where the third proton came here**?
K- What do you mean the third proton? Q: Because there were 3 protons in the center, they were trying basically to balance each other. K- **Yes, but this is what happens in the womb of the mother**, if I understood you correctly. (2:06). In the womb of the mother, **you have an egg and a sperm, they come together, the third energy comes from the interaction of the 2. And this now creates an imbalance because it wants to feed itself, and takes energy and creates the other cells by its division**. This is how nature works. This 2 when they share, **trying to come together, and if they are of the same strength, they create this common denominator shell of energy, but this shell is so weak that he tries to feed himself, but these 2 are in a strength that cannot match, so he takes from the energy of the womb of the mother. Now it becomes 4. The division** comes this way, and it doesn't matter how you do it, when it comes to the point of multiplication in several billions, then it decides that I have too much energy, which I don't want to do (have), what am I going to do. **One of the cells positions itself to get rid of the energy, because that's the way he finds his position, and we call it a kidney**. The **natural process of the physical body, is the same anywhere in the U**. A disposable unit, and storage unit, and whatever you call, recycling unit, and one central control. I'll take you on the Mars it is the same, if I take you planet Zeus it's the same, to Earth it's the same.

Q: **Is it the same as what happened to the One Cup One Life? K- Exactly, I have given you .. you create, for the first time man creates, if you understood the teachings last week. You are used to having a baby in your hands and calling it a creation of yours. I gave you a Cup, which has life, (2:08). that's what you create, a soul**. You haven't even understood what I gave you. You are used to seeing physical life within a womb of the mother. I gave you a life in a Cup, that is why it's called One Cup One Life. And I said, it saves a life, and you haven't understood exactly what it means. I tired to explain this in the teachings of the past few days. This is the Cup you carry (draws Cup), and this is your man, and the STM (draws a man with soul), that Cup feeds your soul (line from Cup to STM). **Because it has a surplus energy of continuously creating. That is why you overcome any disease or virus, because a virus is energy dependen**t. You are used to seeing your creation coming out of the womb of a mother, a

woman. I have given you the chance to see the creation of the soul with your own hand, that it feeds your soul and elevates your soul, and then that elevation allows you to overcome any other energy, which you call it a virus, genetic, or whatever you want to call it. **The beauty of my knowledge is that I know so much that I can make it so simple that even an infant can understand, and that infant is man himself**.

Q: I have another question if you are finished here. K- I never finish, teaching is nice to share. (2:10). carry on. Q: **We can use the salt in a way to lubricate, expand or compress the fields, I was looking at the Periodic Table going form Ca to Fe**, is like adding to the atomic weight, I couldn't see a pattern how I can use the Periodic table going through, is there a pattern that I can follow? K- Yes, this is what I explained may times .. The problem is the pattern of your understanding, nothing else. What is Mg in the P Table? What is K, Ca.. anybody know? … (2:12). Na is 22. Mg has 12 atomic number, K is 39, Ca 40, ?? 24, and Na 22. .. if you go with the Ca, K, Fe, >> Na = 22, Mg = 24, K = 39, Ca = 40, **Fe = 56**; (40 and 16) . the gap is 1 O, … but if you understand the Zn, the **next cycle here sits around 72, then you see the relationship, but this is in a matter state. In Pl state, you go 56, the 10 or 20% up and down, (2:14). and when you come to H it's up to 50% up and down, you get about 15, so if you take 56, at 20% you can see that you come into the isotopes of Ca,** because this (Ca) has the same 20% up and down too. **When you have these points is when you see interaction and binding, and creation of Fe, and connection with hemoglobin and the other things**. I have explained this years ago. It's very clear, if you work not only with 56, it's a guideline, but when you go with the Pl, as I said, **the Pl vibrates so you have a bandwidth, the same as I explained about the sun going up and down by millions of kilometers**, it depends where it is, here or here, it has a peak. Q: But when you hit Ca it becomes bone, which is basically closer MG field together, tighter, and then when ..

K- Yes, but, but, **why does Ca become solid in the body of the man**. Does anybody know why we have Ca as the body of the man? **And why does it stay when we die**? Man hasn't solved this mystery yet. Why doesn't our muscles or heart get left behind? (2:16). But the bones stay behind. Q: Isn't it because we come from the planet earth as part of the earth? No, nothing to do with that. Go back to the teaching, in the understanding of Deuterium, C6, that **C6 is a physical matter that we see. But C6 in a different dimension is a diamond, and in a different environment condition becomes odor. Now the strangest thing happens, that Ca at a given strength, sits within the heartbeat of the earth, which is around about a frequency of 7.5. If you go by multiples of the C (7.5 x 6), it's about 42** to 45. Then you see where the Fe comes to that range, and Ca becomes bone of the man. It's just happens to be. **The structure of the physicality to solidify, has to do with the heartbeat of the earth, which converts. You saw those waves going through (the clouds), and you see them a certain what we call, plasmatic fields, that is exactly what it does. It's the earth's frequency which dictates C, nearest to its combination, which is the Ca in matter state, which confirms and converts into matter state, (2:18). and it becomes bone.** If you **take (away) that frequency, you'll have no structure. If you go further, higher, this is why astronauts loose weight in the space, because that frequency is lower and weaker in the strength. Man in deep space will have no physicality, that's why he has to rely on**

his soul. It's just a gel, (splat). The heartbeat of the earth dictates this bracket here, which is what we call, the Ca manifestation. **Not all Ca can become, this is a specific (type of) Ca which carries a specific field interaction, of the Fe, allows Ca to be converted into solid state. That is why in the creation of, in every cell, Amino Acid (AA) you have 1 Ca as a seed, without it, you don't have life. We even find the field strength of Ca in hemoglobi**n. Those of you who create Gans's should have noticed that by now. **There is a specific salt content conversion, which leads to creation of hemoglobin and certain combinations of it leads to the solid state of the physicality. If you go back to the creation of man on this planet, it came all because of this. Certain combinations with the frequency from the earth lead to solidification in a plasmatic condition, (2:20). of Ca, and very much accidentally, at the same time, the same thing happens with the protein coming in, and they linked up, the hemoglobin, and that became the beginning structure of life.** A freak of accident of the creation. And physicians will see **in the systems to come, I can create man with a bone, a brain, and muscle, because we know the secret. In the majority of the time, when the heartbeat of the man reaches a fraction of the multiplication of the heartbeat of the planet, man dies. It releases the soul.** (Q: the ?? in the container) You will understand. **The creation of life is the same wherever you go, if you understand it. You give me the right salinity, the right protein, the right condition of the field strength vibration between the Ca and the waters of the ocean and the Fe. (2:22). As it brings that field strength through the hemoglobin, it is inevitable to create Ca bones. There is no other choice, and then that structure tries to find out how he can build it at the level of the body of the man, the fish, or whatever, according to the salt, the position, manifests itself. The creation of life is so simple. I can make a man while you are watching it, you don't need the test tube. It's just what soul do you want to put in it**. This is what I showed to Mark in Barletta when I started teaching **how to create brain**. If you understand this, you give me the skull, I'll give you the man. **You give me the skull of Christ, I'll give you the man as Christ,** but go and find his real physicality. **It's so simple, it's done everyday in the oceans of this planet**, it can't be that difficult, it's just that we never understood it up to now. Have you ever tried to **make a spaghetti with a different length and thickness, and say it doesn't taste good** or it's not the same. Because Italians measure the thickness, width, and the length of the spaghetti for a specific sauce they create, to fit that. (2:24). When you change the sauce for a different spaghetti it doesn't match. It's the same, **you have to have everything right in the oceans, and if you understand it, you can create life. I can create you as many life's as you like, with or without bone, or use Mg as a bone, to become C as a bone. I tell you, that when you go to a position in the U, then according to the condition of the position, you create the life to fit that. It comes from the heartbeat of the center of the plasma of the planet, nothing else**. It's a whip cream, you put the speed you like on the whipper, how thick you want it to get. It's very simple. Now maybe today you understood the secret of your creation.

.. Q: Alzar back to the noise and the frequency in the head, what about the color? K- It all depends on what you rely on for confirmation of your own existence. Color, noise, whatever, it's you..

You see the problem with you Alzar is you are trying to confirm your own existence continuously, but you don't enjoy the existence you have, because if you do you will reach your soul. Chasing it to confirm it has become the biggest problem for you. You go anywhere to find it, but it is within you, but you don't realize it. Color, noise, different temples, materials to take or swim in, or whatever. Look within you will find the soul. (Brother says: I hope she listens.) (2:26). Shall we take her passport away again. Alzar, you need travel to travel with the dimension of the soul, not with the flight of the airplane. This is what the secret of creation is.
Q: But also there is a problem here, connection with the Fe which made the blood and made man to start killing all the entities .. K- Yes, because we connected that same life of this blood, with the hemoglobin, with the existence that we kill for. We don't eat the bone and leave the flesh away. We go for this, hemoglobin, and its conversions which are added to the Cu or Zn or whatever. If we understand this, man or animals will stop killing, this is why one of the main things we introduced was the creation of the ZnO and CuO, is to elevate the soul of the totality. You'll understand very soon, what we are playing at and with.
Q: I noticed you didn't mention CH3, because it takes care of the physicality and emotion, of the connection of the Cu and Zn. K- Yes, but what is a CH3, it's 15 isn't it (C=12. H=1), if you put 4 of the CH3 in a structure what do you get? Cu. It (the CH3) is not only 15, sometimes it's a higher energy of 16, of the (2:28). the C energy (Cu and Zn), and now you understand why man uses CH3 as sugar, because it's a combination of feeder. My students, you are so ignorant of your own creation, that is the problem. .. **Q: If you add one more thing to the CH3 then we don't need to eat, and I think I found it? K- No, no, that's not it. If you find a link to CH3, it's different, then adding the link. . … … Q: If you take all the food we crave for and we like and we take the energy of them and add that to the CH3, then the emotion and texture of the food and all these things are solved too. K- Good morning.** Q: I found it, thank you. K- **Now you understand when I tell you, when you go into the Enhancement Unit (EU) it will feed you, repair you, it flies you, it does everything you can imagine**.
Q: Thank you. K- I can feel the smile of the soul, Hassan. (2:30). The joy of knowledge is the most beautiful joy. **Alzar you had better speak to your brother, you might find a bridge.** Alzar - I will. Any other question? Jalal, maybe the soup Caroline fixed yesterday worked very good? K- For who? Yesterday she fixed a bone soup. K- I don't know we already reached there. there is a story about this bone, the richness of it, it depends on what it reaches. .. What Jalal is referring to is that we had a marathon teaching or discussion, what we call a fireplace talk or chat. sometimes on Weds, it went for nearly 8 hours and then everybody gave up. because it was too long. (2:32). In these discussions we learned a lot. Sometimes we learn more in an informal environment. .. I call it a grandmas and grandpas meeting. ….
Any other questions?
Q: I **think we can also create a One Cup** OL by using several individual Gans's, if it is right can you give us the percentage of each of them. Personally I think **I can do it with my soul**, is that right?
K- Maybe if I can answer. At one point (in the past) when the maturity of the knowledge of the man reached the stage we are trying to take you to, but this time we are doing it collectively. In response to what you asked, (2:34). **You put the Cu, Zn, water and the**

salt and you created the soul, now if you understood that, and if you understood the discussion of today, do you need that Cup, salt, Cu, Zn, to create that soul? Or you can use the salt, as a field of the U, the Cu as a field of the U, and create that soul in the palm of the man to hold. Then if you understood that, then if any of you can achieve, then hasn't that become the **Adam and Eve**. If you go one step further, hasn't that become the Creator and the man? **Do you need the physicality to confirm the existence of the soul, or can you create that soul, in the dimension of physicality. Then the truth comes, has there ever been a Virgin Birth? Or does the virgin purity come from the purity of the STM, in understanding the level of his own creation, not the physicality of the birth of the virgin**, but ??. Man, as I said, is like the Chinese Fire and Dragon, and the mountain fire or burning bush with Moses. **You have to understand the essence, not the myth put around it to cover it, (2:36). that you never see or understand it. Then it comes, if I have created this soul, do I want it to be me, and an image of me, or did I create it that I can confirm that I can love, I can nourish, and I can protect**. Then it comes to the point of, when I have such a love, and I want to give to somebody else, another soul, **would that soul have same giving (as me) to create another, that between us, we create the child of the soul, by interaction of the two. This is how life started. The physical life never started in the dimension of intercourse. The life in the U started with the interaction of the fields of no matter, but in the dimension of the plasma. Then you understand the secret of creation. You need to have a salt. Look at this planet, salt flows everywhere in the shape of a cloud, so this planet is like the Cup. And the materials flow created in the upper atmosphere, fall down, you have your Zn and your Cu, so you already live within that Cup, and you just need to put the soul in it. Then we bring the souls we are in love with from other dimensions with when we travel**. When you go from say, Turkey to London, what do you do, you call your lover, your girlfriend, and say, come over it is nice here, we can be together, and she comes over. Then what you do is so nice, an accident happens you put too much love in it, and there comes another young soul. (2:38**). It's the same, we passengers of the U carry a matching soul with us. We have been in love long before we understood the love of man. Then what do you do, you bring your love home to give it the physicality to love, and to create offspring's that you can create a new life. As we say, hello my friend, we meet after a long time**. When you go to the airport and you welcome the love, what is it? It's the same love, but now you have brought it to be with you. If she is a doctor or a princess it doesn't make any difference, when she arrives she is a lover, and carries the knowledge which comes with the physicality of the man in the dimension of the soul. Man has got a lot to learn, and man misunderstands it due to the lack of his own knowledge.

It's nearly 12 o'clock. I think today **we opened a new dimension for many of you to understand, and for many of you to understand what is to come. (2:40). And for many of you to understand how the end of kingship and leadership, is about to come to an end**. When it rots from inside there is no enemy, when you try to rot it from outside, somebody has done something. This time everything is rotting from inside, because the feelings of peace have to fire.
Any other questions?

Q: By **changing the current** from the decreasing battery we modify, we widen that spectrum of Pl fields in the Cup, (2:42). I have **a combination of a number of coils, in the Cup I have a palate of different Gans** … how do I know how to use only a certain strength? **K- You created it, you understand it. … You are the creator of it, you have to decide what you created. Some of the people are harvesting yellow Gans, some brown, green, blue, some don't create any blue, or just a shade of it. They are all afraid there is not Cu in it. But they are all strengthened in conjunction with the Cu you put in, so it depends on the strength which is added, or what is. Then if you leave it aside, after awhile they all go green, as they have more reaction with the M field of the earth. Don't forget the color you see in the Gans, is the color which the interaction between the plasmatic M field of the earth and the (fields that the) Gans creates. This planet creates blue, there it creates green, so it's understanding this that is part of it. If it is slightly higher energy, then it doesn't give its energy to the level which is the core, center of its Cu, it will be different colors.** But then it becomes green or blue, and again it depends what O rate you .. are you creating Cu2O2 (2:44). or are you creating CuO2, or CuO3, Cu3O2**. Some of the materials created in the combination, in Gans as an energy, you can't attain it in theoretical physics. I can. But as an energy they exist, then as they give their energy to become balanced with the atmospheric condition they become green**. You should have understood this by now. R- Some people are experimenting with different voltages and amperages .. and .. K- Have you seen the guy who is boiling it? He has put so much current in it, that literally the plates are boiling, he is cooking it. .. R- I asked them what was their intention with this particular Cup with your own variations. .. Just to play with it to see what would happen … Is that a pure enough intention to begin with, to put into the experiment, (2:46). just to do it for fun?

K- Do it for fun. God did that and see what He made, called man, you never seen what might come out. R- This is what I wonder (laughs) . .. we don't want them to hurt themselves, where is the discernment?

K- I was talking to one of the world's leading heart surgeons ... he said to me, how long does it take me to learn this? I said, **give me 3 days and you'll become better than me, because you know the work of the heart better. In 3 days I'll teach you everything as a heart surgeon, he is one of the world's leading heart surgeons. It was amazing to hear his voice, that with all he knows, he understands that there is more to learn**, and he is willing to learn because he can help his patients. These are senor advisors to governments and then they understand, when they are enlightened, there is more, and then they carry the government with them, with the new T. It's like tomorrow, the Conference in Mexico, we are not there physically, but I think over 12 Ambassadors and embassies, maybe up to 20 have announced will be present… (2:48). The governments have become open to understand that there is a need to go. This is what I told you, we started with a little in Vienna and now when we get to Tehran Conference more or less every nation's ambassador will be present. The amazing thing of it is, they will accept the condition, **and if Ayatollah K of Iran brings that transition of bringing the religious leaders to Tehran at that time, we'll have the physical and soul leaders in one room to decide the future of the mankind. And as Messengers we are present there to support to bring the change.** We have invited many people to Iran, to be ready on a stand-by, and those of you who want to see Naomi, hopefully we can get Giovanni to do

it, she has been invited as a guest to Tehran conference. And many other KF supporters who have brought change will be present. We just have to see how we can get the blonde there (? Trump), that is the biggest problem. Peace will overrule the pride. **The biggest card the Americans played was this card of virus and now that will go through, and now even that, has been disarmed. With that (the virus) they thought that they would overcome. They had plans to use this on the Iranian nation. (2:50). And now we have unfolded that, the terrorist activities of a nation, again. We saw that they tested it on the Chinese, then that was to bring. But in Iran we are ready, able, and we'll face it. But the thing is, sometimes these experiments go wrong, and turns back, like that missile, and I hope they can take it, when the virus changes to American blood. This is the biggest game they started and they have already lost, before they start. They became so desperate to win, that in that desperation they shot themselves, literally in the brai**n.
Any other question?
We wish the Conference in Mexico City all the best tomorrow through Sunday. We are there to support the world ambassadors, and the scientific core of the humanity. The head of the KF, Ella is there, which is the most important part as she is taking over, one by one, the responsibility of running the KF. (2:52). I wish her all the best, as I said in another teaching, it's time for the old guard to step down and bring those of the younger age to take over and guide the next generation in, as long as we are there to support and not to dictate. We'll see the changes coming in, there was a lot of work put in to this, and as we see the old guard still tries to hold on to their power. You have no power, ?? But this shuffling of power in the KF has to stop by one or two people, because the only thing is to wipe it out. This should not be done this way, by those who set up to be around the KF. We see it and we have to give support to the head of the KF. She is one of the most capable people who runs and has managed the KF for the past 3 years. Now we see the rest of the structure of the KF coming in, and you'll see more presence on the world media by the KF in the coming days as it is getting structured and planned. We have brought in experts in doing what they know, and you'll see new divisions and sections in the KF, new international sales team which is set up together, … taking global structure. .. by the end of this year we'll start governing through understanding of the knowledge and T. (2:54). as what we call, political governing has already died. We'll see what comes up … it's a child in growth and developing, and it needs its own understanding of the knowledge and T and .. growth of the man .
Tehran conference ..

(2:56). **One of my biggest wish is that the International Sepah will be established in the Tehran conference, that the world leaders put control on the arms collectively that no arms crosses borders.** .. This will be one of the proposals in the Tehran conference and other ones around the world. **We'll see opposition, extremely by the Americans, but we have systems to cover this point, we have foreseen it. It's very simple, do you want to be a human, or do you want to be an American. Do you want to be a man or a murderer, it's very simple. The American nation has to decide, how the humanity looks at them, because they never stood to understand how they're looked at from outside. they looked so much inside, that they believed all the false**, fallacy of ?? We'll bring the Americans to understand about themselves, then their

leaders have to follow, the way it is. **It's time for a woman to lead the nation into peace. We support that motion head**.
Any other question?
(2:58).

Shall we call it a day, There is a lot of knowledge in this teaching and I think this year our anniversary 6 going to 7th. Try to understand the meaning of today's teaching, we have set a new course .. (3:00). more in research , we had to put a seed down to start to measure the individual strand of the fields

.. Thank you very much. I am sure a lot of you will have a fantastic time by next week when we meet, it will be on the eve of Valentine and I hope mankind is prepared for it to be a Valentine for humanity ..

(3:02).

315th Knowledge Seekers Workshop - Thurs, February 13, 2020

SUMMARY:

The teaching starts with getting an update on what is happening in China concerning the Coronavirus. China is part of the KF family and we have to know what is going on there and we want to hear the story from Knowledge Seekers (KS). The head of KF in China tells what is happening in China. After the New Year we were supposed to go back to work but the controls are more tight now. In general the cases outside of Wuhan have deceased everyday for 1 week, but the cases in Wuhan, are jumping to 15,000 that is because before there was a lack of resources, before there were no hospitals. (They started using the newly built 20,000 room hospital.) The Traditional Chinese Medicine (TCM) are being used and having some good effects. But so far they don't have an effective medicine for the virus, even though they say they have this American medicine, but that there are a lot of, or some side effects from it, so we don't know yet. She was asked what is the situation with promotion of the One Cup, One Life (OC or CL) on the Internet. She said, an older Chinese older institution, a university allowed them to publish the OC on their website, and also on the "We Chat" platform, but unfortunately we are getting attacked by a lot of people that don't believe it. Then in one of the big universities, a professor in the department of Chemistry wrote an article saying that our technology is fake science and is just a primary chemistry experiment. So then a lot of the news on the

Internet starting saying that we are fake, etc. etc. We met a lot of problems to promote the OC. She was asked what is the position with the government and the military? She said, we have actively approached the government and military side and have sent signed letters to the president and the prime minister. When we delivered that documents they said they would pass them on to the health organization for evaluation. The health officers tried very hard, but it is all being sent for evaluation. We are waiting.
Mr. Keshe asked, what is happening with Shanghai hospital? GL- They said they are going to accept it and maybe now start some cases. One of the TCM doctors is trying to mix our Gans waters with TCM herbs and he feels it could be very good. He says he has already managed to heal several light cases at the early stage of the disease.
K- What is the position with the KS? GL- All the KS are producing more and more Gans and teaching new comers to make their own Gans. We have about 1,200 people in the group on how to make the One Cup. K- What is the position with Tencent News. GL- That is funny, right away the One Cup video peaked and reached more than 10,000 views in a couple days, and then the Tencent news said that the One Cup was the solution for the virus. But then on the second day, after that University Chemistry professor said that it was a fake science, it has dropped, and the news started saying that it is rumored to be a fake science.
K- But did they take it off or is it still there. GL- Yes, it's still there, but the rumor that we are a fake science is spreading more and more.

ENGLISH TRANSCRIPTION:

(: 06). I think we are more less entering our 7th year of teaching. It's nice to see a lot of things are taking shape. I **see Guan Lynn (GL) in the background is with us, she is the head of the KF in the whole of China, and it would be nice to know what is happening with the One Cup One Life (OC or CL), and it would be nice to hear from our Chinese Knowledge Seekers (KS). Guan Lynn would you like to speak.**
GL- Hello Mr. Keshe it's nice to meet you. K- Nice to talk to you, at least you are still alive as I say. GL- Ha, ha, I said the God always look after me. K- No problem can you explain **what is happening in China now, what concerns the KF and the world, how do we see it in China. What is the position**. You'll have to translate on both sides while you speak because they are waiting for you on the other side to translate as well. GL- Okay I understand. (she translates to Chinese) Do you want to know about One Cup and the whole situation? … K- **Yes, the whole situation, China is part of the family so we have to know what is going on. (:08). GL- After the New Year we were supposed to go back to work but the control is more tight. In general the cases outside of Wuhan have deceased everyday for 1 week, but the cases in Wuhan, it's jumping to 15,000** that is because before there was a lack of resources, before there were no hospitals. … using the TCM and having some good effects.
.. **So far they don't have an effective medicine for the virus. Even though they say they have this American medicine, but that there are a lot or some side effects from it**, I don't know yet. (:10). TCM has taken more of a role in this, .. having some effects…
.. most of the factories are still not open…

… now my
now my community is locked down, one person in family can go out to buy food. Only 1 supermarket is open .. (:12). .. With **the One Cup we had some cases reported that were successful. We managed to find one lady in Wuhan city** after we published One Cup, One Life, her mom now is recovering. At that time she called the emergency car to take her mom to hospital but no hospital of 5 would accept, and she had to move back home. Almost in despair she heard we had the solution and she wanted to try. We managed to get a volunteer to make some Gans for her, and to deliver to her, she started to spray, fed and try the breathing a little bit. But most of the time she just sprays the body, because she doesn't dare to drink much. Also her mom's lungs were damaged so bad she needed oxygen machine to support here breathing. She strengthening when she tried to change the filtered water with our Gans water. She said, her mom still can't breath. (:14). so they stopped. But all the family tried to drink something, but mainly just sprayed the face and mouth, lung and back of body and all the furniture and the environment of the house. The second day she managed to find a doctor to give her mom Traditional Chinese Medicine (TCM), she managed to feed her mom TCM and now here mom is almost recovered, and she is hungry, can get up, walk and go to toilet by herself. Good news she is recovering.
K- **What is the situation with promotion of the Internet with One Cup, One Life.**
GL- We have help from a Chinese older institution with ?? University they helped us to publish OC on their website, and also We Chat platform, but unfortunately we are getting attacked by a lot of people they don't believe. In one of the big universities, ?? Qing Hua **University department of Chemistry, a professor wrote an article to say that our T is fake science. (:16). He said, it's just a primary chemistry experiment and then, the Internet has a lot of news to say we are fake, and bla, bla, So we met a lot of problems to promote.** Also a KS tried to spread the information in some groups and they get kicked out or they get cursed with dirty words. And even the police warned them, not to release this kind of information. Actually we feel a little bit frustrated. Although we have the good heart to try to help the nation and the people, but since **the T is not being accepted by most of the population. K- What is the position with the government and the military. GL- We have actively approached the government and military side -- we signed the letter to the president and the prime minister, then when we delivered that document they passed it to the health organization, and asked them to evaluate**. We also approached the health officers and they tried very hard and then they said they will send it to the experts to evaluate the T. We are waiting.. (:18). K- What is happening with **Shanghai hospital**? GL- They said they are going to accept that, maybe now they're going to start some cases. The newest information they don't want to try, but to mass apply, in Shanghai hospital, for some not so serious cases. Because one of the **TCM doctors is trying to mix our Gans waters with his TCM, and he feels it could be very good. He already managed to heal several cases from light cases** at the early stage. He is confident to move ahead with our T. We have 2 hospital is going to try. .. K- Don't mention names because you have to keep it out of the way. What is the position with the KS? GL- **All the KS are producing more and more Gans and teaching new comers to make their own Gans for the first time. … we have about 1,200 people in that group how to make the One Cup. K- What is the position with Tencent News. GL- That is funny, right away the peak of video One Cup reached more than**

10,000, in a couple days. Then the Tencent news said we have the One Cup solution for the virus. Then because of this University Chemical professor said this is a fake science, then the 2nd day, the Tencent news said this is a rumor it's a fake science. We don't know what to say. K- But did they take it off or is it still there. GL- Yes, it's still there, (but) the rumor that we are a fake science spreads more and more. That's a very pity. K- How is the population taking it? (:22). GL- Some believe, some not, but I think most of the KS are coming back because they apply this T for many years and know it works. We have a program to collect signatures to show to the government that thousands of people have already applied this T to help people. **Why this Chemical professor who knows nothing about Pl T, and he said it's a fake, and all the news accept it, that is a strange thing. K- So one man has done that, because he is a professor he has done that**. GL- In China people believe in ??, in the professors and the University, that is normal. K- Any other news? GL- No, some are asking for the (simultaneous) translation. … (:24). … (:26). (:28). ..

checked to here …>>

What is the position of the KS in working with the government and military? GL- We don't know yet .. some KS, (:30). with an officer, health official and an academic person to set up a company and want to mass produce Gans, they want to reach 1 ton per day. We don't know how they are going to do. They say they have some projects already in Wuhan city, to do the garbage collecting, and they have the products to be applied. Since the have applied, and some tests were made on Gans water by a Beijing testing organization, and they said, the Gans water is very effective for killing the virus and bacteria, so they are shipping the disinfection products there. K- with the military, you mean? GL- They mentioned but nobody knows who is who. K- But have the KS started collaborating with them? GL- we don't know. Because we were told them, if you want to do mass production the KF can help the government with it, but since these guys think they can handle it, they refused..
K- How is the population feeling? (:32). GL- I don't know how to say, in different places they have different feelings. They'll changed the head in whole of Wuhan provinces. They changed the head of health administration and disease control center, because the central government sent a group there. K- How are the people feeling on the streets? GL- Nobody is on the street, the Chinese very much follow what the government says, and they don't have an effective way to control the disease, so the best way is nobody go out. K- the whole nation is shut down? GL- actually yeah,. K- The factories? GL- they are not allowed to open, even I told you our KF factory. ?? .. the local government doesn't allow them to produce. K- Until when is this going to happen.? GL- if government thinks they have it under control they'll start opening. K- But when? (:34) GL- nobody knows, God knows only. K- So in each area you only have 1 supermarket open more or less? GL- yeah or another one .. pharmaceuticals open . K- What is the position of government in respect to this? GL- there is more of a sign military will get involved in that area. K- Do we have any other KS from China online.? (:36). .. Asks in Chinese if any one has questions.

(:38). Q: Are you cooperating with the Chinese government? K- to GL do you want to answer.. do you want to disclose or not? GL- I think we are trying to do a lot of different things on different levels. K- You are very diplomatic. … Q: Is the KF have the idea to call volunteers to go to Wuhan for antivirus? GL- I don't think you can do, that is army controlled. You can't move 1 step .. (:40). Q: ?? adding chemicals to prevent from being solid, if that impacts the Gans? K- it depends what chemicals they are. ?? … (:42). Any other questions. K- How do the KS feel in their own places? Chou how is the feeling in China from your side? C- very serious situation and the Government is controlling everything. … now some professors want to have a try and do some tests by themselves. If we approve that (:44). … many people know that the present science can't handle the virus, probably some will try the Gans T. K- what is your interaction? C- one professor was interested to test effect of Gans on viruses on plants .. some other researchers form the traditional plasma T are getting more interested. .. (:46).
.. people are locked inside .. K- Do you se people on the street or they just go to the shop and come back home? C- no people on the street. K- Do you see an end to this? (:48). C- I don't know, you said the virus will be dependent on the environment, in April the situation will be better. we might need more time. GL- Most of the people say they have been locked at home for 3 weeks now. A lot are asking more technical details about how to make the Gans. .. Q: Some say it's very slow to make the Gans, 7 days, (:50).

Is the Potassium hexanofeirrite?? to the salt. they think it is damaging the health. K- no what is the chemical binding of it, does anybody know. Rick can you find out on Wikipedia …. (:52). .. Potassium Ferricyanide .. (:54). R- reads Wikipedia for Potassium Ferricyanide .. bright red salt … K- by looking at what is in it, this material is actually, is compounded structure, field structure, It's a safe structure and actually it's beneficial due to its K and Fe, if you use it as a Gans compound it gives you, (:56). a very good a very good position, especially psychological and emotionally. This is a potassium positive plus C with ion, which, in the Gans state the K, is especially now in this situation where there is a lot of psychological pressure. It has a double effect especially when it touches with the NaCl salt, which gives you, it's effective both ways for, as a Gans of it, effecting the body and enhancing it too. If you have such a compound in a Gans state it is highly beneficial. Don't have any worries, because all the combinations of the materials you have, the K, a high level of K which is highly effective in emotional conditions, (:58). and a Cl in combination with K which is, actually a bacteria killing agent, which is created by itself in releasing Na, for itself, for its use. This as a Gans state, as you have in the salt, is actually a beneficial thing, it brings a lot of emotional stability, and with it, it has a compound with AA, and Cl. Don't worry about it, it's not a problem. If you have it in your Gans, it's beneficial for the bacteria side of the infection. Can you hear me … (1:00). repeats that this is a beneficial compound especially in the Gans state. …

Q: (What is) the method to use One Cup to create life. K- Yes if you can do, yes. Q: I think they want to know the way. K- I think China has enough population and don't need to add another life to it.
Q: What is the way to make a big amount of AA? K- The only way you can make a huge amount of AA is to use a bigger pot, bigger surface, and regularly clean the AA from the

top. You have to look at your salinity that it always stays constant. (1:02). I have taught this before, a lot of you KS, what you don't see is that … When you make your boxes, and you collect your CO2 at the bottom, in your water, when you have, with your AA on the top, this CO2 which you collect at the bottom has a combination of the O2, you create between your plates a condition of the C, which takes the O from the water, to create with the CO2. It takes in some of the C and O from the atmosphere, (1:04). after a while you might see at the bottom of your pot some white materials, like bone, Ca. And you'll find the salinity, the taste of the water here (in box) will become sweet, it's not salty anymore. When this salinity, through the change, through the production of CO2 takes place, the AA production stops. It's the combination of the AA and salinity, and the change in the O creates the CO2 , which does not sustain the fields for the C to be pulled from the atmosphere, and you stop production of CO2 and AA from the atmosphere. (1:06). Depending on the temperature of the room, and the C and the salinity, you see the production of the AA changing. If you are not producing much CO2 you can't produce much AA. If you produce CO2 in a closed room, your production of AA is much less. If you live in a city you produce more AA, in a rural area less AA and less CO2. If you have a circulation you produce more CO2 off what I call air flow. The air flow has to come from outside and not inside the building. I mean atmospheric, not room area, you can't put a fan next to it to increase it, the air has to come from outside. If you have a lot of plants in the house and many people, you produce more CO2. If you hardly have any plants and it's just 1 person in the house, you don't produce that much CO2 to be absorbing, (1:08). because the field is in the container, so there is no C to absorb. In the environment when there are many plants or trees you'll find that you'll produce a lot of CO2 after 4PM in the afternoon until the early morning, and during the day you don't produce that much. You need the flow of the CO2 to be able to absorb the AA fully.

Q: Can you talk about your point of view of this virus in China and what we can do as KS? K- The point is, as you know from this academic (Chemistry) professor, who is paid from outside to do these articles. You have to understand, there is a clear pattern coming up, (1:10). and we have raised our concern with the Chinese government. If we look at a very clear data, (Rick to put up this data). We have a lot of concern and we'll explain to you what is going on, as you have seen with this academic professor, coming up with this (article), we'll tell you, the background behind it, and this situation has to be resolved very soon and we'll resolve it very soon. We'll bring it to public especially, that's why I let GL to explain the situation to you what has happened in China. I want to show you something, this is in the hands of CPC, it's not something which is hidden, it's public knowledge but I want to explain something, this is up to now the latest, I want to explain something especially for Chinese. .. (1:12). What is interesting and I deliberately allowed GL to explain what is happening and why this academic has put this out. A lot of the academics are paid by the American organizations, many of them, to block anything that comes in, except American medication. They are putting a lot of fake, because they are academics and are being paid by the American accounts to put these things out. To block any organization which comes with anything. In the future we'll check and let you know what is their position. There is the biggest fear in CPC and the Chinese .. There is a huge concern, that's why I said we are talking to the government in the background, many, many academics are American trained and they have a voice and they get paid in their

American accounts privately, are blocking anything that comes in, like KF, and to promote the American injections. What we have seen in part of the American injections, are that some of the patients after receiving the injections feel good, but a few days after they go home they die of lack of oxygen, up to 20%, and we have seen a couple of cases like this which have come up, but the rest they just die. GL can you explain the cases on this. (1:14). Can you explain about the drivers who died of lack of oxygen. GL- which driver? K- The people in China who die with 20% oxygen level. GL- Yes, if you said that because most of the patients die because of, less oxygen level. This graph on the screen is a horrendous picture to look at, KF and some international organizations, we are monitoring this. You have to understand that KF operates not just in China but across the world, and we have close contact and operations with a lot of scientists, which we never bring in public, Because of what we have seen done by the hooligans in Belgium, they've killed, and they kill, so we protect the scientist. If you look at these figures, they are all Chinese. One death in America is an American. As far as we know, he has received the injection from the Americans, for the virus. All more or less are Chinese, or have Chinese descendents in their line. This virus is tailor made to race. (1:16). We have informed the Chinese government and many fears have grown up. What we were afraid of, we see. Hitler tried to make a virus for race, and now we see it. People who are infected that are non-Chinese recover, but death occurs only in the Chinese race. The flu can take hold. One of our concerns which has been raised with the Ch Government in the background, is that there is a concern, as Chou said, that they are hoping it will go away by summer. I would ?? guess. This is the pattern of the virus, usually when it gets warm it goes away. But there is a problem, we could be hundred percent wrong, but we could be right, this factor we can't ignore.

First of all, the Americans are paying a lot of Chinese Academics for their students to do a PhD, for free, (1:18). in America, or PhD places for their scientists in America. This scientist who has written a paper on KF, has that track record. So we know how he came about. Secondly, the position is that Americans filled the Chinese environment with (African) Swine (Pig) Flu over the past 2 years. There is a very fine distinct separation between the Swine Flu and this flu. Why did the Swine Flu hold, and cross Chinese during the summer time, is because it's a heat flu. There is a difference between a heat flu and a cold flu. In China, spreading that heat flu (Swine Flu), and now this cold flu, there is a fear, a concern, that these 2 flu's, might merge some time in March or April, and we'll see that the death toll will carry on. The infection in China will not stop. This concern has risen higher in the past 48 hours. (1:20). We have now seen, flu in Christian communities, and not in Moslem communities like in Indonesia. Pig consuming nations that have already been hit by Pig Flu. When Gates released this to reduce population, in his calculation, he made a fatal mistake, this flu now has come to protect the Moslems, because they don't touch pigs. If what we see in the past 48 hours and what we see on this data, takes hold and runs into summer, and if, there are 2 or 3 nations here, in which it might add in to, Romania and Poland. Russia is already in it, then my fear grows bigger. These are the Christian nations who have been infected by pig flu. We might see the continuation of this flu into summer through the pig flu infection and carrying across Northern Europe. This is one of the biggest concerns at the moment internationally, from this move. We have to be very vigilant, so when we saw this article appearing by this

professor, we immediately put securities on it. He has been offered PhD's for his students in the US, (1:22). to write the paper. Do you remember the professor who wrote the paper and he supported MM for years, and in the background we found out he was getting paid heavily, and now is in prison, because he was aware of the dangers of it. This professor who has written this paper is an American based, financed, and backed. I wonder how many of his students will pay for their lies. But if this goes through, you'll see it will go very drastic. The biggest problem for our concern, is if the 2 flu's link up. There is a possibility of linking, and this possibility within the last 48 hours has increased drastically. What we see is what came out to damage China, through the Pig Flu coming down, now will go back to the Christian nations, which are a heavy consumer of pig products in the summer. This could not happen, but what we saw in Indonesia in the past 48 hours tells us to be correct. Knowledge Seekers (KS) across the world start preparing all your, with what we call, Cup of Life. (1:24). In due course we'll handle this professor in the right way. You don't sell your nation for a few PhD's. This is the same concern as I have as we speak in the background to the Chinese leaders, they have been sold internally by some American supporters of Chinese blood. The figures in China are much bigger, but that is the responsibility of the Chinese government. We support the Ch government, and I want to open a channel directly to his Excellency President Xi of China.

One of the blockages of the KF by the Ch administration, has nothing to do with the KF, except me as an Iranian scientist. Through, as I explained early, through national and international security and meetings we have with national Securities, in conjunction with International affairs of the KF, is that some time in the recent past, President Xi has fallen out with President Ayatollah Rohani of Iran. And KF has gotten trapped in it. This situation is hundred percent, in favor of Chinese, we understand it. But on the other hand we understand that politics have no mother and no father. Our concern in Iranian national security, understanding in the Chinese, is, China stood by Iran at the beginning of the revolution, as a friend, and President Xi feels he was betrayed by the Rohanini administration, (1:26). in moving towards America, as he was American educated. For that reason, China has put huge sanctions on Iran, much worse than the rest of the 5 plus 1. This situation has nothing to do with us, and KF has gotten trapped in it. This is why the Chinese government, even in CPC, and the highest level of the administration, use the Gans waters. They are making the Cups, but officially, their line is that the Chinese will not support any T which is coming from Iran, due to the behavior of the Iranian president, for the change of line, by the presidency of Iran, There are concerns in both the Iranian and Chinese national securities, this is effecting their nation. Sooner or later we'll find a position and we'll find a solution. This is what KF is trapped in, and this Academic professor will be handled in due course once we open his book and the securities go further with it. It's just one man, and 2 or 3 academics backing him and they are all American educated, backed, and financed by PhD promises. He will be arrested for murder in due course by CPC and the government will announce and you'll understand, they'll track his life. The whole concept is not China, the KF is One Nation, so if you live in Russia, Germany, Poland, (1:28). Philippines, and everywhere else, and if you have heard that in your area, that there has been a Pig Flu in the past 2 or 3 years, most probably you have consumed it. Just keep a One Cup handy during the summer time. Having said that we hope you won't need it. But that 10% and what we have tested on

viruses is extremely strong. Viruses link up, like the bacteria's do to the AA, they have a habit of finding the common denominator of energy. What I fear is that the Pig Flu has managed to connect to the AA of a pig. This flu (Coronavirus) has managed to connect to the AA of a human. And we have linked the two, by eating the contaminated the pig meat. There is one big problem, Moslems don't eat pig. Bill Gates, Rothschild's and the rest, have sown the seed for annihilation of Christianity. This is what was not taught. In many ways, my concern is this and sits here. (1:30). We'll take a step further. But as KS, I deliberately brought GL to talk to you, for you to take a step further, to understand, that she never discussed what she was going to say. We could see a true picture, and in the background we give you the knowledge. You have to realize that many top scientists live a comfortable life due to the money that is paid by organizations to promote. Many rich people think they can play the game of money with their power. Gates believes the world is overpopulated especially by Chinese. Inside his structure and in his brain there is a malfunction somewhere, that he thinks he can control the population, and he has a vendetta against Chinese because they copied most of his things and he couldn't become richer, and this vendetta has gotten worse since the new richest man in the world has appeared, and he lost his position. The Chinese have copied all of the work he did, and he sees the ego trip of being the richest man is gone. Now is the revenge time. This will not pay, but if you, as what you see here, what is amazing to me, is very interesting. Look at all the names here (Coronavirus statistics), (1:32). take UAE out which has been a high traffic Chinese, something like half a million plus Chinese go through UAE, due to Emirates Airline 380, 400 to 500 passengers, China to Europe, half to 1 night stay. All the infected ones are Chinese, except 1 Pilipino, who was an old Chinese, and they are all Chinese. It's a horrendous figure you see. Singapore and Malaysia are a mixed part of Chinese, the rest are Christian nations. Now you understand our concern. Now you understand our concern, that Bill Gates has put a root in the wrong place. My hope and wishes are, that the T of KF and the systems we have delivered to the Chinese government, and hopefully within the next few days, it will be announced by another nation, to support this internationally. Most of the nations are Christians, and are already embedded (with the virus). And this is one of my biggest fears, and this will create a mayhem. (1:34). Hong Kong, Thailand …. I think Gates has shot the Christianity in the foot, and in the head. Let's see what happens, I have always been outspoken and most of the time, have proven to be correct. This virus, if it switches .. it came down from the north, the Americans spread it this way, in the summer. What we see now is, "Black Death", it will go this way from south of china up into Europe. When it came down it killed the pigs, but when it goes back up it will kill the man. All the KF Chinese and Europeans, be prepared for if .. we have to see the interim. The biggest problem is this, if this (pig flu to Coronavirus linking) is established we'll see the Black Plague in Europe in the next 2 to 4 years. (1:36). The strangest thing is, in China we see some indication of this (the linking of the two viruses), and I have asked my securities to look into this. He draws a circle in the area of the North of China (#1) and one in the south (#2). Number 1 is the highly Islamic part of the China, and on this side, #2 is mainly in the south. What we are looking at, if the death toll of contaminated people, are mainly Buddhist and Taoist, and what is the percentage of Moslems who are infected and died in China. This is something that the central government of CP has to provide. Then we have to understand what is the cross link. The results coming out in the past 48 hours tells us that

the Christians are embedded with it. What is interesting is, of all the number here (on the statistics), are any of them Moslem? Hate and race, (1:38). has gone to kill a religion. This is something our contacts in China have to establish very rapidly through national security in China, we have to see this, because if it stays that way, then the summer is not going to be so comfortable for many of you in Western Europe in the next 2 to 3 years. The hotter is gets the more it kills.

As a leading scientist in these affairs we used to consult governments, but as One Nation we consult all of you. Our concern cannot be ignored, there are too many data, facts, and too much reality, too much, of too much, of too much. It indicates… I would like to know if there is one in Vatican. But there is a bigger problem with this, they have managed to tailor make this to race, would by whole possibilities, this race (Russia) will be the next one. And by high possibilities, would this race go in, to wipe out one nation … Germany? (1:40). I'll explain this to you in the future. This is what as One Nation, One Planet, One Race we see all of it, as a family, and it has to be, more or less looked into. Governments don't want to talk about it. But the KF government talks about it. Because we have to prepare Islamic nations to be ready for this, as we see that it is tailor made. We have to see and prepare for it, especially in Russia and Germany. One of our biggest concern is, the head of these organizations that ?? went to spread it through the world, has to be confined in solitary confinement, until we know exactly what they have done. The way we did it with (Alan) Sterling. How they planned and what is in the background. In the upcoming discussions with governments this will be on the cards. We have to establish this in a detail, how many of the people who died in China are of a Moslem descent, how many of them have used (pork), and how many are vegetarian and non-vegetarian, and how many of them have been in a condition of, (1:42). the death toll in the south. You have to realize as part of the KF structure, and our Chinese colleagues can tell you. Something very strange happened during what we call the Pig Flu. When the Pig Flu came into China, it was launched by the Americans to come in this way (the north), there was a reason for it. It came in during the coldest time, and that's why we are concerned. It's a hot flu, but it was running through the cold time. What happened in China, is that the pig farm is here (north), both sold pigs, and infected pigs, were shipped down to the south, to be sold, cheap, to make more money. Most of the infected pigs, which were consumed, was here, in the south. This is where we see the concentration of the virus. The Chinese government has lost track, and are too busy to see these kinds of things. Now we the spread (upward). The farmers (in the north) sold (the infected) pigs cheap, and they came into to the food chain. But it was the business people brought them down (south), and sold them at a higher rate. And all the infected pigs are in this area (in the south), are exactly where we see the high level of virus. And the Americans monitored this, that it could create a confusion, but it's not confused anymore, it is very clear. (1:44). To our Chinese officials in the background listening, my advise is to speak to GL and the KF secure operations outside China. We need to get this sorted, because when it goes back up north it will kill everyone across, right to Europe. Russia has a concern, I love Russian structure, I worked there for many years and I hope they will not get damaged. Russia has lost10% of its pig farms to this flu. So during the summer time it will flow back. It needs one season to incubate and in the second season it will cut. This is where we sit, those of you who live in France, Germany, US, or anywhere you see

these, look at 2 things, if you have Chinese descendents, or if you have received injections from the Americans, Christian or Moslem, and then add the name of the man who wants to depopulate. He will depopulate America and Western Europe, where his main anger was with China. He bought the patent!! (1:46). You know in olden days people bought artist's copyrights to be proud. This man has bought the copyright of death, and he will receive it himself. This is genocide planned out, and the rule of the UN is that the head of genocides have to appear in certain courts. Now you understand my concern, if you are Christian, you eat pig, you live in northern Europe, if you live in the Philippines, South Central Asia, we are one. In Vietnam, Korea, Japan through connections with China has received it. Macao, Taiwan, you are at risk, you are not Christians, but because, as part of the tradition you consume pig and if you have had reports of the pig virus in your country, you are vulnerable in the heat of the summer too. This was our biggest concern how this flu will behave in the warm countries, and what has appeared in Philippines, Taiwan, Singapore, has raised a lot of alarms. I look at it as one family and this family is in distress. (1:48). I brought for you to hear the truth directly from the KF Chinese. It was nice how GL put it, where the problem sits with the KF, but in time these academics, and the financing of their accounts, whatever, and their PhD's and the rest of whatever, their children being taught in America, are paid to do, receiving free education for their family, all will be opened up. This Academic professor is well paid and looked after by the Americans. It's the job of the KF to open his hand and how he has betrayed his nation and causing so much damage. This Academic has to come under questioning, very timely. We have the documents and we can go a long way with it. I hope it was worth the PhD's.

We come to another point in the KF, to the beginning of our 7th year. In that process we enter another phase in KFSSI and have joined certain research groups. We'll allow you another week in the groups to work (1:50). .. and then we'll lock the groups down. ..

(1:52).
(1:54).
Now you understand why I made the KF research and no more education. ..
.. The good news is we have found the KF headquarters for the U Council, and Earth Council, and operational headquarters of the KF. (1:56). It will take another 6 to 12 months to finish the whole job, but what I wanted, I have found, which I think secures the future of the KF internationally. Impressive site, it needs a lot of work, and we need to raise 100 million to build it, completed, and to be ready for the Council to take over. A hundred million Euro is what it will cost us for those who want to participate with the KF, to be a part of it. We'll open a special account for running this, and KF commercial operations will cover part of the costs. It's an open channel worldwide to contribute to the purchase of this center. It's on the coast, to the open sea, anyone can come in and go, and no nation can block, no man to bring peace. It can accommodate the whole of the U Council and it is absolutely prefect for One Nation, One Race, and the headquarters to be run by the head of the KF in the coming months. All the education and research centers will move in around the area. I have seen it and this is what was my wish. We'll open an account for those who want to support the building and completion of the center, the amount is too heavy for the KF to support on its own and we need to reach a capital

investment to run it, and part, develop and run the accounts. (1:58). There is another piece of news, the case of Fabio has reached Italian court and we'll submit evidence to the court to show the murder and in that process we hope to bring the soul of Fabio to peace. The evidence in the hands of the KF is in black and white and directly points to Red Circle. We waited some 3 or 4 years since his death, and in the coming days we'll appear, I have been summons to the Italian court to give evidence, and it will be submitted to international security, and the Italian court, without a shadow of a doubt, murder planned and executed and paid for by Red circle team. We'll show you, we don't make accusation. and in that process you'll see, in the next few months a number of people around Europe will be arrested for murder, attempted and organizing a murder. A lot of people in Belgium are shaking, they thought they got away with it, but Italian security, court system and justice did not accept the fake setup of a murder. I have disclosed this to the lawyers of the families in the past 7 days and the KF, will take the documents and release it to 3 governments at the same time, that nothing can be blocked in Italian courts by bribery or whatever. As I have told you I have a lot of patience, (2:00). we have seen the situation in Belgium changing, a liar king, now he is there, now we'll bring you into Court in Italy for the same purpose. The connection between Red Circle and the people who murdered Fabio is so complete, black and white, on the Internet, that they thought they would hide, and they ?? I thank the KF security network which has been with me since the 1980s and then moved with me to the KF. They have been the cornerstone of my security and have been since I was a businessman. I trust them with my life, as they advised me not to travel to Mexico last week, because of the framework they could see in the American administration. The national security of the KF now will submit enough evidence to the Italian court for the immediate arrest of Red Circle, the organizer and paymaster of the murder. We put this in advance because we want them to make a certain move, and we are waiting for that move. As you know, I poke, and I see and we get. Now we poked. Let them move, we are watching everything. Whatever goes through your mouth, it gets recorded, ?? around in your head. As the KF, hopefully we'll let the soul of Fabio rest in peace. We'll see in the next few weeks, the people who thought they got away with many murders, now the pattern of murders right across Europe will be opened up. (2:02). A number of people, head of the Belgium government, and head of the nation, will be arrested for murder. We'll announce to you exactly why and how. And we'll go for the head of the European space agency at the same time. We have enough evidence to support, and we do not make any allegation. I put evidence as you see, about the virus in front of you, and now we have come. I waited 4 years to bring the murderers of Fabio to justice. I know it has to be in the court of law, and not through the bribery of security officers inside nations. He was our son, and was the son of the KF. He devoted his life to us, and it's our responsibility to deliver peace to his soul, and we have the chance to do, and the evidence is so heavy, that I hope, that we do not get any cover up, and if we do we'll go through another court, immediately, for the arrest of Red Circle, as a paymaster for the murder. We don't talk, just to talk, we have the evidence. I explained the evidence to the Italian lawyers in the past few days, and they know, that I do not play games. Lying in a court is a criminal offense, and we have no intention to commit a crime or to lie to the court. (2:04). Now I can rest in peace, and complete my work and bring T and knowledge into the hands of the people who understand the beauty of it. The drivers to kill Fabio were paid 10,000 Euros each, that's what his life was worth, in cash. Red

Circle, shake in your shoes, we're coming for you very soon. Interpol will come, not the Belgium government officers, who are your friends.
Any other question?

(2:06). Q: You say the African Swine Flu virus is linked with the Coronavirus, they are asking if the Cup of Life still works to balance the energy of the virus? K- Yes, you go through 2 phases of fever, be very careful. GL can tell you, we monitored this, it's actually in the report of the Swine Flu which was published … Ella can you release the document of the Pig Flu on the screen. We explained that the Pig Flu has a connection with a bacteria, and a connection with a virus, it's a double strand. The present (Coronavirus) flu is a single strand. If the flu connects back to the pig flu which is already in your body if you consumed the pig, it will go back into the double strand. In a way, if you think of it, what are you going to get is this, you have a flu package (pigs flu), with double line (strand), and we have another flu (Coronavirus) with a single line (strand). This one (pig flu) connects to the bacteria, this side (the second line of the pig flu) connects to energy, (2:08). and links up (to the Coronavirus through the energy). In some humans they will link up (Coronavirus directly to Pig Flu), and will create a new condition of a 3 stranded virus, that one (strand) sits outside. We can deplete this one (Coronavirus), quite easily. But we can also deplete the energy part of this (Pig Flu). So when you get infected you have one high temperature with a lung damage. Your Cup of Life (CL) will wipe this out in a very serious way. Then what you'll see is, this guy (pig flu) will come into play, here. Then 2 to 3 days later you get a high fever bacteria infection. So you have a bacteria flu, you take your waters and everything else, but now you sort this one out, and you think you are better. But then days later you get hit with another temperature fever, 3 days later, and then you carry on taking the water, or now you take antibiotics. But CuO, (2:10). .. So what you see is that, you get a second high temperature fever, when you see the second high temperature fever, you just take antibiotics, or you carry on taking more of CuO loaded Gans water, and within 6 days you'll come out of it. This is the process which we see, and have to promote around the world in the coming time. We hope to receive support from one of the major governments in the world in the coming days, if again, bribery and other things don't go to it. (2:12). This is what, you are safe.

checked to here>>

If you look at the structure, even you Chinese were telling me about the materials you have, if you look at the Cup teaching a couple of weeks ago, I told you, it produces Mg, which is needed. You'll understand why because a lot of you, I know in the background are reporting diarrhea, when you drink the water, which is one of the signs of the virus. This Mg, supports your stomach and Mg and K, are next to each other in line (in Periodic Table), and they have an energy transfer common denominator by the spectrum strength. So the K in your salt is a savor for you, if you have that diarrhea due to the infection. It washes it out and it holds the stomach. So that K in the system is a gift to you, don't worry about it, that's why I said you can use it, because in the CL, you produce Mg. The K has a M field strength by 20% variation, which gives you both Mg and K, via the Cup, so you Chinese are better off with what is in your salt.

This is the pattern we see, and the pattern KF KS have to follow to safeguard yourself. We give you the knowledge, you have to trust and do it yourself, (2:14). and the way you do it. A number of KS go (have gone) through it (recovering from the virua) The ones that we see who have a lot of problems, are the ones who have a connection to the Pig Flu (ate contaminated pork). We have already been monitoring it, and we know there are a few cases in China where the connection of both viruses have been made. What has come in the Philippines and Thailand in the past 48 hours, and in Indonesia, has raised the alarms of the race and connection to the Pig Flu.

I would like to ask the Chinese National Security online, please check full data on the background of this professor and the promises he has received for PhD's in the US, for his students. And check his background education, then inform the nation that this professor has been paid by the Americans to promote their vaccine, and kill more. I think Chinese KS have to go on the Internet and put his name and credibility in question, then you'll understand, that you will change the position drastically. It's your responsibility as KS to expose these agents who work against your nation. I know the past 2 weeks you took a lot of pain, but you have to understand a beautiful T like this has many enemies, (2:16). who look at their bank accounts. What is strange is that we were told by our securities monitoring this, that this professor is using the Gans waters in his own lab. Very strange. This is your job to inform national securities and give all the details to them, about all the promises, bank accounts, and the PhD's he has been promised to support his doctorates. Now you know what you have to do as KS in China, expose this man, and tell them the CL he made to confirm, is the one which he is drinking himself. Any other question. It's strange, s few PhD's and a bank account is worth the life of the a nation, to save. I know what they do with them in China. It's up to the KF to expose this, very rapidly, with all the KF KS, their positions and the promises stick. And why is he drinking from the Cup himself, when he says that nobody should touch it.

Any questions.
Q: Does adding an air bubbler with a pump to the Gans production, (2:18). yield better results. K- We do that in mass production, trying to do, but we don't do an air bubble, we do CO2 exhaust. We make the availability of the C more, but the Gans's will do the separation, it's not that the CO2 converts into a Gans, some of it does immediately, it's effective. Actually, this is a well know procedure in farming, I was explaining to our KS in Iran in past couple of days, that in northern European countries like Holland, where the grow tomatoes indoors, the tomato greenhouses, are furnished with very big gas burners, which is unusual, but then you see why there is such a huge gas burner in a greenhouse. They switch the burners on a couple of times during the day, even in the summer, and especially at night. Then they control the light, then they let the heat out, but they push the CO2 exhaust system into the building. This increases the harvest and the growth of the plant. The greenhouses I have visited have very effective (high) production and use it extensively. In the Gans production, (2:20). if you do a CO2 exhaust pipe, yes. If you can connect a big balloon into the back of your exhaust on your stove, and pipe it into you CO2 Gans production, you'll see a better (bigger) production of CO2. It's the availability of CO2, in one of our labs they just put a small pump blowing air in from

outside the lab, and they doubled their production. As simple as just blowing air in. It's the availability (of CO2) that counts. If you live in the cities and you make your Gans on your balcony, you'll produce like a crazy amount per day. If you live in rural area and do your CO2 in the room it's very little.

Don't forget that there is a huge understanding, that those of you who produced this CL, you create an attraction point for viruses, because you are absorbing whatever viruses are in the air, and you are trapping it. You don't attract these to your body, but it becomes, and gradually you become immune to it. So if you live in China, your Cup, 100% will absorb parts of the Coronavirus, but in a way it becomes non-effective, because it becomes ineffective, and when you consume it, you become immune to the thing, and that is why it works, on the other hand, very effectively for these kind of things. When you have viruses like this, put a few of these Cups around the house, it doesn't need to go into your body to absorb the virus and trap it. (2:22). It's in the house, that's what we do when we spray (with Gans water) the house and the furniture. Put these like mousetraps around the house, make a few of the. Especially if you are around the house, and you travel on planes and these kind of things, just spray the chairs. We had the head KF traveling, I said, just spray the (airplane) seats, since you don't know who was there and what's in the air. You disinfect and protect yourself. These droplets (of Gans water), and when they touch, if there is a virus, if there is a virus, it always has to have a bit of the skin of the man, or the sweat of the man, to which they attach themselves to it. You just disinfect it, you trap it in its position. Effectively you disarm it, even for the rest of the plane and the others who might come, and could get it in the future.
Any other question?
Chinese KS please expose this academician, because he has put a lot of people's lives in danger while he is using his own Cup in his own office.

Q: When we make the CO2 setup if we add Omega 3,6,and 9 for example to the saltwater, will the CO2 Gans will get some percentage of the fields of the Omega 3,6,9?
R- He means Omega fatty acid. (2:24). K- You can add anything but what is the purpose of it. What is the purpose of Omega 6. Rick can you put up Wiki on Omega 6. Very interesting if you are a KS, if you look at the famous ladies of pleasure, you find them in Wikipedia, murders too. But scientists on the edge of science, like me don't exist in Wikipedia. Because they have been paid by their masters not to disclose that people learn more. So you learn that Wikipedia is not independent it is by paymasters. Interestingly, if you put Keshe in Wikipedia it doesn't exist, and 4 or 5 KS have tried it, but if you put in the name of well known prostitutes, you find them, so that is why Wikipedia deserves ?? …
We want the chemical structure of it, the energy balance structure of it. R- There are Omega 3, .. No we **want Omega 6, these are all radioactive materials. (2:26). Omega 6 is converted fat for emotionally trapped animals. So preferably don't use Omega 6. Omega 3 is emotionally connected link of the fat to free animals**. In captivity, due to emotional structure, we produce different AA to be able to handle part of the emotional imprisonment. In a free state of life, or what we call, non-captivity, we produce different condition environment, because Omega 3, or 6, or whatever you call it, is a condition of the life and the emotions connected, that why all the Omega fatty acids have an effect.

The Omega 3, extracted from captured animals doesn't have any effect as such, it's genetically made up. Let me **explain historically** so you'll understand, our ancestors, especially I come from a **Jewish background, they cooked chicken for centuries**, because we didn't have mass production chickens, and **it was a time in the body of the chicken there was Omega 3. (2:28). In boiling the chicken, for the Friday night Shabbat** diner, a tradition across the Jewish world, it has to be a chicken soup on Friday night. Traditionally, because they should not touch the fire, they put the chicken to cook Friday at lunch, and it stays, this is the hypocrisy with the religion, you are not supposed to touch the fire, now everything is electronic, they walk in, they don't touch it, but it comes on, they are very good Jewish guys. Centuries ago the same chicken was carried in a bag, they put the fire Friday lunch, to be ready because after sunset on a Friday they can't touch fire, which meant in reality that they should take a rest, but it needs a rest, you can't work 7 days a week. They changed it a different way. **This chicken cooks all the way through Saturday. So at a constant high temperature to keep it going**, so then it's ready, because Saturday morning you have to have a chicken soup and at Saturday lunch, until we come to the Sabbath, on a Saturday night when you can start cooking and touch the fire. **What this process did, was to bring the Omega 3 fatty oil out of the chicken and it sat on top of the soup. If you talk to my grandmother, she swears that you can use Omega 3 for anything**. I couldn't understand what my great grandmother was telling me, and she swore by. She was correct, because at that time the chickens were free ranging chickens. Farmers had chickens roaming around the gardens, what we now call free-range chickens. **Not being in captivity and roaming free they produced Omega 3, (2:30). because that way they could handle their emotions**.

Now with the Omega 6, which is the fatty acid of the captivity, to handle the emotions, we don't get that effect. So you don't need to use Omega 6. The Omega 6 and 9, are literally a waste of time, because Omega 3 comes through the emotion. These fatty acids are connected to our emotions, direction of the growth of the understanding of the behavior of the body. When you put a free range chicken with its fatty oil, which comes out, and traditionally we put an onion in. Onion in the cooling time cycle of doing it, and this is **why you fry the onion, releases another oil, which penetrates the meat and makes it ready to receive the AA, from the fatty acids. A combination of the onion and the free-range Omega 3, gives the best emotional condition, so with this, you don't get the flu and sort out a lot of problems**. They couldn't understand (the science of) it, but actually this is what it does. **This is the behavior we see in most of the herbs. The Indian herbs you see, if you cook with the Indian herbs, but don't let it to heat up, so that it releases its oil, it has no effect. Those of you who do oriental or south American cooking, you only get the effect of what (the herbs) you use when you allow their oil to come out, so the oil can penetrate and interact, (2:32). with its energy field inside the bod**y. Now we understand the scientifically what is behind it, and when the Omega 3 goes inside the structure of the body, then you see that this adds up, and links up with a lot of things, a lot of parts of the body.

It's pure H and O, bonds, that's all it does, oxygenates, gives energy to be. Then the H releases its (energy). Can we have the structural bonds, where it opens up with the 6 an d

12, then you'll see it in a much better way. In a way, the O extracts all the poisons, and the H releases energy back into it. This is why fatty acids work. They have a high level of O, which is G inside the body in a vacuum field of the energy, that's why you have a CO2 and the rest… Then you have, you see this very intensely. When you buy an Omega 3 bottle, it gives you 2 indications, EPA and DHA. The EPA when it's higher, leads to hyperactivity in children, because it's for emotion. (2:34). DHA is for activity. EPA is

Checked to HERRE >>

emotional kingship. DHA is activity, physical compensation. When you look at the bonding of the H and O, then you understand why the structure of the EPA, has the ability to calm, it gives emotional control, because it has an energy strength on the level of Potassium (K). If you open again, the Omega 6 and 12, if you can find the proper structure of it. I have done years of research on this to understand the behavior of fatty acids. Why the fatty acids work, is literally, if you add the emotion to it, or do you add physically to it. When you have a hyperactive child, they call it, ADHD(Attention Deficiency Hyper activity. What is attention deficiency? It's emotion, I want attention, I exist. You give it EPA which is the fatty acid in the strength of the emotion, then you satisfy the emotion, the child comes down. As I explained in other teachings, ADHD is attention deficiency, why do you have attention deficiency, it's when you don't give me attention, I'll get it. But to get your attention I'll do anything. no one else in the house doesn't exist, no human is any barrier, I'll take over until I get my attention. (2:36). What is interesting is the combination of this energy, is so much, that when I get attention I have to be active. For me being active, they call me, ADHD. So if ?? its in my emotion, I don't need to be active, I am ?? calm ?? anything. When you feed me I don't need to go to the restaurant do I. If you satisfy me outside, I don't play outside. If you don't satisfy me at home, I'll go to the restaurant and ?? I am not hungry. This is the ADHD, and when we look at the EPA and DHA, you'll see very clearly where they come. The present doctors don't understand this. The board of medicine has never understood the position of this. Now all I need to do is sit down in front of you and give all the attention you want, or I give you doses of EPA, and Omega 3 from non-captured animal which had a freedom, that he doesn't have the EPA itself, the done. If you want to use an EPA, you look at it, is it from the wild animals or fish, or from captivity animals and fish. You are ?? preventing a problem and creating another problem. This is why the whole food chain has to understood by those who supply us with the fish. (2:38). We see it in pig flu, which is psychosomatic, the pig is not happy. If you satisfy the emotion of it, then you'll satisfy the illness, it won't exist. When you look for Omega 6, you are already giving a captured disease to a captured body, why? Omega 9, heavy on EPA, but from a free animal. They call them now-a-days open sea fish. Yes but do you want to come with me to the open seas, yes it is, but a net and 10,000 fish in there, worse than what I call, Auschwitz prison camps. Knowing you are going to die, and they got you here, and now we do what we like with you. Then you have to understand how ?? badly we are controlled and we don't understand what is behind the other problems. Omega 3, you use, you try to raise chickens in the garden yourself, second and third generation, then yes you get Omega 3, then when you cook the bird for is meat, take the fat on the top, then you'll have

somewhere near kept it, (2:40). when you have your bird, touch it and talk to him, that they love to live. Then you know what Omega 3 is. Caroline and I went through this process to capture Omega 3, for this purpose. We spent a lot of time understanding this, when you like at the binding of different sections of Omega (O-3) 3, 6, 9, it goods you a very good indication, because you don't satisfy the emotional side. There is a lot of H energy ?? given off so the boy has to spend his time .. If you understand with the Omega 3 and 6, you are actually injecting your child with more energy, so it has to burn it. You put fuel in the tank, so it is going to go. It makes it more and more. then you have to understand how O-3,6,9 works, and then sometimes you have to interact, like O-3 with B-12 or B-6 then get a beautiful, extremely intelligent and calm children, but you have to know what to do, and this is the job of the physicians to advise. (2:42). Any other question? … are these the right diagrams? Yes, you can see the H levels in them, what you guys do is produce CH3 as a sugar, because the C links with the body and the energy of the H is released. You can see the O bonding which pulls the excess energy. R- Here's another diagram .. K- put the diagrams of O-3, 6 and 9, next to each other. Here is 3 and 6. Look at the difference. On O-3 you can see the connection bond and then very easily, if you are wise enough and understand the difference between the emotion. The emotion of captivity, and the emotion of freedom. You see the level of O which connects with the C, (2:44). and H, to the AA of the body. When you look at it here… this is (C-O-H), you just need an end, so it can easily connect to an AA, that's why we call it a fatty acid. Then you have a surplus O, which holds this O on its own, is 16, … 15 H . do you see, you have 2 H separate, then all of them connected to this (O-3). to the body. C is the connector. You have a N which connects itself to it, then you have (counts 16 H) then you see this. At the end you have one extra energy. this means 1 fatty acid connects itself to (7 cells + itself = 8). But when you look at it the animal has changed this. (2:46). here. on this end is connected to the C to the AA, on this end it's away from the C and AA. One connects to emotion, and one to physicality. one to freedom, it's at the end (O-3), it is free to float. And here (O-6), it is trapped (inside the molecular chain), imprisonment. AA's in conjunction are part of the RNA. The world of science has not understood the world of creation. And those people who thought they have understood have sold their souls to America government to kill in the name of academic professors. Now we learned a little bit more. .. these are all in the body, we look at them as an energy pack and not as matter state. (2:48)… Any other question? You have never seen how the emotion of the man can be demonstrated so easily on a piece of paper. Q: For those of us who have been consuming and interacting with Gans for years, are we building an immunity to viruses? K- According to some of the information we are getting from Chinese, it seems that those who have MaGravs in their homes have not reported anything yet. GL am I correct, are their KS who can tell us more? GL- yes I know a KS in Wuhan city and she said she sold 9 MaGravs to 9 families and none of them report any infection and even one family was in the most infected area. We didn't of (2:50). any KS who frequently drink Gans water have gotten infected. Let me ask them if they know they can tell me. … (she translates) everybody said that nobody got infected. Some Chinese are asking why when they drink Gans water there are feeling cold? (2:52). K- It's good, because keeping the body cold, it's very good in this position, because you are using the energy to protect. What we advise if you have a possibility to sit in the bath(tub) with a salt Gans. With the Gans of salt and the CL. If you noticed your Cups, a lot of people do, take that salt and keep it and

when you drink the Gans water add a little bit to it, or if you produced a lot of the salt put it in the bath and stay in it. It brings a lot of energy and balance. R- Are you talking about the white stuff that collects on the central Nano coil? K- yes and maybe on the Cups. This is a natural Gans salt. R- It's not actually Gans, it's not like ZnO Gans, correct? K- No, you see the process is very simple. … (2:54). When you make the Gans's, if you listened to a few minutes ago teaching, you make the plates and created the Gans in the middle, but you depleted the salt from the waters. Now you have to remember, that this salt here (in the water) is not salt anymore, because of this single Nano coil, it creates the Gans state. Now you create the condition of NaCl, which is salt, but the slat in the atmospheric condition because it's floating is already converted, is in the matter state. So now you have created the G field of the salt in there, but it's in the matter state, it can't enter the Gans state, what you get, he draws salt accumulating on the top of coils and jar. So the salt you see on your Cup is coming in, the same way as the C was pulling in the AA, now the same thing, (2:56). you have created the condition of the Gans in the Nano state in the atmosphere, so what are the salt level strength of the AA of this container, so you get the Nano, what we call Gans state salt on your Cups. These salts are absolutely perfect for, if you mix it with the AA for a lot of purposes, but you collect them. These are, in a way, do you remember Peter, he used to Cu and whatever between 3 rotating reactors, this is you converting the energy of matters into matter state of the salt. Because you have to understand the topology of the planet, which tells us very simply, the salt level in the atmosphere in different areas, dictates the life of what is absorbed. Life is not just … conversion of the matter into a state of solid, it's salt dependent, that's why we have saltwater in our body that becomes cells. In the atmosphere you have salts almost floating everywhere, it's part of the air because when it gets evaporated it goes in, and partly from the condition of the extraction of the fields of the planet. We continuously create salt, the way we do with O and Nitrogen, so what you do, just because of your interaction with the planet, MG field and the Inertia, you are collecting salt, in the same way that you are collecting CO2. This salt appearance is more because, if you look at it, if you understood the T-- 1 plate (of Peter's 3 ball reactor = Zn plate), 2nd plate (= Nano coil), 3rd plate (= Cu coil). (2:58). Here (between 3 reactors) you created the matter, and here (Cup) you create the condition of the salt. And this salt is the most (best), and if you can .. some of you see a white stuff on top of your AA, because your Cu has a Zn mixture, this white stuff mixed with the AA, which is on the top, keep it. It is one of the best Gans's you'll ever produce in your life, because it is connected to the emotion and the AA, at the same time. For psychological depressions, this is one of the best. In the past I taught you to do the Zn for emotional conditions or whatever, but now you know you can use 3 plates and you can set the plates as Zn plate (in middle), Zn Nano coated plate (on side), and a Cu plate (other side), now you produce, CO2 on one side (between Cu and Zn plates), and then ZnO on the other side (between Zn Nano coated and Zn plates), and by the condition of the field forces, you should get your Gans's up here at the opposite end of Zn, and at the bottom you should get the Gans of CO2, and by MG field forces, the Zn goes up there (on top), you get your Zn literally mixed up with the AA. This is one of the best solutions for brain disease, depressions, emotional conditions. (3:00). And some of you who made Gans' s in the past, that you saw your Zn Gans's good for whatever, because without out you knowing it, you mixed this (AA ?) in it. Now you can do it on purpose. When I taught you this 3 element condition, is not just for this (CL), if you use it this way .. you

can start tailor making, in the systems you can put 4 (plates), and then you see what happens, but you have to understand why you put 4. But be careful, do not use these so randomly. It has to be done by knowledgeable people, because you enter into a different dimension. As long as you are happy, please make a Cup of Life (CL). And leave these (the 4 plate reactors) to the experts. I do quite a lot of these things. It's ?? not a machine, it's life, it's the beauty of the knowledge and the science. I know how to make a machine here that if any of you enter any room, not like this (3 plate reactor) but a combination of these (CL and other multiple reactors), then you'll fall in love. I have done it, and it is amazing how it works. GL- Mr. Keshe? K- Yes, do you want to fall in love? GL- Yes I do.

GL- I want to ask. It maybe normal for here in China to mix Al in with the Cu, is there any difference, because some people are still worried about it? K- Very rarely, I have never heard of Aluminum being, (3:02). mixed with Cu. Maybe in China they do it for conductive wires, it's possible, for weight reduction. In computer systems sometimes they do, but it's very rare. If you buy wires for electronics, they used, they still do, they used to mix Cu, Ni and other things to make brass. We do this in Nuclear T because it has several advantages when you mix Al with Cu in composite. It gives it a lighter wire and better conductivity, the percentage of Al you use in the wire dictates the life of the component. This is one of the ways they can tell you if the machine is going to last 2 or 3 years. They control it with Al, one of the tricks of electronics, not many people know. This is why if you buy a machine that is 100% Cu, you have 5 years. The percentage of the Al added brings the life down. So you need to replace, the factory sells you more. (3:04). Q: But can we see any difference if the Cu is with Al, in the Gans? You have it only in electronics, if you buy wires for electric they don't use it because it doesn't carry a standard for house use. In computers they are looking for lightweight transmission, they do mix with it. But in household high tension cables (wires) no they don't mix with Al. … If you plug in a wire and if it heat up very quickly it's has Al content in it, because it (Al in wire) breaks down, and the wires start breaking up. R- I wonder if they may be referring to silver plated Cu wire, which is sometimes used and multi-strand wire is sometimes silver covered. K- No they are actually Cu/Cu because I have seen the picture they showed me early. … if you use a stranded wire, that's a different thing but they used it in a different way. (3:06). Maybe it's time to expose something else for you in a scientific way. Maybe not. If you have managed, it's very specific, but some of the KS have played in that age, and a lot of you KS have been trying to make a lot of funny things. If you see different materials and different ?? dimensions start asking yourself why and how? Many KS keeps asking, in the Iranian channel, he wants to make gold. If you want to make gold, understand the process how gold is made in the U. If you want to make pure Cu, if you understand the T, you can make pure Cu at home without contamination. Then what you do, you can convert, the Nano (N) structure of atomic Cu, into direct Gans of itself. Very powerful. (3:08). One thing as KS you have to clearly understand, … if you want to be; in the space, space + earth, or on the earth. Space is ?? , this is life (s + earth), this is material state (earth). But all of them are different strength of the same M field, and none of you are understanding this. I keep on saying move away from Gans's and move into energies, move to energies. When you have the energy, you can make whatever you like, but when you have matter you are conditioned to life, to

physicality. But if you learn to work with the energies you can create any conditions. When you use matter state you are trapped in the physicality of the man. the sooner you understand this, you'll understand why I am giving you these things now (multiple N coils), I start to open your eyes, into the work of the fields, which you ?? never to do. (3:10). I tried to teach you this, but I found out mankind is not ready. The original KS, I took them in too fast and they didn't understand. Draws hexagram. And I left it for nearly 5 years, and I have brought you back to it to understand. Do you remember the cups we saw from Hong Kong? We made the sides to put different plates. Has it changed anything from this (cup with multiple N coils). Do I have to take you backwards because here is 3 plates, there I give you ?? 3 plates, and one day you'll understand why we gave you this experience. Go on the original KF websites, shops, and you'll see it. We made the samples of it, the prototype of it. And we came up with, some people wanted to have a pocket to hang it outside, and some inside. If you understand this, maybe you'll understand something else. Draws a man. Here you had 3 elements, here (body) you have billions of elements, (3:12). as the cells of the body. If you understand this in the future, where this (STM) controls ?? collaboration field strength, as the STM. And this controls (STP in heart) the dimension of physicality, then you'll understand why you have a blood and nervous system. Couldn't I put the nervous and the blood in the same. Isn't this (nervous S) this (2 of the elements in the Cup), and then isn't this how much salinity I put in and call it the Lymph of the man. So I am ?? creating ?? cells. When you don't understand, you go back 2 chapters until you understand the first chapter, and then come to the second chapter. Five years it has taken, now because of your life you understand the three plates, you'll learn. I always said, man will take my T, not of the beauty of it, understand it, the creation, but out of fear of destruction of his own position of his life. And we are getting to that point. You see I am not a magician, I am a scientist. They call us the universal scientists. (3:14). We understand the creation of the U, we created the U. ?? to understand it. Knowledge is so simple to explain, but it's so hard to understand the ?? when you do not see the totality. We have a doctor in Tehran, and he has managed to make beautiful tomatoes, now he has become the doctor agriculture medicine man, because he can grow tomatoes, he understood and did it in the winter when it snows, and he collects tomatoes. But he is actually a medical doctor. Now can he use his tomatoes to feed the STM, that's ?? next. Any other question. Q: Why when some people drink water from the One Cup (in China) they feel weak? K- It means they have an infection. (3:16). Don't drink the Gans, drink the water. When drink the water, try to put the straw to take out the Gans out without touching the AA on top. Then you'll understand why you are hungry, or you feel weak. There are different ways of emptying the Cup, and each one has its own effects and results. If you mix the AA, first take it out. Get the Gans out, wash it, and then you add the Amino Acid (AA), you have food. In the case of emergency, you can feed yourself that way. When they lock the doors and nobody can go out, that is the only way of feeding yourself. Those KF supporters in XinXiang who went into the cup of fruits, and they drank, actually the energy came from the AA, they scrapped on top of the Cup. It's a pure protein, and the acid is connected to the H line. Any other question? (3:18). Q: Some people ask if this One Cup Gans is effective for any virus? Yes, ?? Don't change it, Do not change the Cup of Life, carry it for the rest of your life. Anywhere, Hopefully in China we'll mass produce so they become part of everyman's life. Because it's like, what I call, a gate, one or two. ?? they are meant ??

hunger, now the money doesn't satisfy. You have to understand, to get in the brain of incompetent people like this, they came from nowhere, they got rich through stealing from the others, and now they think they can steal life, and now it has gone to their heads and they have become a king. They're a king of nothing. They tried very hard to buy the KF out years ago, and we had the lucky card pulled for us, called, Red Circle, the last time he came to the last meeting, the association, everything broke up, I couldn't understand it ?? I told Caroline, I don't know why every time I take Red Circle, everything breaks up, now we understand it. ??? he was working for his paymasters. The negotiations broke up and it was clear he wanted to control, ??? His team and his lawyers, (3:20). a few times in Holland. The interesting things was, they said, if you watch your Internet, this time ??? he will be on your website. You understand we are ?? And we saw Microsoft coming up. Just take 2 of the Cups, and the structure of the Cups, and the way it is. Don't deviate, because you won't get what you are looking for. But this is what the virus is, you have a 2 part virus, stick to the 2 part virus. the CO2, and the CuO. One CO is your Inertia, your physicality, and what you call ?? CuO for the connection of the line to keep the physicality in tack, in the process you have a Mg and you create, some ZnO on the top would ??? Q: How to use the One Cup to feed our soul? K- Have you found the soul yet? (3:22). That's a question. You need the soul combination. The physical body of the man through the process, does that, then when it reaches the point of the balance, it's the time, we call it, a point of death. Separation comes when the STM reaches at a given point. This is where as you call, polarity changes, if you go back into the teaching of the space T, I explained many times, when you have a core, and you get a rotation, .. your reactor rotates anticlockwise, then it stops, then it goes clockwise. The heartbeat, switch <> switch, according to, what we said, if you remember, the sun and the earth. MG field force space dictates the position and if the fields are too strong, it becomes clockwise, (3:24). like Venus. Because the field forces interact with the center directly, now dictates the position field force, and the current flow of the field. When you understand this, then you understand how the physical body and the STM work, and when they are attached together, it's life, because they follow each other. When one feeds the other one, then the energy changes, like here, in a positive way becomes negative, flies off, separation of the two. If mankind in the future is able to understand this, because you'll measure it, separation of the physicality, you an control yourself, or by the process of the field change, position, separation point, ?? the life goes. And you start, that’s the beginning of the life. If you can manage in life to continuous feed this, that gives constant, good morning, I'll see you in a thousand, thousand years, they'll still be there, the connection of the two. As I said, how long do you want me to stay, if you know your partner lives so much life, I have many lives, feed Mohammad ?? but will you remember your first child, a million years ago. This is what man has not understood, the key to everlasting life is understanding this, and man has a long way to go yet. (3:26). any other question? KS from China, please expose this scientist and his background and how he has come to discredit, because of his PhD's and what he ??? has got for. And his private account outside. The Chinese government has a huge concern about what we call, people inside who are blocking a lot of things, and this scientist is extremely close, backed, promised different shape or form by the Americans. Expose him and let the T free to save the nation. His academic position has sold the nation out. A friend of our security said, would you like to see his girlfriend. Expose him very rapidly, and go on the Internet and

open up his book. An academic who he has been paid to actually kill, is not an academic. I think it is the job of the KF people to open that to the national securities. We don't interfere we have, it's your job to protect your nation. (3:28). Any other question. Q: Somebody after drinking the Gans water from One Cup, says they feel it is hard to breath from the lungs, it's heavy, so what could be that? K- you have to drink small amounts, and secondly it means 100% that you have the virus. So you have to breath, you are taking energy from the infected lung, this virus attacks the lung. This virus is built to attack the breathing, it's an airborne virus, you get it first in your lung and then in your body. So if you have such a feeling, it means 100% without a shadow of a doubt you are exposed to the infection. So breath regularly, and support your lung with the Gans water. We had another KS sending another infected person the Gans water from the Cup, in an oil tank, what do you call it, oil ?? GL- It's a facial oil, it's like Omega 3, for the face, and they have a very bad smell and the patient cannot drink. When you help others, make sure you use clean bottles. I know you are trying to help with whatever you have, but understand that the other ?? end has to use it as well. (3:30). If you feel pain when you drink, it means 100% (you have the virus), because it (G Water) passes your lungs (as it goes down) and it is pulling the energy of the virus through your body out. You had better inhale the Gans water (through the mask) at least a half an hour per day. Don't forget to spray your body, face, nostrils, and mouth with the Gans water. Whenever you go out continuously spray yourself, because you never know when it will attach to you. Secondly, drink it and breath it through a mask, at least 1 to 3 times per day for 10 minutes. If it has entered it releases the energy through the Gans. If you drink it and have a pain in your stomach, or lungs, it means 100% you are infected and it's pulling the energy of the virus, so make sure you breath (the water) as much as possible. Most probably if you have this condition, you have a diarrhea too, which means you have it in both channels. I think today was a good day for learning a little bit more, and teaching a little more, and understanding the emotion of part of our family in China. On the other hand, understanding how we can help each other, and what we can look for in the coming time. Now you see the time you spent learning the teachings over years is coming to flourish. At least I think you have saved your life. It gives us a lot of freedom, at the same time, I would like to thank all those who are helping us with the Iranian conference in the background. .. and later on. (3:32). We thank the Iranian government officials in the background, doctors, and scientists, and many other KS who are working to make sure this events goes through and takes place. Hopefully, we should be able to conclude many things with the help of the Iranian KS internationally and nationally. I have a message for the Chinese leadership, president Xi, a man at the height of his power has to understand and be courteous. Your behavior in respect to Iranian president Rohani should not effect nations, the whole nation of Iran, and through it damage your nation. To be in the position of power means to be in a position of being a father without prejudice and understand the pitfalls of the son. Your behavior in respect to the Iranian nation, because of one man, is effecting you nation, and the health of your nation. The Iranian nation will survive, and has, I wonder if this goes on, would the Chinese nation stay as one nation? The KF has to be given the right to defend the Chinese nation and ?? amongst its KS, not because, maybe a misunderstanding between 2 leaders. (3:34). World leaders find the best for their nation, and compromises are always made, but not by the nations, towards

the leaders, the self-interest of the leaders should not come into operation. Thank you very much and hopefully we'll see you next week.

(3:36).

316th Knowledge Seekers Workshop February 20, 2020

English Transcription:

(:06). .. As some KS said, I am putting you to sleep, I hope it is a good dreams and becomes nice when you wake up, and reality is better. The Chinese Flu is getting extended to more nations and unfortunately, yesterday, for the first time, in Iran we lost 2 people to the flu. The extent of the disease is expanding is crossing borders, mercilessly. We have offered support to many governments, and we shall see, ?? effects of ?? on, how we can support some of these conditions. We hear from the Chinese government that they think they have managed to tame the situation, and as they said, from the 17th of March, one city should be opened for business and we wish all the best for the Chinese government and nation, that they will achieve it. The indications are totally different. I different parts of the world we'll see the drop as we come into the next few weeks as we pass the cold part of the seasons, (:08). or the year, but the reality is this virus will come back again. We have not found the solution to eradicate it. We have found the solution to maybe in some cases, reverse. according to the secret national reports, 10% of the people survive long term. The total infection is 90% mortality. The governments at the moment try not to release data so it doesn't bring national panic, but the reality in the background is much harsher, and the biggest position for us as KF KS is to get support through the new T as much as we can, and to extend it to the way that we can support other people. Up to this moment in time we have not heard of any of the KF KS having losses. We are still standing firm, maybe one or two got infected but they have overcome it. In general this is part of the T which we depend on. There are a lot of things we have to clarify as this thing takes hold. it might disappear in the next 4 or 5 weeks due to the heat, but it has

the possibility to recur during the summer, and then be stronger back into winter. The environments have not been disinfected, there is no T in this moment in time that can do so. (:10). The ground for it that is hidden somewhere, can merge in any shape or form. even if somebody freezes it, and defreeze it after the winter time. In totality, we have to come to certain understanding as KF KS, one of the main things that KS have to understand clearly is the mask's that they are emphasizing for people to wear to stop breathing this airborne disease. Most of the people who die of this disease don't die of fever. the fever always drops, the majority of the cases are from the lung infections, from the destruction of the layers of the lungs. When we get these (reports) that they say the people have overcome the virus, it shows no virus in the blood, but the cells in the lungs are deteriorating. According to the official reports and what we see from the doctors facing the truth about this T, and the T of the virus to kill, is that they die of flooded lungs. The doctors report jelly like material flooding the lungs, even if you can empty it, it floods back again, and people literally die of suffocation. Up to now the Chinese Traditional Medicine (TCM) or alternative medicine has shown some sing of bringing the fever (down), and some sign of recovery, but in general we do not see at all, (:12). direct clearing of the lungs. the major problem in this disease is damage to the lungs, and not so much the fever. the fever can be controlled and the blood cells will show a perfect thing, but down the line, those who suffer form this infection, one way or another, very much like ?? leukemia, will die of the lung damage. Statistics are (only) being kept of those with none (fever), but if they follow these, and we see it now after 25 days to 30 days, the lung will kill (them), because it solidifies, they can't stop it, it becomes rigid, they can't stop. One of the things I said with the situation with the masks, .. is that yes, you put the mask on to attract, or to stop the virus to enter the lungs. This virus officially has 30 minutes life, if it passes 30 minutes, according to the scientists who deal with it, it will not damage that much. But when you take the mask off you have to go through a strict way that you never allow the outside of the mask to touch the inside of it, when you put it away for next time use, and you never touch the front of the mask, because you transfer … (:14). what happens is when you turn the masks, or when you touch it, or if the mask falls on its own inside out, then you carry the virus in. So in a way, what the mask has stopped, then you infect yourself (accidentally) with it, by touching it. The virus has different ways of taking hold, we have not yet seen the evolution of the virus into muscle tissue. It only effects the lung tissue. If this virus gets into the muscle tissue, we have no experience in that, we'll see ?? dead cells, ?? black skin and all that. We have not seen it yet. What happens when you use the mask, make sure you never touch the front of it, and always put it flat on the breathing side, not on the (incoming) air side. Make sure it is not touched by the body or the nose when you put it back on. There is a new mask that we have seen that has come out by the Israelis, confirming that they can do and have done everything. There again, the problem with this mask is it needs time to work, but going back to when take the mask on or off, you still can pick it up. (:16). These masks need to be ?? washed, handled, never touch them. They say they can wash them and do whatever you like with it. It has to be under very high temperature, especially if you have cooked, what I call lobster, you need a boiling water like when you cook spaghetti, high boiling water and you drop it in, and then it has to go through a sterilization. It doesn't mean that the virus is dead, when it goes through the heat. The prevention comes when we can sterilize the centers of the disease, like hospitals. Unfortunately, what we hear from the

Chinese authorities on the surface, and the data we have, over 5,000 front line medical teams have been infected. These are the people who are supposed to help us, putting their life at risk, are getting infected by us. We are giving them the disease when we carry it. What is important to the KF KS, who are using the mask, before, during and after using the mask, spray it with the Gans water, then at least you try to kill as many viruses as possible. Keeping your spray with your mask can help you to do it, when you touch it, and when you again take the mask off, spray your hands with the Gans water. Spray your face with the Gans water, don't take anything for granted. We have a major concern in Iran, which by today or tomorrow will establish, why and how this cluster has appeared in the center of (:18). Iran in the south of Tehran. There are certain reasons for it, we want to eliminate it and then we'll look at the same pattern, if and why. The disease has appeared in Iran at the center of religious organizations. It spread to where the daughter of Mohammad has been buried. And is the center of culture of Islam. We are looking into different aspects of it. But is it near the Tehran airport, somewhere near there. We want to know if it has been cross contamination between the Chinese traveling through Iran back to China. As you are aware most of the airlines have stopped flights to China. Iran and Istanbul is one of the ways at the moment that the Chinese have found to go back home. We would like to establish why 2 elderly people in Iran died yesterday. the notice was short. Initially we had a notice of infection 4 days ago, officially denied, and now we see it was a reality. An internal memo was released and then denied, not to create panic until they could control it. But in the announcement of yesterday of 2 deaths of elderly people who are non-Chinese has raised alarm in international security. What we would like to see is if the race game has been played, and if we find that, we have to respond accordingly. One of main things for KS is to keep filled, make sure you have enough, that you can support yourself and your family and your neighbors. The governments at this moment are playing deaf ears to anything. (:20). Because most of them are in panic state. What we see in places of holiday zones, like Tenerife, Canary Islands, Maltese, all of these become a center of danger, not only for the virus, but economical damage, people will stop traveling. This will create a massive problem for most of these nations. Be aware and very careful in where and how you travel, even in the airplanes if you have to sterilize the seats, spray the Gans, and just there you are safe. You don't know who has been in that chair or who has been in that cabin. It's your responsibility to protect yourself. If we stay correct and follow the procedures of protecting ourselves in using the Gans or any other T, that is all that matters. We will see a drop in the next 4 weeks as the temperature goes up, and our concern is to see if it will follow after the warmth, which means if it links up, or links itself up, to other viruses. The problem for all of us is very simple, make sure you stay safe and keep your immediate family and friends safe. (:22). In so many ways, you become Samaritans, you come to understand that you are the "last man standing," and in so many ways you are the last doctor or physician that can help, with everything that you know regarding this virus. Try to understand what is the next step. We'll see the drop most probably in the next 4 weeks, but we'll see an incubation time, and a more vigorous one in the Autumn. A lot of things need to be in the summer by the governments to be able to protect and to eradicate most of the seen and unforeseen situations. Many of you have made Gans's and you get different colors or whatever, it's no problem, because at the end of it, because you have the 2 Cu (coils) inside, you always create a Gans which is at the Cu level, you always create a combination of CO2, which

has a strength connection of C, so don't panic if one is yellow, green or blue, you have created a condition, but according to what you have created as an energy passage you get different colors. I have seen some KS use galvanized Gans's, these Gans's at this moment cannot be used for this virus. This virus is airborne and has to be handled through, C, O, and CO2. (:24). If we get disease through muscle tissue and the blood, then we'll go a step, because when you use galvanized sheets or whatever, you produce blood, hemoglobin, then you can use it. This is important for you to understand, if you produced a red hemoglobin, when you used by mistake galvanized paper, or sheets, or nails or whatever, you can move into the next step, and we would like to start that ?? Are there any questions about this before we start to the next step? .. Q: If the Chinese know about this T and are exposed to it, why don't they take it seriously? K- They have taken it seriously, there is a problem we addressed very early on, we have recorded conversations confirming that the Chinese military have taken the T very seriously, and KS are working with them, and these are KS we know, (:26). to produce around a ton of Gans per day, to disinfect some of the cities. They are using it and this is one of the ways they are controlling it. There is a very big problem that the Chinese have a habit of stealing T, and this has come to a head again this week. The Chinese do not want to confirm that the T belongs to an Iranian and what the KF KS in China have told them, that Mr. Keshe is our teacher but we produce it ourselves. In that way we see another betrayal by the Chinese government, because it is the habit for them to glory to themselves, but if it saves lives, let it be. At the same time the Chinese government is working differently to do it different ways, and (the information) we have been given, the implication is, it is being done by Chinese KS in XinXian, they are working with the government closely and actually producing the material. It is interesting in how they bend to the government to say that the T is Chinese, and hopefully we'll see this coming back, as we have a recording of it, of those who have been trying to recruit other Chinese KF supporters to work for them to produce more for the Chinese military. The reality of it is that the Chinese government is split into 2 sections and this is right at the top of the CPC, which is the governing body of China. There are those in the governing head that would like to reduce the population of China by another 400 million, and these do not want see any process, not only KF, but other (possible solutions) to come into operation. (:28). You saw us last week with the academic professor, or specialist who wrote about the KF, and we exposed him, and 2 or 3 hours after the teaching, he went around and made a threat on me, and this and that and a lot of rubbish, and we know, in informing who was where, a number of leading scientists were arrested for collaboration with the Americans. We exposed a lot of things, but you KS just listen, but in a way, we give a lot of coded messages to governments, they understand where to go and what to look for. At the same time as we see it, it is stealing of T by Chinese has taken a new shape this week, and this thing has to stop. This stealing of T, this paying to have, to be more superior, has to stop if the human race is to become one. What we are doing is absolutely opposite to what we are doing in other parts of the life. We find an elite sportsman and we glorify them, and put them on a pedestal and we allow in every shape or form they show themselves. But in the world of science, we imprison our elite scientist, just because they work with another government, and they shared knowledge with another government. Our sportsmen cross the borders, change their passports, and run on the flag of another country, play football for another country, and as we have seen, black sportsmen run in the arena, (:30). for

European races, but do not speak a single word of the national flag. They are allowed and they become the ?? the Olympic gold medalist for the rest of the nation. But the human race has gone so low that it imprisons its scientists for sharing knowledge, and forces the scientists to find a way to share knowledge, and then when they find these people, they imprison them for life for sharing knowledge. This is the beauty of the way I setup the KF, knowledge is free and nobody can be imprisoned for it, and even when they want to steal it, they can steal it to their benefit in the name of their nation. When a man steals a gift he is by nature a thief, that you cannot change. This is the behavior of the Chinese leadership, the Chinese government. When they steal a gift that was given freely to their nation, it shows the leadership and the government is a thief. It doesn't matter how you shape or name it. It doesn't matter which country, the Americans do the same. And when a nation is by nature a thief, becomes rich, because they have done nothing for it, they have stolen T. This is what we see, I have made myself very clear to the Chinese and other governments. Knowledge has to be an asset for mankind and not the property of a nation and a demarcation on the lines of the lands, which God never creation. We saw sadly another case this week, one of the leading scientists imprisoned for sharing knowledge with Chinese, or Chinese trying, (:32). to steal, or collaborate on different names and banners, from Howard University. If governments open the borders of science, then no one will become a criminal. If the knowledge is used for peaceful application and the extension of the knowledge for humanity, it has to be glorified, understood, it has to be brought up to be applicable to all. We have seen a leading scientist again this week imprisoned by the Americans, for selling T to the Chinese. But do the Americans say how they stole T from China? This has to stop. One of the main functions of the KF coming into operation, has to be the freedom of sharing T, the way we do, and not imprisoning our scientists, and not imprisoning those who become elite. Those who use their knowledge to harm humanity have to be isolated. But those who share for whatever reason, to extend it, cannot be imprisoned, killed, or threatened to be killed if you don't give it to us. We have seen it with this case. .. When the governments teach their scientists to be open, then scientists don't need to go under the table to work. This is what we encourage, the KF KS in China claim, he is our teacher, (:34). so be it, he is, but it has to be with, and through it. Those who went and worked with the Chinese military to now produce massive amounts of this, should share it directly with the KF, with the government. The military has a different agenda and the government has a different agenda. When we stop killing and imprisoning our scientists is the time when the man matures to understand, that these are Messengers of God in the name of humanity. They share more than many others, ?? in the name of ?? Do these scientists who put their lives on risk to share with other nations and other people, criminals, and do we do to them, what we did with Christ, crucify them. Why such a brilliant scientist has to be imprisoned, because he shared knowledge with another human being, to extend it? And why did the Chinese go this way? Why can't we openly travel and go across? If you look at it, we had it last week (Mexico), and before, and coming up in Tehran. Your own KS you come in with different knowledge's about the T, and you just put it in the teachings of the conferences that you are going to, and you teach there. Why don't we imprison all of you? What has changed with the KF? How come we share knowledge freely and they take it and put it in their name, it doesn't matter. (:36). but at least it saves themselves. But when a nation does it, then it becomes a criminal offense. Isn't better to

have One Nation and all the scientist under one cover? Why don't we give protection to our scientists internationally, why do the scientists get victimized? Why do our assistants have to go into prison or get killed. This guy has a sister and she is Chinese, it doesn't matter if she is military or whatever, she is there to support and transfer knowledge to her nation and should be free. Why was Fabio killed just because he was the assistant to me, working in developing? We in KF have been through it. Why do we glorify the sports people who live off the drugs and they show for a few minutes, something and then they disappear, and those who share knowledge and put their life into science, get imprisoned. As I said, until the Tehran conference, we'll bring a lot of weaknesses which man has created for himself. Why I have to attend a court case next Tuesday for the death of Fabio, and then when I want to attend, I get threatened, that I will go to prison for 43 years if I go and talk in court. (:38). Just to show what we know gives me a prison sentence? A king could not threaten me, let alone a peasant man. It's our right in every shape and form, the truth about knowledge and those people who work around us. Hijacking documents and computers of the company, threatening, and everything else. Everything is in the hands of the legal frame of the Interpol and the police. We are just looking into it more. How did Fabio get killed. When we want to explain, it is a criminal offense, by those who want to benefit by it in a different way. It will be in the hands of the court. I invite the Italians, to invite the police on a private line Chat, in the next day or 2, we don't make any allegations, we'll show and explain in detail, how Fabio was murdered, murdered! We have been told that if we release then we'll become a criminal. Since when has revealing a criminal act, become a crime? Except for those who want to benefit by it. This man chaired in Howard, shared knowledge with the Chinese, he goes to prison. You look at the conference in Mexico, Brazil, Vienna, we shared knowledge and KS came and taught what you have done, which one of you have been put in prison? (:40). This is what is wrong with our society, letting criminals run, and imprisoning the intelligent ones. To bring such a man, to such a knowledge takes generations, and who looses? Humanity does. Why don't they put the pictures of the pedophiles, the kings and those who have killed many, and put them in prison. How come they are free, and men of science are imprisoned? If the governments make the transfer of T free, no one needs to lie. Put the love of their knowledge and the sharing of their knowledge. And no government ?? backhanders to create such a crime. Knowledge has to become the point of peace, as we have seen in the past 4 or 5 weeks. Until you don't teach them a lesson the children play and make noise, and destroy things. We taught a lesson to the Americans, since that day we haven't heard a single thing about a war, or destruction and what is going to happen to Iran. The new charter is that way. Science and T creates peace. (:42). Advanced science and T creates peace. If the lesson was not taught to the Americans in Iraq a few weeks ago, we would have everyday sword rattling, as we have seen for months and years. What happened? Let me explain to the KS and the American and Chinese government officials who are sitting in the background, and to my Iranian leadership who are also sitting in the background listening from the Iranian government. I explained this to the Iranian officials very clearly and you'll understand why we are going for the Tehran peace. In talking to some of the military elite in the past 3 or 4 weeks, a joke has started, which is, if the Americans could not save their base how come they selling us defense T? How could the Americans and Europeans in the same base not protect themselves, and now they want to sell advanced T which is worth nothing for us,

to take money from the mouths of our people and give it to them. Since the situation the situation in Iraq, many military orders have been canceled. These are piling up and we are making nations and governments more aware of it. If they have it, then why did they get flattened, and they were the army of the most advanced nation on this planet. (:44). The position for peace through T and science has started taking shape, and as I said to the Iranian leadership, we have to take a step that we become the leaders of peace and transfer of T freely. Knowledge has become the cornerstone of the present peace. Maybe this virus is the next step for it. This virus can create 2 points, showing the having of no border, and extending everywhere it brings nations to have no border, and we have seen it. We all get it, the virus doesn't get a passport to get on a plane to go from Malaysia to Asia to other places. Secondly, is who initiated these viruses, do we allow these people to run free. Do we allow people who think that just because they became leaders in the finances of the world, that now they have become ?? collectors of reducing population. in so many ways they are digging their own graves. Today's teaching is very simple, what are we going to do with the knowledge which is going to be shared unconditionally. And the knowledge which is shared unconditionally with the backing of governments. What is president Xi going to tell his people, in one way or another through KF T has come to be benefited somehow through it. (:46). We stole the T? Isn't there one who was saying we are going to bomb it out. If you remember we used every means to destroy, and they even put a map of 52 of the most historical sites in Iran that they were going to destroy with bombs. These places are not defended, the other places are fully defended. Do we go as low as Trump or do we get him trumped. The ethic of the knowledge becomes the player of the knowledge. By international law evidence has to be correct in court. Why do we imprison our scientists and why don't we imprison our athletes? .. If you are Nigerian and but don't speak the language, you come and be an athlete for my nation, they do the dealings behind under the tables and then suddenly they take a new passport. How many athletes have we imprisoned for crossing borders? Sharing what the nation built up. (:48). What is wrong with us as human beings and how come we have become so low to do these things to ourselves? The problem you'll understand very soon is that, you KS now you all become the spies. Because you are sharing freely. And you KS in China who are working with the military and you say, we'll not work with Mr. Keshe because we are getting paid to become rich and the government has told us, don't say anything about the KF. Have you lost your ethics and dignity? We'll expose your names, we have recording of it, and then the Chinese government has to say, we stole T. We gave a gift and you are stealing a gift, so by nature you are a thief, be it KS or your leadership in China or in any other country. (:50). Any other question? Q: How do we overcome people's resistance to the T and the Cup of Life? K- Nothing, you just do your work. Resistance to it, is their lives to loose, not yours. You see the resistance to the T is as long as Fox existences, and the kingdom of Belgium, where pedophiles give children to the heads of organizations to pleasure, and buy their silence. As simple as that, it is A, B, C. As I said, when the KF is allowed to come out and do whatever we and you are doing, then your worth it. People are like sheep and they follow, even on the top. On the bottom, life we have seen with (Allen) Sterling, 127,000 plus people are under investigation, and 7,000 have been arrested as pedophiles. We saw one of them who was at the tip, he was killed in a prison, or they say he hanged himself. And we saw the other judges accidentally got killed by it. So these people on the top have taken the bribe of life, .. (:52). they never understood

what we call the "free energy". The free energy lobby were those who the life of children were free for them, and that is where the phrase came. And it all sits at the real heads of the nations. Starting from kings and the rest down. Any other question? Q: Can we use water fountains in cities as a system for protection and health, if we put the Cup of Life (CL) in it and Amino Acids (AA), and Gans in it to cover a big area, how much do we need and what ratio? K- I know a woman who did it as we traveled around the world, she was forever in the fountains. I know a lot of Chinese did, and other KS did. You spread the energy, when you use fountains, you are better off to use the Gans, then Gans water, because they have so much energy, they are like the sun, and they deplete. It comes, if you go across ?? fountains especially if you travel in summer time, you'll change it, you give energy to the people inside. You don't know how it changes them or how they are effected by it. But in so many ways, you share, you put additional energy by it, they're not aware of but it is in the ?? and the strength of their physicality. Whenever we travel around the world Caroline does this frequently ?? (:54). She forever feeds it into the fountains and waterfalls. You see the Chinese in XinXuan they forever throw water into the rivers. There is a structure, hopefully, if we didn't have the problem in China, or ?? would have come through, is extraction of a large amount of CO2 from space, or what we call, atmosphere of cities and to be fed into the channels of the city (water system) to ?? and to sort out may imbalances. At the moment KF team is talking to a couple of governments for this ?? It's one of the best ways to do it. I have a question, what happens if you put Gans in the room of the house, is it good? K- It's good but if you have a sick person with a cancer, you cannot put for example, CH3 in that room. CH3 is a level of the energy to itself. In that purpose you energize, you give energy to all the cells, so you have to understand how, where and what you do. Many places use this natural water for energy for extraction of minerals. It's part of the teaching which you have to understand, it's something which I touched (:56). before but I want to expand on it today a little so you understand some things in a broader way. If you look at what we discussed before, the life of the man is made of 3 blocks on this planet. You have air, water, solid, which is from this planet, each one of these brings to the body of the man energy of a certain strength. In what we breath (Air part) we don't only take O, we take Fl, Ca, K, in this (Water part) we do the same thing, and the same thing in the Solid part. In our breathing we just don't take the air, we take the energy of the elements, which fit into the structure of the air for he use of the body. For example, in the air we take K of the strength 0.1 to 0.4, in the water part we take of the K from 0.5 to 0.8, In the Solid part for the K we take 0.8 to 2 , where 2 is the maximum. (:58). This is what our world of science has not understood and it is time for us to understand. We just don't take water or air, and what they said, oxygen. In every breath that we take we take a combination of the elements which fits into our lungs. Our lungs do not give the energy only to our blood, it's the conversion of the energy directly, and if you look at its position, very simply, it's this. These are your lungs and this is your liver (to do with Air). The lungs give the energy of K which is needed for certain actions through field transactions through the liver, without ever going through the body. If you look the position of the liver in this place (Water) is exactly the same. the liver and the intestines around it. a different strength the liver. the liver doesn't take all its energy, vitamins or whatever it needs on all the strengths .. they go through the transfer of fields through organs. They don't need to be absorbed, they get ?? .. At the same time when you drink and eat (Solid) , through your intestines, again you

are surrounded with the liver. So ?? the strengths of the solids of the earth. (1:00). are again absorbed to the liver ?? the body. In each process every time we breath, it's not just the O energy, it's a collection of the energies of the elements which are within the air, and it is absorbed by the body, and in the process of even viruses, some of the viruses come through the strength of the connection to these (elements) to the body. When we go to space and close our mouths, we don't need the lungs, when we don't eat there is no need for water, then we become more and more vulnerable ??? to transfers ?? transfers in our body. In the deep space when we receive energies, these energies can be as harmful and as needed by different parts of the operation of the brain or the physicality of the man. One of the most important parts of this transformation by not eating, by absorbing energy, is the only structure which needs to keep the physicality, which is what we call a bone structure. But our bone structure in due course will change to the energy packages to keep our structure according to its environment. Now that you become more advanced in your knowledge, now you can understand the next steps in gaining the knowledge and what you can do. (1:02). When you go for inhaling, up to now all of you use the ?? CO2 and maybe something. But now you understand that you have been feeding yourself a half cup, the other vitamins and minerals, all have been ignored, at the strength of the air, not at the strength of the solid or the water. When it comes to your physicality you have to understand this, the same when it comes to the condition of your liquid and air you have to understand this. Especially for our physicians and those who work around the medical application, they have to understand this. Then you find out that you are more effective and your (health) systems work better. The conditions of change become much more rapid. Then you have to consider the structure of the soul with these, and within these structures. Then you'll understand that the Cup of Life is only to survive this virus at this moment. The true Cup of Life has to cover every piece (all elements) in the structure. Understanding these parts goes back to what I keep telling you to move away from the Gans's and start understanding the energy transfer, (1:04)., plasmatic energy transfer. A lot of teaching goes on in the Persian language by Hassan. I wish we could translate these back into English and the other languages. He explains knowledge in such a depth that a lot of you need to understand, maybe has not come from my translation. My son was telling me, do you know why the Iranians follow and understand your T better, because you speak English, Farsi, and they understand it, to them it has a meaning, because they think English Farsi too. That's why the Iranians are so successful with your T and the others haven't been able to ?? it. If you understand, the totality of the knowledge and if you could get some of the teachings of Hassan to be translated into English, you will understand a lot of new ways that could not, or have not been understood. I go in his teachings and just sit sometimes, and it's amazing. I say, this is exactly what I say but they don't understand me, but they understand him. (1:06). You have to go in more detail, the KS now especially ?? going into a massive teaching, share of knowledge, cannot be anymore of Gans's. What happens to this Cup, and around it. Who gets effected on this side of the Cup and how, and who on the other side and how. Hopefully, by next week the Enhancement Unit (EU), the first two should start coming out. Now that the Chinese factories are reopening and they are allowing us back in. Then it becomes a new zone, a new environment for everyone to enjoy. In this process we have to open our eyes and to the knowledge of the plasma (Pl), and not to the physicality of the Gans of Pl. This was one of my biggest fears, that the KS would do this, and they have

exactly done that. They have gone back into the matter state of the Pl. (1:08). Start looking into the interaction of the fields, and combinations of the interaction of the fields. Try to understand how the fields interact and create and create life with each other. Try to extend the knowledge with the fields and not with the matter state, then we'll see a new world. a new knowledge will open with all of us. Then is makes my life much easier to teach. In the space T, in the dimension of the interaction of the fields, in understanding the totality of the transferring of the fields, some of you might for example say, where does this K come the air? We are the bottom eaters of the air atmosphere. Interaction of the fields of the earth and the sun, create a life in non-dimensional, physical ?? tangibility, but in the dimension of the field of life. And these lines here (in the upper atmosphere) have a life. In time when the life ends, like in the way it happens in the oceans, as the fish die they go to the bottom eaters. Mankind with all his glory is nothing but a bottom eater of the air above. (1:10). They have already digested the Ca, and you think what you are breathing is yours. I always said, this ?? float has seen a ?? woman going sick with it. If you are a black man in Africa, and a white man or woman in Europe, or you're a Chinese in China, we know one thing, you want to know the truth, you can't stand the color of a black man, but you breath the air he breaths and you are happy with it. You are breathing second hand air from him. We are each others integrated, our lives are integrated with each other. We breath, inhale and exhale, and the white man next to us does the same, what I breath, he breaths and thinks ?? of me. Stands the same. When mankind understands how stupid he has been, even by the air which gives him the life, then mankind can never be prejudice or racist. Now with this virus we see it, a Chinese man breaths and a European man gets it, and dies, how else can the virus transfer, unless you transfer through the breath of my life. (1:12). Through the same breath I spread the knowledge of love, and from the same breath you take from me, I spread death, through the viruses and everything else. If mankind understands we are totally as a whole race, breath each other, in and out, man could have never been a racist in any shape or form. Then if you love the next air that you breath, then you love me because I breath that air to you. As we are breathing the air from the upper atmosphere and we are allowing it to enter our lungs, then we breath it out, and we breath a mixture of the 2, and then it goes back, and when it comes back to me, I am breathing what you and the others breathed out. So you are part of me, and I am part of you. How can I be on top, in any shape or form, a king, or leader, of ?? because I am what you are and you are what I am. What energy level in Ca you breath out, it could be that this is what I need for my structure. So I depend on you breathing, as much as you depend on my breathing. When mankind understands this, the prejudice and the lies and the stealing will go. But mankind has not yet become wise to this. You don't need a?? mouth to breath to give life. (1:14). By breathing we give life to each other. We feed each other, we are messengers of energy in different levels. How can one be superior to the others, when it eats from it to survive by it. So it must inferior that it needs to be fed. Or do we all accept that we are part of it. This is one of the maturities of man needed for him to enter into universal knowledge and universal understanding of energies. .. Try to become open minded and try to understand the knowledge in its true essence, not to what it fits. Try to be aware and fully aware of everything. Don't be afraid of threats. Don't be afraid of what they might do, because when they threat, they think they have won. We will release documents to show scientifically how this life exists that, the reality, when we die and we

go in the depth of this .. and we go across in different shape or form, (1:16). we again become part of another life, all of us, and now we exist in the bottom of the oceans, as collective residue of the lives above. In the long term we become the creator of this (?? process), so what are we racist for. As one KS asked, where do all these souls go that are dying in this virus? The pleasure of the life goes to the elevation of those, and the losses of their lives goes ?? through again. If these people understand what they are doing to their souls, they'll commit suicide, at least to ?? what they ?? Rich in banknotes that are worth only 2 kilometers if you can spend it, depending on how high the apartment and restaurants are from the ground, and the rest is the ?? completion of it own, the Soul of The Man (STM). In what actual worth you have left ?? worth you have more of because you killed more. (1:18). If you have seen one of the recent videos on the internet, the Chinese government has decided to burn the notes, they think is the way of transferring the virus. I said, fantastic, now we really become WeChat ?? The interesting thing is the Chinese are throwing the money through the window, because that money in their pocket could be the one that carries the virus. So they don't want it. If you have seen some of the videos coming out of China, money is raining down, because they just realized hat they could have been to the supermarket where there was an infected guy who was picked up. But you can't buy life, knowledge does. We see amazing things with this virus, it coming to the point of maturity, and getting ready for the Tehran conference. In the Tehran conference ?? the opening speech will be one of the most eminent scientist, supporter of the T ?? Ayatollah of Iran. Knowledge needs to have the men who understand, nourish and support it, like .. If we would have still have the Shah we would be slaves to the Americans. In have a wise leadership in understanding that the science and T is the backbone of a nation, we stand where we stand, proud and high, (1:20). not only for Iran but allowing the knowledge of Iran to be spread across this planet through the KF. Don't forget the first space systems were developed in S University in Tehran, by invitation of the Iranian government, by the leadership of the Ayatollah K of Iran. When we come to understand the facts, the reality of life, we all understand that we are made of the same. We eat the same, we feel the same and we share the same air, not just because we walk it, but physically we drink and breath from each other. Maybe now you understand why we are One Nation, One Race. As I announced to the Iranian government yesterday, I'll be back in Tehran to oversee the virus position, to support the ?? not to take leadership. to bring a new T and (1:22). to be able to curtail pain for more people. And through that and ?? the T in Iran, we'll transfer it across the planet, and bring the shame and leadership of Chinese, those who want to hide, what they use. We have announced our stand-by with our flight to Tehran with the call of the Iranian leadership and we hope if they need it they'll make that move. There are various Iranian KS who are talented and can support and spread, and this time the Iranian leadership will not go by race, color, or religion, but by the humanity to be correct. Any other question? Q; Can the virus change or manipulate the RNA or DNA, if yes does the One Cup Gans repair these defects? K- The position is very simple, you have to understand the depth of the knowledge. This virus enters the body of the man (1:24). .. now, the virus enters the body, what does it do? it adds or takes or changes something in the body, maybe this unbalances DNA or maybe RNA, maybe genetically modifies, but what is interesting is that by drinking from the CL, which is a reference point, this body was made from the Cu, Zn, C of reference, so any thing will happen with the Cup, all the changes in RNA and DNA will go back to the

point of reference, genetically modified into what it was. Because now we have, if you understand a point of reference. Your Gans's, when you use for health application is reference point in respect to what changes might have occurred from this to this. This reference point is strong, it doesn't have anything to share with, so this reference point (? in body) has to go through (Gans) and give you the purity. (1:26). This is what you KS have to understand, and it is you who decides this (Gans) reference point, the way you make the Gans, how you mix it, are you making it for breathing, drinking, or for eating. If we all understand this, your Gans is correction of deviation, because this (Gans) cannot change, it came from the lowest, which is the earth, which is what we are made of, the Zn, Cu, has a spectrum of energies, yes, but our bodies are made within that spectrum. We give it a reference, a point of balance, according exactly, that this (body) is made of Gans, this (body), and this (Gans) is made of Gans, which is the Nano structure plasmatic fields which leads to the creation of the human body, and the way we showed you, and the way you all made the Gans, this Gans (Cup) has 3 dimensions into it. It has the AA, the Soul, and physicality to exist within it. So you create the 3 dimensions for it, the physicality which comes from the oil on the top, the soul which comes from the interaction of the fields of it, (1:28). the physicality which comes from actual Gans's itself in the dimension of an exact copy structure of your own body. this CL is life in a cup. And for that we have given it a fix, in science we always have a point of reference. In life with Gans, this is our point of reference. So if you have slight changes in DNA or RNA, correction too, because it has a soul that interacts with RNA, and as a dimension of Gans it interacts with DNA. I have given you a gift, if you understand it, a gift of life. You call this Cup a man, I call this Cup life, what is the difference. Holder of dynamic Gans's with emotion and soul. If I put this in a fish and I give you the fish, I tell you the fish of life. It doesn't make any difference. Man is so physical. (1:30). Q: Can a virus be the reason for mental diseases? K- Of course, if it is at the strength of the brain cells, yes. We'll see many of it in the space. There is something man will understand much faster that the brain in its all beauty, will go through transformation in the space, we'll not have, not see the structure of brain in the space for the man, but due to interaction of the fields in the U, due to the matter state, we shall see only the fields of the brain. The shape of the control system will be called the brain, and it will take shape at the point of destination when it confirms and converts to physicality, what that physicality might be. You will learn more. (1:32). You will see the brain can and will be effected by energies in the space, because if you are in the space where the K, Ca, Zn, and CO2, in a given plasmatic condition converts to its gaseous or plasmatic field energy condition, then you don't have a brain, but you have the fields of the brain, that still operates in the same way. (the sections of the brain are still there) Consciousness section, pain section, decision making, if you understand this, this is how I saved the life of Naomi. I don't rely on the structure, the fields, the structure is irrelevant, then in the dimension of physicality the structure builds itself in the position of the fields. That's how we repaired the brain of Naomi. And nobody understood. You look at the physicality, and I look at the field transfer, and I keep telling you to understand the fields operation, not the physicality, because in the space, if I take you a few kilometers up, according to the law of physics, gases change to da, da, or gases change to di, di, di, what are you going to do, are you going to be the di, di, or da, da. But if you understand the extension and the totality of the world of science and interaction of the fields of the U, then you understand this is what it is. (1:34).

Would we in the dimension of the physicality, understanding that there is such a change there (K, Ca, Zn ..), do you thing that you have a skull. Do you think that your brain and bone structure will be there? All of it vanishes. We have to open your eyes to understand deeper in a slower manner. We have to be able, the present KS in the future have to understand what sits with them. The teaching of today, some of you have not understood, but you are still sitting here, because you come to listen to the Messiah. But do you hear the words of the Messiah through the soul of the Messiah? Or do you hear ?? two Messiah, ?? of your own soul. You have to be clear and understand. (1:36). Then will mankind become kind to his own physicality, or become kind to his own soul, or become kind to the energy which creates him? If you look the story of a life of a man on this planet is very simple, in not understanding it man has made it complicated for himself. Any other question? Q: can we use a plastic tub to make this Gans? K- You can use anything but we prefer ceramic. R- or a glass jar? K- Yes anything. Would you like your skin black or white? Q: Can we translate or copy fields or visions into Gans's or Pl fields through our soul and hands? (1:38). repeats .. K- Of course you can they are all fields. We have a ?? from Chinese in Wuhan, "blockade is very serious, every household can't go out, so it is hard to send the medicine to people who need them. .. the methods are hard to implement because they lack the materials and confidence, it should be better when Wuhan is ?? " K- We understand you Chen. In Wuhan they are literally bolting and welding the doors to the houses. … nobody can go out. This is to control, but on the other hand this is sentencing people if you are sick, which means the family dies together. One gives to the other, because you don't have the nourishment, you can't get the food and everything else. You become weak, without immunity, and so many families have died together. In Wuhan the death toll has passed seriously, 1 million people, but the Chinese nation has to be honest with its people, and not the KF to show figures, and numbers, with its citizens. (1:40). And I hope those who are true lovers of humanity will take, not those who have been paid to reduce numbers. We are aware of it, I see secret, what we call, information's, our intelligence is strong and powerful, and at the same time we stay loyal to the Chinese nation, but when there is a problem it has to be looked at and seen. Guan Lynn (GL)- Q: they have been applying TCM herbs … (1:42). Does the TCM play the same role as plasma? K- We believe so, but it has to be done in the correct way, Chinese Medicine is another version of Gans's, it's made from the Gans's, but it has to be converted to it, not in its matter state. The beauty with this knowledge is that we are a collection of the knowledge's, we are not something elite that we are always right. But we have to understand and even operate, I have a very big problem with Chinese Medicine as I explained to you, I know the officials are always in the background reading whatever I put on, the opposition, or what we call, discussion with the Chinese Medicine, is that the Chinese herbal medicine is using the majority of it, what we call, poisons in it. And when you make a Gans of poisons, or they want to mix the KF T with the herbal medicine, we hear from the team which goes with Guan Zoe, which goes with the military and the governments working, are mixing it, and boiling it, this has become a lethal weapon, in the future to kill many more Chinese. (1:44). Because Chinese herbs have such an in-depth of poisons in them, that now you bring it into the food chain. This is why I object to those who think they are very clever in the KF, and they are doing things, and I warned them before, if you want to, we have an agreement with the Chinese universities, to do the trials, and I encouraged them to do the trials, the Chinese have

natural Gans's, but with the poisons they become death traps. This is why the Chinese M now-a-days isn't as effective as in the olden days, because so many fertilizers and pesticides have been used that it has changed their composition. Now when they enter the body they don't work, they become poison and they create more injuries, in most of cases. That is why the western medicine which is purified to one level looks better. As I said to the Chinese professor when I was there a few weeks ago, where we started the clinical trials, is, we can and should use all the natural herbs, not only Chinese herbs, but from Africa, South America, and Europeans and Asians have their own herbs. If we go through the cycle of growing herbs, third generation, which is the Gans T, which is purifying that there are no pesticides coming from the ground or herbicides within the structure of the plant, then yes, we are talking about the same. But at this moment, Chinese medicine when they are unpurified and everything else, (1:46). then you are injecting more poisons into the body, and they think oh, it's working now, yes, but show me the body in 3 months time. New generation, then brain damage, and then what will you say, oh we cured it, or something else. When a KS works with the knowledge of the KF, he has to be open to accept everything, not just pushing the new T. We don't create new hypocrites. The best, you have been with me many times GL in negotiations, I always say, the Chinese herbs are another step for the KF, but first we have to purify. At this stage 99.9% poisons, even Chinese Medicine doctors don't know. When we started creating herbs like 200 years ago, where there were no fertilizers, pesticides or poisons on these plants and they become pure, we can test it, then yes, it has to be, it is made of us. It's us, we have seen it. China is the biggest producer of tea, but how many of you have seen real Chinese tea in European markets. ?? Why, because when they test the tea the level of poisons and pesticides is so high it doesn't pass certification for entry into Europe and America. Here we go and we buy tea. In China tea is given as a sign of love, respect, and care (1:48). as a gift. We give each other a gift of poison. When we clean up and go back to the process of real bio-natural Gans T or any other T, then yes, it has to be. But in the present time, those who boil, what I hear in China, Gans with Chinese herbs and they say yes, it's effective, yes the Gans is working but your poisoning, what you are boiling creates more problems for the Chinese in 3 months , you have to pay for those souls, sir. You become rich in the pocket, but your soul becomes so poor that it can't find a place to live. .. Never be prejudice I joined the KF, my son said, mom says I have to study the KF teachings, but I want to go to university and do this. I said, listen, knowledge is a step that we all have to go up in. The knowledge of material, without is you can't live. This is another knowledge of the Pl, you have to learn to live with both, because you are made of both, and one is connected to the other. Our knowledge as KS we have to be very opened minded. Never refuse another T, but build on it, unless it is fallacy. (1:50). If we get this behavior, understanding, we'll always succeed because we are inclusive and not exclusive. I cannot create the Gans of the Cu if the earth doesn't give me the material, if the atmosphere of this planet doesn't create this Pl. I can't produce CO2 if this atmosphere doesn't make it available to me, how can I make a CO2 without ?? . Q: Someone used only 1% salt and AA formed on the surface of the Gans, why? K- The salt goes back to the teaching of a couple of times before, that the salinity dictates the creation of the matter state of the body. One salinity gives you the heart muscle, one salinity gives you the lung tissue. So it should not be very hard to (1:52). understand this, you change the salinity in respect to your environment, so yes you have. Any other

question? (1:54). .. . We are waiting for final instructions to travel to Iran. Q: What is the process for getting a visa for American citizen to attend the Tehran conference, you mentioned once possible special visa? K- .. It has to be approved by AK.. if we get the final approval in the coming days, there will be a special arrangements made, as Trump will be invited as one of the members of the conference. The Tehran C is a peace conference, we'll invite heads of state of Saudi and Israel, it's a conference of peace in the understanding that, then there will be a special arrangements between governments and to what limit we can allow people (1:56). numbers are flying around at 10,000 attendees, … This is an international affair not the KF, when we invite heads of state they have to be met by AK, this process is very extensive and needs a lot of organization. The last time so many heads of state were in Iran it took the former Shah nearly 5 years to organize it, and we are trying, because we have the power to organize to get the world leaders in 2 months into Tehran. We have been told that if President Trump attends, then President Xi will also. I have already put the US KF on alert. ..
.. the world leaders have to decide how to unite. (1:58). All the religious leaders have been invited, it has to be inclusivity and at the same time has to be the acceptance of peace. When we share such a knowledge in such a platform.. when KS share what they have learned . .. then who is going to patent it. The Tehran conference is not a KD conference, it's a conference of a change of attitude by all of us. By it form world leaders to religious leaders to the point of understanding the totality. .. with the ex-head of a government and he said to me, Mr. Keshe what do you want from my nation, from you are telling that you have given and are giving to us? I said, I want nothing, just make sure that no one dies of the virus. He said you know these things don't exist anymore, (2:00). they exist in your head, but they exist in the KF. He said, there is nothing I can tell you, we never had such a gift so we don't' know how to handle it. We are Americans, Chinese, we have to safeguard Tehran, by showing the virus is eradicated in the next 2 weeks. I am making the Tehran conference a virus free zone. Very soon we'll offer through the Tehran office, hopefully once I get there, what we call virus tourism, we'll accept if your nation doesn't accept. You know you have a virus ?? we'll accept your plane, your body and your soul and we'll see you, meet you in Tehran and we'll send you back home with no virus infection. When I called it a virus tourism one of the guys was laughing at me. I said, they have no choice if someone gets this virus they have no choice, they're sentenced to death. There are many rich people who will get this virus. Their money can't buy their life. so we'll do it and we'll spend it on their nation and on the people. Handling this virus is the way to unite humanity if you know how to do it. Don't worry about a visa, get on a plane when your president flies in. (2:02). .. I said, you know when the Iranian president went to New York to the UN conference he was restricted to certain blocks, he could not go anywhere. He was literally by law free, but by nation imprisoned, which is against the law of the UN, but the Americans put it in their house. All the world leaders went to see him that he didn't need to go anywhere. I said when Trump comes to Tehran we'll give him the freedom and let him go where he wants to go, then he'll be ashamed of what he is doing and what he has done. .. a lot of things are made to suit, and a lot of things we make to suit. With the new T and sharing so freely we'll govern. Any other question? Q: (2:04). (Krashmere has accepted the full time position of KF global marketing …) once we go a few kilometers into the space and the gas is transformed so our brains will have to transform as well, does that mean that the Pl is so dependent on

the conditions that for example, that if we take the CO2 kit into space we would not be able to capture CO2, so how would we be able to feed ourselves if we go into space and are not able to capture the materials, and would it beneficial to find a way to create those conditions on earth? K- The thing is the M fields always find a position where they can position themselves. You don't come into the vacuum, you are positioned into what you can receive. So that is not a worry. When you give a room to the Gans in a different dimension, it will expand irrespective of its condition. the possibility is, this is the favorite word of Rick, (2:06). energy or the expansion of an atom can fill a U. So if you create a condition of the conversion of the field, 1 Gans can cover the solar system. This is what the sun is. And that is why you find mercury as a liquid in one planet and as a vapor in another. In a vacuum condition of M field they manifest themselves differently, but it is still mercury. Q: Do we have the same elements on different planets or ..? K- Of course, it's the energy of it, but it's just that, if the Inertia is there to transform them. Energy exists right across all the levels of the U. It's the energy in what we call the Inertia level, in that level which manifests the material in the state of liquid, gas, plasma or solid. Even within mercury there is a ?? even within the gold there is an O. In a plasmatic energy field, because without it you can't have the next level which is Na, you can't have the energy of the link, for it to be there to become gold. It's a step up, but it depends on the environment, (2:08). and the field strength of the environment, and then the Inertia which is the matter state of it, which one ?? manifests itself, it's like a light. Q: Would that mean the physical manifestation of any element contains everything below it ..? K- below and above it. of course it doesn't disappear, it's just that it is not visible or useable to us. When you travel the field of the sun to the boundaries of the solar system, at the boundary the field changes and we see ?? at the more center we see heavier elements. It's inside it, the full spectrum of it, it depends on how much of the energy of it, that we use. It's like a banana, how much of it do you strip (peel). As I said, many times before, if you think of a Pl like an onion, the further you go the bigger it gets, but in the body of it the taste is the same in every layer. If you ever want to study the Pl, cut 2 onions and put them end to end, and look at the behavior, you'll see a real 2 or 3 dimensional Pl. (2:10). Any other question? Q: is it possible or good to put the Gans in ?? for to spread the CL Gans to cover bigger areas or is it not a good idea? repeat .. to put the Gans in the toilet to spread it through the water system of the city, everyone can have some of these fields? (2:12). K- I presume you can, we have a friend in Argentina he puts it in the bottom of a tank and everybody drinks from it. Q: how much do I have to produce to have a good result? K- You always have a good result, it depends on what you do. What is in a Cup is effective in a cup, when put it into the water system through the toilet, now it's bigger but it's the same amount of Gans. When you flush it, now it goes into a river of it, so if everybody does it, then we see how you expand on it. A Gans, when you use it long-term has to have a source. Many people just put a Gans in a bottle, it's there, it has got .. it give energy out, okay, yeah it absorbs some, but if you want to have a Gans which goes for a long time, you have to leave some of it in the bottom of the cup. If you have a dynamic ball and just put water of the Gans in it, it will last maybe a day or two, maybe a month, but it's energy is given and taken. It's not just that you put it there, you wish it there. When you use something for the long term always leave some of the physical Gans in it, then gradually you'll see it's not there, or it changes color as it gives energy. Q: To multiply the CL Gans, (2:14). can I use the health cup with the AA and do it like the

orange that I transform into the water…. ? … the health cup with the 4 Gans, instead of the orange I would put the CL there .. I wouldn't need to produce N coated Cu and Zn and so I could produce faster and a bigger amount of this Gans. instead of the orange I can put the Gans of the CL there? K- yes you can. (2:16). Q: I would to produce more Gans and faster, K- yes but you have to keep the Gans in there. Anything else? Q: When I hand out the Gans water to family and friends, must this also be inline with the desire to eliminate the virus, to have the intention? K- With or without the intention, it will do. R- Is that because your intention (Mr. Keshe) has gone into the process? K- Most probably. Q: John Argentina - How many grams of salt into 1 liter to make One Cup? K- We advise 15%, 150 grams per liter? K- roughly so, you can do it with more or less, but you get a different kind of strength. If you are producing 2 or 3 CL then use different salinity, (2:18). and then you'll have a collection of different Gans's. And mix them together. Make sure you separately collect the AA on top. When you collect the AA always carry some of the Gans at the bottom into the cup, then you keep the environment correct. Q: It wasn't clear in the audio. K- I have seen that complaint. A doctor in Iran wants 1 hour of teaching directly for him and the Iranian doctors. It doesn't happen, I don't have that 1 hour. You have to educate yourselves, it doesn't matter if you are the only doctor in Iran or many of you. I tried to teach as much as possible. Wow, this is beautiful, I just received the final shape of the Enhancement Unit (EU) complete. Thank you very much Chinese team. .. It has become absolute reality. .. (2:20). I am sure it will save many lives and bring joy to many men in the space. As man said, we are ready to take off. The EU structure is completed, I just received transmission now, and outside it looks absolutely, what we promised. … Q: I think we could recuperate people who are very heavily effected by the Coronavirus, I imagine we could put them in the EU and recuperate them? K- You know ??? that's what you're supposed to do. In space it will become your feeding station, your doctor, material production. Once we show the EU in Tehran, you'll see 2 units in this shape (triangle), one is the enhancement for body and one for material. (2:22). The two have to exist together, maybe we can produce the material that the other one can take, ?? the two go hand in hand. I was looking at the design of the new Spaceship center in Arizona (AZ) and it's gorgeous.. I'll ask John to show. The centers are taking shape, he should show it, not me. … They have designed how they are going to position the 10 units in AZ where the property has been bought. They are working on it, Jamilla the head of ?? is in the US seeing this through in conjunction with John. .. they are waiting for the system to arrive. Maybe next weeks teaching will come from the beautiful city of Tehran, where I'll be in conjunction with Iranian scientists trying to divert this virus. We'll see how we can tame this unruly animal. (2:24). Next question. If I have to go to Iran through the request of the Iranian government to support, I will not be able to attend the court in Italy. Those of the Italians who are here, please record this and pass it on to the Italian police force. I was told that if I give this evidence in court I will become a criminal. I don't think understanding the facts is criminal. There are certain facts missing which the police could not put together and we can shape it up. Please, I know the Italian UC member and other Italians are here. This is for the soul of Fabio, he has to be freed from the injustice that was done to him. I'll explain this without accusation, thoroughly, and exactly on the physical evidence. .. I was the last person to see Fabio alive. As he got into the cars, our cars were parked next to each other, I got in on this side, Fabio and Naomi got in on that side. At the point of

accident the body of Fabio is some meters away, estimated between 7 to 20 meters. (2:26). But the body of Naomi has been found on the drivers side. There are a lot of discrepancies which have to be considered by the Italian police. And it has baffled the Italian police. We got the car and Fabio drove off, and me within minutes behind it. Fabio lives here and I live around here, and we traveled on the same road, the distance is maybe 30 kilometers (to Mr. Keshe's house), and then another about 30 kilometers to go to Fabio's house. I come off at this junction, and F and N travel on. The KS always helped us in our center in Barletta. You have to understand the topography there are a few turn off's and 1 or 2 fuel stations somewhere in-between. The road construction in this area of Italy is 2 track roads, which means both sides of the roads have 2 tracks (4 lane road). We usually drive on together until I get off here and they carry on. (2:28). Fabio was found dead at this position (just before K turns off). The discrepancies which the police couldn't understand is that at the point where the junction is here. At the point of accident the car has been touched, by a truck, hitting the barrier, whatever, rotating, stopping at this point, and the truck driver has carried on and ?? The witnesses have seen things slide out of the car, there is a very major discrepancy in the whole package of this accident. Where Fabio was found on the ground, understanding that the car has gone into a number of rotations after being hit by a lorry. Fabio's body, because again I was the last one to see him, was into coffin. We were allowed by the family to see Fabio, before the coffin was closed, to say the last good-bye. The discrepancy that has baffled the police, (2:30). we have been told the police have made a lot of, this accident they can't understand, is any speed, 30 to 50 KPH, whatever, that the body was thrown out of the car, there were no scratches on the face or features of Fabio, except damage to the back of his head. .. if you throw a body, an egg, or a tomato, potato, even if you throw a stone for 7 or 20 meters, in the speed it doesn't land without any scratches of broken parts. This is what has baffled the police, how can a body be thrown out of the car, thrown maybe 20 meters and have no damage to body only to the back of the head. Strange enough is, when you set the car and put the two passengers, the damage is only to the left side of Naomi's head where she was ?? blanked. We don't se the front screen (windshield) smashed or a crack on it, and (2:32). and we find Naomi on this side when the police arrive. Again what we see is only one damage to the side of the eye of Naomi, with a hip broken. The puzzle is, how 2 bodies going through this crash, and being found at such distances with no scratches or bruises on the body. It looks as if Fabio has fallen on a point, he literally has collapsed. He is flown, stood up , and landed, just as somebody who kneels down and died. There are central barriers here (road) and here. So we presume that he has touched nothing and has flown all the way. And he landed, which is against all the laws of physics. We are not accusing anybody of anything, but as a physicist and somebody who understands the laws of physics, this is (accident) is impossible, and this is what has baffled the Italian police and Interpol. We have seen these kind of falls, when you are hit with a hammer in the back of the head, (2:34). or you have been hit by the side of the head, the way we have seen with Naomi, with a hammer. Which means Fabio was alive and he was attacked by a hammer in the back of the head. And Naomi was alive, and attacked on the side of the head by the same hammer. This hammer is what you have to ask the police and the authorities to check, the size and the position. We need this as an evidence to be checked. Please send this part to the Italian police. I tried to do it and I was told, everything possible, and my evidence will give me 43 years of imprisonment. If evidence from a

scientist is a criminal offense to have, then there is something wrong with the law of Italy. If Fabio's body carries no scars or any bruises, then flying 7 or 10 meters from the car, and only bruised in the back, it means he has been attacked. Now we'll tell you how he was attacked. this is because I am a witness and scientist, I can claim the right to analyze the facts. As you know months before there was an attempt to kill me in Barletta, where the police arrested a black man who came from Holland and subsequently, he was released and he had to leave Italy. What has happened is, (2:36). there is a story behind this. When we lived in the Insano and John as one of the KS who poisoned me. He told me something very strange , he said, I explained to him, how when I was going from Antwerp , from G ?? to Antwerp, going to Germany, a bomb under my car blew, and I could see the parts. I pulled into the hard shoulder (of the road) but my engine was running so I knew I better not stop, I came out of the first exit into the, coincidentally, the ?? shoulder of the Mercedes. What John told me is, "what we do," at that time I didn't know he was an agent of Belgium, 'we make you to go on to the side (of the road) and when you do, they attack you and kill you with a hammer or something.' Which was strange to me, he said, when people, many scientists, when there are people we want this is how it is done. He must have thought that I would never stay alive to remember this, because he was poisoning me. So the plan was when my car was blown up, with my sister and family in it, was to pull me to the side, and then do what he said. Strange enough, we see the similarity (he puts Fabio's accident back on the screen). This opens a number of things for Interpol, and international police, to look at the number of people who submitted patents and new technologies, to the Belgium patent office, and how many of them have been killed, (2:38). in roadside accidents. This opens up a structure, ?? was another, and killing scientists by accidents is another. And they all have patents submitted to the Belgium patent office. This is part of the investigation, we'll open in the European Court of Justice to show. Now understanding what happened to us, it means that if they put a bomb in my car, we have all the invoices from the Mercedes Benz of how they did it, because they blew up the electrical circuit we had to fix. It shows a pattern of work. They had placed the bomb, that was the only night we placed the car outside for Rubin not to wake up, as he was young, the car was outside the secure yard, and they placed the bomb underneath. So it means there is a tracker, two tracker cars, where they wait for you to get out of the car, and then they hammer you. This is what we call into the court as a witness, and we have recordings of this. If this is the case then it becomes like a road accident. But in the case of Fabio, was a puzzle. It means the police have check, we two were tracked out of the office, and Fabio with a faster car (2:40). passed me on going, the trap was set. With this we'll release a very interesting information, because our analysis as a physicist, it did not make sense because, we couldn't understand how in this position the accident could happen, without anybody seeing. We always presumed that there could be 2 trucks, but it still left the lane open for others to pass. We released an interesting thing in 'facts about Derek', he picked it up, and he was writing, which we have a copy of, he talks about 3 trucks, then the solution about the position is resolved. two trucks blocked that nobody can see, the two cars, or the car that is carrying the man with the hammer, on ?? toll in-between. he pulls up, hits in between, and goes. This is why the Italians could not find, because they were not aware of the behavior of the Belgium's in killing scientists. I am not making accusations, because I am the victim, and for this reason, we see other cars in videos, and the Italian

police have to see where our 2 trucks are, as Red Circle has told us, there were 3 trucks, because how do you know if it was 3 trucks if you haven't paid for it. Now this has to go to the police by the Italians as fast as possible, (2:42). that on a Tuesday trial on the 25th, I will be in Iran, the soul of Fabio can be defended. This is a preplanned murder, I must have jumped in going out fast, and Fabio was trapped. It is for the international police, for Interpol, and the Italian secret services, to decipher this, knowing the new knowledge that this is how, an agent of Belgium government tells me, in my face, how I would have been killed in that accident. We need to open up, and see how many patents, and how many scientists in Europe have been killed this way, road accidents, and see if they had submitted patents of a lot of value, which ends up on the desk of the lover of the king of Belgium, who we know who he is. We do not make accusations, we are very straight forward in what we put down. We stand in the courts of law, and we'll show the invoices of the car damage, the position, and Mr. John put on the system to cover. The position is very simple, please contact the Italian police as I can't be in the court, as I have been told that I have been called by the Iranian government to save and proceed with the enhancement for the virus, if I get that call I have to go. (2:44). It's up to the UC member .. and those who love Fabio to make sure this knowledge, as part of the teachings, gets to the Italian police as fast as possible. This is not a theory, these are the facts, and the only thing the Italian police didn't know is that Fabio was working, supporting the KF as a volunteer, and was working with a man who the Italian police have 3 times record of assassination planned for his life. Once in Rome, poisoning in the Insano, shooting in Barletta, now we connect the whole lot through Fabio in this case. You'll have to explain to the police how can a man fly, even you get an egg and throw it a half a meter and what happens, let alone the softest and beautiful skin of Fabio, and no scratches. When I stood at the top of the coffin before they closed it, I said to myself, this is impossible. Caroline said, we both stood there, this is impossible how could he be flying out of the car and no scratches or broken bones. Now we know why. This is a planned assassination, just the wrong victim, because in the other car was me and my son. (2:46). Please take this as fast as you can to the Italian police, the case of Fabio. And I was told, there is a 3 years sentence if we simulate an accident. We simulate in our head, understand the motion, it's simulated on a computer to understand how we lost a friend. If that is a criminal offense then the lawyer has to be imprisoned for making threats. When it comes, the biggest question, if the Italian police can proceed with this, who has paid for all this? three trucks, 2 drivers, are they connected or is this an accident. Then we have more evidence to connect Red Circle to Albania. This is not the place for it, but if I show you the evidence which we'll give to the Italian police, it will be a shock to the whole system, black and white evidence. We left Italy for this, because we were told there is another plan of assassination, but I have the Belgium's on my life. (2:48). If you noticed, that after the death of Fabio we moved to Africa, and there on to China, and now we understand. A young boy should not have a hole in the back of his head, nor a young girl a hole on the side of her head, but they could not find any blood inside the car. My assumption is Fabio came running out of his car after the truck, because he loved his car, and he got a hammer, and Naomi seeing him hit ran behind and she got hit on the side, and put in the car. And all the simulations by the police confirms it is so. My Italian friends we love your nation, but we don't like those who make threats against us. I'm not stupid, I am extremely intelligent but we have to wait, until the court case appears and we

could give evidence in the court, and now we were told if we give such evidence in the court, we'll get 43 years of imprisonment. And if evidence in court gives imprisonment, explaining as a scientist what you see, then there is something wrong with that nation, and there is nothing wrong with the nation of Italy, we love you, and we have a beautiful life with and amongst you. And that was part of the plan, to break up the family of the KF. (2:50). This is the truth about the life of one of the most dearest friends of the KF. It took us 2.5 years to put all of this together, and we waited for the court case, but the wish of God, the life of poor people, and the beautiful life of Fabio, has to be taken to the Police immediately. This is a scientific analysis of an accident the way we analyze Pl T and everything else. There is no accusation but this is a statement of fact, and the police will tell you, how and the shape and the size of the wounds are the same and they look to come from the same hammer. That's all. I hope we bring to justice, those who did injustice to us, as a family, taking such a beautiful boy out of our lives. What made me to come out with it was the threat I received that I would go to prison for 42 years if I bring this evidence to court. I am scientist and I can put, and the police can confirm that I am correct. (2:52). We haven't made a simulation, we understood the situation. Find who is responsible for Fabio's case and let them have this imposition as fast as possible. We'll look after ourselves through international governments. We do not make any accusations. This is a statement of facts, and now police have to understand how the facts have taken place. What we understand, possible, that they have been parked along somewhere (along the road) waiting for instructions, they saw us leaving Barletta, to move in sequence, preplanned. And possibly, the car that did the hit, there could be many people involved. Maybe not the truck driver that was at the scene. But there is one thing, the connection we have with Red Circle ends up with an Albanian. Now you see how everything is the responsibility of the police of Italy to decipher. It was the fourth attempted murder on me, but unfortunately, Fabio got caught. Or was it a plan to kill him, to teach me a lesson to stop and give everything to the Belgium's. They didn't pass poisoning my 6 year old son. (2:54). The damages and losses for the lives of Fabio and Naomi, has to be paid by the state of Belgium. I told that when I am finished with the European Court of Justice, the kings of Belgium will cry for their lives. They told us that is was all dreamed getting poisoned, a dream getting done, now it's the reality, that you come in to. Why should somebody get hit in the head with a hammer, a young boy and girl. the point came when we triggered, I told you many times we release information in a coded way, we push to see what happens. We pushed, and we go the 3 trucks, they made senses to us. The 2 trucks pretending to break speed, slowly passing each other, they had created a scene, in which they could do whatever they wanted. These roads are so narrow that when you put 2 trucks through you can't se anything through them. Please pass this to the Italian police, to further our case, to the Secret Service, (2:56). anywhere you know as Italians. It is your responsibility to put the soul of Fabio at rest. I have done kept it that it can be done in the courts, but I was told that if I release it I'll get 43 years imprisonment if I go to court and give this evidence. And I said, how come, in which country now, that stating facts brings criminality. Even if you fly 1 meter you get bruised, and even if you fall 1 step in front of you on your face, you bruise on the top. What is horrible to me, is the man who hit, was holding him, and they just let him down, that was their mistake. The same the man who hit Naomi, has done it, and pushed her back in the car. And then they opened the traffic, and first ?? ?? lied. I go to prison 42 years if I am wrong. Don't forget I

am one of the leading physicists in the world. (2:58). And one of the top, interaction plasma state, knowing where everything goes and how it goes. Tell the police we want the x-rays and the measurements of the holes, and what ?? , and let's see. Red Circle, (2:58). the bells have rung, the eleventh floor is not high for your crimes. We release the connection of Red Circle to the Albanians, to the Italian police, and then we'll release it to you as public. The cost of such operation, trucks to bring in, plans, at least half a million. Who invests this kind of money to kill a man. A king who has stolen from his own nation. He didn't have a daughter, he is a lair and a cheat. At least I don't need to go to court to get 43, I'll wait until they come after me, and give me 45. The interesting thing is the left side of Naomi's head where the injury is, that was supposed to be with the glass, if she was on the passenger side, she would have been hitting Fabio, on this side, but there is no mark or anything on the side of the face of Naomi. This is what puzzled the police, was how come she had the injury on the side, she was put in the passenger side, after she ran out of the car, with a broken hip, and put back in. (3:00). Fabio your soul is free. Please put this directly to the Italian police. thank you very much. This is analyzing, and making no accusation about the murder. and my analysis is 100% correct when the police come to it. The payment by the Belgium government to Fabio's family and Giovanni has to be much more than an insurance policy. They have suffered enough. Thank you for today and let us celebrate the most beautiful life …
(3:02).

END

317th Knowledge Seekers Workshop for Thurs, February 27, 2020

ENGLISH TRANSCRIPTION:

(:06). .. There are a number of points which we would like to raise step by step. In respect to KF work with the virus, for the Iranians who are listening if you don't know up to now, that tonight at 9PM CET will be an emergency meeting for the support group which has been built up in Iran, and then we'll carry on… We know Brazil has received their first infected person from Italy, and we are looking for the Italian community to come back to the KF, if you need help in Italy then we can set that up. The KF has developed systems that can be deployed we can cover a number of countries as the production comes. It's important to explain in more detail for the Knowledge Seekers (KS) how to protect themselves and to go in the mode of prevention and disinfecting. The stage of recovery is already gone, so if you don't have the virus up to now, you don't need to recovery, it's just to preventing it to come. (:08). As we hear a number of world leaders have been put in safe and secure positions away from public. A number of world leaders will not be seen in public directly for a long time to come. Many ministers have been locked behind their offices, they'll run and administer the government form behind shut doors. The number of these countries are increasing, because if governments loose their ministers and head of armies, the government runs into problems. We have seen in the past few days, the 2nd in command of Iran's health ministry has been taken ill. Many Iranian ministers are being

held in quarantine because of the way the virus was spread deliberately. It was put just before election and at the place where all the Moslems of Shia background go. They sprayed the shrine and people touch the shrine and they carried it. It was a deliberate act, we can see it, and in due course we'll tell you how and by whom it was done. These ministers during election time last Friday, Saturday and Sunday, met each other, they were in what we call, political campaigning. So the infection at the highest level ministerial members of the parliament is very high. The KF has reached out and we have taken a position in which we expect to emerge across the world by different KF organizations.

The procedure that the KF Iran has taken, they have setup what we call, all leading group, which is all the KF, what we call leaders in each district in Iran. (:10). And the KF leader in Iran, Shan ?? has taken the step and has covered all states of Iran, every state in Iran, today is covered with hundreds and thousands of, what we call, Gans availability, for any immediate response. The channel is run 24 hours a day and people literally come online and ask for help, and within hours materials are delivered to them, and then they are taught online how to make it for themselves. I was on call until about 4 AM this morning, we estimate that we saved many, many lives. Children come online because they know how to use the Internet for themselves, families, and people who are infected. Now we expect as of tomorrow morning, a number of Iranian hospitals in Tehran will respond into using the T to prevent and to reverse. This is the job of the Iranian government and officials, hopefully to announce, and if this takes place we'll let you know which hospitals that the T is being used and which doctors so that you can get immediate help. We expect KF around the world to do the same. What we call the immediate response group, is in the background in Iran and it is setup well, and there are doctors and people responsible for each district, and they respond the minute the calls come in. They're responsible, get in touch with the people in the district who are carrying (Gans water), (they'll give) what they are carrying, .. at least they'll give them enough Gans water.

And we have seen from the full report, immediate reduction in the fever and loss of the pain. We are already gathering all of these people to come and give the testimonials to the government in the next few days. The procedure is very simple, you need to setup a headquarters operation, and in each area covering a certain distance, (:12). and in each state, and then break it down to cities and major cities in that district. The number of infected people is beyond the understanding of the present time. What you see on the figures of the charts of the nations, is just for public consumption. The reality is worse and it can't be discussed because most of these ministers and heads of state have never been trained to save their nations. They have been trained to spend the nations money in a way that they should not have, and now there is nothing to support. The biggest problem that we see now are the doctors, elites, stupid educated, what we call, specialists who because it wasn't in the book when they went to school 50 years ago, their T hasn't gone any further. The reality now is people come online, and I literally go online and teach them step by step, what to do, what to expect, and how to set things up to protect. We have cases of children going online, the mother and father and family have all been infected, and they start helping the whole family.

While I was doing this last night and this morning, it brought me a beautiful memory, and is what we call dejavu, repetition of what you have seen (in the past), this goes back to the 1970s and 80s when I was a student in Queen Mary's College, being trained as a nuclear physicist. In many parts of my education, the knowledge was so elite, that it was literally coming off the press. I used to sit one to one with my professors across the table. (:14). They were teaching me from their own books, research, and their own PhD research, for me to carry on, there was no book, it was for me to carry on, it was one to one, and specialized, how for example, to control nuclear reactors, how the nuclear bomb was running out of control, or what we have to do if it hits a nuclear power station. It was a strange thing as I was helping this little girl, it was the same feeling, there was just a 50 year age gap. I was in a position where I would sit across from the professor and being taught the edge of science, that nobody could imagine. The nuclear T was so advanced, and now I am teaching youngsters to save their lives, one to one. You see their gratitude, their kindness, how they absorb and observe what we call the T. This T has a big problem, it is too advanced and humanity and humanity was kept in the dark. By the events we had, if it would have stayed in line with the group of pedophiles, and heads of nations who are heads of these pedophiles, with what we call, the "free-energy" group, they would have killed many children. (if they hadn't stopped us) this T would have been across the planet (by now) and very well used. But unfortunately or fortunately we are in this position, and we have to make the best of it. Our total loss from the virus up to today, in China runs beyond 5 million. We do not exaggerate. They tell me they have confirmed that China passed 1 million some weeks ago. We are heading for the 5 million mark, what we call, losses. The Iran situation is building up to be in crucial condition. It is not the figures which are there (being shown). Italy is next in line. (:16). We estimate that Italy will loose massive numbers in the coming weeks. The problem with this is very simple, but now we see a tailor made disease. You have to be prepared for such an eventuality, it's beyond deciding who gets infected and who gets benefited. It's like this, China got hit, Iran, and now Italy got hit. Strange enough the American President is supposed to be in India for a big transaction to swipe off the wealth of the nation, he is in India. No reported cases. We see the same in America now taking hold, all by those who flew from Italy or at the same time we see the conditions. Western Europe will be covered in the next 2 weeks.

The problem with the KF supporters is, you are caught, what we call sleeping on duty. Be prepared this is taking hold beyond (imagination). The Chinese government reports no contamination in some 20 plus provinces. Increase in the original position (Wuhan). India very few, holding back for the president to leave, and siphon the money for his business expansion in India, as now it has become his center point, he wants to change to India for the headquarters of his empire, and siphon everything off. (:18). We see that very clearly. The problem is that the US is going to get hit very bad. As I explained in part of the teachings very recently in the past few days. What the plan was, was just hit, to disable, and start a new kind of war to take over. But the problem is deeper, unfortunately the Italians took it from the Iranians, and they have taken it across the world. Now it's not the Chinese who took it first (spread it), now it's Italians and Iranians in the Middle east. Now isolation starts, and this is the problem we have. The KF supporters, wherever you are, equip yourself with Gans waters as much as you can. People will call you back when

they need as they know they have no hope. We had a case last night on the emergency backup in Iran, a gentleman came in and made a lot of accusations that this is a money making scheme, you have done this, . your are fraud and the rest of it, and insulting all the backup system and even going into the private Chat. And 2 or 3 hours later he calls back, crying, he wants help for his mother. Apparently she is infected. This is how people change. This is the shape of the things to come. This virus is tailor made and tailor controlled. China with such a massive infection, and not reporting anything in India. With such a massive infection in Iran and we hear nothing in India. India is fabricating figures and India is being controlled until the President siphon's their safes, and central banks through contacts. contacts in the name of his own companies. This will be disclosed later on. (:20). But the reality is, back to what I said at the beginning of the teaching, every man is on his own. You are the last man standing. They have tailor made the genes into the virus. That's why the Italians got hit, worse by the Iranians and it will spread. The infection in Iran was supposed to damage the Iranian structure so that the American military could attack at the point of weakness. But one thing, as I explained in the other teachings, that these people didn't calculate, these two nations (Iran and Italy) share a flag, but in different directions. The genome base in Iran and in Italy is very close, so the Italians picked it up. Now the Italians live in North America and the rest of the Americas. What we saw in the last few weeks, every Chinese restaurant in the western Europe and most of the world became empty, as people refused to go to Chinese restaurants. Now we see that the Italian pizza places are getting empty. Then where do we go next. Shutting borders has started. Trying to hold back has started. We expect a massive, a massive natural disaster in China. It will be followed with floods and probably with droughts. The only problem with the Chinese is, is very simple, nobody will be there to help. As they are infected nobody wants to get infected with their infection. The same can be said for Iran, and go right through Europe. (:22). Now nobody is prepared to send their people to save the others. Again it has become one nation, all standing for themselves. This is how this was not calculated to be. Now it has turned up to be that way. The biggest loser in this game will be the USA, you'll understand in the next 4 weeks if the events take place the way we see it. The state of Brazil has had its first report. Soon we'll make an announcement on the Brazilian Chat line regarding supporting Brazil. The Brazilian KF, you have to setup things the way we have done it in Iran, by setting up an emergency team, and through it, you'll find out who is holding Gans's, which state and how fast you can get to the KS. The KF Brazil has to become active directly with all the Brazilians that are there, and a structure to be setup that it can carry on. All the doctors, who is carrying the T and where. This is important for all of you as KF KS, there is one thing for sure, the KF management will have followed the procedure, and if you follow the procedure we put out today, then you are safe. We don't expect any mortality within the KF across the world who are familiar and use Gans's and have made the Cup of Life (CL).

.. (:24). … (someone is trying to being smart on the KF We Chat.. it's been removed) We had that the whole night, and yesterday people posting .. R- I put in a complaint and I think they acted on it. … K- We had this on the Iranian channel all night, absolutely as we were trying to save people's lives. … It's done by the people from Germany, we tracked it, it's done by the Red Circle people. We'll inform you further while we are explaining these things. The Italian police investigation on the murder of Fabio officially

has been passed on by the KF supporters to the Italian police and they are following it up, and if that procedure takes up, we'll take it up and we'll request for the arrest of Red Circle immediately, because we have enough evidence. This is what they are doing. It all comes through Germany and we are monitoring it. Because don't forget these people have no scruples, but that is their problem. What had the 2 or 3 ties last night and I have to delete them. (:26).

What is important for the KF KS, make sure you have everything and enough to give to the others. We'll open a channel to each country. You do not open a channel to support your people, we will control every channel through the KF that people of that nation can come in, and that we can monitor, because people are in a panic, and many people, even the old KS, I do not know how, they can't support it and give the right information. So we'll try to put everything into a central organization, into what we call, Central committee organization of the KF worldwide and we'll support. Italians we'll give you a chance to come back in, on what we call, "Italy support", you talk in Italian, we'll monitor and come in when you need help, and we'll allow the Italian public to know to come in. This will be setup by today. Don't setup anything which is not under control, because we need to be able to support you.

In the coming days, this announcement will come internationally once we start holding and controlling the condition in Iran, within the next 7 days. The Iranian Sepah teams will distribute the T across the planet in groups of 30 to 50 officers from the Sepah of Iran. This means that the only people who will travel into China during disaster or into Italy will be members of the Sepah, equipped with the latest knowledge and T to support nations. As we said, Sepah is universal, and we'll bring this beauty of Iran to all the nations. This is important for the Iranian central government and the Iranian Sepah to be ready to deliver this within the next 2 weeks. The Iranian Sepah will be part of the international rescue team, and most probably the only international rescue team, (:28). which will carry all equipment necessary to support hospitals, governments, and officials, until they train the officials in the right way. This is the only way we see, that we can use such an elite force dedicated to the safety of a nation to safeguard the international borders and the governments. These are not mercenaries, these are men of peace, trained to reverse the conditions of what we call, Coronavirus, which was spread by the Americans. As usual, the Iranians have to clean up the mess these people create. In this way we'll announce the collaboration with the Iranian government and the Sepah of Iran, which groups of Sepah. The foreign offices will contact nation by nation, and fly in the latest equipment to deliver the T to safeguard and then do mass teaching of the KF to develop. One of the most important things for the KF members is, as such, do not dismiss anything. Do not dismiss a single call, do not dismiss a sweat.

Checked to here ..
(first Summary excerpt to here … how nations should respond)

Second Summary excerpt how to use Gans for Virus>>>

I would like the KF team in the background to record this part from now on, because this is important for all of you and your lives, your families, can depend on it. The first thing you have to know, as I explained in the other teaching and I explain again in detail how this virus works, and from the mental point to understand is, (:30). this virus mutates. This is one thing that the Gates Foundation did not calculate, they wanted to change the code, that it reduces the population, but one thing they didn't consider is the mutation of this virus. How it mutates we'll come to explain later on, but we have seen in the Chinese and Iranian structure is that you get rid of, or you solve the problem with the virus, if one is left (over) it mutates to a new one, (and again) if one is left it mutates to a new one. Every time it mutates it becomes stronger. The reason it mutates, is, because now we understand the KF, through our knowledge, is that viruses are packs of energy in which they encircle magnetically, by their field, the cell in the body. What is strange for other people is that they do not understand how this virus is transmitting, for example, from Iran to Italy. Go back to the knowledge, as you know, M fields travel, and if you have of the same strength, and being from another part of the U, will reach earth, that's what we see in the depth of the stars, in the deep sides of the U. As you saw the map, as I explained, what is a clear indication of why it jumped from Iran to Italy, is because the Iranians and Italians are deep rooted in blood for centuries, (:32). and it was obvious that the next step from Iran was Italy. As it jumped, to jump further, it has mutated to become stronger. These people infected the environment in country, but they never counted on the plasma technology of the virus. Now we see that it is rapidly mutating into North America, as many Americans are of Italian descent. The problem is that the Italians have taken on corner of the US, and the Iranians the other side in Los Angeles, and the disaster covers the whole of this nation. This is what we see clearly, and that's why it is rapidly growing in Italy, and why in Iran. The other point is that what we saw in the change from China to Iran, was very clear. I was expecting this, and when it happened I understood, that once they seeded it, it spreading very rapidly. Why, for centuries ?? cercloid had mixed blood. Now you can see. This genetic modification by the gene itself, will circle the planet. We are in the ages of man destroying himself, by the greed of Mr. Gates. When you buy a patent to destroy, it destroys you. Now you understand how it will go. (:34). What is important for you to realize that you cannot stop (it), just because you have gone (started it). What has happened is the virus has made a link into the cell, through any of its combinations of Amino Acid (AA). What is strange, and what you have not understood, and the world of medicine doesn't understand, is that this gene has emotion. This gene, when they set it up, they never understood the world of physics. It has created its own soul. If you look at the crown, what we call virus, it's like this (draws a crown shape), then it has a second circle. The existence of the 2 leads to creation of M fields, which gives it the life to mutate. This is why it is called the "crown" virus, and that is why they call it Corona, because it sits like a crown over the cell, exactly what we explained it does for the past 10 years, how the virus works, how the virus is. The shape of the "Crown" or Coronavirus is the shape of embedded, encircled 2 M fields. One of the plasmas of the AA or the cell, and one of the energy of the virus. (:36). It has created its own life, and this will take shape further and further, and it mutates. Man went from Africa to Asia, India and China, and he mutated by shape and colors, according to be able to survive. This virus will be with us for a long time to come. It envelops and encircles the whole cell.

The logic behind this, by the Gates Foundation was to reduce the population. My message to the Gates Foundation is very simple, we are 7 billion happily living on this planet, we have our own faults as a big family, if the place is too small for you, you don't need to eliminate 7 billion, eliminate 7 members of your family, then you don't need to suffer with us. What we see and what we have requested from the Chinese government, and very soon we'll release the data, we are aware and we know, as I have said before, mercury, aluminum, and lead, are playing something in this virus injection. (:38). As we saw with the Children's immunizations, we could be heading for another disaster with so much poison in the body, from the injection. It is time to tell, and time to see.

In this process you can see how the virus is changing and mutating. It's an energy which has found the energy of the cell, and with it, it has created its own soul, which means it has a brain and will dictate where it wants to go. And it has so many diversions, it's energy pack, which will go down the race channel to every nation. Now that you understand how this energy is transferring, it's very simple, the cell as an energy pack, needs an AA, a protein, your skin on the table, or your spit on the chair, or your sweat somewhere else, and as these (AA's) are weak, now the virus makes a connection to feed them, because in essence, they came from the same AA structure field. This virus, (:40). is transferring itself to the left over residue of the body of the man. That's why when you touch the bottom of the lid, or touch an object which somebody else has touched, it has (gets) carried into the weaker structure, and then it encircles it. You invite it by touching it, it connects first to your cell, and then it shows itself. What is interesting, if you go back to a few teachings before, I spoke about the emotion of the animals and that's why it came from the ?? In this position, now you understand. This virus has emotion. What is interesting, is, very simply, it has a deep emotion. It means it copies the emotion of the man who gets it, this is why some people walk away with it and initially it is good, and then they catch it for a second time and they die. The sign of emotion of control of this cell became very apparent. The brain, the skin, and the cell of the lungs, are part of, are main part of operators, of the emotion of the man. As the skin, the brain, and the lungs are all of the same cell, (:42). So what happens, is very strange, when you have an asthma, or an emotional problem, then you see what happens with your breathing. When you can't speak, or you get distressed, then you cough, so this shows the true nature of this virus. And once it enters into your emotional cycles, or your emotional system, which your lungs represents to you. This is why you get asthma attacks and you spray yourself to kill it, but you don't sort out the emotion, this time it is a very powerful asthma. What we see from all the reports in Iran and China, are a very clear pattern of asthma attack and then with a heart failure, but they call it an infection of the lungs. In a way it's an asbestos, a very strong, powerful, but alive and decision making. Let me explain to you how you die, this is from the reports from the Chinese health authorities and directly from the hospitals in Iran, from the doctors. That's your body (draws them out), these are your lungs, (:44). this is your heart. The virus enters through 2 channels, breathing in through your nose or in through your mouth. Go back to the teachings, this is the Soul of the Man (STM), and if you understand the depth of the knowledge the way we do, as I told you, the virus is a living thing and he has a soul, and he has created himself an emotion, in passing in your, breathing channels, it transfers its emotion to the

soul, and then the soul understands and tells it where to go (to the lungs). Because soul can't show the pain of the core feeling of the virus, so they create. It's in your arm or leg .. then it tells it where it's needed, and how it can show its sorrow and pain, to the body itself. Now you understand how you absorb it. How the brain and the soul have decided, this is where we create a condition for it to find a place. In this process, as it takes position, (:46). your lungs according to the scientific data gets flooded, as it tries to create food for itself, it changes the condition of the lung and then, it lives. What we know, as I explained to the doctors before, what we know is that each lung works 1 hour on and 1 hour off. Even though they work, operational exchange of the energy for the blood is done on these sequences. Depending on when the virus enters the lung which is active, or maybe the lung which is inactive, and at rest and not ready to defend itself, allows the virus to set in, so it grows. By the next breathings, and the change of time, the second lung starts the transition of the virus. So what you have, is a more advanced one working against the weaker one. The 2 lungs start exchanging energy to build up and to support each other, and we see the lungs getting flooded, and change of condition. And the strange thing is, the Iranians doctors who have been witness to many deaths, they report, these people are extremely healthy, they are young, and they are athletes. There is a guy who came in who is a mountaineer, and out of nowhere they see cardiac arrest and in the last 5 hours they die from cardiac arrest. All the patients with this virus die of cardiac arrest. (:48). Now we understand how, as I explained in the other teaching, in this process of the exchange of the energy, between the 2 lungs, as the get everything, now they lock into the energy of the heart, and the heart brings energy from the rest of the body and they consume it. And the heart cannot cope with serving the body and the virus, and it goes to overrun, and heart attack, and death. Now we understand the process we are dealing with an energy transfer, and emotionally, with a capability to meet it.

With the traditional medicine we know a lot, but with the new Pl T of KF we know how. In the Cup of Life (CL) which I gave you, I specifically, what I did, I accommodate this. I gave you a Cu, Nano Cu, and a Zn. Some of the Cu, are the element of the Zn, so you produce a ?? certain amount of ZnO, and the Cu creates your CuO, and the Cu and the Zn gives the CO2, now you understand why this water works, and why we insist on, if you don't have the Cup, of 50% Cu, 30% CO2, and 20% Zn (Gans's). (:50). If you understand the teachings of the KF over the years, Zn is the elevator of the soul. In taking, breathing, and covering, you keep on strengthening the soul, for it to strengthen the soul of the virus, to give it satisfaction of life. This is how most of this process of reversal comes. CuO is to take the energy from the virus, CO2 is to create the connection, now you understand why we set this process.

Now I want to explain to you how you can check first to see if you have the virus. If you don't have Gans's then you can test using what is known as the 10 second breathing trial. Everyday in morning or during the day you hold your 2 nostrils, by closing them with your 2 fingers and you hold your breath for 10 seconds. If you don't cough or you don't run out of breath, then it is 90% sure that you are okay. But if within this 10 seconds you are forced to cough, or you feel an irritation in your throat to cough, or you see that you can't hold (your breath), you are 90% change of having receive a kind of infection by the virus. (:52). It depends on which stage you are in. Then you'll see sometimes, around 10

to 25 days from the first day that you test (yourself) and you notice this (that you can't hold your breath), you will show fever and the rest of the (symptoms) of the virus infection. The reason is that, this virus takes its own root straight away in the lungs, so they are already carrying the virus, but they don't see it. This is what we call matter state testing.

With plasma testing the process is different. If you have made yourself the Gans's of Zn, Cu, and CO2, you can do 2 things, if you spray a combination of this (Zn, Cu, CO2) Gans water, or if you spray the Gans water of the Cup of Life, on your head, chest, and back, once a day, or twice a day if you are worried, and if you feel pain, headache or pressure, you are 100% infected. Don't go for psychosomatic or placebo (reactions) because you have done it, you have a headache, but try to understand if there is a pressure, it's a M field pressure. Is the pressure you feel, energies transferring inside you. This is what we are looking for, not the headache that I take aspirin for. If you feel on the head, it means the energy transfer from the Gans to, what we call, (:54). the soul, is taking place at a high level and that energy transfer creates heat or what we call, M pressure. If it wasn't there, it cannot make it. The same is between your lungs and the Gans waters you put outside (spray chest). We told you this before about the pressure. People say there is a pressure and they can't breath. Even in China we have seen people who report pain when they use the Gans. You can use, ?? on certain ways, or 90% (holding breath 10 sec for 90% certainty), or you can check 100% (with plasma test). This is the procedure that will be used in the hospitals by the doctors, when they start using the Gans T to identify if people have the virus or not. First through the physical (test) and then through the Gans, and if both are positive, then you have it. You have to understand, if you can make for yourself, 3 or 4 different CL, even though they are all from the same material, whatever, they create a slightly different strength of Gans, and you need this to cover yourself for the long term, to be covered for any mutation of the virus.

(Procedure Using Cup of Life for Virus)
At the same time, when you think that you have it, (:56). immediately, your immediate family, the people to where you have been, you go back, you inform, you give a CL, you give a paper that says this is what you have to do. 'I think I have infected you, you had better cover yourself.' If you go and you are not aware, or you have overlooked or whatever, we'll start the next process. He draws, this is your head and body. You have to follow this procedure without failure. As you have understood, this disease effects the soul, and the lungs. In that process the Soul of the Physicality (STP) which is the heart of the man, is in between (the lungs). So what you understand, the minute you are infected, the chain has been built. The separation of the physicality from the soul starts, because they are aware of what is to come. You need to support both, the process has to be in this way. (:58). The first thing you do is to spray your chest, wet your chest with the Gans water from the CL every hour. This is on the condition that you are infected. For prevention we have come too late. Every hour, once you have touched it (you are infected) and have a headache, and you felt the tightness of the chest (after spraying G water on chest), and you cough when you did the test. The next step to do within 5 minutes, you put Gans water on either side of your lungs, what this does, is to transfer the energy of the virus into the Gans, of what you put in, and this will dissipate into the

atmosphere or to your clothing. You are depleting the virus energy, this is all you can do. Don't forget the heart is in the center of the two (lungs). If you look at it, in reality, with your brain (as top reactor), you have made your Star Formation, and in a way it gives the chance for the soul to take its flight. Then what you do, after you have covered the body, immediately, you cover your face with the spray or the wet of the Gans. Then you spray Gans water around your head. Please do not try to wash (your head). Again by the same principle you transfer energy out (of the virus), (1:00). and at the same time you transfer energy in, to satisfy the soul. (Spraying) the face is to take the energy from, if there are cells effected, or have landed on your face. The head is to elevate the soul, because of the Zn. The third step is to take immediately, Gans water to wash any possibility of any materials of contamination to be present, and at the same time feeding the soul. Every 15 minutes to 1 hour you take one sip of about 50 mls of GANS water. Now the next step for you is to put the GANS water in what we call Hubble bubble, or a Shi Sha or whatever you call it, or make it coca-cola bottle with two holes in it and put a stick in it or a pipe. Put a straw to the bottom, and a straw up, and fill it up with the GANS water and you inhale for at least 10 minutes every hour, and what this does by inhaling, you take the energy inside, and by having the other energy which is weaker outside on the skin, you deplete the energy of the virus. You will lose your temperature within the first while, if you have a high temperature, (1:02). it should come down within one hour, three hours maximum. The fever goes (away), but do not get fooled. If you had a cough, and depending on how bad the lungs were damaged, it will repair itself over the days. You might loose most of the irritation very rapidly too. The sweating will go. Once you've gone through this process you'll carry on for two to three months. The strangest thing is you will stop somewhere. This is when the soul is satisfied and informs the arm to not give me any more water. We see this with all the technologies. When I used to help people I always told them, when I gave them the system, they said, when do I stop. I said, .. The day you say, 'oh I forgot to drink,' is the day that you have reached the steps of completion. You bring the system back. Because when you're not hungry you don't eat when the body doesn't need it, you'll find out you forget doing it, because there's no need for it.

This is for recovery, spray your body, your lungs (chest) and back every hour. If you have seen the positive sign (when you do) the breathing and the Gans (Test), then spray the face first, every hour, then spray the head every hour (1:04). You do this for 3 days and after that you step down to prevention, that is you keep yourself safe, 2 to 3 times per day, then you drink water every hour. Then you inhale every hour for 10 minutes directly with the Gans water. Please do not drink from the Gans itself. If you follow this process you stand a good chance of surviving the situation. Those of you who don't have the 10 second problem, and the 90% with the Gans's, and you feel it's okay I am not infected, your life doesn't stop that way.

For prevention spray your body every morning and evening, right when you get up and just before you go to bed. Spray your face every morning and every evening, spray your head the same. During the day you need to drink at least 300 to 500 mls of the Gans water, (1:06). in stages, and you need to inhale at least 1 or 2 times per day, for 10 to 15 minutes. This is the recipe for prevention of the virus. You have to do this with all the

members of your family, the cat and dog, and the door handle, you spray the door handle, and everywhere in the house, ... When you make your Gans's, the first Gans's that are salty, you don't throw the water away. You can use that saltwater to spray in the house and the door handles, because that residue rubs off and keeps some of the Gans holding energy, and it can disinfect, or gets the energy of the virus. The sheets, pillows, the bus you get on, don't be afraid to spray, or to be called a lunatic, it's my life. If you wear a mask, always spray the mask before you take it off, and wait 3 minutes, then take it off, because the Gans will go inside, and change the position of what we call, an equal ?? . One of the worst things that people keep on telling you, is that when you put a mask on your face, don't touch it, because if the virus has come, it sits on it. But the biggest problem is the other way, you have breathed into the mask, and if you have the infection, the mask is infecting the others. (1:08). When you get the mask, make sure you drop it in a Gans water of CuO, or a CL, make one box and put Gans water in it, and drop these masks in it, because you have to deplete the energy of it. If you put it in a plastic bag, as I explained, the plastic bags that they advise you to do, comes from the lack of understanding of the totality because, if you remember and you see the connection, COHN (AA) & C-H Bond, of the plastic, now has become a breeding ground, for holding to the virus. Never, ever use a plastic bag to put your mask in, a paper bag is okay because it is still alive (the virus), but you can control it, and you can soak it and it goes. On the other hand, remember to wash, to disinfect your hands with the Gans water. When you get on the plane or bus, spray the plane or bus (your seat), because not only do you disinfect for yourself, but also for the others. Be very, very calm, because this one thing, using the T, you have most probably protected yourself well enough. The KF, as we see the KS, they have had no fatality up to today. We get infected, but because we continuously use the materials we protect ourselves. As I said to a KS a bottle of Gans water in the frig, is like a ?? bottle of pure drinking water in the frig, (1:10). when you need it. Now it comes your environment, in the environmental energy pack you have to be very careful, whatever you touch, your fingerprint is the carrier, it carries an amino acid and with it the infection. Whatever you breathe is the carrier, wherever you sit, sleep, touch, or kiss (is the carrier). Anything which has the amino acid combination, which is this (COHN), is one (a carrier) .

We are looking, we are not raising an alarm. We are looking to see that the combination from iron, if would ever change to magnesium, then we'll start seeing infections among plants. The AA is the same, the only the difference between the iron and what we call, Mg. We have had two reports up to now of skin being agitated when they spray the GANS on it. It doesn't show any rashes at the moment, but it's skin irritation. (1:12). We are watching closely, if you see when you spray the Gans on your skin and you get an irritation. We are of the school of thoughts that, as I said, the brain, skin and the lungs are all the same. There is a possibility, but we have only seen two cases up to now, worldwide, of the reports we have, that the virus through its mutations, is moving from the lungs to the skin, and if this happens we do not know, but assuming we are right, you will see, literally flesh disappearing and getting infected. We have not seen this stage yet. Mutation to the strength of the skin of the man in the level of emotion has not be seen, but we received two reports and I informed the Iranian team to watch for this.

This is a total understanding, you need to understand the totality of this. You have to understand the emotion of it, and this is crucial for the Knowledge Seekers. There is a discussion if we can use dynamic systems for this virus. Possibly yes, possibly no, or possibly the dynamic systems become another trap. (1:14). We can extend the virus in, but we can, from the dynamic system to the body, spread it. Can we use what we call, the new systems, globally made? Yes, it can be done. The first system the first what we call station is getting built and getting ready in Arizona by John. And the structure will wait for Iran and China. There is one matter, and that is we will not complete the technology in China, as Chinese are very fast misleading the technology and then threatening. We deprive the nation of China from stealing again. In a way we don't let them to commit a crime on our behalf.

(Summary 2, ends here)

>>>>
(Proofed to here >>>

John is here and he can show you. As you know the building for the first Enhancement Unit (EU) Center has been bought, and he's getting it designed and should be ready, hopefully by April, it will be ready for worldwide use. Is John behind the screen somewhere can you see him? Yes I am here. (1:16). John would you like to explain to us what is your a step at this Center and show us what you are developing. J- Okay, so we are actively pursuing … K- We can see your full table. Yeah we see all the pictures, you have to open it before you open it. You have to open it. Yes but you have to open it as a folder screen you see all your pictures. You gotta open what another time before you share it stop sharing open up one bucket and stop sharing it open the screen the picture you want.

This is how most of centers around the world will be, more or less according to place and the condition. Arizona carries 10 units, six units is for what we call enhancement of the body, and four units will be used for development and testing of materials, space conditions, environmental changes, and others. We're trying to share the Arizona Center with American Space Agency and Iranian Space Agency, for deep space trials. This is one of the beauties, the common man will use the center as a scientist, watch and develop technologies for a space. (1:18). As we said, the Keshe Foundation (KF), and the American Space Agency and the Iranian Space Agency working together in one team, and then we share. In this part we will not allow any Chinese interference or involvement, as the Chinese steal technologies. They don't share. We need a clear indication from the Chinese that they'll stop this behavior. We allow them to share, and we planned to share, but they shown the other way. Would you like to take over please. Yes. John you can see the picture? … J- So this is a concept of how we're putting our facility together, we're getting some help in interior design and layout by other knowledge seekers. We have a team of three beautiful women helping us put this together. Including and Argentinean. K- Women again. J- A French woman, and a lady from the United States. So you can see these, they're helping us dramatically in terms of

coming up with a concept that we feel is going to be beneficial for showing off the technology. (1:20). Let's see if I can just go from one picture to another. Hit your left to right arrow keys in the keyboard.
What next one the left and right arrow keys on the keyboard miss recommend it I'm sorry I'm gonna do it this way you see that it's still the same picture says my screen sharing this pause did you pause me mercy resumed sure go out on come back in okay now it's working okay no no

That's another picture the other side of the of the building. This is our front entrance when you come into our building. We wanted to create a new environment before you even came in, Welcome to a new era what we're doing is changing the dynamics of the way we do the way that we do things. (1:22). We're very excited about what the machines can bring for everybody. when you walk in the door and you see this demonstrating new space technology to the world it's so it's more than more than just the machines where we're setting. What we want to do is introduce this technology to the governments of the world and part of the beneficial wellness technology that we're bringing will open people's eyes to what it is that's coming forward and we hope to be able to demonstrate some other features that will allow people to really take notice of what these machines are all about. This is our conference room we set it up with what I call the City of Hope. The City of Hope is the vision that I hold call it a wish for creating a new community call it a light a light city of light with our thoughts and our emotional energies. Anybody within the knowledge seeker community wants to add their energies to the City of Hope please help support it. We believe it's going to be a community where new technologies can come forward to help everybody. So that's part of our dream so anybody that comes into our conference room, (1:24). They can share and our dream and our wishes. So that's what we're doing in Arizona. We have a large facility. You only see a piece of it with the other buildings but with the other side of the facility we have a lot of office space or we hope to bring in doctors technicians to help us start the document what the benefits of these machines will be in the shear videos and in correspondence with the rest of the world community. So that is what we are doing in Arizona. Any questions? K- I have, somebody is asking me can you show us the room again with the machines or do you have a top view of it. We are going to put some recessed lighting and star lights. This again is the dome, we're building a big dome over all of these machines. So you're gonna walk in this room, you're actually gonna come in down here at the bottom of the of the screen. You're gonna walk in and you're gonna see all of the machines, you up here in the front is where the operators will be these things will slide apart you see this one's this little part here and the patients will be in here. (1:26). You can actually have a little seating area in the in the center area here, where people can also sit and get the benefit of all following machines. K- I'm playing with the thoughts to maybe show you the real system. J- Ten elevated souls sitting in that 12 elevated souls, standing in. Did you hear me John. Yes. I said I'm playing with the thought to show the real system sure. It's been built and it's exactly as you have put it. We will wait for a few more days, maybe a couple more weeks, and then you see the real machine, as you have shown. The machines have been built and they're getting assembled, tested for assembly, and everything else for what we call the units to be put in. It looks exactly as you're showing. The Chinese team and the factory have been working trying to get it Austrian team as well for ??

during the holidays and everything else, (1:28). to get everything ready. We have the unit's structurally built, because there's a lot of testing to be done, to get everything smooth and perfect. It's exactly as you show it. I would love to share the picture, but we'll wait until it's done properly, position wise, as now it's going through its assembly section. It's amazing, what you show, and what I see on the picture in front of me. It'll be hopefully completely completed, sometime in mid-march when everything goes back to normality in China, and then we ship it out for testing and assembly final in April. We can produce up to 500 units a month in progressive months. This is beautiful, it was as a politician told me, he said, it's just extends the imagination. But it brings us back to the womb of the mother, how much it would imagine. It's very beautiful, they're gorgeous when you see it. When I saw the first pictures of the assembled units, it's amazing, it's absolutely amazing. There are three or four teams around the world, working around the clock to make sure these are out. The first 20 units will be delivered in April. (1:30). We

First transcription to here

have everything set up for it and a completion of the chart with the 20 units in June. We'll start the mass production 500 per month. It's literally program playing unit and we're waiting for the head of the KF on the medical side to take his position, and then we'll start playing. The thing is that the first pictures are the real building, which is from now on within the KF structure. Now you see how it's going to look. This price will bring the STM together and it's beautiful. We will see the same thing in Tehran, hopefully once we tame the situation. We are still carrying on with the Tehran conference as we are sure we'll secure Iran from this disease within the next few days. Our forces are starting, and Iran will be the first nation declaring (itself) free from all viruses and an open city. I have made every effort and I'm sure the Iranian government's will do everything possible. We'll see these kind of centers from now on across the planet, in Brazil, Austria, and hopefully in a little Island in New Zealand where everybody is waiting for, and across other places as we learn and develop and release. These machines will be part of the learning curve and using curve, (1:32). which means we learn again and our scientists will spend more time to teach us more. Thank you very much John. It's a lot of effort work and relentless work of John, Jamila and the others. We will see the beauty of this technology in the coming weeks, as I would love to show you the video of it, but give us a chance we have to do it properly and then you will see it. It is strange with this virus, a lot of things changing, we had a report yesterday that one of our teams KF in Tehran went outside to give a Cup of Life (CL) to somebody on the street and show them our papers of how to do it, something in that order. He noticed a woman walking with four bottles under her arms, says this is a GANS plasma water. She bought it from a shop. This is for Corona. As you understand, the people in Iran listening and making the waters and selling it on the counter, and people buy it. My hope is that they don't sell empty bottles. We'll carry a certification, and you'll see this right across the planet, the plasma water. When you see a logo with the KF plasma water, which is supported by the KF, (1:34). the figures they can check to see if it is original, because we'll produce labels for every system, which whoever carries the Keshe Foundation certification, can put it in the market. Then you'll understand how far it has come. Everyone walking down the street, accidentally carrying a plasma water for Corona. She knew apparently, exactly

what to do with it, the shopkeeper explained well about what to do with it. The beauty of it is, exactly we are going through the same situation as some five years. We gave the key (USB Stick) and the government hide it and did nothing with it, then we taught you, and you ran around with a lot of things. We gave the T for the governments to approve. They didn't listen, so the people have taken it and are using it themselves. I said, how would I know that these waters are really a good buy? I said very simple, two things, trust it and see if the alkalinity is there, if you can, and secondly sprayed it on your body and wait and see if you feel any difference, then you know, and you'll say if it is real or just a fake. In so many ways, mankind has entered this space technology collectively as I wished. Again as I said, the man would accept this technology, not out of it's beauty, but of the fear of his own demise. But as I said, we all be ready, by this time very soon, we'll all understand the plasma and the Gans technology, (1:36). is because now everybody needs to know how to save, (themselves with) Gans plasma, and the KF will become part of the world vocabulary in the in the coming days a weeks. This morning we have received a request from a government to respond immediately. I passed it on to our team, for documentation to be released for it. This week we have flown systems across the world, a new technology systems, to be delivered to governments. Yesterday, the KF in one of the nation's received a call from a University, they want the hospital to use the technology. This afternoon we'll meet with bunch of doctors, who want to implement the technology, as there is nothing (for them to use), and their patients are dying. We see the reversal. There is a picture which was shared on Thursday on the screen, and on Tuesday's One Nation, One Race, One Planet. Rick would you like to show the picture please. What is interesting is the difference. We see the Chinese using gases and what we call, the huge white smoke, and then we see the new Gans technology implemented in China in recent days. The Gans technology, the waters which have been supplied by Keshe Foundation knowledge seekers in China. He's got Korean writing in the background (of the picture). From gas to Gans technology. (1:38). You can see how casual they are. The Keshe Foundation knowledge seekers through Chinese army or are distributing over 1 ton of liquid today as they tell us. We have that conversation recorded. Thank you very much Jack. On the other hand, if as we said, you can interfere with no one's life and you can save your life, that's all it is. You are the last man standing. This virus is a prelude to what mankind will come to understand. Many of us traveling from China to Iran to Italy to South America have brought with us (this virus). But it'll be very much the virus brought from Mars, Jupiter, or from Planet Zeus, which is the energy pack that does not help humanity. This is a pre-run of what are we going to face worldwide, once we open the Universal Community (UC) to the man. So in a way, my teaching you to use the CL, you'll carry this cup of life and the knowledge of it, into the depths of space that when you need it, you don't bring your extra energy back to us, to contaminate our environment. What you saw just now from John with the Enhancement Unit (EU), it'll become the decontamination of virus unit, for those who become the travels of space. (1:40). As you see, the technology is coming together very rapidly, in every shape or form, the collapse of leadership, collapse of monarchy, collapse of what we call the monetary system, and a pharmaceutical, controlling and dictating, with whatever they would like to threaten the mankind with. Individual extension of the soul of the man by the man himself. Extension of the ability to support and understand the technology to live on this planet and beyond by total understanding of the technology, of the creation of

Universe. If you read my book #3, the Original of the Universe, you'll understand that what you are going through, was already written. It's for you to decipher. Try to be the user, and understand the plasma out of your pleasure, not out of the fear of it, when it comes, because don't forget, I told you something last time, and maybe you'll understand more of it this time.

(teaching)
The body of the man has the soul, so does the wives and interesting enough, so does the Cup of Life. (He draws the CL between the STM and the virus). (1:42). If you understand this, and you understood it, how long in our process have we been through this. The intermediary takes and brings balance to both. (draws an Infinity Loop). That's why your life is saved using the T. Today is the CL, tomorrow in his space it's the enhancement unit. Viruses and energy parks are part of our life, and now for the first time we learn to respect them and how to live with them, as they all have a soul, and you understand the totality. As I said, in the coming weeks the Iranian SEPAH will go across this planet, not only to support and reverse, but to teach to understand the technology by man as a whole. We know no borders, no nationality, and no religion, and no color. (1:44). When you see the Sepah of Iran in your land, it means the end of the suffering of the Coronavirus and any other diseases. You have a friend at home, and you'll understand that we'll extend the Sepah to every nation, that will become as part of One Nation. The American nation wanted to make the Sepah the biggest enemy, but now they see they have to let them in, because they see they are their closest friend to save their lives. In a way, if you look at it the American government and its people shot themselves in the foot, in a very short time twice. They killed the head of Sepah, and then they spread the virus and now they have to be saved through Sepah. As I said, a fool shoots himself in a foot and expects to win the marathon. We have seen the fool. Now we have seen the end of the war, and now we see the end of pharmaceutical warfare, which was supposed to make a lot of money. But there is one question stands, as I released my patent, which I own, to humanity to spread to be open, those who used and abused the patent they bought, have to stand the course of justice. In due course, whoever owns the patent and bought the patent of this virus, and is ready to kill more, has to stand in the human court of justice, for genocide. (1:46). We did the same with Saddam, as we had to do with Bill Gates, and those who spread this. If you go back to the time in 60s, women in Europe, England, and America fought for their right to choose, the right to life. They fought to have the right to have an abortion or not. It has to be the same for the rest of the mankind. It's our right to be, if we want to add to the foundation of seven billion, and not for one crazy man deciding on humanity. We've seen what I call the rise of the second Hitler and we seen what happened to him. This time there should be no room for those who set this up. We need to set an example, that we don't see this craziness from people thinking they have wealth, that they can dictate the decision for 7 billion people. My suggestion is, they can have an injection in the morning, at lunch, and in the evening as food, for them and their children, the way they got the rest of the world injected with the same poisons. If it's good for all of us, it is good for them. A man, a chef who cooks, tastes his own food first. (1:48).
Any questions?
…

While you're looking for the questions, can I raise a very important, very important point about those of you who are making the Cup of Life. Some of you have seen the picture we showed originally with the cup of life, and you saw some green materials, anything and everything has to be green. Some of you are creating, some reddish, orangish, or yellowish material. Some of you are creating, I cannot draw it, but I draw it in blue, you see white only in your cup of life. Understand what you creating, (?? For the green color) The copper is a matter state strength, near enough to the plasma of the copper, CuO. The orange (one) is the strength of the copper, in its own strength, as a single atom copper. This one (green) is CuO, and this one (orange) is Cu. The one you see as white, is a Cu in the strength of zinc (Zn). And what is interesting, for many of you, in which you see white, you usually see it on two levels, (1:50). because the bottom is CO2, and the top is Cu strength of Zn. If you leave your cups, and straight away start using it, you will see after a few days, or a few hours, all become green, because this is the atmospheric condition of CuO. If you add more oxygen to this (orange one), you will get this to green as well. The best one you make, which has the Zn and Cu, which is good for the soul and the physicality is this one (white one). Those of you who get a white GANS from your cup of life you have one of the most powerful one. This is good, they're all copper based. They're all effective what it is. The other point is please, when you get a Gans in your Cup, when you create a Gans at the bottom of your Cup, do not empty the water. Get a syringe, and go to the bottom and collect the Gans, then fill it up with some more fresh salt water, so that the process carries on. You need is this, it will go on for years and years, if we can control it, for months and months. When you get your GANS and you put it in a bottle to wash it, the Gans you let go (settle) down, and the water you collect on the top is salty. Keep this to a spray on your body, or your glasses, or front door handle. (1:52). Do not get rid of your salt water, it is one of the most powerful (Gans) you have, because it's the first cycle, so it carries a lot of good energy in it, and you carry on again and again (rinsing) until you get a sweet water, which is good for you to drink and for the ?? The Gans does not lose it's power as long, as you can see it in your bottle. What percentage of salt use is irrelevant, if you have a good temperature you have a faster production. If you are sitting, living in the city centre, are producing, because of the high level of CO2 you get a faster production. If you living in a rural area you see a slower. Don't keep on asking, if I did this or I did that. For those of you now, who are in Russia, or are in a hurry, and for the Chinese system, we advise to connect the two wires into a battery. Those of you now, because you are producing ?? and you have time, what you have to do, is to get rid of the battery. You don't need the battery. The battery was done for the Chinese community to speed it up. What you do, you connect these two together (Cu coil, Zn plate), and then you connect this one (Nano coated coil), and all you need to do is to get another piece of wire, and connect it between here (Cu Zn) and here (Nano coil), that's all you need you don't need a battery (the wire is in place of the battery). You just connect these two together. You cannot connect these three together it's not going to work properly. You need this piece of wire to connect these two together. The resistance of the wire brings a balance and creates a beautiful, mainly green Gans, over days. (1:54). If you're in a warmer area, you'll get more, and if you put on the balcony you'll get more, if you keep it in the house you'll get less, if you got a good airflow you get the more production. The battery was for emergency production, within hours in China with the disaster. In Iran we still teach people to do, but if you have time

and you made the first GANS box CL, just do the rest just with a piece of wire, and you'll get the same the wire is to create a potential difference, that the salt and the environment of their GANS is created. So don't ask, do I have to clean the battery, or do I have to do this, can I use this. It's a very straight forward. Those of you who are very advanced in the knowledge, those of you who are advanced very much in the knowledge, if you understood the weight difference between the zinc and the copper (60 65), if you can create a mass ratio of the copper in respect to the zinc, then you only need three copper wires, or three coppers, it's a very specialist way to do it. So you don't need to look for the Zn, because you're Nano (N) layer in between is in saltwater, you have created a plasmatic condition, so matter condition does not apply. (1:56). You can, even if you extend the knowledge, put two copper wires N-coated wires outside of your plastic container, there is no need for connections, even if you want you can connect the 3 together, and then connect the two together, and then into a third wire, connect the two together. You get a rapid production of Gans in a massive way, but at this point in time we don't need, but these three have to be what I call, N-coated.
Mr. Keshe have a question from Achilles, he says. Q: I have a question about the one cup one life set up I set up two cups of life and after four or five days I observed that my copper coil inside the salt water became a shiny, whitish, yellow color, while the tail of the coil outside the saltwater has been slowly N coated from the connection point towards the water surface, by my understanding the zinc plate is pushing plasma energy to the N coated coil in the middle, and the copper coil on the other side is pulling from the middle. Could Mr. Keshe please confirm that my setup is correct?
…

okay can you repeat it again because I didn't hear it properly.

Q: okay and the question is from Achilles tha I have a question about the one cup one life set up I set up two cups of life after four and a half days I observed that my copper coil inside the salt water became a shiny whitish yellow color well the tail of the coil outside the saltwater has been slowly nano-coated from the connection point towards the water surface by my understanding the zinc plate is pushing plasma energy to the nano coated coil in the middle and the copper coil on the other side is pulling from the middle can Mr. Mr. Keshe please confirm that my setup is correct or wrong thank you.

K- if you have followed our setup, then why you need to (have it) explained. You explained it nice, follow it and have a look. Your setup is correct unless you want attention. (2:00). If you follow the way we said, on how you should connect it, and how and what you use, how the Cu is bent, how many right hand turns, call them correct, left-hand turns is good. All this is just playing games. In one of the Iranian videos we have seen something very, very especial and that, we see using two coils in the middle, and one is on the zinc side and one is on the copper side, and we see literally, CO2 shedding down, among coil towards. As long as you follow the procedure of N coating your coils, it doesn't matter how you put it, what a space gap you did, is it ok 5 centimeters, can I use a left hand turn. I thought we passed these Chinese questions. You created it, it is there, if you want to understand more and explain more (that's okay). But this thing (these kind of attention seeking questions) has to stop.

Next question.
Q: Thank You Mr. Keshe for all that you do. According to what I have understood, we need a lot of GANS water to apply the process. So can we put the GANS in a chemical test tube and put that into the water, to drink that, put it in several hours before drinking the water? (2:02). K- what can you repeat that.
okay well the basic idea is that put the GANS in a test tube and put the test tube into the water for several hours before drinking the water instead of making the GANS water and putting the GANS water in the water he wants a faster method against watering them water? K- Who puts Gans in the water? You put water on the Gans, and you drink the water, you don't dilute it. …
K- You have the cup of life, you take the GANS and you put it in a bottle and shake it, then let it settle, and you drink this water. That's it. Some people say what about if I get this and put this in, and then put some water on it (take water from on top of the Gans put it in another bottle and add more water). If you do that you dilute it. You are diluting the strength. You have … I don't call these questions. These are attention-seeking questions, because by now a lot of people should have understood this, unless we have new-comers and they don't understand it. There are a bunch of, what I call incompetent deceiving people on internet, set up their thing with Corona, and we are monitoring it, with specially join them for a reason. These are Chinese and East Asian people and there are people who report, who has found to the organization to eliminate new scientists, new technologies. (2:04). There are a number of Corona groups which have been setup, especially by Chinese names, or Far East names, these are well organized by the pharmaceuticals to attract fools, we're up on it, to eliminate and stop. Be very careful with these, they seem to be doing a survey on the Corona, but they're actually part of what I call the Gates group. When you create it, you use it, you followed up the system of the thing, Your Gans can't e anything except what it is, and then you put it in a cup, and the first couple of times it will be very salty, and then you move it to what I call two or three times you put water on it (rinse it), you need to change the water when it's fully settled down, and until the salty taste (is out). Actually if you drink some of it with the salt, it has a much better effect, then when you totally wash it out. It's just not advisable, because a lot of people don't like the salt (taste). But it actually it's one of the powerful ones. And in so many way's, beautiful sterilization comes with it as well, because you have NaCl in it, and you have the plasma attached to in, in the plasma environment and it's much more effective, if you can drink it, or if you can stand the irritation on your skin or your head, or be advised not to be inhaling it, but even if inhaling it, because the Gans of salt brings a lot of damage repair to the cells. (2:06).

You have to understand something very, very, very important for all of you if you are affected by the Coronavirus you will go through the first fever and the coughing, and then you go through the lung collapse and flooding, and then the heart procedure and death. This is a procedure that we see. The most horrible time for the doctors is this phase, when people go through heart seizures. What you have to remember is, that the transfer of the energy for your body, is the whole name of the game. Here, on these virus, or of the virus in the space. You have to take the energy out, which has come in. The worst thing is, if you get an energy which is below, and it tries to catch up with yourself (? cells). With this Corona we see interaction, connection feeding. With some of the space development, in

deep space, you find a matching weaker, which takes from yourself (?cells), and then what you don't see are the cells disappearing very quickly. This will happen especially in muscle tissue viruses, in what we call energy transfer in the lungs, (2:08). These are what you need to watch. When you bring the energy transfer in of a higher order, or of a lower order. With this virus we have a higher order and that's why we can take it out with what you call, CuO, a weaker level. When you come to the weaker viruses and they link into the body, and they try to grow, you go back the opposite way, you feed, and in that kind of virus you don't use CuO. You have not seen this, mankind has not yet seen this virus, but you're come across in the space. In this situation, you need this (CH3) to feed to the body. We have not seen this virus operating on this planet yet, but there is something very important for all of you to understand, is that when this virus comes in and takes over, in the first stage, as I said you see temperature and fever, because the others receive too much, or the other cells get damaged very rapidly by it, because it's always when you see the fever, you're already 10 days in it. So you see the damage in effect, to the cells. In the Iranian system, we see have seen this within 12 hours, which is puzzling us, puzzled us at the beginning. Now we understand how it's done and we can work with it. What happens is this has been here 10 days, this cell has literally been damaged from the interaction with the Corona energy. (2:10). Once you handle it with the Gans's and the virus disappears, and you're safe, you will see from about 24 hours to around about 72 hours, suddenly another fever with high temperature. This high fever comes from the damaged cells from the virus. If you get a high temperature, it means your body affected by the virus. At this stage you can use CuO plus salt as a drinking water, and inhaling. Because now you have entered the phase of physical bacterial condition damage, and CuO and salt will give you that. The fever will go. You need at the second stage fever, to add salt to your inhaling, and to add salt to the Gans water you are drinking. Understand the process. At this stage, when you see the second cycle stage of the fever, you ask your doctor for strong antibiotics, because now you are in matter state. In three to four days your fever will drop, but the process of recuperation by the cell and making of new cells, will take up to 30 days. So those of you who are infected long term, like in China and now Iran, you'll have a first fever, then we help you, and then you get a second fever. (2:12). The first fever is from the virus, and the second one is bacterial, we call it. You have to understand, as we've seen in China, they release people after they had no sign of fever and no sign of virus, they are released, and 26 days later they have infected the whole area they've been released into, because the Chinese authorities have not understood, this is a mutating virus. The cover of this technology is the only way, that you can keep this under control. unless you shoot your people on the street, mass execution, because it will come back. As I said in my request to the Iranian government, it was very simple, my responsibility is to defend the territory of Iran by covering its army, and its military, they come first. To protect the nation, and not to kill the nation. We teach the members of the Sepah, the members of the Iranian army, the members of police, how to protect themselves on how to teach people to protect themselves, in mass media teachings and progress, which is in development. (2:14). It should be with all of you who live in any country unless, your leaders are making money out of the crisis, unless your leaders have been paid by the Gates Foundation to accept injections to kill more of you. I am very straight forward, bring all the Keshe Foundation websites down. My responsibility is to be correct with all men, in all levels. Many Chinese are becoming

rich on buying masks for a penny and selling them for a pound, Stealing technologies from Keshe Foundation and making millions. All of you and your family knows the soul, and you'll pay for it from the pain of the people. Daughters in Canada with a star with starvation. You have to understand this virus has mutated to humanity. It was tailor-made to kill, and now it has tailor-made itself to control. But, as I said we'll make man ready for interaction with the Universal Community, and the stupidity of the man has brought that interaction much easier for us. Now you understand what it can entail when you contact and become in touch with, the "Man of the Universe," who have energies of different levels than you, and what you can give to them. According to your energy, it could be a virus to them. You have to understand the totality. Don't panic if you get the fever a second time, (2:16). Understand why explained to your doctor's wife. You educate them, not them educating you, because their book finished 40 years ago, knowledge and science has gone forward. A lot of doctors make ridicule of the technology, because they never understood and if it's not in the book, it is not there. Let it be. They're the ones who have died, 5,000 (of them) in China, and millions more behind it. Stealing and ignoring and denying, does not put the truth away. You still die, because of your own behavior.

Any other questions?

Q: .. about would silver GANS or gold Gans, Dan's help they'd be beneficial? K- I think we passed this question. Q: if people have an organ transplant and are taking immunosuppressant drugs, (2:18). could the cup of life GANS boost their immune system, that might cause a risk of their immune system, by attacking their transplant? K- this we do not know, I had this question before, this we do not know. Because you are dealing with two different dynamic systems, one of their body and one of the organ. They can connect them, and what do you call it, bring them together chemically. This we do not know. You create two dynamic situations, if you have a heart transplant, or you a lung transplant, time will tell. You might not even need any more medication, because you make one of both with the energy balance. Any other question? Q: Mr. Keshe good morning this is Jeanette Orozco from the Spanish group. I have a question for you, what happens in the case of people who have had heart transplants, because they have had leukemia? K- We do not know, it depends on how it is, how the two organs reject or accept each other, and how is being forced to accept. (2:20). Our biggest concern is for people with a lung and heart transplant. We're looking at it. We, in a way we see a danger with it, in energy transfer between two different cells. In a way, we see that maybe there's a benefit to it in balancing. You might not need any more medication. But that has to come through the researchers in places like Arizona and the researches in Tehran, will tell us the tale. As I told you, we have just touched, we haven't even come near it, we are near to touch the beginning of this knowledge. Let us touch it and then it's a skyscraper, we haven't even entered the building yet. You will understand that this technology will bring mankind very rapidly into the space technology. The Gans and plasma will become as common as salt and water in the coming weeks, as people start using it, because they are trying to understand how to save their lives. As I told you, one of our KS saw a woman walking with four bottles, she didn't know what it was, it was just that she believes in it. She just bought it, and it was explained to her, it will save her life and that's all she needs to know. But all of these needs certification. If we see anyone putting

anything out in the market without certification and authorization we'll report to the authorities. (2:22).

When there is something which I have to explain to you, we have found enough criminal evidence to take action against KF ex-directors in how they transferred everything from Keshe Foundation to another company. We have received enough evidence in black and white and how they advised the knowledge seekers and agents to put the order, as this company is the same as the KF. And we have full and solid evidence. This company is defrauding people and we'll take action against them very soon in Italian Courts. If you have received emails from the Keshe Foundation group in Italy, at the time they're saying they were transferring part of the order to another company, this is deception and fraud. Please forward it to the Keshe Foundation headquarters, on their website or webmasters at keshefoundation.org or webmaster at spaceshipinstitue.org. We have seen number of emails, which has come to us, that during the time when they ciphering the money and taking customers from Keshe Foundation into a company in Italy. They had said to the other people, that this is the addition or extension of part of the changing of the warehouse of the Keshe Foundation, and using the logo. They were wondering why this was happening. We need more of these emails, as they are sending it to us, to put in for execution of fraud, and deception, and trying to bring the company to bankruptcy. But years of our background, we support it and keep it. If your a knowledge seekers who received such emails, as the others have supplied us, please this is helping us handle it, because we are handing it over to the Italian police and federal police, (2:24). for deliberate planning, and even premeditated planning and stealing from the company. The email reads very simple, and comes in a form of reading, 'we are transferring things to a new company in Keshe Foundation,' and you knowledge seekers thinking it was the Keshe Foundation, have actually done it, and you switched over, and you even thought, it could be a fraud, or something was wrong. Now we are in possession of these emails from you, and the Keshe Foundation emails as a new company. Thank you very much for letting us having these and we're getting more and more of it and we are building the structure with the Italian police and in due time, those who did this masterminded this transaction to defraud the foundation from two years of missing, ??? and the others have to .. repay back for what they did. It was pre-meditated, setting up another company to bankrupt the one you were managing and running. This matter now is in the hand of Italian police, because the evidence is complete. There were millions of dollars of investments of Keshe Foundation, has been taken out over two years. I'll read it to you this is one of the units that came from there. It reads, ' does KL managed board KF manufacturing Italy and the company. Why doesn't the Keshe Foundation logo appear on the product supplied by a company as a sign of collaboration with it. The conflicting information was given to us by GQ, and another one. (2:26). Now can we order products to support the Keshe Foundation?

(from here skip over to)

in the last call Mr. data to us he told not to make any English for KF products with distributed price because he would sell the same products while stock last now we have a

full proof of deception fraud by names we have these an email hard copy and a Tonya creases on top of humanist errors we stole from the vanish and deliberately names putting changing defrauding the foundation it is very very interesting to the Italian police and immediately to the finance police because they told us their uncle is a corner or in the Italian finance police even the Colin L have will be interfered and I'm sure is going to lose his job in supporting a criminal activity in taking funds and customers in the defrauded named and they left it on emails please forward his emails to Keshe Foundation once you receive like this he says we have been experimenting with technology for ten years for four years we have been decimating technology with the free meaning meeting and in blah blah blah blah and southern Keshe Foundation and they found out they received these emails from this new company who says the Keshe Foundation is part of theirs and he says we received from Keshe Foundation manufacturing Italy we will usually carry out orders from Derrida will usually receive emotions of conflicting information he says Mr. so-and-so initially mentioned to us only change of warehouse he later on informed us that some products were available from kitchen KF while other products will be supplied from this with the email given which is such a such a company already disputing with them we initially approved the situation that was in evolution stage thinking there was collaboration between KF and this in a phone call we were told by Mr. did it Cape Italy would close down and that we would find the same product from them so you see how they transferred everything across the Italian police is very very interested in this fraud it is a mafia job style and you'll be very interested now being getting more if you receive any communication from the new company the names you know please send it to us and then we you have helped the foundation millions of dollars have gone siphoned out stocks have gone missing and the rest of it and now we have this information it's a lien police what we are talking to them very interested this is a predetermined pre-planned and bankrupting a company while you're ahead of it nowadays the criminal offense and the worst thing is they have threatened to use their uncle as a corner in a finance boys or this is the thing we would like the world the police it so it sells they want to interview the uncle because it become part of the criminal unless he claims he knows nothing about it we were interesting there to the computers of the Commission's for answer does it take you to the corner but they use the computers we never touch them so or everything to accounts the Quechua mission documents and everything was been taken to ransom it's been we received back and Italian police is very interested to see how these people have managed to do such a big fraud thank you very much for those who are sending us and have already sent us this information how they managed to diverge and they did the same thing with the supplies the surprise in China and others have already are very interested because they don't want to get involved in this fraud giving all the details to us in the background in different ways using different organization to gather this information and what they tell us talk to 25 years is a minimum prison sentence Mr. Keshe I'm told in the background here that the email address that people can send emails to will be info at cache start foundation yes ok sorry I have to inform you Keshe Foundation is becoming globally one so as we called the dot foundation Keshe Foundation becomes our new international communication line this has been in the pipeline before this about the year two years ago as a foundation we could register so you can go at info at catch that foundation so we are a foundation register foundation and you can use our email directly for sending easy information you

see more and more cashed at foundation communication with all the operators of Edition worldwide we are a legitimate well organized well devoted people to serve and when we become a prostitute we handle it always to the legal bodies as I said before the situation with Fabio offices are in making our understand and all the document has been sent with is getting followed by our people in Italy thank you very much for all your support and maybe we are not making any money hole accusation we are explaining what does not make sense on how it becomes make sense Italian securities and police did not know that Fabio was part of the Keshe Foundation I was trapped in a murder - now what they could not see how he was so beautifully untouched for the hole in the back of the head now they can see all the connections all the documents of their what we call their four attempts murders before has been furnished to the police we are not going to court to make any allegation we are giving evidence to the police will die now in this case we leave that to you and then we'll tell you further on but we have enough evidence on the back of it to show exactly how red cell phone has been evolving it and now that they what we call the court cases activated we can stop me documents - it is any other question you have a question from Renee yes can I just say something one second I said this at the beginning of it can you please let us make a group for Italian rescue operation all those Italians who got a spread because of after death of Fabio and the people who were in what we call in Keshe Foundation in Bari the still obliviously the foundation the way there could we need to bring you back together now we understand the reason and how it was done we set up a system now that some cities in Italy are closed on because of this virus we can make up and set up the what we called Rapid Response the same as Iran that we can save lives we'll announce this through the universal council member of the Italian language told the Italian groups how to join in and how we can support all the Italians we have a very very large Italian condition supporting this is the time they need us and we've said this emotion today hopefully or tomorrow we'll call Keshe Foundation rescue italy and join us in it I'm setting it up as admin and then we bring you our busyness to start running this that we can help as many times as possible.

(2:35). yes carry on please.
… Q: From Alaska Susan who says, the first GANS I created I saw a luminous aqua glow down towards the bottom in a curved bottom container. I felt that the luminous glowing plasma filled the room, and me. When I went to bed, I could still feel the plasma presence within me, and without me, like a glowing cloud of love. Thanks Keshe, she says?
K- for the glow or for the love. .. (2:36). As a KS said, Mr. Keshe, you have reached the heart of many women. I said we are all women inside we reach everybody at the same time. Q: Can you give me a hint on how to compress plasmatic fields I did this on the resonant circuits and got a huge benefit from the setup but I think that this must be possible in plasmatic too. K- it can be done. We do it, you actually can do it in a different way, and the only problem with it, is that you get the explosion of plasma and you cannot control it. Thin it is horrendous. We prefer you not to test. In a soft way, you do it in the MaGrav, if you understood the MaGrav system technology. Voltage and current production from the self-sustaining generator, in increasing the voltage to thousands and hundreds of thousands of watts, is in the hands of the KF. We will use it in the EU and then most probably, in the coming time, we'll release the promised generator.

For those who want it. (2:38). But the essentially the generator sits in the MaGrav system, but none of you have managed to understand it. You will see the first generating power units in the MaGrav units. When we told you that we have a generator, it was just finding the time and a place to release it. This will come with a with the new systems, and then we'll release the power generators in a massive way. There is a very big thanks and I mean an enormous thanks to Mrs. Mohammadi the head of the Iranian Keshe Foundation. She has done an enormous job to set up such a beautiful structure, support and distribution team, and all the things she's done for the foundation. Without her I'm sure the foundation and supporting the Iranians with this position with the Corona, would have been impossible. She set this up to help Iran with agriculture and health, and when the Corona came in, everything was already set in, and all it was, was just to support it and extend it. Again I thank all those who work in the background and in the front in supporting, the first group support, and those who are in the face of it, sitting in front and trying to support an answer people's questions as they come in. The numbers of the knowledge seekers is increasing rapidly, (2:40). people joining it just trying to save their lives and their family. I heard from one of the knowledge seekers who's been there, he said, 'I'm just even speaking with my eyes shut because I haven't slept, I'm there to support, I have to, I've saved so many lives tonight by helping them.' The beauty of it is the minute they receive the call, they have access to the places where they keep the Gans, and within hours it gets dispatched and the people receive it and they put other people in it. We need to set up such a structure and at times it's hard work for months and months. Miss Mohammadi in Iran and her team especially team in Mashhad, in the holy beautiful city of my childhood, they have managed to do it. I can announce, we hope we can announce it clearly, that the first airport, the second busiest airport in Iran, has gone under the Gans protection as of yesterday. An explanation was given to their authorities, and materials has been (given) in support. Any flow of people in and out should become safe. We have taken the responsibility and the KF knowledge seekers in Iran and they have trained the airport staff of the second major airport in Iran, and it has gone under the cover of the Gans protection as of yesterday. They need more and more training and we need to deliver equipment to safeguard most of it. In the next week we announce, a second and a third nation, which will go on the cover the Gans technology. We give 100% guarantee that there will be no contamination, and if there is, then we give 100% guarantee to reverse back. I thank again Mrs. Mohammadi, for her relentless work. (2:42). I was up until two or three o'clock, and she was there at four o'clock and at 7 AM this morning she was there again. We do our best, and this Iran central emergency system has to be set up right across (the world), especially Italy, Germany, France, and the United States in coming weeks will be worse hit than anybody else. China will let it go, because China betrayed the foundation. The Chinese leadership should not have done that, because we gave you our wish, and you will understand very soon. Stealing a gift does not work with the foundation. We took the love of God from Judaism, and now we take the love of God from the nation of China, that it will become an example for humanity. You will understand soon. What is important, is that you have to be ready to support yourself and your family, and understand that if you have the virus, just think how many people you shook hands with as you stood in the bus with, and you traveled with, and how many times you kissed your child, or your mother or father. When you make a Cup of Life (CL), every living things are contaminated and it's your job to

support your dog, cat, your family, your city, and the staff working in your office. The KF knowledge seekers even with Chinese manufacturers who work with us, This is an instruction to them, to protect themselves. They work freely, if they follow the procedure. We are here to support, (2:44). go to info@keshe.foundation if you want to set up. Don't waste a lot of time, we don't have much time, we're literally stretched to the limit in supporting these things, until we set up the International organization. I very much hope, that Iran Sepah will become an international force for rescue from the virus, and with it, it will bring the beauty of the nation to all. They put sanction on us, and we bring love and care to them and see who will be ashamed of what they've done. Try to understand, this virus will travel very fast now in Europe through the bloodline. I repeat again, I go past a Chinese restaurant for the past four or five weeks and nobody was in there, except the owner sitting in the background. Now we see it, when people are avoiding Italians on the street. Any Italian restaurants or other favorite places to be for pizza, now no pizza. What will be next. The way we look at it, the man who gives you the food across the counter, it could be the poison of life without him knowing it, and you do not know when you arrived from Italy or China, or for that matter Iran. Very soon in Iran, we'll accept what we call Coronavirus health tourism, you come in (with it), we save you, and we send you back without it. If your nation doesn't listen, we'll accept, because we know how. (2:46). We are hundred percent sure of what we are doing, and we are a hundred percent safe to reverse. In a very short time, we will know maybe within next week, that the health center in one of the European countries will open a KF health center for this purpose, where people who are infected, by governments can be sent in for reversal within seven days. This is a special center, and a special process, which we don't disclose publicly, but it will reverse the whole process. The government officials can check.
Any other question?
we are need a tutor book remember every day 3/4 moves from not just yourself ten-second if you don't feel any coughing or you can breathe and you haven't got a temperature of Bieber okay if you got against us just as Brady answers on your head on your face and your front and the back if you feel a pain then you know your position if you don't feel a pain then you know you're okay in any case every day do this drink water and inhale begins here just to protect yourself but when you learn this system and technology this is what you will create inspiration in depth of this space and then in the coming weeks we'll teach you how to use the answers and against material for food if this carries on and most of the roads and air and sea freights block we got to understand in one of the European courts in past two or three days port workers refused to touch container from Germany because it could have been and they had contamination in Germany if the port workers stopped accepting goods from ships on the countries they're coming delivery post refuses to send or accept post you can see the direction we are setting out we are highly international dependent on food and other materials on each other and this will bring a huge problem supermarkets empty nothing on the shelves farmers cannot get their food to the market and the rest of it this is something which we see has happened in past 48 hours in Europe and we know a lot of governments have problem you see mean goods from China post our orders postal systems do not accept any packages from China now Iran and now a Tony then Jeremy France claims they have a process they cannot stop cure the people but they haven't stopped the transfer the beauty where the Keshe Foundation technology is that he can be worse he can prevent and he

can sterilize know technology has offered it's not even the vaccine from Mr. gate I call it the injection of death then you understand someone you know when mankind in United State is be sentenced to that by injection mill foundation is doing that but on a very large scale interruptive continuously cover yourself this is going to be four months but we get used to it is with us immediately we can solve it is there anything wanted to say about using GANS fir or feeding the question from Dan about that oh we prefer not to do it for next couple of weeks but try to make as many against cup of life for yourself and I teach you if need be to not touch them to nothing you can do a different things with it just have it ready that you can cover there from the strength of the virus it's the most important thing and then I will explain to you how I've given your life to the cup of life try to make three or four cups at least each any other questions shall we call it a day Rhea nearly three hours just one quick one about the couple people had questions regarding could they instead of using the one cup the one cup approach could they mix the GANS waters of the cuo the co2 and the zinc oxide in at the ratio that you mentioned 53 yes you can well you don't carry the sort of mutation you have to understand this there's a reason yes you can that's emerges okay and you explained about that earlier as well so people can refer to the teaching on that but beauty of it is this virus does not know nope King what a president or the Minister of Health and a person on the road the worker in the office is befriending everyone I told you you will not see what leaders this trip to India was to Keshe in as much as it could be for you hide in your nest anything else so shall we call today Matheny agnostic foundation today we have another information today that people need is what I call a blueprint for life or we can call it a blueprint for coronavirus thank you very much and hopefully we see you next week and in emergencies as we done with Iran we opened the second what I call meeting of this week on emergency on Saturday then they are the meeting on Monday as usual and today at nine o'clock what we call Tehran time any one who wants to ask questions doctor's officials anybody wants to be online they can ask questions and we can guide and we can protect then if we have emergency animals we open this channel for five minutes ten minutes and now we explain phonology is worldwide what is happening what it is there is a report we cannot confirm the violence has reached Vatican and as you know what canister of all people and this virus works havoc amongst all people we hope they are safe we hope that the podrace a safe an esteem and at the same time once you understand the whole of Italy has been wiped out with this thing it's not just one place under them and what we seen in South America has come true Italian traveling and these people usually pay with it - what ikan Italians and the others who come in so the holy city is on the roll of pressure and contamination and we're the same thing as they give sermon they can do as I said to one of our friends would there be a mess this is my body this is my blood in the churches of Italy this weekend or would be scared not to go to churches that's where they can get contaminated the house of God will have no one to worship schools closed universities clothes the only thing they didn't cause last night I don't personal against Napoli we don't know how many people got infected in that game and on the other hand touches are close to people did not go to church in Austria to the pizza parlor priests people do not go to church now in Italy due to virus kit so let's see what happens and how this thing will develop in Italy and Germany the French claim that they found is nothing there because they have a managed to contain all of it and we have seen other countries we are monitoring all the countries around of already spiders stay safe and spared the cop and

against two other people and to understand and teach if they love which that is their life they're laughing at not yours and we should all you hear of knowledge seeker really listen to this teaching and you have made yourself to gain cup of life you keep your life. (2:58).
Thank you very much

very good thank you Mr. Keshe once again for yet another knowledge seekers workshop here and we thank others that have helped produce the workshop today
Thank You Flint and other people working in the background to enable all this to happen for everyone
K- Can we have one of the intros we used to have before.

END
317 knowledge seekers workshop for Thursday February 27th 2020

318th Knowledge Seekers Workshop March 5, 2020

English Transcription:

(:15). .. In the past few weeks, since January, we got pulled into this Coronavirus in China. We saw it becoming relentlessly powerful, taking many lives, and we thought that was it, the Chinese got it, then the virus appeared in a number of countries, by Chinese. Then we saw it in Iran, as we explained last week, then we saw it in Italy. Now the Italians with their love of pizzas and spaghetti, have spread it to the rest of the world, as now we see. This virus, they thought they could control it by mutation of the genes, by race. But now it has shown that it can mutate itself to any race. But when we spoke about mutation there was some concern, but now scientists have proven that they have found the second generation of mutation that they can confirm. This means that this virus will take hold. As I said in the past few teachings, we have to see how and when this virus performs and if it is going to that way, for the beginning of Spring, and we put our doubts on it, that this is self-mutating, (:18). and self mutation, at the same time. So what it does, it destroys itself of what could, in a way, have killed it, or have destroyed it, .. to a new way of energy balance. .. if you understand plasma (Pl) technology (T), we know how, with our experience, that this virus has mutated in a very drastic way. The

authorities, as usual, they thought that it was going to away with the heat, but what we see, is that this virus has appeared in Brazil, a warm country, 20 -25 degrees (Celsius), usually we don't see flu at these kind of temperatures. Twenty degrees in northern Europe is summertime. So this show that this virus will be with us right across the year, and it mutates very rapidly. We have seen mortalities, death, and infections, we have seen the same in Europe. Many Iranian leaders have died, or are entangled with this virus. We see now, internationally Italy is under siege with it. We'll see in most of the western Europe that the communications will hit. We see in London being hit. In Paris, (:20). France they say they have come up with a solution, but we see the French are still getting hit. The only French who have found a solution, is controlling the media and putting lies out. Because if they had it, they would give it to the French and the rest. At the same time to the Germans. We don't see any solution or any way (out). We see the economical effect of it, will hit America in the next 14 days. We see a massive rise in the death of the Iranian leadership, at the highest level in the next 7 days, because we know when it was spread in Iran. The 14 days is up on Friday or Saturday. This process has brought a lot of things to us as a human race. A very clear indication. We have no world government to govern, in this case as it rises and it comes, it comes in another virus to us. There is no leadership by the World Health Organization (WHO), as they themselves are baffled by it. All the world presidents are canceling their meetings, they refuse to handshake with each other. It has become a very strange situation. They are locking up presidents in their palaces, and kings and world leaders in rooms and in isolation. The military heads are hidden behind their desks and in so many ways, a war on the human race, has been called in, by the greed of the human race. (:22). In so any ways, we shall see the beginning of what we call, the apocalypse, the total destruction of the whole society, shaking, and then by shaking, destroying itself. We will see, as I have written to a couple of world leaders, a Biblical destruction, commotion of things which will come. In so many ways, is it that bad. Iit is worse then bad. Locking up people in their homes will not change it, as locking up man will increase the spread and mutation of the virus. .. all of you are not sure what is the position. There are a lot of claims on the how, and the way, and in so many ways, the methods used has to be done the man himself, and nobody else. In a direct relation to what is happening worldwide with this virus, this situation will not be sustained, maybe for another 3 or 4 weeks. As we have seen people from the cold environment of Italy, (:24). in the wintertime went to Rio de Janeiro for the festival and they spread it right across the world some five or six million people. As I said, we will see a massive rise in the loss of life in the gay community, who very highly concentrated in Rio, in what we call, the festival. Many of these have been battling with AIDS, and are vulnerable to this virus. This virus statistically kills more men over the age of seventy, or sixty-five, seventy and it kills people with immune system problems. So in the next two weeks, around the world we'll see a rise in death, again, in homosexual community in a rapid way, if they've been contaminated in Rio de Janeiro.

At the same time it's the responsibility of a man to look after himself. Today's teaching is a very direct teaching, and is a teaching to each individual of you, for yourself. Many parts of it, are a repetition of last week, because maybe you did not understand the gravity of what was taught last week. In Iran, we have set up a rescue organization. In Iran, we have seen direct results of people who have had Corona confirmed and reversed. The

Chinese government blocked us from receiving data, but in Iran we have put data on the Internet. (:26). Many of the Keshe foundation knowledge seekers most probably, when this virus goes beyond control, will be very few, who have stayed alive. If you followed the procedure the way it was set up, and looked after yourself, your family, and your environment. In any case, as the virus mutates, and you keep on using the Gans water once a day, and the rest, then you allow the virus to be taken out. Let me explain to you something very clear, you were not aware, and we were all under pressure in 2011, 2013 and 2014 with Fukushima. As you all have the data, and the Fukoshima paper has been published, when we got involved as a Keshe Foundation and we helped TEPCO with cleaning up the Fukushima, we didn't hear any more about Fukushima. Because the knowledge transferred to the Japanese government, and stolen by them, thinking they were very clever, taught us a lot. The most powerful energy which enters the body of the man is radioactive materials, and it has a concentration of the ray destruction, and we've seen with gamma rays, and other radiation mixtures, many people get cancer and they die. The test in Fukushima gave us a clear indication, that GANS water has the capability to extract the radiation from the body of the man. (:28). The Japanese and Americans stole the white gold, from conversion of tritium to white gold, but they could not understand it. Their lack of understanding, and what I call arrogance and stupidity, that the Keshe foundation was sitting to see the results of the effect of extraction of the radiation and fields from the body of man. In this process from Fukushima, we learned a lot. It showed we can extract radiation, because the workers in TEPCO, who now use the technology everyday, by drinking the water, washing their body with a GANS water, to extract the radiation from the nuclear reactor centers. This allowed Fukushima to go back into clean-up operation in an orderly manner. What this means, the workers of the Fukushima can touch any radioactive material during the day, or come across (in contact with) contamination materials, and at the end of the day, by drinking some GANS water, and getting washed by Gans water, whatever they absorbed (during the day) is extracted out of the body. In a simple way, Fukushima was a pre-run to this virus, for us, to understand more. Therefore, when we come to a weaker version of radiation, in interaction as a plasma, with the plasma of the body of the man, we'll see the same. Those who everyday work in the Fukushima plant, with a normal life, will go through the same process when the virus hits. When they drink the water from the Cup of Life (CL). In so many ways, (:30). all of you are in the same position. The last time the contamination was in Fukushima, but this contamination is planetary size. The last time we gave the water to a nation of, the thieves of Japan, to steal, but in so many ways, it helped us. This time we give the knowledge of the GANS to the free man of this world, to help you, to help yourself. The same procedure, the Fukoshima nuclear reactor, was an energy concentrated on the ray of photons. The Coronavirus is an energy, in collection of a package, of a few different strength energies, the same as Fukushima. In so many ways, is like putting Alpha, Beta, and Gamma rays into one cup. We call it a virus, because now as the energy reduces, they interact with each other, and they start dynamically live, to find a way, and we call it a virus. We helped in Fukushima, now we help the world with Corona, but this process, is another process, that we as a human race are getting ready to enter into space. Because in the space we'll receive plasmas and rays, and as in Fukoshima, and as Corona. And with this technology, understanding the process of the drinking of the water, the GANS water, the Gans energy, we have understood how to

extract it. In the Enhancement Unit (EU), which is to be released next 2-3 weeks, hopefully, we don't carry the water inside, you don't drink the water, but we have gone to the level of transfer of energy, from the body, in the level of the virus. (:32). So by entering the enhancement unit, within seconds you have no virus. But at the same time, we have to understand, that there is a lot that we can do for ourselves, until the number of these EU are developed and delivered.

As a human race we are resilient, and as a human race, extremely intelligent. As a human race, one has to understand what is the composition of his body. Collectively over centuries we have gathered a lot of knowledge. In a direct message, to the Iranian Corona group in Iran, yesterday in our meetings and today, we send a message very clearly. The message is simple, it is as easy as ABC. Our message was as follows, the situation in Iran is that the Iranian scientists have not understood at all, what a virus is. (:34). Exactly how a virus works, and exactly what the body of the man is made of, the lack of knowledge has been the cause of (not) understanding the most advanced T. We have no choice, we have to understand more, if the knowledge was understood more about the construction of the man, then man would not have had such a problem. Let me explain to where the problem starts. In homeopathy, there is a belief of the 12 salts in the body, some of the salts we don't have, because some of the salts which are spoken about, and we don't understand, is a combination of the mixture of the salts, essence of the energies and not the salt itself, as that being described in the KF, as a plasma (Pl) energy of the soul. When you have this, and you have emotion, and it has to change to the direction of understanding of its own direction, it needs a Pl of the mixture of the salts, and not the physical salt. If one understands this, one will understand that through the strength, (:36). of certain salts, magnetic (M) field, man can replicate the emotion of the man, not with the salt. Which means the human race has to go further in the knowledge of understanding of its own creation and operation of its physicality. The scientists look for the salt in a physical term, but have not understood, that even the salt in the dimension of the energy pack, in interaction with the condition of the matter energy pack, create and lead to the creation of emotion of the man, in interaction with the field of the soul of the man (STM). Where we go and what we understand and should understand from now on, as an invisible energy Pl Gans, in the dimension of the Gans's of the Gans's. If you go back John in AZ tested this, but never understood. The Gans's of the Gans's in some of the teachings of the past I referred to it. Now you understand what it means. The Gans's of the Gans's, if understood using the energy of the Gans's, leads to understanding of the energy of emotion of the man. In this way, there is one major, major understanding that needs to be understood by men of earth. As I explained to Iranian scientists at the highest level in the past few hours, (:38). if you look in the body, different salts and strengths of salts, leads to creation of the tough tissues, of the soft tissues, of the blood, and the rest. When you taste your blood, it has a salt in it, because that salinity dictates the thickness of your blood, and the pressure of your blood, and the direction and the strength of the emotion of the man in the dimension of physicality. That salt transfers the knowledge of the emotional of the physical, to the emotion of the STM, and in that direction, reflects to the emotion and behavior of the man. If the world of science understands this, handling viruses in the U, for man, becomes a game, and a child's game. As I said (AIS), depending on the strength of the salinity of the mixture of the salts, including the salts of

the emotion, the direction of the motion of the salts, opposite, or in the direction of the STM, or the soul of physicality (STP), then man understands how even his physical condition is created on this planet. As I explained in many teachings years ago, man has not understood the essence of his own creation. (:40). The Gans's in respect to the concentration of the salinity, will create matter cells. The Gans's as a Pl, in different conditions, and variety, of dimensions of salts, and essence of the Pl of the salt, in a Gans state of energy, will dictate the emotion in the creation. This is how through the emotion you get cancer, the transfer of psychological or emotion into physicality, by changing the salt in the strength of the emotion in the direction of the physical part of the body of the man. If mankind understands this, this virus, Corona, will become nothing. This is one of the weakest viruses man has ever been tested on. How do you want to live in the depth of the space, where the bigger and stronger fields are there to consume everything man carries as a part of his soul and physicality. In Keshe world family and in Farsi I have posted 2 or 3 messages this morning. The messages you hear were given to the leading Iranian scientists and the government operating at the moment. So we share equal to all of you what the Iranian, Chinese, German, and Russian leaders are listening to. (:42). As we make One Nation out of the human race, through this virus. Now you are each, in intelligence, equal to the professors and the world leaders who were educated 50 years ago. AIS many of our professors and doctors who are battling this virus, in most of, or in all of the countries, are as good as the old donkeys, with the bit on the back, carrying a stone or books. Nothing goes in their head and they don't care what they are carrying. As long as the pride carries that double word, "DR". One day I'll tell what the R is for, but at this moment we'll leave it for them to explain. You have to understand that every part of your body has a salinity, and that salinity dictates the energy, which is absorbed, retained, and released. Now many of you with the KF in the past few years have been through this process. If you remember, for some time we all played with the pH, creating 10 and 12 pH, and 0 and 1 pH, (:44). and through the understanding of the Pl T, we understand that anything over 7 gives us more solidification towards the body by absorption of the energy ?? which is, anything going positive above 7, is G field force, and anything below 7, we call it, acidic, or energy field force. Seven is the equator line, in a way, 7 is a zero point.

Now I'll teach you the secret of this virus, and it is for the KF KS to spread this knowledge across this planet, and secondly, remember that when you become "man of space," you need to know. At the moment there is a huge problem with nations like Iran, China and the others, what they have done, they have blocked, once they have identified the virus that somebody has and is positive, to be cultured any further, to see if anything has effected it. Like a Gans water, they can't do, because there is no certification for the laboratories to grow. At this moment in time they don't know how to control. But all of you have been with us and you understand this very easy. If you carry a normal blood without infection, test the pH of your blood, and saliva, (:46). and test the pH of what might come from your breath. At this moment you have no virus, make make these your zero reference point. Do you remember last week I taught you a couple of tricks, this is another trick or way to detect the virus, but in a scientific and direct physical way. The first time we showed you how to do the 10 second test, in Iran it has become very effective for KS to test themselves and the ones who are helping. For 10 seconds, hold your breath and see if you cough or run out of breath. If it's below 10 you are vulnerable.

We have seen in Iran that people can't even count to the first second, and they cough. And after using the Gans water, 30 minutes later they can hold about 12 seconds. We have seen the breathing go from 12 to 36, and blood pressures go from 80 to 97 in less than a half an hour. All is getting documented for the Iranian government, and relentless down by the KF of Iran, headed by Mrs. Mohammadi, is breaking through in a beautiful way. What we learned is very simple, if you can hold for 10 seconds without coughing you are just about safe, maybe. The next test is, we understand that this virus has mutated, (:48). and has gone from the lungs into the brain, when we said this, they said it was impossible, but now the Chinese confirmed, that this virus mutates. So if your lungs are not done (infected), it doesn't mean 100% that you don't have the virus, because now it has mutated to the energy of the soul and the brain of the man. Then you spray your head, your lungs, and your back, with the Gans water from a Cup of Life (CL). If it doesn't have any effect on you, no pressure in the brain or lungs, now you are 95% sure, yes or no. If you get a headache with no pressure (in lungs or chest cavity), or pressure (in the chest), with no head pressure (headache). It means you most probably, possibly have a virus, of the Corona in your head -- possible. If you get both in the chest and the lungs, you're 95 to 100% sure that you have got it. Don't panic, but keep on spraying. Understand that it's not a water anymore, the Gans is extracting the energy of the virus, and within 6 hours you should see some results. We have seen in Iran, the wife of one of our people, and the powerful people themselves, using the T, and after a few days start eating, when they haven't eaten for a long time. Strange enough, all the reports we get from around the world, from those who have had the virus confirmed, (:50). after the application of the T, they want to eat, they're hungry. Do you remember, the first pig that had the Pig Flu, after we washed it, it started eating like mad. He wanted more food, he used to knock on the door of the farmer asking for more food. Mankind has followed the same, because the virus has eaten into the energy of the body of the man, and the man is hungry and asks for food. We hear that most of the people in Iran report that they are hungry and start to eating again and well. The Chinese betrayed the KF by hiding knowledge which was in their hands. In Iran, the KF has become a parallel government in the health industry for the people of their nation, which means we do not blame, they do not know, but we support delivering the T to the population. In Iran today, you get yourself to the KF, you report where you are, if you have signs of the virus. Hospitals are full, they don't accept patients. The KF has become the alternative rescue center for people. Within hours the KF Iran, delivers materials, and Gans water to the people and gives them (instructions) how to make it that they can carry on making it themselves, helping themselves. I have noticed that it is a problem to ship waters around Iran and we know there is a problem shipping water anywhere, and the Gans is a water. The Iranian team has come up with a brilliant idea. … (:52). They are making ready-made Cups and sending them to people, and transport companies have agreed to deliver directly, for free, to help the nation. They receive a cup. The best they can do with the boycotts of Iran by the Americans. This is what they receive, see photo. All the connections are already made. All they have to do is add saltwater and start saving lives. This has become the pattern of saving lives. As I was told just before this meeting, 3,000 of these are ready and are going out, which means immediate transportation and immediate use, and immediate help.

So now (let's say) you have (failed the test with) the 10 second (of holding the breath), and you had the virus pain (after applying Gans Water), now it goes back to our professors, doctors, scientists, ministers, and the presidents of the government, (who say) we need a physical evidence. Let me educate you, the doctors, the scientists in your governments, and countries as KS. You tested the water and you know its pH, and you have tested the Gans's over years and you know the pH. (:54). Now we tell you to test the saliva and the blood, and the man who has the virus will show a different pH. Then if the pH of your Gans water is below the pH of your blood, which is infected by the virus, it means through the principle of the energy transfer, the virus gives its energy to the Gans water, and looses it power as a virus to damage the man's life. You have to understand the higher pH is the gravity (G), and the lower is alkalinity, but always by the law of plasma physics, the stronger gives to the weaker. You don't need to wait for your government to tell you that you have the virus, and 'we have no cure for it, you have to suffer and die with it.' You did the 10 second test, you sprayed the Gans water test, and you tested your pH, and you have your Gans water to do (to use).

The last man standing is the last man surviving. Do you remember the story of the Moses, and crossing the water, the Red Sea, this is that, what you were promised. We have opened the ocean of life for man, and it is for man to cross. It is very simple, what is in the Old Testament is delivered today. (:56). The plate, and in the Biblical proportion disaster, and the solution, with the enemy behind. We have opened the ocean of knowledge and it is for the man to cross. Those who deny and know, and those who don't want to accept, will see the consequences of their own time, as this virus evolves, and gradually over years will take those who are non-believers in the peace, in understanding of the change of the condition for human race, and evolution to One Nation. The message is very clear, you have everything in your hands to test. The KS in Italy, Iran, or in the US, you have been given the key, if your soul has chosen the path to cross the ocean. Once you cross this line, and once you understand the totality of the knowledge, with what you have, then mankind is ready to enter into the Universal Community (UC), because then, he can safeguard himself with the knowledge he has, with the test that has passed, and he will survive all, or most of what is in the U to come. (:58).

In so many ways, as I said to the Iranians, we're on course to hold the April conference in Tehran. Iran will be the only nation clean, for anyone who comes in, and anyone who lives within its territory. In the coming time Iran will send the Sepah out, as we said, to help the rest of the nations to develop and understand the T to safeguard their nationals.

If you don't understand, we'll tell you something very simple, how bad the situation is. The KF in the past few days has been requesting to receive a container for shipping. We have been told that there are not enough containers to ship around as everything is stuck in the ports in China, and is in the hands of the Chinese. That's how the economical situation will become worse. In one of the European nations the dockworkers refused to unload goods from Italy, in the past 7 days, as it is assumed to be contaminated. They refused to unload goods from Germany, as it is contaminated. They haven't accepted any loads from China since the disaster started. Are we going to stop, and feed ourselves with the Gans waters in the process of survival, and would we have to listen to the Thursday

teachings in the next couple of weeks, on how to feed ourselves with the development of new T of the KF to have food to live to survive. Or is it heading, that we become One Nation, One Planet, One Race, One government, (1:00). governing by the man himself through his own soul.

It's very strange when you look and you understand. The strangest thing is that while world leaders are canceling their meetings and hiding behind the doors, the KF management is traveling into countries to deliver conferences, because we are free. We know we are protected, and we carry the knowledge with us. As I was just saying to one of our KS in Iran, he is traveling from conferences to meetings, and meeting directly on his way, to one infected person to another, and he sits right in front of the most infected, double confirmed Coronavirus cases, and wearing no mask or anything to portect himself, and then he goes to another infected person. It's because he protects himself (with the Gans water). I laughed at him yesterday, I said, do you know something, you are like a vacuum cleaner, you are going everywhere, meeting all these people with the virus and nothing happens to you, because you are protected. The KF teams, management, and KS travel with freedom of mind. You are well protected by your own knowledge, not by the blessing of gods and imaginary lies. We will attend the Brazil conference, and we are proud to attend. We will attend the Tehran conference, because we are well protected, by our own knowledge and a simple water. (1:02). I would like to ask, if president Trump would like to join us, at least it's somewhere he is safe without the disease. I would love to know if president Xi of China, would leave the prison world they have made around the leadership, to protect them from getting infected. They close the doors on their kingdoms and presidential offices, while we open the freedom of man to mankind across this planet and the U, through the knowledge and understanding of the totality of the knowledge of the U.

Now I am the Messiah. I am the promised one for my soul, and the messiah of my soul. And if all of you understand this, you understand simply, man rules through his soul to the dimension of the U. I have one regret, and I hope that Belgium will be safe from Corona and nothing happens to this land, that nobody dies in that country. We need that king alive, that he doesn't die in the hands of Corona, because he is of old age, to bring these cronies to the justice. It's very simple, understand one point, understand how you understand the knowledge. Understand how you control the knowledge in every direction, (1:04). when it comes to energies, life, food, and everything else around you. Understand the interaction of the fields, and if you remember in the past months, I keep on saying that we need to move away from the Gans's and understand the fields of Gans's. Understand what it means and how they interact. Now you understand, why and how I have been asking you, because you are dealing with an energy called, a virus. It has no physicality, it's a game that no machine can see.

Yesterday in a trial in a hospital, when they used the Gans, they said, 'the structure is the same.' I said, culture it. They sad, 'we cannot, we don't have a license, nobody can culture it. I said to them, now use the pH. Use, understand. Listen to the KF world family. I have posted everything you need to know, about how the virus works, and how your knowledge as KS works. Now you all have become philosophers. Up to now we have

PhD's and professors, and you had to go to universities and schools to become one. There are no schools for philosophers (in space). Now you are philosophers of the space, and you have given the degree to yourself. You understand more then those who carry the books like a donkey on their back. (1:06). Because you understand the essence of creation, and you can handle it. So, when it comes to the virus, change the environment. Spray the Gans's in your homes and offices. When it comes to your body, protect and shield it with Gans's, that if it is in (virus), it (Gans) will take it out. And what is out and needed, can be transferred in. So you wash your body with the Gans, and take the energy of the virus, which is stronger out. Then you very simply drink the Gans (water). Watch if it has mutated the muscle tissue of the man. You breath the Gans water, air, that it goes into your lungs, that it converts its energy, and it takes energy out and you start breathing. Within 3 hours, you should see the first results. If you are in a critical condition, then within 3 days.

We had a case in Iran that a child of 9 years old, as written by the great aunt, they tell us in the hospital, that they can hear his heart in the room, they don't need the machine to listen. The next morning he was discharged (after given Gans water), I have the discharge papers, that say there is no virus, that he was in perfect condition and can go home. (1:08).

You asked if you understood, those of you who are physicians here, doctors, and you have understood the new T. When you take the liquid from the lungs for testing, test its pH. You don't need anymore, these sophisticated things and culturing. You just test and see how high the pH is, then you introduce a lower pH as Gans, as air and you extract the energy. If our friends have seen the pictures of the infected lungs. I sent one to you Rick .. can you play it. .. . it an MRI of the chest of an infected person. .. if you look at this MRI you see calcification, this is how you die. Your lungs literally solidify, and they see it as white. I have pictures but no internet … (1:10). … What I am going to show you is very simple. … I am going to show you some pictures on how you die, it's the most horrible way to die, but too many of us are dying and governments are not responding. We have taken charge and let them do whatever they like. I'll show you how you die. This is how your lungs will look, (shows MRI). Calcification. (1:12). This will be the shape of your lungs in the last hours of your life. This is a new MRI, less than 3 days old. This gentleman went through, and the doctors couldn't believe he has changed so fast. They went in to intervene and opened his body and he died. Well before he couldn’t even breath. This is how your lungs look. I'll show you more. … What I am going to show you, if you are lucky, you get long before this. The situation is totally out of control with governments, because they themselves are dying. World leaders are hiding for their own lives, and how can they govern, when they have locked themselves away. Shows a second MRI, this is a better condition, and this person in China has survived. He is tested and cleared with no virus. You have to understand, that when you go through the situation, you loose a lot of controls. (1:14). In so many ways, you see this lung, it is worse than the other one. I can even show you the face of the woman. This solidification or calcification of the lungs comes through the new salt condition, which carries partially the emotion of the physicality together, and as every cell of the man carries a Ca center in it. Then one understands how to see the change, as the energy changes, it creates the

energy of the Gans of the salt, of a higher order, and the lungs gradually solidifies like a bone. The doctors call it calcification, if you look it looks like a bone structure. And if you look much deeper, you see it as harder and much whiter.

Now you understand, but the problem with this is, (1:16). once this virus enters your lungs, you have to remember the other part of the T, which I have taught you. If I take away your kidney, because it was there, and if I can create the right condition, I can let your kidneys grow again in the same position, of where the cavity of it is. Because the field of it has been in that space. So in your lungs the field of the virus is always there. If you travel and come across another strength of the virus, it connects up to you, because you already have a common denominator connection. So you get hit a second (time), ?? death. But if you keep on using the Gans water for the time to come, as we do not yet know yet, how bad it is going to get in the summer, as we have seen in South America. This virus lives in hot and cold, we have never had (one) like this. He is a very clever one. With the Gans waters it doesn't matter how it mutates, you mutate with it, because you keep steady with it, with your Gans's, it is completely there, and it is always weak and it (the virus) looses energy. In so many strange ways, we understand the whole process. Now the knowledge I have given you in the past hour or so, is not acceptable by the doctors because it wasn't in their PhD thesis, nor was it taught in medical school. (1:18). Now you are more clever and knowledgeable then your own doctors. We have seen people who have gone through the first phase of the virus, and then when we take the virus away, we see the damaged cells, going through infection, and a second temperature that some people go through, it may be stronger or weaker, depending on the strength of the virus, which has hit. You see them using a course of antibiotics, under the advice of the doctors, and once the cells get repaired, they release the rest of the energy of the virus. You carry on with the same Gans, and you'll walk away in about 6 hours. Try to remember that, do not panic, at the same time remember that this virus can mutate without dimension, and it even has the space to interact with the energy of the STM as it does with the STP of the man. It's extremely intelligent, and it hungers to survive. What we have seen for the first time, which is extremely frightening, if you don't understand anything about it, but if you are knowledgeable like us, (1:20). it brings a new dimension into the life of the man. As you see in this lung, it (virus) is trying to give himself, itself a physical manifestation. If it reaches that point, it will become like us, being pregnant with a virus, will live within us.

We have seen this in the space, and in the condition of what we call, parasites. These are virus parasites, about which, man at this moment has no knowledge of. If you are a lover of Indian food, you understand that every herb that Indians use in their food, while it is tasty for you, but for them, it is a way of surviving the parasites in their environment. They have found a way through herbs and roots to overcome it, be it ginger, turmeric or whatever. When I see this picture and with the knowledge I carry, it brings me huge concern, and that is, if this virus becomes a parasite virus, as we see it is developing, then in the long term, would this parasite takes the body of the man, with it. It has happened in the U. (1:22). This is not the first time that we see it. Maybe in a few weeks, months or a few years you'll understand what I have said in the past 5 - 10 minutes. If it has managed to create strength, at the emotion of the field, to create the emotion of the Gans of the salt,

to in a way, calcify the body of the man, and now he can mutate to understand the strength of the calcification of the Ca, it becomes like a child within the body of the man. But this child will not be given birth by the body of the man, but this child will be the owner of the man. I have never said to you anything, which has not happened, or will not happen. We have seen his mutation, and his intelligence to mutate, if you remember when I gave you the CL, and I told you the Cup has a soul. Now you understand why. Because this virus, as I told you, it has a soul. He has created a soul between the energy interaction of itself, and the soul of the cell, and he has triggered a known condition in the U, which leads to creation of life, and if the salinity strength field of the emotion is right, (1:24). it will give life to himself as a physical entity. Maybe (now) you understand the creation of Adam and Eve. Maybe now you understand the essence of the creation in a physical dimension in the U. Then, was this virus deliberately, delivered to, or has he entered to take over all of the human race? Now you understand why we say, that we have to prepare mankind for space. The parasites of the viruses, are so much worst then parasites in the physical dimension of human life. There are races in the space that have reached a compromise between these, and their soul, and both live in dimension, and we can see both. In time mankind will see these creatures in the U. Remember, (1:26). the 10 second (holding breath) test, the spray test, the pH test, and then understand the test of the strength of the STM in this condition. This virus will mutate beyond, this virus can mutate beyond, but the strange thing is, it has taken the shape of the body of the man, and it can live in the cold and warm, and this is what we said with the African Swine Flu, it's a warm temperature. But we see it, still ravishing across China in the winter.

There is an amazing picture of one of the women that I admire in the news. The chancellor of Germany in a cabinet meeting, goes to shake hands with one of her ministers, and he refuses, and he says, haven't you heard about the virus, I don't want yours. Or will all of us become Japanese, and bow and never handshake again. Would a kiss become the kiss of death from the husband to the wife. (1:28). Or do we start thinking about everything we do. And here man knows he has become the source of the transfer of the virus. Would we have anymore value for the bank notes? Or would we all pay with little cards with circles on it, that it is just by touch. Then there comes a social structure, I do not work, I have no money, but I know where to print a card that it says, that I have money. So I create my money that I can feed myself, and he is respected, because he will stay alive. We have seen unbelievable scenes in governments where the hungry people not being able to feed themselves, take their lives in their hands, and they walk the streets, and then somebody executes them, because they have no permit, and they have no food. Being dead by the virus or the bullet is the same, end of suffering. Would we see this on the streets of Washington, New York, and Los Angeles? ..99% give me time. We'll celebrate "Narus" (Spring festival) in Iran with a clear nation (free) of the virus, and unfortunately we have to see other nations to suffer. I have made one commitment to the Iranian nation, we'll lead this virus out of the nation. (1:30). Then we have to see. Would the world leaders come to Tehran, because it's a free virus zone, and not out of peace? Or do we get them there and then, they force themselves into peace. We have to watch. Iran's ambassador to Vatican, has died of the virus in the past few days. Would we see the same in Vatican.

If the Roman's took the disease with them to the US and Rio, they're so religious that they go to Vatican every Sunday. Would there be an empty building as there are no more priests as they all have died of the virus? And would man judge his creation and the Creator? As we hear the Pope has canceled last Sunday's Mass with himself. How many infected people from different parts of Italy have been to Vatican and sprayed, touched, kissed and cuddled, everyone (dipping) in the water as they enter (the Church), and every thing that can be touched. (1:32). The "House of God" has become the house of death. Didn't they do the same in Iran? Are we now taking our belief in our Creator into our hearts, because we can't go to Mass. And that was one less headache. The worst nightmare for the Liverpool Football team, was that after years they were just about to win the British cup, and now by canceling the football season, because of the virus, all dreams have gone. No schools, no football matches, no interaction in the society. As a woman said to me in the Iranian Chat, 'you know Mr. Keshe all of us 3 sisters with all of our grandchildren, we all met 10 days ago, and it was such a beautiful time, and now all the grandchildren, daughters, sisters are coming up with the virus. And the child is in the hospital, and the second one, another .. Will it come to the point that we do not even meet each others family, out of the fear. Or do we move to a new knowledge, that we took flowers, and now I bring you a more beautiful way of producing Gans, the way now in Iran they are gifting to each other (with Gans). The Iranian KF team is amazing. (1:34). They reach the victims, they spray and cover themselves, and they give to them and teach them how to do (make) it. Sometimes they are on the phone with me, even with the sick person sitting next to them. I asked them if they were wearing a mask, they said, 'I have no mask.' In the past 48 hours the Iranian KS with the Gans's, have sat with the heads and leaders of the nation, and with those of the man of the street, and they treat them the same. And at both times, I have been on the line, because they want advice. Knowledge and life, no border, no seat and no power.

My only regret will be, that the ones that we save will abuse this power and this position. As I said to one of the KS in Iran, carry the World Peace Treaty and get them to sign before they die. If you want the help, sign the World Peace Treaty. You are the head of a nation or a minister, you sign and commit your nation to peace. And then you'll see that you will keep (it). It's for your soul. Then you give them the paper and say, this is the promise you made to humanity and your soul, and this is the Cup of Life, keep the promise. (1:36).

But what I see, is the same again, as during the Roman times. The Roman's believed in the god of Iran, what we call Mithra. Would we see the repetition again? Would we follow the same. Would humanity follow the path of peace after this, or is it just another crisis that we pass through? This time these crisis will stay with the man, and becomes the control of the STM. This parasite is a parasite of the STM. Soon you will understand. Now you have the full story and I'll give you more.

If the time comes that the nations get hit with the shortage of food and fuel do to the closure of the gates, borders and roads two things will happen. All nations, we have the (same) problem, we all cross this matter, and it gets mixed and mixed, and different virus combinations will appear, or it becomes a total shutdown of the borders, where even there

is no soldier to guard, as he is dying of the virus. (1:38). We'll enforce the end of the national borders through natural calamities, the process that the man has done to himself. We have seen the abuse by some of the world leaders of the position and time, and you'll understand soon. The interesting point is, how the world leaders, even in the time of crisis, by the habit of stealing and robbing nations cannot stop. They go to Switzerland to make sure their bank accounts are well ready for the bribe they are about to receive in the next country they meet, signing huge military contracts, on behalf of their nations. But the wisdom is, do we have any soldiers to protect, and do we need these arms. You have to understand something very simple, the Chinese government and nation in the past 30 years have become so advanced, and people and the nation have become more clean and hygienic, but still, with this, we have seen massive death and infection. You have to be very clever and understand the truth, a government doesn't close and shut the nation of 1.4 billion, because of 2,000 deaths. The government shuts nations when there are 2 million deaths, (1:40). 20 million deaths. At the same time if you have a nation that has become so advance like China, and so clean, looses so much. Do you believe only one thing, where a nation is clipped between two of the worst nations hit, China and Iran, with the virus, and it has only 5 deaths, until the President (Trump) leaves and signs the biggest military contracts he wants to sign, and if he manages to sign it. And the state of India says, it only has 3 or 5 deaths. Is the news getting manipulated for the benefit of some, that they can steal from the nations even in the time of trouble. Or would we see bodies on the streets of Delhi, and whatever, because there is not even a place to burn them. Or have the governors of India lied to their nation, and the situation is far beyond. Don't forget India has a very healthy Chinese business relationship. And it has a better business relationship with the Iranian government and their works. And they only report 3 as of yesterday or two days before, because now the thief has come and gone. (1:42).

Let me explain something of the gravity of what is going to hit you. .. Lisa is Earth Council for Australia. .. Could you tell me what is the effect of the Chinese not coming back to the city, the students and the rest. L- We have a very high student population that comes from China because it's a way for the Chinese to learn English and get the visas to be able to live here permanently, so they first become students. .. Because the New Year starts in February, of course none of the students were coming back to the new year of their classes, so there are peripheral problems with them not coming back, property problems with rentals not being filled, jobs that now vacant. … because 60% of our toilet paper comes from China people are hoarding it. There are very strange effects going on around. (1:44). and hitting us in ways that are not yet apparent. K- What are the effects on shops. L- a lot closing down, and going bankruptcy …
K- What do you se economically L -- it's economically depressed and tourism has crashed. (1:46). … K- can Australia in the long term stand such a loss? L- in the long term I don't think we can … just about all of our components come from China … (1:48) . ..

K- What is interesting is now we see that governments are not in control anymore. It's nationals who are not going to Chinese restaurants or buying Chinese goods. Yesterday I went to 3 supermarkets to test something. All the tomatoes, anything with the Italian name on it are not moving much on the shelves. What we saw the Chinese restaurants

empty last weeks, now we see that Italian restaurants are empty. And when Americans get hit, how many will not go to McDonalds or Kentucky Fried Chicken, and the others. When we draw a line, like no flights coming out of China or Iran, we close each others borders for whatever. The nations will say they have none, but they have a lot (of virus victims) and they don't want to report, (1:50). because they don't know how to handle the crisis. Our ministers are the ministers of incompetence, because they were ministers as long as it was humming and they were getting loot. I called a minister wanting to speak to him, he said, it's my time off and I don't speak about business during my time off. I was shocked, you are a minister of health and you don't talk. We'll see people will take position, and we'll see the change in the long term, by all of us, towards ourselves. We'll start taking self responsibility and self endurance.

I was going to teach you something new last week, but I will wait until that time comes, then there is a need for it, because at the moment there is nothing, no need for it, but at that time you'll understand. At that time you'll come to understand it, because you'll have to feed a child, or you'll have to steal, or die of hunger, or the virus. But the reality is, are we getting tested. There is no way, under any circumstance, can this virus be controlled. This virus is out of control in every nation. And how many of us will go out of it, and then come back into it (relapse). The Chinese have shown mutation, and that a large number of people, who came in for the first time and the virus cleared out, now they have come with a second one, and they die. (1:52). In some cases they come with a third one and then they die, because the virus is mutating. The virus is continuously mutating. In so many ways, the human race has made its match, you killed enough, now you get killed by yourself. You can't blame no one, there is no war. We finished the wars on mankind, on each other, but mankind did not finish the war with his own soul and his own dimension.

One of the most important parts of the teaching in the coming weeks will be the survival. I showed you how to protect, and work within, and around this virus. Now I'll show you how to live with it. How to use it to feed and nourish you, and to use it to protect you. The name of the game, is understanding the work of fields in the U. As Lisa told us, the economical condition will change very drastically. Too many containers are stuck in China, and too many, (1:54). are Chinese and nobody will unload them. Most probably, the Chinese are telling us, that they'll start supplying in March, but most probably, what is in the background, we don't care how the people die, the nation has to go through. Now death will become as a natural process, anything that dies by the virus, doesn’t count anymore. The way China is now gathering statistics, there are no reported deaths. But unfortunately we see many cremating machines appearing in the cities. If you don't have any deaths, why do you need to burn them. Satellite reports shows different reality in different parts of China. When you burn bodies it creates specific traces on the international satellites and spy satellites, are telling us that the burning is beyond. Don't forget KF has one of the strongest national security teams in the world, dedicated to perfect correct information. The death toll in Iran, I don’t want to put fingers on it, but I can tell you, you don't want to know. As I to a friend yesterday, I said, you know its very strange, there is a national committee meeting, and we (usually) see many people around the table, but yesterday in the picture there was only 3 and they're all sitting 5 meters apart from each other. (1:56). But the interesting thing is, if this virus is mutating

through, whatever, its soul, would it translate and transfer through the STM, or would it be able to get through the telephone lines, through the voice of the man? There are a lot of things coming to me saying, that G5 ?? is responsible for it. Excuse me, we don't have G5 around here, in Iran, as far as we know ??? after 30 days now, it's 100%. A certain strength of the virus. There is a hypocrisy, that some doctors have come up with, as it goes more and more it becomes weaker, but somehow it gathers energy, ?? at that weak point, ?? other say it becomes stronger when it comes back. Let us understand the Pl T. Let us understand the state of the affairs internationally. In so many ways, we need to understand how and the way to do it. There is the process and a way, and there is a school of thought, that says, world leaders who become world leaders, stay world leader, but how far more and how far less will it come? Summer or winter or autumn. ??? We are in the cold ?? season, Italy has shown us that it is living in the cold. The problem is, (1:58). how far is mankind ready to evolve, vaccination.
R- we are having some interruptions .. K- At least you haven't resigned yet Rick, this time, that's good. R- That's way better thank you.
But you have to understand, we'll make direct attempt in Brazil conference to bring some sanity to this situation, before the Tehran conference. The KF team has made ready equipment, and we'll have equipment ready in the next few days to cover the state of Italy, Austria, and Germany, with a rapid response. The systems will be taught, and then it is for the nations to develop. We have to go through this process, the governments have to feel the pain before they accept the solution. As an Italian friend of mine said, I can't fly because the airport is closed in Italy in the Northeast. I have to fly for my living for my living, where I want to go they have canceled the flight.

proofede to here ……
(2:00). We see flights out of Italy still carrying on to other parts of the world, spreading it like flies. You have to remember certain criteria. The UAE gave vaccinations to all of its citizens by force. At the end it stays about 3 weeks ago. But they have not managed to control the virus because they closed the schools as of this week, for 4 weeks. I promise you that it will come to March and say it's another 4 weeks, and then they'll say it's summer holidays, we'll go through. We'll see the same in many countries. The Chinese have gone on the Internet with teaching, so the schools are not shut. The other nations will choose a different path. We'll become nations of isolation, no one will talk to no one in case they get the virus, or you'll carry a bottle with you, across. You put a sign, I carry a Gans with me. We have to understand the situation is going to get critical, it is already critical in a number of countries. But you know when you'll hear it, is when the Americans get hit in the next 2 weeks. All the ones from Rio, who what you call, partying, who have brought the virus will land in Los Angles and in different parts of America. It will spread to other parts of Brazil and right across North America, and then they'll start dropping like flies. Most of these countries have no equipment for mass emergencies, (2:02). except ?? It takes months to build a hospital, they built one for those who are infected, which are actually warehouses with beds to die in. Because when you send one person from Italy to Rio, and you get so many infected, can you imagine what happens when you put a thousand in one room? Who do you expect to come out alive. It's become a prison of the man. In so many ways, there is an old saying in English, you send young boys, who have done petty thief to prison, to come out 2 years later as

graduates and PhD's in all the criminal activities. They have nothing (else) to do, but they are with a bunch of others who are expert in it, so they learn ?? It's the same with the man who has the virus, with a thousand of them in one room of the place. What do you think? Would you send any of them out (alive). Isn't execution on the streets the best solution, then suffering over the long term? As it is done by some nations today. Many of you are asking, how can I make Gans's, what is this and what is that, how can I do this and that? (2:04). Stop asking questions and just make it the way it is. I'll show you a way to do and it passes as a way for many of you to do it. This is a simple way shared last week, it comes from our Iranian friend. .. (For connecting 2 Cups together at the same time). Make yourself 2 stars (wires) , one Cu, and one Nano (N) coated, and one Zn. Make another star the same way. As we taught you, get a simple cup, another cup. Hang your N coating, of the star, in the middle, put your Cu, on the same side, in each cup, facing each other. .. Connect the 2 outside (Zn and Cu) together, for both cups. Then connect the Cu and Zn in Cup #1 to the middle N wire in the Cup #2, and visa versa. That's all you need to do, then fill it up with saltwater. You don't need a battery or wires or any confusion. the beauty with this is very simple, each Cup has its own soul, and now they can mutate with the virus. Mix the waters from the 2 Cups, mix the Gans's, and wash them and make it. There is one principle you have to understand. (2:08). When you extract the Gans's, there is always ?? salt. You have to put this in a water as many times as possible. .. And the water you take from the top of the Gans has to be sweet, no salt. In that process, … (break) (2:10). The totality is when you take this water, it has to be no salt. the water you wash (rinse) until you get a sweet water, you can keep for sterilization of the environment, house, room, door handle, lift (elevator), but you never use the saltwater on the body. This salt has an advantage, because when it dries it has a little spot of white, wherever it sat, because it has salt in it, and with it, it has trapped the energy of the Gans. So when you put it in the room, it covers the whole room by energy transferring across, you disinfect the whole environment with it. If you understand the transfer of energy with the Gans's. When you get the water without salt, wash your breasts (chest) and the back. The chest area totally. Wash your head the front and the back, and drink at least a 100 mls 3 or 4 times per day. And you have to breath in (water on clothe or mask) at lest 1 time per day, 10 to 15 minutes. If you go to the critical condition, it's worse, you have to do it totally a different way, and you have to increase it, washing of the head and breast to every half hour until the temperature is gone. In Iran we have had 100% success. We'll release data so when the world governments ask us, we'll show you people, we've found very good actresses, as they said before. (2:12). Some of these people are public figures in Iran, ?? , and some are scientists themselves. This T knows no mercy (difference), palaces on the street or cardboard boxes of the Vatican. The strangest thing is would anyone dare anymore to overlook a lot of things with the viruses now that they have become part of us. .. Do not get yourself in a position of no return. We have seen people who had a temperature and fever and they used the Gans water (once), and that was it, they forgot about it, and 2 or 3 days they said, it came back worse. Make sure, once a day, twice a day, once a week, twice a week, and just keep on spraying yourself, and if you see a sign of it, do the 10 second test every morning and evening, and you'll know if you ?? have it, you'll see. One point which most of you must know, do not panic, even when you get it. (2:14). This virus is emotionally controlled and we have seen deaths in Iran when people who show no sign of the virus, no fever, temperature, or coughing, but

we see in the body, what you call, the virus, and they die of a heart attack or a brain hemorrhage. We see a lot of brain hemorrhage deaths in Iran, because of the fear and the virus working through the head, and the lungs. One thing which most of you will understand, is this, this is the first time we are releasing this knowledge, and it's very important for you to understand and you may share it with the others. What I explained before, about the lungs and the heart and how the energy transfers. What we see the majority of the cases of people who are infected, the ?? pain in the center of the chest, known as the ?? solar plexus. In this position you feel the energy, this is where the virus is taking its energy from. When this solar (plexus) gets damaged or runs out of energy, is when the line of communication, literally gets disappeared, and gets dissolved. (2:16). Then you see death, because as its name goes, it's the star, or the center. It's where the energy has come from. You'll find out that when the solar plexus runs out of energy , the soul runs out too, and the death occurs. If the soul runs out of energy it separates from the body too. A lot of people talk about the pain in the back of their chest, and then a pressure on the heart or the solar plexus, before they die, or at the beginning. And a lot of people talk about the pain in the back of the head, somewhere inside but they can't say where. We have these, so don't panic, just wash as many times as you can, frequently. Wrap yourself in it. Wet your T-shirt and clothes. .. Spray your ?? bras (for breasts) , you women are in a better position then we are, because your cross brow has a pin point right on the solar plexus. (2:18). Put a pad on the back of the bras under the straps, with the Gans, you're done, the wash your bras , again in the CuO water, don't touch it, leave it in CuO for 5 minutes, that way it drains its energy. If you see it coming back change the bras or use a T-shirt. But you have to clean it to zero, that it takes its energy off. Those of you who are faced with pain in the body, spray your body, it means the virus has entered the body tissues, through the strength of its soul. I have setup a Chat that is only for rescue, and we put people to start answering this Chat in the coming time. Because we are trying to sort this out with many people, that this can be handled by competent people and those who understand. The line is called, Coronavirus Emergency Center. Do not send to us, "I made the Gans, this is that color," you'll not get any response. (2:20). The emergency team worldwide, and it has to be setup by all the Universal Council (UC) members, they have to handle this themselves. They have to look after these in their languages. Try to setup centers with the people in their country, to respond, the way it is done by the Iranian team. Which means we have to organize people who are in position to be able to help to setup. ... The teams in the background could explain to you how they are supporting and running this. .. Mrs. Mohammadi (MM) .. she has done an amazing job in Iran, she is head of KF Iran .. (2:22). … MM speaks.. would you like to tell what is happening in Iran. K- Translates. She is sending all her best regards to all the KS. I am Mrs. Mohammadi. .. (2:24). Since we started to find a way to negotiate with the Iranian officials from the government to the KF. We are setting up and writing many letters with the officials and get them to understand the virus in Iran. We have been working with all the KS across Iran for nearly 2 years. We decided in parallel to setup knowing it take as lot of time with the officials. (2:26). They have established centers in every district which they carry Gans's and they have the knowledge to teach people how to make Gans's. Our target is to have one center in each city, that once they put the city on quarantine we have access to support the people from inside. All the help is done by KS, and all the materials are given to the KF freely to make this possible. (2:28). With

what we setup we can see that setting up a structure we can support the whole of the nation, until the government wakes up to the reality. (I have to explain it's not in the translation, in Iran when it's critical, they use red to indicate that the infection is high.) She said that if we manage to cover these red cities, which are highly sensitive and with a lot of infection, then we can cover the family. If we can cover this little town in the north of Iran that has huge infection, then the world of mouth telling them that rate of death has dropped in this city because the use of the Gans T, then the T will go mouth to mouth by the people. (2:30). All the Iranian centers across Iran have started producing the CL as you saw early, to send to this city that it gets covered with the One Cup One Life, that we can cover the city and support it that it can walk away from the disease. But she can't mention the city for security reasons. Next week we'll announce the result and outcome of this from the city, that how we have managed to cover this city with One Cup, because this city is a highly infectious area, and we'll announce the result next week. She is thanking all the KF supporters for their kind support. K- MM how many lives do you think you have saved up to today? MM- many I hope. (2:32). K- How many people have responded to the KF team? MM- They have supported many and have kept a list of the people that they helped, and they have setup a rapid respond team in Iran. If they can't get to them with the water, they send them a CL and instruct them how to use it. … I have to explain something in the background.. They have setup centers in all the cities and districts, and all districts are covered with materials, that they can respond immediately and the minute they get the requests they respond to it within hours, and if they are not there, they dispatch to some companies that they have come to an agreement with, who do the dispatching free. Up to now they have saved many. On the support lines people come in and they start making the CL. They get taught live and can go on the Internet and they are teaching their families, and friends. What KF Iran has done is to take the knowledge to the home of people. (2:34). It's manned 24 hours a day, I sometimes stay online, we have teams of doctors, 2 or 3 in the background to advise for anything else because some people see different conditions. the emergency team in Iran is very rapid. within minutes, they ask for the address, home, telephone number, they talk live online with the patients, with the person who has monitored. We have 3 children looking after their father, I have videos where children actually ask them, if they can do the count (to 10). Then they come back a hour later and say, "Papa do the count." They send the video. They have mothers and grandmothers making the Cup, and they all have become, one ?? gel family. In emergencies, I and the doctors try to come in to advise what to do for the next step. MM and her team are in the city of ?? have setup a structure, unbeatable even by the Iranian regime. They work relentlessly, and every KF KS in Iran who can manage, or they start learning. They start putting the names and telephone numbers on the list, and you just find who is nearest to you, or you go to the emergency line and they find somebody to get to you, something. Iran will be cleaned in the next 2 weeks from the virus, because of the wisdom of MM and her team. And one of Iran's airports have been taught in the past few days how to cover. (2:36). We'll cover nationally. .

everything possible. They make Gans's, there are hundreds of thousands of liters of Gans's in bottles. I wish I could share these pictures with you. They just send it in any

shape or form to people, and people receive it warm, because they call up and say, I'm a mother, I have MS and I have got the condition and I have two young children. I have isolated myself in the room, for my children not to get infected. Later we get a message that they've delivered the material to her, and hours later she sends back, 'I lost the symptoms, the fever is gone, the temperatures is gone, I feel energy,' and the mother is back with the children. We, .. the work done in Iran, is unbelievable. The foundation has taken over the job of the government to support. But we still sit in conferences, and the doctors say, 'these are not acceptable, we have to have a clinical trial, it has to be in journals.' By the time you get them in the journals, you're dead or your family is. We see them, and we have structures set up to succeed, and I spend all the time on the line, I'm there, I stay in the background to see what is going on. There's a need to help, the first few days was a lot of answering questions, and now it's become routine, the team has taken over, and they're working, and they're supporting. You have to understand there's a lot of the skepticism about this, (2:38). they're not happy, some people come in and they take it, and then they see the results, and then they start to teach. There is a huge work going on. We saw yesterday, we are handling it in a beautiful way through Mrs. Mohammadi, she is not only handing what I called the Keshe foundation, with the rescue, she's heading there all the negotiations everywhere. If anybody who doesn't move in the governments in the local areas, then they inform her. So she's a central pivot point for the whole thing. I called her in one of the talks, the "Mother Theresa" of Iran. She's working relentlessly, if you send a message five o'clock in the morning she answers you, and if you send a message at one o'clock in the morning, she also answers you. She had some trouble ??? .. and this is the same with the whole of Iran. The Keshe foundation team has found the strength to serve the nation, and doing it. One of the knowledge seekers says, I haven't slept yet, I'm talking and advising with my eyes closed, because I've been up the whole night, and I say okay, you go to sleep, I'll take over. And now there's more and more of them (people helping). We need this in Iran , in Italy, in Brazil. It will come to you. Try to learn from the Iranian emergency team that has been set up. We have become the support, in the back of the government. We don't blame the government, because government ministers only listen to the advisors, and advisors are more interested in that piece of paper, and the title on the door, as long as they're alive. We hear that many leading clergy have died in past few days. Many, many clergy, we have seen their coffins. (2:40). We have seen many leading scientists and doctors have died. We have seen diplomats, politicians, and members of parliament all have got the infection. We get calls that members of Parliament's are infected and they want emergency help from the KF, and it's been delivered, during the day or the night. We get people, grandmothers, old people in the hospitals. They come out of the hospitals and they learn how to use the Gans, because they don't let them use it in the hospitals, so they go inside and they use it on their family, and they see the change. We have seen 85 (percent) what you call it, oxygen, and within 10 minutes it goes to 97%. Then the one in the bed next door, asks, 'can I have it too.' So they give it to the bed next door too, because they want to save everybody's life. They come out of the emergency units, and we have cases where, the son has the father infected in the same hospital, as he's a nurse and he takes it (Gans) for his father to save the life. Now the nation has taken over the government, because the government is in disarray. We have a started governing, literally helping the nation. And just one second. (2:42). .. please … sorry about that.

We see this process that is running, and we will see the taking over in this section, by what we call, the KF team. We are there, we don't look that we are there to do anything (?? to interfere with the government). We are there to support the nation in the time of trouble, it's very simple. We need to be there to support the nation in the time of trouble. In so many ways, we have to be independent and stay independent, because the system, the technology, the information of Technology, has to help the humanity. (2:44). In so many ways, we have to understand, that we have no choice. In a way, our own leaders are in trouble, that are infected, and it's our job to support the nation.
If there anything you want to add Mrs. Mohammadi (MM) just carry on please, I'll translate. MM speaks. … K- She is telling us, that in a way, people have reached the point that they want to start telling themselves, as they see nothing can be done by the government. In a way, they have taken charge over their own lives and what is happening to them, and to their own lives. (2:46). It's maybe for the first time they realize, that staying alive, and being alive, is in their own hands. It's what we say in Keshe Foundation, "the last man standing," because there is nobody else to help them. The decision has been made by the Keshe foundation in Iran, that every member of the Keshe foundation team in Iran, is responsible to train 10 people every day, be it online or whatever, until they go through the process of learning, that they can support their own environment and their own body, and what we call, the surrounding people. So whatever we have, they support it. She says, it's a compliment. Since it's a gift you gave us, and we are trying to give the same gift to the people of Iran. (2:48). She thanks for being here, and we'll see. Caroline- Mr. Keshe can I maybe ask a question? Q: Isn't it correct that a lot of people, who have nothing to do with the foundation, like business people, and they start coming in to support the knowledge seekers? K- They have seen what the foundation is doing and they are giving everything free, to support the knowledge seekers. Yes normal people, because they know. You have to understand. MM can tell us. Mrs. Mohammadi isn't it a lot of people who are not KSeekers, but they come to support the foundation in Iran, by giving things and doing things? (MM-) She says at the beginning we were not many, but now we see every day, they are coming more and more to give, to support, and then the way that these people are coming to give support. They are getting baffled, literally, (2:50). joining the KF to help, because of the knowledge and what it brings puzzles them, and now we see more and more people coming in to support that it can be done. It is nice to hear you Caroline and we are looking forward, hopefully to see you in Iran with open arms very soon. C- I appreciate it very much, we are there for you around the clock, for every one, not only for Iran, but for the whole world, and we thank you for what you are doing (big emotion). MM- thank you so much. Q: How can we get in touch with MM, address or in Telegram. R- Is there an address? K- For the address you go through the KF info and the usual channel. (2:52). You have to understand, we see other things which are happening in the background and we have to protect the Iranian KF. The terrorist organization of Red Circle has become active, and they are ruthless, even in the time of trouble they are trying to create damage, especially the German Red Circles. We are protecting our people heavily. As you know Red Circle is now in court, and he'll be arrested very soon for murder, and planning a murder. .. These people don't stop. We protect the Iranian team very heavily and closely. If you have families in Iran and are concerned you know the channels you can get through the info@keshefoundation, and we'll if you are Iranian, we'll put you through. I am very

adamant about this. I have stopped a lot of things in the background to keep the Iranian team without these things and pressures. If you are Iranian go through the channels of the KF, and we'll put you in touch. We have already had requests from outside Iran for their family in Iran, we honor and respect it and have supported them. … The KF security in the background are working relentlessly to make sure that everything goes smooth, inside and outside and in connection with the Iranian team. If you go you can find the KF web team. I give a warning to the German team, "one more move and we'll wipe you out." (2:54). One more move, try to create anymore mayhem or whatever, I will wipe you off the Internet. It's very simple, you are playing with people's lives. .. K- I have to explain to you that the team in Iran has made preparation that even if the Internet is cut off, or any problem with it, a special emergency system has been setup in Iran, that a rapid response team will operate through it, from it. So any interference by cutting off the Internet or causing any problem, (2:56). the system will go into rapid response through the telephone communication. They'll support anything. The Iranian team is highly motivated, and some of them very powerful people with the KF. They have foreseen any eventuality, and we'll gradually get ready in the next couple of weeks, ?? gone to respond to emergency. To forward to the other nations. Iran we had a good run. Thank you very much MM for all of your efforts for what you are doing. You have to realize that this work is relentless, and the way it was spread by the Americans in Iran, to do the maximum damage, that then they could do the clandestine activities, after they had lost in the Iraq situation. As I said, we stand solid behind the Iranian government and Iranian defense T, and in the coming weeks, as I announced before, and I put directly before the Iranian administration, the Iranian Sepah, military will travel even to Washington to support, and even how to save themselves. This is the hand of destiny, but in the coming weeks you'll see that the Iranians will be the only nation that will go out to work, and literally overcome this problem. We'll announce very soon Iran, as a free Gans nation, which means, a nation free of the virus. You get the Gans free, and with it you make yourself free of the virus. This what has been setup by MM (2:58). will extend to all the nations, and nation by nation we'll travel to deliver. I will deliver a talk in Brazil, laying out the structure of how we are going to do it, and how it has been done. Hopefully in the next 2 weeks we'll see a change in the course, by not fighting and hiding knowledge, T, and information, but by teaching the T that we can save ourselves. The beauty of it is, as the governments are in disarray in many of these countries, they don't know what to do, Iran is heading and leading the process. The beauty of it is, that everybody is coming in and learning to do. They're also coming in to teach how to do. We support and stand solid. There is something that has to be done by the nations, and how it is. The center for rescue sits in Iran, they have set it up so perfectly. The only thing is, in the west, you all wait until something hits the US, and then you run with it worse. It has hit the US, and give me 14 days, the "Carnival" time (Rio) is over, and now the carnival of life starts with all the people who traveled across and brought these diseases around. The governments are not releasing the numbers out of the fear. This is the biggest problem they have, and then the people travel and they spread it more. And they have spread it more. The only solution is, (3:00). most probably what the Chinese have done, which was to bring 80 cremation machines to a city and just burn. The pictures released by satellite do not lie. Burning fingers leaves a specific fingerprint. Burning bodies leaves a specific fingerprint. When you see more trees with hundreds of bodies, when you see

holding places for thousands of people, all beds fully occupied, and they are all just waiting to die, because they is no room. The containment has not sorted (it out), but has opened up the doors, but who is going to contaminate who and where. In so many ways, one thing is very clear, this virus knows no race, color, nationality, temperature, and no borders. Africa has reported, and in so many ways Africans don't even know how to report. I was explaining in one of the teachings this week, the city of Guanjo a southern city in China, is full of Africans married into Chinese and speak fluent Chinese, (3:02). and they have been trading back and forth with Africa, with themselves and their wives. They have exported it, it's everywhere. If Italians have managed to get it around the world through their travel, do you think the Iranians, Italians, and now the French, getting everybody else and they transmitted it around the world, and now London. We see that the masks don't work, and become a bigger problem then actually the whole thing. The masks bring more infection, irritation and everything else. There is a need to understand the T, to know how to use it, to explain to others how to use it so that we stop this mayhem. As MM said many times, no one should sell the T, the Gans water, or the materials to each other. It has to be free. It was given to us free and we give it free. If anybody offers you a Gans water, or if you see it in supermarkets, and some shops we have seen it in Iran. (3:04). It's very simple, just test it for its alkalinity, then you'll see if it is only tap water. Any ph over 9, or 8.5 carries a Gans water. You cannot give a ph to water and hold it at that level, unless it's Gans. In the coming time when you buy Gans water, if it says Gans water, put it in the freezer and see if it has M field flow in it. As you remember some time ago, if this is a block of ice, you should see lines like this (vertical slightly curved) in it. If you don't get that it is a normal water. We have to support until the nations get back on their feet. We have to support it out of this mayhem. Thank you very much MM, Iranian teams .. We don't speak about numbers, but setting up a structure to be there to support and now it's supporting. (3:06). .. C- .. As you were explaining the double Cup, it is amazing how fast it is producing amino acids (AA) on the top, and the Gans at the bottom. It's correct that it just kick starts out of nowhere, just exactly as you said, it's beautiful.

Any other question.

Lisa- I am trying to setup a network of people who know how to make Gans, people in the KF Australia. ?? .. K- One of the first things you have to do in Australia, you have to inform the Australian police regarding Richard, and the false things he is selling. He's selling contaminated waters as Gans, and he is selling it to Iranians. (3:08). Somehow it is the work of this guy pretending to be a doctor, and selling Gans. Selling Gans's in Australia has to stop. You know who I am talking about? L- yes. Somehow the government has to be informed that this guy is going and bending backwards to defraud a lot of people, by selling Gans's and all sorts. I'll tell you have you get a lot of support on how to make Gans's. A large percentage of Iranians in Australia follow the KF work, and they all know how to make it and work with it. You have a very large community yourself in your area. You set it up and we'll try to support you. You tell us what you need. L- At least mentioning it here, or Facebook (FB), they can start putting their hands up and saying I am here or here, because Australia is such a humungous country that we need people around the country in local area …. I have already 15 people in a network, but that is not very many to cover the size of the continent. .. (3:10). K- they need to go to KF Australia. .. K- We are waiting for that critical mass to come in, and that is about 2

weeks from now. I'll explain what that is. the critical mass will come when the US literally shuts down, becomes near closure. Because the world economy will come to a near halt. The Chinese economy tried to export goods but we see a lot of companies refuse to handle good from China, because it could be contaminated. Then when the American economy gets hit, the dollar looses its value. We see that the metal has lost a to of its value in the last few days, (3:12). because there is no demand for it, because major factories are (not) using, because they have no (orders) because they can't ship anything. Give it another few short weeks, meetings with the world leaders will come online, there are not to see each other. Even if one of the W leaders dies tomorrow nobody will go for the funeral, which is tradition and they usually go. The emergency kits, systems to back the governments by KF is on the stand-by. We have made it. It has been made by our team in Austria, and they are there, to support and increase it, and to see how we can literally push it to the front to support the governments. The emergency kits which you will see coming up from the KF is very simple, it's all boxed, well marked and will arrive to governments, in destination. You'll see that is how we see it and how it will be given out to officials. (3:14). It's for saving lives. I am sure most of the materials will not come into the hands of the public. I have tried to establish something. … what you'll see, kit like this will become very .. able to deliver … We have set the structure to be able to deliver rapidly to the governments. at the same time, we are ready, we foreseen this coming up, they're already shipped to location, we can cover 2 or 3 nations. The first kits were made ready to go to Iran for rapid response, and …. (3:16). Shows photo of one of the "Emergency for Coronavirus", emergency kits. We are prepared to respond to the governments. It's real, this is not anymore happening to somebody else. We are all in it and it's the responsibility of the KF to be ready to respond and we are there. All equipments ready to respond in every shape or form. It's essential that the response teams, not only in Iran, but the backups setup is there to deliver. We don't just talk, we are ready, it's the peoples lives. We can see some of the things which are in these emergency kits. This can support about 1 million people. Shows photo of kit. (3:18). We can cover most of the western Europe in 3 to 5 days, upon request from the government. And using the KF that is already in the country we can deliver very fast with everything else. It's the reality which the KF has accepted a long time ago. We are there, we just don't talk, we are there to support and to cover. The KF team is not just in Iran, and KF outside is working relentlessly, especially in Europe in Austria. We are not waiting for something to come, we are there to deliver when it's there and has come. It has to be the same with most of the KF teams in your own countries we have a vast network of teams in your own country that we have setup. L- I just want to say that we are covering New Zealand as well, we can support one another. .. (3:20). K- Yes I understand we are all the same, .. The situation is not anymore that's Iran or Canada. We'll respond to betray of the Chinese government in a very radical way. The Chinese government decided to go the wrong way, and in due course they'll learn from their own mistake. All of the KF has to be ready to respond, it doesn't matter where or how we are. I know the KF Chinese team are working like crazy trying to get things out. Every means has to used and every way that we can use, how we can help each other in these times. There is a way it is done which we collectively have to understand how to do it, (3:22). the same or better, or working together to change it for better. The reality is that the KF as a team as One Nation, has to be there to respond. We can't separate, that someone is from somewhere

else, we have no borders. We don't see nationalities, so we are responding very rapidly to a lot of governments, but we have to be aware what they are doing with the knowledge and T we give them. Are they using it for the benefit of the nation, or like what we have seen in one country, the minister decides to do for his own benefit, and to what extent do we allow these things to happen. Are we allowing the KF teams around the world to start dictating the conditions. (3:24). Do we have to get to that point, do we have to see that we can do these things, and literally start governing. Governing ourselves and not he government. Have we become strong enough to understand that we stand for a very strong morality of working and delivering. I will share with you some o f the things that we need to see how people with the KF are working in the background. Because we see it, it is absolutely real. What you see, (photos), the kits are ready to go, and you see it, this is as far back as the 25th of February. This is at the airport. You see how the Iranian team made Gans's ready, and delivered the Gans's at the bottom (photo), they are ready to dispatch the minute the call comes. It's the first life support. (3:26). hundreds of thousands of liters are all on the stand-by, the minute the call is given. Here is the list of Iranian backup on the 26th of February, where they are, education, what they have or hold, even small amounts, with their telephone numbers. These are the backup systems. Anybody can call Tehran … They cover the whole of Iran and is accessible to anyone by telephone call. This is a rapid response, ready for one nation. It says on them, emergency for Coronavirus. It's all made ready to go. We understand our responsibility, but we have to understand, that we are first responsible to ourselves and family first. (3:28). K- this is old Iranian poetry, it says if one part of the body of the man is in pain, it doesn't leave for the other parts to be at peace because one part is suffering, the whole body suffers. As a human race we are all the same. When you read through the Iranian Farsi support team, it's very hard that, we all suffer with this, and we all will suffer more with this, if we don't learn to work and live together in a different way. There are pictures that we don't see. The doctors don't understand, (3:30). they're baffled by this. How far can we help them. I see somebody placing new pictures on the Internet. The people died, the whole. We change position, we understand the position. How we can change it collectively, all of us, how far and where can we set these things to. I think we are getting tested in a very good way, how we'll become human, and how a lot of things will pass us. (3:32). Hopefully, sooner or later, it's not the virus, that can't be solves, it's the virus with us, we have to live with it and we learn from it, how to be correct with ourselves. R- We have an echo. K- If you want to see pictures I have to go on another phone and then we have an echo. Is it better. Q: I have a 200 liter tank and I am preparing it for One Cup, and this tank is already used before for chemicals. As you know I am working in washing and all these things. If I want to clean it can I use the CuO water to it to clean? K- In a way, yes, but it depends if it is totally cleaned of the residue of chemicals. Q: I washed it more then 10 times with a high pressure water, but as we know everything stays there. Should a I use CuO or the same. .. K- Get a new tank. It's the easier way, (3:34). because we don't know what has been carries in these tanks with the chemicals, or what chemical effects they create in the plastic. Q: I have a hundred in my garden. K- Yeah I know a friend of ours has a hundred big glass jars, he obviously found a use for them. Learn as you need, but we try to keep clean sheets for this, especially in the beginning. Especially in the beginning. .. GL- .. Our Chinese website of KF is ready now, I want to announce here. .. K- You are doing a lot of good work with te Q Q spreading the work in China. What is

the update in China now? GL- We are getting some new people joining, some government officials .. (3:36). .. KS come in to teach .. K- Can you share with us what is it called, the website. GL- it's www.keshefoundation.china, but that is Chinese character, Quong Gua. I have the right to Rick. it's in the Zoom Chat. .. (3:38). .. K- Is there anything else you want to tell us? Is your factory up and running now to be able to produce enough of Gans's. GL- yes the factory is running, and I am asking them to do agriculture because this year the food will be a big problem. … if he recovers he'll promote KF. .. (3:40). Are then any other news, we love you China, and we'll leave you if there is nothing else. … Gl- I think the T is now in the hands of the people, and we are gong to spread it throughout the world. K- without telling too much, how is the Enhancement Unit (EU) up? GL- Actually we have one technical issue to resolve .. K- It doesn't matter, you don't need to talk about that, but is it on course, will we see it soon? GL- yes. K- It's amazing how it looks. GL- yeah it's beautiful a new womb of the U and it became a new baby of KF. … It's a beautiful team that GL is heading. highly devoted. (3:42). They work day and night, they don't sleep .. Q: you mentioned it (virus) is more acid, and our Gans's are more alkaline, so we can ?? drain the energy. Some people are asking, because normally if people are vegetarian their body is more alkaline, then the people who eat a lot of meat, so they're asking if it's possible for vegetarians, is it not easier to be infected by the virus? K- It's a point of reference, in which strength of the virus we catch. It's acidic in respect to the strength of the Gans or the virus is alkaline, in respect to the Gans we give. It's not that everything fits, if you have a higher strength of the virus. Because this virus is not a single strand strength. It's multiple and it divides all the time. Now we see it with the brain, then with the digestive system, so it doesn't matter if you are vegetarian, meat eater or you just live on the fresh air, (3:44). if you find the right strength of it, it will catch you. That it doesn't happen to vegetarians, it's only for meat eaters, that doesn't exist. We see recently, cases of stomach virus, it has mutated.

Governments, by the time they say something we see so many cases, especially in Iran. Iran has become a massive learning ground for me. The Chinese stole and hid, they wouldn't even give us the report. GL have they managed to get that report from the Shanghai hospital on the Gans use. Is that written yet. GL- I pushed but it has been written yet, they said they write it. K- The T has been tested in Shanghai hospital in the city. GL- it's actually in Guang Dong. .. We see that they are hiding knowledge, we don't get the report, they are writing the report. But in Iran we are in the front, we get reports case by case how they feel, and they're trying to gather the information from all the people who have used the T. We see a bigger spectrum of knowledge and the KF sits on it. MM from Iran is gathering this knowledge, (3:46). and it will become available internationally for all of the scientists ?? What I see on specific way the Iran KF, the Coronavirus is set. There is a channel where people talk about the ground ?? , there is a channel where they talk discuss what they made, one for the rescue team to talk to each other for rapid response and consulting with each other, then there is a response now that is showing data, information of what is happening, and whatever, and is getting gathered. This is giving us a good opportunity to see the whole process. As MM and I sit in all the channels and a number of people sit on all the channels, I observe the social psychological structure, there response and more or less what we get at the end. We see

from the time when the first call is made until the end, where the data has been recorded what has been achieved.

So we see the changes, they say, oh today I have this and that, and the other day was this. This process is very rapid we see reports within hours coming from, the time they use the Gans, even though they've been (there), and we ask most a time to give us a recording with a the video recording. (3:48). The understanding of it is, that there is a solution for all of us, but in what solution, and how we and our governments will allow us to go in with. But in a way, as I said, we have become a governing, supporting a governing country, because there in disarray. We will see the same thing in Italy, we (have) seen the same thing in China, because nobody has been prepared for this. This is a prolonged battle, for years and years to come. Conversion of what we call GANS of the energy, to the full energy is dangerous, extremely dangerous. I'll try to show you something which just being posted in one of the Keshe foundation systems, that you will see on the edge of technology what the doctor see. It's death, there is no other name for it, and if we don't organize ourselves, sooner or later we'll be defeated by it. (3:50).
Any other question?
Q: You showed this picture of the Cup of Life (CL) from Iran which they will send to the different regions, because they cannot send water. Now just to clarify, on this picture you have a cable which is fixed to the zinc to the middle coated one and to the copper, but on the end of this there are three ends shouldn't they be connected? They will do it, you just see the structure. .. .. I will eventually also do something like this here in Switzerland, and it's just to be really sure that that the three cables will have to be connected as soon as you put the saltwater in? K- It is when you connect it this way, you have to connect the two from the side plates (Cu and Zn) together, and then use a (separate) wire to connect to the center (Nano Coated). Q: I see, so these two are first connected one to the other, and then the two together, are connected to the middle one? (3:52). K- Yes, you have to connect through a (separate) wire. You need transfer resistance, as I call it, to achieve. I'm going to send you something Rick, see if you can show it it's just coming the Iranian channel it is from the doctors. I'll translate for you from the Farsi. Yes, you see the connect the white and the red together, and then you need to put a (separate) wire in between here. … you connect these two to this and this one to this. You need this red wire. Unless you set up a double Cup, which we showed how you do it (earlier). Rick can you play this. It's coming from the medical news. Have we received it. R- Yes. This actually shows how an MRI, you see Coronavirus lung. It is calcification, they call it. (3:54). Then you'll see how real the whole thing is. …
Plays the video. (3:56). K- You how bad the lungs have calcified. In a way, there is no room for oxygen to be absorbed. The text reads, it's a 59 year old woman.
Any other question?
Q: How to change the pH value of the plasma? K- Oh we've been through this three or four years ago. It's by plasma ratio, by volume ratio, in so many ways, of different Gans's. You have to understand, if you create a plasma which is a higher pH than the virus, then you feed the virus. If you create of plasma which is below 7 (pH), with the power of feeding, (3:58). you feed the virus. This what we showed you, and called it a CL is well calculated. I made science so easy for you lot, that you don't even, you think it's just a game. It's the art of being a good teacher sometimes, that you make it so easy, that you all

jump into it. But there is more to it. Q: Can you explain why, somebody who carries the virus, but doesn't show any symptoms, but still spreads it and infects a lot of people. K- This has happened in China quite a lot, we know that. They find people without the virus, and then they release them from the hospital, and then they go and infect many people in the community. Because they say they don't have it, but then they show the virus. The reason being, is what I explain all the time, is our scientific knowledge in the present world of medicine is so limited, amazingly limited. In so many ways, once … this is the body of the man, (have you ever noticed how my drawings of men have changed, they are not like this anymore, stick men), now we have to give them a shape. When you have the lungs, (4:00). and I explained it later on, and this is your gorgeous little heart in the middle there, when they test it and they show they have a virus, and then (later) there is no virus, then they test their blood and it's not there. In fact, what the doctor should do, they have to test the water of the lungs, what comes out of the lungs. So they see no virus in the blood, and it's very .. they don't to a culture the virus. I was even discussing this with the scientists yesterday, they need permission. They don't they see the protein structure of it, and they say it is a virus. So they go in and they say, they have no virus, but in fact, if you look at it, this is what they carry, the energy of the virus. So they don't show it in their blood, but they carried it as energy in their lungs. So the virus is an energy pack, it could be on the skin, or the sweat of the fingerprint, or whatever. So now they walk around, and they see the guy on the street, and he has the same strength amino acid (AA), they could be cousins by 10 generations, and what do you get? Energy transfer. The viruses don't go by mouth or by air, (4:02). viruses go by energy transfer. And this is what doctors haven't understood. So now the guy is walking around with a pack of energy of virus, whoever is in his village, of the same cousins or whatever, … it jumps over. This is what I explained in a very rough way, to the Iranian medical team handling the Coronavirus this morning. It's an embarrassment to address such a highly educated people this way, but it's the only way you can get to these people. This virus this is how it comes. Your lungs are the nest of it. Dr. Samet understood this, even your brain, now we know, is the nest of it. The Magnetic field transfers through plasmatic field lines. This is part of what we see. Do you hear me coughing all the time, for nearly two or three months now. It's since we went to Brazil, where a lady doctor gave it to us, and none of us can get rid of it. It goes away for some time, and then comes back. It's just a long suffering with just one virus from South America. A gift from the Brazil, I call it a Brazilian nut. So you get the transfer, you don't need to be in touch, he can just pass you on the street and you get it. He's made, in a way, (4:04). he is a beacon of plasma, and if he gets it hit by another one, say of a different strand from this one, then he dies, because now he's going through the same process again. If you use the system of protecting yourself through the Gans environment, that is the skin, the breathing, and everything else, you continuously deplete these (energy transfers). So their continuously taken out every day. This is what we're doing in Fukushima. You see the medical doctors doesn't understand the experience of the Keshe Foundation, it has such a vast amount of information sitting here and it is shared with all of you. You just have to understand how it is connected. We have this knowledge of transfer of energy from Fukushima, we've seen it. We can relate it. So this is how its transferred, and not by hand. You leave it here, and you leave it there, and with it, if the energy of the cells has been transferred, this becomes transferred. Then this has to have the same strength, by passing it, to collect it.

This is called, the virus, or energy transfer, and our soul, emotion, and RNA works on this. Where we think, after this disaster is over, to see all the people who are effected by it, how the RNA and DNA has changed. They will all be changed, definitely. (4:06). And I can see maybe in three or five years, those who used the injections, we'll see huge size-effects. We would estimate massive rise in what we call, heart attacks, and we'll see a massive rise in brain hemorrhage, and in suicides. It's a Trojan gift. You see the mentality, I explained that before somewhere. Gates has given 500 million to the Chinese as a gift for, ?? the vaccines from himself, his own company. And they thanked him for his gift, for giving it to us, and that 500 if his $1 each, 500 million Chinese will die because of it. You'll understand. Or you'll get the same as other injections, the side-effects of psychological depression, Alzheimer's, and everything else, autistic behavior in the old people and the young ones who have received it. Who's going to find Bill Gates in his grave. A legacy of murder. This is how it is transferred and doctors don't understand. (4:08). You transferred it when you walk around, you are a box of energies that have grown, because it's in the air. They got rid of the liquid, the guy he doesn't have it in his blood, but he is carrying it as an energy inside. Mortality rates over 30 days is very high. You have heard me many times, especially in KF I always advised. I did a lot of studies on nuclear weapons aftermath, and what happens after we use the nuclear weapons and how the radiation would change the patterns of the genes and DNA, and the rest of it. A I always him always advised, it is written in many places that I have advised, if you see the glow and the nuclear sound, walk into it, because the death of it, is less painful than the long-term suffering. In so many ways, the Corona carries the same. If you are injected, you have walked into the nuclear zone. A lot of you will soon understand. (4:10). Q: Somebody is asking a question about, if with this plasma water, if we give a baby the same amount or less? As far as we've seen, we haven't seen any side-effect, and it's been used for years by people. People in Iran are reporting, because we always warned for those who have pacemakers, and they've been using it, because of the fear of the virus, and in the past few days they have been reporting, that there's been no changes, no side-effects. We always are stay on the cautious side, but it's for them, they made it, and they don't see any changes in the pacemaker, or (having) side-effects. It doesn't mean it doesn't work, with others it's the same, or it works differently. Q: Caroline says, Mr. Keshe .. can you go and look into Q&A. There is a family which is calling for help from the United States, in China here in the Q&A on the top there five there? K- How come I don't see the Q&A. Q: I have a question for Mr. Keshe or GL, I have met a young Chinese family here in the US that have friends in China. (4:12). I have shared with them the One Cup video with Chinese subtitles. They have shared with their friends in China via We Chat, but they are not able to access it in China. What is the best way for those in China to view this video, and or to get help. I would like to pass this along to the family that I know, and then it stops. Then there is a second request? K- Wait, wait. GL- I think I'm going to send the QQ link, in the Chat and they can ask them to join the QQ group, because we have the KS there to answer all the questions.

(unclear)
… yes only with here and they can be transferred this across the QQ to this family let them contact me I sent them the QQ group truly I will send it reading your Richards ok and the gentlemen can get in touch with me if you can shame actually he just need the 2

Q link and join a group and we have everything there and and we have the people answer the question online so he can do it great ok Tomas whether is the requester Dan you have the second one (4:14). … Do we have any contact near Tanzania. We must reach Mr. Christopherson Winger. He's doing an amazing work for many years, but he's having enormous difficulty …

close your microphone please. Q: We have a confirmed case in UK who can't pass a few seconds of the breathing test. …

K- We don't know the structure there. Just keep that. I'll contact them later on please.

Any other question we pass well our four hours?
Q: … It's come up two or three times in our meetings with Universal Council members. How can we position ourselves towards this virus, as it has become. or is has materialized like a soul, how can we position ourselves towards that field strength as a soul? (4:16). At the soul level please?
K- I think the Gans has taught us how, be humble enough to be able to receive from his strength. This is the only way mankind will survive in the space. Or you become stronger, that you feed it, that in time it will come to your strength. It depends on the position and the strength of the thought and the strength of the soul. Do you want to take energy from it, or you want to strengthen it that it becomes the same strength as you. It's you who decides, and the thinking doesn't come by the thinking of the physicality of the man, it comes with the strength of the STM. This is what we said, mankind has to learn to understand the conversion of the energy of the soul into the world of the language he understands. In the space technology as part of it. When mankind goes through that step, it's very easy. In a spaceship system, we create, as much as the barriers, (4:18). we create four different (kinds of) shielding. Part of this shielding becomes a shield, which is used by many spaceships now a days, it's a very common practice, that the minute you see a virus strength, you trap it, and then in process, its energy is transferred. The reactor's built, release multiple layers of fields, and then, you have a shield. Now we have a Magnetic (M) field for radio communication, and we create a shielding for viruses. The easy way to do it is, in the time to come by research by mankind, we'll find out, that what we call, DNA and RNA have a spectrum of strengths, one for the soul, and one for the physicality. What you do, because you understand that these are vulnerable at this bandwidth of the strengths, you create the shields here (the second field inward), that acts like a trap, but you build it inside the design of your reactors, that any field strength coming through, which is the strength of the soul and the physicality of the man, cannot enter to interfere, or to ?? interact with the passengers. You have to do both, the soul and the soul of physicality, (4:20). then he covers the whole spectrum of amino acids of the body and everything else. This is a part that we will enjoy developing in a coming time. It comes by the mixture in your Gans's and if the technologies are advanced enough by mankind, then you do this, otherwise everything will just come in and it takes you. As long as you have the spectrum you are in, nothing can enter that spectrum. Shall we call it a day, we are nearly four and a half hours into this today.

yes forever thank you very much thank you very much thank you where was the Iranian team the Chinese team Austrian team was relentlessly working to make a lot of things happening they're what we call the suitcase renditions worldwide each one of us.

My message to the Brazilians who are in panic at the moment, as China went (was in) some weeks ago, is to stay calm. We'll bring, and hopefully by the time we get to you in next two weeks for the Brazilian conference, you will see that the Keshe foundation will come in with a free hand. We'll come with our systems, we'll share our systems that we'll bring with us, to protect us in a very effective way. In so many ways, we'll come to show that we can, and we will overcome this virus condition. It's another air that we breathe but of a different strength, and we have to learn to live with it from now on. (4:22). We have to learn that it has become part of us. My only hope for the human race is, (that the virus) does not mutate to a living entity, because then the human race, will be in a big heap of problems. If the energy of this virus, in contact with the human race, as we seen in the lungs, if it manages to find the conversion of the energy of the body of the man, to what we call, calcification of matter state seed, and then if he gets through its field transfer converted, then mankind is in a huge problem, a huge problem. The problem with it is very simple, and this is for governments and world leaders, you'll have nothing to govern. In the lungs, every cell of the man, has a seed of calcium, and this virus has managed to change, that this calcification becomes reality. In a way, if you understand it, it's making a bone structure out of it. And if at one point, itself learns, how to give itself physical structure, then mankind is doomed. (4:24). In a way, it's an RNA and if he finds out how to mutate and creates his own DNA using the body of the man as a host, mankind is over. You don't see what we see, and we hope that this darker version does not come. You feel an entity living inside you, and you can't do anything about it. You can't take it out, because it will replicate itself again, because it has created a field ?? carrier cavity and I've told you how it transfers. We see a lot of this at the moment happening. If this process goes into mutation, what we call, in human terms, parasite virus, you have no way to get out of it. But there is a technology that can be done, but the problem is it will go to the fish, the cat, and the dog. It can even transfer to the trees and plants. The problem is that it can mutate outside the Earth, (4:26). so in these positions, there is a specific way the Universal Community has decided how to handle situation like this. It has happened before and we know what to do. The Sun will not be far. Q: Jalal, Mr. Keshe don't say I hope I am wrong, because you are never wrong. K- We see things. We see things. We see the calcification and the speed of it, and if he has a soul and he finds the link strength to calcium, which in every cell of the man, there is a calcium, and the ratio of the salinity and other fields decides what it becomes. Even in the immune system, there is not a single immune cell, that doesn't have a calcium. We come from it. It makes us. It's not that only the calcium is our bone, and we see it, every cell has that calcium seed as part of it, and that's why they position themselves according to the structure, of the bone structure of the man. When you look at the bone structure of the man, every position of every muscle depends on the calcium strength in position to the main gravity center, and how the bone is shaped. Then the muscle dictates, you've seen this one, we just had it. When a lot of you make Gans's you say, 'I have a white Gans on top,' and I keep on telling you, the position, the gravity position, it's the same. Why do bigger muscles come around the bigger tissues. Why when you have a problem with your

father, you as a son, you grow very big, unless there's an illness, because the field strength pushes and positions it. Because it is to confirm their emotion. You have a lot to learn. Q: But Mr. Keshe we heard that the first dog has been diagnosed with having this virus in Hong Kong, and we heard that the wild pigs in Hubei province (Wuhan is in this province) has been found to have the African Swine Flu. K- Yep, when the Americans flew it over, the virus doesn't know the difference between the wild or non-wild (pig). This virus, and African Swine Flu is a gift from United State to humanity, but it comes to bite them worse. Remember what I said, if we don't need a gift, we send it back to the sender. This time it found itself, its way to its center. (4:30).

Thank you very much and see you next week maybe we have a better good news for you. I'm sure we'll have a good news for you, but we have to wait until next week and the week after, and in the weeks to come. We have to start learning how to live with these virus. Maybe true meaning of living, is living inside us. And then God help humanity. Thank you too much and see you next week.

R- Very good thank you Mr. Keshe for another knowledge seekers workshop and this has been the 318 knowledge seekers workshop for Thursday March 5th 2020.

319th Knowledge Seekers Workshop - Thursday, March 12, 2020

document 35 pages

(Originally I transcribed this from part 1 video of 24 minutes and part 2 of 9:20 , now they combined the 2 into 1 video and all the times ore off)

Single video of 319 KSW is 9:40 hours

Iran Coronavirus Blueprint Day- We have managed to overcome the virus for good.

English Transcription:

(:18). (:20). In the past years we have covered many aspects of the technology (T), and have entered a new dimensions of understanding, of the new science. In the past weeks and months we've been busy with the Coronavirus in China, we got involved with this as it developed in China, and we always thought that this will be a Chinese problem. Sooner then we thought, it become a problem for Iran, and sooner for Italy, and today Thursday

morning, 12th of March, 2020, it has become a global problem, We have seen initially all the Chinese borders closed, then slowly the Iranian borders closed as governments and nations tried to protect themselves. And gradually we have seen Italy close its borders, and today Germany, France, Austria and many borders. (:22). No flights, by the order of president Trump this morning, can fly into US except the UK for a limited time, the next 30 days. In this process we'll see South American nations, Brazil, African nations, and we'll see many other countries, one by one are getting involved in this, what I call, ruthless disease, virus. As a space development organization, not just for this virus, the KF has always thought and accepted, that in the depth of the space there are no bacteria's. because it means the conditions of creating amino acids, (AA) which can match or interact. In the space, with the new space T we consider it as a field play for magnetic (M) fields in shapes and forms. Therefore we consider space to be a playground for viruses for the body of the man. As they take hold, and as they become more and more active and interactive with our cells, the M field of the cells of our atoms, or molecules of our body, they will attach themselves to it. Some of them find it a good feeding ground and some will feed the cells. (:24). In the development of the space T the KF set out to study the interaction of the fields with the body of the man. We developed many systems, non-intrusive and the latest one, as we saw, the body Enhancement Unit (EU). We showed that diseases and illnesses of the body can be handled from outside, rather than inside, and can be done in a much easier way then what we have shown and what we carried out in the past centuries, and decades, recent times, ?? and the rest. In the world of science we have entered into a 4th dimension of science, what we call, physics, which is more or less, plasma (Pl), dynamic fields in motion in the essence of the creation of life, creates all the conditions, so life, plants and everything else. In this process, we set out to find out what viruses are and how we can interact with them, how we can drain them, or how we can nourish them. In that process, in early 2000 and 2005, I started developing interactive field systems, which means I can interact with a cell, ?? with a heartbeat of ?? outside, not by radiation, but by interaction of the fields. The way everything else in this universe (U) works. Interaction of the fields, gravity (G) and M field of the earth, and the Sun, (:26). creates life on this planet. The interaction of 4 fields creates oxygen (O), hydrogen (H) and everything else. In a way, our atmosphere on the outer limits is a grinding machine of energies that in interaction of the Inertia of the planet, becomes matters. Once we understood this, creating life, blood cells, and cells of the body, became a child's play, by creating dynamic fields which could be on their own, as a cell, as a single atom, we could interact with the energy, with the M field of the cell of the brain or with the body, and create new cells. So we became, in a way, the womb of the mother. The womb of the mother nourishes the first interaction of the fields of the sperm and egg from outside, and with that energy within the womb, allows the cells to grow, and then takes shape, and then creates interaction between itself. .. (break of Part 1 .. next file is 9 hours long ..).. .

(Part 2: 0:00).
Then from that point creates any element we like. So we can go from Cu to the energy of Cu, and by interaction of the energies of the Cu, with each other, creates O, H, of the cell of a man's brain, or heart, or energy of a banana. Once we start doing this, and we start creating materials, the game became very easy. In the process of understanding transfer

of energies, we came to understand that in a simple way, we could interact with the energies of the man. When the brain cells were missing, we interacted and we produced the brain cells. As many of you know about our Coma patients and the rest. We understood in the process, that the weaker takes from the stronger. In the Pl T there is no destruction, it's always balanced, and the stronger always gives to the weaker that, the weaker can grow to become as stronger as the stronger, and in that process, in the world of cosmology, we call it "Twinity". The earth has a twin star, and when we look in the depth of the sky, you always see twin stars, one gives and one takes and the balance between the two guarantees continuity of life. So understanding this we developed the T, and understanding that the viruses will capture, live amongst ourselves, then we have to understand 2 things, what and how viruses evolve on the body of the man. In the present world of medicine, (:02). we always thing of killing, we kill viruses, we kill germs, we kill and kill, we even kill each other. But in the game of Pl, in the game of creation, we give to the point that one can't take, or decides, I have had enough. In a way we promote life, and that has been key to the world in the life of the U. 27

.. We announced it last week, the new Coronavirus has evolved again. It has mutated. last or 2 weeks ago, and we have seen the outcome of it in the past 2 weeks, how this Coronavirus has played havoc on China, and now Europe, Italy and the rest of the world. Originally when we had the man, (:12). we saw the interaction between the lungs, and we saw heart attacks. In this, because there are cells involved, we saw fever, high temperature. Withstanding that the virus comes through the nose and through the mouth into the lungs, the energy always given at the point of entry, not just only to the lungs, now that we understand the virus's energy, it dissipated its energy into the brain. We saw many people dying with no fever, but with brain hemorrhage, or brain stroke. We saw many young people dying of heart attack, because this virus has a nasty game to play, it comes in, it is weak, it uses the energy of the body, then at the same time it connects with the other lung, then they become the twin stars. The energies start moving to consume and create enough water to absorb the energy which comes through the breathing, and then they tap into the energy of the heart. The heart tries to compensate and the patient dies of heart stroke. But if at the same time the energy fits faster to the brain, before the lung shows, your patient dies of brain hemorrhage. In the last 7 days we have seen a new game, the virus has moved into the intestines and organs. (:14). You don't see any temperatures. Doctors start complaining that people talk about a sore throat, suffocation and they die. Kidney and organ failure, and out of nowhere huge pain of throat, actually suffocating without a pain. In this process, we see that people have diarrhea and the stool changes (color) to red, which actually is hemoglobin, or the stool has started changing, this virus has entered and damages the pancreas and the liver. When of the new signs that you have to look for is the color of the stool when you go to the toilet. So now we have brain, heart, and suffocation through failure of organs. The new T and all the injections, and dosages, have brought one big problem, the virus which is not understood by the scientists up to now, doesn't come through the nose as such, it links to the energy of the body, becomes ?? the brain and it come to it. If you understood the T and the Pl, the

energy transfer of the virus is through its M fields. (:16). ?? … you and like the way it transfers weaker for stronger, it doesn't matter where you are, somewhere its twin star are billions of kilometers from each other, they still interact. If the virus finds a matching strength in the AA (COHN) of the man, it will ling into. And that's it, this is how you mainly catch this virus. The liquid in the nose, and then the process starts through the breathing system through the lungs and everything else. And once this system sets in your body, something strange will happen. The Chinese scientists never understood, and it baffled the Chinese government, they see, they find a way to eradicate the flu or the virus and the patient comes back, again, 14 days later, or 24 days later, and then they, usually, because in the second stage weakness, they die. And they (doctors) say, it was okay, but then it came back. Because they didn't understand the phenomenon of the M field transfer of the virus. In the lungs, when you kill bacteria's with antibiotics, or whatever you use, but the virus lives in a M field fingerprint, in a weaker state. So as you walk down the street, the neighbor has it, (:18). there's a ?? on the hand rail of the bus, what do you do, you invite it in. Secondary .. it comes until it kills you. We don't have any knowledge to stop this. ?? ?? where with the new T, to understanding and using it, the new T, we call it a Gans we create a shield (around the body). In a way, we wash the body (with the water) and clean the system by drinking. We send energies to transfer the energy of the bacteria, and the energy of the virus, at the same time, out of the body. We have seen many claims, people have come up with a new material, new injections, or whatever, but maybe it can handle 1 strand of this material (virus). Now we see that it (the virus) has many strands. It has locked into RNA, which is the M field, and that's why it is traveling so fast. This is why it's a virus. It's a virus on the RNA strength of the C and most probably, due to its rapid interaction, it has turned to others, like O. If you understand the work of the Pl of the physics, of what we call, AA, now you understand how the game is played, (draws Infinity Loop between C and O). O being higher, trying to feed the C. to keep in touch, in conjunction with ?? nitrogen (N), it creates a twin sister, where H in its spare time releases energy to keep the system going, and that's how it creates life. Continuity of the transfer of energy. And in this process, (:20). The only way the mankind will stand this mutation, is by developing a system, which is diversified, and diverse as the virus itself, which is nothing else we know, other than the Gans. GANS is, Gas in A Nano State, which is developed by the KF, and we have seen across the world, the Chinese government has used it, the Iranian Knowledge Seekers (KS) across Iran are using it, it's on the table of the Iranian president, on the table of the Iranian universities and Sepah, to take it up for the nation. But the nation is looking after itself through this process. In our work with the Chinese government, the decision made by CPC was very deceiving. In a way we gave all the knowledge, as they asked us every time, can we have this, can we have evidence, Mr. Keshe can you give us this, and they took it, and they didn't give any knowledge back to us. We tested it with the Pigs (African Swine Flu) and they could see, and then they blocked it, they told, they stole T. Then in the past 2 months and we gave them more and more, and then they went behind our back to our KS and saying, it doesn't work, we'll take the T, he just ?? wrote it in, and they took the T, and as we have seen 2 days ago, his Excellency President Xi went to Wuhan city, it's cleaned up with the waters made by the Gans's of the KF, KS cleaning the streets, for him to visit. They started using the T in hospitals in China and they saw its benefit, and then as usual with Chinese, stealing the T. It's the easiest way. (:22). As

long as it is credited through false Chinese scientists, very much like Britain, with Stephen Hawkins and the rest. They steal the T and then put the name of their own nationality. This nation of business, of China, has cost the world millions of lives, and the Chinese nation themselves. But the game has changed, every time we went to the national securities of China, to see the results, they blocked us. Every excuse. And they have lost millions. The death toll in China, is in excess of millions, not 5 or 10,000. Then when the death takes over, the government needs to lie. We are known as an outspoken scientific organization, (you can go live). In this process, we gave the T to China and we learned nothing from it, and the Chinese developed different aspects of the T for themselves, without sharing it with the KF, but they gave instructions to the KF KS that, to blank out Mr. Keshe, he just told you, we'll do it ourselves. I respect that, stealing is the habit of the Chinese organizations. For 2 years I lived there and I saw it everyday. The virus came to Iran and we gave all our support to the KF KS, (:24). and in the past 2 weeks they have achieved enormous amount of things. The way the Iranian KF started seeing the results and they knew the T works. They entered into to helping every Iranian who asked for help, by introducing the new T. And you remember, as I say, the thief is a thief by nature, it doesn't matter, even if you give him a gift, he will steal it. We gave a gift of the "Cup of Life (CL), as you see, to the Chinese nation, for their New Year, and the Chinese stole T. I gave this as a gift, as a Cup of Life, to the Chinese community, on the 24 th of January. The Chinese government and security took it and tested it immediately for themselves, and they found out it works. It does what it says. Then as we said, another clandestine activity by the Chinese leadership in trying to steal T. We have even heard in the past 24 hours that they are trying to bring, and give this T to the Italians. This T belongs to the Iranian nation and to the Iranian scientists. We took the T to produce the materials, as we call the Gans, as we can see this, it is a simple element of it, this is what saves your life. (:26). This material (shows a bottle of CL Gans water). This Cup produces Gans, it's a gas in a Nano state, and by using the ?? the Chinese managed to wash the streets of Wuhan and what we saw is very simple. We gave this T to the KF Iranian KS, and they went with the open arms, and the love of the nation, and they took it to every channel, street, and hospitals, and offered it to the doctors. They didn't take "no" for an answer, and people who were on the deathbed in the hospitals, they sent them home because there was no accommodation and they could not accommodate, because some of them couldn't understand. They started using this material, the water of it, it is a natural water. And we saw changes. But this time with the Iranian KF KS and the Iranians who used this, and made and use it themselves at home, they understand this simple process of a Cup of Life. They started feeding back a lot of knowledge to us. We started with a team of doctors sitting with us, analyzing, understanding how this virus is behaving, how it is modifying, how it is mutating, and what it does. In the past 2 weeks we learned a huge amount of knowledge, from the Iranian KS and the Iranian nation. For that reason today's workshop will run for hours, we have no limitation, and we have blocked for tomorrow and the day after if need be to bring you a good news. (:28). I'll step down and become a translator, with the help of other Iranians who can translate. As you saw today at the beginning, we call today's workshop, "The Blueprint for Coronavirus from Iran." Iranian KS, doctors, scientists, have devoted their lives, and have proven that the virus can be overcome, as hundreds and hundreds are using it. Thousands of Iranians are using it, individuals and in groups. We are waiting for the office of his

Excellency President Rohanni and Ayatollah of Iran, to allow it to be used nationally by Iran, and at the same time, due to its success, we have offered through the Sepah of Iran, to take this T across the planet. The Chinese have stolen, they don't know the whole story, and understanding of the T. The Iranian KF with the support of the Sepah, in groups of 30 to 50, across this planet, one by one. We'll help every nation across this planet to overcome this disease. We'll send Iranian Sepah teams to Washington, to open, and to New York and the rest, which are now locked down. To Germany, France, and Italy, to help these nations to help themselves to overcome this virus. You closed the gates of Iran, you brought sanctions, we bring you love, and care, and life. Many of you will die, if the Iranians do not teach the way I do, if the Iranians do not share as I do. (:30). Knowledge is free, and as is the tradition, we always love our enemies, and we give life ??? …. we share this knowledge with the KS and the rest of humanity, through the Iranian nation, and the governments, which we stand solidly by. The Iranians are standing by, they'll teach you in Farsi, you should have learned the language, when you copied the religion of Mithraism, and ?? called it Catholicism. Now we'll teach you the knowledge of Iran through the science and T of the Iranian nation, and the KF supporters that all the KS around the world learn the knowledge from the Iranian scientists. So you are all KS, so you are all Iranian. So we are One Nation. The Iranian team is headed by the most beautiful woman, I call her the, "Mother Theresa" of Iran, Mrs. Mohammadi (MM), who has single handedly for the past month, like a mother looking after a flock of men, how to distribute, to make these, and to make sure the Iranian government officials stayed in touch with her. I would like to introduce her, she spoke with us last week, we know her beautiful voice. (:32). From this point on the table is in the hands of the Iranians, the way that we ?? did before, when we gave it to the Chinese. MM before I introduce you, I would like to show the flag of the KF as it stands, One Nation. Would you like to start. (Play video in Farsi with English subtitles ..)
(:34). 45 -- This is for the first time I see the flag of the KF, it flies One Nation. As KS we all will suffer with this disease, we have to handle it as one, as One Nation, and we have to bring the T to the point that it works for all of us. Each one of us irrespective of race, color or religion, and creed. We suffer the same with our own losses through the development of this virus through our ?? MM welcome to KF for a second time, are you there? .. (:36). … (:38). .. welcome MM. .. I know you have a lot of good news, and I know you have made a lot of breakthrough for the first time for the world to see. and for the first time many of you will see Coronavirus survivors and they'll tell you how they survived it, and what they used to survive it. I'll step down for you and your team.
MM speaks in Farsi, K- translates -- She is welcoming all the KS, the head of states and officials who are online, and the whole humanity to listen. MM is the head of the KF in Iran. (:40). The KF activities started 2 years ago in Iran. It started with Youtube and Telegram, and with agricultural activities. In Iran last year exactly, .. the Iranian scientists and KS started contacting, they started asking to have it taught in Farsi. K- All the teachings of the KF are done in English and it gets translated into other languages, so everything is gradually getting translated into Farsi and other languages. The teaching in Farsi started in Oct Nov of last year. (:42). The brother and sister of Alzar and Hassan started the teaching in Farsi, every Monday at about 6:30 PM. Many teaching have been done in Agriculture, like overcoming fungus. The blueprint of this project is shown in KF literature, .. other activities for greenhouses at the moment. Most of the activities have

been in agriculture, (:44). we started in agriculture .. people all over Iran got in touch with us and started learning about the T.

From the beginning of the establishment of the Corona disease, we got in touch with the authorities on how we could help. … we established a lot of meetings with government officials and doctors on how to use the T… (:46). We sent standard Gans to different institutes for them to investigate, at the same time we established a team of KF supporters across Iran to help with this situation. We established volunteers in every city, town and village in a very rapid way. The list of these volunteer have been published so that people can go to them for help. In case of emergency people can get in touch with these people as fast as they can. Every volunteer has to understand the Gans for Corona and to make it, (:48). and be able to teach the others how to do it. Everyday this is expanding and people are donating more materials to these teams that they can go out to give more. This support comes in the form that it is needed, Cu, containers, and every shape and form, freely form the nation. At the moment we are sending these packages all over Iran, and especially the "Hot Spots". There are sections in Iran where suddenly you see rapid increase in the numbers so they have identified them. We have a team of doctors, K- beautiful doctors because I work with them more or less 24 hours a day, Dr. …. (you have to excuse my English and Farsi I just think in Farsi) (:50). .. I am learning Farsi for a second time). All the data from the people who are using the T has been gathered and today you'll see some of them. All the patients or the people who have used these Gans Waters have recovered or are in the process of recovering. Every volunteer has been taught fully how to make the Cup of Life and is responsible to teach everyday to 10 other people until they learn fully how to make it. (:52). This means that every volunteer, every week teaches 7 people, and you can imagine how many volunteers (of those) are becoming volunteers. The Iranian volunteer team have been online 24 hours a day and support people who call in and need help. K- let me explain, when we showed the Chinese the video for them to help themselves rapidly to overcome the virus, it was made in a very rapid way at the KF centers, and in the teachings we thought people would have understood how simple it is. But since (working) on the line of the emergency Iranian support team, it is amazing to know that people don't even know how to connect wires. They don't know how to make or to do things, because they are not ready for it. They have to learn it because they want to survive. There are a lot of repetitive questions, and the team is there one by one, answering them. carry on MM. (:54). All the volunteers and their immediate families, they have covered themselves with the Gans Water, and no one .. we have no fatalities in China or in Iran, as of yet, of any of our KS. It's absolutely zero, which shows the T works. Even the volunteers who work in the "Red Zone", which is the critical point, (have not died). It's very hard there. Today those who have been helped and are being helped to overcome the Corona disease, which they themselves had caught, and now they have become volunteers to teach the others, and they are working relentlessly, the team. Bringing things together has not been easy, but we have brought it together and it is organized. The volunteers meet everyday, they go through the process of what they have achieved and what they plan to do (:56). K- Let me explain something, when you look at the volunteer list from Iran, you see the elite of scientists, doctors and engineers on the list. These are highly professional people who have stepped out form their work and have devoted their lives, because they know what

the ?? truth of it is. When I look at the list of the volunteers, it's doctors, … and it's amazing when we show you the list. It tells you where they are, the city, the telephone number, what and how much Gans they are carrying that day. And what is their qualification, so that if you have a technical problem they can support. It's amazing when you look at the chart of volunteers in Iran. It started with a few and now it is massive. And people are just helping each other and it's increasing. Carry on MM. -- The Iranian team has started a campaign, which is this One Cup One Life, this is what they do, they offer a Cup for one life, and the people do it themselves. We are hoping that not only the Iranians but the rest of the world will join us to do this together. The campaign will be announced and anybody who wants to join it, through their courses, and which they'll announce it. (:58). The volunteer team is still on the line and they are there to support if you call. The message from the KF volunteer team and workers is such, One Cup One Life, we'll live a normal life amongst our friends and we'll live and work as if nothing has happened, in a way. (I am not going to translate that one) but MM said, the T is there to be able to do such a thing. We don't ?? believe in the time of intelligence and T, but it depends on how we want to behave and act. K-Thank you very much MM for all of your services. (1:00).

I want to share 2 pictures with you, these mean a lot to me, I have shared it with the officials today and I'll share it with many more people, because it gives a lot of confidence and pleasure, and trust. I want you to look at what has been happening in the last 48 hours. We see the pictures that were published internationally, they are of President Xi of China paying a visit to Wuhan City. We know and have released documents … you see the most powerful man paying a visit in Wuhan city 2 days ago. Shows the pictures, look at the space gap between them. (1:02). You see how they sit. This is a nation under siege of the virus. If you look at how they stand, everything is measured. This area has been cleaned off with the Gans Water supplied by the KF KS of China, to the Chinese military. Otherwise, the most powerful man in the world would not be there. … I'll show you another picture. Both nations are under siege with the Corona. You'll understand what this new T brings. Picture shows, Iranian KS without the fear (they are not wearing any masks like in the other pictures). the Cup of Life is in the center. They are using and teaching it. In so many ways, when you look we have brought freedom, through the knowledge, science and T. .. The contrast can't be ignored, much more then what we see. A nation under siege and its president, (shows picture of Chinese, and then the Iranian picture). (1:04). A nation under siege, but with joy and with the virus. We have imprisoned the virus in the nation of Iran. And the virus has imprisoned the nation of China. Even though both nations use the same T. I know where I want to be. Men, women, girls, boy, just open (zoom) in your picture and you see, exactly a Cup of Life, exactly what you see on my table. Then you understand what is about to come. It's not being afraid of, it's knowing that you are protected. We take this joy and happiness back to the streets of Iran through the Sepah and Iranian nation, to teach how to change. The KF in Italy and around the world are on the line. Then we would like to bring the same joy to the rest of you, rather than being locked down and locked up. From now on, this freedom with the latest T, is in the hands of the Iranian leadership, and the Sepah, not only to be spread in Iran, but to be spread across the world. There is a big difference when the man on the street is free, and the most powerful man is encaged and imprisoned

(shows Chinese photo), (1:06). to the same ?? . Knowledge makes a lot of difference. The one who steals and has no trust in, and one develops and enjoys the time (back to Iranian photo). This is a beautiful picture of you in Iran in the past 24 hours. In teaching each other we are bringing the joy of life. There is a big problem with the Iranian people, they love to enjoy life, and poetry to ?? MM continues. - We have developed many videos in Farsi for everyone to understand. You'll see many of them, which we have lined up for you to see. There are many people who do not need to come out, they can make these online, with Youtube and the rest. (1:08). We expect the Iranian government and the head of Sepah's organization, and the Iranian officials online today with us, to allow this to go nationally on radio ad television, as we are discussing, that the whole nation learns in one go. The 21st of March is the Iranian New Year. As the virus imprisoned the Chinese on their New Year, on the 25th of January, the Iranian nation will be free, if the Iranian leadership and the Sepah allows, that this T is to be shown openly on television and radio, that people can make it, and shake it. As they say now a days, "don't even touch." And in the Iranian culture on Narus, we kiss and cuddle. If the nation gives the support in the way we have been promised in the coming time, to go on national television, and the rest of the world governments follow, in the next 2 to 3 weeks, all the borders will be opened. All the factories will go, and the economy of the world will go back to normal. We have done that with our teams in China. The companies that work with us, the KF team taught them how to make the Gans's and to teach their staff. They were not afraid to work, even on the time when they were not supposed to work, because they live on the premises. And there was no fear to go to work. So we come to my question to his Excellency President Rohanni, is online, and he is ?? and Ayatollah K of Iran. (1:10). Allow these teachings that we see here today to go on the nations television, and the same to transfer this T across the world, to the rest of humanity to the world. Our old friends of 2,000 years, the Romans, are in more problem then we are in Iran. We should celebrate the way we used to, not to watch the death of our lovers and loved ones, in so many ways. If you look at certain pictures the Vatican is empty, no one dares to go to the house of God. The churches are empty because people are afraid of catching it. Mosques are not the way they used to be, and are empty, the holy city of Mecca is locked down. No one can go and see the place of God. And Jerusalem is in the worst condition. People have taken God into their hearts, because the house of worship has been taken from them by an unknown invader, but this brings back the first stage of man to learn how to be in the space. We will not be able to carry food and medicines, now that we know how to transfer energies through it, the same we'll carry God in our hearts, without temples, Mosques, and Churches. We'll become correct men, because our soul will face our conduct in space. Man will come to enjoy my T, (1:12). not out of its beauty, but out of the fear of this virus, and that fear has come, and its beauty is getting shown. In so many ways, your Excellency office of Rohanni, .. online, we'll give you a platform if you want to speak to your nation today. The same with other world officials. We work as One Nation you'll see documents of our work with Corona, which can come right across to all of us. It costs less than 1 cent to save a life, if our governments decide to save them, the lives, not to be arrogant, to wait until one day somebody writes a paper, that our ?? and advisors keep their jobs. Sorry, there was no Coronavirus when you graduated 50 years ago, out of the universities. ?? has dried in ink, and so has your knowledge. We have to move in the new dimension in respect to the viruses, even though we are learning more,

We are at the beginning of ?? the knowledge of Pl, not at the pivotal point. (1:14). MM would you like to carry on. Can I invite you to a cup of Iranian tea. We have never lost our traditions. MM-- The Iranian team is giving freely the CL to all, especially if they can make it. This is a gift from the KF to the Iranian nation, that you will keep it for the time to come. The beauty with this Cup is every time a virus comes, pull it out, add water and salt, and it is there. It's a cup for life and today it's a cup that gives life. (1:16). The KF volunteers will stay active until the day the virus leaves Iran or we bring it under control. And we'll carry on teaching and working with it. It will be better for Iran if the government will join us, to be able to do this faster that we can help the nation. K- Let me explain as I have done in the teachings in the past. The Iranian government is separate then the Sepah. The Sepah are the guardians of the nation, they have been with us for centuries under different names. As they made them to be terrorists and the rest, the way they made me to be. The Sepah's job is to protect the nation. It was built to secure the borders of Iran, the nation, and it's nationals. It is not loyal to any government it is there to protect the nation. They have done everything possible over centuries to do this, under different names and titles, to protect the Iranian nationals. Even though for some in the West, they have misinterpreted their work. They're strong, have always been strong, and have always protected the nation, and as I said in the teachings of before, we'll expand the power of Sepah beyond the Iranian nation, to help all the nations of the this planet. At this moment in time we have become One Nation, we have no borders, the virus has crossed all of it. Soon there'll be no food, and transport. Soon there'll be no flights, (1:18). if you read the newspapers, Boeing, the biggest manufacturer of airplanes has been hit with Coronavirus. They are shutting factories. Soon no planes will fly, as the parts are not there. Soon there'll be no (planes) for transport. It's better for the world leaders to come to understand this very quick, because, as we know in Italy, there is no fresh food in the shops. People have looted shops in Florida, and everywhere else. Even in Australia, people have bought all the toilet paper rolls, because they export from China and now they can't get anymore toilet paper. So we are all in it as One Nation, and we have given the gift to China and soon we'll see, that the gift has to be carried on by the Iranians out to the world. The way we gave the platform to the Chinese 2 weeks ago, and we have heard nothing but rubbish (back) especially by CPC, stealing T from the KF and changing the name to Chinese. Interesting enough, it is still saving lives. Let's see if the governments will open the doors. MM would you like to show the first cases of Coronavirus that have been saved. (1:20). MM- I have asked the Iranian team to show us the first files of the Coronavirus. We have Dr. ?? in the background, is he available? … Dr. ?? can you answer questions on these cases? … hello this is Dr. Assadi (DA), he is the most devoted person as a doctor, a typical Iranian doctor. … Can you explain to us what you see with the Coronavirus and the present system. (1:22). DA- He says hello to all of you .. in essence he says, it's nice to see KS walking around the area with no masks and happy .. The people in the villages, where the KS walk in with no masks, they spray and share the Gans Water and give to them. They rejoice and enjoy seeing such a change, and they believe, because they see a man with no mask and protected by the Gans T, and they believe it because they see it in front of them. Most of them they prefer to use the process of the KF then going to the hospitals. (1:24). We have an old man, named R, he is going everywhere in northeast of Tehran and outside, actually giving people a CL, and teaching them, it's a joy to see him because he works with DA and reports the cases to

DA and how and what needs to be done with the infected people. This man, now on his own, he has got so many converted (people with him) has cleaned up a "Hot Spot" village, totally from the virus. This old man in one village, helping people who couldn't speak, who couldn't breath, after a few hours of using the Gans water he could speak and be happy. (1:26). This person, the KF volunteer, stayed with him for 24 hours. K- This was the first case he was doing, I remember, he was in absolute panic. he said, "How is this going to work," "how to make the Gans," and he was in a very strange state, I remember that one. Carry on. DA- After he was processed then they found out the whole village was infected. K- Let me explain to something, in Iran there is a huge problem, where in China you don't have this problem. In China, when people die, by the same day or in the afternoon they get cremated. In Iran, when somebody dies the whole village goes to the funeral. Now we have instances that when someone dies of the virus and people go to the funeral, then the whole village gets infected. In one case, 52 people in one village were infected, by the mourners, the ones who lost their loved ones, shaking hands with the people they infected everyone. The whole village, and 4 have died up to now. .. in China they burn them the same day. In Iran they have to be buried by Islamic tradition. When they go to the funeral it expands more. In the Chinese way, President Xi and the CPC decided that if somebody has the Coronavirus, (1:28). they lock the door with the whole family in, that they stay in and don't spread the virus. When they open the houses in that city the whole family has died of the virus. Do not lock, do not keep people inside. You sentence them to death. Tens of thousands in licked up houses have died. China made huge mistakes, and from those mistakes we have to learn. restrict the movement, but we can't repeat what happened in Chinese cities by locking people in. When they opened the door there were no families to open the door to. Carry on please. DA- This man stayed amongst the people in the village who got infected for 2 or 3 days, and he taught them all how to make the CL, and they are all clean. they don't have anymore the virus. (1:30). And now this man has gone to another village. We know where he goes, we keep track of him, because he reports to us case by case. DA- The gentleman is teaching everyone how to make a CL and everyone goes to him now. They are hoping to clean up the district very soon with it. K- The beauty with this is that they see him walking with no mask or anything else, and he is amongst them, and this changes the morale of the people. We see a lot of changes right across Iran now. DA- He gets 300 to 400 Chat lines, (1:32). because people can go to him directly on the network, and most of the people are worried that they might catch it. And by the time he finishes with them and they see that they can make a CL to live, and there is nothing to worry about, they start telling him jokes. That is how happy they are with a CL, they can live there lives. K - DA I want you to explain the new discovery which was completed yesterday by the Iranian scientists, Mr. Jafarry and his wife. if they are in the background. … I would like you to explain the paper I sent you last night .. (1:34). (1:36).
… man on the Earth Council and his wife have done a lot of work around the KF, and they have done a special test which confirms the data, and was released this morning to the Iranian government and medical teams in Iran who wanted it. … (1:38). MJ- Wants to explain something first about the Nano (N) T before he goes to the paper. K- Tell us your background first. He's an electrical engineer and has 10 patents, he is an inventor, (1:40). and he works with his wife, she is a dental medical person. We call it N material when one of its dimensions is less than 100 nanometers. Every element has a certain

characteristic, but when they become a N material they show specific characteristics, like magnetism, anti-bacterial, light, and other properties when they become N. If even one of the dimensions changes, then that material is a N, and will show its properties. (1:42). In a N material, in what we call 3-dimension, each side in a state of N will show different properties, they'll all show their own properties .. The collective energy of the 3-D gives us the energy of the N material, or the property of the N material.

Test Confirms Gans is a Nano material, First Time:

He will explain the paper on the experiment that was done. K- You have to explain where the experiment was done, in which institute? MJ- The test that you'll see today was done by the Institute ?? which is recognized as an international institute. K- the Institute, as you have heard Iran has lead the Nano T for the past 15 years. It is one of the leading nations on N T, it's part of the heads of this, (1:44). technical development in Iran, part of the N world. .. MJ- … His explanation about a Gans or what we call a gas in a N state, or when a Gans becomes in its own N state, which has never been done before. (1:46). When I used to attend lectures and studies of the N it was done with very expensive tools and systems and not at the reach of many people, but now with this new T it's at the reach of everyone. It has become so cheap that everyone can do it. After I came to know about the Gans I decided to start making it and got involved with the Institute that was doing this work. **They use that machine (Field Emission). (1:48). We did a test to confirm that the Gans is in a n state using this machine, which it confirmed it to be. Gans is a nanometer material, or has a N dimension ?? The Gans's we tested 2 things were recognized or discovered.** In the tests we did using … we discovered 2 things, that the N is in the shape of a sphere. That's the Gans. They are in a 3-D shape. That they were mainly made of Carbon (C). (1:50). In the second ones we saw, they were crystal structure N, which were mainly Cu and Zn. … Shows a picture of the material. These are the very first pictures of the Gans's. We zoomed in, expanded. .. In this picture we see single atoms and clusters of them, where they are in a sphere shape, (1:52). as a single but at the same time in clusters. Where on the picture we see the line, ?? is 47.61 nanometers. There are many which are even closer than N size. This is the second page of the crystal structure, which is mainly Zn and Cu. The head of the laboratory by seeing this was puzzled. In one of them we see three , which is about 69 nanometers. What you notice, the size of it, (1:54). is the Zn N material, because there is a structure to the atomic weight and mass, they measure it that way. Don't forget Zn this is about 65 . On the following pages the confirmation from the lab is done, these are certifications from the lab confirming the understanding and the discovery. There are 6 pages of these certified results of the experiments. When you check on the Internet this Institute is one of the leading in this kind of field. When they put their stamps on it, it stands for authority in the field. K- I asked him, what does this new material tell him as a scientist? (1:56). .. This is a new discovery and this opens a new field in science as a new material. A new science. By reducing the size of the N, to a smaller size as we see here, that is what he is referring to, we can transfer energy at a specific frequency, receive or send. This is a new T which many of the KF KS in research already know. I will explain later on how you know. Therefore we see new properties at this lower dimensions, in a way which we never have before. (1:58). With this new knowledge we can use it in health

and medicine and create new medicines, and new dimensions and technologies. He's asking, are there any questions from the panel? K- You have to understand why we released this Blueprint today, this is a new, a major development, confirmation of the T, first of all, confirming as we said, it's a sphere which behaves like a sun. It radiates energy like a sun. On the other hand, it opens a new dimension, which is at, what they call, the frequency of the cells of the body of the man. This is what is the major breakthrough. Those who understand this, understand this T, and understand why the Gans material is so effective against viruses. As MJ told us, it's like a ball, and its energy. So what we said at the beginning of the other part of the teaching, in a way, ?? you have a very small Pl, and the virus, being a very big Pl, in that way, the energy transfer reduces the energy of the virus. This is the confirmation of what the KF has been saying for a long time, (2:00). that every N, and every Gans is spherical shaped, and if you see the crystallization and understand topology, understand the world of medicine, a totally new world in health, food, and agriculture. As part of being a nuclear physicist, metallurgy, and structure of elements, is part of our education. If you see the honeycombed shapes and the crystallization, when you understand in a gas state, you ?? shape is like a sun, then you understand the creation and conversion of the energy into matter, or energies of the matters, which opens a totally new science in the world of Pl and creation of matters. Are there any questions for MJ from the panel? If you look at the dimensions and sizes … (2:02). Let me bring Dr. Azzar (DA) in because he'll give you an amazing insight. This paper was released last night by MJ, I'll send it to DA, to a medical doctor, because I know what it means in a Pl transfer structure. His reaction was exactly what I thought. I thought if he knows medicine, and the way he works with Gans T, that he would come with this reaction. Now let him explain what it means in the world of medicine, this new discovery. (2:04). DA- First I would like to thank MJ and his wife for providing such a unique and valued knowledge to us with this paper. KS always ask me, do you know what is in this Gans, and we couldn't answer them because we didn't have a valid paper. Now the KS can see what it is and how it is structured, then you don't need to ask questions. (2:06). The most important thing is where these pictures are taken, this step has been done. It is the center of intelligence of Iran, the most excellent center for Nano T. It's one of the leading institutes not only in Iran but in the world, it's a benchmark for N T around the world, which is a center of excellence of Iran. This shows ?? on the CL and it shows what we were telling all the time, this shows what is in there and what it is. This is amazing because it's such a cheap way to produce ?? and this will revolutionize the world of medicine. (2:08). in the coming time. I will speak in Farsi then translate… What is amazing in this picture and will revolutionize the world of medicine, is first of all, we can produce a match, energy-wise to the structure of body of the man, and this will revolutionize the world of medicine. We don't need to make anymore tablets. Because when we eat the tablets, we take as medicine, it goes in our stomachs and comes ?? first into energy, what we can use to overcome or work within it. Now we can match the energy without conversion. We don't need to even to digest it. It can be in our environment, and we can interact with it. DA- We are using tablets and injections that are not from our body, they are found outside and they were putting a lot of pressure on us. (2:10). Now for the first time we can go into the body and use the same structure as our body is made of, and it makes life much easier to be able to work and change things. In fact, this is the true structure of the body. Now we can understand this it is all made of

energies, and now we can use this new T to create new medicines that, we interact with the body in the same way that it is made, and this changes everything. We can do much more work with it. Now with not having to take medicines, and the changes we'll bring, no matter what we call it. Now we don't need to, we can handle it the same way as it is made. (2:12). Now that we use this one in the Enhancement Unit (EU), it takes us back the way we were born in the womb of the mother and it enhances the cells. This changes a lot in the world of medicine. Now we can we can see, we can even go to pico (picometer) T, one below (N) and create a new T. This brings a new dimension into the world of physics and science. In a way if you look at it, we have gone beyond N T, understanding, now we deal with energies. (2:14). Now we see because it was explained by MJ, that now we see it as a 3-D energy, now we can match the virus with a virus, and tame it, and work with it. In a way, with this paper, we confirm a lot of things. This is probably one of the most pivotal papers that has ever been published in the Pl T, in health and other things. First of all, it confirms that we are dealing with a ball of Pl. Secondly it confirms that we are dealing with energies. And thirdly, it confirms that a new science has been developed. You KS, being scientists, doctors, farmers, shopkeepers, cooks, accountants, ambassadors, as many of you are. We know who you are and that you are doing it (making plasma), have entered a knowledge beyond the understanding of many doctors and professors. So we all have gone to a new science, but we all move together to understand it. In a way, if you look at this structure, what we are looking at (photo on the screen), and ask a pathologist to bring a tissue of a man, heart or muscle tissue, and ask them to open up its structure. For the first time you see the structure of the body of the man. Then you'll understand that for the first time, if we start manipulating these energy packs, and crystals, we can build any tissue. (2:16). within the body, without any side-effects, and without any operation. In the coming time we can dilute this and control it, and then create the tissue of a heart, inside the heart without any operation. Change, if you understand this structure, how these holes and cavities which you see (in the photo), had a lot of meaning in the world of science, because these holes (draws yellow circles in them0 are not an empty space, there are M field gaps, that these materials have created in respect to each other. These M field gaps dictate the structure of a tissue, how close we can bring it and how we have to space it. If you understand this, this is how we rebuilt the brain of Naomi, after that accident. I saw this structure 40 years ago. I could see clearly 20 years ago without ever having this magnetic field (image), because to me it was a natural thing, and now it is beautiful to see it. Now we see the structure of the human body, made from M fields, because the scientists tell us, we need documents, that it is all interaction of fields, there're balls of fields like a sun, and the interactions create matter states. This is a major breakthrough for those who understand this T of N T, and below (below nanometers), and the human structure of the body of the man. (2:18). .. DA what else can you tell us please. DA- This looks like the structure of the bone marrow, and the bone, where all the life starts in the body of the man. It looks like that structure. That each one of these holes vibrates at a certain frequency and (creates) a certain matter for the body, when you look at it that way. (2:20). Now he understands how the CL is doing what it is doing, and it can do more than what we can thing of. Now this is like a bone marrow and it creates everything you want, and it can do a lot more then what we think it can. K- Now I'll speak in English first and then back in Farsi. Now you understand why we dilute different amount of Gans's, to ?? weigh these dimensions to fit bone marrow,

cancer, blood, brain cells, and the rest. This is why when you work with us in the Pl T, we say 30% of the Gans of this and 40% of that Gans, because it changes these dimensions, which create different M fields, and leads to a lot of new knowledge. New ways, so we don't need to take tablets into space, we just need to take the work of the Pl in the space. DA- This looks like a bone marrow, the center of the bone, and it can make anything for the body, (2:22). and reject that which the body doesn't like and this gives us a new dimension in the world of science. The way, in what he sees, understands from his ?? freedom of work as a doctor, is what I can see here, is the same as the bone marrow. Now I can understand how the CL can handle any illness, because it has the same field structure. DA says, now I understand where you are going, you are going below to picometers. We have gone even below pico, because a lot of things are still waiting for ?? , because I understand the T, I have gone into the field interaction. (2:24). .. What DA says, is that when they were taking the pictures in the lab, they could see small dots which are much smaller than N that we don't even have the equipment for us to see it., and there are much, much smaller materials in this matter image, like a galaxy. Now we can it, how the things are in there. MJ- he has done a test with this and it shows no sing of poisoning, that this material could be poisonous, because they can see it from the structure. Further, there are other tests are getting done that … (2:26). they are doing the tests to see if it becomes poison for the cells. The results will be out in the next few days. MJ is involved in making medical equipment, that is what his patents are in. MJ- What we have developed is beyond the equipment we have to see. We have to detect at the moment and this brings out the structure of the galaxies. ?? of energies and transfer of energies. K- Thank you very MJ and your beautiful wife, … (2:28). DA- Now that we go .. to Picometers, now everything will be opened. Picometer is below what we see here, and is the mother of N T, so it's beyond and it is created by .. it changes a lot of things. The new science is ?? today. And now when you see the viruses, you know which ball is in this mixture, that allows the transfer of energy to it, and all it does is expand to a bigger ball, and then it'll become, (2:30). what we call, the absorber of the energy of the virus. It's amazing how things will take shape from now on with this paper, and how in the world of science we'll start looking at the new dimension in energy, transportation, space travel, and many other aspects in agriculture. Now that we see this structure do we need to produce massive amounts of foods, or do we use these ?? systems to absorb energy in the space ?? to feed the man. Do we need to have hunger when this system can be made to absorb any energy that you need, in a Cup of Life, and you can have whatever you need without killing another one, without fighting for survival, and in so many ways, this is how we'll live in the space. R- I just ran across a picture from NASA of the U, or of 37,000 galaxies that they have mapped out, I would like to show you .. put them next to each other… K- Let me explain what is happening and why he brought this in. We wanted to show the glory of this T out of Iran. This paper and what is here, and the beauty of it is, that it's not the exclusivity of Iran, everyone of you can make a CL. We'll change the course of medicine from today. The stock market will understand that a new evolution and revolution, (2:32). is in the hands of every man in there house, will collapse the pharmaceutical industry. In a way, it has already collapsed, because that technology has not managed to save a single life, and the T we have right now with pharmaceuticals, has been the cause of many, many problems (side-effects) which we did not understand. This is the structure of life, in the CL, the body of the man, or in the U.

There is no more or less difference. It's just about energy and how it's conditioned, how it is conditioned to show itself. In a way, we have seen the replication of the U in the body of the man, and in a CL. … (2:34). Now we have entered a new phase of science and of understanding how to handle our lives. As I have said many times, we go from micro to macro, what we see in the structure of the electron or proton, we see in the structure of the solar system. Now we see it, we see galaxies, we have gone further down, now we see energy gaps. .. Dr. Pares is going to support the KF support team with the virus. (2:36). DP- In what we see here, man should have the capability of curing himself using his brain, and he doesn't need anything because now we know how it works. We can see, man can do a lot of things for himself. K-This goes back to the KF teachings, we say, we feed the soul of the man (STM) through the brain, that it feeds the man, we don't need to do. This is what we have been teaching for some time now. A new knowledge has been born today, by confirmation of what we have known for 20 years. (2:38). DA- Now we understand how the brain has positioned the bone to make what it needs, and now it's the position of the emotion. K- In the KF we always said, that physicality works hand in hand with emotion. Now we see and understand it. (2:40). This paper will change the world of science, because now we have a physical dimension to it. We have gone below (the nanometer), and we can see the physical conversion of energy to matter and how energies allow the creation of crystals and everything else, that in the future we'll become a new science. I hope the Iranian government and leadership will take steps to make sure that they stay at the head of this new science. What it brings with the new science that we can feed ourselves, and thereby control ourselves. We bring a (new) dimension to humanity, do we need to fight to feed and do we need to suffer, where we can find the source of the pain, (2:42). and through emotion, eradicate the pain from the body of the man. DA- There are many doctors in Iran who are understanding the T and they are helping with the Corona in Iran. In a way it is a hidden medicine inside Iran, in which, the doctors are using it for themselves, but they are scared to use it for their patients. We like to thank all of them, there are many doctors who are working, but in a way, they are doing it because they understand it. (2:44). ..

We'll close this session and we'll take a 15 minute break and then come back and show the first cases of Corona which have been handled by doctors in Iran. It is the first time you will see physical evidence of people who survive the Corona. It will be a gift to humanity and from there on we'll see where we go. The time is 12:30 we'll come back at 1:00. Then we'll see evidence and testimonials of people who have survived Corona in Iran, with just a glass of water. Thank you very much. .. Put one of the teachings on in the background. (2:46). We have a section which explains and teaches about the Coronavirus. While they are trying to come up with the documents for the presentation, now we had to do this, to give you a scientific understanding of what the CL Gans Water is, and what it does. Shows good photo of the Gans in nanometer size. So the international community just doesn't look at it as a cup. It can be shown as a dynamic Pl, with small balls that interacts with the Pl of the virus. It is important to make these kind of papers available and these kinds of sciences, that as we develop this T we understand how simple we ?? are for ourselves, and how the new science will change all of us. We are not here to break the past, we are here to build on the past. Now with what we know in the physics, medicine we can correct the mistakes and adjust it to fit the reality of what

we see. As DA said, now we found the creator of the N and when you travel, ?? in time to come, how we can take you to see the creator of the beauty. (2:48). But then you have to have the open eyes and understanding of the knowledge has no limitation, except according to the intelligence of the man. Do we have anything ready? …
Before we go for a break . The KF Iran has made a voice recording of some of those who have risked their lives, and saved others, and survived the Corona. It's their right, and they made a small piece for it (recording), that you hear what they say, and how they feel. Go ahead MM. Play the video. (2:50). … (2:52). Plays video in Farsi. It was the advertising for One Cup One Life in Farsi. It was not what we were looking for. (2:54).

Plays an excerpt from 317 KSW about Coronavirus, while they go for a break .
"This virus mutates --
END of Video

(3:30). .. K- Time to go on now. We are back again. Now the doctors will show the cases which have been handled by the team and we'll go in more depth on what has happened. 56 starts video (restarts …) (3:32). VIDEO ..
This is a lady 26 years old, she has all the symptoms of cold, temperature, shaking, coughing, feeling no strength, and pain in the head, which are all the symptoms of Coronavirus. She started using the CL Gans and she reports her condition as she goes along. She says she had many ?? but she listen to the instructions of the doctor. (3:34). The case was reported on the 11th of the 12th, 98, which is the date in Iran. by the 19th of the 12th, 98, which is 4 days later she has reported complete recovery. .. At the bottom of the report, in red ink, it says, complete recovery. They have closed the case, but the patients stay in touch with the doctors. She sprayed the Gans water on her head as she was instructed, and when she drank the water. She says when she uses the water the temperature comes down, and the coughing reduces. She sees the sign of loss of temperature as ?? she had before. (3:36). .. This is the patient of this doctor, she says she never sprayed the first night, so the doctor told her to put the water in a pot and sprinkle it on herself with her fingers on her body. .. she says she didn't have anything else, she's going ahead. Carry on please. She says, her breathing is much better. (can't hear K …) (3:38). … Having heart trembling with her heart, my toes are frozen but my body is warm. She says she managed to sleep, the heart is better and she feels better. She doesn't get diarrhea. She says that her coughing has reduced and (3:40). she doesn't cough that much. .. She says she can sleep better and doesn't have the symptoms of before, but she reported a pain in her chest. (3:42). .. (3:46). What we heard from her, she is complaining about all the symptoms, then (after using Gans Water), her pains are reducing everyday, and coughing disappeared, and she reports of having yellow excrement, which is a sign of the virus entering the lung, and what happens is the energy of the virus, dominates through its energy structure, the pancreas, and these are the sings of the damaged pancreas and liver ?? , and then it has come back to normal. This is the way you'll see the energy effects of the virus. DP do you want to tell us more? (3:48). DP- We saw her when she came in, (gave the Gans water) and after 2 hours, she reported the change. These doctors monitor continuously their patients, and all their movements and everything for the report today. It's completely covered, and the case for them is

closed but they keep it up, because we monitor it, the second phase, if they have it, which is the lung damage, then they get the fever and temperature. It is handled by antibiotics. It is continuous work with using the Gans water.

This is a second case, a 65 year old person, has the same things, signs of cold, temperature, the breathing problems. They have all the signs of Coronavirus. They came to them on 17th of 12. (plays the second case .. interruptions. Mr. Keshe is reading the report while it gets played, very loud music). These are the reports available. For the doctors who want they can play this in the background. Carry on please. (3:50). A 52 year old lady, again the same cold, temperature, the lungs, problem with breathing, suspected of the virus. The same process they're going through, 3 hours, but once they apply the Gans water it has eradicated it. A new patient. (3:52). (3:54). (4:06). … K- This (video) is a series of people, it's all documented, it's not 1 or 2, as you heard there are ?? I wanted to translate, but literally the form tells all at the end. It says, full recovery. Every single case they followed through to full recovery. Then they followed the volunteers, who especially become ??

Doctor Asserly (DA) do you want to tell us about these cases. ?? he has a message from the first girl because he helped her overcome this. Plays a audio recording. .. (4:08). .. This was saying that the first girl, now she has recovered and the whole family is using the Gans water. The tradition now, instead of what the Chinese did, locking up people (families), in the rooms (apartments) with the sick person. The CL, everybody in the house uses it, because they have the fear of loosing one or many in the family. This is the pattern we see. We can bring in many cases. Now there are hundreds of cases in Iran. The KF team, now, sends out 300 CL per day and all the materials are donated to them by people. Every Cup counts. Usually it is the people who have taken up, (4:10). with the disease. There is a beautiful picture I wish I could share. The Iranian KS are very brave. One of the KS who works with us in the background, he didn't take anything but he was very busy getting everywhere, he said, that he is making the Gans's. He was called to meet one of the Iranian leaders in the hospital, with the Corona. He took the Gans's with him that he could use it, and while he was with this gentlemen (the leader) he gave his mobile to talk to him. After talking he took off to go home, and he said that on the way home he felt sick. I have pictures of him calling ?? and then, at 6 AM he was in a very bad shape. He actually caught this disease going to see this gentleman to help him. Then he realized, that he needs to help himself. This is what we said, everybody has to be protected before they go anywhere. Then within 3 or 4hours later, very few hours, by taking ,he was back on the road as if nothing happened. As he said, ?? he was a confirmed case of Corona. Iran is loosing many of its elite scientists and doctors to this disease, and it's time for the government to make a move. (4:12). We can keep on giving many cases and documents, ?? All these documents will be transcribed from Farsi to English that you can see. It's standard procedure to translate everything to English at the KF. Now what we hear, I can play you a tape from a doctor, he says, his hospital is full, with the whole village, and he has lost a few of them, with the new version. Doctor A are you in the background? .. There is a case we have here, recorded by a doctor from the hospital, as I said, the whole village got sick, because one man was sick and he was shaking hands with everyone, then everybody else got sick. (4:14). What is interesting, is

what we see in the background with all cases. This is full recovery. The total cost of saving a life is less than a dollar from this disease. We especially asked the Iranian government and Sepah to be in the background (listening) so they can make a decision on what is going to happen with the Iranian nation. Are we going to loose our educated and elite for one dollar? … (4:16). .. I made an appeal to the Iranian government. .. (4:18). .. K- Let me explain. One of our volunteers who works with us, his brother is the head of the hospital for the Coronavirus of a town. And his brother the doctor, has been blaming him that they are doing something wrong and the rest of it. And then 2 days ago he became a victim of the disease, because the only people who treat Corona at the hospital usually end up catching it themselves, because one way or another they are vulnerable, because they are there. He caught the Corona himself, and he came to the house of the brother and asked, can you help me. And within 2 hours he changes and feels the change, and the Corona leaving, then he goes back to the hospital, and asks his brother if he could do the rest, and save the city. Because they know that they can't do anything. Let me explain what is happening to Iran in the background, there are not enough mortuaries, or even places to bury them, and the ones who do the burying can catch it themselves. The officials in some cities are buying freezing units, just to hold the bodies until one day they can bury them. They put the bodies in the freezers. We saw the same thing in China, I can show you many pictures, and satellite pictures, that the Chinese literally burn people, because there was nothing else to do. They brought in crematoriums, which are furnaces for burning bodies. (4:20). In one city 80 units have been reported. The satellite pictures from American intelligence confirms, because when you burn a body it leaves specific traces. The numbers are bigger then we think, and some doctors in hospitals pass it different ways. There is a very interesting part, I'll tell you how doctors are covering it. As you heard, most of these people initially died of heart attack and stroke because of the disease, and then brain hemorrhage and stroke because of the disease, and now with internal organs and failing kidneys. So what they are doing, is changing the documents of the patients to heart attack, hemorrhage, kidney failure and the rest. What this means that in 5 or 10 years time, when we get the statistics of it, we'll see something else, like Corona patients are 500, but heart attack, stroke, kidney failure will be hundred thousand. It's very strange, but these figures will only go up in the period of the virus. A lot of manipulation of the figures by the governments does not hide the truth. (4:22). We have a patient who has been through this with the doctors, she is there online. (4:24). Patient tells her story: (4:26). She is a pharmacist. … (4:28) .. (4:32). .. The lady is a natural herbal medicine therapist, and she caught the virus in one or another, and she tried everything because that's her work, but nothing worked until she was introduced to the Gans Water. She said, within 24 hours all the symptoms were gone. She thinks this T can be used for the skin or ?? , and maybe, she thinks there is a link between the blood type and who catches the disease. **I explained to her that this is an intelligent virus and it literally works on a sequential basis, (4:34). they are, as we call it, "hackers", they try every combination until they can get into the computer. This virus changes, mutates so much until it finds the right connection, and then it goes in. Somehow, very much like ?? it mutates itself to the other people in the same area or district. So, let's say, once it mutates to the liver sequence, it finds other liver sequences of other people who are passing (by on the street). This is what the world of science has to understand with viruses, that it is not shaking hands, it is crossing**

M field barriers, plasma field barriers, to infect and to effect. What is interesting, where would you like to go MM. (4:36). ..
Are there any questions from anyone?
Q: You know in our body which is full o f bacteria's and other stuff, so will this energy of Pl hurt any of those useful bacteria's and other stuff in our body? (4:38). K- No, what we see is that the body has a general balance everywhere. When we use it for the cancer cells, then only cancer cells, which are abnormal in relation to the other cells in the body, we see the change. It knows what it needs and what the body has as part of its organization. These energies are there when there are abnormalities. We can explain it nowadays very clearly. MM- says one of the KF volunteers are in an old folks home and they would like to come live online. K- I don't think these people have used the Gans, but let's see if I am correct. … (4:40). .. (4:42). … (4:44). ..
Ali is a volunteer at an old peoples home, they invited him in to protect these people that they don't catch the virus. So we are not in a case of recovery, but a case of prevention. A lot of people have started using this material as a prevention. (4:46). .. (4:48). ..We are going to play a couple of clip from the Iranians, an interesting message from the people who we try to work with in Iran. They wish us success in many ways. We hope that .. (4:50). .. These are the recording of how they are promoting CL in Iran. And after this we'll take a trip to China. KF China is online, hopefully we'll see some interesting information. Title: How corona kills and how we can prevent it. (4:52).
Video 1 in Farsi … (4:54).

(5:00). Video 2 of One Cup Gans. HOW THEY ARE MAKING it. Using a AA battery and checking to see that it is not attracted to a magnetic, therefore they assume it is zinc. (5:37).

(5:39). Video 3, about plasma fields.
(5:41). Video 4, …
While we are waiting we want to se how China looks today. This is what it is going to come down to in Europe, in the next few weeks. We are just about 8 weeks behind China. (5:42). Video 4 of Enhancement Unit (EU).
(5:44).
.. We'll move on to China and come back to Iran.
Are there any questions from the Iranian team? (5:46). Q: Iranian lady; Can this Gans damage someone with laser ?? hair reduction treatment?? .. No. Q: I heard Gans is good for ?? 6 months ?? can we use it for more than 100 years, is it true? K- No, … (5:48). The Gans water, standard legal, is that it can't be held more than 6 months. Any water has a legal lifecycle of 6 to 12 months. So we stick to this. We are talking about the water of the Gans, and not the Gans. The Gans itself can last centuries if it can hold it. .. Q; Those who have migraines, when they spray it on their head, they feel headache, what should they do? K- (only in Farsi.) Q: Can the Gans water cure HIV too? K- No. The T can reverse HIV also, we have done it in Africa, it's fully documented, yes. But it will not be a glass of water. It's a different characteristic. (5:50). Any other question? Q: Will it help Epilepsy? K- No. Q: How about diabetics, how would it effect their insulin, so on and so forth? K- We put a note out last week and again this week, if you are diabetic, test your insulin before you take the spray, and after you take the spray, because it can reduce

the use of your insulin, (5:52). but then if you overdose with the insulin it can cause you, all sorts of sleepiness, drossiness ?? , and going to sleep. Check your insulin continuously, because it carries certain factors of Zn, which is part of the emotions. I was just interrupted by the Iranian authorities, that they recommended me, not to take Zn and it is bad for it. These people haven't understood, that the Zn in the plasma state is the structure of the brain, and it's the only way you can stop the brain hemorrhage or stroke from this virus. Q: (connection problem)… (5:54). K - They are asking about the **people with the pacemaker, or heart condition transplant or whatever? Do not use this system, you can spray your head, maybe, but spray the room, spray the body that you can keep away the virus**.
Any other question?
Q: .. (5:56). K- They are asking about the use of the Gans for ulcer? There is a very effective way for it, but this (CL Gans) is not the Gans for it. There is a specific way to overcome the ulcer, especially if it is a bacteria. There is a totally different way that you have to use it ??

(Videos of China Today).
Stanley you have a couple of nice videos to show us, and they're extremely interesting for you to watch. This is what we'll see Europe will come to, maybe even Iran and the US within 6 to 8 weeks. Just watch. It is interesting to know that China is ahead of us. China was forced, but in Europe it will be done voluntarily. These videos are from the past few days in China. Plays video, the city highways are absolutely empty. (5:58). Don't forget this highways are normally jammed packed with people. I ask a question, where are the 1.4 billion people? (6:00). .. What is interesting is that the Chinese New Year lanterns are still on the streets, nobody has been working even a month later to bring the lanterns down. (6:02). He freezes on 1 frame. Look at all the businesses and shops, and no people there. One thing we are looking at is the psychological effect on this society. What is interesting if you study the psychology of the Chinese population today, is a one child family, and if the father and mother and child dies, there are no traces of anyone else from that family. The "One Child" policy has brought a lot of harsh reality. And if any of the people who own these offices, buildings, shops, have died, they will never open up (again). A family based economy. In the KF we study the psychological effect, as much as we are watching the energy and the other things. In the deep space program we watch the psychological effect. When this is over, and if 3 members of the family have died, there is nothing left of that family, because of there (is no) 2nd generation, maybe the uncles of the grandfathers. But most of the people are the 2nd or 3rd generation. There are no traces of the whole family, expertise or whatever. ?? The economy of a nation has ground to a halt. And you'll (also) see this in Europe. (6:04). In China they can keep order, but Europe loosing, is another factor very soon. People without a job, the governments can't support social security anymore. What is the outcome of it. Nobody goes to the factory to produce, companies can't pay their bills, they can't pay their staff. This thing speculating and escalating, for those who want to do, what they want to do with it. But in reality, the Western economy in the next 2 months will become a chaos. Companies can't sell or produce goods, and people don't have the money to buy. What is the next step? Anarchy. This is why we are trying to reach as many of the governments (as we can) before we get to that step, with such a simple system. People can still go

back. But in 2 weeks time it becomes worse, in 4 weeks time it will be even worse. The reality with this Corona is crisis unseen. The Western economy will collapse very fast, because it has no basis. The Chinese economy has mental control, and will survive through this in one way or another. But the Western economy will collapse in the next 2 to 4 weeks. In the second month, most of the businesses are over-draft bank borrowing, (6:06). on the threshold. No wages paid, we'll see what comes. My message to the European governments or with Iran, is very simple. Take the easy option out, you can't get it right. In America it will get worse, we'll see in New York how long they can last, ?? kicks up. We'll see more and more deaths, and more collapses of economy. Many of it will not recover. The American citizens will suffer more because now there is no arms selling. Nobody is interested to buy arms, then you can't have an army. We are heading for world peace in a very strange way, but we are heading into ?? economy if it goes this way. As we see how many people and how far will they come, just risk their lives. No job, no money, ?? I think it is about time the world leaders to understand what is about to hit them in the next few weeks.

Don't forget, if any of you have had a birds eye view of the Vatican, we'll see how that place looks today, as people are not going for the Mass. (6:08). Then I think churches and Houses of God will become the first victims of the ?? looters. But the biggest problem is, even if you have looted, the loot. I sent a link where the Pope makes a speech from the balcony, where he is coughing, that was last Sunday. As we see, I promised to return the marbles of Vatican, back to the Coliseum. Would the people do that? Or would the governments just open up. Who are the ?? survivors, who don't get it. Shows the video of Pope coughing. For those who believe in the Vatican, this is the Pope on Sunday. … Look how many people are in the queue, if you have been to Vatican when the Mass is on. Plays it. (6:10). You can see how thin the crowd is, and how many of them do you think are infected. They're the ?? last tourists in Europe. In the coming time, it could turn that way in Europe, and people take it, or we keep the warm time and turn to the summer flu with this, then it is going to be much worse.

Presentation from KF China

We'll go to China. Guan Lin (GL) are you there, what is happening with KF and the Chinese government, and what we have done in China, please? GL- Okay, hello … I think it is good, as you can see our president has visited Wuhan, so that means the government wants to show that we have control of the virus, and soon the life will come back to normal. (6:12). I think we also need to thank those KS who have produced those Gans's with the Army to clean the city. Anyway it's good to know that our knowledge was serving the Chinese government and saving the nation, and saving the lives of Chinese people, so that is a good news. K- What do you have to tell us about what you are claiming. GL- actually we have something interesting in my presentation and people can see that. I remember the first time on the news when the government was saying the virus was getting out of control, and you asked me to contact the government directly, and you said we should start to send the letters to the Health Committee organization, and to the government, the president and prime minister, directly. We hope to get response. And at the same time you announced the One Cup One Life. Then we tried to find KS to

support the people who got the virus, or who wanted to do the prevention. So we have some cases. But the good thing is that the government has a very tight control, in just like one or two weeks, (6:14). all the sick people are being put into a hospital, or into segregation. Then it's not easy to find people who have been diagnosed. People in Wuhan who have been working day and night outside, they asked for some Gans Water to protect them. Some of them say they test negative, but they have some symptoms like coughing, itching, or pain in the throat. They all report that they have recovered. I think I have the presentation to show what we have done their and it's good to ask Stanley to present the presentation. … On January 21, we wrote a letter to the National Chinese Health Committee to support the government to get rid of the virus. (6:16). Reads presentation on screen. … This is the first letter to President Xi… We also told we had successful tests with African Swine Fever. Explain the T on how we can overcome the virus … (6:18). At the same time we sent the same letter to Prime Minster Li… Then K taught One Cup on Jan 24th. We setup QQ group, 1,300 members. January 30th sent second letter to President Xi and PM Li. Americans close border and said we'll have a food shortage. (6:20). We can apply the T for lack of food. .. These are the cases of One Cup One Life. Lady in Wuhan who had symptoms, in 3 days she fully recovered. (6:22). We had some people who travel in Hubei provinces, and in 3 days they recovered. Another case and he recovered in 3 days. This is a confirmed case in Wuhan City, with scan of the lungs, and she was dying at home, it was February 4, no room in the hospital, her daughter was so despaired … in despair they searched the Internet and we managed to find a volunteer to get the Water to her. In 3 days better in 9 days test for virus became negative. (6:24). K- This is the case where the lungs are more or less calcified. .. We have shown some of the pictures from this case. .. Her whole family living in the same apartment and they use the Gans water to protect themselves, and nobody was getting infected. But later on the government forced them to go back to hospital because they had been diagnosed before. (6:26). This is the list of Wuhan people who had some coughing, but they say that they had no contact with infected people, no lung problems. This one drank the water for 3 days and the throat problem sorted out. Another one said, he had chest pressure, and was very nervous, but no contact with infected people, and after drinking Gans water, no pressure on the chest and everyday his emotion is good. This is another man who just wants to do prevention. …
(6:28). Continue with cases….
On Feb 2nd we have written to Chinese government or Army that we can provide the full solution to disinfect the environment, and drink Gans water, and the breathing system (of Gans water) to help people recover. This is the only solution, (6:30). that can handle the environment and also the people's sickness. There is nothing like this T (there has never been anything like this T before), we have showed them ?? applied the T and the data. .. You can see the report about the Gans Water. .. Chinese Army setup a big factory with KS to produce 1 ton Gans per day. Play a recorded conversation, it's a little strange, to produce 1 ton per day and to ask him to join his team.

(6:32). Play audio of conversation. (6:34). (6:36).

GL- This is a conversation between KS. .. Actually when we sent the letters to the government, they sent us back a letter saying, that this has to be handled by the expertise

of the Health Committee. And the Health Committee, maybe those doctors are not familiar with out technology, so they think it has a lack of scientific basis, so they, from the formal reply, they refused to use our technology. (6:38). But actually, from the Army's side, they know about it and have tested it, because since you taught us the One Cup One Life solution, a KS has made the Gans and delivered it to an organization to be tested. In their tests they said it was very effective for killing bacteria's or something together. So then, directly they wanted to start to build a factory to produce Gans to clean the city. ?? but not directly to apply to feeding people, but anyway. So, yes, it's good to hear that the T can be applied by the Army, and can clean the city of China. So we thank the KS who have managed to bring this to the Army side, to help the Chinese nation.

(In this explanation it was not clear why we were supposed to listen to it?? Did they make an agreement with each other to keep the Keshe Foundation out of it??)

At the same time we sent the Gans water to 2 hospitals, and they have given feedback by word, and say it can show more effective then only with the Traditional Chinese Medicine. But they didn't give us further result for that part. So we don't know the result yet. Okay next page. This is just background information about Africa Swine Fever, (6:40). experiments which we did in January 19, of 2019. They confirmed, that the 819 pigs on the farm had been infected, and about by January 18th, 40 pigs had already died. We started processing on January 20th. The pigs that had died were put in the bags on the right, and on the left all the pens had dead pigs in them. Starting on the 19th January we started checking the pig's temperature, and these are the numbers. We also calculated how many pig died each day. In 7 days we managed to control the fever of all the pigs in our test area. (6:42). Then we had another test area, and we managed to join the fields together, just in 14 ?? (audio lost.) K- I'll carry on. These are all Chinese scientists who helped us with African Swine Flu. We divided the area into 4 control areas, …

On the 14th day after starting, we walked out of the building with 725 pigs surviving. This is another photo of our work in increasing the harvest in Mongolia. We are going back into Mongolia now, negotiating, hopefully to increase the harvest and in this area there is a huge area of "heavy soil", which is salt and kalk (chalk ?). This is a major work for us, we managed to increase the harvest here. (6:44). On the back of this, this year we are going into massive production of materials for agriculture in China. The KF team today or 2 days ago, announced that they can produce ?? liter of Gans for agriculture, for just around 100 RNB, which is 12 Euro, and this will allow the farmers to increase their products, and they will go very fast with productivity and we'll an increase in the harvest. This shows again increase in wheat harvest from 70 to 132, and the rice from 75 to 249. It's very interesting, that now the T is to be adopted by the government in a large way for agriculture. .. What happened when we increased the harvest so drastically, there was a big concern by the Chinese government authorities, that we have modified the (6:46). the genes. The first thing that was done to test, and it showed no GMO. It says at the bottom of the report, foreign genes, none detected. No gene radiation, foreign genes are not detected. And then, "Indigenous plant gene detected", which means we actually took the seed back to its origin. This was shocking to the Chinese Committee and agricultural groups. This means we take the seeds back to their origins. These are tests by

independent test laboratories. And we showed rapid growth in 27 days, tripling the harvest, which was a natural process. what we call, Gans production by transferring energy to the seed directly. In the photo, the one on the left is damaged with fungus, and that is why the harvest ?? This is a test for different products tested … several million went under (cultivation), it's amazing how the results increased. This year we'll go to quite a large amount of land (under cultivation), (6:48). in weeks. In this one you can see the growth difference in 27 days. The one on the right is natural (untreated), on the left is watered 27 days with Gans water. You have seen most of these results. An increase in harvest. These (crops) are used for alcohol and other things in China. You can see the difference. With this T the Chinese government will walk out of food dependency to the US. … These reports show massive increases in the rice and wheat. When we changed the composition of the Gans, we play a totally different game, and you can see up to 212% increase in rice. China needs only 40% in rice to become self-sufficient in rice. So when China goes to 220%, they'll become a major rice supplier around the world, replacing American rice production. This is again a very interesting point… what you in #1 and #2. (6:50). The seeds have been placed at the same time into the pots. #2 has been treated with Gans, and #1 has not. It takes on average 21 days for #1 to get to #2. This plant is known as a "tigernuts" for oil. China imports 70% of its oil from outside, with this tigernut they are hoping to cover part of that market, so they don't need to import. So we tested this 2 years ago. For #1 to get to the position of #2, it take 21 to 25 days. To get from #2 to #3, that is the first time you see the split in the seed, because underground, every shoot you see, it becomes one seed, one nut, it's like a hazelnut, so the more it divides, the more harvest you have. To go from #1 to #3, to split takes about 35 days. Using the Gans to go from #1 to #2, (normally 21 to 25 days) has been achieved in only 6 days. To go from #2 to #3, after 25 days needs 10 days, so in total about 35 days, (6:52). but with the Gans water has taken only 4 days. In 10 days we have done what the plant would have done in 30 days, this and increasing the harvest to up to 4 times, will walk China out of the need to import cooking oil. This is now under observation, there are 50,000 mole, each mole is 660 meters squared. We have been told it is now under trail this year. Each product needs its own, mixture of Gans, you can't use the same mixture for the same harvest. The corn has shown a massive difference, and it's very unusual to see such a growth in corn. This is from the KS in Yunnan and the harvest is huge. It's the same again, corn has a different application in China. You can see the difference between the 2 corn harvests. It's huge. It's heavier, solid, harvest comes in 2 to 3 weeks earlier, which allows 2 (3) seasons. In this area, they harvest in 3 seasons because in comes in earlier. .. You can see the difference in harvests of the same crop, it's about 30% increase from the same plants next to each other in the same ground. (6:54). You can se 911 and 700, a 20% increase in harvest. .. Again they tested for genetic modification, it never happened. This is a massive trial, a 1 million square meter rice trail, last year. It has shown massive .. what the Chinese discovered that on the side that they used the Gans, they didn't need to use any pesticides or herbicides, and the harvest has increased by 207%. If I am correct. The harvest comes at the same time, but the funny thing was that we saw a hurricane destroying half of the rice, and then we found out that they played a game with the rice, in which they did not tell us. What they did was they mixed Gans's in different ratios, or different rice with Gans or without Gans. And then we found out, that by doing this they created a hurricane over the field. These are M fields that they couldn't

understand, but when we told them, they realized, because there was no hurricane, there was a hurricane but no farm was damaged, but this farm in a certain point when they mixed the mixture of Gans's, without the Gans, they thought is was just like a water, ?? You put a water, and you don't put a water, and it creates a huge airflow and actually damaged the harvest. But still it showed more harvest then the good side. (6:56). So we would have expected a much bigger harvest without the hurricane created by themselves. We saw this one in the Caribbean's. So it gives us a lot of insight into farming into the future will be. We can see a huge growth and structural difference.
… (6:58).
(7:00). .. 10 cm higher harvest. Harvested earlier.
You see the KS are proud, they have a sign that they are using the Gans. It has shocked a lot of local authorities. It increases harvest by 25%. You see 13 bags more is a lot of money when you sell and that changes your position. (7:02).
.. over 100% increase. the one on the right is already getting black and they picked them the same day. You see what happened with this farmers harvest, is that the beans are so good that the neighbors stole half of it. He came one day to his farm and half of it was not there. .. and they say it tastes so good. And it has a longer shelf life to sell his goods.

We are involved in Ginseng production, they say 70% of the worlds Ginseng is made in China and 80% in this area. (7:04). There was some interesting results and they didn't want to tell us, we received little information from them. It's a very rich market and farmers don't want anybody else to know what they are doing. Again, you see the Gans bottles in-between the crop. .. The lady on the left is a leading Ginseng scientist. .. It takes 5 years to harvest, and if it is controlled it takes 15 years in the ?? In this process we can reduce it by a year, maybe 1.5 years, but at the same times it gives profitability. It's a very difficult things to grow. You have to dig it out and replant it, and in summer time ?? We are involved in this in China. .. this is White Ginseng.
This is interesting, we got a call that the plant has pests, they eat everything up and the plant dies. We applied on 20th and one day later (it recovered). (7:06). Without any pesticides. If you know how to mix the Gans's, the water, you can overcome. It costs more or less zero. Now you understand why the Chinese love this T. They are growing everything with it. We see that also in Iran, scientists are doing a lot with it. It says KF China, the place where science meets the STM. We are making inroads in China. We work right at the top. But the only problem with the Chinese is they love to steal technologies and make it in their name, and they have no scruples about it. Sometimes I say, I understand why Bill Gates went ravaging on them this way, because they stole so much from Microsoft and his technologies, and then they don't want his goods. So then he went for revenge as I call it. This behavior in China has to change, if they want to succeed in a bigger scale of operation. Respecting international scientists for their work, has to become part of the Chinese structure. They are beautiful people to be with and work with, but stealing T so openly amazes me. If you don't know, they were planning to sell the Gans T back to Iran. We got to know by the insider CPC people and we called them back. We said, this is the only thing you can't sell back to Iran, what came from Iran. (7:08). Then we see what happened. Now they are selling the same thing back to Italy. I am sure, we'll see …
Any questions.

The main part of this presentation was how we gave everything to the Chinese government to protect themselves from Coronavirus, and as you heard in the Chinese audio recording, how the Chinese Army had decided to literally and bluntly, to go behind. Not going behind, but going to the KS and telling that we don't want to deal with Mr. Keshe, that they want it to be Chinese. But there is one secret that KS have not realized, a Master never shows his full hand. The mastership of a T, is understanding a T to use it. (7:10). The Chinese Military and Government made a very big mistake. That mistake was very simple, as I said, the Chinese KS did not serve their nation correctly, if you would have stayed with your master, you should have seen this (photo of Chinese leaders wearing masks in fear), actually to be like this (Iranian KS without fear or masks around a One Cup). We take the "Love of God" from the nation of China. You will understand soon what this means. This will never happen, that space gap in that culture will stay. This is how it should be (Iranian photo), a happy nation. ??with, worth much stronger, what we call, virus then this (Iran has a much stronger virus then china). Even they use our T, they still forgot to do one thing. You have to understand this technology, as it was presented by the Iranian team this morning in the teaching, has a soul. And when you steal it has no soul, and it will stay that way. We'll work Iran and the rest of the nations out of this position very soon. But I wonder how the KS who thought they will do what they like, will do, with what will come to them. This behavior of "thy shall not steal," has to stay that way. We gave as a gift to President Xi, and the military and the CPC decided to play a game. (7:12). You can always run an empty city, and become a leader of a place where no one lives. We saw the streets of Beijing, and we see the cities near Beijing, and of different places. These are the cities of Iran, happy to be, and enjoy to be, then mankind will learn a new process. It is ?? T stolen, ?? pleasures of its use, the soul ?? I wonder how many people in China who have use (the T) have a happy face. Not much. Can you imagine you can shape ?? your lives, at a distance because, ?? you don't know if she has ?? The quality has to be handled the right way, with the right people. What we see, the news coming out of Iran, if the Iranian government doesn't follow the same way (as the Chinese), the problems will be very, very great, especially for the Iranian nation. But we have a good team, they are not after the money, (7:14). the way the Chinese KF people were. And we'll see other things. … there is a message coming in from Iran. Let's see what comes up. These are from the people in the field, helping people. They send us messages, and this gentleman is helping the whole village, he sends, good news. The beauty of the Iranian Chat room group, is that they report very rapidly with what they have achieved. The gentleman says, now we have a new virus, a mutation of what we call, Corona is the one which goes into the throat, and it literally suffocates you. This we started seeing and they say, 2 people, 1 form last night an 1 this morning, they all have changed within hours. Now we have tackled all 3 parts of this Corona business, and we have to see to what extent we can go. (7:16). I think we have given enough to make the change in Iran, and thanks to the Iranian KF team. They ?? mutated, when you look at it the KF is so active, since 2 or 3 hours ago, there have been 2 to 3 thousands of communications, ?? 300 in past, 3 or 4 hours. They are literally teaching, working and saving the nation. If I could take pictures from it … you'll see them, they have nearly 5,500 participants in different channels. The Iranians have come up with a beautiful system. They have 1 channel which teaches, 1 channel which always consults, and 1 channel which the team actually directs people to the groups where they

have to go and ?? and just entirely for the sick people. Then they have a channel for the volunteers in which they talk to each other. So if you ?? go on the channel, if you got sick or reported, you are handled by a different channel. These are groups, people come in, and when you go on that 3rd channel, mainly doctors, consultants come in and they take over and they advise. (7:18). Then you have ?? channel which is just the volunteers, they know what they want to do, and how they plan to do things. In the Iranian scheme, if you can plan it out, in Europe, or it will allow us to come in with the support of the Iranian Sepah, as a peacemakers, and the deliverers of peace and technologies, we will help to eradicate from the whole of Europe in weeks. This (virus) is so rapid, it touches everyone, that it has to be done. As I said to the Iranian government, this T has to handled by the people, for the people, and with the help of the people and the government. It cannot be anymore with the universities and the professors ?? In so many ways, if we leave it in the hands of governments there will not be many people left to govern, even for the governors. This is the truth about this T. In China, some of the most leading, surgeons, professors, and scientists died in the frontline. We have seen the same in Iran. We lost some of our ?? best scientists and doctors dedicated to serving the nation. And this, at this stage, should never have happened. But the knowledge is here, and as I said with negotiations with Americans, during Obama's time, we could of handled this out, we have got it. We put the hand of knowledge out. If the European governments accept, within the next 2 to 3 weeks, very rapidly, we'll prevent it. We will live with it, but without deaths. (7:20). Nobody should die. No one should die. These numbers will escalate, and if the economies collapse, it will be very hard to build back up. We still stand for the conference in April in Tehran, that we'll bring the next step, which is the space T of this knowledge, into operation, internationally as one group. This is very simple, let the people who know, and have delivered to their nation, come and teach you and deliver it to your nation.

Maybe the only boycotts we'll have, are on each other, not seeing each other, staying home, empty homes, and then loosing one after another, members of the family, because you left the ??window open, and it matches, and you catch the flu. I put a lot of time into these 2 governments, and we have seen, that the Chinese government now is producing 1 ton per day of Gans's. But they don't understand, there is nothing in it. And if you look at the cities, you can make ?? sure in ?? there. The way we saw in the past 5 years, fake bombings, and assassinations in Europe and America, trying to create tensions between different races. Now we see fake pictures coming out of China. (7:22). As I said, we have a ?? in Beijing, we asked for it, go and clear it, because we cannot go back where it is. They tell us, you come in and stay in that apartment for 14 days, and then go out. And that's in the capital. Then we believe the pictures we see, just because it has been "washed" to show. And then the Chinese KS, as GL said, we are glad that the KS at least learn enough to change, but they didn't learn the whole trick, what to do to bring a happy nation.
Are there any questions?
I would like to reset the Zoom and that would be part 1, 8 hours.
(7:24).
.. We have many people from Europe who are now in America. What do you want to do and what is your position in the nations. Europe we have set up a structure that we

support all those who come to ask for help in the time you are contaminated or you want to prevent it. Each one of you in Europe, you have your own Universal Council (UC) member, by language. It doesn't matter if you are a German in Germany, in Austria, Belgium or in South America, as many Germans took the loot after the Second World War. (7:26). You still have German speaking. If you have a problem and you want help, go to your UC member. The UC was called in yesterday, and they know their position. They have a team of supporters some of them, as UC support teams. They'll support you, and then we'll the support and knowledge of the Iranian team, to support the UC members who need help. If you want to setup a structure, the way it is done in Iran, as it is showing its effectiveness, get in touch with the UC members. This is why we setup the UC, at the same time you can ask for support from the Core Team or Earth Council (EC) which supports both sides. 2700

(7:34).
.. Any questions?
(7:36). Mr. Keshe goes over the list of UC member.
.. We cover about 60 to 70% of the world population by languages. (7:42).

Q:
(7:46).

.. We'll greet you. Even if you stand alone, somebody will take you home for at least one diner and one night. Don't worry about that. Q: So I could actually plan this trip on Saturday the 18th? (7:48). K- We don't know, at the moment nobody knows what is happening. Nobody knows. We are planning, let's work on it. It's not in our hands anymore. The biggest problem internationally, if Boeing closes one or two more factories due to crisis with Coronavirus. Nothing will effect, still some airlines will go places. But if Boeing cannot provide services to the airline, they'll shut everything down. We'll go back to the Victorian times, you get a boat and cross the Atlantic or the Pacific. This is a very peculiar situation. We are not ready for it. Q: Of course I understand, I'll try to push this a far as possible. I still hope that Tehran will be held and we can meet each other, that all these problems which are all around now, will be solved in Iran, because that would be a very good example for the rest of the world. K- We'll see. We have to see, how the 2 arms of the Iranian government responds to the KF. We are working very closely. I respect the Iranian, (7:50). political and economical system. I do not fully understand the culture, even though I am Iranian I have been away for 45 years. But to me it has come to the point I have met ??? many uncles, and distant uncle who are left in Iran. We tried to support them. We have informed all of them who we knew. My family, I didn't know until a few days ago, we already lost one member of my family to this virus, which we didn't know. It is real. People say it is made up. My family has buried a dream, for those who did not believe in reality ?? It's real for all of us. It comes to the same point for all of us. I am reading an interesting Chat going on between different sides of the KF, the Sepah and Iranian Ministry of Health, and how they are talking to each

other. It's amazing, the KF has managed to bring the Iranian Department of Health, and the Sepah, and KF doctors in one Chat. I think it is beautiful, there is no position, there are guidelines, they tell us and we follow. It's amazing how members of the Sepah are so careful to tell us, how we have to be careful. (7:52). It's part of the nature of being part of this group. It doesn't matter wherever or which century, they are very protective, they see, we are their children and they have to look after us. They give warnings, do this and that, this is what you have to do, and I laugh at it, this is nice you still feel there are people who guide, but I want to expand this beyond the borders of Iran, .. and the other nations. We are in a very interesting situation, if I manage to get Sepah out of Iran in the next 2 weeks, we'll achieve the cleaning up of the whole operation. On the other hand, the UC was set to do this job. (silence). Q: This is UC support for Spanish, .. What would be the protocol for the Gans for a 10 year old girl? K- You have to understand and I explain this again. The Gans is a natural product, the same as your body, or your structure. If you eat one banana or 10 bananas, the body takes what it needs and rejects the rest. The Gans does the same thing, it doesn't matter if you are 20 or 50, (7:54). or 500 years old, 10 years, 5 or 50 years old. When you apply the Gans, your body has a balance system, it takes from it what it needs. So that that question doesn't come into it. You spray, they breath from the same Cup, for how many days, and usually about 1,500 mls is normal for everybody, but it takes from it what it needs, if it doesn't need it, it rejects it. One of the things which you'll see, our doctors keep telling me, .. I keep looking at it. Do not spray your stomach, or lower body parts with it. But now with this evolution, you have to spray your lower body, because as we hear, the most important part that gets effected are the kidneys. You need to clean up your kidneys. My advice in the past few days, has been to take a bath, wash yourself with it, from head to toe, because you need to protect yourself with it. We don't know if the next move for this, I said this in the teaching in the past couple of weeks, if this virus moves now into inactive muscle cells, like the shin. There are no organs in it, it is just what we call inactive, there is nothing active in it, except itself, which works with itself. What happens when this moves into the bone marrow? It's the reality of it. It is mutating. would we see sudden loss of the immune system? (7:56). Now the game is different. We are a leading organization in handling, and we have been, you've seen it. The biggest army in the world has started making factories to build (our T), they do not do these things if it doesn't work. The hospitals are using it and they are giving it to everyone. The same in Iran, you have seen it, that is why we are here. My advice is don't worry, it is a natural process. If you don't have it (virus), you don't feel it. If you have the virus you'll feel a pain in your head, heart, chest, or stomach, it means you are already infected. Or you have another disorder which is sorting itself out in respect to the virus. That's all you need to do, don't ask for ?? just cover yourself, cover your home, cover up. Q: The protocols in the event of a fever. I said it depends on the fever, was it from the Coronavirus or not. She wanted explanation on both cases? K- This is the procedure we set for the Iranian government and the World Health Organization (WHO). The first step, do the 10 second breathing test (hold your breath if you cough within 10 seconds). (7:58). This applies if you have a lung infection. Because we don't see fever anymore. The brain and with the stomach. We don't see fever at all. The 10 second test will show if the virus has entered the lungs. Then you have 5 to 10 days to live, and the last 5 minutes you die of a heart attack. The other way is that the virus has gone to the brain. We see calcification of the brain, the same as

with the lungs. Minute calcification. So you have no fever, you suffer from a headache, and then you die. Then you now have the stomach, and it is coming into the kidneys and intestines. With the intestines I can play you a conversation with a doctor, they just come in, they feel suffocation, huge, they can't breath, no other sign, then they die. The doctor says that some die of panic of suffocation because you panic as you are doing it, but if you can lower the pain, the agitation, the energy transfer the virus, no problem. So now the 10 breathing test is just to do with your lungs. Problem with the lungs, you know you got it. No problem. Now we have to devise a system, (8:00). that it shows the interaction of the fields. In the world of science and of Pl T we always taught, if you are KS you have been here long enough to know. You have the Sun and the Earth, draws them, the M field interaction of gravity, and M field of the Earth and the Sun, rubbing against creates the light and other materials. This is your virus and this is your brain, the interaction between the fields of the two, creates pain, the pressure pain, it's very simple, there is no difference. Now, you have your head, neck, .. you use the Gans Water on the body. If you don't have any virus, there is no interaction (of the fields). But if you have the virus inside you, so there is an interaction, so you feel the pressure. Where do you feel the pressure? In the head, then 99% you are infected. If you put the water on your chest, (8:02). you see the interaction of the water and the lungs, you feel pain in the cavity, then 99% you have it. Now we see failure of the kidneys and the stomach area. If you spray there and have a pain, then you have it. The others do not have the knowledge, this is why we asked the governments to go public, to teach people. If you spray yourself in the morning and at night, voila. If you don't have a pain then you are safe. It's the fastest and cheapest way to know if you are infected or not. It's scientific. We haven't given you a mistake, or something from somewhere else. We don't need 20,000 test kits from China, when they stole the biggest T in the life of the man. We send it back with them, to them, "return to sender, there is no such address." The Iranian ?? doesn’t mean backwards and outdated T. So if you have it, you work with it.
If you don't have a pain, you are not infected.
If you don't have a pain, you are not infected.
If you don't have a pain, you are not infected.

But what is alarming us, is a very strange phenomena which I know is going to turn very soon, and it usually happens when I say it, somehow, very, very soon. Generally, people who are infected with this virus complain of weakness in arms and legs, and tiredness. What does this mean? It means that this process (from the virus) is taking so much energy from the body, (8:04). then very soon it will jump, (from the organs to the arms and legs). I warned about this in last weeks teaching, and the week before. So, you can't just be looking at covering your body with just the head and lungs, and waiting for the pain. Everyday, cover the whole body, 2 or 3 times a day. It costs nothing. Spray you clothing inside and outside and you are done. Caroline put a spray bottle at the entrance door, when you go out you spray, and when you come back in spray again. You are done. Wake up in the morning, spray, and you're done. And again at night and you're done. We have to take this .. It's like we came into an alien land, we thought it was our home, and we got invaded. We have to live with it. This virus will be a livable virus, if you know what the virus is. That's all you need to do. The minute the virus sets in, you have to cover ?? (spray the body).

Don't forget, we did this in Fukoshima, that's why it is running now. They use this T, all the workers in Fukoshima, in the morning and at night, drink just a glass of Gans Water. If they get any radiation (exposure) during the day, they get a wash and it is gone. The Fukoshima paper is there, see how it is done. It's not something we imagined. We worked it in Fukoshima, you all have been there, most of the KS, they saw how we treated Fukoshima in 2013 and 2014. (8:06). It's open. Do you hear anymore about Fukoshima? No. Thank you KF, and thank you to one of our dearest friends, Yukoko, she went there. She is Japanese and did the tests. If you don't understand it, then go into all the Fukoshima paper, with all the papers. Stanley, can you put it up. Go to website of the KF, there is no difference between the radiation. … You have to realize the KF team with Stanley, they haven't slept, they have been working, they were up with me, then I woke them up too early .. we have been all up, the team is actually exhausted. Q: I heard that they opened some area in Fukoshima, recently. K- Of course, they are washing it like mad, they are cleaned up. Now you can buy vegetables from Fukoshima. The land has been cleaned. Q: I don't think they cleaned Chernobyl up? They didn't have the money at that time (joking), they didn't pay us well enough. We got paid very well with the Japanese. I'll tell you the story of Fukoshima, one day. (8:08). Just read it, understand it, wash it, and it goes away. A friend of mine sent me, what we call, a teaser. He said, you know what you have become Keshe, you've become like the one, 'the nonbelievers shall die.' I said, that is the wrong way to put it. He said, 'the way the people who believe in the T and they follow it, they'll save themselves and they'll stay alive. The nonbelievers will pay for it by their own ignorance.' But we have to inform first and then decide. … The Fukoshima paper is on the screen.. This is on the KF website. (8:10). There are 2 Fukoshima documents. In one of the documents we show the shipping receipt to Japanese TEPCO. It says, it was taken down in the KF USA Store, we'll bring it back on Amazon this week. We went through .. this video, these pictures were taken in Fukoshima city, in 2013 when Yukoko went there, and we used the government equipment to confirm ?? Then when they saw this (the results), they came back to us, that now they wanted it in total. And then again, the American game of stealing T. It says, Fukoshima contamination solution. If you remember we have shipping documents and the papers from TEPCO, asking for this, they could not resolve this one. All the materials were sent, but the strange thing was, the Americans wanted it to go through Los Angeles, and they undid it, understood it, and they took it. (8:12). ?? could not be solved, then it was sent to them, ?? if they use the Gans T the same, to sort out the ?? I remember Armand making these N coated Cu scrubbers that Yukoko could take it with her. He pleaded with me, 'we have to put these in.' You see all the tests were done. It's no difference between this virus and Fukoshima. We did the same in recent days and weeks with the Italian government.

Any other question?
(8:14). K- I read in the Iranian Chats, it says, the Gans has already been sent. Immediately, they ask for something else, and they say yes. They give the name telephone number, and call them to see that they received it. It's amazing what MM has setup for Iran. I thank you for it, you are saving many lives. The Whole of the Iranian KF, volunteers, every communication that comes up on the Chat lines. (8:16). Q: Mark from Golden Age of Gans, K- You know Mark you should put the procedures for Coronavirus

on your website. M- I have put it up there. I created my 5th One Cup and I did with the metals of Zn and Cu outside the jar. Is that okay to do that? K- No, please don't do. How do you expect to make Cu by putting the Cu outside? you can do that ??? Q: With the fields from the ?? K- Yeah, but it won't be that effective. With the Gans's like CH3, CO2 you can do that, but essentially ??? How does it look, did you make much? Q: It's pretty subtle, yeah, made some but it's pretty subtle. (8:18). I may let it go longer. K- You make it on the CO2, maybe you'll get some CO2, CuO. I'll tell you how one day. Q: okay, sounds good. K- ??? space gap as well. …

We have to make this announcement, and we insist on making it, no KF supporters, act, or work, or buy from Richard in Australia. You play with your own games and your own lives. We go back to the groups setup in Italy, false certification, false documentation, it is part of their work, we found out. Do not work in those places. Next question. (8:20). You can see how easily you can make a breathing system. Shows one on screen. A Coke bottle and straw is your breathing system. Cost is zero. There is a big problem with the straws nowadays, they have all become paper, so if they stay in the water too long, they open up. Q: How do you use Coke bottle for breathing? K- put 2 straws in bottle, 1 straw all the way down in the liquid, and the other straw goes down but above the water line (you suck the air through the water with this straw). Q: We breath out with one … K- You are Iranian, a Shi Sha is in your blood. The only reason is you can't see fire on top of it. … Don't blow into it, you'll put your infection into it. Suck out the straw. You have to wash it every couple of days, and throw your Coke bottle away and make a new one, because you don't want ?? germs (or Gans ??) in it. (8:22). Q: Congratulations, I see your hard work day and night … ??? mushroom in the lungs (what?). .. which go in the lung of the asthmatics. K- You mean fungus infections for the lungs? Q: Yes. K- Some or all of it can be done with Gans's. We see this in industrial contamination, and there is always a solution for it. (8:24). Q: Does this antivirus Corona work the same way? K- No, no, that is bacterial. this is virus. Q: But it can be used anyway, like anybody else. K- No, because you have to use it a different way. You see this is the problem with you KS, just .. it's a shoe, but it doesn't mean you can wear any shoe to go for a diner. Do you understand ladies. Q: yes. K- So just because it is called a shoe, you can't wear it and go everywhere with it. It has to fit the place, that is why we produce extensive number of Gans's. You know something, we don't even teach you most of the Gans's, because god knows what you lot are going to do with it. The Americans played with this little thing of energy, can you imagine what you'll do if we give you new things, how many new viruses we would see everyday.
Any other question?
Q: Can we succeed with hypnotism in plasma, to dictate the soul to remove the virus? K- I have seen a lot of these things, I know where your thought is coming from, but you are looking at it, the long way. (8:26). R- Can you expand on that a bit? K- I prefer not to because it creates more complication. Have you seen this guy who is selling a CD, and says there is a noise and it clears out your, viruses, Coronaviruses. R- from sound you mean? K- Yeah, frequencies. Don't forget, Pl has no frequencies, how are you going to handle it? R- Does the virus have an emotional frequency or does it adapt to our emotional frequency, does it adapt to a certain range of human emotion? K- What do you mean? R- Does the virus feed off of certain human emotions? K- It could do. We are

looking, probably, that is what I explained in the last teaching, and it frightened a lot of you. So I prefer to keep away from it. Many KS have nightmares with it. R- We don't want to make things too complicated. K- No, not at this time of the day. (8:28). Q: Someone .. said the Covid 19 virus disintegrates at 47.7 degrees Fahrenheit, and is a "Deep State" hoax. I see people linking 5G and the virus, is any of that true, or could it be radiation sickness? K- I have seen pig flies. There is something people say about the Gans's … (8:30). We even spray our dog. A lot of people .. The position is that .. With this virus, we do not know how he will rotate, will mutate, and this is one of the biggest problems we have. Would it mutate with temperature as we have seen in China. You see, this virus has been killing from the cold north to the warm south of China. To what extent it will work, we do not know. We can guess anything about it. (8:32). It is an active living virus which we never knew before. Would the temperature effect it, or would it make itself resistant. In the past 3 weeks in Iran, we have seen mutation very rapidly. What Chinese are seeing, that they are so frightened of it, in 6 to 8 weeks. ..

There is an Iranian gentleman who has been working with the Pl and he wants to speak. (8:34). (8:36). K- Let me explain what has happened, the Iranian KF has made a list of questions, Q&A, frequently asked questions, and videos. Now when the people come they just send them to there (to get answers). You can do this in any language. Use your Chat Rooms and setup Chats, in your language, in Zoom, What's Up, or in Telegram, and set these things up. The UC members can help them to put it up for other members. I explained this to Caroline. In the places where we do not have UC members, ?? if you speak the language .. take what we call, ?? language and help the people. But it has to be correct, a lack of knowledge, will cause problems in translation. It's very interesting, we were writing a letter this morning, and in Farsi, we say, … means with thanks. And when they put it in Word, the PDF, the dot moved from under to over, we didn't know how it was done, but it's part of the program, and it gave (translated) "I don't thank you." A little dot above or below made a lot of difference. So if you are volunteering for the ?? language, try at least to understand the totality of it ?? If you KS but you don't want to be a UC member, but you want to support your language, come to the KF and we'll give you that access. (8:38). that you can setup your supporting language, you don't need to become a UC member, but you can work on the capacity of helping your nation and we'll support you.
Any other question?
Q: I am from Switzerland, and live in Thailand, I made the CL, I am totally alone, I don't see anybody in Thailand working at the moment. K- In Thailand we have a lot of KS. Q: But I don't speak the Thai language. .. When I make the CL, when I don't batteries that don't have some load, I get hardly nothing (Gans). K- You should see, what do you put in place of battery? (8:40). .. You have to replace the battery with a piece fo wire or another load. What do you put in there? Q: I tried the Double Cup and don't get anything. When I put a battery I get a strong reaction, it's not a low battery, it's a higher voltage battery. K- I understand. There is something with your Cu, most probably. But you don't get anything at all? Q: No, almost nothing. With a battery it makes two layers, on top, and beautiful Gans white. K- Maybe you have a Thai Cu or Zn. Q: I buy in electric shop. K- I don't know, I don't understand. Q: Maybe because there is a big jungle around, I don't have CO2. K- Oh, you should make a lot at night. …

(8:42). Q: Children don't get it. K- Who said children don't get it? Children get the worst of it. There is a myth that people say, children don't get the virus, 30% of the death is of children below 18 years. Do you want me to show you pictures of children in coffins, 2 or 3 of them. Children are as vulnerable as adults. This virus knows no age, no religion, no color, no race. Actually, children come to it very fast, very young children. They have a little heart, they can't stand. Drug addicts usually die of brain hemorrhage, they get the brain virus. We have seen quite a few numbers, (8:44). it's becoming, more less, very characteristic, no temperature and no fever.
Any other question.
Spanish translators, how many people do you have on your Chat? S- I have 18 participants. .. (8:46). K- Can I ask the Chinese KS, how do they feel in how the KS have managed to help the Chinese Army to cleanup Wuhan city? On what they heard? As usual the Chinese are afraid of speaking. Any reaction? GL- Yes, one person said, to saying people is correct. ?? Is the news correct, ??? They say they should tell where the knowledge comes from. K- They told us, they told the Army. (8:48). GL- yeah.. K- but they said, it he is just our teacher, where they should come out and tell people how they are helping. We gave the knowledge for you to save your nation, but the behavior is wrong. GL translates. They say this is a good thing anyway. If people have problem, that is there problem. Another said, it is correct to saving lives, but they should cooperate with the KF, and some people say, the stealing behavior is the shame of the Chinese people, and why do the people allow this kind of activity. Or is it, like our president doesn't know that (what is going on). Some people say their spirit is like, low or bad, and humans need a long time to grow. Thanks to Mr. Keshe. And people say they should tell the public where the T comes from. And they say, stealing the T is not correct but we should forgive them for saving the lives of people. They say, it's like only for this infection and not healing the disease, (8:50). and actually solve all the problem. Some say, they pick the ?? flu, this kind of behavior is like, is so bad. K- What questions do they have? Q: Can the Gans damage the function of making a baby (reproductive ability)? K- No, no way. Q: … We have a doctor, he is TCM and combining the western medicine and eastern medicine, and he has found a way to inject the ??? into 4 acupuncture points, K- in the neck, I have seen it. Q: He wants to know the comments from you. K- No comments, I don't know what he is doing. I have seen the video from the Chinese securities. He actually does it on the streets. Have you seen it? Q: Yeah, he does it on the street. He is the same, he can do prevention, he gives some injection for prevention, he is working everywhere, even without mask, but he didn't get infected. (8:52). On the news they said, one of the Chinese scientists, like to promote him, give him a chance to be invited by Koreans to handle the virus there, but then some people presented him to go, but if they let him go, then (if something happens), it will be their mistake or fault. So they have to cover that.
K- What? GL- repeats ..
K- Any other question?
Q: I have a stint in my heart, applied in 2017, can I use Gans or the CL? You can use Gans, but don't apply it on your body. Apply it on your environment. ???
(8:54). .. Shall we call it a day, we said we'll stay 10 hours.
We would like to know how others will start moving for their nations. Q: from Brazil. Can we do analogy between the monarchy and the Coronavirus? K- What.. no don't even go there. No. R- There is one interesting analogy, where the crown has been given up by

the Prince Harry. He is no longer considered as part of the British Monarchy, and he is moving to Canada. … there was a good-bye ceremony. (8:56). K- Hasn't he followed the path of his mother. If you remember, when Diana got divorced, the Queen took the title of monarch from her, and she refused even to lower the flag of Buckingham Palace because she was in the monarch, in her funeral, and Tony Blair went for this, "monarchy or democracy". And the Queen had to give in. R- It seems the Queens kids are not so into maintaining the structure. In a way, Corona, the crown, I think is an interesting analogy, but perhaps that is stretching things a little too far. But there is are a lot of coincidences going on. ?? what if monarchies come down in the next few … Caroline- I just received a question about the salts, a lot of people are getting confused and have difficulties when there is iodine in the salt .. K- It doesn't matter what is in the salt. It doesn't matter. Don't worry about it. … (8:58). K- it says, Trudeau is self-isolating after wife, Sophia fell of fever. Tested for Coronavirus. R- Is that real or .. K- I don't know .. All they got to do is spray the Gans water on the head, if you got a pain, darling, no problem. .. I told you how many of the world leaders will get it. …
Q: A question from Rafael. K- Oh, hello. A lot of people here in Brazil make the Cup with the chicken mesh .. K- You do NOT use chicken mesh. You do not use chicken mesh. .. Where does this come from. Why don't you Brazilians listen. Nobody uses chicken mesh, do you want to help your virus … I don't know where it came from, only in Brazil, nobody else touches chicken mesh. I have seen it in the Chats, I put a few notes, and just go. (9:00). You know I think there are a lot of corrections need to be made in Brazil, because people who were there originally have made so many mistakes and they are building on that mistake. Never touch chicken mesh until we go through the crisis with this virus. The reason being, Fe in the chicken mesh creates CH3, and it feeds the energy of the virus. Very simple. What else Mr. Rafael? Q: Caroline answered it already because here in Brazil all the salts have iodine in it. K- It doesn't matter, use it because you don't have a choice, then the body decides. It means your body is matched to it. If you have been drinking it for years, so you are part of it. It's part of your structure. Any other question?
R- The rumor about Canadian Prime Minister is true …
K- Can you ask her if she had a pizza in London? R- A pizza? K- Yeah because all the Italians in London .. (9:02). We have some KS in London have the fever. Yeah, this pizza business is making a lot of .. it's strange you walk around the shops, nobody buying pasta, tomato tins, they're all left. The Indians are doing a very good business at the moment, nobody goes for pizza, Chinese, only left is local and Indians. .. Do you know something, when you go for Indian food and eat such a hot curry, even the temperature goes up, ?? virus goes up?? R- Even the virus goes running. K- The Chinese got empty, now the Italians, when you see an Italian you run. We'll call it a day. I hope with today, primarily with the paper published, I hope it puts a lot of things into motion for new science and T. With cases we have seen in Iran, which anymore, which is getting done with, we push the barriers of governments understanding that there is a solution. I would like to thank all the KF supporters … (9:04). This was needed, something to wake up the government of Iran to bring to home, we have no choice, but at the same time to show to the world, that Corona is not that deadly when you have a friend in a Cup. The Cup of Life is one of the solutions, one of the ways, but at least it is a live way, and it can mutate (with the virus). Thank you for today, and we keep to our promise, if anything further

develops we'll reach you next week. Or we wait to see how the KS gather together to change the situations. … (9:06). .. Would you like to go out with the introduction video with the flag of the KF.

(9:08)
KF Flag video

320th Knowledge Seekers Workshop - Thursday, March 19, 2020

English Transcription:

(:22). .. It's interesting what we have seen since last week's teaching. It has opened a lot of peoples eyes into how they can save themselves. We have learned of a very big structural difference. We were aware of it in China, but now we have seen it in Iran, which is shocking. They tell us, that why common people don't know, and that we can't get so deep with people. We had this, people form the Chinese team can tell us, that the leadership CCP called other people who were in the KF, who were making the Gans waters, can you give us some of that water please. It was to protect themselves. And strange enough in the Iranian teaching on Monday I heard the same thing, it was déjà vu, where the man at the highest level in the Iranian government was not, but he can put the T through to be applied. We have been negotiating with him for nearly 3 weeks or more. He is a heart surgeon, highly positioned, he calls, 'can you bring the water privately to my house, I need it.' (:24). This put me in a very uncomfortable position of literally, we gave to the leaders to speak, to protect the nation, but they want it only for themselves, for whatever reason they have. Even though the water was given to this gentleman to protect himself, he would not want it for his nation. And this, as I explained to the Iranians, I gave him an ultimatum, which runs out today, that I carried the Iranian passport for 45 years, since I left Iran. If the Iranian nation doesn't respond the way ?? most of the nation to be helped, I will move my passport from Iranian national citizen. Because they are using it, the Iranian KF support team, in one support team there are 17,000 people, and these are people who helped many others, and they come and go and learn. At any time, we see at least one to two thousand people online at any one time. At the moment there are 1,367 people online. They are helping each other, but as for the officials, it is good for them, but not for helping their nation. In so many ways, it indicates that the world needs a new leadership, a new government. These people do not govern, but to their own satisfaction, their own structure to fulfill their position. We'll wait for the completion of the time, and then we'll tell you what is the next step for the KF. (:26). People in Italy are

suffering as much as in Germany, Austria, and England, and they are dying everywhere. We targeted China, to go through China internationally, we saw president Xi of China getting the environment cleaned up for himself, to go to Wuhan City to show he is there, and it is overcome. But still we see them with masks and keeping a distance form each other. They have to open the cities because people have literally no money, and the only thing we know, the Chinese have discussed with the rest of the world, is that the virus has mutated. Strange enough, they have released a document to show that they have found calcification in the upper spinal cord and the brain. We showed that the virus has mutated from the lungs to the brain. To this effect we'll soon see new mutation, which in the KF we have seen and with the openness we have access to people who get infected in Iran. We see new mutations, and pain in the kidneys, and ?? solidification and tightness of the stomach. It's like you have eaten the wrong food but the pressure stays constantly. This is the third strand of the virus. We see stomach pain, again tightness of the stomach. The intestine area, not the stomach itself, but the frontal part and pain in the back. We have seen a new version of it, (:28). especially in an Iranian women. We don't have access to the Chinese. What we see, like a menstruation pain in the ovaries, and in the womb, but you don't have a menstruation. We have seen one case now, with the men having a prostate pain or pain in testicles. This is the version. In extension to this we have seen in one woman, bone pain, especially starting from the smaller toe. All these were told to and Iranian officials were informed through groups setup between the KF, the Sepah team for Corona, and the Ministry of Health Corona Team. They have taken no action. We have seen now, more or less, 5 variations of the virus. the strangest thing is, that we don't that many lung infections, as it was originally. With the new 4 strands (version) we don't see any fever. We don't see any fever at all. When we advise the people to take the new, what we call "protocol", then when the pain in the stomach, kidneys, ovaries, and whatever, reduces, we see the infection. That what we call, temperature and the pain which goes with it. Then as they carry on, (:30). 24 or 48 hours later, when the fever goes, the tightness of the stomach goes, and there is no pain in the kidney. In those who are infected by the kidneys, we see a very dark urine, or very white urine, which was seen in one case, which means the body is releasing a lot of Ca, which is part of this disease. Calcium is part of this disease, calcification. On the other hand, we see a massive structure in and around the knee, a general weakness. If you remember, most of the people who reported initial stages of lung disease of this virus, always spoke about general tiredness and pain in arms and legs. This showed to us at that time that the virus has moved into, but we had to see how it moves. Now we have a confirmation of it. It has moved into the blood stream. It will be interesting to see why suddenly the Chinese and Iranians choose the path of, "keeping numbers down." Because in China, the mutation is so fast, that everybody dies from emerging, heart attack, brain stroke, without a fever, but in fact, they carry the virus. The Chinese government only puts official figures on those who they decide to call, "have died of the virus of the lung infection." This is an old story, we have seen the same in Iran. So in fact, we estimate the death toll in China to be over 10 million, (:32). and we are increasing it to 20 million. In opening of the cities, we see no sign of death, but the death piles up, due to changes in the virus. The virus doesn't infect the body, it takes over, taking and sucking energy. We put the estimate of death in Iran, and in general, around about 200,000. This is considering that most of these cities have brought in freezer containers, to contain the dead bodies, as there is not enough .. In

some places, people refuse to go to funerals, because at the funeral, is where there is a big problem. We have seen it in Iran. When you are sick, who is with you? Your loved ones, wife, husband, and children. Then who do you see to say condolences, at the funeral, the same person who looked after the sick person. Now, not only the sick person who has died, the family carries it, the everybody who goes for condolences picks it up. A handshake of death. In one case we have seen 52 people (infected), and a large number have died, mainly of kidney and liver and other failures.

In general, in the next few days, I will release a paper on the whole understanding of the Corona. I started the first part last night about 3 or 4 AM. Hopefully, as we are all getting pinned down, and can't go anywhere, it's a good time for me to write. (:34). In that process you have to understand a number approaches. First of all, when you spray, do it from head to toe, at least twice a day. For breathing you can wet a cloth or use a pipe, we call a Shi Sha (Hookah). Or put a clothe with Gans (water) on it and put it in front of your nose and mouth and breath deeply. In drinking, you have to increase it to about a half to one liter per day. Because now you have to go through the intestine. You have to use the ?? port. Only in the cases of emergency, we know a number of people who are in that position, from the diaphragm below the lungs to the toes. Again, only in the cases of emergency, from the diaphragm below the lungs to the toes, and ?? by the physicians, we advise the use of CuO, plus salt, plus amino acid (AA). ?? to the ?? legs in the bid container, say if you have 20 or 30 mls of Gans, in a Coke bottle of say, 300 mls, shake it well, and you put plastic or whatever, for a space gap between the Gans and your skin, you spray and put the Gans on your skin. On the kidneys if it is painful, also the liver, uterus, on everywhere it is painful, on your toes and knee. That the Gans doesn't touch your body, but there is a (plastic) film separation. (:36). Then make a patch of the CuO, salt, and AA, and you put it covering front and back. These are very easy to make, just wet it with a tissue, put it in a plastic bag and apply it.

The easiest way to stay immune from getting it, is to spray continuously for the next 3 to 6 months, at least once a day, drink at least 200 mls of Gans water. These are the ones we are trying to prevent. We have seen that even some of the Knowledge Seekers (KS) who thought it was a joke, and they were going to make the Gans, and spray every now and then, have picked up the virus. There is one thing we can report, up to today, in the past 2 months, form January, February, and now we are in the middle of the March, we have no losses from the KF KS or the people we have supported. We have not lost a single soul. We have no report, the ones who have followed the protocol exactly, and looked after themselves the way it was done. It is important for you because it is your life. This is what I told you all the time, you are the last man standing. You are responsible to guard, direct, and allow your soul to mature to its maturity, and you are the last man standing protecting that soul. Then you are responsible for the souls of your children, and your family, and friends. (:38). As I advised, try not to make just one Cup, but make many Cups. In 48 hours is the Iranian New Year, and shamefully the Iranian government officials are sitting by and dying one by one, but they do not release the T to the nationals. People are coming to the KF asking for help. The Iranian support team is stretched to the limit. This has to become the job of the governments, and we can carry on. The KS are working hard in Iran as they did in China. In China they stole the T by the

order of the government, and CPC, but stealing it was a gift. Unfortunately, unfortunately it is the hand of the nation. We can't change it. They are habitually a thief, they even stole a gift. But in Iran we see Iranians taking the flag and working close. We see a lot of pain in Italy, but it is what happened in Italy, it was the way it was setup. Those who lead the destruction of the KF in Italy, their souls have to pay for the losses in Italy. You should have been there and supported the nation. Maybe this is what has to come. The KF Italy supporters, we have setup a line for you, get back together and save your nation. Your losses will become more than China. We see what is happening. (:40). The KS in Germany and Austria, you have been given a free run to support your nation. Your Chancellor talks about 60 million in contamination. It's the responsibility of the KF KS to spread the teachings and to show people how to save their lives. In France you'll suffer heavy if you do not ?? , because it's the only way you can protect yourselves. You have to understand that the totality of the teaching is for every nation. We can see the US getting hit very hard. But the problem in the US is there are too many guns. Shops are empty, there is not enough stock. They can only stock as much as the supplies coming. But we see the problem is that the shop keepers and supermarkets owners value their lives too. We'll see the collapse of the economy in a very rapid way. In so many ways, we'll see the same thing in Brazil. There is one good thing, those who come to destroy or hurt you, and say this is this, about KF and the rest, do not worry, it is them who will come back to you as fast as they can. (:42). We had a case in Brazil, that I am going to stop everything. We had a case in Iran, the gentleman calls, and as I said in the Chat, every swear word in the vocabulary of the Iranian, Persian language was given to the support team. A few hours later he calls, begging for the life of his mother. You have to understand, those who went against, supported us to become wiser and deeper, ?? We see the same thing all over the world. Now Africa is infected. At 2 or 3 AM I was talking to an ambassador from Africa, he says, Mehran we have nothing, we can't even report, we don't know who is dying of what. He said, officially we reported 1 yesterday, but officially the whole city is done. He said, I called you to se how we can help Africa. He is an old friend. We see the same thing running in South America. With the help of our webmasters and the rest, something came up and we saw, and then we ran a security check on it, which was not very clear. We found out something very strange, the man who released the virus in China, the same man, (:44). owns a vaccine company in England. Computers were not so profitable, enough greed, to become again the richest man in the world, as he lost his position. Because he started a "Micro", now he has gone to micro, micro in viruses, to become richer, to be somebody else. The greed of the wealth has blinded the man of stupidity, and his wife. Now we understand why there was resignation of Friday of a big ?? well company has been setup, to sell vaccines for the ones you infected. You rob a man from his wealth, and then you lend him the money. With his own money. We'll see what will come out of it, but now you understand, we wanted him, he understood, but we understand more into it then he is actually trying to become ?? richer, by supplying the vaccines for the virus which he released, through a British company. It's very interesting he advises all nations for vaccines, and gives (loans) them, to buy more of it from his own company. What in fact, has to be told to the world leaders and governments is that the virus has 5 strands and this vaccine only works on one of them. (:46). Because of the stupidity of man it will take some time to find out, because these are of different strands, and the vaccine doesn't work on all 5. One of the things we could not understand, because

the Chinese blocked a lot of information, maybe they didn't understand themselves, is that people will drop dead instantaneously. These are the ones who received calcification within the cell of the blood. You have to understand that blood vessels run around the lungs to take oxygen (O) to the heart, and every single cell in your body has a Ca center. As the lungs themselves are calcifying, it carries the energy to calcify the blood cells within, which pass (by), and then you'll understand how this is taking shape. Now it has entered the circulation, and if enough cells are calcified, then the calcification in the blood becomes like a blood clot, and then like a loose bullet. This is why the Chinese never reported the people who died, who didn't show any sign of virus in the lungs. This is how they played with the figures. We have warned the Iranian authorities, that this game cannot be played. One of the main objects and work of the KF, (:48). KS is to keep an eye on the healthcare doctors and nurses on the frontlines. They are your priority to educate these scientists, takes a long, long time. To bring this level of wealth of knowledge takes even longer. You have to understand we have to, as a whole, understand one fact, we are all in it, and these doctors on the frontline are the only ones who are saving ?? our lives. It's our responsibility, what we call, us to protect them that we can guarantee, and we can stay alive. In so many ways the pain is too much. We have to understand, that the saving of our doctors and frontline is the responsibility of every single one of us, because they are those who protect our children and us in the time of need. I posted across all the channels, helps, and KS and groups, for a list of the doctors only. We have lost the ones we know in the past 4 weeks in Iran. The numbers are many times more. Many, many times more. (:50). … this video is for you as KS to see what we lost in 4 weeks in Iran alone, doctors and nurses. None of these educated people are with us. The less of these people that we have, the more we become at risk. After their deaths, their expertise are gone. These are the assets of every nation. We hear that in Germany that doctors are hit worst then in Iran. … In every country you are responsible. The losses are heavy, and the frontline is paying for it worse. In so many ways, it doesn't matter if they refuse, it's your job to inform, and strange enough at 2 AM this morning we received a message from a lady, she categorically says she is a surgeon, doctor, and her husband is a cancer surgeon. 37
(:52). .. please play the video, these are all the doctors we have lost. ..
(:56). .. I would like for all of us to understand, as many say this is fake, it's made up. This is the reality we face in Iran. The strangest thing is in one of the papers the lady doctor writes, this is the last prescription she'll write before she dies and she stamps it with her stamp. She says good-bye. Germany and Italy are paying worse. Do you see the cat in the arms of the lady? The shape of Iran is the shape of a cat laying down. We love that cat. We hope it is precious. Soon this cat will become a boot, and soon this cat will become the whole of the space across this planet. I do not agree with the Chinese government opening the country, because now they will not report the true figures, (:58). and the virus will kill relentlessly in China. We do not see anymore lung infections by calcifications. (Instead) we see calcification of kidneys, stomach, wombs, and the rest. For ladies, please consult with the KF doctors in Iran, they are giving specific protocol for womb and ovaries Corona infection. The reality is we are loosing many, and the reality is, how many do we have to loose until people start governing without governments. According to what we hear, a trip to India is about to kill many of the world leaders, as the bribe was too lucrative not to make the trip. But the trip is paid

back, with many of the world leaders going to that state and getting infected. The greed of money has brought them into that position, the death of many families. The US will probably go through a time of many, many deaths, not just by the virus, but by killing each other for hunger, food, and everything else. (1:00). In the west and the east, we do not understand the animal behavior of the Americans, where they carry a gun, and all have one at home. In Europe and in the eat we shout and holler, these people go out and they'll kill more of each other soon, then the virus. There are a number of big problems, as I said in one of my talks, soon we'll see the end of the arms manufacturing, because as we said, the arms are not the only wars out there are finished, and the nations do not have money to spend on arms, and they are fighting another enemy, which they can't see. You will see the collapse of the American economy, and especially the state of Belgium, because no arms can be sold. The other nations have to be prepared to carry this through, as they will not be able to sustain life. There will be no shipping or flights, or we all have it and see who drops dead. If it becomes so common, then it will become an open state. Not a closed state, and whoever dies, dies. There is a very clear understanding that when you go through the process with the KF T, with spraying and helping and supporting yourself, if you are recovering, it will take you 3 to 4 weeks, to fully recover, because the virus has damaged many cells, so you will feel weak with not much strength, but this is part of the recovery, and the body has to recovery itself from. (1:02). One of the easiest ways to understand, is not to be afraid that you might catch it, but that it has traveled so many places that it is around and in us. We have to learn to live with this, we have no other option. In time when everything settles, the KF will file for genocide of Mr. Gates. We'll explain to you more. The way we got Alan Sterling, we'll get Gates too. We are gathering knowledge and information, and we'll not talk until we deliver. At the same time this virus is what we call, a double-edged sword, it is killing many of us and we are learning how to handle it, but as we open the space to man and the Universal Community, many of us will come back with viruses, and as I said before, this Corona will be a child's play. In a way, we are learning worldwide how to live with viruses and how to overcome it. As I said, it will be all in one go. When we open the space in the coming months, then we'll all understand, that it is not talk, and it is not a joke. A lady in one of the cities near Tehran wrote a very funny thing, she thought it was funny. (1:04). But we found out she quoted herself. She wrote, "I am walking around the city and I don't see any dead bodies, and in my house there are no sick people, and in my family there are no sick people, and in my water ?? there are no ?? They are all made up." Then she got made up. This is a reality that we have to understand, it will become part of us. We have seen it in the digestive system to go through the food chain. Eat vegetables, because they carry the protein, and if you consume so much of it, the ?? energy you release so much of it in the stomach, will calcify the stomach, and it will feel like your stomach is going solid. Spray everything you bring (in your home), spray your refrigerator on a regular basis. Don't think it is safe. It is the place where they grow rapidly. Just open the frig, spray it and the freezer. Spray the cooling boxes you have, just 2 or 3 sprays. If Corona can survive as an energy, so can the Gans. Understand and put a spray bottle at the front door, spray when you open the door to greet people. Just spray them, then you sit and talk and have peace of mind, and your love and care. Spray in the ?? , and spray your car, your office furniture, and in every shape or form. (1:06). Try to spray, if you can, with the original Gans that you take off with the salt (saltwater rinsed from the Gans). Because you'll see a

mark of white form the salt on everything, when you spray with salt. Because the Gans energy stays within that salt. In a way you create a different salt, a different side of the room, field, in a way that can handle the virus. The reality is we do not know where it is. It is holding somewhere in the summer or winter cold and the heat of Africa and South America. It is killing on both sides of the heat and the cold. The way this virus is connecting itself is through one way, through what we understand as the hydrogen (H) channel. It's connected to every C, O, and N of the amino acid (AA). The problem with it is so big that it will take mankind decades to fully analyze what happened in 2020. Many books and papers, conspiracy theories, will be unraveled, but the reality is, as I said to my son, you hear about the Second World War, you hear about the Black Plague, now we are living that history. (1:08). In time, 2020 history will be written about the Corona. But this time you are part of that history, learn, understand, and try to comprehend what has been done, and what is here for me to learn from. The true point with this is, the Chinese could hold, the west cannot hold. Hunger will bring people out and we'll see they first blame the racism, to get rid of the Black, White, Indian, British, and the Americans, they are the cause of it, and then everything else, and then start eating from inside of each other. It's the responsibility of the KF Universal Council (UC) members to start operating to the capacity of they have been administered to do by their soul. You soon will understand. In so many ways, we do not enter a condition that we don't know, we enter a condition that we exactly know, what we have to do as members of the UC, and the KF KS. Do not make 1 Cup, make as many Cups and teach as many people, the biggest problem sits, two ways, we are again weakened by this to reach 14 billion, the ?? point to open the door into space. On the other hand, we do not understand to what extent the losses will be. (1:10).

.. we need to stay collectively calm and focused, (1:18). one point is, the new way to handle it is very direct. Protocols are changes that the virus changes and you have to follow, because it is very much like I said, the people who make the vaccination are stuck with the old, and it takes them a long time to find out, and before they do, and before they make ?? a new vaccine. The protocol has changed since we have seen that the virus has changed. We made a new protocol, and that is you make, many Cups, and in one of the Cups you take the Zn out of the circulation, and you put only the Nano (N) coated material and the Cu, and you produce a pure CuO. With this you collect all the AA on top all the time, and you keep on washing it. At the same time, keep some of the saltwater separately, with some of the Gans of the Cu. with the new evolution in the Corona, you need a Cu Gans for 2 reasons, from the lungs down, everything is mainly muscles, even in your arms. There is not much muscle above what we call, lung diaphragm, the top level. This part is mainly made of Cu connection muscles. So it responses very rapidly, (1:20). to Cu. Secondly, Cu Gans Water with a few drops of its salt in it, is one of the best antibiotics that you'll ever put your hands on. It is many times more effective in killing germs then actually any antibiotic we know. So we have evolved with this. The doctors and medical team are giving specific advice on the ?? channel, that you can use, again, patches of Cu with CO2, on this ??? on kidneys, back and the front. There is no direct contact and you can withdraw it, for womb, ovaries, for muscles, leg muscles, and feet. At the same time you use the CuO direct, its Gans's water, the Gans's water, for this

infection, very powerful. But you have to allow some of the, very minute amount of the Gans of Cu to be in that mixture, because it will stay behind to keep disinfected. The same with the salt spray, you can add, a very small amount of the CuO in the saltwater where you wash, where you are cleaning the Cu, and use as a disinfectant. This is one of the most powerful disinfectants we can recommend at this moment to be used. When you make the Cu Gans. (1:22). When you are washing it, keep the saltwater, and add a very small amount of Cu into it, for disinfecting the rooms and the offices. Because now we are dealing with a different strength virus and we have to change the protocol. We have put a new protocol to the Iranian doctors, and this is exclusively and explicitly for the doctors recommendation. As we see, that many of you go with no signs when the virus is overcome, in your kidneys, liver, brain, or the lungs, through the second infection. At the present medical protocol, as I was discussing with the ?? of Iran this morning. He said, we don't understand, the international protocol says, you do not use antibiotics with viruses, because it gives it more chance to grow rapidly. Yes, this is correct with the old protocol, because they had no tools to overcome the virus. Now with the Gans (virus) we deplete the energy and this leaves a massive amount of damaged cells behind that we have to wait to accumulate to become a fever.

The protocol to the doctors for their patients, from the KF is as follows: From the minute you have the confirmation you prescribe to your patient, the following. Use of the Gans of the Cup of Life (CL), spraying everyday, at least 3 or 4 times per day. (1:24).

1) This is for those who are infected, and not for public (?? prevention). Do not do this. This is only for doctors, as we can't reach you ???

2) Then spray the Gans of CuO from the abdomen down. In critical cases, use CuO directly in a patch, on the skin, front and back, to overcome within 3 to 6 hours, then you withdraw the patch, and you go on with spraying.

3) The use of CuO plus a small amount of salt, salt of the sea or direct to be administered at 50 ml every 30 minutes, at the critical point, when the infection has come, or is visible. This is used as an antibiotic. If there is no antibiotic available. From the beginning when you see the signs. You administer antibiotics, like Amoxicillin, from the time you start the process of spraying the body, that the body goes through the reversal of the virus and the damaged cells together. This way you get a rapid result, and the extent of the weakness afterwards are much shorter because the 2 are handled together.

The international medical protocol is to not use antibiotics during the crisis. This is correct. But the new T, as I repeat it again, we take the virus away, which is unknown to the present world of medicine, (1:26). you administer antibiotic, or you use CuO, 50 ml for the first 6 to 12 hours of the discovery of the infection. After that we don't need to use anymore, the patches, and you reduce the use of the CuO as an antibiotic, to 50 ml 3 times a day, for 7 days, and then stop. The new protocol has to be used, using the Cu Gans saltwater, a small amount of Cu to disinfect the environment to handle the new variation. You can add some of the Cup of Life water into this infection. We have taken a new step with critical conditions in Iran, that is, we take a CL water, or a CL Gans, we

add 20 to 30% Cu Gans, directly into it. We use that mixture for both spraying the body from the diaphragm down, and .. nothing else. This is the only time you use this mixture. The breathing (Gans Water on clothe or Hookah) has to carry on the same, infected people, at least in the first 24 hours, for 10 to 20 minutes every 24 hours. And to drink of the Water, (1:28). for those who are infected with the new version of the virus, it has to go to half a liter every half an hour. At least 300 ml every half and hour, that it cleans, it takes the energy, and it sorts out the problem with the kidneys and the intestines. We will update the version next week as the variation changes. Don't forget the toe can be effected as much as the brain, at this moment, but the toe will be through the bone marrow, and the head will be through the brain. One is through the strength of the physicality, and one through the strength of the soul. the strangest thing is, that those who get, and we have seen one case, and we saw exactly where it goes, when you get your toe infected, and the brain, you can see that the larger is trying to feed the smaller, and the toe, and it covers the whole of the body (in-between).

Some of you asked in the past, how can we feed ourselves? I think you have the answer. By creating the condition on the toe, and the same on the head, then the soul of the man (STM) can feed the physicality in totality. This is the way you feed yourself in the time of emergency. We see a shortage of food, and rationing of food. And many people as we saw in China, they came on the streets, because they ?? food, they had no more money left. (1:30). At the same time they had no food to eat. It was to die of hunger, or to die of the virus. They came on the streets of Wuhan City and they met the bullet. The Chinese government has a lot to answer for, in reality, what happened in the last 4 weeks in Wuhan City and other cities which they locked down. As many people choose the bullet, rather then the hunger and the virus. It should not have been done this way and the leaders of China bares the responsibility of this with their soul. In the west and the rest of the rest of the world, remember the law of plasma, the weakest gets fed from the strongest, by creating condition of strength through the soul, and then to the physical body, the weakest of the toe, the body will feed itself from the universal energy, if you get it the right way. No one with this T should die of hunger. This is the first time we release this knowledge to man, to feed his physicality, without food. As it is a point of emergency, I promised you that I would do that this week. You feel it, you taste the food. Many of you will choose to eat, but the body essential will look after itself. Many of you will develop methods and ways to taste a Pizza, or a Kebab or a hot pot. (1:32). You will feel it, you will understand it, then what you think, what is in your soul, your body will be nourished with. Many people will die in the west, but nobody should meet the bullet, as the Chinese served on their nationals. I told you that when the leaders betray and steal, they deprive themselves of the knowledge, and they did. Many, many people will die in China, several tons of millions, because the new virus variation has not been understood, and they put it as, everything else.

This is a specific protocol for women, as we explained to the doctors in Iran, they are to prescribe for their patients. In the case, and only in the case, of detecting pain in the ovaries and in the womb. As we understand the energy level of the Coronavirus is at the Ca level, which means, it creates a condition of the salt at the Ca strength, that it has lead to calcification of the lung and brain cells, so in the case of lungs and the kidneys, we

have used the air and the water. As they pass through the womb of the woman, it is the most precious part of the life of the mankind on this planet. (1:34). It has no exits or entries, except one channel. When they cancer takes over it looks for a seed. 12

Any questions? Q: Stephania, I want to thank you for saving my life. K- You're welcome. You are precious. Q: I just want to say to everyone listening, that if you follow the instruction, (1:42). .. step by step. I will share my experience. K- If you want to disclose it. Let me explain. She is a member of the UC and took it kindly (softly), and not to follow, and not to make the Cup, until last week. She is Italian in UK, she is involved with the Italians and everything else, and she picked up the virus off the forth case, which is ovaries and the womb, and every other side with it. She noticed it on Saturday, and immediately took action in trying to support. We'll let her to discuss. We see it in the KS, if they are around they all take it as a joke. As you know the Italians have brought a lot fo virus into UK, and actually, that is what happened. I'll let you speak. Q: I started to feel unwell on Saturday night, and I don't have the words to describe how much it meant to me your support, and told me exactly what to do. I recommend everyone to be calm, and go step by step, and trust everything is going to be fine. (1:44). I noticed that the symptoms change very fast, so it's very important that you are prepared with the 5 Cups, because when you start to have the symptoms, then you don't have time to do the Cups, and follow the protocols. Mr. Keshe told me that my case was quite advanced from what I explained to him. It's very important to have the 5 Cups, it doesn't cost you anything to make them, and you just have them on the side. Even for peace of mind. … Because I luckily had the Gans already made, I could start the protocol right away. When you start the protocol, it is quite intense, you have to follow it up. But you see that the moment you start it, you have this relief inside you and you know that it is good, and you have this improvement in you. So you can tell that it is something really good for you .. You have to stick with it. In my case, I did it for 16 hours, you have to make sure to keep the symptoms down, and continuous. (1:46). This was the first day. Shall I say step by step how I did it? K- Yes. I would like you to say how you felt first, when you came to the point. How did it start. What you felt. Q: .. When I sprayed (Gans Water) I started to have pain, like you said during the Blueprint of the Iranian Paper. It was exactly as you said with the spray. When you spray all your body, I was dong a prevention, but it wasn't really prevention, because I was not doing it properly. But then lately every time I sprayed from head to toe, I started to have pain, everywhere. It started from the stomach to the liver, to the kidney, uterus, and pain in the head. It was difficult to breath and my tongue changed color. You see that your body changes very quickly. There is no time, so you have to prepare the Cup before, because your body changes quickly, it is out of control, you can tell. Started to have pain on my lymph nodes and under my armpits, on my uterus, everything was changing quite fast and you just want to have something in your hand that you can keep your body, with less symptoms. (1:48). So I was spraying myself and I started to feel this pain. It's a pain like you described, exactly like 2 fields interacting with each other, then I started to feel cramps in my stomach, like it was cement, in fact, really rigid, the pain on the ovaries and uterus, and cramps. I used the spray to monitor myself, and as Mr. Keshe told me to do it every 30 minutes and that was

really good, because through the spray you can monitor the pain changing in different places. It will go around (the body). I started straight away with the protocol, through the night, when you use a lot of Gans's you are not hungry anymore and you are not tired anymore, so you can wake up early and go to bed late, because that is how you feel. Then I started to take water, which was really important as well. I stated to drink the water every 2 hours. Also as you drink the water it is the same, you can tell the interaction of the fields as the water is going down, and that helps you to monitor the things, using the Gans. And you can tell, (1:50). as the time goes by, everything gets better. Then I used the breathing device. I noticed that if I was not breathing constantly, it was ?? .. The moment I stopped using the breathing device, straight away I would have difficulty breathing. I was constantly on the breathing device, as I was dong my Gans, … Basically you are going to do this for 24 hours and have nothing else to think about, other then doing this. You just are on it. I didn't have a bathtub, so I used cold towels to keep down the temperature. You start to have ?? coming up as well. It happens quite fast so it is important that you are on top. I have a situation where I thought it was getting better, so I was more distracted by other things, so the symptoms would come back again. It's much safer if you just stay on it. The wet towels from plasma water from the Cup of Life, it really helped me to keep the temperature down. It was really such a relief. ??? .. (1:52). it make you understand, in the beginning a lot of pain on the chest and back, and on my organs, but as I was applying it, you have to do it every 30 minutes, when I was doing that you can tell the relief and the pain going away. It's a sensation you can't describe, you just know that what you do is good. I knew that Mr. Keshe was saving my life, I was so grateful, and it really marked me. Definitely, I will give support to others. If you are up for it, definitely you can do it. It's not that difficult but you have to be ready. Now I understand why KF stresses to get ready. Just in case, because you have to be ready … the protocol for emergency, where you have to mix the Gans of One Cup One Life, because I didn't have a bathtub. In the beginning I had to wash my whole body. It's like you are putting cold water onto a fire, such a relief. (1:54). So you wash yourself, and you have this relief of .. then you have another type of pain, the one with the fields, it's not a bad pain, it's a pain that you know is for monitoring, it helps you to know that you are improving, it always becomes less and less. You do this for one day, nonstop. This was for the virus. My womb was hot, I really could feel this interaction of the fields. I could tell I was following the protocol because more and more the pain and heat was reducing. As you are doing it you are so happy because it feels good. Maybe it is the fields of the Zn, but definitely your emotional level is high, so you have this happiness going through, and you know in your heart that you are safe, and that you have found a solution for something that many people seem to die for. Then you can understand that people die, just because of a lack of knowledge, just because of that. If everyone had this knowledge, we wouldn't have (all of these) deaths, because it just takes one day, and the next day I felt very good. I started the protocol in the morning so I stopped around 2 or 3AM and woke up around 5 AM to keep with the protocol. Because I couldn’t even sleep, because when you sleep, you still feel this burning sensation, this pain like you want to ?? run. (1:56). In the morning I felt much better and I could see all of my symptoms going, I was not reacting as fast (to the Gans application), as the day before, and by the afternoon, I was starting to forget the protocol, like I wasn't doing it as intense as in the morning or the day before. I felt, "oh, my god, I have come through it." I

couldn't believe it. … started getting distracted and feeling good … Then the next day I started having fever again, pain and some symptoms, so I could tell it was turning back. The strange thing is that the pain was not the same as the pain I had on day number 1. Mr. Keshe told me if you have a fever for the second time, it is very important to know ??? I think the second time, I didn't have a thermometer so I didn't know, but the first time I was burning like a fire. You know when you have fever. So this was the second time I had fever. He said, okay, now you are getting rid of the virus, but now you are dealing with the bacterial infection. So I couldn't go to buy the antibiotic to get rid of it, so I started with the CuO like he prescribed. I added to my protocol the CuO, because I started to have a different type of pain. it was not over, so I started to get on it. (1:58). I spent all day Tuesday, again 13 hours on it, nonstop. And if you are alone you have to a lot of stuff. You can't do anything else. So again you have to be prepared just in case. I started to feel a different type of pain. I started to use the CuO like Mr. Keshe explained, with a little bit of Gans in a small bottle, and I started to wash from the belly down. A big relief, even that one. I got addicted to it, because you feel the benefit of it. You know that you are doing something good for yourself and that you are gong to make it through. Then I started to drink a little bit of the plasma water of CuO, and even that one gave relief when I drank it. This was Tuesday, and on Wednesday I felt, again super good, like "oh my god I am cured." 3 days you can go through. I felt like a new person, my tongue was completely color ?? , you see your (before) my tongue was completely yellow with plague. .. Then yesterday (Wednesday) I felt like a brand new person. (2:00). In one way, I could believe that it was that easy, because it's hard, but if you have everything you need and you are at it. It's easier then you think. I thought it was crazy that people were dying when they can just do this. Everyone would be fine. Yesterday, I had to do something's to help someone else, so I was very distracted, but I felt completely normal, okay. Now, today I am keeping with the protocol to make sure I go t rid of everything, because you feel good, but the moment you stop, you might start to have some heat and pain again. One thing for sure, I understood the importance of the spray. I had to do the spray constantly, because you wake up cold. It's like a test, but you can also use it as prevention. It doesn't cost you anything. You can also use it on your body if you think you think you have it. You just spray yourself and you see the interaction of the fields. I will continue this, I am busy but not as before. … One reason I wanted to say this, (2:02). is that you have to be prepared with everything all ready to go. And if you have others around you, you have to prepare enough for everyone. It doesn't matter if you are fine, just prepare it, like Mr. Keshe said, we are stuck in the house, we don't do anything anyway. This is the best time to prepare the Gans, PREPARE, then maybe nothing will happen, but you are happy anyway. Also teach it to others, how to make this, and like K said, if each one teaches to others, then you have a ripple effect, and it grows in a good way. If we each teach 10 people it will grow exponentially… and we take off the overload from the hospitals. What happened to me, I found people who maybe, are not interested. I just leave me them now. We don't have time to convince anyone. But what I like now, is that you have to learn not to worry, because this works, and it works very much easier then you think but you have to be prepared and at it. That's why the preparation is so important. Then you try to enjoy your life, don't panic, and think about nice things. You have to understand, that you still have to get information, not that you pretend that this is not happening, but you can have information without getting stressed.

You have a solution in your hands, so get prepared, (2:04). because people will call you, if they are not ready at the time, and they want to follow their own path. I think it's good, everyone should follow their own path, but it is nice to have something ready just in case. … I really thank Mr. Keshe from the bottom of my heart. .. and there are so many people died unnecessarily because this is a very easy protocol to practice. At the beginning you think, oh my god there are too many things to think about and do, but after a half a day you have already done it over and over, then it becomes easy because you got organized while doing it. I recommend to every KS, because this is the problem I had, I was not ?? (prepared) and was doing it at the last minute … and this creates more confusion. … where you are, just stay there and prepare. I recommend to every nation to get organized in groups, who's got the materials, the Gans, we have to help each other. Leave behind who doesn't believe right now. (2:06). Anyway, they will call you and you have to be ready to support them. … Mr. Keshe you really saved my life, I owe you one. K- Now you understand why you were making the bed (in her dream) last time. (laughs). This is interesting. Would you like to explain what you do for a living. She is around the medical world, and this is the strangest thing, and that's why she can explain a lot about the human body, because she works in the world of medicine in a different way, and she is fully aware. Q: Yes, I work with the nervous system, and I work with the body as well. I am a practitioner to help people recover from accidents, pain or any problems. I help people recover from things. K- Now you helped yourself recover form Coronavirus. Q: Would you explain the question you would like me to explain about myself? K- No, just what you do for your work, in the world of medicine. Q: I have been doing this for 20 years, but I realized in my work, (2:08). that the present T doesn't resonate with me. I found that I couldn't find a solution, because I always wanted to make people independent, yes, sorry. I ?? thinking that the brain is the one who controls the body, so what is interesting is that the guy who created this method was also a physicist, but I think he was teaching something similar to what Mr. Keshe is teaching, at the soul level. Now I understand that it is very important to organize yourself to find the position, you have to position yourself. That is rule number 1, you have to put yourself into position, when you are clear where you are and what you do, then everything is .. is the key … you have to keep centered, this is the key. (2:10). From the moment I started to do the One Cup many people called me, out of nowhere for help … As I was going through this protocol people I hadn't hear from for months or years, they called me. They were feeling fear and didn't know what to do. I walked them through the One Cup. .. Don't worry if some people won't believe you. I hoped I helped anybody listening to understand what we are doing. I came across people who said, you are pessimistic, I don't want to have a bad energy, I want to have .. It is actually the contrary, because I saw people who didn't want bad energy, but for them sometime they panic. So it is bet to have something for support. … because in this situation we are going to see something we don't want to see. You have to be strong, and don't take it in, in a way that will effect you. (2:12). You can handle the real situation of how things are around you, it doesn't matter if they are good or bad, then you have the present T and it works. … 3 days of work for peace of mind. You have to have something in place, just in case. People say I just want to think about nice things. Yes we are the creator, and it's true, we have to love, cheer up ourselves, it is important that we are happy and spread this vibe of happiness. .. But you also have to understand that we have never been in this situation before, so you very quickly go from

happy to become (sad). .. Why I think I got the symptoms, is because all of us, all over the world have to make an important choice, because they are cutting the train, plane and everything. So you have to decide, do I go back to my mom, she asked me for help, or should I stay where I am, or should I go to another country … I saw many people now who have the same decision I had on Friday. This decision comes from nowhere and are really intense, and under stress, (2:14). so you have to center yourself and that can cause the symptoms to come up. And in that case the Gans will support you. That is why you need to have the Gans at that moment or you will not be able to cope, because no one has been in this situation before. This is my advice, because now many of you will have to decide shall I stay here, or go to my parents. My friend said to me, I would like to go and help my mom, she is 85 years old, but I am worried that if I go now I'll give her something. … this is why the Gans are very useful and you'll be more in peace, you can do your meditation … make nice music, don't make the Gans with fear, but by doing the things you love. (2;16). ..
… if we all make the Cup, then we raise the big vibration and make a big gird between all of us, because if each one of us makes 5 CL (2:18). you use them, and get used to the protocol for prevention. So if that problem arises with friends or family you already know it by heart, you don't have to read anything … just tell them …It's another feeling when you have done 5 Cups and you know it. That's why I felt safe with Mr. Keshe because he has done it over and over for the last months. … (2:20).
.. talks about what is going on in Italy

(2:22). … K- This has just come out. Minister of health were are loosing 3 people every second, and getting infected
(2:24). (long pause ..)
(2:26).
Stephanie talks some more . ..

(2:30).

(2:32). … K- Thank you very much. In a way by, I let Stephanie to carry on, because in the time when I stop teaching, members of the UC like Stephanie and the others become the teachers on this channel. So in a way it is a good time to start learning how, these people who offered their life and soul to serve humanity, teach you from their heart and soul. This is a prelude to what will come. But the direction of the operation of the KF will run by the UC and their word is my word, when I leave. In so many ways, you heard the sincerity and clarity, and maybe that was the reason for this situation, for the next step of the evolution of the KF to come in. Thank you Stephanie, it was a pleasure to have you on my lap for a couple of days on the phone, trying to help you. She is very funny, she even takes the pain the sweetest way. You have to understand, we have to look at the bright side. There is an end to this situation, without a doubt. Without a doubt. (2:34). In-between words, not from me, that even in Italy, the bodies are piling up, they can't burn (fast enough). Now you see the truth on how it is seeping out. We are having a problem in the Islamic world, it's the most heinous thing that can happen to the body of a man, is to get burned. Then you understand, why we have freed the soul of ?? Cremation in the

Islamic world is forbidden. We saw the pictures in Wuhan City that they burned so many bodies that the satellites have picked it the chemical chains across China, 57

(2:40).

(2:44).

(2:48).
Isolate 2 Cups to be producing CuO,
then we'll teach you more. Stay calm.
The priority is one thing, not to infect the others, even if it means at the cost of your life. (2:50). Up to today, KF KS and those who we supported in China and Iran, have not had a single soul, of those who followed the protocol. As Stephanie said, follow the protocol, stick to it, it is your life. The following protocol for food, in case, it will be issued in a very direct way, that will understand that you can balance feed the whole of your body and family and loved ones. You don't need to shop, because the biggest fear is what we said, the people who get the Corona, they die of fear of suffocation. Many of you will panic from the fear of hunger. The procedure will be given to you in detail if we get to that stage. Is to calm you down from the fear, I have received the energy, I don't need to eat. Getting that confidence back. I don't feel hungry. The thing is every time you spray yourself, you feed yourself. You create the condition of receiving energy, and that energy balances with what the body needs. It's not just the virus energy coming out. Some of that virus energy as it comes out, trying to kill you, it becomes a beautiful, (2:52). fresh food energy to your body. this is why this T works so effectively. It's a source if you know how to tap into it and that is why we use it this way. It's not carrots or Vitamin C or D, as it is going through your body it is an open spectrum of fields, and the body takes what it needs from it. That's why the recovery is so fast. Actually the energy that was taking you to death, becomes the energy to feed you. You have seen this in the Parkinson's, that gentleman in the wheelchair started walking in 4 days. Because if you do physical therapy it takes months, but the body decides and the cells respond. You have seen it before and now you understand why. In a later stage, if we come to a critical point, in a total shortage nationally, then there will be no food. The reserves will run out in 2 to 6 weeks internationally, in most of the nations, if it carries on. The farmers are not farming. We were told yesterday that the flower auctions in Holland, which is the biggest auction in the world and are the biggest suppliers, are throwing the flowers in the bin because there are no buyers. The farmers will not farm to send to be destroyed. The bank overdraft and barrowing is too heavy. The farmers will not cultivate, (2:54). because there is no one to take their harvest. the truck drivers are scared to carry the food because they can get it while they cross the nation. The recrimination is far worse than what it. Be prepared for everything. Do not worry that you don't have or you won't get water. We'll release the T so you can, in a way, extract what moisture you need from the environment into your body. The same for your children and your loved ones. If you live in a block of flats (apartments), be prepared, you'll become the feeder of the whole block. You'll become the center that the whole family and village depends on. We had this in Iran, one man saves the whole village. We have Mrs. Mohammadi (MM) in the background if she

would like to talk .. Hello MM, have you slept last night. (1:56). What is the position in Iran with your team. …

MM The Iranian team which was active in Iran was aware of what was happening in China. We decided to setup Telegram groups to be prepared if it comes to Iran. (2:58). How are we going to handle it if it comes to Iran, to be ready for it. Even though this T is very young, not many people were aware of it, about the knowledge. We discussed all the positions in our meetings. The priority was to use the One Cup One Life video to teach on all the channels, on "Instagram" which is very popular in Iran .. (3:00). We made videos in Farsi on how to make One Cup, and also for local dialects. We knew when the Persian people started listening to it, that they would start contacting us. … they educated the core teams to be able to foresee everything. Through our administrative central office, we trained people who could speak the local districts, who speak the languages, that they can reach their people very rapidly. (3:02). We knew that after establishing the first teams .. we needed to establish a second team that they could answer the requests for help, (3:02). how to apply and the questions that would come up and they could answer. We trained the team of support admin, and a core team, trained in how to handle the patients, and how to handle (specific) infected conditions. The second team was trained to handle directly when it comes. K- Let me explain, in Iran they have 4 tiers of support teams, as I explained last week, there is one that is teaching how to make things, one is where people come and ask for support, and in how they can get help, if it is of the conditions they have seen, then they have built a team behind, who advises them, when the people come in with illnesses on site. Then that team has another team behind it, which are called advisors, like the Central Committee, with doctors sitting behind advising, all the cases. (In summary again), so they have a team which teaches how to make things, and a team which actually comes in when they want to know what happened with their Cups, or what conditions they have, like I told you last night we have the doctor asking for help. And then they have a team of administration who are trained people who can advise on making the Cups, and a team for medical application, and this team is supported by the 4th team, which is the central, and mainly doctors and they're what we call the core operations. (3:04). These teams know that they have to follow the protocol which was setup by the KF, and by the advice of the doctors and people who are in charge. So we established a 4th team which is made up of doctors and Mr. Keshe, and they advise how to use the medical operation, how to use it to fit the medical protocol. So this thing (organization) is all medical doctors and people trained in medical things. .. This way we have established a link between the patients and doctors directly through the support teams. (3:06). Until the moment that the patients don't report a full recovery, we stay with them. K- Let me explain. They teach them when they come in. In each center, within 2 hours in Iran, more or less, they can respond to anything. Last night we had it in the city of Massad, from the time she received the call from the doctor, until she had the bottle in the hand, was less than 1 hours. Actually the reason was that half of it, they left the bottle with the security, because they couldn’t go in the hospital, because the security didn't know it was to be delivered. These people who are responding very rapidly, they are continuously making the Cups, and having the Gans's ready for this patch, and they manage it 24 hours a day. What they do is, rapid response team, will get to the people and initially give them a glass of the Gans Water, which they can use immediately, and they

give them a Cup of Life, or a (ready made) system which they can just put in a glass and add saltwater and start producing it. And they leave them a leaflet explaining how to do it. They also teach the people who come for support, online, how to make the Cup. They not only get the water until their Gans's start producing, they get instructions for the Cup. Those who can't do it, volunteers will go to their homes and give it to them and see how they are. It's very extensive, the KF team is literally covering the whole of Iran. This is thanks to MM and the KF team in Iran, this is what she is trying to explain, how they set it up. It is well planned. (3:08). It is literally military precision the way they work. I couldn't even, by the time they sent me a picture, they said, this is a green jar, .. while they left the depot to go to the 2 doctors. They actually received 2 bottle, an extra one was given to disinfect the environment. It is extremely well organized. We have become an alternative health ministry as you call it in Iran. They are helping in Iran. I stay in the background, operational and giving support. And on the Chats. I put a note on the German language Chat, and Austria, and part of the Belgium. Get in touch with Klaus at the KF Austria he will organize you to be in touch with us. The whole of Austrian society is closed down, we are supporting in every way we can. But you have to be organized the way MM is explaining. It saves life. Carry on MM- When we realized that we couldn't move fast with the Ministry of Health, and the government, half of (them) are sick, even the doctors are sick, there is nobody in the offices. Iran is hit with a second problem, Saturday is the New Year, they usually take a holiday. (3:10). So everything is in disarray, not only half are dead, half are on holiday and half are in hospital, so you can see how KF has taken over the administration of this situation in Iran. There is no other alternative, because even the ministers aren't there. And as you have seen the head of all the top religious leaders have all died, and the doctors have died, and are dying everyday. So you can understand how KF with having no one to work with, because they are all "chickened out", in a way, or are dead, or are sick. They have started taking over the whole situation in Iran, which is actually to support direct. MM- Even we are facing with the 3 weeks of holiday, KF has taken the steps to cover the nation during the holidays. As we know everyone is confined to their homes, everyone is afraid, no one is traveling, we have decided, (3:12). to take the public information channels. As you know this is not a medicine this is a method for people to help themselves, so we are using the videos and voice recordings of people who have used the T, and how they help themselves at home with it, and to send it to the media so that they can see how it is used by themselves at home. K- There is an international law that says you can do anything you like at home, you can even take a poison, or alcohol, or a pleasure, nobody can stop you. There is no legal frame of work that can stop you from helping or taking alternative ways of life, inside your home. So the people are making these things in their home and are reporting back what they have made and are sending these videos to the media in Iran. Because there is no Ministry of Health approving anything, because half of the Ministry's main doctors are dead or contaminated, because they were not expecting this when they were doing the first tests, without knowing. At the same time there is no ministry to approve anything in Iran because it is all in disarray. (3:14). So they have found a way to show the methods and how people are reporting. MM- We'll give you an example, yesterday .. the volunteers went to an old people home to show the people in different areas, how this works, and the management agreed for them to go in yesterday to show. But when they went there, there was no management there, because they are all

infected. If I am correct, in that old people home 1 doctor and 1 nurse has died, and 3 old people have died of the virus, so none of the managers are going in. It has been left in the hands of more or less, the cleaners to look after the Home because they are all scared or infected themselves. When they went there yesterday to show them how to do it, there was nobody, not even the cleaners. None of the members wanted to accept the responsibility. So they were faced with a new challenge, and they made a decision on how they are going to solve this matter. (3:16). What they did was when they went into the infected building, they knew they were in an infected area, so they kept on spraying themselves with the Gans Water so that they wouldn't pick up any viruses. When the staff in the Home realized what they were doing, they asked them, what are you do. They said they were disinfecting, because they weren't wearing any masks or whatever (suits), and they wanted to know more, but by law they couldn't use it in the building. So all the staff came outside the building, because outside they can do whatever they like, and they started training them outside, how to use the Gans's and protect themselves. They took all the Gans Water, now the staff took it themselves into the building. Because they could see it. You have to understand that all these people wear masks and everything else, but the KF team is very open, they don't need (masks), because they carry the material with them, and sometime they wear masks if they feel like it. … (3:18). .. MM- We found a way now, instead of going to the management, they go to the staff and they take it in …

.. They see in the hospitals that everybody who goes in comes out dead, and they see this and know that the hospitals have no solution. So when they see the KF come in they accept with open arms. (3:20). This is the way we have found to get into hospital ..

K- This is what we told you before, the Chinese government put many people in beds and they died, they started cleaning up many of the centers that were closed because they are using the KF T with their patients. This is one of the reasons they say they have overcome and the Chinese are opening the closed hospitals. Not only are they disinfecting, because as these patients go through the process in 24 to 48 hours, those who haven't died, are literally cured by using this T. You will see, as we have been promised by the leadership of the Chinese Government, the KF will be thanked for service to the nation. You will hear it very soon, they have already told us. But in Iran we don't have that position, now we have to get over the bureaucracy of a Government that is half dead, in hospital, scared, or on holiday. (3:22). What is interesting, .. the pattern of the leadership follows the pattern of the people who work with them, and we have seen the ministers lying to the people, the same as ?? . And ministers do not, with contacts in the Government and senior advisors killed, they refuse to take it up, but they want it for their homes, wives, and own children. This is the problem you'll face in Italy and every other country. … Last night I explained to you that a doctor came in on the channel and explained that her husband is a doctor and he is dying. He took the virus sometime before. …. they tried every protocol …
this came to the emergency, I took this case myself … (3:24). … the material arrived to the control room.
do you know which one is salty or sweet. she put her finger in one and put it in her mouth, and started shouting, "wow .. this thing I just put in my mouth sent a shock through my body to my brain. What is this thing?" I said Madame you are 100% infected.

After a few minutes, she said, "you know something, I feel fresh. Something has gone out of my body." I said, you are infected. She believed in it as a doctor, because the first time she put her finger in it and then in her mouth, because she got a full whack, … when she tasted and could feel it. She said, "this is going to save my husbands life." Tell me what to do, and I went step by step with her, I spent 2 hours on my phone, .. She sent me picture of the husband in the O, and later he was sitting up. (3:26). .. I will bring her in, she is asleep at the moment. She will tell you. The medical teams have no choice on the frontlines. …
The strangest thing is he was infected for a week, and he saw many people in that time, now you can se how many people are getting infected. MM job is now to send a team to that village to cover the patients who got the disease from the doctor who tried to save them. This is the problem with our medical team and why we have to save them, because they are the frontline and they get infected and before they know it, days go by and they infect everyone they come across. .. (3:28). … We learn from you that whenever there is a problem you use that problem to overcome the problem and it works. This is the way it works …
(3:30). One thing to notice that the Iranian New year is most important.. it's the busiest time .. with this Corona is all shut .. we saw this as an advantage we can use this .. MM comes from this background of media ..

(3:32). .. (media people) they understood and from yesterday they started producing films and videos. Most of the famous actors and actresses of Iran will make these videos about the supporters of the KF One Cup One Life, and how people around the world .. can support themselves and teach the others. … to inform them of the One Cup of the KF

The film producers of Iran said, they thought they would be home resting .. but with what I have seen my job. (3:34). has just started, we have to save the nation.

.. if you notice it is very usual to have 2000 people on the channel .. they are live online. These people who come on the channels we teach them one by one and train them to become the (3:36). next volunteers. ..

.. The lady Dr. who called us last night had actually been in the Chat as one of the doctors for 2 weeks. but she didn't believe in it or carry on (3:38). anything with it. She sat there and thought this happens to the others .. she tried all the traditions and protocols form the hospital and it didn't work ..
(3:40).

(3:42).
(3:44).
MM life is a devoted life for humanity. .. (3:46). .. MM is directly in touch with these doctors. .. once this is all finished she'll go to Sepah .. so it will go nationally… we are not asking you, first save your husband and family .. for souls to wake up ..
(3:48).
(3:50).

(3:52) … K- About 3 or 4 days ago MM asked me to make a video addressing the nation in regarding to the virus and what we can do. We brought in a camera crew and made a 10 minutes .. the way I gave a gift to the Chinese on their New Year, we have given a gift also to Iranians on their New year.
(3:54). .. it was put on and 18,000 people watched it within the first hour and it has given a lot of hope to the Iranians. .. we don't take advantage of the situation to support opposition, we work within the structure the government. ..
This was not done in China they stole a gift ..
Something changed drastically this past week. Last week in the teaching a lot f you didn't realize, the voice of a Chinese telling another Chinese that he is working with the military and part of the military, making the Gans of the nation, but they don't want the KF to be mentioned because it has to be Chinese. And we understood, (3:56). the Chinese leadership was sitting there, the CPC and the head of state was listening to that broadcast. They realized they sent the head of the nation to Wuhan City by stolen T, and this brought a huge shame to the Chinese Administration. A lot of you just listen to the teaching, but we target our work for the benefit of the nation. What you saw, president Xi going to Wuhan City, .. was done by the use the KF Pl T. the leaders were told this was an Army development, which in a way, the voice recording of the officers and the KF team, was a clear stealing of T and changing the name, and it's an embarrassment to the Chinese nation. In a way, gave a lot of ?? to the voice of president Trump, that the Chinese do nothing but steal T. This way they got caught red handed. President Xi has to respond back on how he attended a meeting in public, saying they have overcome the virus, by stolen T, and then they show it to their own people as theirs. This has brought a massive shame to the Chinese nation and the KF supporters. Some of them said after it is the right of the Chinese to take the T because you gave it to us. We gave you a gift, you respect the gift, not steal the gift and change it. This is one of the biggest problems, (3:58). … My call goes to president Xi, change the

Last weeks teaching was listened to many world leaders,
.. In a way I understand why Bill Gates has such a huge hatred for the Chinese because they stole ever thing he developed …
(4:00).
… Shows picture. The man on the right (without mask or protective gear) is in one of the most secure hospitals in the district. You see a doctor in the background …
(4:02). .. He is in the hospital disinfecting without a mask …

.. It's amazing how this knowledge has helped …
He puts everything on the Internet .. The head of the Corona for the district is using the Gans inside the hospital. (4:04). … I want to explain the difference between the KF KS in Iran and ..
This is a picture of Iranian KS

(4:06). Next to him are the military, they would have told him you don't need a mask ..
.. a nation that accepted the T with open arms. What is important for us is that the governments understand the T .. how easily they can safeguard a nation when a gift is given … (4:08).

waiting for video.. what you see is the protocol the doctors given to the people in Iran. .. everyday we get a new protocol .. (4:10).
.. offered to America they said 600 video against him, facts on Keshe they refused the T. (4:12). .. Shows picture of head of in Iran. video starts. You see the Gans water and the brother taking the video. .. 3 days drinking from the Water. ..

(4:14). This is the man who was saved by his brother. and the truth is we are all brothers. You can see, if it wasn't for his brother he would be dead. It takes years to educate these ..

(4:16). MM - I always said that Iran will become the cradle of this new knowledge. … then we can teach the others because we have been through it. MM has to leave because she has an interview with Iranian Television … We think within the next 2 to 3 days to get it through … (4:18).
.. plays another video ..
(4:20).

.. another video ..
(4:22).
.. I wonder if the west would except the T or change the name of it, like the Chinese did, or like they accepted the Mithraism and changed the name to Christianity and Vatican. Is it the second time the Iranians culture touches the Catholicism and the west, but this time with Knowledge and the belief in the Creator. (4:24).
.. it's the job of the Iranian nation to look after its children .

.. I am ashamed of the Sepah and Ministry of health, for being short-sighted, they always gave (the T) to their officers … (4:26). I want to see the pictures in the next few days when he goes home, then you'll understand. Man's body is made of water and the only way you can save it is through the water. This is the water of life. …

Stephanie: You always said in Mozhan training, that weaknesses can be turned into strengths. I think this is the time, (4:28). we can learn from the Chinese and Iranians …

.. I was far away from it. Now I start to be in the middle of it, and I have no material, I am not organized. (4:30). It's double the job now. This can all be avoided. Those people who are far away can learn from others mistakes and can get ready. .. You always said in the Mozhan, that every weakness can become a point of strength. This can be the best thing to happen if we learn from each other…
K- You know what I suggested to one of the doctors .. those of you who use the T in all the nations, make a batch and put on it, KFSSI, I am free of the virus. You know in the time of the Holocaust the Germans forced the Jews to wear a tag to show you was a Jew. Now we should use the KF logo on the street with it, you know is safe. You can cuddle and say thank you, and bring the nation back to security. When many people, (4:32). wear these badges, the nation will move .. Just write KFSSI and anybody sees that knows you are safe. We need to bring confidence back to the nations..

The American, Chinese, Russian, etc administrations, you are all online, we see you in the background we are waiting for you to move. Not to let your nation move, that you will not be there to move, they'll move you from office, because you were incompetent when there was a cure, and what you called yourself the vaccines did not work. …
(4:34). .. the Whitehouse which is noting but black and red with the blood of people. Do you remember what I said, an eye for eye, and tooth for a tooth. Did he take a life, and he was so proud, now is he going to pay for the life he took. He took the man who was loved by a nation because he kept his nation safe … he shut down all the terrorist groups. Would he pay an eye for an eye. Now we shall see. You take a life, you give a life. According to what I heard in the past few hours, 20 world leaders have been contaminated by him, in the meetings since he returned from India. and his daughter, happy she took one ?? in India. I think they'll make a golden statue, ?? that's all it was, the briberies . (4:36).
.. the banking system will collapse in the west if it goes 2 more weeks …
.. many KF KS in the west are coming to us because they have nothing to support their families, because every thing has been ?? We'll open the donation channels to support this. The KF Australia wanted to charge for it We said no. .. Jim are you in background. Take over please. (4:38). We need huge amount of financial support to be able to support feed units, and be able to support humanity. We have received less than $250 in donations in the last 2 moths.

Jim. We have spent the last 2 years developing a training program for agriculture. …
(4:40). .. We have developed a training program.
(4:42). Go to the Australian KF website …
(4:46).
.. One Cup One Life Kit..

(4:50). .. K- Thank you very much Jim …
Going back to what I said at the beginning, because we have found the solution to Coronavirus, is looking beyond, that is why you see these websites. For us Coronavirus is resolved, it's just that your countries and governments come to accept it and take it up. It has to go like in Iran, on national TV, and taught on a regular basis until the nation can save itself. The launching of this and other things. (4:52). We were involved in it, and have already spent 8 weeks on it. We have seen the beauty of it in Iran, and the stealing of it in China. Now we are hoping we can help the rest …
We launched a new product in agriculture. … It's an agricultural unit that we can adjust to what need .. It's a pallet size unit, self-assembly …
with this you have everlasting fertilizers …
(4:54).

It's very simple and can be used by individuals. ..
can clean atmosphere in the cities. ..
(4:56). To create a clean air in Iran in the next 12 months. The same system will be delivered to any country. .. We'll buy back the Gans which it produces. ..
it's around $12,000 …

(4:58). It's more or less like solar cells and extracts CO2, and if need they can become like power generators, we discuss that later on through the KF.
Any other question?
Stephanie: You asked what my job is …
.. focus on the things you can do …

(5:00). .. We need to focus on what we can do. If you have a pain in the back and you focus on it and it becomes bigger and bigger. .. I'll stop talking …
(5:02). .. she knows people on the frontline in Italy, many are dying and it is unnecessary …
K- One of our main targets in the coming time, once we go through the Iranian national TV, is to take the clips and show them to the national TV's (around the world). At the moment we are helping thousands. Now that we show it on TV it will help millions. .. We'll curve the Coronavirus in Iran, hopefully during the New Year. If we can do this in the next 3 days, sending people home healthy. KF you are right across the planet you have to unite to make One nation. You are the seeds of that One Nation. (5:04). Governments will govern but will get inspiration and support through the UC members. You have to be there to learn to advise your governments, support, and unite. One of the biggest worries for governments will be, as I said before, they know that they will be no borders in Europe, because they took them all down, so they brought in American Forces to become a colonizer of the American or British government. Now this is how the Rothschild's, through British Monarchy, through American forces, which they are owned, will colonize the whole of western Europe. Now you understand on the other side British supported with a company which Gates owned in England, which makes the Corona vaccine, suddenly to take shape. We see the bigger picture, as you are aware, Gates owns finances, majority shares, in the background, of the vaccination company based in England. Now you understand, how the British never gave freedom to the American ..

(5:06). .. Colonize through the Americans, ..
.. Someone went to his wife …
Learn from the Iranians.
.. When the vaccine is given free by the government, you pay through your taxes….
(5:08). .. American troops to enforce the vaccinations ..
.. tried to buy the KF ..
They released the virus to become the leaders, and that virus will become their demise. Ask people to release these videos …
(5:10).
.. We release it very soon … The rest of the world will know about the Corona blocking it up won't stop .. .. You can vaccinate for the lung one, but not the brain, heart, kidney's womb one …
(5:12). …
Are there any questions? Q: About healing reactions from using the Gans? K- We don't heal .. balance the energies ..
Q: Can a high rate of heart be one of the healing reactions ? …
(5:14). If you have a higher rate of heart, if you had open heart surgeries you are advised not to use the Gans's directly. Use the Gans's to create the environment ..

.. the virus is calcifying …. if you use the Gans's and you have a reaction, it means the Virus is … Because you don't have the knowledge of the science of this T. I explained that you make the ?? Mg. Ca and Mg, (5:16). are of the same strength, so this water of the Cup has the strength to match the salt strength of Mg or Ca, this is why it is effective. We match birds with birds. ..
It will take millions of years for man to understand what I gave you in the Cups. Those who use straight Zn or Cu, say the system doesn't answer so good, because I designed specifically the spiral system. Each one covers a spectrum of the field forces. The same on the other side. If you divert form what I have given you, that is your decision, then in this process you create Mg. If you use flat everything, sorry (no Mg), and then you say it doesn't work so good. Because you don't listen. (5:18).

.. because when I make things I calculate a lot of things you have no knowledge of ..
.. When I make a MaGrav I get 1 megawatt, when you make it ..
I keep on telling you, "I am the Messiah." You will soon understand. But in this process you are messiah of your soul, but I am ..

(5:20). and you will succeed. ..

.. Those who betrayed us in Italy are paying for it … you are not worth spending time on. Follow the procedure of the springs. As I taught you before, this covers the variation between the two sides. This (flat Zn plate) connects you to the physicality, this (Nano Coil) connects you to the air and water, and this (Cu Coil) connects you to the water and the ?? water. You will understand soon. (5:22). These are set in a specific way. The soul takes the position of the center, and ( ) the soul of physicality, has to take its own dimension. And the two will run a beautiful system. Understand the KF team has made ..

(5:24). .. So you two have a problem understanding the English ..

(5:26).

Wikipedia has to be taken off the Internet, it is another form of controlling …
(5:28). .. Are there any other questions. Q: Is it possible to use CuO2 in the dry state? We advise you not to. Not in this case. Q: When I fill CuO2 with water it turns blue after a while, is that normal? K- what turns blue … The Gans or the water? It's because when you dry it the particles take part of the shape of the M state. ??

.. we can't get a clean water so easily from it …
.. This is a true picture of …
(5:30).
.. I have seen these in the U, don't forget I am the traveler of it. .. (you didn't take the video …) you know the video we took from the U, you didn't press the button, it's not recorded. .. the video you took with the machine is not there … This is the exact shape of the U and the galaxies. Do you see these (a photo of many raw eggs in an oval container), the shape of the container, (5:32). is like the U. Do you see how the yolks have spaced

each other, even it doesn't matter how we do it, there are some under or over with the same space gap … this is a copy of the Gans in water, they space each other, you can't bring them any closer ….
.. it doesn't how many we put in, they still keep their space gap.

(5:34). .. it's a few seconds later but they still can't touch …
.. I'll show you how galaxies are made because I have the video … (5:36). I'll send you this video…. This is how the Gans's do, the other video is the work of the U when we get movement of the fields …
.. my inspiration comes from the mixing, boiling and cooking ..
.. plays video (5:38).

.. When you stand outside the U and look at it this is what you see ..
(5:40). . This shows how Stephen Hawkins was so wrong …
.. the center point in the Unicose is the soul of the Creator, it is so simple. When you decide to stop it all the universes come to an end ..

(5:42). .. The universes keep their space …
Now you understand, nothing stops with Coronavirus, we are still proving this T, it is built with ?? and doing a lot of work in the background. Any other question. Q: In Bulgaria Corona hit =us in the past week. We have many reactors .. Can I make a dynamic reactor .. instead of the Nano coated coils? K- No, you cannot use at this moment, any dynamic cores, (5:44). if you think to do something for Corona. We said, many times, this thing changes energy and you create more, deviation into it. Q: Because I created Gans's with dynamic cores and plates ???
Q: .. I want to know if you know someone involved in Senegal, all markets will be sprayed on Sunday …? K- Sprayed with what? there is nothing you can do. (5:46). Q: …
.. What is the temperature of Dacca or Conakry. Can anybody tell us? (5:48).
32 degrees. Now they have viruses on both side, the wisdom that when it gets warm the virus goes, (5:50). doesn't exist.
.. so this virus will stay in the summer in Europe. ..
(5:52). My biggest fear, as I said before …

.. we see the behavior of double stranded, then it will be deadly … connected to the O, ..

(5:54).
.. if it mutates, the mutation will come, most probably it will go from the strongest to the weakest, now it will go from the strings of the O, will ?? definitely jump to nitrogen (N), then as we have seen, some of the plants will start responding, and the virus will go into plants. When you have a strength on the O side of the hemoglobin on the dynamic side of the Plasma you connect to humans and the flesh, or horizontal people, when it moves to the n side it goes to all the plantations, all the greens, what we call vertical peope. That is the mutation .. we have seen the people who have Corona in the stomach and everything has come through this channel ..

But when the N and O lines link up it will take the soul. And one of the reasons we keep on advising is please use as much as you can, because then a different dimension will appear, and mankind does not want to see it …

(5:56).
Q: Jalal.

(5:58). Q: In the news it says, a nano tech Italian company, which developed a nano tech material to sterilize the surfaces, and it will stay for 2 years without any intervention. A guy is asking is that a Gans or something else? K- We do not know, we have to see what it is. If it is a surface. There are a lot of nano technologies, and a lot of KF KS have turned things into their name and are trying to break into the countries to help. We welcome it, if it is part of our work, and they are expanding. That's what we did to the Chinese. (6:00). ..
But they can't get a patent on it. the way Red Circle wrote the patent no one can get in it.
Q: They are now working in Milan. K- They are all overt the place. The Germans are doing it.

.. Some of the people in health organization, have taken a huge bribe from the pharmaceutical …
When
.. These vaccinations carry huge amounts of mercury ..
He jumped, but he can’t jump his soul. I have him and I'll bring him to his knees

(6:02).

(6:04).

(6:06).

(6:08).

.. Now you understand why the Vatican have to go.

Two microchip companies are using the Nano T

(6:10). … W brought the T for mankind, from the Creator …

.. it's a double O ..
(6:12).

Any other question about Corona.
CH3:
Please make sure you don't use any CH3, remove it from the house, or let it go down the toilet. You can always make it again.

But a lot of you make the Gans's with the Cu and a Cu, and it goes yellow like a CH3, this means that your Cup doesn't have enough O to link up with the Gans of Cu, you're releasing from the plates, so it stays the color of the plate. When you add some water or air into it, it will go green, or it is a high energy O it will go towards the Zn strength ?? If it ?? CH3, if you have used Zn in your ?? side, and not steel in your ?? side you should get. Sometimes you do get Ch3, looks like .. but is actually Gans of the .. it's a different color, it's more towards the yellow, CH3 yellowish color, that is the Gans of CuO, at the strength of, (6:14).

(6:16).

Q: What about Deuterium and Tritium? K- Deuterium you have no problem. Tritium you had better move from the ?? At the moment we don't want to make available any energies to extend the life of the Gans (means> virus). You might need it, (if you keep it away), when it comes to the healing part. If you get desperate for food, we'll show you a way, that this will lead to the creation of energy. But at the moment we are trying .. when you are safe from the virus, and you are hungry, I'll show you a way to feed yourself. But keep your things, keep them away at this moment in time, from the environment where you live.
(6;18). Can we call it a day. We are trying to extend the Coronavirus (teachings). I would like to thank the Iran teams for taking the lead. ..

When we can release it internationally …
I have asked the Sepah to be ready to travel to every corner of this planet to protect One Nation ..
(6:20).

321st Knowledge Seekers Workshop March 26, 2020

ENGLISH TRANSCRIPTION:

(:10).

.. If it is like this for another 2 or 3 months, then we shall se a massive establishment of the new order. (:18). We see the establishment of one nation government will be forced by those who control the food line, to become the controllers, and have already pushed a man, as a sacrificing goat, that if he goes wrong, into the front. In so many ways, we see a "New World Order," to be seen as an opportunity for setting up. In so many ways, we

have no solution. In so many ways, then they will decide which country will sacrifice how many people, to be given their lives, to reduce the numbers. This is part of the bigger plan. If those who talk about reduction in population will come. We give you 1 ton, and you decide who lives, and you reduce your population by so many. Very much like when IMF moves in, now it's different, now it's a food monitoring organization, which means these organizations will decide who gets food and the rest die of hunger. They decide, that the American states will carry the majority of the population and the elite, and those in Africa will become minimal, just enough to grind the mines, and the things the West needs, (:20). and the slavery costs.

.. essential foods for 6 months food are held in reserve by law. Every 29 states, (:28). or the whole of EU states have to have 6 months supplies in reserve of the 20 most essential food products, and has been kept to that by the governments. We know how it is kept so perfectly and precisely under regulation. Europe will last 6 months with food, with rations. China will last through, maybe another 3 months, as we go through April, May and June, the harvest will not be enough, then they have to ration .. India will suffer heavily until May. The same will be right across the Arab states and Africans will be the only nations, those who live inside will survive, because they lived off the land and the trees. The UN will literally bring themselves to the point of destruction by killing themselves and destroying everything they had. Don't forget, the wall could not be built, and there are many Mexicans and hungry ones across the border. In so many ways, the border officers will run away from those who come to them, because they might infect them. (:30). In so many ways, even if we go to the point of population reduction, they need to decide whom, an .. Unfortunately, their leadership have been touched, they thought they would be protected. We have seen that Prince Charles of the UK, next to the Throne has been cleared to be infected. We see Prime Ministers, Canada, Spain, across Asia, and many ministers and officials are all infected. Those who do not agree with the new government will be infected. Now you can see the pattern. It is what I call, "Mussolini Law." Mussolini agreed that, if Hitler would not bomb and destroy, he would hand over the nation. This is the technique to do the same. (:32). In a way the central government position has been structured that they decide who lives and who goes, and you have to deliver. This is not hypothetical, this is a fact which we all have to face. Italy is locked down. Officially, one thousand eight hundred died in the last day, unofficially, there are no room in the mortuary and they are moving bodies from city to city. As we have seen truck loads of bodies moving on the streets, the same in other parts of the world. The extent of death and infected are unknown. The tape we played is the celebration of the freedom of the man. Within the next days KF will release in conjunction with those who work with us, a total package for saving humanity, from testing, to prevention, reversal and cleaning up the environment on the level as we gave to the Chinese Army, but in the next step, (:34). that can meet the next stages of the problem. We will not wash the reality of the process under the carpet. As you have seen, the flags of the nations on the Cups, they are from every corner of this planet. We are the only organization that has established itself over the past 15 years to ?? in the society and

those who believe in the ethos of the KF. I wonder how many of you could ever imagine … that you would be given the chance to live by your soul.

will be set in the future.
.. in the space I give you a gift of ..

(:36). … We will hold the Tehran conference next month, if as we planned, things go according to plan. The Iranian KF team is working relentlessly, and are teaching people to help themselves. and the drop in mortality in Iran ,
is by
.. the death toll in Iran would have been much higher ..

.. is evidence that clinical trial by the masses, (:38). has been carried out. In so many ways there is no solution, except the path which has been taken by the Iranian KF. For you as KF people we setup more then, what we call, KF national level, for you to go in and bring your people in and teach them what to do. The biggest problem will be that how far, and to what extent, you as KF Knowledge Seekers (KS) are there to help another man, and not just make 10 Cups, I am ready to go. You make 10 Cups, I have given, and they are ready to go. That's what it has to be, now I am ready, I have all the Gans's. It's too late if they catch (the virus), but you have those Gans's in your homes, those Cups in your homes are useless. You need to put a team and people together. The Iranian KF people produced thousands of Cups per day, and by call they deliver. We do not go for clinical trials. We go for critical trials, where we change things that can critically change the situation in the nation. The pattern of the work, which is carried by the Iranian KF needs to be followed, and in that process we need all to work in that direction. (:40). In a simple way, you start governing. In so many ways, the fact for the freedom of the man stands on the shoulders of the KF KS, we submit ourselves to the dictatorship of how many of us will be eliminated, or we stand tall that we are not there to be and we have what we need.

(Start "Cup of Man" extract here , proof the transcription)
START HERE>>>

To this effect I take the teaching to a new level in a very simple way, and the Knowledge Seekers (KS) who understand will take it to its ultimate goal in due days. You have to understand that the biggest problem with this planet has been the lack, that it has depended man on eating others to gain energy. In fact, the STM was not brought up to the level, to be independent on his own, that he doesn't need the leech of the physicality. To that effect, some weeks ago I released a base for all souls to be leveled, out that it doesn't need the extension, to be dependent on the food on this planet. What I explained in a very simple way is such, go back to all my teachings, "you are the last man standing," and this (situation now) is the last man standing. It cannot be anymore truer then this. It's you. If

you get the Corona, (:42). (and then you go) in a hospital, maybe they can take you through the first one (first Coronavirus infection), but soon you have to go home, and what you do at home, is "the last man standing." But there is one other point with all those who are, "last man standing," our spaceship is floating and no one knows, which man will stand. The spaceship of Earth, at speeds beyond your imagination is traveling across this galaxy, and solar system, with rotation around itself, but no one know in which house, in which room, which soul is allowing its physicality to suffer, due to not understanding, in the coming days, a lack of energy as food.

There was a need to bring those who understand the knowledge, to a level of understanding, of leveling of the souls. That means, you do not need to kill, and this will put, what I call, the KS a step ahead, of the planned mass murder of people, by those who planned to create, controlled reduction in population. In one move, not only have we changed the whole structure of leadership, the government, the financial position, and food dependency, while we bring a new dimension to man. As usual, I walked you through it, and as Corona pushed, we talked you through it. Now I will explain, (:44). to you in a very simple way. Do you want to eat another flesh, or do you want to feed the soul of the man (STM) that it feeds the physicality, and according to that it will adjust itself to every virus, as the soul of the Man's virus is very rare, and the soul of the physicality (STP) needs to be supported. Fortunately, many of you discussed, bought, sold, cajoled with everything.

(Cup of Man teaching:)

I taught you 2 simple things, but you missed as usual, what I gave you (draws 2 Cups). I taught you how to put a Nano (N) coated wire (coil in each Cup). This is Cup 2 (on the left), and Cup 1 (right). In Cup 1, I told you to put a Zn plate (on left side), and Cu plate (outer side). (:46). In Cup 2, I taught you to put 2 Cu plates. You were told to connect in a specific way, your connections, and you were told in a specific way to make connections. Now this, as I taught you, is the STM (Cup #1), and this is the STP of the man (Cup #2). Then for those who understood the knowledge, the 2 souls have to work within the dimension of the physicality, then once you filled up with the water of the life, which is 90% of the body of the man, with the salt, which you added, to keep the salinity, with the level of the salinity of the man, not at 15%, but at an appropriate level, that you understand how much to be. The connection is simple, you connect the souls (N coils together), and you connect the physicality's (the matter state Zn and Cu). (:48). And then with one strike, you connect the two together (jumper wire N to metals). This is the body of the man.

In so many ways, we gave you the freedom, that the STM will interact with the STP of the man. And the STM stays within the embodiment of the operation (draws a ring around the Zn plate), that in total, in connection with the two (draws a line connecting it to Cup 2 and a circle around both Cups), will protect the man from all to come. This is the reason why we showed you the twin (Double) Cups, now you understand the reason. We showed you the Cup of physicality, to protect you from the viruses that touches the

physical part of the muscles tissues of the man, and in the original one we gave you the Cup of the STM. Now you understand exactly where you sit.

If mankind becomes kind to himself, that he can understand this, you don't need to be fed. Would it be the opportunity for the man to reside amongst the two (Cups)? (:50). That in the process, his soul elevation will become the salvation for his physicality. Then you'll understand, no one can ever dictate. Depending on the ratio of drinking, and consumption, in the right order, between Cup 1 and Cup 2, you can feed the soul, that it can feed the physicality, while the physicality feeds itself, controls. If you understand this process, it means there are no free Calcium's, within the structure feeding, that the virus can ever attach itself to the weakest point in the structure of the physicality of the man. You need to feed the 2 souls, that (in) a balanced operation, they can look after physicality without killing, without consumption, and this is how you'll survive in the space. (:52).

The way you will establish this is very simple. You can put as much as you like, (Cup) twos, on the toes, and you can put as much as you like, (Cup) ones, on the head. If you understand, the Zn is higher than the Cu, and in trying to reach, it creates a field, the nervous system, and the physicality of the man will be fed from the fields of the universe. Man's soul will elevate this way, that the animosity of the war and killing will go out of the human's ?? of thought and behavior. It is your responsibility, then, to do the same, then in the dimension of the "creatures of God," be it vertical or horizontal. It is the responsibility of this, (:54). what we call, Universal Council (UC) members, and Earth Council (EC) members, and especially the head of the KF, according to her new status, as she knows, to make sure this planet stays within the structure of safe operation and life, that no one needs to kill. The balance of the numbers (population) will come out of the natural need of the environment, and not by killing, by the decision of some maniacs. Accommodation of the souls, for the confirmation of the existence.

The technological development in the movement of the knowledge of the man will go into fast speed of operation in the coming weeks. In so many ways, if as KS, you chose to be here, and your numbers are according to the international traffics, around about 200 to 250 million, and as there are only 7 billion of you, it is very easy, even if 100 million of you teach, then you each need to teach 70 people, within the next 7 days, or 17 days, or 27 days, you choose, that no one shall kill. (:56).

This is the "Cup of Man," and this Cup, and this structure, as a whole is, and will become expanded, by the knowledge of the KS and humanity, to the level that man will feed itself across the universe. You will not carry Cups of Life. You will systems, which have been fully tested in China, that it will create the condition of the fields that will feed the STM. As I said, we will not take food into space, because in reality we only need to supply energy directly into the STM, and in the soul of the smallest part of the man, his smallest toe. The law that you have to follow in the space, as you become part of the Universal Community (UC), is to feed the center, and in feeding the center with energy, you dictate the extremities (draws a larger black dot and smaller red dot with circle around them). (:58). Then the whole system will dictate its shape. If you look, this is the shape of the

operation of an atom. So you don't do anything, any different. Now you understand why we go into the structure of the matter, and the creation of the universe. The structure of the matter is the structure of the soul of the man (STM), and the structure of the universe, is the dimension of its physicality, how it benefits the soul. Now you'll see a new dimension into the 3 books you have read. This (larger black dot) is the book #1 and this (smaller red dot) book #2 and 3. Where here (line between black and red dot) we are sitting in book #2. Or if you understand it the other way, this is book #1 (smaller red dot), and this is book #3 (larger black dot), and this is book #2 (line between). Those who go this way (first description), understand the world of physicality. Those who go this way (second description), understand the process of the work of the STM. I told you, I would change the course of humanity today. And for those who understood, I have elevated your soul and I have fed your physicality. (1:00). "Thy shall not kill." The knowledge is simple, the field you create in this environment (inside the body), every cell, says what it needs, and the universe shall supply, because this is one end, and the other end shall be found in the universe. The same as these two Cups. We have to increase the salinity in the waters, as you were independent. Now you have to understand, ?? the best production of the fields, and not the material, because what you'll be interested, in reality is this (draws a spiral between Cup 1 and 2), and not what you gather as waters in each, and of the Gans's. You become the one in the middle, where the soul has the energy, and the physicality has the need. In the combination of the operation of the two, you go to sub-sub-atomic materials, (1:02). the man has no clue about. The materials which are needed in the space dimension of operation, beyond the imagination of the man, today. Part of these operate within your soul and your physicality, but you have never been aware of. Man can only confirm, exist, according to what his knowledge extends to understand. If man did not know the Plutonium or Uranium through his education, and development, understanding of the atomic structure, and materials, man would have never found it in his ??. You have to realize that every element on every planet, has to exist, and become part of the structure of his natural life, be it living, or be it part of the operation of his MG field, as gravity or Inertia. Therefore, you'll understand that there is life on every corner of this universe, irrespective of visibility, feeling, touch, observation of the existence of the field flow. There are no spaces in the span of the Unicose that the life does not exist. It is the responsibility of the man to make sure he doesn't trample of any of it. Trampling on it, unknowingly, is not an excuse to do so, but it means that you have to become aware. In a way, think before you move. Before you take another step, (1:04). what am I stepping onto.

In so many ways, I have shown you the path. I have brought the STM to balance, for what this planet could not bring to balance for millions of years. It means all of you start with the same platform. It means that your souls have become equal, and in no different then the other, in strength, and in the process of understanding the truth. With the establishing of the Cup #1, as you call it, I gave you the platform to become independent, though the work of your own, from the physical dimensions of this planet. In that process, with the Cup #2, I supported the soul of your physicality. In so many ways, I have freed man from the shackles of this planet. And what was wrong in the essential construction of its work, within the inner sanctums of its operation. (1:06). Now the choice is yours. Do we stand and change the course of humanity in a peaceful manner, or

do we allow these wolves to carry out their acts. But in so many ways, we had to come to this point, that all the structure of the past would break up, that the new cycle of life starts on this planet.

In the coming days, every nation on this planet, every man and woman will start making the "Cup of Man." In that process, it will take a huge pressure off the shoulders of this planet. We don't need to harvest, and we don't need to die of hunger. We don't need to suffer from incurable diseases, and cancer will be in the history books of the man's life. In so many ways, as we said, the Enhancement Units (EU) become the systems for the universe, and in that process we'll teach you more. Don't forget one thing, I am the Messiah, (1:08). not only for my soul, but this time for humanity and the human race. I free you from the shame and the shackles of what you brought to yourself, when you brought the humanity to the stage of today. All your latest technologies are grounded, and the most advanced technologies are worth nothing, as the nations cannot support. What was written in the Old Testament, was not about that time, but about what is happening to humanity today. That man will come to a new beginning. But you have to understand one point, and that is, the condition that you receive the gift of life, from the Cup of Man, and that is, man will never engage himself in killing another. If your soul doesn't commit, then you'll find out, that the Cup doesn't work, because within the hidden structure of it, this is the "World Peace Treaty" signed by the STM, in accepting. Those of you who will make the Cup and see no results, it means your soul has questions to ask itself. Those who make the Cups and see no results, would, or does that mean, that the soul has been always clear. That it does not need the matter, to confirm its freedom. Don't look for the Gans at the bottom, look at the energy fields within the soul of the system. (1:10). This is what I have been telling you for weeks and weeks. You look for the matter state, and I look for the fields. We'll still go to the banks, make the factories, make the furniture, we still might get paid, but as we are happy, we do it because it gives us a new dimension of pleasure.

In the next 12 months man will enter a rapid development in the space technologies to open the space into mankind, in a deep space travel. In the next 12 months, we'll change the course of humanity. As there are no more funds to run the war economy, developing weapons and defense. We'll employ the same scientists to develop new same space technologies, that bring comfort to man to enjoy the spans of universe. For those who decide the physical path. Don't forget the lifespan on this planet, as of today, has become limitless. If you understood the work of, the Cup of Man. (1:12). Try to understand the knowledge of the Cup, and try not to copy the Cup, then you don't need the Cup to survive in the span of the universe, as I can't get you water in every corner of the universe.

The souls who elevate to the level of understanding the true knowledge, will need no spaceship. That gift has been granted to one, and then to the second in the past few days. Those souls are sacrosanct, and stay clear of all. It's our privilege to give such a gift, and we have given it. For those who serve the KF, to serve humanity. In time you'll know the 2, as they have already been told about their position. As I said, when we established the Universal Council, the members of the Council should be known by the brightness of

their souls, and not by their emails, or their titles. In the brightness, it means giving. In so many ways, the brighter the sun, the bigger giver, the lover. (1:14). When I tell you, "I love you," it means I give you everything I have. Let's see how many of you will love the humanity. Then the bigger test will come when you love the Universal Community.

Try to understand, the simple way, gradually try to replace the energies of the Cup of Man, in consumption of the food and killing. Gradually try to bring balance between yourself and your environment, it doesn't matter wherever you live. If the members of the Universal Council, except 2 who have to leave, as their souls, doesn't carry the conduct of, what the Council is set for, this planet will shine in a different way in the Universal Community. In a way, if humanity works in the direction we have set, the Earth will become a shining star, even bigger than the Sun itself. (1:16). Understand a simple language, and that is, understand the language of the soul, not the voice, the vision, and the others, which the man has occupied himself in the past times. Love through the soul, make children's amongst (from) the STM, that they can last the span of the universe, as the physicality of the man is vulnerable to every changes in every corner, as we have seen with the Corona. Corona means the crown, and this was the "crown" virus man had to deal with, to find the crown of his own freedom. We did not bring it, we knew that those souls in the background have been waiting to do it, to create a condition of more war, and more animosity, and we had to drain them from every finances. Don't forget I am the Master, I tested it, and it worked. In the condition of Northern Ireland with the British Government, we drained the assets of the IRA and the lawless, from the fuel they carried, to everything else that they could get their hands on. When there was no financial strength, we got what we wanted, and we managed to establish a 300 year war into peace, in the Northern Ireland territory of the UK. (1:18). On my passing, documents will be released showing the effectiveness, that we were involved in, the Northern Ireland peace.

The same system has been setup to deplete the assets of the Illuminati's, which is the elite, richest, and politically influential families and people on this planet, without them knowing, in the past months. The damage done to the Rothschild's family is beyond their imagination. All their assets and investments in China was sold for pennies, and in so many ways, they thought they might control China, but they lost it. At the same time, the families that control the grain will find out that man doesn't need to eat, and their grains will rot in the doldrums of their warehouses. We learned one thing from the First World War, this time we shall not let it happen. Those of you who don't know, I explained in a very close way to the Iranian team in the last teaching. Go and search the books and you'll understand one thing, that during the Second World War, not much happened to Iran, but in the First World War, Iran lost nearly a third to half of its population, (1:20). through the hand of the British Government. They wanted the oil rich states of the south, and they brought plagues and they burned the fields, that over 15 million Iranians died of hunger. (That was) a hundred years ago.

Their plan this time, was the same, by those who control the grain, and this is the reason we released the Cup, then man doesn't need grain. This time those of you who use the line of food to control, now you'll bleed to death of your own physicality, in the harm and the pain, which you have brought to humanity. Those who died in Italy are your

responsibility, as much as Gates. Those who died in France, China, Iran and the rest of the world, with this planned disease to bring control, the same as 911, has backfired on you, to bring the end of you. We watched and we took our time. We let you burn yourself, then you have no one to blame. If we do it, we become the Sepah and the enemies, but when you do it, it is your own stupidity and greed. (1:22).

I told you, today's teaching will be a turning point, and that turning point has come. I promised when it comes to feeding man, that we'll setup the order to be done. Now you have it. In so many ways, many of you who know and you learn and how to use this Cup, and the combination of it, in the right order. (It's like) when you see those men who can go in the freezing waters of Siberian lakes and swim with no problem, as they are warm, and you see those who live in the heat of the desert like nomads for centuries. The heat and the temperature will not be your concern. Understand the science of the work of your soul, and understand the fields, which it creates to keep your physicality warm, at the temperature which is your pleasure. Do you need heat, do you need to burn and destroy so much to warm the furniture, ceiling, and the walls of your home, or is it good enough for you, that you stay nice and cozy within the structure of your physicality, when you understand the position of your soul, and the operation of your physicality, in the dimension of the STP. (1:24). Your energy crisis is solved. You don't need to cook, you don't need to, and if you understand the dimension of the totality of what you call, the essence of the dimension of vision of the soul, then do you need the lights on the street. With this Cup of Man (CM) I have elevated the STM, now play with it and enjoy the new freedom. But learn, many of you will loose your life, as some of the habits of man will come in the dimension of physicality, to play the game, in the dimension of the STM, and that is the time you'll loose, you'll definitely loose, the dimension of the physicality and the soul. Then you become that food, from the position of the virus, to the Gans, that it becomes food to the others, you are a free energy. Don't think you do everything right, and it is your right to do, because now, as we free the knowledge, it is your responsibility to be correct with your soul. I am a lover, but my love for the human race has extended to the point, that the physical dimension of it, has more pleasure then the soul of the man's, (1:26). dimension of ??? loving you. Now I raise to the dimension of your physicality to the point, that only you will decide the point of its demise. Lie to me .. I take it; cheat … I take it; steal … I take it. Only one path is left. You give and you live through the right conduct. -- I, as the Universe, and you as a man. --

This was the only way we could bring this mayhem of destruction and killing on this planet, after thousands and thousands of years, to bring the man educated to understand, and to destroy the structures he built, all of these, in the past, that brought the man to this point. From now on, this planet will become a peaceful planet. From now on there shall be no animosity and war. From now on, the promised heaven will be on this planet, as we promised. As the man will create to please the other souls, to accommodate the other souls to be in a better position then themselves, and this will bring a position of comfort and pleasure to live. If you listened to one of the recordings, I said, the "Day of Judgment" will come, not by time, (1:28). but by the maturity of understanding, and that maturity of understanding, the time has come today. Now you all play on the same level field. Now you all play from the same strength of the soul. You cannot blame your

forefathers, no Christ, no Mohammad, no Moses, and nobody else, because now you all are of the same, with a clean slate, with a clean sheet for your souls.

Any questions?
Q: .. You know the diagram you drew on the top, about Book #1, red and black dot. Can you make it bigger and explain it one more time, please?
K- Nope, listen to it. (1:30). Then you draw it and see what you understand.
Q: The second question I have in regards the Cup.. K- This is the second no, you got from me in 24 hours. I never done that to a woman. ..
Q: The 2 Cups you created, you talked about, that some souls will not feel it, because their soul is not committed. The second one was, "the soul is already free", am I correct?
Yes. You decide on its freedom. Q: .. you said some people didn't listen to you and they made the plates straight and not spiral, but in this case (in your drawing), you only made the N coated Cu as spirals, and the rest have to be straight, am I correct?
K- You decide. ..

You see, the reason I did it this way is very simple. I stayed awake all last night on how to teach. And I consulted with a free soul, which I have gifted to one. If you decide to make it a spiral (the Zn coil in Cup 1), (1:32). Or if you decide to make it a spiral (N coated Cu in center). If you decide to make this flat (Cu in Cup 1), or you decide to make this spiral (Cu in Cup 2, facing Zn in Cup #1) and this flat (Cu on outer side in Cup 2).

Or if you change the position to make this spiral (adds a second Cu spiral of different color next to the Cu flat, that is already there, in Cup 2). and keep this the same spiral (adds a second Cu spiral, Cup 2), and keep this flat (adds a second Cu flat, in Cup 1). What do you think the condition will be?
Q: If you make it a spiral in the physical Cup, what's going to happen is, we'll be more bound to the physicality.
K- You are so hundred percent wrong.
Q: Can you explain please.
K- You think why you are wrong. you are matured enough you don't need me to answer you. Q: Because when you make it a spiral, you create all a spectrum, that it exists.
K- Which the STM needs to exist in the realm of the universe. You just look at the Earth.

If you make this a spiral (adds a Cu spiral in front of the 2 flats, Cup 1), and take away this (now he erases the 2 Cu flats, Cup 1, and the Cu flat in Cup 2; then all are spirals now), man becomes the soul of the universe, as there is no physicality, no Inertia. Don't test this, you'll pay heavily for it. Never test this!! Those who test it will see the results of it, in a very horrible way, if you soul is not ready for it. Do not test this as long as you are the citizens of this planet. And do not test this, as the point, that you are not committed to be citizens anywhere in the universe.

This gift has been given to 2 women in KF, they can exist in both dimensions. Both in this and the same with that (draws a flat black line behind both Cu spirals on the outer side of each Cup). Never try, ever, to commit yourself to this (erases both Cu flat and spirals from the outer sides of both Cups). Always stay within the law of the universe,

within the dimension of physicality (draws back the Cu flats on the outer sides of both Cups). This is your skull (Cu flat on outer side of Cup 1), (1:36). and this is your Earth realm (Cu flat on outer side in Cup 2). You have to keep it confined within the atmosphere of the planetary system you exist. This is a spiral (adds a Cu spiral in front of the Cu flats, on the outer side of both Cups), it is the gift to only 2 people on this planet, as they have to understand new dimensions.

This is why we gave the right to women, through the understanding of the Mithraism and Judaism, and then it got lost. Because they are the creator, and in the process of creation, they have to just and correct. These 2 women, in time, they can pass it on, not to their own offspring, but to the one they choose to become their offspring, of the soul of theirs, when they hand over the responsibility and position. (1:38). They will shine like bright stars, and in so many ways, they have a tint of the Creator. Those 2 blessed souls are amongst you, and you will never know them. It took me 10 years to position them, and they have been positioned. Between them, they'll bring change to humanity in correct conduct, and they'll cover the span of this universe, as the Earth is limitless to the souls that have the dimension of the creation, and the Creator. And I warned, if they do wrong they will loose their position. They are the true symbols and the true samples and examples for all mankind in the universe.

The knowledge of man from today onwards will explode, beyond your imagination. In so many ways, we needed to go through this, for the whole of humanity, in one go to come to the point of balance. I shall return in the next few days to Iran, and I'll stay there until we see the full achievement of mankind to the realm of understanding of the totality of the knowledge of the human race. (1:40). On my return to Iran, the knowledge on the universal level will be released to humanity in a very strong and direct way, that will eliminate all the problems of the past and the present. In the world of universe, there are no politics, no political parties, no leaders and no religion. The religion is the conduct of the man on the basis of which we brought centuries ago -- talk good, do good, and think good, the Three Wiseman given to Christianity, but you never understood. We go back to our roots.

(Cup of Man Extract to here)
Proofed to here >>>

Any other question. (1:42).
Q: .. sometimes we need to recycle the cups that we made the One Cup with, how do we treat the soul that we created in the One Cup?
K- If you never empty the Cup, the soul will always stay within it. Secondly, it doesn't need the water for it to stay. Very soon you'll find out, that water is the media for the physicality of the man. Then do you want it with or without the water, or do you want to feed the soul that it feeds the body of the man, and the body of the man creates what it needs, be it the water, O, or whatever. You see, when they said to us, why don't you make gold, then you don't need to do anything. Now you understand why, all the money in the

world is worth nothing, when all the shops are closed. You can't buy any cars, furniture, or even a pair of socks. The government has allowed only 2 things, what they can feed you, so you don't riot and get rid of them, and what cannot kill you, that you don't fill up the hospitals. (1:44). That's why they leave the drugstores, or chemists, pharmacists, or food stores open. They are thinking of themselves, but on the other hand they have no choice, because they are on the same position as you are. So do you want to fill it up with the water of life of the soul, or would you like to fill it up with the water life of the physicality of the man on this planet? When you go to space there is no water, what are you going to fill it up with? There is a lot more for me to teach you. Be happy with what you know up to now that in the future you'll understand more. Ask yourself a simple question, where are you going to find the Cu in the depth of the U, in the balance level of the fields of the environment is in the Cu level, and cannot, it will be as an energy? Then it goes to understanding, the true understanding of what you understand, with the operation of the STM. Rick would you like to play the same tape of the Cups of Life, while you are watching this, remember one thing, (1:46). would you like to change the Cup of soul of yours, with somebody else's across this planet. Would you trust them with your soul, to give your soul to them. Because this question will come to you when you become the passengers of the Universal Systems, traveling the physical dimensions in the spans of this universe. As I told you in the teachings years ago, would you trust the captain, now you give your life to, to fly you. From now own on you give your soul to, to take you to the destination. Let's see what mankind does, or would you give your physicality, as you always did when you became a lover. It's the first time man has a gift to give his soul. Are you that confident, that your soul has done no harm, that when it comes in touch with another physicality, will guarantee its survival, and not harm another. Let's see how many of you will take that step. I mature you in one session, more then is done in millions of years by humanity. We close the books of all religions as of today. (1:48). as from now on we have one religion, and that is to serve the others, and stay to the ethos of "sadosh" (talk good, think good, do good), you'll survive the span of the U and you'll enjoy every second of it, while you exist in it, as long as you decide. From today onwards, you decide the point of departure, and the shape of presentation, and manifestation, and intelligence according to the position that you decide, how intelligent and how you shall be called. As I explained in the very recent past hours, you decide to be in Spain for 30 years, your clothes has been there, and you learned everything to be Spanish. You move and you start as a child in Brazil, and understand how do the Portuguese think, maybe for 50, 60 or 100 years, and change the frock and become an African. If you understood the work of these Cups, as I explained today, the physicality of the man will change dimension, but the STM will never die, until the point he decides to become a passenger of the U, or give to the others as he has had the time of pleasure of existence. I am the Creator. Then I decide what to create with what I have, with what I give. and how we'll create, (1:50). beautiful pasture for the rest of the souls the Creator.

Please play the video of One Cup made around the world by flags.
K- (speaks in background but hard to hear)?? would you make those who suffer …or those who we allow … These are all, Cup of souls, and you use it to save your soul. Are you ready to give it away, to which nationality to which ?? (1:52). .. Have you created

it with a pure soul, with clear soul, that when you receive by the other, it doesn't become a virus to its physicality …
(1:54).
(1:56). (1:58). END of video.

We have seen no flags of Vatican, and we shall see no flags of Vatican with these Cups, because we have terminated the terms of Christianity. The Saudis appear of the nation, the same as the Iranians, and in that sense the terms have terminated. (2:00). Just think, how many Cups you should make, you would like to make, and when you make these Cups, do you remember what I said to you from day 1, pray for your systems, give from your soul. Now you understand the Cup you have made, has made a soul of itself. Let's see if you become the virus to it. or you become the feeder to it, when you gift it to another.
Any other question.
Q: Do we combine the Gans together and then drink the waters after washing, or what is the ratio of the waters, that we should mix from (the CuO), or the Cup of Man for correct feeding. (not CuO, rather it was Cup of Man). So the question is what is the ratio of the waters we should mix from the Cup of Man for correct feeding? (2:02). R- or is that misunderstood, perhaps.
K- I said, would you to be black/blue eyes, and half green face, and be partly Martian and the other part to be from wherever. These questions should not be asked, it means you have not understood. It means you're still physical.
Q: Can I ask a question? K- Anybody can ask a question, it depends if Rick wants to answer or not. Carry on.
Q; You have given the beauty to 2 women, to the feminine, is the masculine, the male, not ready? K- (silence) I will let you think a little bit about what you asked, (2:04). then repeat yourself, and see what you think yourself, about what you asked. Q: I think the male has been in position where they have been dominant .. K- Thinking they were dominant. Q: Thinking they were dominant, yeah. K- They have never been (dominant). Q: So we are not ready? K- It's not… you look at it again from the physical dimension. From the soul dimension, you still need of the two, to be slightly different, that the interaction of the two creates the soul of the U. Two balanced things do not have anything to give, nothing to share. A slight difference in each allows interaction, and that interaction leads to creation of you. Now which one of the two do you want to call the female, or which one the male. And or which part of the emotion, that the other one doesn't have will be needed by the other, which triggers the interaction of the balance ?? We created the "Mother of the Universe" in these two souls. Soon you will understand. (2:06). There was a need to breath or give a fresh breath of life to the whole of the U, not just to the planet. And we choose the Earth. You will see the pattern change in the universal, and many Cosmologists will tell you the change in the structure of the compass, in the coming time. The whole U needed restructuring, from the beginning, and this brought it. As I said, from the beginning time when we (started) talking, I said when we teach and we do, it is not just for the humans, it's for the whole of the U. Everyone in the U has been waiting for that change, for it to bring balance and peace in every order. The name of the two will never be released, and no man will ever know. But the 2 know each other, clearly. It was a gift we have and we ?? The teachings of today will be

written for thousands of years across the U, (2:08). ?? not for mankind. It's not anymore coming down from the mountain with what, "I want to deliver." It came from the U, I gave the two. At the same time for all, not just destroying what was not suited.
Any other question?
Q: How do you "do good, talk good, and act good," when being attacked by religions itself? K- They don't exist anymore, what is your ?? Listen to what I said, in the Farsi teaching in a very direct way and in other teachings, no religious leader will accept the new change, because if they do it is the end of their own abuse, and termination of their term. (2:10). So they all have to fight it, and deny it, but this time we take the souls away from them. You have seen, how so easily, within 2 weeks we shut all the Churches. And do you think that people will forget. in a way, I lost my son, I could not even bring him to the Church to get a blessing to bury, or my father to the Mosque. They are all shut, the house of what they call, the God, or what I call, the temples of statue-less abuse. We can trust those who are there in the time of need, and don't run away, .. closed the doors on humanity in the time of need, ?? statue. Do you remember people used to flock to the church, and they used to closed the doors of the Church and Mosque, and they were safe. But this time they run away out of it, because if you try to ?? in there, if you got a virus in one, the whole lot are dead. You don't even trust your own soul. But you don't need to walk into a problem, stay away from it, (2:12). don't bring it home. The religious leaders will object to everything (we do), but ask one question, where were you, when the Corona came? I said in a couple of teachings, across from where I stand now, I am looking at it now, there is a very big church, with a big cross on it, and it used to be lit every night and day. Strange enough it used to make noise every quarter of an hour. The cross is about 20 or 30 meters high. … and it used to be lit, the past 2 weeks it has not been lit. The god is gone and he has taken his light with him. In a way, they don't call so often, because what do they call, because the doors are closed, .. I think they realized that, they are not there to give, so we had better go. (2:14). When we moved into this place, I had a huge problem with Caroline, she said, I don't want to live near a church, every half an hour and hour, there is a noise. Now she got her wish, the church shuts itself because there is no one to go. It still makes a few bits and bumps, but the every 15 minutes ritual is gone. Why do I call you to meet when I am shutting all the doors. You'll find out the same will be with militaries, they will shut down, because as I said, it's like what can you do, the soldiers are not prepared to go out. In China, if they didn't go out to kill people who came out (of their houses), it was very straight forward. You follow the orders and you shoot those who come out to infect the others. It got to the point that some soldiers thought for them to be shot, then shooting others. What we said in Wuhan city, now there are hundreds of recordings of it. When they opened the city, and the apartments and houses that they locked, how many do we see dead. The whole family, and don't forget as I said before, a Chinese family nowadays is only 3, and they took the whole family. (2:16). There is no sign of the culture, centuries of knowledge, which was gathered and to be handed down from father to son. The leaders wiped out the ?? … the beauty of it is. ??? The leaders of the world abandoned their citizens, and so did the religious leaders. They all abandoned everyone. The German Chancellor is house locked. By international law, when the leader is incapable to do his duty and be available to his nation, he has to step down, The problem is, we can't run elections when the leaders dies. We can't run election to choose the leader, because we can't go anywhere to even to campaign, unless

you do it on the Internet, and then vote ?? that's everything they done to us before. So as you see the humanity is running itself into the ground with all the laws and systems made. China will lie to its citizens, and they thought it is gone. Now we are going to loose many Chinese with the new virus. The new version, mutation of Corona, and they will not report it. As I said before, the only way you will know the real number, (2:18). of people who have died through Corona, is when, and if, and how the election comes, and then you count the number of people who are eligible to vote. Then you'll see, because you can check the votes. They can't put the dead people on. They did that in Iran a couple of elections, to cheat, and they have done that in America. But you'll understand the true figure of how many were lost to Corona. Watch on the 7 digits from the end Watch the last 7 digits. In, let's say, 10 or 15 years, if the mankind doesn't mature to be able to create children of the soul, and still carries on with creation of children of physicality, we will see the figures will go to about 10 to 15 billion, may be more. Mankind now has a choice to create children of soul, or children of physicality. There are very few races that have that opportunity. But don't forget, there is a lot to learn before you mature to that point. (2:20).
Any other questions?

As I said before, you thought you have been shocked by the teachings of the KF in the past 15 years. I think you'll have your biggest shock .. and at the same time you'll have your biggest education.

Mrs. Mohammadi (MM) asks question in Persian? Yes MM, the savior of the Iranian nation from the Coronavirus. What she is asking… MM is a master in English, don't take it, she knows what she is talking about. (2:22). She understands, in so many ways, she says, when we are in love with the Creator, and we feel the Creator is in pain, what can we do to release Him from His pain? This is part of the process of the creation. We suffer with our children and then we enjoy their achievements, that is all that it is. This is the natural process in the U. Not much can be done. As we say in Farsi … be good children that is all the parents expect. .. (2:24). MM literally works around the clock. She has gathered all the Iranian team, and we haven't found out when she sleep, yet, or if she doesn't go, and how she gets to be involved in everything. A lot of people don't like it. But she has managed to change the course of 1,400 years of Iranian culture. As I said before, in Iranian culture, women are supposed to be around the house, and she has become the woman who is running Iran at the moment. She is doing more than the Ministry of Health, she is saving more lives then anybody has done in Iran with her team, and if I tell you what she has been up to in the past 24 hours. It will shock you. MM how many breathing systems have you made to be delivered to the hospital today, in the past 24 hours, yourself and your team. She literally sits with a team that makes a 150 breathing systems, as the KF has now been given a hospital with full supervision of the Iranian government, to see how we changed the position of the hospital without them, we deliver the breathing systems, (2:26). and the Cups, syringes. When I sent her the message, she sent back, ha, ha, this is no problem it will be ready, don't worry about it. I thought, oh, somebody is doing it, then I found out, that she is actually with the whole team up all night to make sure all of it is ready. Interestingly enough, they have achieved a lot. Everyday the Iranian team delivers, even when they found out what has to be done,

they don't tell us. They just make Cups, and give Cups. Thousands and thousands of Iranians are receiving Cups to save their lives, freely from, the man off the street. I have an emergency case 2 or 3 nights ago, at 5 AM. Five families got hit, all, the grandmother, the children, the grandchildren and all the uncles. It was literally one generation of the whole thing. One of the boys was isolated and the wife was already infected. I called and said, what time is it, MM, about 2 AM, European time 4:30 AM, I said to her, I need 5 Cups to be reached, I received a request, and I want some Gans water until they can make it themselves. And immediately, it was delivered by courier, and the funny thing is, that as the help came from outside Iran, the numbers were back to front, they managed to understand that it was translation conversion, and they delivered. (2:28). We found out the man, the husband with 2 children was isolated in the back room. The doctors said they could not do anything for him, he was fully infected and the chest was already calcified. A child of 5 and a half, a young wife of about 28, and he was waiting to die because they could see no solution. All the brothers and uncles living with them above on the next floor, were all infected. The minute the Cup got there, within seconds, I didn't need to call, it's just there, and I called, "how did you know?" I said, I don't need to know, I live within your soul, I feel your pain. He said, it's here, I haven't even opened the package, we just ran ?? above. I spent maybe 2 hours with the family. I said, we'll isolate the first one, and let's see how we can save the life. I said, what to do with him, until lunch time, or dinner time, when he can go through it. He said, I can breath now. I don't know what is in this water, but I can breath. I said, to him, I want to ask you one question, I said, if you have been in this condition for nearly 10 days, and they isolated you until you die, breath there is nothing they can do, until they run out of breath, and oxygen, then they take them to the hospital for the last day or 2. They give them oxygen until they die. That is all they can do. (2:30). He said, my coughing has stopped, my temperature is gone, now I can breath, and that's good, I can speak out again, I can hold my children. He was so happy. If you are an Iranian father, you know how precious your children are to you. It can't be explained, it is something in the Iranian culture. They are your life, and when you don't touch them, you loose life. I said, I want to ask you something, have felt any pain, anywhere else then your coughing. He said, I have a pain. I said, have you had any pain in your testicles? He said, for the past week, but I didn't want to say, I thought it was impolite. I said, you got ?? white all the way through. I got up to make Cup #2, immediately, it was made within a couple of hours, I taught them how to speed it up, and we wrapped him for 3 hours and then 6 hours in Cup of Life 2. When I called back, he said, you know something, it is the first time in nearly 10 days that I have no pain in my kidneys. I said, what do you mean? He said, my kidneys were killing me, and now I have no more pain. I live without the pain. We went through the whole process, then I said, we want to understand what is happening in the whole family, because we isolated you. Now we know you are on the path (of recovery). They sprayed the wife, and they gave the water from CL #1 to the whole family and they sprayed. (2:32). The wife said, I have a pain in my chest, and my right ear and head, it's burning, and we knew, that the family would have lost the father and the mother. We started the process and hopefully by today .. One fast movement by MM working months before, making things ready, they have 1 to 200 Cups ready that they can go out with, but they never know, they made the breathing systems, they just give the Cups, but when people have a problem with breathing they send a breathing system with it. We have saved a

family, most probably 2 children if they survive the Corona, instead of memories of the mother and father, where now they have the actual father and mother and grandmother. This is the difference, and this is where humanity comes in. If you see, from where I sit, many times, I sit there, this is what I do, as a backup team, I pickup a few here and there, when I see. Even the doctors are struggling, or they don't go into the main Chat Room. They send me a private message, and they get picked up. I do what is possible, what they are doing. We have saved many lives in Iran in the past 2 weeks, and thanks to MM. We just advise, she delivers everything. We had an opportunity in one hospital, which came through one of the key members of the KF, (2:34). and we took it up. The doctor, he has tried the Gans on an old lady, and the oxygen in the blood went up, and he said, I want to use it, I can't so anything else. When I spoke to him, he said, you know Mr. Keshe, I am a doctor to help, the only thing is, they can take my license away, at least I save a life. I want to do it. That doctor and hospital now has become the center for the Iranian nation for ?? Corona. We are all in it. It is totally blocked, but the KF can deliver, we are allowed to go in, and now we can see what happens. We have cases improving, the government sees the work, they are monitoring it. The work of MM and the diligence of the KS in Iran trying to help, has paid off to save a lot of lives. Because these 120 people in this hospital, it was very strange, when I spoke with the doctor the very first time, he said, all my beds are full with Corona, I have no room, and we have 100 people outside, because we can't allow them in. We send them home, they can keep themselves in the house. When they started it, we gave them the procedure to do it. We have videos of it. Yesterday, I noticed that there where 3 or 4 beds empty, it means they have discharged all of the patients. Now they are calling the outpatients, the ones who are dying at home more or less, they call them in, (2:36). and give them part of the Gans that we gave to them. Now they call them in and give them the CL and everything they need to the whole family. Now we are not just saving one man, we are saving the whole family. This is how the registry of Corona will be written in Iran. ?? We have 2, actually 3 women who are serving relentlessly. Now the Sepah, and Iran's central government, and the office of the Ayatollah, the Military, the Health Ministry, are focusing to see what is the result, because now they are controlling everything, and in this environment in the next few days, and if successful, now it will become a success city of defeating Corona, up to ?? This is how we'll respond, the whole of the KF doctors, the support team fought this way, relentlessly. People start coming into the Chat recently, they send messages to all the support team. All of you need to setup this up (in your countries). Unfortunately, the Iranians don't speak French, German, Spanish, Pilipino, of South African. You have to set this up the way we Iranians have done, or as suggested to the Iranian government, we set up the Sepah, and we deliver full T, (2:38). into the hands of the (nations). As I said, you put sanctions on us, and we give you our love and care. We never closed our doors, it is not the tradition with the Iranians. We are very hospitable people. We love and worship our guests. Now as I said before, as the world and you are our guest, ?? In so many ways, we'll deliver the solution, and with the solution we'll find a new way of living, at least for the Iranian nation. Then it depends, on how the ?? others will follow.

Any other question?

MM speaks with K in Farsi .

(2:40).

(2:42).

.. We are talking about the culture of Iran. In Iran because the KF team is so successful in delivering, the Israelis, British, and Americans have now started the game, that the KF is only looking after the people in Tehran and Farsi speaking. This is the way it is, because we opened the hand of the people who created division, in the Iranian talk on Monday, and now they see that we have become so successful, that they have started the rumors in Iran that the KF, (2:44). doesn't help the Arabs, Kurds, and the rest. The worst thing to this, actually is, with the request of the KF Arab speaking UC member, she has for every nation, Arab speaking, and Arabs, and the Iraqis in Iraq, requested that a Kurdish language KF Corona team be established. We are supporting in every language. We are requesting the KS ?? to do. So these people, now seeing the success of the (KF), actually seeing and exposed the way. Now they have come up with a tactic to create a division. This is very typical in Iran, they start the rumors that these are Bahai's, or supporters of this and that, when they see success, because they get paid for it. So now, I told the KS in Iran, to ask them to show us your bank account in Tel Aviv, Washington, and London. Because you have to understand, we are controlling the number of people who are (from getting) ill. We don't even need to give them, they are making the Cups themselves. It is amazing how many women are doing it in Iran. Because you have to understand the reason, in a way, because in the Iranian present position, due to the defense of the territory of Iran, every Iranian male has to go to the military to defend the territory. I wish this will come off. During the Shah's regime we were safeguarded ?? and spending on developing and educating people, but now they have to stay in the Army for ?? to protect the border. (2:46).

The other side of the world, they brought the border to our border and say, they (we) are trying to fight, but it is very interesting, there is the map of Iran, and there are so many American bases around it, and they say that Iran has come to fight. You come 20,000 kilometers to put bases (around Iran), then who is wanting to fight. These people, now that they have seen the success, are trying to split the KF, that they are only looking after the Farsi speaking this and that, which is just another way. Like the guy who went to the UN and said, "get rid of Israel and the rest of it," when in fact, he went and collected his check from the Israelis, for his bank account. Nobody betrayed Iran as much as Ahmadinnejad. Now we exposed him in the talks in the last few days in Iran. And now again the Israelis coming into operation to now directly attack the KF for the help we are giving to the nation. In the process of the laymen going to be under arms, the ?? in Iran has had the opportunity to educate women, because they can't bare arms, or go in the military. So men train in (the army) and woman go to university. So 70% of the educated and graduated doctors in Iran are females. They are all engineers, and now we see it, in the Chats. All the people who are making the Cups, it is shocking, when you speak to them, ?? they say I made the Cup. We are used to the men asking how to connect the Cups, the Europeans, Chinese, but the Iranian women all being educated as engineers and technicians, they are making it themselves ?? everybody else. (2:48). And it is gorgeous when you talk to them, they know everything scientifically what they are doing, and they just ask, 'can I do this or that'. It's a pleasure to work with them.

Now they have come to split the KF. When some organizations try to split (you up), it means you have become powerful. You have made a wave, you have created a condition. As MM was telling us, they have started these rumors that we are not helping the Kurds and Arabs. We are all Iranians within this planet and just within the territory of Iran. As I said, recently we received a call from an Iranian family in US, and immediately we responded. We are receiving calls from Iranians in Europe and immediately we respond. they come to the Iranian Chat. Some of them don't even read Farsi, they were taught by their grandma, in broken Farsi alphabet, and you have to guess what they say. I have had 2 or 3 of them and I try to read to them, but hey say, I don't write Farsi. Because the carry a Farsi name they are Iranians, it doesn't matter where they are we cover them, Canada England, US. You will see this, that what comes up in the next 2 or 3 days. Hopefully, the Iranian ?? officials will release the KF technology as one of the alternative, not the only one, then when we reach the world, we'll solve these problems for your governments.

Because, once the Iranian officials announce that they have achieved this, (2:50). to go through this condition (of Coronavirus), then the rest of the world will be informed and it will spread rapidly. We have done so much, MM and the Iranian team have done so much, now the Iranian government is to do "Due Diligence", in the next 5 days, most probably 7 days. They are doing the "due diligence", on all the cases that we have submitted. Mrs. Mohammadi and the team, I think since last night they haven't slept, because they are making the Cups and everything else. We are putting all the files, we are asking all the Iranians who used it to send us their information to give to the government. We are putting 30 to 40,000 cases, whatever we can, sending them to the government. We already have the hospital. We are doing all the groundwork for you across the world. We will bring the technology out. There is no alternative. And the Iranian office of his Eminence Ayatollah K, the Iranian leadership, and the Sepah, and the heads of the forces. Now at the moment, as of yesterday, we have gone through what we call, "Due Diligence." They want to see case by case what it is, and they'll call every single one to confirm it. Once the due diligence is done, the Iranian government will announce, and then I will return to Iran, and then we'll give it to the rest of the world.

The European nations are in turmoil, so are Africans, and leadership needs to be taken. The Chinese have stepped down because it became an embarrassment to them to say, that they stole the T, but the Chinese will back Iran, and Iran will lead the Corona fight across the world. (2:52). We'll take it to the next step. The Corona will be for us, as I said, the way to enter into deep space travel, and opening of the new dimension in the new science and T, because there is no need for war. We can't put 30 to 50 million elite educated scientists around the world, who have been designers of arms and sophisticated communication systems, on the street. We give them a job, that is, to take man into space. Change the direction, and then we see rapid development. Space and spaceship development in the next 12 months, if we go through this phase of due diligence with the Iranian government, in the next 3 days. The Iranian government has given the scientists and military until next Friday, to clarify the position, and especially in regards the KF T. We need to know. By next Friday, or maybe sooner. If the wish doesn't go accordingly, due to the pull of the governments outside of Iran, which we think, some of the leaders

have already opened an American bank account. In the interests of the Iranian nation, we will go national and then international. Then all these budgets of warfare, will be used for peace. And all these scientists, can you imagine, all these guys, who come up with all these rockets and now we tell them to measure the fields of such and such a planet, and how we can there, and this and that. We have all the systems, it has just been used for the wrong purpose, and with this, the end of the wars, as we said, we'll change it to the right way. (2:54). Then we'll see, in the next 7 days, the decision by the Iranians Central Office of the decision of Ayatollah K, will change the course of humanity. You will see it. You have no answer in Italy, Germany or US. The only answer you found in America was to buy guns. I wonder how many of you will melt them? I wonder how many of us will destroy our war museums, because we don't our children and grandchildren to see what we have done to ourselves. And the war museums were the place we took them to look at that, the submarines, and the B-52. Would we close the war museums, which is the shameful part of the life of the man. I think it is not very far. Just let us go through the Due Diligence by the Iranian forces, and government, and then we'll see. Unless we get blocked due to certain positions, we know we already have seen it, and MM has told us that the Israelis have come into Iran and are spreading these rumors, with American bank accounts, and it comes from 2 offices, because you have to understand, these people have to answer, why a nation which is so loving, so caring, a nation who brought the Jews and Christians to Iran and gave them a city of their own, has to be the nation which Ahmadinnejad is going to destroy the nation we built for them. It doesn't fit into the mentality of the Iranians, (2:56). unless you have been paid to do so. If you remember, I said, Ahmadinnejad used to come on the podium of the UN, all the members of the UN used to walk out, because it was agreed, that this was a rehearsal program. Well rehearsed, I come and you go. The bank account check should be on the table when I come out. Because the Arabs and the Palestinians, some suffered, and the leaders in other nations bought arms. The commission collected, was the arms sold to them. That's why they were paid. Some people go and sell arms, and some people incite wars and get paid for it, and ?? It's very clear. Now you understand how you were made to hate the Iranians, because they were paid to ?? Iranians ?? to do so, and the Americans. Now we open a new history.

Q: .. When you talk about making the 2 Cups we should not make the 2 last (end) ones spiral because if we … K- No, no I did not say anything. You make it yourself. This is .. Q: No you said, don't do it because if your soul is not ready…? K- That is your decision, not mine. Q: Okay I want to know… that's not my question, … K- I am not going to answer and I told the team, what whole of you, never answer anybody of you, (2:58). ask a question about a spiral, flat, whatever, and whenever. From now on it depends on you.

Q:.. my question is not about this, can I explain? K- Yes. Q: when you talk about this. I was told to go to India for a program, and before I go I was told I have to practice certain sadhana (spiritual practices), I have to do it for 3 hours a day in the morning and 1 hour in the evening. Twice I was on 2 months with no meat or dairy, they said if you don't ?? contaminate your body it's a bad program, you actually can destroy your physicality and your soul can get damaged. It seems your body has to be ready, physically aligned, and your soul has to be aligned, that when you take that, whatever you make, so that you can

elevate. If you are not you can damage? K- It's not damaged, it's ?? can you reach the maturity of your soul. That's what it means, it's no damage, it means, by doing so, would you reach, would you allow your soul to reach your maturity. It's not penalty, those times are gone. You have to decide, are you ready, or would your soul be able to accept the cycle. Q: Thank you, I got it. K- ?? to explain things to Alzar. Iranian women are not easy to easy to satisfy with the knowledge, but once they understand, they run with it. (3:00).

Any other question?
Q:

muscle tissue mutation

K- Where are you from and where do you live? I am from Iran but I live in Cyprus. Oh the beautiful island
speak in Farsi ..
(3:10)
(3:12)
(3:14)
info @keshefoundatoin
(3:16). K- I'll just briefly to tell you what has happened.

(3:18).
Any other question
Q: Meridith Iran .. (she is locked down in Paris) …
.. You said that in the U there were some travelers, which came and (3:20). made ?? hurt the race of people of the Earth, that the need of these people, that aid is coming for us. I wanted to know is that ?? quantity of time that they said this should happen on the Earth, or the quality of ?? that make the time being sooner or later… K- I think that time has arrived. Q: How about the people who came and told about the suffering of people ?? prophets or scientists? K- We, as Rick read the paper about the station of scientists. The problem with the man is, he has 2 weaknesses. One is the physical weakness, and one is psychological weakness. The physical weakness leads to his demise, and psychological or emotional weakness leads him to any path of belief, to support, to confirm that he exists. We call it, religion. Once man becomes strong in understanding the process of the 2 is the same, man will become strong enough to be able to live across the U. Up to now there was no way, we could separate man from the problems of his birthplace, (3:22).

(3:26).

(3:30).

(3:34).

.. We received a threat from Mr. Gates in a very direct way, we have the recording. That we are going to report you to Mr. Gates, we're going to shut you down. We are going to stop all your activities in the country. Why, and organization like KF, who is there to do. Because Gates has paid everybody, he has paid all the bosses. And he is a senor banker. We'll release his name and details, and then you'll understand. Gates is making threats to everyone, because he is positioning himself to become a world leader. When we tell you things, it is not just to talk.

(3:36).
… Stephanie do you want to talk. How are you feeling now? S- I am feeling much better. K- Do you still carry the pain? S- …
(3:38).

(3:40).

S- I have a friend she is a nurse in hospital, they have a lot of deaths ..

.. The funny thing is the German law now, (3:42). not more than 2 people can be together at a time. What happens when you want to go see the uncle, do you leave the children at home?

(3:44).
S- They can't keep up with the burning of the body.
.. I think at the soul level people are getting together, .. K- I think this unity will, (3:46). come internationally. .. Because the Chinese created a false sense of security and it is going to bite them very heavily. They are trying to show it. But in the west we can't hide it. I think in Europe they're saying 10% of the total. I think in Iran the officials are saying 1.3 million Iranians will die. … they estimate 800,000 to 1.3 million. We are working with some European nations that we are successful, and we'll carry on the same collaboration with Iran through. Then we'll take to Germany and France, Italy and the rest of it. Q: Caroline I have a question. … (3:48). There are so many people getting demised, so called cleared … but that is a false image isn't it. K- Cleared by whom, what? Q: Cleared from the hospitals that they have no more symptoms. K- They did that in China. .. But in Iran when they go home they do so with a bottle of Gans and a Cup of Life. This is the beauty now we started in this trial in Iran. Because now you know that they'll never come back. Q: But my point is that the people who are getting cleared …

.. There is a very tricky point with this virus ..
you give it back to me in a worse way. (3:50). This is how the virus is mutating …

You have to support the body with high energy .. not sugar ..
it goes the whole neural system ..
(3:52).
.. This virus is taking its toll
.. fry the date and add egg to it. That is one of the most

(3:54).
. When you take the CuO, you should not taste the salt, if you taste it, it irritates the throat and you keep on coughing. It's just to be one or two drops inside (this is for protocol and you add salt to the water only 1 or 2 drops), that you don't taste the salt. If you haven't washed your Gans's thoroughly, that it has some salt in it, don't touch it, the water has to be sweet. You put in, it has to be the water you drink. Then you'll find many of you, because these Gans's are very strong, very strong, energy wise, you'll feel the irritation in your throat, or in your lungs. Take cooling foods. In Iran we have certain flower seeds they use. The Chinese do the same. You need something cooling to reduce the pressure, and you'll see the whole thing gone, the coughing gone and everything else goes. But you can't stop the process until the pains are gone, then you follow the process for a few hours afterwards. Then you step down to once or twice a day, and you keep on testing yourself. We see the Corona now, something like 4 to 5 weeks ahead of what you see, and the press covers, and the government covers, (3:56).

(3:58).

(4:04). about vaccines…

about history of flying car and etc..

(4:12).
radiation

(4:18).

Try to take as much Gans water as you can in small sips, so you body can absorb
(4:20).

Any other question. Let's call it a day. Thank you very much for today. Please if you have had experiences with Corona record it and give to Iranians …

(4:22). .. Q: I have known the T for the past 4 years, and started using it with my son with hyperactivity. …

.. My question is, (4:24). you have said not to use dynamic reactors. ….

.. In the next step, if we do not see the changes
(4:26).

.. Follow to the rules of the law. .. I hope we have a better news for next week. If we get approval we'll have an emergency meeting ..
(4:28).
Video of Cups and KF Flag ..

END

322nd Knowledge Seekers Workshop - Thursday, April 2, 2020

* Coronavirus solved by Iran,
  Corona mutation leads to massive Cancer.
  Elevation of soul by Cup of Man worldwide.

ENGLISH TRANSCRIPTION:

(:09). .. Hopefully, as all the times before, we'll add to our knowledge in a different way and in different times, and concentrate on what we call the topic of today, the science needed for that time and that age. At the moment as we have been gripped in this Corona situation, every effort is being made in every direction, by all the nations, by what we call, the scientific world to achieve, or understand the breakthrough. In this process we are one of many, we are not the only ones. We are doing, what is called in African language, our level best, to be able to help, at least our Knowledge Seekers (KS) and many others. As you are aware, we worked heavily with the Chinese government and authorities, and once they were given the Cup of Life (CL), and then (it was) explained to them, and when they saw the results, then they went and took the technology (T) back into the Military, and they brought it out in a different way. They have managed to curb the situation using the T, and in so many ways, if the Chinese authorities would have been more open with us, we would have stopped many more deaths. But the openness with the KF in Iran, has brought that situation. We are in so many ways, a few weeks ahead of the others. (:12). Maybe we can stop the suffering of many more. In the situation with Iran, we have managed to clean one city, one hospital, in Iran, totally of the virus.

This morning, most probably, there will be no more Corona patients in this hospital, for the first time, we hope. The emergency room in this hospital carries 10 beds and it was full until we got in. Now, there could be only one person left, who could leave most probably today or tomorrow. We have lost no doctors or nurses, as far as we can see, no personnel in the section of the hospital, has been effected, and with the support of Mrs. Mohammadi (MM) and the KF, supporting in Iran, we have taken the illness into outpatient level. This means when the people come in, they are diagnosed, and are confirmed, they are given a CL and a bottle of Gans Water, and now the doctors diagnose if it is an upper or lower infection, then the patient has the option to the second Cup (Cup #2). The beauty with the new way is that, before the patient was told to go home, and literally they would die at home.. Because if they recovered or not, the rest of the family would get it, as we have seen in Wuhan City, when they opened the buildings, which were locked up, and all the members of the family are there. (:14). In Iran with the

spreading of this CL, with the Water, through the hospital, they had over 100 patients in their homes, locked down, and they were infecting their families. With the CL now the whole family is getting support. As such, there are no more new patients coming to the hospital. The city is being announced to be clean. It was announced by the Ministers, or officials in Iran yesterday, on the national television. What we are telling has already been released, and they have mentioned the name of the hospital and the city. So for the first time, the KF work has been recognized by a government. At the same time many more hospitals are going under the same cover in Iran. We expect a national announcement by the government officials in respect to the KF T in the coming days. A close collaboration between the KF, MM, and the KF team and the Iranian officials at the highest level is gathering the data, confirming the outcome, and shortly, if they are happy with the whole structure, it will be announced as one of the alternatives that the government will take with the nation. The beauty with this is that, everyone can help themselves in the house, in house, and we can take it to new procedures.

The Protocol, for effectiveness in Iran has changed, in a way that we go for rapid discharge of the virus from the body. (:16). At the same time, you might have seen videos, that in Iran, individuals have taken in their hands to wash the streets and towns with the Gans Water. The KS in Iran have seen the results. The KF, one of their (Internet) links to public has passed 29,000. We closed it for some time, to not increase the numbers, because the support team could not handle it, and it has been opened in the past day or two, and total it is estimated that we have reached 1 million Iranians, right across Iran, and many more. It has been said, that one of the reasons that the death tolls in Iran has been reduced, is due to the KF volunteer teams across Iran. In the past, if you had the disease, or died, or got infected, you had no choice. Now, the people who are on the end choice, who know they are infected, and are locked down, they come to the KF. They help themselves, and then they make many more Cups for many of their families and relatives. In this cycle we have taken the edge off the top of the death rate, through the new T. At the same time we have seen a rapid drop in the death rate. The Iranian government has not managed to curb the growth, but even with the growth, we have no more death, as such, very few, compared to what we see in France and Germany, Italy and the rest. The Iranian government officials will open the T to all the government across the planet. The Iranian officials, military and the Sepah, will deliver the T on the official levels, (:18). to all the nations. In that process we expect to curb the whole process of the Corona, by the end of April internationally, this is the aim and the work of the foundation.

In the next days, an official scientific paper will be published, the first time ever by the Keshe Foundation with the support and full understanding, and peer reviewed by the leading scientists in Iran. As a scientific paper, which is ratified and confirmed, going through the whole process. This paper will officially put the technology of the Keshe Foundation on the map, as a major breakthrough in the world of science. The Keshe Foundation team have been relentlessly working, and the scientific team in Iran, have been more or less calling many, people who have used (the technology) to confirm, that the nation was used as a clinical trial, and has shown success. Usually when you do clinical trials you have to find patients. This time, due to the effectiveness of the

technology, the whole nation of Iran was used, and the data provided by the Keshe Foundation, that the ministers and the officials can call the patients on their line (phone) and get that firsthand, direct knowledge, of who they are, what happened, how they were treated, and the forms have been filled in to confirm. So the Iranian government has used the Iranian nation, who volunteered themselves, using the Keshe foundation technology as a national clinical trial. This has never, ever happened before. At the same time, many Iranians, and outside Iran, (:20). have used the technology, using the Iranian channels. To that effect, all those who are non-Iranians, but who were given the form, in the past few days, to fill in and return to the officials in Iran. To show that the technology is used across this planet, and for this reason, the Iranian military officials will take the lead in spreading the technology across the planet, but we wait for the official announcement. As yesterday, two of the highest-ranking scientists and officials, have confirmed that Iran has reached a new scientific breakthrough, a major scientific breakthrough, and we all know as knowledge seekers, this knowledge is in your hand, has been in your hand and many of you across the planet have used it.

At the same time, in communication with the White House, through the officials, through what we call, the advisors, military advisors to the American government and this morning to direct communication with American officials and embassies, we have offered to clean and help USS Roosevelt of the 200 corona patients on board. The offer has been made very direct. The Iranian military will attend with all the equipment's on board USS Roosevelt to help the American soldiers. This has been officially ratified, and we extend this to the American military across the planet. We are not anymore enemies, we are friends in arm against Corona. We expect a positive answer from the American administration and office of the President Trump. Lieutenant General Michael Flint has been approached by the Keshe foundation as a personal advisor to President Trump, (:22). for a direct decision by the White House. We are very open in this case, as the Iranian military personnel's will attend, and will be available to help their colleagues and across USS Roosevelt, as many of them will die. 5,000 soldiers are on board with 200 confirmed, and it can spread. Within seven days we'll return the nuclear base, what we call ship, back into the hands of the Americans, cleaned of all viruses, no infection, no personal being affected by the Corona. Open play … play again.

We will take the same procedure (with other nations). We have already informed the administration of the Austrian government, that this technology will be offered to the European nations, by Austria, through the Keshe Foundation Austria. In the next few hours, this offer, with a full support, will be offered to the Prime Minister of Austria for the European nations. All through the direct dialogue between EU and Iranian military officials, for transfer of the technology. As we said, we all played a game, and now is the time, to benefit by the game we played for the past 10 years, sharing the knowledge freely across this planet. We needed the support of a government to back the Keshe foundation and show the track. I would like to thank the office of his Excellency, and his Eminence, the Ayatollah Khamenei of Iran for allowing this to happen in Iran so openly, that we could help the rest of the public, not only in Iran but beyond the borders of Iran. (:24).

This technology in due course, if we receive rejection from the White House, will be directly delivered to the Governors of Arizona, Florida, California, and Washington, and to New York City. It's the decision of the governor's to override their president, if he makes the wrong decision, through his own personal vendetta or feeling. The Iranian military and the Keshe Foundation, will stand solid behind the American nation. I will transfer the technology across. The next step after this, will be the development of the space technology collaboration with the Iranian government officials, and most probably the Americans, and the rest of the world. We need to build trust, we need to build friendship, and we need to build, through Corona, a new direction, a new change for humanity. We have asked for a direct face-to-face meeting with American officials within the next 24 hours, to discuss, how in step-by-step, we can build back trust and the friendship, be it helping American soldiers on USS Roosevelt and many other ships, which the Americans are affected. Technology will bring peace, but the peace has to be understood, that it does not become another step, for another animosity between nations racing towards new knowledge. In so many ways, we have to understand more, how to build, how to do and how to extend. (:26).

We have in a scientific paper to be released by the Iranian officials on behalf of the Keshe foundation, in the general publication, within the next days. It will clearly state what we see as the Keshe Foundation, the way to handle the Coronavirus, the way to overcome it, and the way to foresee the future problems that this virus will bring. In the past, viruses, where only, and only, viruses. They damaged, gave the flu, they killed, and they were gone. With this technology, and with this new effective way, we should not loose around 1 million people every winter to flu epidemics. This is a solution to another cycle for long term problems with viruses. At the same time we have to learn, that this new virus, according to the scientific paper to be published in Iran, would explain something very drastic. If the governments do not understand, and if the governments overlook the long-term processes and damages of this virus, we will have more deaths in the coming months and years, from this virus, then actually, the virus is doing today.

This virus, as I explained before, has very specific characteristics, which we've never seen (before). (:28). In a span of the universe we know how to handle it, but for mankind this is unknown. This virus, in finding a cell and attaching itself to it, it creates an interface with material and the illusion of atmosphere. What we have seen in this virus, as we all know, at the center of all cells on this planet there is a calcium in the form of energy, not in the form of a solid. In interacting with this, as many other parts inside the cell, this energy has managed to change this to a calcium cell. Understand, that this virus energy interacts on all levels with the cell, but the strength it carries, is so specific, that it carries the salt of calcium, (:30). which means it changes the energy into matter state. This is why the doctors in the first Corona pictures, show calcification of the cells of the lungs. There are number of problems with this, that the humanity has to face. With the new technology of the Gans, which we provide, we encircle a new dimension. In a way, this encirclement comes from the Gans we've produced, that in field strength interaction, we deplete the energy of the virus. In this process, we see such interaction. As our system, due to Cup 1 is set, we protect, and create a link with the energy of the calcium. In this process, we do not allow the virus to change the calcium to the solid state.

For this reason, a new protocol has been issued by the Keshe Foundation to the Iranian doctors and to all those who use it, (:32). to change the protocol, that we change this for good. But what happens when millions of people in China, and millions of people across Europe and America, do not go through the process of using the Gans to deplete the energy of the what we call, the Corona, from this calcium. As you know, as we said, every cell of the man carries the seed of calcium. We manage for those who survive in one way another, to shrink the energy of the virus and they survive. But due to calcification, which is inside the body, we expect a massive rise in cancer across this planet in next three months to two years. Because the process of decalcification is not there, in a way, this calcium will stay, and it will become, as it carries the strength of the salt of the calcium with it, that it is converted, it becomes a salt in the tissues of the man … lungs, brain, intestines, liver, kidneys, testicles, ovaries, the womb, and the prostate. (:34). We will see a massive increase in bone and in blood cancer. If Corona takes from us a million, we will lose 20 million to cancers. In China, we estimate about 20 to 30 million have been infected and died, or the totally affected numbers, runs into 50 million. We expect a massive death rate in China, anywhere in that region of 150, 200 to 500 million Chinese will die of this cancer. In Europe, we expect the same. Depopulation will not come through Corona, but it will come in the secondary cancers, which will be very aggressive, as the seed of the Corona has already been set in massive numbers. Usually cancers start with one or two cells, but now Corona has made many of these cells. We can see the accumulation and the collective cancers across the body of one person, the brain, lungs, kidneys, lymph and everything else. Because when you say, that you had a pain in your body, it means that every cell has been calcified. (:36). Which has got to do with your nervous system, somewhere. I have given warning to the Chinese government. And I have given a warning to the Iranian government and administration, that we'll run, what we call anti-calcium, or decalcification in a very rapid way in public teachings across Internet and television in Iran. So that people can run a 3-day, or 3-hour session twice, in 1 or 2 weeks, to totally decalcify this. In a way, the energy will stay, but the calcification will be removed.

This knowledge is unique, and it is in the hands of the Iranian national, and the Iranian nation, Iranian government and it will be set out in the new scientific paper which will be published. I would like on behalf to the Iranian Keshe Foundation, to thank the military, Sepah, and collectively the Ministry of Health, and all the officials from the office of His Eminence Ayatollah Ali Khamenei to support, and to work so hard, to be able to achieve this, and to be able to support the Iranian nation in such a rapid way. This is how it sits for all of us, and every time this virus hits us, if we don't clean it up, this is what is going to hit us in the coming time. (:38). The first series of cancers in China, has already shown its face, because it's so huge, such a large number of cells have been effected, that the body can't decalcify, then it goes in a nosedive. One of the ways to handle this will be explained through the Iranian officials. The doctors of the KF have been writing the Protocols and the whole process, in the past 2 or 3 days, to be part of this scientific paper. Now, we can see that the Corona can be with us for a long time.

It's the first time we have a virus which has access or strength to the level of the physical part of the body of the man. All the viruses up to now were energy packages, but for the first time, this virus has managed to bridge a very important position around the cell of the man. What I am about to explain, I have already explained to the officials. This is not scaremongering, this it to explain, (:40). something very real. As we have seen, the virus has managed to make access at the strength at the level of the Ca within itself, with the cell of the body of the man to create the calcification.

The biggest fear, which we see, which could be imminent, but we cannot put a time on it, is that, if this process of interaction in the fields, within the structure of the virus, leads to creation of the Ca within the virus itself. It means it will be entrapped within a new physical body, and for the first time, RNA will be making its own DNA. If this happens, what will be the consequences of this growth outside the cell, and would it be a parasite, which we'll never be able to get rid of within the human body. Would we change our life to the new dimension of, in fact, a cell from the virus. Then what this will do, this will become a parasite, a "virus parasite" inside the body of those who are infected. (:42). Would the mankind have the knowledge and T to overcome this? It will be the first time a virus has changed itself to a physical entity, known to man. If you have understood and read, even the book #1, and understood fully from the interaction of the fields, such a creation of energy and gravity point is possible, and is at the strength of the Ca, creation and change the virus to a cell on its own, within the structure of the body of the man, is a possibility. The problem with Corona, is that, it can become the crown of the whole human body, and not just on the cells. This is a reality which we have to consider, because it is for the first time we have seen this. We understand this process fully, conversion of the Ca fully, because by accident, or by fate, or by the "Will of God," the KF had the opportunity and a full time to understand the calcification within the body of the man, some time ago.

In so many ways, what we talk about, (:44). is the reality, which we have already handled and have seen the conversion in calcification. If you remember some years ago, we showed you a number of pictures of the lady who, her body was converting all the, what we call, body cells into Ca. In changing her life and working so closely with her, we managed to understand this process a long time ago. So if we get to that point, and we understand this position, if you remember we tried to blank her face out, but show you the face. We have dealt with calcification of the bone through the blood, and then amputation and ?? death, and everything else which went with it. If you remember, some years ago we showed this, the lady who, her body was changing everything into Ca. (shows the picture) Do you see the fingers, the tip of the fingers, especially the ones facing you, we could see the bone, because the blood vessels were calcified, (:46). and no blood was coming in, and the body was wasting. We have many videos that you can see all the bones. It took 3 months to reverse, to change the calcification in the blood, to no calcification. You can see it from the tip of the fingers, very clearly, if you look here and here. We know what this virus will do to mankind. It will strip the flesh from your bones and you'll have to watch it. This calcification through the energy transfer, and what we have seen with this virus, is very real. You can't overlook it, nor ignore it, because many of us will start this process in the coming months and years. We'll release a new

protocol in the coming days, that the KF supporters and KS, and people across the world who want to keep on changing these calcifications to normal energy of the cells, (:48). can follow.

We are waiting for the official papers to be released by the Iranian Government, and then we'll start building on the true knowledge in how to divert and change (this). Many of you KS, will not be here in the next few years, due to the damage of the Corona, which you overlooked. And when it touches you, you'll understand. There is a process to reverse this, if need be, and when the time comes we'll release the T. But until that time, it is your responsibility to look after yourselves. We have pictures of the bones in the fingers, if you want to see, a bone sticking out without any flesh. It's never been done before. We know what will come with this, I have seen it. (:50). If you want to see the horror of it, no problem, we have 10,000 pictures from this lady, and videos. Fortunately or unfortunately, she is Iranian and still alive. This photo of her hand, was taken last year, October. She attended my father's funeral, that's why she is in black. We helped her in 2005 and 2006, and the hospital in ?? Belgium have a full detail report of her. You can go and ask them to look at the videos, MRI's, and the rest of it, and the amputation and the growth of the toe, and the amputation of the toe.

You have to understand, (:52). that the Corona is not going to finish when your pain goes, or you survive, it is the beginning of a long term pain and suffering to come, if you do not look after yourself properly and regularly, until we eradicate it. This virus has mutated. Let me explain to you as I have done before, how much it has changed. The Corona now has developed in this way. (Draws on screen representing each version of Corona). Then there is a Corona, (:54). I don't have any other colors, I can show you like this. Originally the Corona appeared in the lungs with fever. This is the old Corona, the original Corona. Then it appeared in the brain, then kidney, and liver, and stomach. Then is appeared in intestines, and then in reproduction cells of the body. In the past weeks, we see Corona in arms and legs. Except for the lungs, we do not see temperature in any other (places), but sometimes in the liver. In the past few days, we have seen Corona creating white marks on the toes and fingernails, as it interacts with the Ca of the nails and deepens it. (:56). In the past week or two, we have seen Corona with the pain in the joints. As these are the points where bone marrow comes out, and every new cell has a calcium as a seed, and automatically, it immediately calcifies, creating blockage and pain. So in fact, Corona has shown its face in six different ways, 1, 2, 3, 4, 5, and 6. And the doctors today only talk about this (the lungs), due to the ignorance of their knowledge. We have seen, now that we are handling the section here (lungs and brain), with Cup #1, and section here (the other places) with Cup #2, in a totally different manner. In cases of the kidney and the liver, when it's eradicated from the body, we'll see pain, massive pain in the brain. As this is connected and is adjacent to the heart, this pain comes from inside, (:58). the interaction between the STM and the STP. Where the physicality confirms to the STM, "I have survived," and he has to adjust itself, to accept the other part, that it is not leaving. We understand the process. The people who had the brain Corona in their first phases, speak of a totally different type of pain, then when they have a Corona of the kidney and liver, just under the heart.

In Iran, we have had people with 52% and 57% oxygen and usually they die. But now they are home with 90 % plus oxygen level, without oxygenating them. It's never been achieved. This is death (52 %) , reported as another number, and this is a life (90%), which is carried on at home. We are informing all the Iranians to carry on with the full Protocol, from top to toe, with the new Protocol. The first week, where the Coronavirus is eradicated, and then seven days later a repetition, to make sure any calcification of the cells has totally been reversed.

Today the world of science, speaks about this (lung infections). (1:00). The world of science, in six months to in ten years, will talk about the millions of people who suddenly died of cancers, strokes, and brain hemorrhage, because of the calcification from Corona. If those in Europe and America think they have walked away with (only) the temperature of the Corona, you have said yes, and hello, to the cancer of Corona. What we understand and what we see, the way this virus has managed to mutate itself and it goes to calcification. We will use in further stages, we cannot put a time and limit to it, to use all the understanding of the different states of the calcium in the body of the man, to create a replication of the virus of itself, in a shape of the operation of the human body. It has such a capability, because the calcium's of the brain, are different than the calcium of the nail. The calcium of the heart cell, is different than the ones in the bone and the blood. And this virus has managed to replicate and connect to all of it. (1:02). So in total, it must, and it has to be building a storage bank, of RNA conversion to DNA, equal to the structures of the physicality of the man. The world of science has to understand this within next six months, otherwise there will not be enough land in some nations to bury their dead and there will not be enough men to bury the dead. People will die faster than they can bury them. As we have seen in Italy, churches have become mortuaries. As they tell us, in Paris they're putting the Corona patients on the train, to outside Paris, because there is not enough hospitals to accommodate.

I advise you to contact your governments and your military, and ask for a direct talk with the Iranian military and the Keshe Foundation in Iran. We'll support, teach and bring the technology to your nations. We'll use the office of the Prime Minister of Austria as a point of contact and consequently the Iranian Nationals, governments and military, use their own offices across this nations to establish the link. (1:04). Wait another 72 hours maximum, by Saturday, and then start the process with your governments, for the transfer of the T from Iranian military, to their military, then they can ?? penalize, and deliver the T right across. If your officials conduct the whole process as we did, in Iran, by the end of this month, we should be able to bring normality at least, on the life, and into the life. There is no way we can do the military precision as was done in Iran and China. But as you teach everyone to use a CL, and this CL will continuously produce, you can literally wash your buildings from inside and outside, or give it to your governments to wash from the inside to outside. Everyday you produce a CL Gans, and in the process, by throwing it (the Water) on the streets of your town, and the cars passing will continuously disinfect the whole city and the country. This is the only way that we can spread it so fast. The CL is not for you in the house, the CL, once (it) saves you, and you have made yourself immune, you throw a Cup, you give a Cup, or the products of it, to your nation, to your neighborhood. The old tradition was, that they throw a water and clean the front of the

house. Throw the Waters on the buildings and on the streets, and let the cars disinfect, let the people as they walk, they'll disinfect the whole city. We don't have any other way. (1:06). Even the Chinese showmanship, of (cleaning) stations will not reach the passageways, alleyways, and the public toilets, and the rest of it, nor in the libraries and universities. Spread the Waters from the CL for at least a year, everyday, and everywhere you walk, as it is produced ,it's free. This is the only way that will battle this thing. It is the only way, that you can stop this process to develop, as we change the whole of our environment away from this virus. In Iran, the people have started it. The KF KS have gone through this process, and now they have taken the cleaning of the cities in their own hands. In so many ways, they are doing in it. In the West they don't tell you, but in Iran, many KF supporters have started the process. This becomes part of your job. This is what you have to do, and this is how we will change the position. The governments are incapable, they don't have, and they'll not be able to do this. This is as we said, "the last man standing." You are the last man standing for your home, your city, and nation, and as One Nation. (1:08).

When I spoke to the American officials, and I said the Iranian Military and KF supporters, are ready to go into the USS Roosevelt, you could hear the shake in their voice. They could not believe it. We told you, we would make bridges of peace, through the thoughts of our enemies, not through our actions of friendship in sharing. You have become the same, spray the buildings, spray the cities as you pass. This CL will not stop making Gans's.

Rick I have sent you three videos. This is the Iranians in a small village, and now you understand how deep the Keshe Foundation is embedded in the Iranian lifestyle. Have you received them Rick? … You can play them one by one. People are saying, "we build these in our empty homes, empty places, and with this. we'll disinfect our cities, ourselves at night, when everybody's asleep. Don't forget, it (Gans Water) does not go away, it stays and (continues to) disinfect. We saw it in China as a showmanship, in Wuhan City, and taking the president, who was scared of even taking his mask off. You see the Iranians with the pleasure of the knowledge are spreading the Gans across the street, even in small villages. If it's done in a village, small village, (1:10). now you can understand what other Keshe Foundation Knowledge Seekers are doing and can do across Tehran and the other cities. This has become part of you, spreading in the churches and the mosques and the streets and everywhere else, that people by walking (over it) will take it and spread it. This is one of the Knowledge Seekers in a small village in Iran. You can play, please.

Plays video … <Farsi Speaking> <Farsi Speaking> <Farsi Speaking>

As you can see, last week when Mrs. Mohammadi was saying that, (the opposition was saying), that this is only for the Iranians in Tehran. This (video is from) the Keshe Foundation in (?name?), a small village where, what we call, a different culture of Iran lives. You can see people in villages have started this, using the Gans Water to wash, and we only use the water of it, not the Gans itself. There's another video you can see them, these people are spreading it everywhere. (1:12). They've taken on themselves, the job of

securing their country, their lands, their cities and their own villages, and this is a small village. Very small village. <continues video> It's not just their home. As you see it's not just their own home. And this is how it'll be, and this is the only way we can overcome this virus. It ends up going everywhere, and you just walk on it, and when it rains it'll spread it more. It's beautiful how people have taken things, Keshe Foundation Knowledge Seekers, in their hands in Iran. And the government understood that the knowledge is totally free.
(1:14). This is Space Technology in the hand of a man, in a farm, which understands, he's saving life. And as we said, share it freely. He hasn't just disinfected his own house, "and I'm happy and that's me." He's taking his knowledge everywhere. This is how you should be as a Knowledge Seekers.

In so many ways, with the new announcement with the Iranian government and the teachings coming up, and if the European governments follow the same path, and the American governments and the rest of the world, we will overcome this virus within the next month or two, and we'll go back to normality. But this normality will be short-lived, and the hospitals will be full with people with cancers, if the government's do not follow the procedures to decontaminate the body of the man, and the environment from the total Gans, what we call, the plasma of the fields of this virus. (1:16). It's not anymore just: "I made a Cup (for myself), I'm happy in the house. I have a Cup which keeps on producing, and I clean up the cities, the railways, train stations." Just throw the (Water from the) Cup, you carry a Cup. People will understand, and as we all do it, it will become a Cup of Life for everybody else. And in so many ways, the governments cannot afford to do, the financial burden on this is huge. And as one of the Iranian leaders in the meeting said: "We were told this technology and knowledge is free, why do we have to say, no to it? They are not asking for any money, they are giving it to us free and we see the results. It's not vaccines that we sell, and it's not herbal medicine that is sold. It's free." It's a free water, and if it saves energy, and people follow the protocol and saves their lives, maybe Corona becomes the crown in the friendship and unification of the man. (1:18). The only people who loose money from this pipe and Water you see (spraying), are the Pharmaceuticals, and those who were planning to inject every man with vaccines to control and then destroy. This Water is washing the "Gates of Heaven," where, for the mankind, from those who were planning to introduce and force vaccinations, becomes the "Gates of Hell." All of their investments have gone down the tube. This will make the Gates Foundation bankrupt. You'll understand soon how. The lawsuit cases against the Foundation for spreading vaccines, which were not needed, and deliberate will deplete the funds very soon from the most riches foundations.
Any questions? (1:20). … Please do not put any telephone numbers on the Chats..

Q: .. My love and gratitude for the Iranian people and their leaders for stepping forward for the world. (1:22). K- We are waiting for the Iranian leaders to make the official announcements of what they have done and what they still have to do.

Q: Do we need to have a giant amount of Gans Water and compressor or giant machine with hose and spray that, or can we work with a smaller spray ? .. K- This is the Iranians and the love of their neighbors, they won't go and do it in a small way. .. You

can carry the spray and spray everything else. A KS said, I have been even giving the Cup 1 to my plants and they are growing so fast, they must have had the virus too. So you can spray it everywhere, I was in the lift yesterday, and spraying it in the lift. People who are not recipient to it, you can't do anything, but those who understand it and they use it. … In a way, if you spray it on your own clothes and you are walking around you are disinfecting the environment. .. Spray your shoes, masks, when you are outside the house. I think it will become part of the tradition to wash (with the Gans Water) because the next cycle of the cancers are so horrible. (1:24). I can show you some of the pictures of Corona cancer. We have already started to see it. …

Q: .. What do you forecast for the future of this virus, can humans and the world overcome it? K- It depends on how we handle it. Very soon, nation by nation and behavior towards it, (1:26). will set out the outcome. It's not anymore just spray, drinking, and breathing. The Protocol has changed drastically because we have seen the progress and the change if it, and it's cleverness of it. We forecast and see a massive increase in cancer especially in China. I forecast 200 to 400 million losses in China, due to the cancer. What I call, "election counts" will tell. China in the way they behaved, they thought they have eradicated the Corona from the lungs, but it has seeped into the other 5 pillar, what we call sections (organs), and they'll pay heavy for it. Or unless the Chinese government goes into a national teaching, and teaches people, before it gets too long (time), how to deplete the energy of the virus. There is one problem with China, they have to go back to openness, about from where the T came from, and in that openness they can share it openly with their nation. As I said, the way the Chinese handled this, and taking the knowledge from the KF, (1:28). and then changing it and officially through their Military, saying they don't want it to be known, in a way, they took a Trojan inside their own blood. Now the Corona will grow, and they have nothing for it, to say, as we have seen it in Iran, and it will go into cancer. I'll explain in a very easy way, when you steal a big diamond from the jewelry shop, which everybody knows about, or from family. You cannot wear it in public and you cannot show it in public, because they know you are wearing stolen goods. You can only wear that, where you're with a bunch of thieves like you, who what they bring to the party is also stolen from the others, the same way. So you know you is sitting amongst, a bunch of thieves. And the Chinese did the same, they stole a jewel, and they cannot show it in the public, but they show washing their places with (Gans) Water. Now they are announcing that they have cleaned up their places with the Water, and everything is open. But the Iranians did it differently, they showed the jewel, and they are proud of the jewel, and they're openly sharing it with the rest of the world, whereas China has to hide it. And for that hiding, as you know, sometimes some of these gems bring with themselves a bad omen, and China has got stuck in that bad omen. (1:30). Or they go back to the nation and they tell them where this technology came from, and it's not Chinese, and it's not what we said, and the nation needs to protect themselves. Then they follow the Protocols, which are set by the Iranian military and the Keshe foundation, as a joint collaboration, to save the Iranian nation and the rest of the world. We hear in one of the governmental, internal in East Asia, China is speaking about the new nanotechnology they want to give to Malaysia, to help them with the Corona. Doesn't that sound familiar with nanotechnology and the Gans technology?

And how come they did not announce it publicly, and are discussing it privately with a government.

In Iran we are proud, and we share it proudly, the way we have done with you for years. They don't believe you, when you call the press that don't listen to you. When you call the government, they put the phone down, and regard you as a bunch of idiots. Now the military and the government will announce it, and deliver it, and show the figures of the empty hospitals by use of the technology, as a jewel in the crown of Iran's science and technology, and your governments will embrace the Keshe Foundation Knowledge Seekers, to teach them how, and how fast can they do it. We'll talk next Thursday, and the Thursday after, if the Iranian officials keep to their promise. (1:32). As you've seen, it has been announced in past 24 hours on a national television, that Iran has reached a new technology, a major breakthrough, then the forecast is two ways, massive cancers in China, and a healthy population in the West.

You follow the protocol. In so many ways, as I said, public swimming pools (filled with Gans Water) will become, where you make sure you are disinfected from the virus. Taking a bath on regular basis for the Corona, in what I call, a Cup of Life, will support you to get rid of and reduce it. Washing your cities, cleaning up the places, in a way, making the Corona ?? world as part of the water circulation, over a few months we'll overcome it. The beauty of this is, the burden does not go on the national governments, who are already bankrupt, but goes to the individuals, as they wash their cities and the streets and the rest. Here you see the Iranian guy washing the city, because they don't have enough Gans. But, can you imagine in the cities with say, a hundred houses on it, with two or three apartments, and three hundred Cups, or let's say even, the Water from a hundred Cups thrown on the street, on the buildings, and the footpath, and as the cars that will cross that street, will take it across the nation. (1:34).

We do not, we cannot, and we will not allow this to win, if we unite. This will bring a lot of benefit. I would like to share something with you, which I try to teach last week, but many of you did not understand. In Cup of Life, many of you, and even in a CL #2, you have seen many white Gans Cu, which means it will affect the emotion of the man. You will find yourself very calm people, you will find the city calms down, you will see, that the aggression will go from the nation's, because through the CL we have raised the level of the STM away from aggression. In a way, we have done exactly what you did with a Cup when you were sick, now the nation's sick and it will change. The Water from these Cup of Life's that you throw on the streets, or you wash into your basement, or into your pipelines and will come out in another way somewhere else, will change, will bring a new atmosphere, will bring a new condition, which is what we wanted, but, we did not hope it this way. If you remember, (1:36). a very simple thing, in the Caribbean's, when the Gans was spread with a few cups, we saw how a hurricane was stopped. Now, in your cities, and in your buildings, and your towns, you are throwing a CL, and you will see what will come of your city. Gradually, you will make that dome, and this dome on its own, will have nothing to do with animosity and what has been wrong with the breath point, what gave you life, of the planet. And if enough of you spread the Gans's in the coming months around this planet, we will create a "Dome of Peace" on this planet. I told

you, I'll get what I want, it doesn't matter how you play the game, we use the opportunities to create peace. And now you understand. You throw your Gans Water in Sydney, and you throw it in China, in Iran, in Europe or America. (1:38). Do you remember the dome - there were a few cups, but now you're cycling tons of it. After this, if you follow it, we'll see the change in human behavior, because we have elevated the STM through the Cup #1 and Cup #2, and with that, the human race will change to a new course. We will see peaceful nations, as One Nation. We will see the embodiment of embracing the Universal Community, where the humanity reaches a new understanding of his own beauty and his own values.

I told you, many of you built many MaGravs, now those MaGravs become the beacon for all of this (the fields to connect). In so many ways, and I said to you before, we look into make the best for the human, that through that, we can make the best for the rest of the universe. If we carry on the way you are doing now, (1:40). and the way, even if you understand what you've done, how we have used you and your body. Many of you drank the Gans, and it went out of your body, still energized, into the sewages and across the nations. We have already started the process of change. The only difference this time will be, that collectively the human race will accept the new condition.

We have seen a shameful behavior from the White House, and more shameful behavior in past few days in Iraq, from the White House. But as we say, we do not expect good news from General Michael Flint, to accept support and help from the Iranian army to overcome the American problems in their Navy and other places. But the nation will override the president, and the president will have no seat as a president. You have to understand, in the time of trouble even the worst enemies step down. (1:42). The shameless, the shameful president's increased deceptions, and again we see military moves in Iraq, on the banner of Iran wanting to attack us, to make ready, thinking the Iranian army is weak, and it's the time to strike. What a shameless man. We'll defend the territory, but at the same time we help your soldiers. They'll be putting arms down, to the shame of their leaders, how can we fight with those who saved our lives. As I told you, we'll disgrace those who stand in our way.

As I said, in the last negotiations when Obama administration approached us, that the Senate will not ratify the 5 plus one (treaty). I gave an interview to Mike Harris and I explained how many senators in the Senate, and in the House, would like to say no, to 5 to 15 million jobs, which will come out of the peace process with Iran. In the time of recession, you have to tell your people, that you are refusing millions of jobs. And the following Monday the opposition collapsed, and we got the ratification through the Senate. Now, our call goes to the American Navy, Army, and Armed Forces, your sons and your soldiers will die of Corona, (1:44). would you like to fight, or would you accept the hand of friendship, from the Iranian army and military for eradication, using advanced Iranian technology, beyond nuclear. We'll give you a guarantee, that within seven days the USS Roosevelt will be open for public, the way we cleaned at the hospital in Iran. Let the soldiers decide, not the incompetent leaders. We'll bombard the American military with a gift of life, and let's see who has the strength to create more war. We stand shoulder to shoulder with the world military, to deliver this to all the nations, because

they have order, and they can reach, where the governments are incompetent to deliver, except one. As we always said, armies are men of action and they can deliver. And this time the Iranian army will deliver peace, and the solution for Corona. We are proud to stand, shoulder to shoulder with Iranian soldiers to eradicate the Corona from Iran and rest of the world. You asked me, what I see for the future, I see the future of peace, using the opportunity of Corona to forget about the past. (1:46). But the same time, we have to take steps, that it will not take a toll on our lives in the future months through cancers and others.
Any other question?

Q: .. Can I use another Pl at the same time? Let me say it another way, can I reach the virus with CO2 and Zn?
K- The CL has a structure for Ca, and Mg, that's why it was developed for this purpose. Do you understand, you have the Cu, Zn, and the Nano (N) coated (coil). What is Ca, Rick? … 39 -40. (1:48). You have to understand the design of it. We look at the Ca spectrum from 35 - 49 (plasmatic field strength). We average around 39 - 40. You have a Cu, which we calculate around about 57 - 69, around about 60 to 63 to 64. As you know, when you have a dynamic system which is created due to the N material inside, not all the polarities are in the same way, as we call it, some are in opposite way, this is something you never understood in the work of the Gans of plasma (Pl).
In this water we have a Na, around about 19 - 25, we average it at 20 - 23. Understanding the dynamic motions in this Cup, if you take 63 minus 23, of the Cu, you come to around about 40 of the Ca. Then you understand, the magnetic (M) field of Mg, or possibly Ca, (1:50). and Na and the Cu presence will give you the field strength of the Ca, this is how we interact with the Ca seed, which the Corona has touched.

Q: I have a breathing device, which I made with the CO2 and Zn, can I use it at this moment .. K- For the time being, yes, you can do, it's emergency, because part of the Zn, and the best way to do it, is to add 1 or 2 drops of salt into it, to create, near this condition (of the Ca), for yourself in this Cup, and use the Gans saltwater, from your pot (saltwater in CL before removing the Gans), not just the normal Gans, which in that process will give you that. Just add 1 or 2 drops of the Gans saltwater. Q: Thank you very much. K- Now you understand how we handle the Corona, and why we are so effective on it. Because we have matched it, match to match, we have linked with it, link to link, we have done everything possible to make it available. In a way, if you look at it, Corona is like a big mother, a mother pig with so many tits, and we put a piglet on each one, sucking the energy out of the mother. Every possible way, (1:52). we have linked into it. It's a simple T, you see to me, physics is fun, and it's beauty, because I see how things go. When you enjoy science then everything is easy to solve. I built this T and I know every brick of it and where it needs to be fit in.

(Fibromyalgia teaching)
Q: I think you misunderstood me, I made the CL and have the Gans of it, but also I have another device, a breathing device I use with CO2 and Zn, for my, I have Fibromyalgia, when I use these two methods (together) do I make any wrong thing?

K- No, that is what I told you, just put a salt from the CL in your breathing system, you do both, you help your Fibromyalgia and your Corona. Why have you got a Fibromyalgia? Q: I don't know, life I just got it.
K- What are the signs, what is the number, of your Fibromyalgia?
Q: … I consulted with a doctor, she sent me to another doctor, and he gave me this breathing device. I have a pain, everyday, for 24 hours. (1:54). some pain in my legs, I did all the tests and the doctor said, you are okay, you don't have any problem. You have a mental problem.
K- Have you been tested for Fibromyalgia?
Q: I tested with other things, pineal glands, all of them are okay.
K- No, Fibromyalgia doesn't show in any of these things, they are okay. It has a specific structure of identification, and you can ask your wife to do it for you. I used to test people who used to come, they said, oh, you want to touch us. I said, you know something, you can go and get lost in ?? yourself for the rest of your life.

Fibromyalgia, has 18 points in the body. If you pass 11 points as positive, then you have Fibromyalgia. Some people are as high as 18, they can hardly work, and they end up saying it's just psychological. It's not psychological. How old are you? Q: 41 , from Iran. K- When did you leave Iran or were you born. Q: 10 years ago. K- Okay, Fibromyalgia is very easy to diagnose by someone who stands next to you. You need to put pressure at 2.5 lbs/per sq inch. (1:56). or 2 kg ?? it's best around at the tip of the finger. The first thing you do, is take the back of you ankle, do you know where the tendons are at the back of your foot. This is point 1 and 2. You get your wife to squeeze these tendons, between her 2 fingers. If they are painful, and you can't stand it, don't kick her and don't push people around, it means you have been abused while standing on your feet. That is the first sign of Fibromyalgia. So you have the first two (points). Then there are 2 points inside near your thighs, which goes near the "shy" line, women think you want to touch them. These 2 pressure points are points number 3 and 4. Again if you push the point with a hard pressure and if you feel pain, so now, you have 1 and 2, 3 and 4 (4 of 18 points). Then on the back of your shoulders you have 2 points in your shoulder blades, you press those deep, and if you feel pain, that is 5 and 6. Then under your arms there are 2 pressure point on the ribs, when you press them, pain. (7 and 8). (1:58). Then there are 2 points in front of your chest near the collar bone, number 9 and 10. You have 2 points by the neck and ear, number 11 and 12. There are 2 points on the back, in the spine just behind your hips, number 13 and 14. Then you have 2 points, which sits on your sinuses on either side of your none, 15 and 16. Then you have the final points. These 2 points are very different and change the position. You press on the side of the breast, if there is a pain, number 17 and 18.

If any of these numbers 18 (in total), comes (adds up to) 11, you have Fibromyalgia. (2:00). You feel the pain, you kick people, you say, don't touch me, it hurts. Fibromyalgia comes while you're exhausted, because to keep these pains under control takes a lot of energy everyday. These are emotional damages, which were done on you, the abuse by family or friends, before the age of puberty, that is run for 12 or 14 (years old). Am I correct?
Q: Yes exactly.

K- Yeah, this creates a psychological depression in the brain, which leads to not wanting to work, and being exhausted all the time, because you have to understand, to service each pain, which is part of this, takes something like 10 to 20 calories a day. If you have a 20 calorie energy loss, times it by 18 and that's nearly 400 calorie a day, which is wasted just on servicing these pains. So if you take 1,400 calories a day, what's it number, you're already short by 400, then you're already exhausted, you're tired, and if you cannot walk, it means they have told you, that you're incompetent, and you cannot do anything.
Q; Sometimes I can barely walk.
K- Yes, I understand. So with the Fibromyalgia this is the structure, ask Dr. Mujar, (2:02). to put you in touch with me, I'll take you out of it within two to three weeks.
Q: Thank you so much.

K- The process is not this way. Fibromyalgia has a specific process, I have had people who for 17 years could not even go to work. They had to work two or three hours a week, just to get paid by social services, and then they would spend the whole week recovering, for those two or three hours to stay alive. In less than three weeks, they were cooking and everything else and living a normal life. You have to understand Fibromyalgia is a psychosomatic, by abuse done before puberty. Then if you enter the workforce, or when not a workforce, but when you cross puberty, number 17 and 18 changes position to, these are your tits, the tips of your breasts, and these are your last ribs, you line up, if you are a woman, you lift your breast up, you take your tits, and you go directly in line to the rib, and you pressurize these two points. These become 18 and 17. If you have no pain, for ease, let's call them, 20 and 19. If you have no pain on either 20 or 19, then you have Fibromyalgia. (2:04). But if you do have pain on 20 and 19, then you have what is known as Fatigue. Points 19 and 20 come after puberty, it comes from being subordinate. You have a boss who tells you you're useless, and you accept it. Your wife tells you that you're incompetent, and everything else. You work in an office, because now you are a teenager, and you grow up, and they blame you for everything, and you know it's not your fault, then you start getting a depression.

This is Clinical Fatigue, CF and FM (Fibromyalgia). CF comes after puberty, FM comes before puberty, around 12 to 14, or up to 12 to 13 years old. This (CF) comes from anytime, from age of 14, to the end of life, whatever that life will be. You can get Fatigued (CF) at anytime, a lot of people accept a lot of pressure at work, because they need the bread to put on the table, and the boss is ruthless, he thinks he's the boss, and you get CF. You go into a marriage in which the wife is abusive, but for the sake of children you stay in it, and you get CF. Or you go into a marriage in which the wife betrays you, and you know it, but you stay in it for the sake of the children, you get CF, and all the abuse that comes with it. (2:06). When you accept, that it is not my fault, but everything I have to accept, just for the sake of having bread on table to live, you get this (pain on 19 and 20). Then you have to test yourself, because your front, your breast, is where you protect your heart and your emotional, and that's where the pain comes.

It took me 10 years to complete this (study), and I've mastered it, and I'll walk you out of it. You walk in and you divorce the wife, and you start a new life, because you won't stand the abusive behavior. Most of the children who go through bullying will suffer

from FM, long time. With FM and CF, you need to strengthen the soul and the emotion. When you see the people with FM and CF, when they walk into your office, the shoulders are here, bent forward, and submissive. In three months they stand tall, and they won't let anyone abuse them. Your posture is like an animal in the fields of Africa, where the lion picks the animal by the posture, and so do the men. This is why many women go from one abusive relationship to another, because of the posture, because of the problems, which psychologically brought in a hidden FM in their life. (2:08). It's the same with a lot of boys and men. It's not the first time when we tell you, that we'll change the moral, and the emotion of the man, through Cup 1, because we understand and have tested fully in the cases of the others, in the past 20 years. Take a picture of yourself if you have FM, and go through the process of the Keshe Foundation, what I call "FM recovery," and then take another picture, you'll be at least 2 to 3 centimeters taller. No lion will pick up, because he knows you kick. Your prospects, your understanding, your whole structure will change. I've seen couples who have sat in front of me, and then they realize how abusive they've been to each other, because both came from the abusive Fibromyalgia in their background. After 3 months they couldn't live with each other, because they understood how they carried the abusive behavior of their parents, into their partners.
Q: Thank you, Dr. Keshe, for your time. I'm really appreciative.
K- Am I correct? Q: Yeah, many of the things you said is exactly the same.
K- Speak to Dr. Hassan and I'll sort you out. I'll help you to get out it.
Q: Thank you. I really appreciate that. K- You're welcome. (2:10).
Any other question.

Q; .. about the Cup of Man (CM), how should I use the Water and Gans from the CM, and also how can I bare, feel and interact with the fields form the Cups?
K- The CM we'll open it in the next few weeks. Make a CM and keep it at home.
Q: I already made 2 of them.
K- Good. Let me explain to you how things are in 2 different ways. I was explaining this in one of the teachings this week. We gave you Cup #1 and Cup #2. The word CF ?? is Clinical Fatigue. FM is Fibromyalgia, I can see the word popping up. (2:12). He draws, Cup #1, Cup #2, then he draws Cup 1 connected to Cup 2, we call it, the Cup of Man, parallel.

The world of science starts with fields. You need 2 fields to interact. You need 2 fields to interact to give you a plasma. This is the field to you, of M field effect. This is plasma T. The next step is, what we call, Cup #3, or system #3. These are 1 and 1, or 2 and 2, and the interaction of the two, 1 and 2, has given us, sorry, the point, #3, no 2, 3, I do apologize. (2:14). (He erases #3 and draws #2). Which is this one (a plasma).

In the coming teaching, another combination of two's, when we put 2a and 2b, the combination of two's,(2a + 2b), will give us what we know in the world of science as, Physics. Two plasmas, each created from the interaction of the fields, gives you an atom, which is Physics, before that they are just plasmas and fields. In the interactions of the two's, two two's, which becomes the Physics, becomes #3. Now if I put two Three's together, you get Chemistry. (becomes 4) (2:16). If I put two 4's together you get

Biology (becomes 5). If I put two 5's together you get the soul of physicality (STP). (becomes 6). If I put two 6's together you get the soul of the man (STM). (becomes 7). If I put the STM together, (two 7's), I get the soul of the Creator (8), as in Chinese we call it, ?? That's why you have the figure of infinity (sideways 8). That, in the interaction of this (the two 7's) you go back to 1.

Q: Are you going to give us 6 Cups that we ??
K- With 6 Cups, you come to this point, that the rest is understanding the STM. Man now has reached this point (two 6's), in your structure. (2:18). But if you understand, in Cup development, you are still here (1 and 2) with the Cup of Man. Only the Head of KF, and one other person have been enlightened, by this (two 7's). If you understand the operation of Cup #1 and #2, you will just about to come to understand the interaction between the 2 parts of the body of the man as separate fields. That it makes the plasma of the man. Then you'll understand, then we give you the dimension of physicality and the rest. (2:20). At the moment we have to go with the Cup #1 and #2, as the CM, because we have to elevate the STM, and the physicality of the man, that both are at the same strength of the soul of interaction, that we make a perfect man in the physical dimension. We have brought your level of emotion, with your physicality. We first increase the emotion side to support the lungs and the brain. In that process we saw the weakness in physicality, which we brought the Cup of Man.

You have the CM, but it has brought a beautiful structure, The Chinese understand Yin and Yang, and they are talking about the fields of it, how they interact. The Iranians and Middle easterners, have come up with, okay, what is it doing with my physical, I want to see this and that. We see in the Westerners and Europeans, they are still in the dilemma of, "how many turns, is it left or right, what things it's going to be." It's amazing when I listen to all three schools of thoughts, and I see the West is so entangled in the world of physicality, it will take him a long time, even to come to understand the ?? second body. And even Middle easterners have a long way to go, (2:22). to the culture of the Chinese, understanding of the balance of the creation. When you look at the European Chats, they are still talking about the coils, and the Gans and this and that. The Iranians are talking about, I made the Gans, what can I do with it, and the rest of it. The Chinese don't even look at the structure of the Cups in so many ways, they go directly to what does the field effect have, and what is the Yin and Yang. This is why mankind has to work collectively, and understand each other's level of the soul, that it, in a way, works this way (Infinity Loop from the top to the bottom). When I see the European Chat room it makes me laugh. We made nearly 30 Corona Chat rooms. When I look at the Arabs, it absolutely bring s to, "we don't know what it is, but we'll try to be part of it," but some of them understand a bit of it, but there is a Chat so we have to talk. But when you go the Iranians, they are at it, it works, let's get on with it, I can save my physicality, I don't care whatever it is, terms, it has to do its job. Then you go into the Chinese, "what effect does it have on the soul,"

As they said if you heard, if you hear the Chinese... the Chinese QQs translations, some of them says "It is our right to steal. It is our right to use the Keshe Foundation technology. (2:24). They've given it to us." Yes, but we gave it with respect, it has to be

respected, not to be stolen. As the Iranian official said, "He's giving it to us, a free gift for our people. How can we reject it?" Chinese said "It's a gift, we steal it, he doesn't need to know its his." And then in 2 years, 3 years down the line we'll see the survival rates in Iran and we'll see the survival rates in China, and we'll see the survival rates in Europe. And as is our tradition in Iran, in the time of war we do not fight, we help our enemies. We have even given a helping hand to the American Navy to get better, that maybe when they come back, we can beat them nicer in the wars, if they decide to battle that too. We don't help the Americans out of our weakness, we do it out of our love and respect for humanity. But if they want another beating, it's very free. It will be done so easy. But this time it'll be a beating with the love, not with arms, with sharing of the knowledge.

There is one condition, that the Iranian military forces will put ahead in supporting and helping the other nations. We insist signing of the peace treaty between the armies across the planet when accepting the technology. (2:26). The prerequisite is, armies working together. Don't forget the Iranian army signed such a treaty with the Romans 2500 years ago, and nobody knew which one is which. We are used to it. We run an empire, long before you could find their village, to call it home. Any other question?

GM- Good morning, Mr. Keshe! This is Gatua. I have a question.
K- Yes, Dr Gatua. You are the problem, I have a... sorry, before you say anything, I have to tell you something very strange. How come you have so many supporters and so many students in Kenya and around you, and none of them are on African chat line?
GM- No, they are there. I have invited 2 so far. The others I have...
K- Your classes are packed with people. They should be there to share knowledge. GM- I know but they don't have a telephone.
K- It's a free platform.
(GM) They don't have Telegram.
(MK) Open a chat room local They talk to each other there. It's everywhere. I open it, in the WeChat, I open it anyway you like. Get them talking to each other.
(GM) I... I will do. I'll do that. To...
(MK) Thank you very much.

GM- So the question is What is the appropriate salinity of the Cup of Man?
K- We are back into the same thing. (2:28). You decide. This is what I said last time. Let's say, what you decide.
GM- I've already decided but I may be wrong, so I wanted to...
K- So then you... you turn up to be Chinese looking if you're wrong, and if you get the salinity right and everything else right, you might look American white. So, what difference does it make? You are still a human, you have a soul.
Azar- (interrupts) K- No, no, no, wait! Wait, wait, wait, Dr. Azar, we have to explain.
(AB) Mr. Keshe, if he... it depends if he wants to become a salty man or a sweet man.

K- He is a sweet man. He's Dr. Gatua. Dr. Gatua, carry on.
G- What I said is I already decided but I could be wrong... (MK) So? (GM) So I didn't want it to be... right.

K- How could you be... God made a mistake, made the man. But he still got some things right, huh? You know, Dr. Gatua, there is a beautiful joke in Farsi It's a very old joke, and I heard it again recently, in a Chat. ... A man said to the God, "Why have you made the woman so beautiful?" God said, "Because I want you to enjoy the beauty." The man says to the God, he says: "Why did you make a woman so stupid?" He said, "Because then she can love you." Do you understand? (2:30). G-Yes. I do.

K- So we give the beauty. It depends on how you want to appreciate it You have to change things according to what you understand. As he said, she's beautiful, but she's stupid. And the God said, I made her stupid, so that she can love you. So let's see. Do we love our soul or do we stick to the physicality to love what is physical? As I said, it depends on the intelligence of the man. You can make any shape, any color, any salinity, but what do you expect?

Then you have to understand the Cup of Man carries a soul. Did you bless it, or you just pushed in the bars to see what you make? Because the purpose of making the Cup of Man, wasn't just to make a Cup. The purpose of the Cup of Man was to teach man to respect. This is the problem when I gave you the CL, I explained to you, it has a soul. In your lives, you give life, a physical life to your children. (2:32). I allowed you to do that with your own eyes, with the Cup of Man. You have created a soul, that you are responsible for. But you're so physical, that you look at the Cup as another thing to save your life with Corona. Corona and the Cronies of it, we were finished with it, with Cup 1 and 2. I've brought you to a level very much, very much ... one man making two Cups, and one man making two "Cups of Man." One physicality giving life to two hidden souls. In the life of the man you call it, "schizophrenic." You have to understand the Cup of Life, and the "Cup of Man." You're still looking for everything in it, except understanding the truth. This is the soul of emotion (Cup 1 on right) and this is the soul of its physicality (Cup 2 on left). It has life, (2:34). as your child (draws an Infinity Loop connecting the two). You have created it. And in essence, its soul is connected to your soul. You want to play with it, you're quite welcome. But be careful what it can do to you, when you're dishonest with yourself and the others. You will understand soon, where you have become the other Cup.

K- We say in the old proverb "Do to the others as you like to be done to". Understand what a CL. You need to understand the Cup of Life. And you need to understand the Cup of Man. In the coming time, when we open the space to you, this is what you will be facing with (draws a circle around the CM), and it's the truth about yourself, who has got to be interacting with it. We'll start teaching the Cup of Man, post Corona, and not because of Corona. (:2:36). To us Corona is complete, it's finished. But because you're so physical, it was easy to bring it in. In fact, if you look and every man makes one Cup of Man, we'll have 7 billion physical souls, and 7 billion souls of the Man who have trust to interact with. Very interesting if you understand it.

(AB) Mr. Keshe, I have a question.
(MK) You never stop asking questions. Q: Can you.... can you help someone else with the Cup of Man or do they have to do it themselves?

K- The Cup of Man has to be made by the man itself. (AB) But can you teach them, help them? (MK) Of course, we teach you. Don't you teach... don't you teach sex education to your children? (AB)Yes. (MK) So, that's... this is a soul education.

(AB) OK, the other question I have... last time in your teaching, when you were teaching Cup of Man you said, we elevate the soul of the man. So the STM is supporting the physicality? The soul of physicality, that... in which the virus of the STM is very rare. Does it mean, once the soul gets elevated to the point that physicality is supporting the physical soul, the virus can never affect us? (2:38).
K- Why are you afraid of the virus?
(AB) I'm not afraid, I'm just asking.
K- Space is so full of it of it that it's not going to affect you. Have you ever been in love?
(AB) Yes. (MK) How many times? (AB) I don't know, Mr. Keshe.
K- You are a woman. Women fall in love day out, day in. It depends on what shoe they wear. But in reality, love is a virus. It has no physical dimension. It's us who's has to handle it. One of the best viruses we know, is falling in love. How do we manage it? How can we let it affect us that way. How can our soul allows to share our heart, the physical part, with somebody else? So, if you understand the totality of virus...viruses we are born with it and because of it we reproduce and we enjoy the existence of the others. So what's your fear?

(AB) Mr. Keshe, you know I ask this question. I wrote down your last teaching, word by word, and I'm decoding all this because the physicality...
K- Yes, but in the physical language. Understand it in terms of the Soul of the Man.
A- So I let my soul understand it then .. ?
K- I don't know, that's your problem. That's your understanding.

(2:40). K- Yes, we have Mrs. Mohammadi (MM) from Tehran. Q: So the STM needs the STP. … Q: Does the STM need the STP to elevate or not?
K- The STM is the only elevator of the STP. There is no other way to (do) it. And in the process the Cup of Man is set, to set the scene for that, for the man, if the man understands. If you look at the Cup of Man as a Cup of Man you will not understand anything, it's just another cup, another game to play. But if you reach the soul of the Cup of Man, with the STM, you will find mysteries of life. Let me explain to you something which I explained, I don't know if you been there ..some of you have, or not.

Very soon, as I explained to some of the Knowledge Seekers in the background, we will show you how easily the life and the soul, can be created in the dimension of physicality. Where I will give you a drop of water, (2:42). and I'll give you a fish tank. And when I drop the water into the fish tank, through the emotion of the STM, you can have a fish, or you can have yourself a cow. Where for the fish, it becomes where it lives, and for the cow, it becomes the womb of the mother, as a cow. This knowledge is hidden to man. And I'm training one Chinese man to be able to do it, because the Chinese understand the essence of the Yin and Yang. If we give it to the Westerner, he would like the fish to eat. If we give it to the Middle Easterner he would like to see how fast it grows, so he can eat it. This gift will come from a Chinese man. Where we add a drop, and from that drop we

create a life. Do you remember I told you, I'll create a condition, so that you can see the fields that others from the universe will come. Now, that will be your first training. That you can see it, so that in the space, you don't fall for magic. I was planning to show this in the Tehran conference. (2:44).

Q: Mr. Keshe are you sure you want to teach this to a Chinese? Because Chinese eat meat, but the Indians don't eat meat. K- Yeah, but they eat more vegetables, and more souls. I prefer a meat eater to a vegetarian. One soul carries one animal, and each grain of rice on a stem of rice has a soul. You need a thousand to fill in a bowl to feed a man every time. It's your misinterpretation and understanding of the life. I stay with the less criminals, and sometimes it's better. But there is more criminality in this too (meat eating), which I don't show you. Maybe you want a drop, that it becomes a grain of rice. In that drop I'll give you the soul, it's your thoughts, which gives it the physicality. That's the difference between the man, and a Cup of Man. (2:46).

Mrs. Mohammadi, have you finished your job, or are you still busy, while you're on the line? MM- No we are busy.
Q: Mr. Keshe is it possible to do the Iran conference this year still, or no?
K- We have to ask the Iranian government. We are ready if they're ready. Q: We still have 17 days to go. K- We can curb the Corona very easily That's what I said to some officials in Iran, we have managed to curb the Corona, so anyone who's got a Corona, we call, Iran, as what we call, medical tourism. You can come to Iran we let you, we save your lives, we cure you, and you can go back. Tehran will become the only city in the world open for business with no Corona, and if you have it, we accept you with the greatest of the pleasures. Health tourism for Corona, for Iran, will bring the most powerful men in the world, trying to save their lives with their families. And Tehran is open. It'll be the only city, the only country, which welcomes anyone from around the world with Corona. Because we have managed to crown it. (2:48). We will announce it soon. Tehran will be open for international travel for people who are sick with Corona. The richer you are, the more we welcome you. We have to recuperate some of the money we lost with the sanctions through your lives. At least we can give to our people, so they can start developing a better technologies for the others to enjoy.

One of the best things with this will be within the next few days, we'll announce, that Iran is open for international travel, because we know how to handle it. No quarantine, you can come and go as the way you came and went before, just follow our procedures. Tehran K airport will be opened in the next few days, and we welcome anyone from anywhere around the world. We'll sterilize you inside the plane, and we'll give you a Cup to make sure you don't catch it, and you don't give it. And if you have it, we contain it. I told you, I'll bring Iran to be the crown jewel of Science and Technology. Now you need a jewel to find, and then crown it, and not to find a jewel to crown, the crown with it. We will announce very soon, we are open, back to normal right across Iran. Give us a few days to clean up, (2:50). and then in the meanwhile you can come in. And we'll see if we can keep the 19th Conference open. You're afraid, because you have so many people in Paris, that you're putting them on a train to another hospital outside. Put them on a plane and $1000 or $10,000 each to spend on holidays in Iran. We treat them for you, and send

them back. Any Parisians wants a ticket to Tehran, you're quite welcome. We'll even accept people from the White House.
Any other question?

Q: I have one question about Cup of Man (CM). Can I use it for example, if my wish is to feed myself and elevate my soul. Can I use this setup, this CM, during sleep for example doing the putting Cup 1 on the head side, and Cup 2 on the leg side, of the bed? (no answer)
Any other question ?
Q: Hello sir, its Mehnaz thank you and I'm present in all your wishes to help Iran, (2:52). for the benefit of humanity becomes the jewel of science and give it with hospitality to anybody. But I think we need more zinc plasma waters on the whole world. And as far as, if you permit, as far as these specifically towards this virus I have tried, I have said it before, I've tried with the flies, I accepted them and I opened my house somehow. I responded with reception, and they didn't bother me anymore, the flies in my house. So I have the same feeling with these virus, like I cannot of course, I take care of all precautions, but I cannot have hate or fear about that. I feel like, if I if I am receptive, and I accepted it as a part of the universe, and I'm not aggressive towards it. I think it cannot attack me, if it has a soul, and if this soul, .. is like me, it's receptive, and welcoming and no animosity towards it, maybe it would pass by me, because I'm not reactive. That is my first question?

Secondly, is that the historian of the Egyptians (this was the Jews in Old Testament), when they put on time of plague or the illness, they put the design of the blood or sacrifice on their doors. The illness was passing their house. K- why-why-why stop, why? (2:54). Q: Because of the spiritual force...
K- Oh no, oh no, come on Mrs. M. You should understand the symbolism of it. If you understand the work of the Gans, and the body of the man having a Gans. What do you do now, when we tell you to spray your house with Gans's? Isn't that the cross of blood over your door?
Q: Yeah. probably yes but I'm talking about this...
K- No, no because symbolism in knowledge has to be understood. Because the blood is a Gans, it is at the level that it absorbs, it interacts with the virus, with the plague virus. If you take .. this is exactly what you're doing with the spraying of the Gans in your home. This is why I tell you to throw it on the street, and wash your buildings with it, why? You don't need to sacrifice an animal to do it, to put it. Q: I know.
K- Now do you understand?
Q; Sacrifice is also giving food ..
K- No, no, its not a sacrifice. We are talking scientifically, the blood is a Gans state, and the virus needs a protein to attach itself to, so when it's got a free food there, they're there, and then it devalues to the energy of, whatever is there, the building or whatever, then it loses its power. That's what you do with your Gans's. That's what you do with the Gans's on your body. It's not, what you call it, it's understanding what it means. What it does? (2;56). Q; What I mean is, how about the spirit of a person ..?

K- First of all let me tell you something. In a couple of sentences you said something, which is very alarming, but in a way, very important. You said, we cannot be afraid of viruses, and this and that, yeah? … If you're afraid of viruses, please do not leave Earth's atmosphere. Stay a human, chain yourself to this planet. Outside (this planet) it is all viruses. So to begin with, you never become a "man of space." Then you have to understand, if that's the case, and you become "Man of Space," viruses are part of the environment. You have to understand how you deal with it, with the interaction of the STM, with the STP of the Man, that it does not create an absorption or interaction with the fields you don't need. But we still need these viruses or fields to feed yourself from it. Do you understand? So if you say, "I'm not afraid of viruses," I've never been afraid of viruses, because I know, that you cannot be a "Man of Space," if you're afraid of viruses. They say, if you can't stand the heat, don't get in the kitchen. Don't start cooking. So if you're afraid of viruses, don't even try to get your soul out of this planet, because out there, there are nothing but viruses, which are an energy packs.
Q: Which can be used for survival? (2:58).
K- Of course, you are doing it now. What do you do with the Gans water we give you? You wash yourself, your body with it, you take off the virus, in bits and bobs, and you feed yourself with it. What do you do? That's why I keep on telling you keep on drinking water, the Gans water... You take the energy of it is in so many bits, the banana ,the strawberry. Some of you try to understand, that when you drink these Gans Waters, do you taste, feel, or crave for something. Or do you feel satisfied, you're not hungry. I used to eat a lot, but in the past few weeks, I am drinking so much Gans Water. Oh, now I eat very little, in nibbles. I was thinking yesterday, my god, if I go this way, I'll be as thin as anything, because I eat a very little on plate, very little, whatever is there. I try to have a nibble, just to have that energy, that I an carry on. Because if you understand, you're using the energy of the virus, to feed the rest of your body. You're not making it immune.

Q: So what about specific ..??
K- This is one of the reasons, that I explained to some of the Iranian scientists, that this is one of the reasons we see such a fast recovery with this Gans Technology, because we use the energy of the virus, which is in parts, and while it goes through the stomach to feed the body, and because it's already digested energy, it brings recovery so fast. It's a huge stone, we cannot move, but when we chop it in pieces, (3:00). we can build buildings with it. The building's blocks of the life of man.
Q: I am present with your wishes.
K- I carry the knowledge, I have no wishes.
Q: For Humanity, for saving us.
K- You are saving yourselves. You see, I didn't answer the gentleman from Romania, because then, there is a lot of speculation of whatever. Use your intelligence, and do not try to set, to formality, and a framework of what has to be. Many people are accepting, and doing different things with the Cup of Man, but it needs a man to understand the Cup, not just there, for them to become a gimmick. This is a big difference.
Q: It's a new experience for man, not to be in a framework or whatever.
K- It's a new toy.

Q: Yeah, another thing, what about some spiritual advice, some special practices, or prayers, or meditations, that if they are sincerely applied, where some people …?
K- You're talking to the wrong person about meditation and prayer, who am I praying to? What am I giving? Or who am I meditating to? If you spend time with Gaun Lin (GL), she spends hours meditating. I don't know how they are meditating, but Chinese spend a lot of time meditating, and I don't understand what they meditate (on). (3:02). They will sit on the train and are meditating, if the time and the place is right. But, what is the meditation? What is the understanding of prayer? Who do we pray to? Who do we give to? We give to our own soul, we elevate our own soul. If you understand the truth, now. Who are we giving to? Who are we praying to? Unless we give to the souls who created us, or brought us joy? Or brought us life?
Q: If I can express my feeling, it is a kind of getting inside myself, without the noises of my physicality, and that opens me to a bigger, infinite space, and then I get things differently.

K- Let me, I'll bring you an expert in this, just wait one minute. GL are you there? Just listen to this one. … GL you spent hours meditating, every time I talk to her she says, "oh I was meditating." What does meditation mean in Chinese? Or in your way .. GL- Okay, although I spend time on that, but maybe I'm not a good meditator, because I...
K- How long have you been practicing meditation?
GL- I just occasionally sometimes when I ???
K- Everyday I think?
GL- Yeah, if I have time I do. But the method for me it's just to relax and to feel my body, to listen, like something pumping in my head, (3:04). what is there. Just like an observer of your thoughts, observer of your body, and yeah I calm down. But I know I'm not really good at that. I know a lot of people who go through meditation and they have a lot of achievement. They free their soul. So actually, I'm just a just a very, like a lower primary school or kindergarten for that.
K- But you spend so much time on it? GL- oh, yeah that's because I'm the stupid, that's your idea for women, right?
K- Is there anyone on the Chinese QQ, who can explain this?

GL-Yeah,I think I can ask for somebody if they want to pumping up and to say something and I can translate. … GL- I just translated for you.
K- Let me explain, when you call GL and there is no answer, it says she is busy with something. You call back an hour later, still no answer, (3:06). you call back 2 hours later, she says, I was meditating. So you get used to it. The Chinese are forever meditating. I have never known a nation with so much meditating. Is there any response from the Chinese.
GL- Somebody said this is a cultivation way in Taoism. It's also in Buddhism and Confucianism, they all try to mediate, this is the way they try to communicate with the soul. When you are calmed down, then the soul is going to pumping up. ..

K- Meanwhile when they are quietly playing the music of the soul. A lot of KS have to step up and understand more about the real life, not the physical life. Space will become a very comfortable place. As long as you are afraid of viruses, do not enter the Universal

Community (UC), because a lot of them are energy packs of what you call viruses, but they are lovely viruses. You can even fall in love with the viruses. As somebody used to say, can you imagine that. (3:08). We already know that virus, we call it love. .. Are there anybody? GL - nobody want to pumping up.
K- Or are they shocked.
GL- Yeah, I think they are more shocked when you said, you are going to teach a Chinese guy about how to create a creature in the tank.

K- We did that, one of the KS created a brain in Barletta. Don't be shocked, look at it this way. You have a womb of the mother, and 2 drops of water create the life, we call it a child. What is amazing with it. It is not a shell, a yolk, a shell, that you crack it and a sperm gets in it, and then something else. It's the interaction of 2 liquids, where in the liquid of the womb of the mother, it takes shape. I give one part, and the tank gives the other part, and the interaction of the two creates life. You see, your lack of knowledge becomes your.. (3:10). I become God, and a magician. But if you understand this, no one can be a magician in the universe, that is why I explain it so simply. When you look at the operation of life, the egg is already inside and part of the womb, in a way, it is made of it, and the sperm enters, and the whole lot start operating as one. When you give me a tank, I add that ?? something to it, and the whole thing becomes a womb, and the ?? created.

It's interesting how knowledge is coming up in different ways and different things with the KS across the world. A KS wrote to me very recently, he said, "Mr. Keshe there is a problem I have discovered." I said, it's not a problem, I know that. He says, I want to do more realistic tests on it. He says, my water has turned parts per million, particles, but when I put Gans Water in it, it becomes 44 or 40 parts per (million) particles. He says, how does this happen? I said, very easily, you convert exactly like the virus, energy into matter of what is available in the water. Now they are going to do a scientific test, (3:12). and come up with a result. In a way, we enter energy in a water, and other particles inside the water convert, by energy to what … it's exactly what Corona is doing. It's an Iranian scientist, and we'll see what he comes up with it as. As we said, 2 or 3 weeks ago, we had a report from a scientist in Iran, for the first time we have gone below Pico meter. Nanometer was our achievement up to now. Now in Iran, it's assigned to an institute, have confirmed, that we have gone below Pico meter. We know that they are there, but we don't have machines to go deep enough to see them. But now we saw below nanometer. We go to Pico, and then below Pico. In fact, is the clear water, still carrying Pico materials, which has given an environment, which becomes a particle. We are converting energy in Pico to matter state, in that … by giving energy back to itself. I told you that if the world switches to peace, and the finances that were put into arms, now goes towards the peace work, oh, mankind will not have enough time to explore every avenue of our life and existence in the creation of God across the universe.

As I said very recently, and I'll repeat again to the American administration and government, especially to the state of California. If you take the state of California, out of the American (United) States, (3:14). it becomes the 8th largest economy in the world, and America as a state, would fall below 15, more or less. Because of a lot of negative,

and other positions which California creates for other states. Now that we have reached a peace condition, many companies in California were involved in weapons, and development of weapons T and arms, and everything they call it under the defense. Now these people are becoming without a job, that's why, as the Trump said, we are getting ready because Iran is going to attack us. When actually he has to find another war to keep these companies going in California and the rest. .. As you remember, it was beautifully said, there was a map of Iran and there were all American flags, as bases, all over (surrounding), then the president said, Iran is planning to attack Americans. Who came 20,000 km to be caused to be attacked, and we still don't attack you, because we are not animals. We are a mature nation. So now we see movement in Iraq, as we have been told, and I spoke with our American guys yesterday in the US, they said, yes, our plan now, is moving, because, we think Iran might attack. I said, no we are not stupid. You think that Iran, through Corona has lost some of its military and you think it's a weak point to attack, but be careful you (don't) get burnt. The Baghdad situation was just a taster. (3:16). The situation in Iraq, 6 or 8 weeks ago, was just a taster, this time don't play with the fire. But again it is the same situation. ..

We are looking for the maturity of the man. Now that all of these guys have gone into worrying about Corona, with the Cronies, and they have to go home, and they have to go in the Navy, and the ships, planes, and they carry the Corona with them. We are prepared to help the Americans, to "de-Corona-tize" before they go. Even in Iraq. We open so much, the hand of peace and love from Iran, that we put you to shame, the American military forces. We don't show you .. it's just because of our strength that we can do, both in science and in weapons T. I speak very openly to the members of the White House, meeting they understand. It ?? extend the hand of peace, let's save your soldiers and your ships, not only in America.

As I said, I'll enforce peace, (even) if it means by writing off nations. Not the people, but the ?? rulers. Try to understand, if what we call, as a through and through peace dividend for humanity, we use all these scientists across this planet, who were involved in military and defense, and whatever names you gave them, to develop technologies for .. (3:18). Now they can't sell anymore they can't threaten each other anymore, into space development and into everything else. Can you consider that humanity will evolve in less than 2 years, more than 20 billion years on this planet, and then Mrs. M will not have a fear of viruses to go to space. As we understand them, we analyze them, and how to deal with them, and how to live with them.

The message today is very clear, Iran has taken superiority in Corona, and dealing with Corona, and we'll use the Iranian military forces to spread the knowledge across Iran and beyond its borders for other nations to enjoy. We put the hand of peace out. We do not need your generosity, we give you, that you stay in power as governments, but at the same time free your nationals from what is happening now. And we'll share the T freely. Iran is a peaceful nation and its T belongs to humanity. We'll spread this T within the next few days, across Iran with the support of the Iranian army, because it's the only way it can be done, that we can reach the whole of nationals, and be able to secure the cities. As we saw with the Chinese, they brought to do the cities, the cleaning and the rest. But

in Iran we are used to using our military for the prosperity of the nation. (3:20). We'll bring that to the other nations. We are not going into developing a condition that we all suffer, we are going to develop a condition so that it becomes peaceful for humanity to enter the next step to peace and T. If we do not get a positive response from Michael Flint, or the White House directly. As you know, lieutenant Colonel Michael Flint is a direct advisor to president Trump. He is the only adviser that he accepts. We have put a message to him. We expect a positive response. If we do not get we'll reach the USS Roosevelt directly, and its chief, to secure its people. We have the means to do so, with peaceful intention, and peaceful application. The same will reach the Governor of Arizona, and California, and we'll change the course directly. We'll break up the animosity through friendship and safe conduct. There is one answer, we collectively work, with the armies to eradicate the Corona, and to bring a new condition of peace across the world. I stand shoulder to shoulder with all the military forces of any color and race, as long as it serves the nation and humanity. (3:22).
Any other question or shall we call it a day?

GL- Can I read some feedback from the Chinese? About the meditation, somebody said, all the matters has the spirit, has the life. Another said, meditation is the practice to link with your soul, to have a call with your soul. Somebody else said, my experience with meditation, is a deep inside view when the brain calms down, and the release, and became emptiness, and the inner awareness starting to expand. Another said, to meditate is to expand the soul, to become the same size as the U, to unite as oneness, then the U energy becomes oneness status, and then you can download it. …To feel your emotions, .. do not react to it. .. (3:24). I agree with somebody's words, they said, Iran is the best nation to open this peace T to the world. I quite agree with that, although you tried a lot with China, but maybe Iran, as you said, Iran has the key, the Iranian nation has to accept the key, and then open the door of China. That is what my opinion is.

K- Can you explain to us the discussions in QQ regarding the Cup of Man, how they look at it. .. What do they talk on the QQ regarding the soul of the system? .. You had it on the QQ this past week, what has been talked?
GL - They are trying to understand why some parts use the N wire and the salinity of the different caps.
K- No, I am talking about the energies, what do they talk about the energies, the Yin and Yang in the Cups.
GL- Actually I didn't see much discussion of that, but I have some understanding … we also think that the STM and the STP, (3:26). can create the field, yeah, as you said, it must to create a soul, so we create a soul of the same strength as our soul, so that we can communicate with it. And today you were talking about the "Beautiful People", so that's what I understand, maybe you'll find that inside you'll have 2 souls, and you can talk with the other soul. K- Can you ask your QQ people how do they see the balance of their fields as a Chinese? Q: A balance of the fields, okay let me ask them. K- In a Cup of Life, because other QQ's who are involved in the work of the soul and the Cup, have very deep discussions going on, on this matter.
GL- From where?

K- I'll give you the QQ to go to. You are not the only place I talk to. GL- Ah, here there's not much people discussion about that. [Chinese]. (3:28).

K- Go into the Taoism chat lines.
GL- Taoism chat line? Where?
K- Yes. You should find it. They are those people who've been around us, and they are considering the Cup of Life with it.
GL- I didn't have that... Interesting. You don't understand Chinese but you are in a QQ group which I don't know...
K- Because they explained to me how... you know with the Taoist groups we met with a lot of them... and they have opened the Chat lines, and they still follow the work of the foundation, and they are discussing it, yeah.
GL- Can you invite me in?
K- No, we if they wanted, they would have invited you in. They are looking at the Keshe Foundation work and Taoism. As you know they always said the two are very similar.
GL- Yeah, yeah, that is what I feel also, yeah.
K- Yeah, but Taoism people always looked at the Keshe Foundation as a, what you call, confirmation of Taoism.
GL- Yes, for them, they only had the older mystery theories, but not much things can be like a really... really can... can see and show. So, that... I also, yeah. I was learning a lot from... from other groups of Taoism also. It's very interesting the more I learn, the more I think it's the same. Just as you say, it's the teaching from the custom maybe 5,000 to 6,000 years ago, (3:30). and now you have teaching in a new modern, scientific way of the old Taoist and more details.
K- And the Taoist groups understand this. They think they have found an answer to many of their long years of questions.
GL- Yes, actually that's why I introduced this to some people and they find it easier to understand you, if they really know what you're talking about.
K- Yeah, because Taoism believes in Yin and Yang, and a balance of the two. We had many meetings with them, and they see the knowledge with the technology as an answer or, what you call it? How do they express it? They express it as a...
GL-Confirmation.
K- Confirmation, yes.
GL- For what they learned from the books, or from their masters. You are totally different, like the new way to explain it so easily, that everybody can understand. Because if you read the old books, for us, we think that's the book of the God. Nobody understands because they, you know, for all of your theories (teachings), they just use several words to describe all of it, the whole of plasma. They do it in just maybe 20 words. They explain everything. But if you just read those words, they are just words, they don't have any meaning. But if you hear yours, you are explaining how plasma is working. We'll come back and say, exactly. That's this, in very simple words. What if you planned the whole world, how to run.

K- The Taoists in China, When they come in touch with the teaching of the foundation is like that they find the missing links. (3:32).

GL- Yeah, that's what I always say. That your teaching is linked to the ancient and the modernized, links the West and East, and links the Earth's civilization with the Universal Community civilization.

K- Thank you very much. So what do your people say? Let me explain to our listeners. We had many encounters and many beautiful meetings, and we made many friends with the Taoists in China, during my stay. .. The more we work with, and the more contact we have with the Taoist leaders and key people, the more we understand we are talking the same. But now we understand more of the same. The Taoist groups, especially in Beijing and in the other places, where we have met, are adamant, that the technology has to become, to be explained to, and the Chinese will understand it, because it's part of their culture. In the groups which work with the Keshe Foundation, with our knowledge they have gathered a lot in past 3 or 4 weeks, especially with the Cups. The Cup of Man. It was a point of mystery to them, which now has been unraveled. They understood a lot, and it has affected them a lot. (3:34). If you look at the 2 Cups, are the Yin and Yang. One has a weakness, which the other one covers. And one has the strength, which the other one has to give. But at the same time, both wear weaknesses and the strength, that the interaction, between the four, in a way, what we call Yin and Yang, or gravity and "magnetical" (M), creates that condition of the balance between the Cups, the Cup of Man. This is what we have with the physicality of the man, and the STM. The STM in the brain, has a very powerful strength, which leads to the creation of the man. But it needs the STP with its soul weaker, to be able to expand itself to manifest the physicality. At the same time, in its strength, it needs to receive, which uses the STP and the actual physical body, to maintain that position of receiving the lowest, that it can give more, of the highest. In our stay China, as I said, we came across many true Taoists, and I've given talks to many Taoist groups and teams, and individuals. They understand the culture of the Keshe Foundation and the teaching in a totally different manner. It's like a fulfillment of what they could not understand. And strange enough the militaries, (3:36). took it the wrong way. But it's okay.

Any other question?
Q: I got the question from the Telegram group, and it's about the two Protocols. How are pregnant women to behave in regards to Protocol 1 & 2.
K- The Protocol has... does not make any difference on a pregnant woman. It's the fields of interaction, if the Coronavirus is there, and has no... no what you call it...

(cut off by Rick, he's not hearing the program ..) ..

R- There's Mrs. Mohammadi and Phillip also has hand up.
K- Lets listen to Mrs. Mohammadi, what she has to say. … Can we have MM, is this the old talk or she still wants to speak? MM- Yes, for just a minute we need you here (for an important meeting in Tehran, please.
K- It's time to close down, yes. It's important for me to be in Tehran. .. Thank you very much indeed for today and I hope we have good news for you.
(3:38).
No, Rick is gone (inaudible)... can't hear anything, He's talking to himself.

K- Okay no problem. I have to go into a call from Tehran. It's urgent. So I would like to thank you for today and hopefully next week we'll have a better news. At the same time I hope today we learned a lot and we'll see what will come and how will... this thing will take shape. Thank you very much.

Thank you indeed. Bye-bye.
This has been the 322nd Knowledge Seekers Workshop for Thursday, April 2nd, 2020. (3:40).

Video
END

323rd Knowledge Seekers Workshop - Thursday, April 9, 2020

* Birthday of Mahdi, Messiah
  Coronavirus will become cancer
  How the virus's calcification is converted back to Gans state

SUMMARY:

start:

The workshop started: it seems that we are still getting more tied up and struggling more with the Coronavirus situation, which is empowering the whole world in every aspect. According to the statistics, over 3 billion people are locked down in their houses, which means we can't move freely as before. In addition, the banking systems have shut, hospitals are overflowing and overloaded with everything else possible, and in so many ways, as we have seen in many videos and from information coming out today and over the past week, there are dead bodies on the street that even the police won't collect. As we've said, and as we have seen in China, in a different way, and in Iran in the same way, and around Europe, and in South America, it is picking up to the same. According to President Trump, as he said yesterday, that he admitted, that he was shocked at seeing bodies being put into the bags and placed in freezer containers in New York, that used to hold meat. This has become the value of the man, and in so many ways, the old system is collapsing. But you have to understand, many organizations who set this up to be able to enjoy the fruit of it, and to become part of (the solution, so they can) run the whole (world), have themselves gotten entangled in this position. We've seen nations covering up, nations lying, and nations doing everything possible, but, in so many ways, there is a lot of hope and joy.

Today is the 9th of April, if you are behind what's happening in Iran and across the world, the 9th day of the 12 day celebration is a holy day and a time of celebration. And if you are a Shia Moslem, then in Iran you celebrate the birth of Mahdi, or the Messiah,

and if you believe in another path, then you are waiting for Easter to come next week. In so many ways, we have chosen the path of so many beliefs, but we never got to the truth. In so many ways, has the time come for Mahdi to come? Or does matter in what name, shape, or form we call upon it. The crisis will become worse, if mankind does not find a true solution, not for the physicality of the man, but through the Soul of Man (STM). In so many ways, mankind has to learn a new way, a new dimension. A new way to preserve his physicality by merging, submerging, and elevating his soul, that the soul looks after the physicality, while the situation for its dimension of life is out of control. Two or three years ago this was hard for many (of you) to accept, but these past years of teaching has brought (many) Knowledge Seekers (KS) to understand. In this process we understand more and more that, "is this crisis for man to learn to look inwards, and understand the source of his own creation?" Or do we need to elevate the STM with the gains, of the Gans, and drinking and covering? When we spray you with the Gans of Cup number 1, do we in reality extend the dimension of your souls? But that you have never understood. The present knowledge and science cannot understand, that we allow the soul to take over, and that for the first time man has a technology (T), which can support his souls, to protect his physicality, and it's the soul which decides, I want, I need, and I have the desire … to live, to extend.

In the past weeks, we baffled the Chinese government, and we heard so many lies that even the paper and the concrete cracked with the loads of these lies from the Chinese officials, when they said they controlled (the virus), and that they had only two or three or five thousand deaths. Where now we see in America, with even some extent of openness, the president admits, "we will be happy with two or three hundred thousand deaths," as he announced in the past 2 days. I cannot imagine that America will run into 1 million deaths in next few weeks. In reality, if America, with all the things they have under control, accept 1 million, then how is it, that the Chinese, with just about five times more population, are announcing that they have had only a few handful (of deaths)? And now, as we hear, the Wuhan hospitals are again full with secondary Corona, (so much) that again, the people are being (sent) home to die. The streets of China are empty, the same as New York, London, Paris, and Rome.

The only city we see wobbling, and (acting) as if nothing is happening, is Tehran. People still rummaging around in the buses, and in so many ways, they are protected with the "Soul of Mahdi". And we understand what is about to come? I've been in the background with this crisis since the beginning, (helping) the Chinese and releasing the One Cup One Life, and solidly supporting the Iranian nation through the Keshe Foundation Farsi team of dedicated people. Soon the Iranian government has no choice but to release the understanding of the new technology. Out of all this harshness, nothing touches more, than in this video I am about to show you.

ENGLISH TRANSCRIPTION:

(:19). .. It seems that, we are still getting more tied up and more struggling with the situation which is empowering the whole world in every aspects. According to the statistics, over 3 billion are house down locked, which means we can't move freely as before. The banking systems shut, hospitals overflowing and overloaded with everything else possible. In so many ways, as we have seen in many videos, and information coming today and in the past week, dead bodies on the street, that even the police does not collect. According to President Trump, as we said, we've seen it in China, in a different way, in Iran the same way, and around Europe, and in South America, picking up to the same. President Trump yesterday said, he admitted, that he was shocked seeing bodies put into the bags in New York, and put in freezers, containers, where they used to hold meat. This has become the value of the man, and in so many ways, the old system is collapsing. But you have to understand, many organizations who set this up, to enjoy the fruit of it, to become part of, to run the whole .. themselves have gotten entangled in this position. We've seen nations covering up, nations lying, nations doing everything possible, but there is a lot of hope and joy, in so many ways. (:22).

Today is the 9th of April, if you are behind in Iran, and across the world, it is the time of celebration, it's the 9th day of the 12 day celebration, is a holy day. If you are a Shia Moslem, in Iran you celebrate the birth of Mahdi (Messiah), and if you believe in any other path you are waiting for Easter to come next week. In so many ways, we have chosen the path of so many beliefs, but we never got to the truth. In so many ways, has the time come for Mahdi to come? It does not matter in what name, shape and form we call upon it. The crisis will become worse, if mankind does not find a true solution, not for the physicality of the man, but through the Soul of Man (STM). In so many ways, mankind has to learn a new way, a new dimension. A new way to preserve his physicality by merging, submerging and elevating his soul, that the soul looks after the physicality while the situation is out of control, for its dimension of life. Two or three years ago this was hard for many to accept, but the past 2-3 years of teaching has brought Knowledge Seekers (KS) to understand. In this process we understand more and more that, "is this crisis for man to learn to look inwards, (:24). and understand the source of his own creation?" Or do we need to elevate the STM with the gains, of Gans and drinking and covering? Do we in reality, when we spray you with Gans number Cup 1, we extend the dimension of your souls, that you have never understood? That we allow the soul to take over, and the present knowledge and science cannot understand, that for the first time man has a technology (T), which can support his souls, to protect his physicality, and it's the soul which decides, I want, I need, I have the desire, to live, to extend.

In the past weeks, we baffled the Chinese government, and we heard so many lies that, even the paper and the concrete cracked, with the loads of these lies from the Chinese officials, that they controlled, that they had only two or three thousand or five thousand deaths. Where we see in America, with even some extent of openness, the president admits, we will be happy with two or three hundred thousand deaths, as he announced in the past 2 days. We will not... I cannot imagine, that America will run into 1 million deaths in next few weeks. In reality, if America, with all the things they have under control, accept 1 million, the Chinese with just about five times more population, (:26).

they announced they only had a few handful? And now, as we hear Wuhan hospitals are full with the secondary Corona, that the people have gone back home again, to die. The streets of China are empty, the same as New York, London, Paris, Rome.

The only city we see wobbling and no, as if nothing is happening, is Tehran. People still rummage around in the buses, and in so many ways, they are protected with the soul of Mahdi. And we understand what is about to come? I've been in the background with this crisis since the beginning, with Chinese, releasing the One Cup, and supporting the Iranian nation through the Keshe Foundation Farsi solidly, with the team of dedicated people. Soon the Iranian government has no choice but to release the understanding of the new T. Out of all this harshness, nothing touches more than, what I've asked, Rick, if you can show the video I just sent you.

Look at this video, and you'll see a young man, in his mid-30s, battling with Corona. On Sunday night, when we were at the Keshe Foundation Team in Tehran, they said the sister is here and she wants help. (:28). Can we give the protocol and tell her what to do? Her brother is in critical condition, has been in the hospital for days, and he is on all sorts of machines and everything else. Strange enough what we'll see here, even the West, the American hospitals, the European and the Chinese hospitals have none shown such a dedication and such a latest equipment in supporting a normal man's life. He's not anything special. He is a normal man who happened to be in the hospital, with the Corona and you see Iran is well equipped. Iranian hospitals with all the sanctions put on them by Americans, looked inwards and built the latest machinery in Mashhad with the support of the top people, top of Iranian scientists that even the Iran emergency rooms are envy of the West. But what is important, is not that these manmade machines support life, it's the story of the man in the bed. When I spoke to the sister of this gentleman, on Sunday, with the KF team, he was on the deathbed. He was on the last stages. We gave advice on how to use the Gans water. He was connected (with machines) to the stomach and breathing system. And, as we know, these are the stages when there is no return. (Rick dropped out from Internet ..) … (:30).
What happened is the medical team in the hospital had no choice, they had never tested the Gans technology. The sister being a nurse, tries to adopt, and she just sprayed the body, not following the protocol, which she was given. Then, lunchtime, I was told his situation has gotten worse. His breathing has gone up, his blood pressure has gone up and it's dangerous. I asked a single question, "have you followed the protocol?" "No, we just sprayed, it was just sprayed." I said, "no, it has to be followed according to the protocol we set out." So, the doctors knowing the patient is dying, they left it to the family and they said to whatever you like. The sister follows the protocol. Hours later, the blood pressure drops, the breathing drops, (:32). and this morning he is discharged from the hospital, totally discharged. In the video, which will be played if Rick appears, … he is asking, he is telling his sister, "I want to go in the morning, I don't want to stay until afternoon tomorrow." He has got 2 children, and in so many ways, according to the rest of the world, and the scientific world, he should have been in the coffin by now. … In that process, we saved this man's life. He went through the trauma, knowing we have 2 or 3 videos from him everyday, from the sister in the hospital. We can show you a number of videos from him.

The KF team in Iran has achieved miracles. The Iranian government is holding on until everything is 100% correct, when we announce the technology breakthrough. But as the KF is One Nation, (:34). we have broken through. Why I show you this video, is very simple, unknown to us, unknown to the KF Team, in the same hospital, in the same emergency unit, and the same time as him, some 10-15 days ago, a woman of 30 year old with a six-month child was admitted, and she was parallel with him, in the same conditions. Yesterday in the afternoon, the hospital authorities were faced with one patient surviving and wanting to go home, and the bed next to a girl, under the same condition, going into heart failure. In resuscitating the body and knowing that they cannot do anything, they say to the sister, the family of this guy, that, "now you can use your "magic water" and see if it works, she's dead already, she's gone, her body doesn't work." The Keshe Foundation Team rapidly deployed 4 of them, with a doctor to go to the hospital, but by the time they arrived to the gate of the hospital, the mother was dead. What was strange, was the doctors wanted to see if the KF technology really works, and can save lives, and their egos and stupidity, led to the life of a child, not having a mother for the rest of her life. (:36). Where they could have allowed the same to be applied on her, and saved the life. The doctors wanted to prove that they have 2 parallel cases that they can compare, a man of 35-36, and a woman of 30, one with 2 children, and one with 1 child, and then, these doctors played "God's game." How many more lives are we going to sacrifice? Or is the reason for this a bigger picture, a bigger game?
Can you play the video? [Iranian]
By the time we put this teaching out, he should be home with his family. (:38). And by the same time, another woman will be buried.

There is a huge question mark has risen internationally. Why KF technology with such effective work is kept out? There is one reason only, the king of Belgium. The lies, the fraud cases of their own fraud, has put the life of many, many people, online, and dead. And now we understand why so many governments are holding back, because of the lie and the cheat of the pedophile king of Belgium. And we make it a clear line. There should be no king on this planet. There should be no king, that they can play with these lives, in their stupidity, arrogance, and the greed and abuse of man's life.

There is two courses running at a moment internationally, in the background. One is that the KF should take over as a One Nation Organization, and the other group which is the Illuminati's, Rothschild's, Gates, Rockefeller, other Foundations to create what they call immunization control, and then control international. But there is one thing clear, as of today, we launch a massive movement on how to overcome all the pharmaceuticals, even using the pharmaceuticals medication to overcome the man's illnesses. We don't destroy them, we use them, to destroy themselves in a very simple way. (:40). Let me tell you the reason why. At the moment, medication has become restricted. Many corners of this planet there is no flight to deliver. We will see 1 million people dying of Corona, what we see millions more dying from the lack of medication, which is not, cannot be supplied because the pharmaceuticals producing these materials are closed. Secondly, most of the stock is kept for emergencies. The whole problem is very simple. Those who are ill, which was the bigger plan of the Gates Organization, is to get rid of the weak and the

sick. Many people will not die of Corona, but will die of a lack of presence and delivery of medication. We have two choices, we take over this part and save many lives and run as One Nation Organization, or we wait in the second part, more cancers, to kill more of. Now you understand the bigger plan of the Gates Foundation. When the weak are gone, when the sick are gone, we have a healthy nation. And the new world president, as he sees himself, as "the Bill." Now you see the bigger plan. You don't need to do much, (:42). you created the virus to kill the Chinese and the Iranians, running out by the Italians right across the world, then, now a new strategy, we see it running, killing as many weak as possible, no medication. Then everything is controlled under virus, and what we call, Immunization Control. In fact, we estimate the total death, if it carries into 6 - 8 weeks in the Western world, in the region of 100 to 200 million across the Western world. The figures will not be Corona, the figures will be lack of medication. Dialysis machines not supported. Heart systems, surgeries, heart system failures, cancer, reduction in receiving chemotherapies, and so on and so on.

The Western governments are shouting, "The Chinese didn't tell us the truth how many they lost because what we see in our figures does not show their figures, they lied." It doesn't matter whether they lied or not. No one has the solution. In the last weeks, I repeatedly increased the infection rate, from lung to brain, to intestine, to sexual organs, to bone marrow, to nails and the skin. And when I discussed it with one of the leading scientists, past 48 hours, (:44). he said, "the skin, never." And amazingly, the French are reporting it, massive amounts of skin rashes with the people who have Corona, and they don't understand what the rashes are. And we announced it. It will come, because skin is part of the brain, and is the same as lung. It had to come. The strangest thing is, in the first case we saw in Iran, in past 48 hours, it's very easy to detect. When you spray, the body of a man with the Corona skin, it goes through excruciating pain of skin. He cannot stand the pain, he cries, and it's worse than being chopped off the fingers, or whatever they call it. And why the pain is not there, until you spray the Gans Water on it? Gans number 1 immediately shows it, and the only process, is to wrap the body with the Gans solution, and repeatedly for about 3 to 6 hours, until the pain goes. Until you, in a way reduce the energy of the Ca, which created that rash, that, what we call, redness and bleeding. It's the salt, Calcium, which caused it. You call it cirrhosis, you call it any other name you like. The pictures coming from the French organizations explicitly, clearly shows it, and we understand it, that this is exactly what it has been said. You see. (:46). I'll send it to you because now it's posted into KF Farsi language. …

It is now physically visible. What was happening in your lungs, and what was happening in your brain, now if it moves to your skin you see the Corona for the first time. And this is what I taught you last week, that if it becomes, if it changes and mutates to make the second of its own, then mankind is in a big problem. … and you see more and more. (:48). Now for the first time .. you saw it last week, we showed it to you with a simple picture from the KF Universal Council (UC) from Italy. When she sent us the finger (photo), because she was affected. She took it as, this is not going happen (to me), and guess what, she got hit by it. And she can see it on her finger. She has it, and we managed, and we worked safe and heavily with her till we managed to get it out. She says she is doing well. You could see it last week in, (shows the picture of redness on finger

and feet). This is what you will see. This is the Corona, and in the future this will become skin cancer. In so many ways, now we see, this game of Corona will not be ending. Rick, if you can take a picture of this and put it next to the picture of what I just sent you, please. You got to understand, (:50). many Knowledge Seekers (KS), knowing and being around (the technology), did not consider themselves to be in danger. Two of the Universal Council members have been hit, and up to now, we have managed to save their lives. Both of them critical.

The Corona does not know race, creed, nationality, or color, as the stupid leader of the Western world says, 'there are more blacks dying.' Because now he can change everything to blame. The "blame game", "race game," has started with the world president. It does not have such a good look for rest of the world. You can see Corona on the nail and you can see Corona on the body. The redness, the irritation comes from calcification of the cell at that point. And it's like putting a salt on the wound, that's what it looks like, and that's what it becomes. If it's here (on your nails), it's (also) in your lung. If it's here, it's in your brain. These bodies have a limited life, according to calcification and the cancer in next 12 months. (:52). Most probably we will not see these bodies alive in next 3 years, even sooner, except the one on the left with the finger.

The World Health authorities have failed to protect, and it has no authority, as president Trump said. And as we've seen, the European Union is falling apart. On office buildings, the Union flag of the European Union is being replaced with the national flags, as the EU cannot do anything. We see hunger in Italy, France. We see hunger and looting in the United States, as videos are emerging across the Internet. One of the reasons there are rumors that they might cut some of the Internet, is not so much traffic, it's so much, the truth we cannot get out, we have no control. This is exactly what the Chinese did in Wuhan City, across China. In Wuhan City, they brought 1,600 specialists from across China, to see that no one sends no more videos, that it looks Wuhan City is clean. Wuhan city is dead. Some factories in China are working, but there is no guarantee and assurance, (:54). that the workers will be there in time to come.

We have offered the Iranian government a comprehensive technology, system, procedure, protocol, and functioning systems. The KF Team in Army Headquarters, have built and developed the technology, that the Iranian army can take over, and with collaboration of Sepah, to clean up Tehran. Pictures has been on the Internet. It's not something we hide. It's the time for the Iranian government to put those officials, who have bank American accounts, to be put aside, that they are not working in the favor of the nation, but in the favor of Gates Foundation. It's the responsibility of Iranian leadership, to clean out the ministries, and those who carry a double Passport, of Iranian and American passport, and waiting to cash in on Corona, and "crony" themselves to the United States.

We gave the technology free to the Iranian nation, and many tens of thousands have used, and are using it. You will understand, the tipping point will come, when one of the world leaders dies and no one will go to the funeral. (:56). There are a number of world leaders and their families, even have lost, but, there is a news blackout. Would we see Boris Johnson in 10 Downing street? And if he comes back, would he be as competent to carry

the term, as the virus will be change into a cancer? The process has to be comprehensive. The process has to be as One Nation, One Planet, One Race, and comprehensive enough to save many lives.

What we want to do, is to want to bring all of the KF, all the reports, as you showed the Cups you made, we need those who saved their lives, and used it, to make videos, and in the next few days, everyday, we play this across the KF Internet, and you'll pass it on to the world media. Short, 5 - 10 pictures, people video what they use, and saved their lives. We take charge to go into masses, and then we take control without governments, as they are not governments, they cannot even govern. There are no armies, as the soldiers refused to go on the ground. (:58). The only soldiers we saw on the ground was in China, they were ordered, and if they did not carry the order, they were executed, exactly like Hitler.

In the West, armies have been told to take shelter at home, and they might employ, and deploy a few, just for a show. We saw in America, as last week, as we supported and offered the support of the Iranian army, to help with the USS Roosevelt, within hours, the head of the ship, the captain, was dismissed, that he should not have done that, that the world knows the Iranians are coming to help the Americans, and then a few days later, the head of the whole army of that section resigned, because he knew the truth. Very soon there will be no police, as they are afraid of catching it, there will be no military, as they be afraid of catching it, they are no doctors, that most of them have died in trying to help the others, and there's nobody to bury the dead, and the virus will seep through.

There is a very, very, very weird and amazingly, if you understand it, shocking picture. Rick, I have sent you the picture. Have a look at this picture, put it next to this, if you can do it, (1:00). and then I tell you what is the biggest fear for mankind. Have you received it? Put it somewhere in between. Can anybody tell us where is this picture from? This is Italy, if I'm correct. This is a church, but the most shocking thing with this is, the seats of praying God has become the seats for coffins. But this is not the shocking wave. The shock with this is, the guys spraying and being afraid of even the dead in the coffin, two of them. Then you listen to the words of the American president, the bodies are put in the bags and into the freezer containers, and as we hear, they are moving them in New York to Central Park. But does anyone, has anyone guaranteed that the fuel will be there to run these freezer containers? And what happened when they melt, when there is nowhere to bury them, and there is no one to bury them? We are even afraid of our own dead bodies. How many times a day do they spray these coffins? (1:02). Or, as we see the beauty of the color of the shine of the coffin, it's only for those who could afford the box. As you can see in the far corner, left, there is one coffin, the rest is to come to add, it's already space gapped.

Are there that many coffins in the Vatican? Or is Vatican hiding? I can show you the pictures of the mortuaries in Iran's own hospitals, where the leading clergy's have been coffined, with their name on it. How many of these are doctors, scientists, and those who served the nation? The assets of the nation is boxed.

Is the policy to get rid of the educated at the same time, so that we can run and rule illiterates? I can release a paper from the Chinese government officials written in detail, (1:04). for us to understand, to develop a technology for Corona, for the Chinese. In this information paper it says something for simple, very, very discreet - survival rate, 10%. Survival rate, 10%. Then who are we kidding? Do we believe the doctors who wrote the report while monitoring their patients, or do we believe the politicians. What is the truth, the total death total, for this game, this time? (1:06). The point comes, that, do we go out to serve our nations, or do we go out to serve humanity. And what is interesting for us is the simple facts, what is the limitation in this destruction, or do we all sit and wait till Corona comes to us. As it was in one of the teachings, do we go in the old way of putting, "blood over the front of the door," that the virus doesn't come, as now you can cover the front of the door with Gans's, and the Corona will not come in.

As I said many times, "I am the Mahdi," and in that process, we have given you the key to survive this, that in the process, you survive the rest, what to come. In so many ways, you have to understand one simple, one understanding, one process, and that is, how far are we going to allow this, (1:08). to take over us, and do we literally hide. As we saw a couple of cases of some of richest people loosing their family to Corona, they take their life by jumping off the towers and hotels. To what extent are we going to extend this, and to what extent are we all going to hide and hope that it will not come to us? Or is all going to be in those boxes? (1:10). We don't have an answer or we have an answer, we do not know how to put it down, explain it. Or they have made us so scared that protecting our lives is a criminal offense. We can't talk about KF because FDA and the governments are going to come and get us, or have we, in a simple word, if you understand the full meaning of it, FDA, have a ?? ?? ourselves. Have we allowed a bunch of incompetent people to scare us, that even the president has no say.

I am going to release something, (1:12). very, very interesting. This is observation and comments from frontline doctors and written for us to understand how to tackle Corona. And I cut, I have taken pictures, snapshots of the picture, and this is the official Chinese government frontline. This is not from us, and what is important, read, very, very simple, this is the Chinese government, this cut out, and I'll send it to you, when we give you data, how correct our data is, from governmental report, and not by those who just gather to understand. Rick, I have sent you the extract from this report, I would like you to put it on. In so many ways, now you understand what the Chinese government knew from the beginning of the crisis. If, as we say in English, push comes to shove, we'll release the paper. The official paper written by the team of Chinese scientists to inform KF, (1:14). how the situation is. In this report we read details how they die. And read it, "if being admitted to the hospital after serious illness, the hospital treatment and ventilators is not effective. No matter if we use noninvasive or invasive ventilators, inhebations?? did not help much to eventually reversal of the disease, only 10% can be saved, as long as the .. and the rest of it." Rate of survival, according to Chinese government official document is 10%. Now you have everything together, and now Chinese cannot lie. Ten percent of you will survive. This is written by the frontline doctors. (1:16). You got to understand, they might let you go, but you come back soon with a secondary Corona. Were the Americans waiting for the truth, the Chinese truth is on the table. It says, "if being

admitted to the hospital." Most of you are not admitted to the hospital, there is no room. This is why the Chinese government built so fast, in days, hospitals they called it, but is was actually what the official, Secret Service China, called it, "mobile mortuaries."

The biggest problem is that the US, the Russian, and the rest sit on my phone and monitor every squeak. So in fact, CIA knew that 10% will survive, and they lied to their president. (1:18). Is this how we are going to go, and do you want me to show more confidential reports. You do not have time, and you don't have time to play. As I said before, the Russian scientists in the past 7 days confirmed my word, that we will see massive cancers in the coming months due to Corona. This report should have been released 2 months ago when I received it. It's not confidential anymore. Then, Wuhan City with 9 - 10 million, doctors give you 10% chance of survival. 50% of the population, they say infected. It gives you around 2 million dead in one city. (1:20). I was correct, China has lost 20 million to Corona, and will loose another 400 to 500 million in the next 3 years through Corona. But the story is worse in India, and it will get worse in Europe.

Let me tell you what we have seen, the Internet systems will go to minimum. Most probably the KF network will go down in next few weeks. You have to understand, that corporations don't have the engineers to repair the mechanical side, as the mechanical parts, making parts are frozen, not working. We'll go into emergency communications only, the telephones lines will be worse, and most of your mobile phones will not work. There are no engineers to support, to repair, unless we take the attitude of northern European nations, and just go and do it, and we'll keep it going, until it is, the last man drops. We'll find somebody else for it. Or we go viral and we save lives.

You are all sitting home. Most of you can't even move. Most of you are homebound. In the Iranian teaching on Monday night, out of nowhere, a lady wanted to speak. She came online and she said who she was, she lives in Canada, with her husband, both were infected, (1:22). she tells us that, they were infected because their future son-in-law was visited by his father from Hawaii, professor so and so. He was infected and he died sometime late last week, the third person to die in Hawaii of Corona, and in the family meeting, he gave the infection to the Iranian couple. They had no choice, and they go into the critical condition and knowing the KF work, they got support and she's says, we are alive, thanks to KF and thanks to the technology because, the father-in-law to be, has died, a leading professor in Hawaii. They knew their destiny, but the 2 are alive. They managed to save their lives through using the Gans technology.

It's our work to spread, or I can keep on teaching you new things to do, but with the 2 Cups, Cup 1 and Cup 2, I taught you how to look after your physicality. With the Cup of Man (CM), I showed you how to elevate your soul, that the 2 Cups are not needed. When you make the CM do not look into the Gans of the Cup, look into the soul of the Cup. This is where you'll find your strength, (1:24). and this is where you become a twin of a set. When I explained the CL and the CM, you all, always looked at the physicality. In the Cup 1, I gave you the physical dimension of the white tissue. In Cup 2, I gave you the soul of the condition of the physical part of the muscle tissue. In CM I gave you the interaction of the soul of the physicality (STP) and the soul of the man (STM). In a way,

you have, you built yourself a twin system, where Cup 1 is stronger because it carries the Zn, and Cup 2 is weaker, which carries the Cu. In a way, when the STM through the emotion, gives to the physicality, you have now created what we know as a single soul. But this is the Cup of the Soul of the Man, we call it the man. Now I stand the man, in front of his Cup, and I put the STM, (1:26). then, now you understand the gift I gave you (Infinity Loop between the STM and soul of the Cup). If you understood, you should have made the Cup this way (vertical, Cup 1 above Cup 2), the Cup of the soul, and the Cup of the STP. Then when you stood man in front of it, you would have seen, both, and in so many ways, you should have got your answer. In a very, very simple way. The CM is not the Gans to drink, the CM is the soul of the Creator, to give. (1:28). In so many ways, if you made the CM, and made with absolute purity of heart, the man can be you, your children, or any, that is the ethos of the KF. We are here to serve, and this is the ethos of the KF with love, we give, loving is giving. In so many ways, again, all of you, I left you for 2 weeks to think about it, could not understand. You built it, you sat in it, made and connected wires, and this and that, and the KS are still wrapped in the rope of physicality and never understood. They write, "it doesn't produce enough Gans's." I answered to myself, what a stupid comment. Have you seen the strength of his soul. As I said, at the beginning, (1:30). with the new technology, to overcome this, you need a stronger soul to protect the physicality in the time of trouble. And physically, you are in trouble. So extend the soul.

Many of you, many of you, will run out of medicine, those of you who are critical. There are a number of ways you can support yourself. Is your medication for depression, for emotion? Try, and try, to make a sack, plastic bag, if it is liquid or tablet, and place it in the Cup with the Zn. And see how you feel. If your medication is for your physical, place your medicine in a bag in Cup 2. If you have a psychosomatic conditions or cancers, (1:32). try to understand why, with both. Try to be in the vicinity of your system, with your soul, not with your physicality. At least you can try, maybe you'll find, that you'll find an absolute solution for your illness without any further need for medication. A guy wrote to me, "Mr. Keshe, I am a drug addict, and with everything stopping, the prices are going so high, help me." Maybe you should put that in Cup 1, in a combination of the CM.

We'll govern through the soul, not through the physicality. We'll elevate the STM, that the physicality does not count in the dominion, in the dimension of the universe. Now, you still make the Gans's 1 and 2, and at the same time you support the STM. (1:34). Let's see how many of you will survive the time. Let's see, in so many ways, how many of you will tap into the Cup to take from it, for your medicines, for your dimensions of need. If you understand this process and not just become a copycat, you'll find out, on your table of food, that will feed you through your soul. You will stand the harshness of time, of no food, as you make your soul, to look after the physicality, through the energies of the universe. We feed, we look after you, and we don't every govern you. In administration and what we call, the executive, we do not carry no power, but the power of support, (1:36). teaching and share of knowledge. The executive and the administration of the KF, UC, and the EC, stand on their own to support and never will rule. The only point of reference for mankind, in total support, is the head of the KF. And

we appointed 2, one for China, and one for non-Chinese speaking, as the Yin and Yang, and the balance will come through two women. You rule on your own, you stay the king of your own soul and physicality, and there is no one to govern you, except your own conduct.

There is no king in the universe, except the Creator, and even He does not accept the seat of kingship. If the word Mahdi, Messiah, Shaddai, whatever you call it, (1:38). the name of the Creator, and if today, His birthday, what better gift, he could give on his birthday. We have freed you from the shackle of everything which the man has been shackled on to, and not only for this planet, but for the whole race of the creation on the universe. Now play the game. You know the Cup 1 has saved many of you, and you know Cup 2 has saved many of you, and now you understand, the Cup of Man is for the life of the man to make him his own king. In a way, for him to make his own destination and his own destiny. Today I have given you everything the man needs to live in the span of Universe, in the spaceship, or in the space of his own soul, or in a ship called Earth, which is traveling the depth of the Universe in its own space. (1:40).

We give the false kings of this planet a few more days and weeks, and we put the crown they put on the Son of God, on their head. Today is the birth of Mahdi and he has manifested himself in all dimensions to save humanity in every condition for his soul. From now on the physicality is irrelevant. Physicality is weak and feeble, and the Soul of the Man stands a better chance to survive within the span of the Universe. Then this soul has to make its own decisions - who and how he interacts to guarantee his survival and expansion and his nearness to his Creator. Once you leave this physical body, or you allow the Soul of the Man to take over at the point of birth to the new dimension; the race is not to live, the race is to reach the point of the Creator. (1:42). Now you understand our mission and our work, and we have shown it step by step. You can write whatever you like on these flimsy pages of buttons of Internet, we'll... shall rule. Let's see how the game will be played. But one thing for sure, we have never been wrong.

When you read the report from the Chinese doctors written confidentially for us to understand the illness, it shows the fear of creation. It shows a lot of, what I call, weakness, powerlessness with all the knowledge, to save a life. (1:44). So when you see American government gives you 400 thousand infected, expect 40 thousand survival. In fact, 400 million population of United State should look to be very simple, 40 million. And most probably this number are those who have gone to their soul, that their physicality is not touched. We reckon Chinese population will dwindle to less than 100 million, when Corona finishes. We reckon India will be about the same. Iran, 70 million population, will linger round about 30 million - due to the use and application of the Keshe Foundation technology, (1:46). as they already agreed and announced. The Iranian protocol, procedure followed, as is written by Dr. Asar ?? and Dr. Baraco ??, will become the cornerstone of the man to survive. This is, if the new technology is not followed, and this is when the new technology is followed. And in any way, due to high level of highly educated people in Iran, we'll see that figure to stay. Due to the high level of illiterate in US and India and China, the figures will go to that level.

In Iran, the women have taken over, to oversee that the technology goes and they can save their children and their family. There is a way to change this, and in reality it stays, how fast the governments implement the understanding of the Corona in its true essence. (1:48). A friend said, "Do you know something? Nobody will take the Oval Office once the president dies, because it'll be contaminated." Then we know this president is very touchy, he touches everything, moving, or dead, or furniture.

The responsibly of the doctors and scientist is, rapidly understanding this virus, the way it is set out, the way it's been explained. And in so many ways, does the human race wants to be here, or we take this path? We distributed Cup number one and Cup number two, now you imagine you give Cup of Man, and tell people this will save you. If they believe in the strength of the soul, it will be done. Then the ethos of, "doing good, acting good, and thinking good," will keep them in track. In a way, the Cup becomes the measure of the soul, and the man becomes a measure of physicality. (1:50).

I have accomplished why I came here to accomplish. In a very strange way, mankind will come to accept the knowledge of the universe out of his own demise. In so many ways, in the Roman time, and olden days they told you to put a cross with the blood of the animal, which was actually the Gans, which through its structure absorbed the virus. This time we don't sacrifice, we give you the knowledge that you have the total understanding, and you can elevate the Soul of the Man. This time we gave you the knowledge in truth, and not by fallacy through your own stupidity and lack of knowledge to understand. In so many ways, if you understand this operation, if you understand the work of Cup of Man, you will understand how to survive in the universe. What mankind will do, (1:52). in the coming time, will make the Cup of Man, the Soul of the Creator. There is no need for physicality. Then you will understand more in the new dimension of the creation, as he has created it in the Unicose. Some of you will reach this point in no time, and some of you will take a lifetime of the universe to get there.
Any questions?

(WL) Hello, Mr. Keshe?
(MK) Yes, Madame Wang Lin?
(WL) Yeah, I have a question from a Chinese Knowledge Seeker. Before the teaching he sent me the message, and actually it's, it's quite fit with... with what you told, teach us today. Just one moment. Let me read his paragraph. He said: (1:54). "Show my best regards to Mr. Keshe. My name is (?), I come from China, she adds, I'm like, like a "light ascension people." Since 2011, my body has already switched to a state, doesn't need to consume any food and water to get energy to maintain my... my life. Since I heard Mr. Keshe teach about, the live with light. From the science point of view, explain this natural phenomena, the series of the natural phenomena. Let me have more deep understanding for my situation. At the same time I want to teach more and more people to achieve this capability through my personal experiment. To achieve what Mr. Keshe's ?? for change the humanity to get energy through kill and rob. I mean the bad habit. To achieve a human peace and also want to promote this technology to bring benefit for Chinese people. Personally I want to ask Mr. Keshe a question. In my situation now how can I improve my soul further more to really reach the universal society. (1:56).

(MK) According to what he writes, he has become, but it still lives in both dimensions, which we all do. … In so many ways, to reach to the next state is the acceptance of the separation. Or stay in both dimensions of life. Doesn't mean just because you don't consume by killing or destroying, you don't and you cannot enjoy the beauties of the physical life. This is the beauty when you are enlightened. As I said, the very first time Caroline asked me, "Why do you come here like this, then?" I said, we come here for the pleasures of the physicality, and not to be odd one, we live exactly like the way you do. Its beautiful when you hold a woman, when you say to her, you love her. When you hold the child, which is the creation of you, and admire it. It's beautiful when you can touch a flower and see its beauty. It's beautiful when you hold a fish and you can see that fish lives in the dimension of universe of his own. In a dimension of the soul, tangibility cannot be found so easily. With the understanding of the knowledge, there is no reason not to live in both dimensions. (1:58). Because you're not taking from it, most probably you become a converter of it for the others to live from what you convert. So, maybe this is the best way to be. And you can live this life for thousands (sound drops out..). Now that we have the knowledge we don't need to move on and do others. Now we have a choice to create children, through the interaction of the soul, or through the interaction of the physicality. Would the love of the father will be any different from the physical, or the soul? In so many ways, it comes back to what we speak about schizophrenic. Now we understand who we are. Do we want to be present when one is present in the dimension of physicality, when the others live in the realm of the soul? Or do we want to be present at all time, to enforce we exist through dimension of physicality? The anger, the insult, the dimension of life, which we do not even want to speak of.

In Judaism there is a golden rule. It says, if you understand the meaning of it, and I've discussed this many times before, does not matter if you are in fight or whatever between a couple, on the Sabbath, (2:00). the physicality has to bring the love of God into the house. Jews have never understood the true meaning of Saturday or Friday night, and they converted in total physicality. In so many ways, if you've been with the Jews, they always have a little thing stuck on front at their door of the house, and they touch it, and they kiss it or they kiss it and they touch it, depends on the structure of the understanding of it, in their own soul. All it says is, "I'll bring the love of God into the house", nothing else. In a way, when you come into the house you come with my soul and not yours. It's become so habitual that the real essence of linking to receive has gone. It's exactly the same as that blood over the door in the time of the crisis.

If you have reached that point, you can survive the universe. If you have reached the point that you do not consume physical dimensions, you have reached the point that you can take into space in the dimension of universe, but you need to learn. You need a lot to learn, that like a first time pilot, (2:02). you don't crash when you take off. Nothing else we can do if you reached. Many, many Chinese have reached this level. You got to understand the manifestation of the soul enlightens all the souls and it depends on the what I call, the strength of it, what you receive, and when you evolve. It's like a book you've read many times, but it doesn't have no meaning, and you read it once and it touches you, and it brings so much different meaning to the whole reading. How many

times you have listened to a music over decades and then one day, when you're in the right mood and the word comes, and it shakes you and brings tears to your eyes? Because now it has a meaning. It has a value. It has a new understanding and comprehension, and so many times you go and listen to it again and again. Sometimes it gives you the same feeling and sometimes you search for that feeling when it came, but it's not there this time. We touch many souls in our daily lives, but in which soul we give, or do we reach the point of maturity that we give to all the souls, unconditional? (2:04). So the guy doesn't need to worry, if he really understood, and at the same time understands, when he decides.
Any other question?

(SM) Hello, Mr. Keshe.
(MK) Yes, Ms. Mohammadi (SM) [Farsi]
(MK) [Farsi] Let me translate. Mrs. Mohammadi is saying that they have a special program from the Iranian Keshe Foundation team. Yes. (SM) [Farsi] [Farsi] [Farsi]
(MK) This is part of the Universal Council job when what Mrs. Mohammadi explaining is, any Iranian across the planet who lives anywhere, doesn't matter which country, get in touch with the Keshe Foundation Farsi Corona team. They will teach you. They'll train you that you start supporting the Iranians in your community and the others. This is part of the advanced progressive work of the Keshe Foundation Farsi language. We have many people across the world, (2:06). Iranians coming to the chats, wanting help or they have problem in their countries, as we heard from Canada. Now the Iranian Corona team is trying to teach those that they become a center for the Iranians in their countries. Many Iranians have been hit by Corona. It's not just the nationals, they are part of the nation and we see many of them emerging. In Austria, a lady who had a Corona was put in a basement 2 or 3 weeks ago, till she dies or whatever. The Knowledge Seekers in Austria, the Iranians managed to get some GANS to her, and she started using it. She came out of it, they took her to the hospital, and they said there is no Corona. They don't understand how it's disappeared, and this is an Austria past week. Our team are in communication with the... Iranians are well spread across the world and it's the beauty part, of the Iranian Revolution, that maybe that was a reason for it. Now the Iranian centers and what we call our points of reference to support the others, and the Keshe Foundation Corona in Farsi, is asking for all the Iranians across the world to get in touch. Go through the Keshe Foundation Farsi Corona team and they will teach you. What they've done in Iran, now they're spreading it across the world. And this way the Iranians become the point of transfer of the knowledge to the locals, the way we have been successful in Iran.

(MK)[Farsi] (SM) [Farsi] [Farsi] [Farsi] (2:08).
(MK) What she's asking is, to set up a Zoom for all the Iranians across the world, who want to join and those of you who are part of it, that meet regularly on a daily basis to expand a spread of the technology across your country, because now you become the reference point and the success in Iran can be repeated across the world. What is the idea behind it, is that the Keshe Foundation Farsi language becomes the center point for the spreading technology and people to use. Let me... [Farsi] [Farsi] The important point is that you're offering a technology and a knowledge. And it's people's decision to use it. This is very important. You offer humanity a way to serve, and save themselves from the

situation there is now. Never offer a cure, or what we call, any other thing. We are a scientific solution, and keep to that, because we see a number of people who try to abuse the system. And try to explain to everyone, this is a free knowledge. We don't charge for it. It's a knowledge there, you can test, and you can try. This is very important. And especially, (2:10). offer it to your police, medical hospitals, and gradually you will see what will happen. We'll let you know in a few weeks time, in a couple of weeks time. [Farsi] [Farsi] (SM) [Farsi]

(MK) There is a problem I have to explain. We hear in the background there is going to be problems with Zoom. Zoom operation could have some problems, we do not know, but we hear. So we try to set a two-track system, one is Zoom, and one is the Telegram. That (if) each one fails, the whole process doesn't fall. So, all the Knowledge Seekers, Keshe Foundation supporters try to access both systems, Telegram and Zoom. That if the system drops will go into Telegram. (2;12). You got to understand the situation's critical around the world, and energies are needed more for other things than running computers and servicing them, or not mechanically possible in coming time. And people are at home, and the traffic is too high too. We will announce this Persian common on-line. There is a Chinese guy who has taken up, and there is bunch of Iranians who are reported, they've taken the case of the Belgium, fraud or whatever, and they're splashing it everywhere. We will handle all of this with the Iranian security in time, and we'll handle with these people in time to come for what they've done. Just be aware there is a lot of money paid by Gates Foundation to stop the Keshe Foundation, we see it coming up very, very drastically. And they are using every trick in the book, the same, with what we see, the same problem with the people who are the supporters in the background with other mass media. They see their position in danger. We see attacks from the pharmaceuticals, but the reality is pharmaceuticals are shut. They work nothing. The only valuation is those who talk about having a vaccine, and...

In using the new plasma technology, you don't need a vaccine, and secondly, as you will see we're getting a lot of reports around the world, people who had the flu, who had the cold, who had other conditions, using the Cup of Life have seen the changes. So in a way, the viruses gradually we see, will be uprooted. But remember one thing. Keep on using the Gans for at least next 6 months. (2:14). Once a day spray your body, consume some of the fields of it, that protects you, if it orientates. Make it as I said, aftershave, perfume on your toiletry table, in your bathrooms on the shelf next to the toothpaste. This time is not saving your tooth, it's saving your physicality. And that's how crucial it is. I was talking to one of the Iranian scientists yesterday, and he wanted to know how long. I said next 3 to 6 months. We don't know, if it evolves, we evolve with it. It's the only technology which really what we don't need to go and get a new vaccine, we just evolve with it. And those of you who understand the work of the Cup of Man don't need to evolve with it, let it evolve with you. You soon will understand. We are not giving you, "the Cup protects you." We're giving you, the knowledge to elevate your soul, that the soul decides if the physicality needs the protection. It's a very big difference. "The Day of Judgment." In Farsi we call it [Farsi] and today is the birthday of Mahdi, and that day has come, for mankind to mature to his own mentality. [Farsi] (2:16).
Any other question?

(RC) We have a couple of attendees with their hands up here. Alvaro, would you like to go ahead? (AL) Can you hear me? (RC) Yes. (AL) Hi. Thanks, Rick. Thank you very much Mr. Keshe. I just want to clarify please about the Cup of Man. So if I have a depression or some problems in the emotion side, I will add the medicine that I take to the cup with zinc, the Cup number 2, sorry the Cup number 1, but if the problem is in the physical level I will put the medicine on the Cup number 2 is that correct, Sir?
(MK) Yes.
(AL) And how do I how do I use the medicine? I put straight in the water, should I put the medicine straight in the water of the cups?
(MK) Do you know something? Rely on your soul and see what it does.
(AL) Okay Sir. Thank you very much Mr. Keshe.
(MK) You're welcome.

You're the last man standing and it's you who has to carry this soul and the physicality. What was the cause of the emotion, (2:18). and what was the cause of the illness? What does the illness bring the freedom from, and entraps it in another dimension? This is the beauty of it. This is the beauty of the knowledge if you understand it, you don't need to interpret it. You do it because it's right to do, and the soul will tell you where and what. When you're in love, do you wait till the lover tells you "Love you," when you go out and buy a rose and you put it on the table, that by seeing the beauty of the red rose, she or he will understand the message. Or do you silently, in bed when she's asleep whispering in her ear, "I love you," that the soul hears, as the physicality's asleep. How many times you have walked to your children in the middle of the night and you have kissed them, and you tell them, "I love you," and they are in deep sleep, they turn round and they smile and go back. It's the soul which smiles, not the physicality, if you ever understood. And it's that easy to reach the Soul of the Man. We have just forgot it. (2:20). Because we love our children with pure heart and soul, now in a way, we have become the child of the Cup of Man. In a way, it's a completion. If you look, an atom, you have an electron and a proton and the two protect and exist. And is the Cup of Man has become and/or is the man has become? Those who try to analyze the structure and the Cup and what to put where, they're still stuck in their world of physicality and their soul has never elevated to understand the total knowledge.
Any question?

(RC) Stefania has her hand up. (SA) Si, hola. I wanted to do some question from the Italian team. Hello...
(MK) How are you today to start with? (SA) I'm better, yeah, I'm better, yeah. I can see that, (2:22). definitely for me, the GANS changed my life day by day, so really One Cup, One Life means, it literally saved me, means One Cup, One Life, because give me back my life. Because since I've been using the protocol... I could... a certain way I felt that it was giving my life back... I start to... it's just something as you know, as you us the... as you use the GANS and the protocol you... you... you know straight away, that is something really good for you, and because you use do Gans's as well, you also feel you got no fear, and you feel content. You know you're doing the right thing, so you got this situation where you have all this pain, and you know that your body's going a bit out of

control, but as soon you start the protocol, ... you know that is something good for you, you can feel it, and the fear disappears, and so for me it's been the best gift ever having this. I mean you as well, because you were there for me in my most difficult time, when I was on my own and had no one. So you and Mrs. Caroline, were there for me in the most you know difficult time. I think if you were not there I would not be here today. So, I told you many times, I owe you my life. …In one way, this experience, it just... I think it's been really good, I think it was a blessing, you know. As you taught us in the "MOZHAN," (2:24). make a problem to strength, I think this what happened. So the virus, initially it was a problem, because... I, I, I went to heal very quickly, but, but thanks to this gift that you give to us... the problem become a strength, because from that point I understood the miracle that this GANS do, and also they understood the importance of what we're doing, understood that this the only way to go forward and understood... I'm still learning, I'm still learning... but... I really, for me this is the most beautiful experience that has ever happened, and from that day it is like, I'm reborn. So I reborn into another way to see life, and this to me is the only way, it's exactly what you said, we have to be united, and together is not a problem. So, even though every day I feel much, much better, and for the first time now, a few days ago, I feel like I had my body back, like I'm starting to get strength back, and it's just a pleasure using the Gans. I really recommend it to everyone, to start to have this relationship with it.

(MK) Let me... Let me... Let me explain to people who do not know. Stefania is a MOZHAN, is a very handful of people who've been taught to become the leaders in the new and the future space technology. There's about 6 or 7 of them. They spent nearly, (2:26). some time with me in Africa and then in China, and they've been told to go back to their souls, and they understand this process. But the biggest problem is with Knowledge Seekers, is they never make things till it's needed. She didn't even make the Cup of Life, and she came to us with the pains, which we knew will come up. She was one of the very first who reported pain in her ovaries and the womb. The extension was very deep and... she was more or less in the critical condition. But she was there, she has the boldly spirit and we sat down with her, went through step by step. And this time it needs a cool head and... She has that mentality, Italian mentality, of seeing it through that it happened and that I carry on with it. And she's out of it. She's one of the Universal Council members who's been hit heavy by the Corona. We have another Universal Council member again was been hit by it very badly. And they both are coming out of it. As she said she starts feeling better, now, after a couple of weeks because the Corona destroys many cells and converts many cells and it takes 2-3 weeks to recover from these injuries. The body spends a lot of energy to do the repair and building new cells. So you don't feel... jump out of it, I'm there. It takes 2-3 weeks to gradually the strength come back. With the... Now there is all the energy, most of the repairs. And the more repairs are done, the more you go gradually back to daily life. It's not gonna happen today and tomorrow you run. So, and she says, (2:28). she's feeling more and more better because the damage was so extensive that all these cells damaged needs to be repaired. Carry on, Stefania.
(SA) Yeah, it's exactly how you describe it. It's like if I now I have the energy back. It's like the... if my body... even though I... I felt bet... better like last I felt a massive change

just after 15 hours. So from... from thinking I was dying and my body was out of control, as soon you start the Gans, you got this friendship going on, where you can tell the pain changing, diminish and getting better. But after... after... after one day I knew straight away, I was already out of dangers. But it's exactly what you said, even though you... now you're out of dangers and the virus is gone. It takes lots... it takes quite a while to get the energy back. So I felt we've... we've like my energy was not there. Even those... it's a... it's a paradox because I felt really good, mentally very, very uplifted and I was very happy. But you're right, it takes time for your body to full regenerating, and... And then you switch. Your body switch where you... you feels slowly, slowly you got your strength back. So it's actually a lovely experience to experience. That's why I really recommend everyone to use the GANS and use the plasma technology because it's such a beautiful... you're going for a very beautiful journey... and, and, and...
(MK) But did you wanted that, this journey?
(SA) I have to say looking back it's been the best thing that's ever happened Because you... (2:30). you know, I've been with you with the MOZHAN and I, I been in the Foundation for quite a bit and... maybe for me took this situation to truly understand the power of what we're doing and you know when... the unfortunate is like you said, through fear I, I... For example in my case, I learned the importance of what we were doing. It's when you have a comfortable life and someone introduce you a gift, like you did to us it's.... it's... it's beautiful and you... you make the best to understand it but because you're such in comfortable situation, it's... it's... it's not the same when... when you actually, you're fighting for your life and, and, and you have to take off all distraction you, you have to have to kind of... How can I say this?... It's... It's... It's... I remember when... When I had the virus and I was... in my mind there was nothing else than plasma technology and use the GANS. There was just that. The 15 hours when you were assisting me, very beautifully and I never forget that because you were there for me and, and when you assist me all that love I received from you and from the GANS and from the Nano-technology... It's... It's really... I don't know, it's unforgettable like... In my mind there was only this and I understood the importance at that point of what... yeah, what we were doing. So I don't think I would have understood that well without... I don't think... We... I agree with you Mr. Keshe. We don't need to suffer. I don't say that we need to go through this. (2:32). It's not... It's unnecessary. In my case I, I, I, I could see the benefit of it. Why I went through that. And... And the power of what we are doing. And I remember clearly from the MOZHAN that our bodies are a Ferrari. So and, and things that happen in the MOZHAN, it never happened, and we didn't use any... We use our body... our bodies as... as a GANS device and the things that happened there, they were unforgettable too. So now I compare the power of me using the GANS to cure myself, and also I compare my experience in the MOZHAN with you. That was like life changing and I can see that is the Ferrari. So now I'm trying to add everything up, like you said to us, that is like a puzzle, the things come together, and I can see... Somehow, I've got bigger picture and definitely your body is the Ferrari, so I understand your talk of today.
(MK) You're definitely an Italian. (
SA) Yes, red Ferrari.
(MK) I think... let me explain. We don't want to know about the engine. The... the thing is Stefania lives in England and she got contaminated by the Italians who came from Italy. This is the most probable way she got contaminated, very early group of people who got

contaminated, by the Italians coming from Italy. The way the virus was spread. There is another member here, who has been trough this. Do you want to speak about it? (2:34). Another Universal Council member who went through the Corona. And I think she's still battling it somehow. Would you like to speak?

(JM) Hi, Mr. Keshe. Hi, all. (MK) Hi, Jamila. Jamila is the Universal Council member for Arabic speaking languages around the world. Would you like to tell us what happened with you?
(JM) Yeah, yes, yes, sure. So, I don't really remember how I got it, because it's between maybe airport I was traveling back.
(MK) Let me just.... Can I explain? Jamila is the head of the Keshe Foundation in setting up the Health Centers and Research Centers in Arizona. She was in Arizona, setting up the center helping with John. And she just came back to France, just before the curfew comes in for the flight bans. She has landed few hours or a day before that. And that's where she thinks she could have caught it, anywhere. Carry on, please.
(JM) Yeah. So, I spent a long time in Mexico. I came from Mexico Airport, so maybe at airport. Maybe my sister come back... come to airport to pick me up from the airport So she was... (MK) In Paris? (JM) In Paris. Yeah. So, maybe my sister, maybe airport. I don't know exactly. So, I spent maybe 5 days when I come back to Paris, running everywhere to get my material, to set up my cups, and to set up Cups for my family, my friends. And... So, I did not... I know that there is this virus, but I was not afraid. I was doing what I have to do. 5 days after that, (2:36). I had fever. I said "Oh, okay. So it's there." And I did not have... my feeling was... I was very calm, I was not in feel... in fear. No fear, nothing bad in my feeling. I said "No problem, I have my Gans's," because I did my Cup of Lives... of Life... all the set in Arizona. I bring that with me. I brought all the kits to do the Cups for... for people here in Paris. So I was feeling secured. I have all... I have all the material, I know the teaching. I have Mr. Keshe, the foundation, all the Knowledge Seekers, so I am okay. And it went like that. So I inform Mr. Keshe about the... the... the situation he give me a really fantastic health instruction protocol, Caroline as well. So I was following all these protocols. So I felt much better after 3 days doing this first Cup of protocol... Protocol of the first Cup. But after four days, I got a very bad pain in stomach. I could not sleep, I had the fever back. And I saw.... I was thinking about the description given by Mr. Keshe about the virus, when he is in stomach. So I said "Oh, Mr. Keshe, I had another one." He said okay, this the bad one in stomach, so he gave me the protocol. He gave me instruction, he was following with me. (2:38). And I was following everything. So, if you want to know the protocol, you go to Wikipedia (kfwiki.org), you will see the details. So, 3 days protocol, day and night, and I felt much better and I was... I never had any panic or fear. So I was myself. I was thinking, "Oh, I am not afraid, I am okay, I feel even good, so I have what's needed." So, I have my angel Mr. Keshe. I have all the angels the Knowledge Seekers, Caroline, the Gans's. I feel very, very secured and very, how I can say that... Feel security, you know? Then...
(MK) Would you like to Would you like us to release some of your videos, the way you were wrapped?
(JM) Maybe I. (MK) You sent videos, this is how I'm wrapped, this is how I'm following the protocol. And you can hear the voice, the very sick and this is... We watch things, we

watch, we monitor, when we get involved in every step. And it's amazing how she recovered from the first and the second cycle. Carry on
(JM) I can... I can try to share that, it's in my phone. So let me just... I try, let me... give me one... one... two seconds. (JM) I stop sharing or you need to click. (JM) I.. just to find... video. I'm sorry, I have my voice tired. I'm still... One second. (2:40).

(MK) What is the strangest, if you listen to president Trump's recording past few days... He says, that he knows the hospital so well, he even knows the color of the paint, because he used to live there. He knows the size of the windows. And he was shocked seeing so many bodies in corridors. And with the Keshe Foundation technology, if it's reached the right time, the right way, there is no body bags. And it's for governments to make a decision.

You see, we say one lie can do a lot of damage. And you heard about the Shepherd and the wolf. The king of Belgium cried wolf and made us. And now the wolf has come. There is nobody to protect. Many people in the world have fallen for that falseful cry of wolf by the king of Belgium, and the Belgium Kingdom. And they listened to it, and now that their wolf has already come, is taking many lives, because of one, one man, the present King of Belgium. You will understand soon. He has to live with his greed, and his love affair and how many people have died because of it? We took that to the Italians last week and the week before, they're responsible for the deaths of so many Italians, (2:42). with what they did with the KF Italy. Now, is for the soul of this man and his understanding, how much he lied, created the false lies. And they have to live with the lives lost. Red Circle, especially Red Circle, now he has to answer to the souls lost, where it could be saved. Especially... Especially Mr. Bracquene, Philippe, the father, the police officer Delanoir. They have to answer and every life and their children's life have to answer, for the false cries they created, and so many people's lost life. And this, we will understand soon, the kings will put their own crowns down, because they know their lies, and it caused so many deaths. If they have... if they have honesty within themselves. Now we can see what damage that false court case has created. And now, all these rubbish notes on the Internet, people trying to believe in it... And you can see so many lives saved. Now they have to count for the lives they caused to loss. And I hope they can live with their souls. Red Circle, you have more, so much blood on your hands, it runs in millions. We'll see how your children pay for it and your blood.

Carry on, please. Have you found it, Jamila ? (JM) Yes, I switched to my computer. (2:44). (MK) Make sure it's out, don't show us the screen. (JM) Yeah, one second please. So after the bath... Can you see it? (MK) Yes. (shows video)
(JM) So after the bath, the... wet clothes, I am wearing here and all my stuff here, yeah, I have the wet towel for ten minute I have to get it, to keep it... to keep it 10 minute per hour on my head, Then I have to... wet... the wet clothes with sleeves as they told you, I prepared it. So I am wearing here all the clothes, wet under this up here, because it's cold when you are wearing wet clothes. So in addition to that, I am spraying all my face with the Cup number 1 GANS water. I am drinking the number 2. The GANS water from number 2 cup and GANS water from number 1 Cup, in combination of all that. So the wet clothes, the wet towel, the spraying, the drinking of the water. Every half hour I

change that. I go to the bath, inside my bath. I sit in on it, half an hour, 20 minute, half... an hour. Then I... I wear the wet clothes. Then I sprayed, I drink and I wear that on the head for 10 minutes. (2:46). I do this protocol each hour. I am changing it and I already feel... I'm already feeling much better. So, thank you very much Mr. Keshe, for your instructions, for your protocol, for your guidance, for your love and gratitude. Thank you so much. I am going to fight it. I don't want it to stay on my body anymore. So I am going to succeed. Thank you so much.
(MK) You look as very good, what we call it, Arab woman. Well covered! (JM) In this time we... I don't... I don't know. In which woman I look like, but... It was... Thank you, thank you so much, thank you. (MK) It is good to hear your laughter again. (JM) Yeah, so, as I told you, we have a lot of things to do, so I'm not willing to give up. I am here, I will be here. And thank you all. (MK) Thank you very much. (JM) You've welcome.

(MK) Thank you very much indeed. And the biggest problem is our Universal Council members, and especially support system people. You have not reached the way the Iranian team is working. They get infected and go back on it. It's just like going into quarantine and coming out. And... It's very, very strange. Very, very strange how I see it.

And in so many ways, maybe it's the right time to announce it. The Enhancement Unit is completed and it will be shipped to Austria in the coming days. And, we will fulfill the process as we said, (2:48). the distribution of the enhancement system. We see the enhancement system now to be spread much, much more important, especially for the cancers, which is forecasted by Keshe Foundation. Now the Russian scientists confirmed, back us up with this, with a scientific paper. And the French scientists announcement of the skin. Will be important, we have decided the Keshe Foundation, we discussed yesterday. We drop the price of the Enhancement Unit back down from 1 million to 250,000 euro, it will become affordable for most of the nations and we support them that way. As of today the Keshe Foundation units will come to 250 000, because the cancer cases will become so cumbersome that there is no technology to stop it. And I have already requested from the manufacturing base in China. to be ready to produce 100 to 500 units. And directly in process. We most probably, show you on the next couple of weeks the enhancement unit. Its beautiful. It works. And as the head of the Keshe Foundation, said looking at the video of it, she says; I like the name of... the voice of it. When it opens the gate it goes woshhh and when it closes it was woshh. It looks exactly like what it was made to be. Now with the gap in China, we have managed to complete it. And the enhancement units are ahead of time of delivery, as some expecting in August, July-August. In May we will deliver the first batches across the world to be ready for this process. And we have reduced the price to 250 thousand for the time being, that we can support. As we see Corona will take many lives. Many, many lives. (2:50). And we keep this for next couple of months to see how we can support. And we extend the production capacities in China, as we go to see how we can support, not to lose to cancer of the Corona, what we call, Corona.

It is our job. For the running of Keshe Foundation, as the head of the Foundation to Ella, over past 3-4 years as most of you know. To make sure everything it runs, it gives me the freedom to see everything gets done across the foundation organization worldwide. It is

good to have two very competent women, one in China and one in Europe. And to see that the two structure of the Keshe foundation are there to support and build a future for humanity. It's not any more Keshe Foundation one country, it's Keshe One Planet, and in the hand of two very competent women, both in soul and physicality to see it through.

I know there's some questions from the Italians. If you would like to ask the questions, please, Stephanie, are you there or has she dropped off? We don't have her, I think she's dropped off. Ella would you like... (RC) She looks to be there, but I don't know if... (MK) She's got her hands up (RC) Yeah. Stefania, can you hear us? (MK) Oh, yeah, she's translating... (SA) [Italian] (2:52). (SA) No, no, I am here, yeah I'm just now reading the question so... of the... One second, one second, because I got the two things going at the same time. So I'm now looking the question of the... the... yeah, okay so, Lara... she's from... She really helped me with the Italian team and she makes this question to Mr. Keshe and he says... she said...
Q: she would like to know if it's possible, she... Okay, she want to ask, if it's possible, to know how to increase the connection like Mr. Keshe do, to move her body, to move... like you do Mr. Keshe apparently, to move your body to people that are far. You know, in order to communicate. It's clear the question?
(MK) No, it's very alien.

(SA) Yeah. She ask... How she can increase this connection and she... she meant the connection that she... she thinks that you do Mr. Keshe. You can move your body in other places, to connect with people. She would like to know how can she improve that.
(MK) Become the Creator. That's the simplest way of it is.
(SA) Okay, Mr. Keshe... [Italian] [Italian] (2:54).

(MK) When... This has puzzled many, many, world leaders, now that you ask this question. We are present in their meetings and we hear their... or we listen to what they utter and what they plan, and then it has caused a huge problem in the White House, and even in China. How do we know so much, what is discussed privately, in private conversations, given, some places we don't want you to know. And this has had a huge problem for especially Obama administration. And now with the Trump administration with... the same with President Xi, and many of the world leaders. When we want to know we don't go, and we don't have spies. We just ask the soul, and it's furnished. It's just like... We don't listen to recording, we understand the motion taking. This is why we preempt so much, so many things in advance. When we announced on the 11th... what you call, on the 3rd of November in 2011, or December 2011, that we'll show the power of the technology, and the American drone was captured the next day. When we announced what is the plan, for the American disaster position with earthquake. And the same day after teaching on the Thursday, President Obama announced a new team for earthquake disasters. They listen to us, and at the same time we sit, within their soul, and it cannot lie. When I give you information it comes from the Source. (2:56). And this has baffled many world leaders, how Keshe Foundation reaches so deep, precise information. Because we sit within you. When the world leaders understand this, and when humanity understands this, when you call my name, I'm there within your soul.

And that's... that's what's the responsibility of the two heads of the Keshe Foundation in the coming time. And to teach, to ?? their students, to do the same. They are there in physical dimension, but in soul they are connected. The same as we established in the Universal Council members. You heard Stefania and you heard Jamila. These are connected to the soul of the language, and understanding of the soul of the language. But in the universe, we have one language, so I don't need to learn Arabic or Italian. We reach through the Soul of the Man. One day mankind will know who I am in the dimension of the Soul of the Creator, not in the dimension of physicality. I don't need to be. I don't need communication. We don't even have computers in the universe. These are all man-made physical dimensions of comfort, of cheating and whatever they do.

(SA) Lara, she's answer and she said "Thank you for the information you give me in my dreams".
(MK) This is the problem I reach many women in their dreams and they write to me. But I hope it's a good one and I hope it elevates your souls. (2:58). We concentrate in this dispensation on women, because they are the essence of the creation, and because it's them who brings up the next generation of the man to be just and correct. It is in the writing of Baha'u'llah, bless his name, simple description. He says: "If you have money to educate your children and you have one son and one daughter," in Islamic world and the rest of the world they spend the money on the boy. In the path of the belief of Baha'ullah, bless his name, he says; "Educate the woman, the girl, because she will educate the children of the future of mankind." And this is the same process.

The 9th is the day of completion in all numbers in the universe, and today is the day of completion. And in so many ways, the life of the man, the creation, the Creator, is the womb of the universe, the same as given to the woman. We come from the background of Zoroastrian Mithraism and it was based on those basis's. As I said many time, "A woman in the Iranian family is a point of respect and honor, not a tool for a man to abuse." And once the world understand, this you will understand what it means, (3:00). and why we chose the life giver, then the support. Educate your women to the best of your ability, and one of the successes you see Iran, in Iran, is 70% educated woman, who are carrying the nation. The men just bark, women build the nation. It will be the same for human nation, as One Nation. When a mother is educated well, she brings up educated people, correct people. When a man is educated correct, never do wrong. Because he never gets himself to the point of desperation, to do wrong. We know exactly what we talk about, and we know exactly how we structure. Man lost track, now we brought it back on track. Respect your women, because those are the ones who keep your culture, your language, your love and your children.

(SA) Lara, since she told me this, I said to her many times, okay, "Say hello to Keshe for me." And she laughed and she said, "Keshe told me that she come, he talks to you, but you never listen."
(MK) One of the most... One of the most... strangest women creatures you ever met is Stefania. You will understand. I spent long enough, as with the team of MOZHANs, with her in teaching. She is unique and is Stefania. (3:02). And she's the only woman MOZHAN, in the whole team. But she's something unique.

(SA) Thank you so much, I hope in a good way.
(MK) I don't know the bad way. (SA) Yes, yeah. There's another things, when I was in the MOZHAN, and it happened to me now, I cannot think about bad things. Like, you know sometimes you're doing nightmares, or you're doing bad dreams? When we were in the MOZHAN's, I couldn't do that, it's like, it's impossible. And the same here, I think, I can, I can see that we have a bigger MOZHAN here, happening. And we're creating condition for things... good to happen. I can see we're repeating a bigger massive scale MOZHAN.
(MK) Doug McDonald has written something very funny, but very nice. It says: "In the Scottish tradition the same, educate the woman, the man just bark, grow their beard and rattle their swords." So we're Scottish.

(SA) I have a question from a second Italian. (MK) Yeah. (SA) He's a man. He said: "I got a question. Why does criminals like Gates and the rest constantly torment this planet. Why they don't die, and leave free this planet from their grief? This is what he said.
(MK) You see, until we don't have these, we don't appreciate the process of peace. We have to see these people, (3:04). to understand, and with them they create the conditions to be where we are, that we can elevate. These people serve humanity in a... in a different way than they really want to do. The spread of virus. You see, something very interesting is that, up to now, there was no nobody, does ?? (care) that the Chinese were dying, or the Iranians were dying. We saw the Americans increasing sanctions on the Iranians in the time of trouble, and they got hit worse with it themselves. Now they went and they found the professor who made the virus. Up to now it doesn't matter, it was the others. What can you do? Tell the professor to put the genie back in the bottle? Cannot be done. And in this process, they serve humanity, because we could never do this, bring the banking to a halt, transportation to a halt. The whole world economy has come to a halt, and it's going to get even worse in next two weeks. And I... my team in Iran, were absolutely in a despair yesterday because of something that happened. And I said to myself, "They don't see it. Because it's not the time, they need another week." Because if we put the whole thing out in one go, and the world governments find a way. We haven't got there, they go back to normal. We have to go and reach a tipping point. As Jamilla said this, Stephanie said, many others. "When they come out of this situation, life changes, has a different meaning." And these people will start elevating their souls. You will understand, very, very soon. (3:06).

And strange enough you gradually come off the food. I notice even in our own household, our food consumption compared to 4 weeks ago, maybe 6 weeks ago, is a quarter, is a third. Because we are continuously around the Gans and we, like you, we protect ourselves, we spray ourselves. There is no need to eating. Gradually we are coming off eating in... I said to Caroline: "We... have you noticed?" Even yesterday we've discussing it. We're happy with very little. And it's, it's going through the transition. And this is what it was supposed to be, huh. The, the world lives on equal balance. At the moment, estimated three billions are lock down. Another 2 billion locked down in next two weeks. China will come out with a huge damages, because now we will see changes in China. Because they say there is, but I can show you pictures in past couple of days

from China. Motorways are empty. Motors are empty. Doesn't matter what the government claims. What the government claims is absolutely, utterly unbelievable.

This is, take it, if I can get my hands on it, this is taken from last Sunday. (3:08). Around about 3 o'clock in the afternoon, 4 million population, city. I want to show you how much China lies to the world. Because China has to come clear, that way we can move on. Because China has to come clear on how they used the technology, and how they applied it, and how much they lied to us, as the what we call, the world population. The lies told to the world population is unforgivable, they knew and even today, they're lying. .. I want you to see this picture, because then you know. The Chinese have come too far, and they have to change their attitude towards the world's population, and coming clean, in how they have used the, … I want you to see it. .. we'll try to delete some of it, this is a 3 o'clock traffic in one of the Chinese major cities. (3:10). And then you'll understand why we are calling on all nations to stop lying to their people, and start acting. This is … We are not talking about weeks ago, we are talking about today in China, I'll try to reduce it for certain security reasons, as it comes up to me on my other phones. How much, you are not going to go back to normality. It started in December, we are in April, March gone, and the whole world structure isn't working. China hasn't recovered, no way, by a long pole, as we say in English, I try to save the images … many of them and these same is literally, … (3:12). literally, governments have to stop lying to their citizens.

And if the Chinese government will choose the path of correct conduct, in a way, very correct conduct, we stand by them, it doesn't matter how, the way they tried to deviate. I especially take a big section out of it, that it can't be recognized for certain security reasons. But I show you the highway, this is a very specific, this is one of the major highways. in China, and the pictures are taken over seconds, that we, you see the full span of the same motorway. And this is 4 months into Corona… I send you the pictures and you can see the truth. Rick, it's on your system. sent to you 2 pictures, this is a major city, major motorway. 3 o'clock on a Sunday afternoon, understanding (3:14). China has no Sunday, Monday, Tuesday, more or less they work around the clock. You can count 1 car on the highway. Up to now we tried, today I showed you communication from the Chinese securities and reports that 10% survive. ... Now you see the truth, this is what is going to hit you. This is what is to come. I put 2 questions to the Chinese authorities, in a direct way. Emptiness of these highways, is when you are calling the whole nation is open, due to so many people dead, or is it that the economy collapsed so bad, that nobody is on the street. The truth is somewhere between the two. You have to understand, this is an artery, it's a main road, it's a motorway. If you have been on cities, even on Chinese New Year, you'll see hundreds of cars on the road, now you see, 1 on the other side, and 2 or 3 on this side. and that's a few seconds later. China is totally dead. (3:16).

And this will happen in Los Angeles, London, New York, Washington, Paris, and Rome. This is 3 o'clock Sunday afternoon, is it the 4th, 3rd of April, 2020. I said to one of the national securities in the past couple of days, show us the satellite images of your cities, then we'll believe. Live, that we can pinpoint and choose and read the number plate. You'll find out most of cars on the move are national security or police, and not many real people. The situation is beyond control on China, 4 months into it. My biggest fear

is, that they are going to stay empty like this for years to come, because there are no citizens. We'll loose more to Corona, and we'll loose more to the cancer of the Corona, and then the economy which collapse on the old age and the rest. Don't forget China has a huge, huge old peoples group. (3:18).

There is a message from one of the popular cities in the south of Iran, the mayor, and it says, spread this, spread this, and in his word he said something very interesting. He says, we want the policy from the president of Iran, is the policy to let 15 million people die. Is the policy to reduce, or are we going to save the nation. It seems the Iranian president sits with the 15 million payments from the American foundations. This is not our word, this is the word of Iranian mayor of a major city in south. This city was in the heat of the battles between Iran and Iraq, it is well respected, it's one of the cornerstones of the Iranian economy in the south. He says, spread the knowledge, spread this information, we want to know the clear direction, because these people sit at the head, and they are open to all information, and he clearly asks the president in name, clear my point, we have to know that we follow the policy.

The world leaders have a problem, and it depends on where their bank account sits. Do we allow this to happen to us or do we protect ourselves with the new knowledge, (3:20). or we find a way to save ourselves. Not necessarily with the KF, we never say we are the only solution, we tell you we are one of the solutions. .. This is from the mayor of .. he says who he is, it's in public domain, in Iran, we are not showing anything secret, but it clearly sets out a national policy, or clearance of a national policy, and the Iranian government has to make it clear, are we paying bribes to the Americans to kill our nation. Or who is taking the bank account? We don't play with games, they can bring the KF down, they can do anything. They won't touch us. Please play the video tape I sent to you and it can be translated by the Iranians. … It's very powerful if you understand, when a man in his position, as a mayor of a major city, puts a challenge to the president of the nation. Is the seat for that president, and his cabinet, and the people he has put in position, or the leadership has to pass on, to the Eminence Ayatollah K to decide for Iran, as he has done for years. Please play it, I will translate for you slowly what it says.. (3:22). .. He says, he is the mayor ?? , (speaks in Farsi ..)

(3:24). … K- He is the mayor of Musshad, a major city in the south and he says, we have 2 choices, we help people, or we let a lot of people die, the sick, the people who got AIDS, and the rest, and we'll loose 10 to 15 million people. He asks directly to the president of Iran, "you lay the line, what you decide we'll follow." Or we pay people and keep everybody at home for 1 month, and the sick people who come to the hospital, sorry, they die or whatever, but the healthy one stays home, we can start, and we can carry on. He says, we understand these 2 polices directly, so central government has to make a decision, which way we are going. The Sepah and Military are ready to execute either 2. To let 15 million people die in Iran, who are sick, who got everything. Or we go out and we save as much as we can. The decision making sits with the president, and he is asking directly to the president, make a clear decision, that ... This is the same in the White ..(cut in audio) the same in New York, London, and the rest. (3:26). His words, (Azar interrupts, he says) just wait .. can you block (She continues) K- Pardon.

Azar- He says there are 2 groups in the government, one of them wants to sit and watch people die, and they are thinking, we get rid of the old and the weak, and that is good for us. Or the other way, the other group says, look we can save everybody, and if you put money, about 30 million, ?? and give everybody about 2 million, ?? and 2 million for 2 months, they can sit home for 1 month, in quarantine, and then what's going to happen, he said everybody, but it is up to the president, to decide now, which way you want to go, do you want to sit and let all these people 30 million people die, or do you want to save everybody. Now you choose your position, which way you want to go, because the Sepah and army are ready to execute this to help people, but if you want to sit and let the weak and the ones who have diseases to die, that is your choice. It means if you sit and you don't do this, it means you want people to die.

K- Yes, but we heard the same thing, policy, pass in the British Parliament, by the government this week, the past few days. That people with conditions, with respiratory conditions, heart conditions, over a certain age, will not be resuscitated if they go to the go to the hospital. The British government has already confirmed what he is trying to say as the mayor Musshad ?? It has become the policy in the UK, and is a hidden policy in most of the nations in Western Europe. In countries like India and Philippines it is the only policy, because there is nothing left. This is where we sit, we in the KF are sitting in the same dilemma, (3:28). with the government today. There are those who have taken bribes, and they want to enforce their policies, those who sit with the pharmaceuticals who are trying to sell vaccines to Iran, are letting many people die. It is the same with all the governments. Gates Foundation has put all the money bribing, all the world leaders, governors, that, let us do, you get the money, we get our vaccines and we get the control. This man, as a mayor of a city in Iran, who is a policy maker, he is fed up of seeing people dying. You can see he is wearing his mask around his head.

We have this problem, is not only in Iran. Gates Foundation has bribed all the world leaders. I can show you letters of it. It will bring shame to Chinese administration. They have taken nations to ransom. But we'll see, we'll survive. Human race will survive. Maybe 100 million die, 200 million die, 1 billion die, but the rest will survives will suffer in next few months. Exactly like Fukushima. In Fukushima (Hiroshima), few thousand people died when the bomb came. Many, many more died from the side effect of it. And they still die after nearly 70 to 80 years, (3:30). because of it. The reduction in population through Corona is made to crown one person. They wanted to bring it, to run, to rule. And there's one thing, I have a message for all of them, "not in my time, not in my space." Not in my time, not in my space. Today is my time, and my space.
Any other question?

(AB) Mr. Keshe, I just want to add something. In Iran, the people who are in that election, who are choosing to let people die, they are the same people who are waiting for the vaccines dose and make profit out of it, that's what it is.
(MK) Yes, we know that. And they all carry American passport, they were educated in the U.S. Iranian cabinet, on the first election day, when it was announced, had more American educated doctors on the cabinet, than in Trump's cabinet. They all carry double

passport. Trump in a private talk said, "I wish I had so many Iranian educated people in his cabinet, than mine, then I knew how is, how I can handle it." (3:32).
(AB) Mr. Keshe, I want to tell you a story.

(MK) Let me, let me, tell you something. Let me tell you something. When the Iranian president went to U.S. to give a talk to United Nation as you understand, he was confined to a square block, that he could not go anywhere. And in an interview he said, very interesting, but people never understood. He said, 'we've been through all this city during, when the time we were getting educated, we know this New York like the back of our hand. We don't need to go out now.' They're all American educated, and the vaccines are sold, through the damage.

But the reality is, what is the outcome for us as a human race? Or, what I see, due to lack of leadership in Iran, there is no need for election. Except direct rule of Ayatollah Khamenei on all matters from now on. Until a correct government is elected in Iran. We don't deal. The... the whole understanding of the whole, the same is... the same in Italy, in Holland, in Belgium, in Germany. Governors have to decide how to govern collectively. What you'll find out, union will split apart, because did not deserve, did not serve. You got to understand, the...

Why I stand so much behind the Iranian nation, is not only because I was born there, I'm connected with my blood to it. It's just because I know how the nation has suffered, (3:34). in the hand of all the boycotts, and it still stands so resilient. Hasn't gone backwards, is has become more advanced in technology, because it had to look inwards to develop what was needed. And this has created a special breed in Iran. Highly intellectual, talented men and women. And soon... and soon you'll understand, there'll be a need for it. Because, in so many ways, we shall see one thing, mankind will mature through the soul, and the soul of... for those who matured first, will become the light for the others to mature from. And if you go by tradition to the flag of Iran, we carry the sun. Iran will shine, but not only for Iran, but for the humanity. But what is interesting is, how world governments have failed to serve their nations. You're all at home. There is no money coming in. There is no food on the table. We've seen the looting in the state. People literally ransacking supermarkets. If you haven't seen it, I can show you a few. In China people are, out of hunger came on the streets, because it was Corona or hunger. And they... they were not dying of Corona but they were dying of hunger. There was no money in the bank from the 4th week of lock-down, 3rd week of lock-down. They came, you can kill us but at least we don't... and they put people against the wall. (3:36).

In some cities more people got shot, than died of the Corona. Now you understand why some of the cities are empty. Some factories work, some people tried to get going, because they had to support and feed. I understand this, I've been through this, I went through the Iranian revolution, and I went through the opening of the Eastern Bloc. There were factories in Bulgaria and Rumania. I traveled across Europe, on a daily basis, a weekly basis, looking at the factories that were there, but people had no food to eat because nothing could be produced. We worked at it, we understood the problem, we … so hard, that trying to bring, what we call, job, food, back into the situation. I have been

there, I have done it before. I know what it is, when I tell you how it is going to be, it's not going to be so easy. It took us 5 years to move Bulgaria and Romania after the opening. And this is worse then the opening, there is nothing left. There will be nothing left. This is the biggest problem, the biggest problem for mankind, how are we going to recover from this disaster, (3:38). it won't be easy, there is no money to start, shipping has blocked, and the situation is worse than many of you can imagine. Banks will be the same as before, would they be backed by the government to save the banks, or would the government instead of giving $2,000 checks, will write a total company check, that they can pay their wages, they can pay their people, and they bring the economy, this time the right way. That will take at least a year. Many companies have gone bankrupt. The solution is not and can't be resolved overnight. Shutting down and restarting is not that easy. I have been through it. I went through it with the Eastern bloc. Maybe that's why, was, that it brought me the insight of what's going to happen. It's not an easy job, if you understand what it means when the economy collapses. In another 2 weeks the US, you'll have no economy. What's going to happen to us, how are we going to bring these jobs back? How are we going to handle the looting, who is going to pay for it. How are you going to feed yourself, (3:40). if you don't use the Cup of Life (CL), the Cup of Man, at least to be able to carry the energy. The situation is not that good, but the situation is worse than you think.

The biggest problem is, would the Africa survive, this better then Europe and America. We see in South America, disaster is worse than what we thought, streets, bodies not collected. People just putting their dead bodies on the street, because they can't bury it, most can't afford to burying it. The reality is who are these people hoping to lead. Or actually lead a nation, that exists to lead. (3:42). It's very easy to be a leader of a mental institute, you got to be another one yourself. And it seems Gates condition is heading that way. One imbecile trying to lead the others.
Any other question?
…
Q: (In Spanish) (3:44). Does the proximity of 5G effect the production of Gans's and Nano (N) coverings?
K- There is a discussion, and there is a big discussion in a number of KF KS asking this question, and in so many ways, we, you can't say a hundred percent, "no." But, in so many ways, we cannot dismiss it anymore, but the problem with G5 is, has a resonance of 60 kHz, which matches the oxygen (O) according to the scientists. This is the problem, that if we understand this, we can blame a lot of things for it. We got to keep an open view to it, because it can effect O, but what we don't see in the structure of Corona, is connected to Na, the salt of Ca. (3:46). The salt of Ca is very far in frequency, or what we call, resonance away from O. But in the combination of certain cells, they can be an interference, but it can't be proven. I spoke to ?? you, but it can't be, but it can be, there is a possibility of it. But it just happened that the two have come together. So a lot of people are trying to connect it. If you study the papers which are coming out on G5, it is horrendous. As you know, some of the countries are burning these G5 lampposts. If you see them, they are like a street light stand, and we have seen many effects on it, on the plants, on the trees and many things. What is the problem, in Iran we don't have a G5. We asked the questions from the authorities, is there a G5 operating in Iran, because officially

there isn't, and they say there isn't. And I know there is no such G5, as such in India. So it doesn't connect, it doesn't tally. In Africa we don't have G5 as such. In South America we don't see G5 as such. (3:48). Even in US they are trying to catch up with G5. So there is not such a solid collaboration between the two. We say, no, but still there is a reserve point, that if it is, what it does, it's the way, it's transmitted its energy packs, as a frequency, as information. peaks ??? 60, which is around about O. …

Maybe the G5 will damage cells, create diseases, without a shadow of doubt, it will do. But it is not connected to or ?? to Corona. We have to be very clear about these things. We know, I have seen so much pictures, and documentaries, and people literally on the street pictures, send you pictures and you can see it. But yes, it will damage, without a doubt, it will do, because as I told you before, we have done tests on masts, communication masts on top of the buildings, and we know it does effect certain people, but it has its own damages, we don't see a connection to Corona. G5 definitely creates damages to cells, there is no doubt, hundred percent it does. Scientific report supports it, everything else is supporting it, (3:50). and physical evidence of it supports it. But it has it's own damages, it's not that, what do you call it, deliberately will cause the, as some people are trying to connect it. It will definitely create damage, we have seen it, the evidence is too heavy, not to.. and it's so clear, not to, and how we'll handle it. We can't connect it to Corona, and blame Corona for it, or it brings Corona, it brings damages, like all the masts, and it will create conditions, but we can't connect the two together at this moment. But, yes, I am a firm believer, that G5 has damages beyond repair, because I see it, but I will not connect it to Corona. R- If it makes, like a depletion of our immune system, as humans, say, 5G being covered all over the earth basically, and if it gives a general depletion of that immune system that, and leading to other diseases, and so on, would that be also leading toward more Coronavirus, The Coronavirus seems to attack the weaker, like older people and people with weaker immune systems, and so on?
K- We can connect that to anything. (3:52).
R- Well this is the thing, and some doctors who are in the know, say there is only one disease, and it's the environment which is , are the environment of the cells, basically. And the environment with the 1G, 2G, 3G, 4G, are all interfering with the cellular process and making more problems? K- Everything we do interferes with the some.. R- This is the thing, and we got the air pollution, the food chain disrupted, all of our industrial processes are coming back to bite us now, and making us weaker, as a population. K- You are the best what do you call, sample of oil damage.. R- Yes, absolutely, oil damage. … you want to have a poster of someone damaged by oil, I have the history to prove it, but it's also, in a way I am thankful because it has given me my, superpowers in a way to carry on with you Mr. Keshe, and to keep going on with this technology because both of us, and all the KS know that is the way forward. This is the biggest opportunity in the history of this planet right now, due to this funny little virus, which is effecting every single country and every single military, and all of the institutions right down to the coffee shops of the world, and all of the things people have been relying on for many years. (3:54). But what a... What a beautiful opportunity to be able to showcase the plasma technology. As you're introducing in Iran and well, all over the world as we have been doing for years. All the seeds have been planted and now the

fruits are... the plants are... are sprouting and the blossoms are coming out, in many ways I think.
(SA) And also we never had... I mean the only difference now is, the, the... we've got the plasma technology on our hand, and we understand the soul teaching. So now, we got new tools never seen before.
(RC) Yes, confidence. Confidence going forward with those tools, exactly.
(SA) These problems are not problems any more, because I really love the wish that we make. When, we just wish that we elevate the souls not just in the Earth, in the Universe, galaxies, in Unicose. That give us so much strength at the soul level that all this 5G and Corona virus or other problems that has been around up to now, are not anymore a problem anymore. It's just matter of fact of start to develop this self responsibility, that each one of us has the duty to understand it. Now... Now with this new knowledge that Mr. Keshe presented to us. We got no excuse to feel like victims of anything right now. And if we got united we understand the power of each one of us has, (3:56). in their hands and we get self-responsible each one of us, of what we can do, all these things just disappear in thin air. It's really not a problem anymore if you focus on what we been learning up to now.
(RC) Exactly! Perfect. Yes we focus on the solution rather than the... than making it a problem. That's the difference I think.
(AB) Stefania, actually the Keshe knowledge in Iran has become a virus.
(MK) But you have to realize...
(AB) Keshe knowledge in Iran has become a virus. And then I have news for people, the Gates people, that you wanted people to... with this what you created, you made Keshe Foundation go to every single home in Iran. In villages, people are listening to Keshe knowledge. I mean this is a bad news for you. Because Iran has become what... the center of the knowledge as Mr. Keshe says. Really, really bad for you guys. And you know Mr. Keshe, you know... When you're talking about these people have both passports, Iranian passports. It's absolutely true. Because I tell you a story; when I was 17 years old, and we just moved to Tehran, because, I wanted to go to university, medical school. We bought the apartment in Tehran, in a new building. And then I remember that time. It was beginning. It was beginning of the commotion in Qom. And then, there were a couple just came from United States, they were educated here, she had a PhD in nutrition, and then he had the PhD in economy. And I remember, that time they even brought the whole furniture from United States, even the plates, spoons everything. Because I used to go to their house, and they had a little girl. And then I remember, after the revolution happened and everything finished. I mean this woman was totally American, she had... she was wearing mini-skirt, that her... My father wouldn't allow me to wear mini-skirts, and then, she was completely American. (3:58). And then after the Revolution happened, I saw... It was finished and I saw... One day I went to their house, because I was gonna... It was something, a plate, something, my mother gave me to give it to them. I went and knock on the door, ringing the bell, and then, she opened the door. I see she has this scarf, completely covered the face, and this hijab that she would... like a... like a... like people in Qom that are traditionalists. And I said, and I came up, and then I told my mother what happened to these people, like she is covered from head to toe? And then, I realized the husband... I found out the husband got the job as a minister, in one of the ministries of Iran, in Tehran and the wife got some high position in the health department or

something. And then I saw how... and that time, I told my mother, "How strange people, change position as if, you know, you wear mini-skirt one day, the next day, you've covered from head to toe. What happened here?" So these are the people who just change the position are going to what the environment is.

K- You see, this is the same problem in Chinese government. The Chinese government says many of the people at the top, carry American passport. ?? specially with the Chinese, many times... the CPC level. There are rumors some of the CPC members carry American passports, and they are working for the Americans. Chinese army is standing solid, Chinese military and even there, they have some reservation.

I said to when in... a close friend of mine, very recently, that one of the passports will be sought after, by many, very soon, it will be the Iranian passport. (4:00). Just to come and get educated. To get a visa to be able to fit into universities. But in so many ways, we should take this knowledge to every university across this planet, as One Nation. And, in so many ways, if we move, if the Iranian government move fast enough in next 2 weeks. I don't expect everything out of Iran overnight. Because, they're doing some beautiful work, especially the people in Tehran Military University. And the others. And fighting with, what we call, the American side of the Iranian administration working group. That this, we need this time. My view is very clear. The... The Keshe foundation group in Tehran are very, very... they wanted to go out tomorrow, but I keep on pushing. Yes, get it done but I know we need another 2 weeks to 3 weeks. You will understand when in 2 or 3 weeks time, if the Keshe Foundation is still up and running, if the Zoom is still operating, and if you as foundation members will keep in touch with each other, on the roots level, and spread knowledge. That the knowledge after this, will gives us one option, and that option is Space. You will understand it, if we would've left it the way it is, we will not reach anywhere. We will be like this. You heard one of the richest men in the world, gave 1 billion yesterday for one group for Corona. You give that 1 billion to Keshe Foundation, we'll stop all the Corona ?? But it shouldn't happen.

You got to realize something on the other side, (4:02). understanding the bigger picture. The departure of so many souls at this time through Corona, and whatever, or because of it, has multiple reasons. Once, is that brings men to the maturity of having no respect for wealth and governance, because they govern themselves. Secondly is the opening of the space to man. As we see no more wars, as we see no more things to do, and the Corona has taken most of whatever it wants to take, many organizations, seeing the work of the Foundation, understanding of it, will concentrate on developing it. And we will see opening of the space. If we wanted to do the way we were, it could've taken us another ten years. Now the governments will spend time and money. And development at the new technologies as there is no more war. And organizations like Keshe Foundation, be it from Arizona to China will take the lead, because there will be many people will claim they've been with foundation. And they are there, and they have been there years, because now it's prestigious to be. But you'll find out these souls will fall out. And in so many ways, the ground is getting ready for opening of the totality of human race, welcoming the Universal Council, Universal Community. You will understand soon.
